Outline of J-NET Trading Rules

As of November 17, 2025 Osaka Exchange, Inc.

Item	Details	Remarks
I. Outline of Trading 1. J-NET Trading	 J-NET trading refers to off-auction futures and options trading conducted in the J-NET Market, which is independent of the auction market, and includes the following types of trading. a. J-NET single-issue trading The trading of a futures or options contract of one contract unit or more (excluding flexible contracts) in accordance with OSE's specifications. b. Flexible single-issue trading The trading of a futures or options contract of one contract unit or more (limited to flexible contracts) in accordance with OSE's specifications. c. Compression trading The trading of an OSE-determined combination of futures and/or options contracts and their volumes in accordance with OSE's specifications. 	- However, for Nikkei 225 mini Options, it is ten contract units or more.
2. Eligibility	 All futures and options contracts (excluding Nikkei 225 micro Futures and TAIEX Futures) shall be eligible for J-NET trading. 	 Index futures and options that OSE has specified separately shall be eligible for compression trading.
3. Trading Method	 Bids and offers shall be executed for the following types of J-NET trading in the following cases. a. J-NET single-issue trading When a bid or offer is matched with a countering offer or bid b. Flexible single-issue trading When a bid or offer is matched with a countering offer or bid c. Compression trading When all of the bids and offers made by trading participants who have submitted their applications for compression trading in accordance with OSE's specifications (in the case of bids and offers placed on behalf of a customer, "all of the bids and offers" refers to those placed on behalf of said customer) are matched 	 When OSE deems that the price of a bid or offer is not appropriate in light of trading conditions in the trading sessions and other factors, the trade shall not be executed.
4. Trading Hours	 Japanese Government Bond (JGB) Futures and Options on JGB Futures 8:20 a.m 3:15 p.m. 3:25 p.m 6:00 a.m. the next day 	 OSE may temporarily change trading hours when necessary.

Item	Details	Remarks
Item	Interest Rate Futures 8:20 a.m 3:15 p.m. 3:25 p.m 6:00 a.m. the next day Index Futures (Excluding Nikkei 225 VI Futures) and Options 8:20 a.m 4:30 p.m. 4:45 p.m 6:00 a.m. the next day Nikkei 225 VI Futures 8:20 a.m 4:30 p.m. 4:45 p.m 7:00 p.m. Commodity Futures (Excluding RSS3 and TSR20 Rubber Futures) and Options on Commodity Futures 8:20 a.m 4:30 p.m. 4:45 p.m 6:00 a.m. the next day RSS3 and TSR20 Rubber Futures 8:20 a.m 4:30 p.m. 4:45 p.m 7:00 p.m. Securities Options (Excluding Flexible Contracts) 8:20 a.m 4:30 p.m. Securities Options (Limited to Flexible Contracts) 8:20 a.m 4:30 p.m. 4:45 p.m 6:00 p.m.	- On their respective last trading days, the hours for J-NET trading of the following index futures and options shall be from 8:20 a.m. to 3:30 p.m.: index futures based on the Nikkei 225 Total Return Index, index futures whose final settlement price is the closing value of the futures' underlying index on the futures' last trading day, and index options whose option settlement price is the closing value of the options' underlying index on the options' exercise day. - On their respective last trading days, the hours for J-NET trading of securities options whose option settlement price is the closing price of the options' underlying
5. Venue of Trading6. Orders	 Trading shall be conducted through the trading system. However, compression trading shall be conducted by means other than the trading system. Orders for futures and options contracts in J-NET single-issue trading shall be placed at integral multiples of the price unit specified for each product within the price fluctuation range in Attachment 1. 	security on the options' exercise day shall be from 8:20 a.m. to 3:30 p.m.
	 Orders for flexible futures and options contracts in flexible single-issue trading shall be placed at integral multiples of the price unit specified for each product within the price fluctuation range in Attachment 2. Orders for futures and options contracts in compression trading shall be placed at the following prices for the following types of products. a. Index futures The settlement price of the index futures contract (i.e., the price specified by Japan Securities Clearing Corporation (JSCC) as its settlement price) on the previous trading day	

Item	Details	Remarks
	The settlement price of the index options contract (i.e., the price specified by JSCC as its settlement price) on the previous trading day When a trading participant intends to make a simultaneous sale and purchase of a futures or options contract in J-NET single-issue trading or a flexible futures or options contract in flexible single-issue trading, said trading participant shall simultaneously place an offer for said contract and a bid to counter said offer. Orders for J-NET trading shall be canceled at the end of each of the trading hours.	
7. Contract Units	 The contract units for J-NET trading shall be the same as those for futures and options traded on the auction market. This shall also apply to options that are only available as flexible contracts. 	 For Nikkei 225 Total Return Index Futures, a contract unit shall be the amount obtained by multiplying the value of the Nikkei 225 Total Return Index by JPY 1,000.
8. Notification	 When a J-NET trade is executed, OSE shall notify both trading participants (the seller and the buyer) of the details. 	
9. Trading Suspensions and Temporary Trading Halts	 OSE shall suspend each type of J-NET trading when necessary. When OSE temporarily halts the trading of futures and/or options contracts in a trading session in accordance with the Static Circuit Breaker rules, it shall also temporarily halt the J-NET trading (excluding compression trading) of said futures and/or options contracts (as well as any options contracts that are only available as flexible contracts and whose underlier is a futures contract that is subject to the Static Circuit Breaker rules and experiencing the temporary trading halt). 	 For details, please refer to the "Static Circuit Breaker Rules" document.
II. Positions and Settlement	 Open sales and purchases in the J-NET Market shall be counted as positions, and no distinction shall be made between those for the auction market and those for the J-NET Market. Settlement by offsetting sales and purchases in the J-NET Market shall be conducted in the same manner as that for the auction market. Final settlement for positions in the J-NET Market that have not been settled by the last trading day shall be made along with those in the auction market. However, the following exceptions shall be made with respect to the time by which customers must issue instructions for exercising their securities options. When a customer entrusts a trading participant with exercising securities options that were traded in the J-NET Market after the closing of the afternoon session on said options' exercise day or securities 	

Item	Details	Remarks
	options that were traded in the J-NET Market related to give-ups executed on the exercise date, the customer shall issue the trading participant instructions on the amount of said options to exercise by 4:45 p.m. When said options have intrinsic value, OSE shall deem that the trading participant has received instructions for exercising said options from said customer. However, this shall not apply if said customer instructs the trading participant not to exercise said options by 4:45 p.m.	- The standard deadline is 4:30 p.m.
III. Mark-to-Market	 Positions in the J-NET Market shall be marked to the market based on the settlement price along with those in the auction market. Unrealized gains/losses between a customer and a trading participant that originate from trading in the J-NET Market shall be transferred along with those that originate from trading in the auction market. 	
IV. Margin	 The required amount of margin shall be calculated by combining trading in the J-NET Market with that in the auction market. 	
VI. Trading Participant Fees	 The required amount of fees shall be calculated by combining trading in the J-NET Market with that in the auction market. 	
VI. Publication of Open/High/Low/ Closing Prices and Trading Volume	 OSE shall publish the Open/High/Low/Closing prices and trading volume for each contract. However, notification and publication of flexible single-issue trading shall be made on the following business day if the notional principal amount of the executed orders for flexible futures and options contracts in flexible single-issue trading is greater than or equal to the amount specified by OSE.
