Operating and Financial Review

The following operating and financial review of JFM, which forms the remainder of the Supplement, is based on information contained in the unaudited semiannual financial statements of JFM as of and for the six months ended 30 September 2021 and, with respect to the amounts of loans under "— Overview" below and the

amounts of bonds issued under "— Liquidity and Capital Resources — Fund-Raising Operations for the Six Months Ended 30 September 2021" below, the accounting records of JFM, and is intended to convey management's perspective on the operating performance and financial condition of JFM as of the date and during the period under review, as measured in accordance with Japanese GAAP. The following supplements the operating and financial review as of and for the years ended 31 March 2020 and 2021 contained in the Base Prospectus.

Overview

JFM's net income for the six months ended 30 September 2021 decreased by 3.8 per cent. to ¥9.2 billion compared to ¥9.5 billion in the six months ended 30 September 2020. The decrease was primarily a result of decreases in interest income and special gains, notwithstanding decreases in interest expenses and special losses. JFM's ordinary income for the six months ended 30 September 2021 decreased by 12.4 per cent. to ¥49.4 billion compared to ¥56.4 billion in the six months ended 30 September 2020. The decrease was due primarily to a decrease of 11.5 per cent. in interest income to ¥113.8 billion in the six months ended 30 September 2021 partially offset by a 11.4 per cent. decrease in interest expenses to ¥60.7 billion.

Based on its lending plan, JFM extended 6,522 loans to local governments in an aggregate amount of ¥1,048.7 billion with the consent or approval of the Minister for Internal Affairs and Communications and prefectural governors in the six months ended 30 September 2021. These loans included:

- loans, for a total of ¥464.9 billion, for general account-related businesses such as local road construction and special municipal merger projects;
- loans, in the amount of ¥72.2 billion, for temporary financial countermeasures funding to make up for a shortfall of local allocation tax pursuant to the provisions of the Local Government Finance Law;
- loans, for a total of ¥52.9 billion, for municipal enterprise-related businesses such as sewerage and water supply; and
- loans, for a total of ¥458.5 billion, for covering decreases in local tax revenues.

In accordance with its fund-raising plan, during the six months ended 30 September 2021, JFM issued ¥797.9 billion (issue price) of public offering bonds without government guarantee, ¥273.5 billion of private placement bonds without government guarantee subscribed to by pension funds and mutual aids for local government officials, including the Pension Fund Association for Local Government Officials for lending, and ¥160.0 billion (issue price) of government-guaranteed bonds to refinance the existing government-guaranteed bonds of the Predecessor to smoothly manage the Predecessor's assets to which JFM has succeeded.

Factors Affecting Results of Operations

Reduction of JFM's Reserves for Interest Rate Volatility through Transfers to the National Treasury

JFM manages assets and liabilities succeeded from the Predecessor in its management account. JFM manages its other assets and liabilities in its general account. For a breakdown, see note 11 to JFM's unaudited semiannual financial statements for the six months ended 30 September 2021. Total assets and liabilities in the management account are expected to decline as time passes because no new loans or bonds (other than bonds issued to refinance Predecessor bonds) have been issued in this account since October 2008 and no such loans or bonds are expected to be issued.

Under the JFM Law, if any assets remain when the asset management operations of the Predecessor are completed and the management account is closed, those assets shall be returned to the national treasury. Even before the management account is closed, in the event that the businesses of JFM are determined to have been executed smoothly in light of the condition of the management of JFM, the Minister for Internal Affairs and Communications and the Minister of Finance (the "**Ministers**") shall, if the management account reserve for interest rate volatility and the management account surplus reserve are determined to exceed the amount necessary for the smooth operation of the asset management operations of the Predecessor in the future, cause the amount that is determined to be in excess to be transferred to the national treasury. Accordingly, JFM has regularly made transfers of varying amounts to the national treasury from its reserve for interest rate volatility maintained in the management account. Under current determinations by the Ministers, the following amounts are to be transferred

to the national treasury from JFM's reserves for interest rate volatility maintained in the management account within the specified time frame: (i) up to ¥1.5 billion over the six-year period ending 31 March 2024, of which ¥0.06 billion has already been transferred, (ii) ¥230 billion over the five-year period ending 31 March 2025, of which ¥80 billion has already been transferred, including ¥20 billion during the six months ended 30 September 2021 and (iii) ¥400 billion over the two-year period ending 31 March 2023, which the Ministers subsequently reduced to ¥200 billion to be paid in the year ending 31 March 2023. In response to these determinations, JFM plans to make additional transfers of (i) ¥0.08 billion during the year ending 31 March 2022, (ii) ¥170 billion over the four-year period ending 31 March 2025 and (iii) ¥200 billion in the year ending 31 March 2023. The completed transfers have not had, and JFM does not expect the additional planned transfers to have, a material effect on JFM's business, results of operations or financial condition. This is due primarily to the fact that the margins on the management account loan portfolio are generally improving in the current low interest rate environment because bonds are being refinanced at lower rates and that interest rate risk in the management account is expected to decline overall as the size of that portfolio declines over time.

Net Interest Income

Six Months Ended 30 September 2020 Compared to Six Months Ended 30 September 2021. JFM's net interest income decreased by ¥7.0 billion, or 11.8 per cent., from ¥60.1 billion in the six months ended 30 September 2020 to ¥53.1 billion in the six months ended 30 September 2021. This decrease was mainly due to a decrease in interest income caused by a decrease in the average interest rate on loans as a result of maturities of loans made in the past with relatively high interest rates. While the decrease in interest income was offset by a decrease in the interest expense caused by a decrease in the average interest rate on bonds as a result of the maturity of bonds issued in the past with relatively high interest rates, the offset was only partial due to the longer average term of the maturing loans compared to the average term of the maturing bonds.

Net Fees and Commissions

Six Months Ended 30 September 2020 Compared to Six Months Ended 30 September 2021. JFM's net fees and commissions expenses were relatively unchanged in the six months ended 30 September 2021 compared to the six months ended 30 September 2020.

General and Administrative Expenses

Six Months Ended 30 September 2020 Compared to Six Months Ended 30 September 2021. JFM recorded general and administrative expenses of ¥1.6 billion in the six months ended 30 September 2021, which were relatively unchanged from the six months ended 30 September 2020.

Ordinary Income

Six Months Ended 30 September 2020 Compared to Six Months Ended 30 September 2021. JFM's ordinary income decreased from ¥56.4 billion in the six months ended 30 September 2020 to ¥49.4 billion in the six months ended 30 September 2021, a decrease of ¥6.9 billion or 12.4 per cent. The decrease was due to the factors described above.

Special Gains and Losses

Six Months Ended 30 September 2020 Compared to Six Months Ended 30 September 2021. JFM recorded special gains of ¥21.9 billion in the six months ended 30 September 2021 compared to ¥42.3 billion in the six months ended 30 September 2020, a decrease of ¥20.3 billion or 48.2 per cent., which mainly reflected a decrease in the reversal of management account reserve for interest rate volatility due to a decrease in the payment to the national treasury in the six months ended 30 September 2021. Special losses decreased from ¥89.1 billion in the six months ended 30 September 2020 to ¥62.1 billion in the six months ended 30 September 2021, a decrease of ¥27.0 billion or 30.3 per cent., which mainly reflected a decrease in the payment to the national treasury from ¥40 billion to ¥20 billion.

Net Income

Six Months Ended 30 September 2020 Compared to Six Months Ended 30 September 2021. As a result of the foregoing, JFM's net income decreased from ¥9.5 billion in the six months ended 30 September 2020 to ¥9.2 billion in the six months ended 30 September 2021.
