1. QUALITATIVE INFORMATION ON OPERATING RESULTS DURING THE CURRENT QUARTER

(1) Qualitative Information on Consolidated Operating Results

The consolidated operating results of the TSE group (the Company, consolidated subsidiaries and affiliated companies accounted for using the equity method) during the nine months (from April 1, 2011 to December 31, 2011) were affected by the sluggish market conditions due to circumstances such as the Great East Japan Earthquake and concerns over European debt problems. Under these circumstances, reduced revenue from trading participation fees and listing fees led to operating revenue of ¥39,094 million (7.2% decrease from the same period of last year (i.e., year-on-year)) and operating expenses of ¥33,104 million (1.9% increase year-on-year), resulting in operating profit of ¥5,989 million (37.7% decrease year-on-year).

The TSE group saw ordinary profit of ¥7,527 million (33.6% decrease year-on-year), income before income taxes and minority interest of ¥7,527 million (33.0% decrease year-on-year), and net income of ¥4,320 million (37.4% decrease year-on-year).

3 Assets and liabilities for hedging risks of securities trading TSE Group's consolidated subsidiaries Tokyo Stock Exchange, Inc. and Japan Securities Clearing Corporation (collectively, "Exchange") have established various systems including receiving clearing funds, based on the Financial Instruments and Exchange Act and the Exchanges' internal regulations, to hedge the risks of securities trading in the market. Japan Securities Clearing Corporation, as a clearing organization for financial instrument transactions, underwrites the liabilities and acquires the rights from the clearing participants that arise from the conclusion of a transaction when a securities trade is concluded in the market, and bears the risk of nonperformance of obligation by the clearing participants from the time the transaction is concluded until settlement is complete, and therefore receives clearing funds (margin funds for when-issued transactions, margin funds for derivatives, deposits for clearing funds, and deposits as collateral for facilitating settlement) from the clearing participants based on the Financial Instruments and Exchange Act and other laws and regulations. In addition, Tokyo Stock Exchange, Inc. bears the risk of brokers in securities trades from the nonperformance of obligations by trading participants, and therefore receives legal guarantee funds from the trading participants based on the Financial Instruments and Exchange Act and other laws and regulations. The assets for all of these deposits are cash or substituted securities (limited to those securities approved under internal regulations), which are kept segregated from other assets, with the cash portion shown separately under assets or liabilities for the respective purpose of the deposit.
