Construction of New Secondary Data Center

Japan Exchange Group, Inc. (JPX), with the aim of guaranteeing further stability in operation of JPX markets, has been advancing discussions on the construction of a new secondary data center (backup center) based on the "Second Report of the Technical Committee on Exchange Transactions" published by the BCP Forum on April 20, 2017. JPX hereby announces its decision to build the new secondary data center in a location that is at a greater distance from the main data center to prevent simultaneous disruption in the event of disaster.

JPX plans to incorporate systems for trading and other functions into the system architecture at the new secondary center in stages to match the replacement schedule of the relevant systems.

JPX asks for your understanding and support as it proceeds with advancing the Business Continuity Plan and remains committed to ensuring market confidence.
