The 3rd Japan-China Capital Markets Forum

The 3rd Japan-China Capital Markets Forum was held online on Wednesday, September 7, 2022 by the Japanese Financial Services Agency (FSA), Japan Exchange Group, Inc. (JPX), the Japan Securities Dealers Association (JSDA), the Investment Trusts Association, Japan (JITA) and Chinese securities regulators and related industry organizations.

The Japan-China Capital Markets Forum serves as a platform for securities regulators and related industry organizations from both countries to strengthen multi-layered cooperation and promote concrete cooperation between their securities markets, based on the agreement reached at the Japan-China Summit Meeting in October 2018. This Forum was the third, following those held in April 2019 and January 2021.

The Forum gathered representatives from major Japanese and Chinese securities markets organizations and other related parties including the FSA, JPX, JSDA, JITA, China Securities Regulatory Commission (CSRC), and Shenzhen Stock Exchange (SZSE).

Also, the Forum saw a large number of online participants related to the Japanese and Chinese markets, who heard keynote speeches by FSA and CSRC on the progress of Japan-China securities markets cooperation, as well as reports of recent achievements of collaboration between the two countries' capital markets, such as the launch of joint promotional activities by JPX and SZSE, the signing of a memorandum of understanding between JPX and China Financial Futures Exchange on cooperation in derivatives markets, and the revision of "Comparison of the Investment Fund System between Japan and China" by JITA and the Asset Management Association of China.

Furthermore, on the theme of further strengthening capital market cooperation, securities regulators and exchanges of the two countries discussed initiatives and cooperation for further cultivating and developing Japanese and Chinese capital markets, and JSDA and the Securities Association of China discussed the role of capital markets in an aging society.

FSA, JPX, JSDA and JITA will continue to work to contribute to the development of the capital markets of both countries through initiatives including the Japan-China Capital Markets Forum.
