

Static Circuit Breaker Rules

As of May 26, 2025
Osaka Exchange, Inc.

Item	Details	Remarks
1. Temporary Trading Halts (1) Index Futures	<ul style="list-style-type: none"> When bids (or offers) for the lead contract (defined by OSE as the most liquid contract; the same shall apply hereinafter) of an index future (excluding mini and micro futures) are placed at the upper (or lower) price limit on orders, OSE shall promptly perform a temporary trading halt of all index futures (including mini and micro futures) with the same underlier as the lead contract for at least ten minutes. However, OSE shall not perform a temporary trading halt in any of the following cases a. to d. <ul style="list-style-type: none"> a. When the above-mentioned triggering event occurs at the same end of the price limit on orders after it has been expanded at said end twice on the same trading day b. When the triggering event occurs within 20 minutes of the end of the regular session of a day or night session c. When the triggering event occurs due to an erroneous order placement d. When OSE deems that a temporary trading halt is not appropriate in light of trading conditions and other factors 	<ul style="list-style-type: none"> For Nikkei 225 Futures and TOPIX Futures, the lead contract is defined as the most actively traded contract of the previous trading day's trading session. For Nikkei 225 Dividend Index Futures, it is defined as the third nearest contract from January to March and the second nearest contract from April to December. For other index futures, it is defined as the nearest contract. The Static Circuit Breaker (SCB) rules shall not apply to TAIXEX Futures. The price limits on orders of Nikkei 225 VI Futures and Nikkei 225 Dividend Index Futures may be expanded an unlimited number of times on the same trading day.
(2) Index Futures and Index Options	<ul style="list-style-type: none"> When OSE temporarily halts the trading of an index future in accordance with (1) above, it shall also temporarily halt the following types of trading a. to c. for the same duration as said index future. <ul style="list-style-type: none"> a. The trading of index options with the same underlier as said index future b. Strategy trading that would result in the sale or purchase of said index future c. J-NET trading (excluding compression trading) related to said index future and the index options indicated in a. above 	
(3) Japanese Government Bond (JGB) Futures	<ul style="list-style-type: none"> When bids (or offers) for the lead contract of a JGB future (excluding cash-settled futures) are placed at the upper (or lower) price limit on orders, OSE shall 	<ul style="list-style-type: none"> For 10-year JGB Futures, the lead contract is defined as the most

Item	Details	Remarks
	<p>promptly perform a temporary trading halt of all JGB futures (including cash-settled futures) with the same underlier as the lead contract for at least ten minutes.</p> <ul style="list-style-type: none"> However, OSE shall not perform a temporary trading halt in any of the following cases a. to d. <ul style="list-style-type: none"> a. When the above-mentioned triggering event occurs at the same end of the price limit on orders after it has been expanded at said end once on the same trading day b. When the triggering event occurs within 20 minutes of the end of the regular session of an afternoon or night session c. When the triggering event occurs due to an erroneous order placement d. When OSE deems that a temporary trading halt is not appropriate in light of trading conditions and other factors 	actively traded contract of the previous trading day's trading session. For 5-year JGB Futures and mini 20-year JGB Futures, it is defined as the nearest contract.
(4) JGB Futures and Options on JGB Futures	<ul style="list-style-type: none"> When OSE temporarily halts the trading of a JGB future in accordance with (3) above, it shall also temporarily halt the following types of trading a. to c. for the same duration as said JGB future. <ul style="list-style-type: none"> a. The trading of options on JGB futures with the same underlier as said JGB future b. Strategy trading that would result in the sale or purchase of said JGB future c. J-NET trading related to said JGB future and the options on JGB futures indicated in a. above 	
(5) Interest Rate Futures	<ul style="list-style-type: none"> When bids (or offers) for the lead contract of an interest rate future are placed at the upper (or lower) price limit on orders, OSE shall promptly perform a temporary trading halt of all interest rate futures with the same underlier as the lead contract for at least ten minutes. However, OSE shall not perform a temporary trading halt in any of the following cases a. to d. <ul style="list-style-type: none"> a. When the above-mentioned triggering event occurs at the same end of the price limit on orders after it has been expanded at said end twice on the same trading day b. When the triggering event occurs within 20 minutes of the end of the regular session of an afternoon or night session c. When the triggering event occurs due to an erroneous order placement d. When OSE deems that a temporary trading halt is not appropriate in light of trading conditions and other factors 	For interest rate futures, the lead contract is defined as the second contract.
(6) Commodity Futures	<ul style="list-style-type: none"> When bids (or offers) for the lead contract of a commodity future (excluding cash-settled futures other than Shanghai Natural Rubber Futures) are placed at the upper (or lower) price limit on orders, OSE shall promptly perform a temporary trading halt of all 	For commodity futures excluding Shanghai Natural Rubber Futures, the lead contract is defined as the farthest
