· Telephone Number	+81-6-4706-0800
· Competent Authority	Financial Services Agency
Date of Production	September 21, 2021

**Alert: You are about to purchase a product that is not simple and may be difficult to understand.**

### What is this Product?

#### Type

Market Transactions of Derivatives under Article 2, Paragraph 21, Item 1 or Item 2 of the Financial Instruments and Exchange Act

#### Objectives

- A commodity futures transaction is (a) a transaction comprising a purchase and sale in which the parties promise to deliver and take delivery of an underlying commodity and its value at a fixed time in the future ("physically-delivered futures transaction") and (b) a transaction, with respect to prices of an underlying commodity and an underlying commodity index, comprising the parties' promises to pay and receive an amount of money calculated based on the difference between the numerical value of an underlying upon which the parties agree in advance and the actual numerical value of the underlying at a fixed time in the future ("cash-settled futures transaction"). The buyer ("long position") is (a) a party who receives an underlying commodity or (b) a party who receives the amount of money when the actual value exceeds the agreed value, while the seller ("short position") is (a) a party who delivers an underlying commodity or (b) a party who receives the amount of money when the actual value is lower than the agreed value.
- The transactions are conducted in accordance with the classification of contract months which respectively have the last trading day. The long/short position can be closed by transactions on the opposite side ("resale/repurchase") until the last trading day, given that liquidity is sufficient. The position for which resale/repurchase is not made until the last trading day shall be settled (a) by delivery ("delivery settlement") for physically-delivered futures transactions or (b) by using a final settlement price ("final settlement") for cash-settled futures transactions. On the other hand, in case of rolling spot futures, which are perpetual contracts with daily rollover of positions and have no last trading day, the long/short positions can be closed only by transactions on the opposite side ("resale/repurchase").
- When the transaction is effected to open a position, no initial payment is made between the buyer and the seller. Margin is required for collateral. The gross profit or loss of the buyer is as follows: (a) in case of settlement by repurchase, the amount obtained by multiplying the difference between the selling price and the repurchase price by the trading unit; and (b) in case of delivery or final settlement, the amount obtained by multiplying the difference between the selling price and the delivery or final settlement price by the trading unit. The seller realizes a gross profit if the repurchase price, the delivery or final settlement price is lower than the selling price and a gross loss if it is higher than the repurchase price.
- The price of commodity futures is determined according to the balance of supply and demand for the transactions.

Selling this product (opening a short position) holds that you think the underlying price will decrease. Your maximum loss is unlimited and the amount of loss increases as the underlying price rises. The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The scenarios indicated in the graph illustrate a range of possible returns for this product at maturity.

**What happens if OSE is unable to pay out?**

OSE is an operator of financial instruments exchange markets. It does not act as counterparty to any market participant with regard to any transaction traded on OSE. Any transaction traded on OSE is centrally cleared by Japan Securities Clearing Corporation ("JSCC"), which is a designated clearing house of OSE.

**What are the costs?**

**Costs over Time and Composition of Costs**

OSE charges trading fees to its trading participants. The following table shows the basis of calculation for trading fees and the trading fee rates. The trading fee rates indicated below are the fee rates or the range of fee rates which apply to individual products under this product category.

Product Category	Basis of Calculation	Trading Fee Rate
Commodity Futures (Physically Delivered Transactions)	Trading Volume	JPY 59
Commodity Futures (Shanghai Natural Rubber Futures) (Cash-settled Transactions)		JPY 59
Commodity Futures (Cash-settled Transactions excluding Shanghai Natural Rubber Futures)		JPY 5
Commodity Futures (Rolling-Spot) (Cash-settled Transactions)		JPY 20
Commodity Index Futures (Cash-settled Transactions)		JPY 20

Note that JSCC charges clearing fees to its clearing participants.

The details can be found in the fee schedule posted on our website:

<http://www.jpx.co.jp/english/rules-participants/participants/fees/index.html>

There are no recurring costs for this product charged by OSE and JSCC.

The person selling you or advising you about this product may charge you other costs other costs including recurring cost. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

**How long should I hold it and can I take my money out early?**

OSE does not prescribe recommended and minimum required holding period for this product. The position can be closed by resale/repurchase until the last trading day, given that liquidity is sufficient. The position for which resale/repurchase is not made until the last trading day shall be settled by delivery or by using a final settlement price. Trading fees and clearing fees for transactions are charged to the relevant trading participant and clearing participant respectively when closing the position by resale/repurchase. On the other hand, trading fees for delivery settlement and clearing fees for delivery or final settlement are charged to the relevant trading participant and clearing participant in case of delivery or final settlement.

**How can I complain?**

In case of complaints about this product and the conduct of OSE as PRIIP manufacturer, please contact OSE by e-mail ([ose\\_priipkid@jpx.co.jp](mailto:ose_priipkid@jpx.co.jp)) or in writing (2-1, Nihombashi-kabuto-cho, Chuo-ku, Tokyo 103-0026, Japan). In case of complaints about the conduct of the person advising on, or selling, the product, please contact the person directly.

**Other relevant information**

Contract specifications of the individual products can be found in our website:
