3. 3   File provision when no data is recorded
　　　If no new data is created at the time of provision, a blank file with only field names is generated and provided.

3. 4   Time of File Provision
　　　JPXI will update each files listed in above 3.1 once a day and provide the files every business day to subscribers. Files are existed till the files are replaced by the files on the next business day.
　　In principle, the distributed files contain the same information disclosed on the web on the same day.

　　With some exceptions (*1), the file distribution time schedule can be selected from the two patterns described below. Distribution is based on a data-accumulation method. Data generated within one hour prior to each fixed time can be identified by "notification date".

　　(*1) Information on "Change in Company Name," "Change in Trading Unit," "Delisting," and "Change in Securities Master" are distributed on a daily basis only.

　　　<Scheduled distribution at specified time>
　　　Except for "Change in Company Name," "Change in Trading Unit," "Delisting," and "Change in Securities Master," the data outlined in 3.1 above will be generated and distributed by overwriting existing files every hour from 12:00 to 19:00 of every business day. The last file generated on a certain day will be available until file provision time on the next business day.
　　　In principle, the distributed files contain the same information disclosed on the web on the same day.

Data record start time (*2)	18:31:00 on the previous business day							
Data record end time (*2)	11:30:59	12:30:59	13:30:59	14:30:59	15:30:59	16:30:59	17:30:59	18:30:59
Files containing data generated in the above time ranges are be created at (*3)	12:00	13:00	14:00	15:00	16:00	17:00	18:00	19:00

　　(*2) Data for which the "Announcement Date/Time" falls between the start and end times of the applicable range are distributed in each respective file.

　　(*3) Files may be generated before the scheduled time depending on the time required to process the data.

3. 5   Data Format

The following conditions are applied to all types of corporate action events.

・"Field Name" will be set in the first line of the CSV file.

・One byte comma is set between each field.

・Len (Length) specifies the maximum length of the data. Maximum length does not include the single bite double quotation marks described below.

・In all files, each data item is surrounded by single bite double quotation marks ("). Field names are also surrounded by (")

  This format is also applied to data in which Null is set, in which case the field will appear as "" .

  However, (") will not be displayed if the file is a CSV file opened in Microsoft®* Excel.

  *Microsoft® is a registered trademark of Microsoft® Corporation in the United States and/or other countries.

Appendix 1 (Details on Reference Number)

   This service assigns a unique reference number to each corporate action event /record.
 There are three types of reference numbers:.

    1) CA Reference Number
        Reference number assigned to each corporate action event

    2) Reference Number
        Reference number assigned to each record

    3) Previous Reference Number
        If the record is revised or deleted, the reference number for the record prior to revision or deletion will be set at the bottom of the record within the file

  (Example)
        The following shows how the three types of reference numbers are set for one specific company.

      (1) 6th Feb   Dividend information is provided as a new record (New)
      (2) 7th Feb   Dividend information is revised (Revised)
      (3) 8th Feb   Dividend information is deleted (D.Date)
      (4) 9th Feb   Rights Issue information is provided as a new record (New)

	C A Reference Number	Reference Number	Previous Reference Number

Appendix 3 Posting of Numerical Data

LEN values noted for numerical data include codes and decimal points (with the exception of codes and dates).
Below is the display format to be followed for each type of data.

No	LEN	Display Format	Content	Remarks
1	8	NNNNNNNN	Integer (8)	
2	11	sNNNNN.NNNN	Code(1) + Integer(5) + Decimal Point(1) + Fraction(4)	
3	21	sNNNNNNNNN.NNNNNNNNNN	Code(1) + Integer(9) + Decimal Point(1) + Fraction(10)	
4	22	sNNNNNNNNNNNNNN.NNNNNN	Code(1) + Integer(14) + Decimal Point(1) + Fraction(6)	
5	26	sNNNNNNNNNNNNNNNNNNNN.NNNN	Code(1) + Integer(20) + Decimal Point(1) + Fraction(4)	
6	27	sNNNNNNNNNNNNNNNNNNNN.NNNNN	Code(1) + Integer(20) + Decimal Point(1) + Fraction(5)	
7	28	sNNNNNNNNNNNNNNNNNNNN.NNNNNN	Code(1) + Integer(20) + Decimal Point(1) + Fraction(6)	

s ： Indicates sign. Only displayed when negative.
N ： Indicates numerical data.
