

Addition of Financial Information Data Dataset to Data Distribution Service J-Quants Pro for Corporate Users

Today, April 26, 2024, JPXI will add a financial information data dataset to J-Quants Pro, which is a service that distributes financial data related to the Japanese market to corporate users in an easy-to-use manner.

Two APIs are included in the financial information data dataset: Financial Summary Data and Financial Statements (BS/PL). Financial Summary Data API allows you to obtain summary data of earnings reports disclosed by listed companies on a quarterly basis. Financial Statements (BS/PL) API allows you to obtain detailed data in the balance sheets and profit-and-loss statements that accompany the quarterly earnings reports.

For detailed data specifications, please click on the following link.

About J-Quants Pro (<https://jpx.gitbook.io/j-quants-pro>)

Distribution Data and Pricing Plans

With J-Quants Pro, you can now acquire the following six datasets, including the newly added financial information data dataset. Users may choose the datasets that they need and use them on a monthly subscription basis.

Please note that there are two types of subscription plans (Single Entity and Affiliated Company) for each dataset, and each plan has its own monthly fees (the datasets may not be distributed to external users).

Provided Datasets	Data Period	Monthly Fees for Internal Use (Single Entity) (Excluding Tax)	Monthly Fees for Internal Use (Affiliated Company) (Excluding Tax)
Listed Issue Information	Since May 7, 2008	JPY 50,000	JPY 130,000

Trading by Type of Investors	Since January 16, 2008	JPY 20,000	JPY 40,000
Detail Breakdown Trading Data	Since January 4, 2010	JPY 250,000	JPY 400,000
