Introduction

SusHi Tech Tokyo 2025 What are we aiming for?

400 years ago, “Edo”, ancient Tokyo practiced the principles of a Circular Economy.

In May 2025, Modern Tokyo, inheriting that DNA,
will become a hub for innovators and bold young challengers.

We will envision the future of cities, spark innovation, and drive action – together.

We will address humanity’s global challenge:

Creating sustainable cities through cutting-edge technology.

The number of participants is at an all-time high. The inaugural Public Day had over 10,000 attendees.

- ◆ Number of participants: **57,000** (up 17,000 from the previous year, +44%), of which in-person attendance: **43,000** (up 20,000 from the previous year, +86%)
- ◆ A new public day was held, with **14,000** participants including families and middle and high school students, experiencing advanced technology from startups.

Category	2025	2024	Increase and decrease
Real participants	43,705 Business Day (2 days): 28,854 Public Day : 14,851	23,448	20,257 (+86.4%)
Online viewing*	13,993	16,758	-2,765 (-16.5%)
Total	57,698	40,206	17,492 (+43.5%)

*Business Day only (online streaming, public viewing)

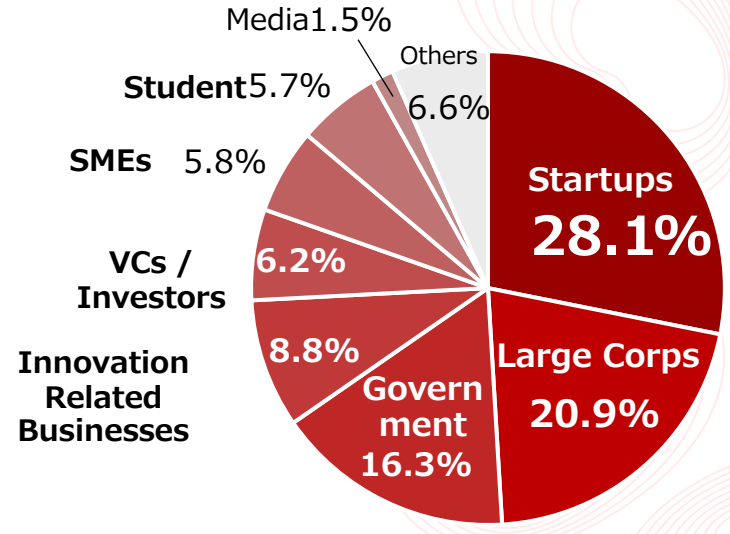

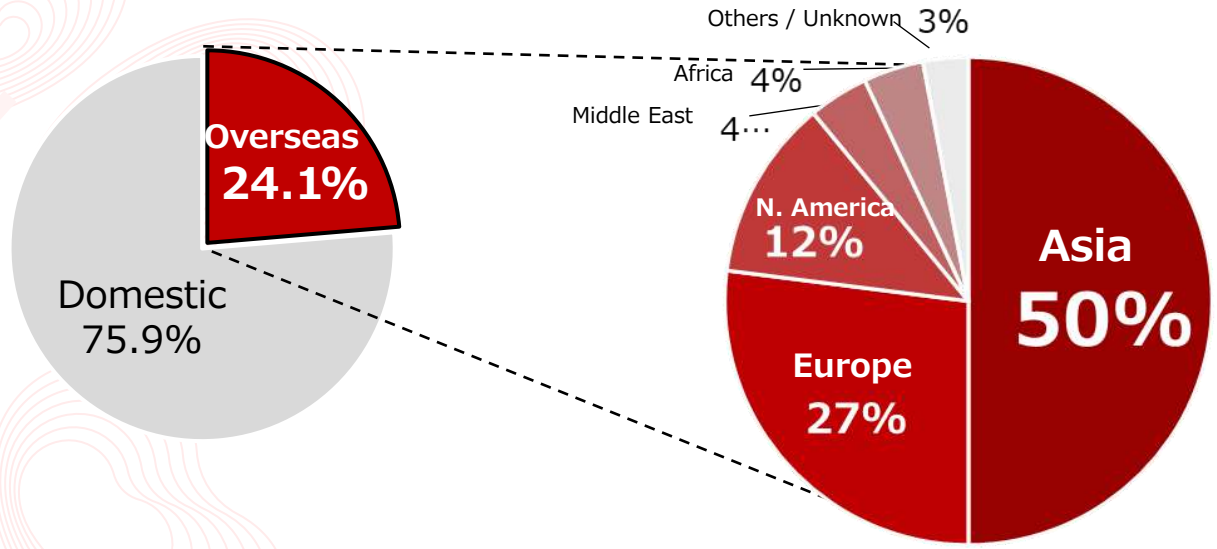

On Business Day, participants from 100 countries (up from 82 countries last time) attended.
The proportion of startups has expanded.

Speakers List

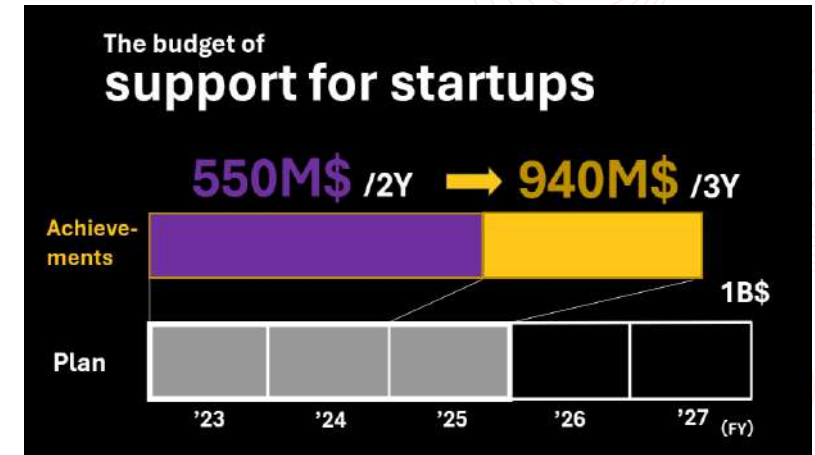

Opening: Towards a Sustainable and Resilient Society in an Uncertain World

"In these uncertain times, we aim to identify shifts and foster a sustainable, resilient society through a global perspective. This initiative includes sessions focused on global challenges, interactive exchanges with urban and corporate pavilions, and activities led by young changemakers.

Leveraging Tokyo's strengths, rooted in the sustainable DNA of Edo, we are driving innovation forward. With the expansion and enhancement of TIB, we are also launching "SusHi Tech Global," a dedicated program to comprehensively support top-tier startups with sustainable technologies.

Our goal is to accelerate growth trajectories and cultivate globally impactful unicorns that thrive on the world stage."

Governor of Tokyo: Yuriko Koike

Tokyo's University Presidents Discuss Academia as an Important Breeding Ground for Tomorrow's Changemakers

(5/8 Innovation Stage 12:00-12:45)

As the role of universities diversifies with the times, nurturing change makers who can transform society has become increasingly critical. Universities are tasked with cultivating individuals who can collaborate across diverse backgrounds to create new value and tackle pressing challenges. Establishing environments to support this mission has become an urgent priority. In this session, presidents from historically renowned universities in Tokyo engaged in a thought-provoking discussion on the new challenges facing academia and its role in shaping the future.

Unlocking ASEAN Markets : Opportunities and Expectations for Japan's Young Entrepreneurs

(5/9 Innovation Stage 10:30-11:15)

The economic growth of Southeast Asia, including Thailand, has fueled consumer demand for higher-quality living, creating significant opportunities for Japan. Japanese products, particularly cosmetics and food, are highly valued in the ASEAN market for their premium quality. By leveraging the "Japan brand" and partnering with local businesses, Japanese companies can tap into the 800-million-strong Japan-ASEAN market, driving both regional development and corporate growth.

Next generation Energy Markets and Global Trends: Stakeholders' Role in Fostering Climate Technology

(5/9 Impact Stage 11:00-11:45)

This session explored the role of clean energy investors in advancing climate tech across development stages, leveraging diverse funding sources such as philanthropy, venture capital, and project financing. It also highlighted early-stage innovations by portfolio companies aimed at achieving sustainability and circularity in clean energy.

A Bird's-Eye View of City Planning : Reinventing Infrastructure and Well-Being

(5/9 Impact Stage 13:00-13:45)

Addressing urban challenges requires more than a collection of partial solutions. Amid rapid technological advancements and shifting perceptions of quality of life (QOL), a fundamental transformation of urban structures is essential. Piecemeal approaches alone are insufficient; a comprehensive perspective that reimagines urban infrastructure as a whole is needed to drive meaningful and sustainable change.

~ Discussing Future of Technology (Focus on: AI) ~

Digital Public Goods & AI: Transforming the Society (5/9 Innovation Stage 12:00-12:45)

Digital public goods are gaining attention as powerful solutions to global challenges such as population decline and social inequality. In this session, centered around the concept of plurality, discussions were held on how rapidly evolving AI can accelerate the development of digital public goods and how these technologies can transform our lives, economy, and society, incorporating practical examples.

How Can Humans and AI Co-Create a Sustainable Future? (5/9 Innovation Stage 16:30-17:15)

A diverse group of experts, including AI platformers, startups, and economists, gathered together. They viewed AI as a human supporter and co-creation partner, discussing from various perspectives while introducing the latest trends and implementation examples of AI. Additionally, they delved into predictions about how the social implementation of AI will progress from this point, considering the next five years and beyond.

~ Discussing Future of Technology (Focus on: Quantum) ~

Quantum Technology: Paving the Way to a Sustainable Future

(5/8 Innovation Stage 13:00-13:45)

Exploring how quantum technology can realize a sustainable future. Experts discuss the innovations brought about by quantum technology, such as improved energy efficiency, environmental protection, and the development of new materials. They also consider what social transformations can be expected as the practical application of quantum technology advances, providing new perspectives and approaches for building a sustainable society of the future.

Quantum Ecosystems and Frontiers of Quantum Technology Development Across Nations

(5/9 Impact Stage 15:00-15:45)

This will provide a detailed introduction to the quantum ecosystems of various countries and the latest trends in quantum technology development. International experts will gather to discuss the advancements in quantum technology from the perspectives of policy, industry, and academia. By sharing the efforts and success stories of each country, it will offer valuable insights to grasp the trends of next-generation technological innovation through understanding the forefront of global quantum technology. Sessions will provide insights into the future of quantum technology.

~ Discussing Future of Technology (Focus on: Food Tech) ~

Innovating for Sustainable Agrifood Systems: Feeding the Future, Protecting the Planet, Harnessing Startups, Science and Solidarity for Global Impact

(5/8 Innovation Stage 15:00-15:45)

Innovation, especially that driven by bold startups and visionary technologists, is the key to supporting the future of food and protecting the planet. The FAO (Food and Agriculture Organization of the United Nations) believes that by harnessing the power of science, data, and digital tools, we can usher in a new era of more resilient, inclusive, and sustainable agri-food systems. However, this innovation cannot be achieved by any single entity alone. We need partnerships that connect public policy, private ingenuity, and grassroots innovation.

Japanese Traditions x Technology: Food culture and industry know-how that we should pass on and create the future

(5/9 Tokyo Stage 14:00-14:45)

How to preserve and evolve Japan's food culture, skills, and technology, and apply them to the future food industry. Fermentation technology, seasonal ingredients, regional food cultures, soybean, seaweed, and fish-eating cultures, rice consumption, and rice cultivation techniques—Japan's food traditions, cultivated over a long history, are attracting attention from around the world. How traditional techniques and cultures evolve and are inherited through cutting-edge technology will be discussed as long-established companies from the Muromachi period and startup companies come together to connect the past and present, explore the potential of food tech to create the future, and discuss the necessary actions to shape the future food industry and food culture.

- New Trend in DEI Created by Young Entrepreneurs
- Support for Female Researchers and Engineers
- Technology for Women Pioneered by AI
- etc.

Special Contents **Focus on**

This program spotlights trending technologies with sessions led by prominent figures, exhibitions and pitches by innovative startups and corporations, and demonstrations of cutting-edge advancements.

AI

The rapid evolution of AI is bridging the gap between the digital world—text, images, and voice—and its **implementation in the real world**, such as autonomous driving and robotics. AI is beginning to integrate seamlessly into daily life.

This event will foster discussions on **how this transformation will reshape urban environments and citizen lifestyles, and how society can harness these changes effectively.**

- 10 Expert-Led Sessions
- Autonomous Vehicle Display
- Startup Exhibitions
- Stakeholder Networking Events
- Partner Events

Quantum

Quantum technology, regarded as **a key enabler of AI advancement**, is also anticipated to **address challenges like rising energy consumption**. Breakthroughs are emerging, driving it closer to practical application.

This event will explore the latest trends in research and development by startups, as well as the transformative potential of ultrafast computing that surpasses supercomputers, envisioning **a future where such capabilities become "the norm"**.

- 2 Expert-Led Sessions
- Quantum Computer Mockup Display
- Startup Exhibitions
- Pitch Presentations by 11 Companies
- Stakeholder Networking Events

Food Tech

While humanity faces critical challenges such as global population growth, food shortages, and environmental strain, food continues to bring happiness to people's lives. This program will explore sustainable and **regenerative** approaches to food and agriculture—focusing on creating solutions that are eco-friendly, delicious, and healthy. Discussions will take a holistic view of the **entire supply chain** to address these pressing issues.

- 6 Expert-Led Sessions
- Product Tastings
- Startup Exhibitions
- Pitch Presentations by 6 Companies
- Stakeholder Networking Events
- Partner Events

Actual Self Driving Car on Display

Various AI related startups exhibiting

A Special Discussion with Tokyo AI Strategy Council Members

- **AI serves as a tool to improve the world, society, and Tokyo.** It contributes to productivity enhancement in the face of a declining population.
- On the other hand, challenges remain in areas such as risks, governance, and ethics. **A balanced approach is essential.**
- It is crucial for the government **to collaborate with citizens in developing AI strategies.**
- Support measures to attract AI talent and businesses are also necessary.

Meetup (Day2 12:50-13:50)

- Approximately **60** attendees participated, showing interest in AI.
- Presentations were conducted by Matsuo Laboratory and three startups from Matsuo Lab: (ARCRA Inc., SCIEN Inc., Spark+ Inc.)
- A networking session, including business card exchanges, followed the presentations.

Quantum

Mock exhibition of quantum computers

Related startups from both domestic and international will exhibit.

The Future Vision Led by Quantum Technology (Toshiba CEO Shimada and others)

- Quantum computers have the potential to optimize vast amounts of data in a short time while significantly reducing power consumption.
- While full-scale practical applications will take time, **innovation in this field is steadily progressing**.
- Clear and accessible **narratives** for the **general public** will be essential to support the path to practical implementation.
- To further nurture the expanding quantum ecosystem, it is crucial to **attract a more diverse range of players and funding** to strengthen its growth.

Meetup (Day1 13:50-14:50)

- Number of attendees interested in Quantum: approximately **30** people
- Q-STAR participated and gave a presentation, followed by a meetup including business card exchanges.
- Session speaker Christophe (Quantonation) also attended.

Quantum Startup Pitch (Day1 16:00-18:00)

- **11 companies**, primarily startups exhibiting in the Quantum area, pitched.
- Q-STAR and the National Institute of Advanced Industrial Science and Technology participated as commentators.

Sustainable Food and Agriculture (FAO Deputy Director-General Beth and others)

- The world is facing numerous challenges, including food crises, biodiversity loss, and climate change, **necessitating a re-evaluation of how food is produced, distributed, and consumed.**
- However, **technology and innovation have the potential to attract a new generation to the fields of food and agriculture.**
- It is essential to **listen to the voices of producers on the ground** and harness the **collective strengths of various players**, including startups, to put new ideas into action.

Meetup (Day1 15:50-16:50)

- Approximately **50** attendees interested in Food Tech.
- UnlocX Inc. participated and conducted a presentation, followed by a meetup including business card exchanges.
- Session speaker Ms. Beth (FAO) also attended.

Food Tech Startup Pitch (Day1 14:00-15:00)

- 6 Food Tech startups pitched.
- Gastronomy Innovation Campus Tokyo and Basque Culinary Center participated as commentators.

Voices of Startups/Stakeholders

The logo for QUNASYS, featuring the word "QUNASYS" in a bold, dark blue sans-serif font. A small green circular icon with a white stylized 'Q' inside is positioned to the left of the text.

The people who gather here include some who are quite cutting-edge, so they have a high sensitivity to information. I think it's really great that it doesn't matter what industry you're in. Even if you're not currently interested in our field (quantum), I believe it's a valuable opportunity to gain some knowledge about it.

I am very grateful to be provided with such opportunities, and I believe that there will be things that can be created through collaboration here, so I am looking forward to that. It also allows me to expand my interests.

AgVenture
Lab

This time, we contributed to the planning and management of the Food Tech area as well as the coordination of related sessions. Positive feedback has been received from the startups exhibiting in the Food Tech area, noting that they were able to engage in numerous high-quality business negotiations that could lead to future opportunities.

Looking at the event as a whole, it was highly dynamic and vibrant, attracting a diverse audience, including many international attendees. It was a gathering of individuals from various backgrounds. If given the opportunity, I would be delighted to be involved in similar initiatives in the future.

Future Experience

28

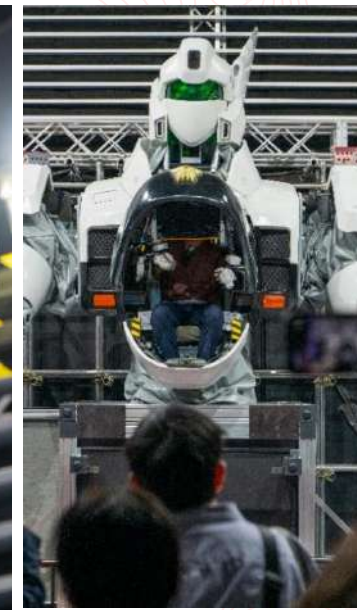

"Future Experiences": The captivated audiences

- A pavilion designed to inspire empathy, admiration, and a sense of participation in shaping the future, offering a vision of a world that people would want to be part of.
- Cutting-edge experiential content showcased across various fields, including "Robotics," "Mobility," "Fashion," "Food," "Energy," and "Entertainment," leveraging advanced technology.
- Over the course of three days, approximately 20,000 visitors attended the pavilion, enhancing the event with "enjoyable Japanese technology."
- "Robotics": Conducted 29 sessions of the Ingram piloting experience from "Mobile Police Patlabor". "Mobility": Approximately 1,500 people participated in the Tsunaguruma ride experience.
- Sustainable food tasting sessions were held six times daily

A robot that brought to life the dream of "operating a giant robot." The sight of the robot in motion thrilled many visitors, filling the pavilion with excitement and energy.

Patlabor

Tsunaguruma

A float that blends Japan's traditional festival culture with cutting-edge technology.

The "Tsunaguruma" serves as a bridge, connecting people gathered here to the future. Many visitors climbed onto the platform and enjoyed taking photos.

Voices of Participants in the SusHi Tech Challenge

parallel™
discover your true parallel

We are participating in SusHi Tech for the first time. I am very happy to be here. I am truly grateful to have been selected as a semifinalist. It was great to present to the judges and to connect with the startup community here.

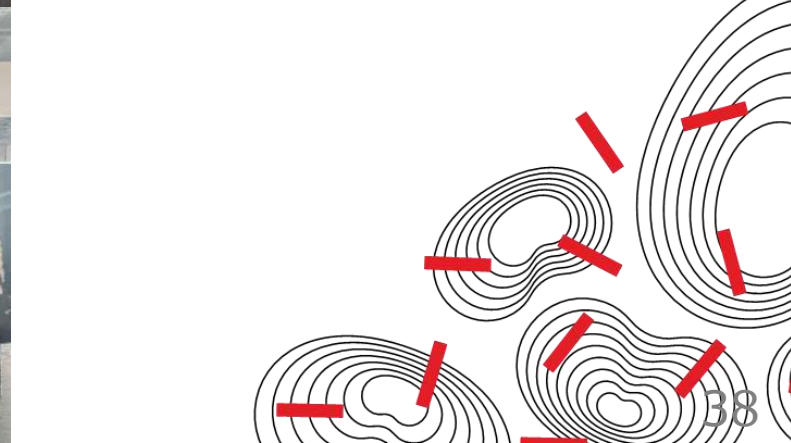

Participating in this event is truly a wonderful experience. Everyone has welcomed me so warmly. One thing I can say is that I aim to meet potential partners and investors and to develop here in a scalable way based on that.

senara
We love milk.

I think it's truly wonderful to be able to meet startup companies, large corporations, investors, and industry professionals at SusHi Tech. Compared to conferences in other countries, I feel that it is well-organized and the management is very robust.

The pitch contest was very enjoyable, and it deepened my understanding of Japan, which was very informative. I am glad to have been able to participate in this event.

Startup Exhibit

607 Startups Gathered from Around the World

and more...

Breakdown of Exhibiting Startups

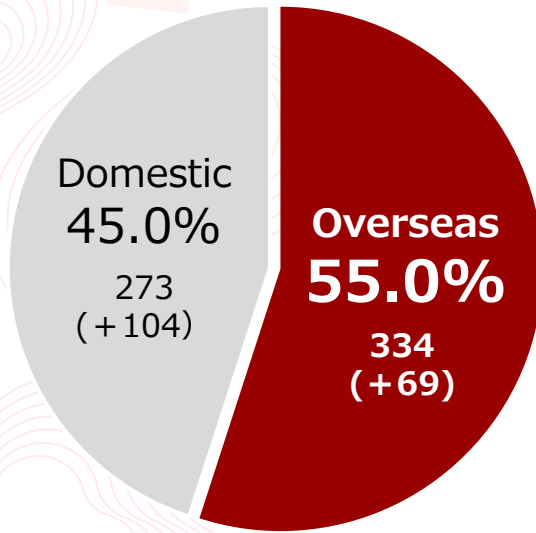

Exhibition Division	Overseas	Domestic	Total
Individual exhibit	131	112	243
Corporate Partner	12	56	68
City Partner	186		186
All Japan Ecosystem Area	5	105	110
Total	334	273	607

* "Corporate Partner" and "City Partner" include the number of startups exhibiting in the pavilions and booths set up by each partner.

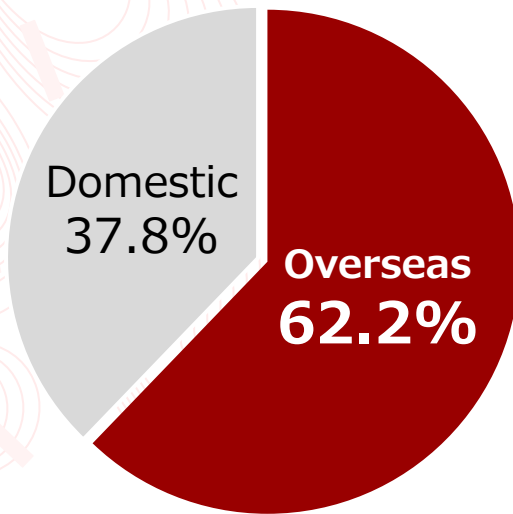

**607 startups from 38 countries and regions (previously 434) exhibited.
The overseas ratio is 55%.**

Exhibitor Domestic and International Ratio

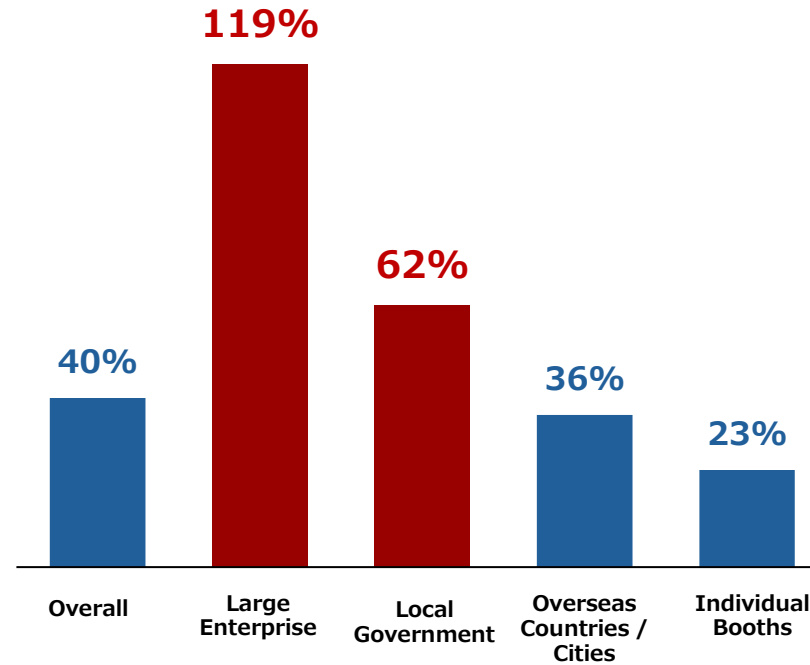

<2025>

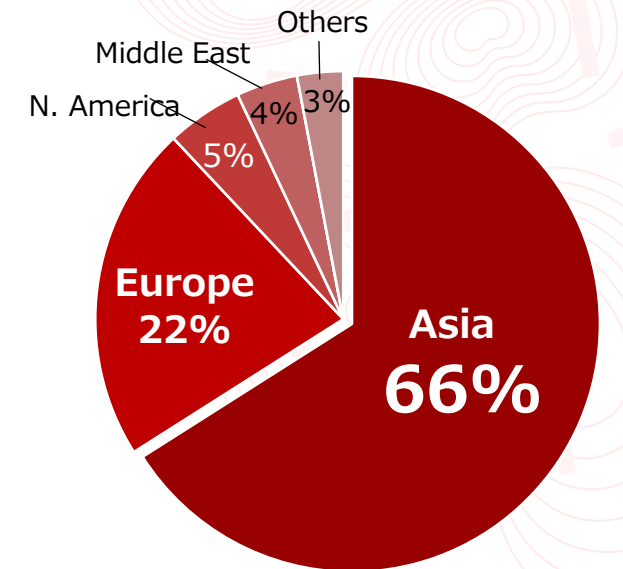

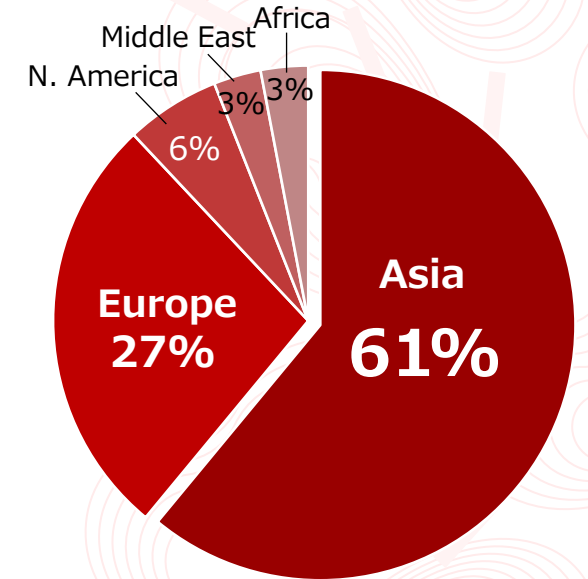

<2024>

**Increase rate of exhibiting startups (by category)
(2024→2025)**

Overseas Breakdown

Utilizing Products from Various Startups at Venues, etc.

Stroly Inc.

Venues for the partner event were displayed on the online map with an illustrated touch.

Pocketalk Co. Ltd.

AI simultaneous interpretation for the session provided via the smartphone browser

Daybreak Inc.

Provided sushi using special freezing technology. Tasted similar to freshly made when naturally thawed.

Yuppa Inc.

A new sensation healthy food using Kyo-yuba.

Wada FoodTech Group Co., Ltd.

Hot package food vending machine

Agnavi Inc.

Offered "ICHI-GO-CAN" at the reception, providing a suitable size of regional sake from across the country.

Rakuiku LLC

Collaborating with a childcare service startup, a nursery was set up in the venue. More than 30 people used it.

Concon Inc.

Exhibited Daruma made by a student entrepreneur at the ITAMAE Pavilion.

Voices of Exhibiting Startups

CHOP X ALUE
JAPAN

We are participating in SusHi Tech for the first time this year.

We are very excited about entering the Japanese market and believe that SusHi Tech is very well-suited for expanding our business in Japan. Additionally, it is a wonderful opportunity to see other exhibition booths and technologies, which perfectly matches our goals.

I am excited to meet various people and new endeavors.

i space

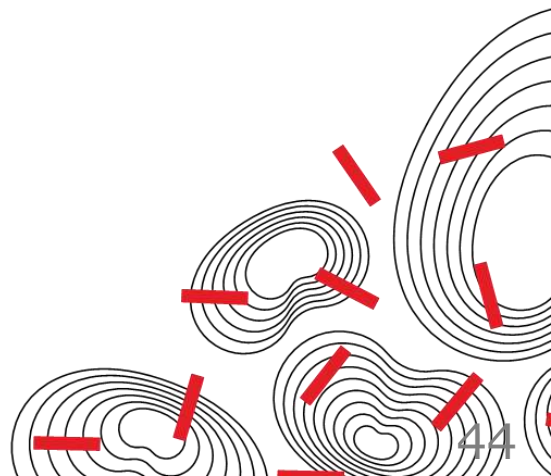

A space-related company aiming to build an economic zone on the lunar surface.

We are participating in SusHi Tech for the first time with the aim of building partnerships and creating global connections across a wide range of fields. We felt a strong response as many visitors showed interest and asked questions.

During the public day, we will conduct a driving experience of the lunar exploration rover, hoping to inspire children to have dreams of space.

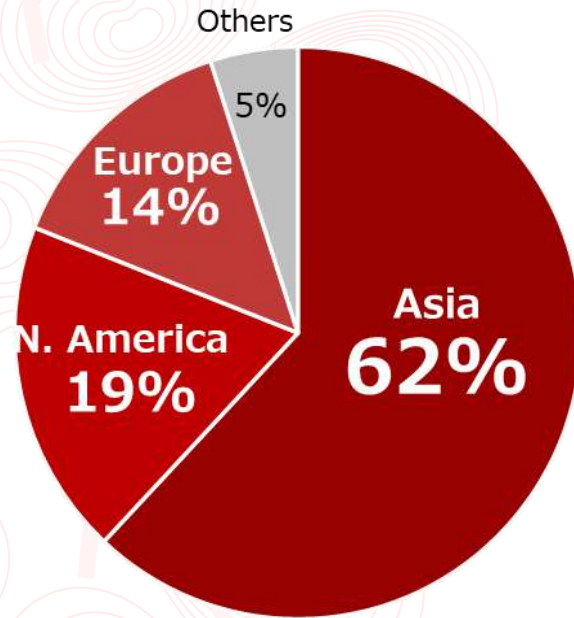

VCs/ Investors

506 overseas VC and Investors (398 in the previous round) Participated.

Asia, North America, Europe, etc.
VCs from around the world are
coming to Japan.

Investor Stage (5/8-5/9)

○A special stage for focused sessions by prominent VCs from both domestic and overseas markets.

- Number of sessions : 18
- Number of speakers : 54
 - ✓Foreign nationals : 38 (70.4%)
 - ✓Women : 12 (22.2%)

○Conduct matching of overseas VCs and domestic LPs beforehand.
A meetup space was set up next to the stage for interaction between the audience and VCs after their presentations.

- **Number of matches: 43**
- **Number of meetups: 453 (total for 2 days)**

Day 1: A large number of globally active VCs and others took the stage.

Investor's Night

Investor's Night (5/9) @TIB

○Theme: Collaboration among Global Venture Capitalists, Domestic Investors, and Local Startups

- **Event Participation:**
Total attendees on the day: 218
(*as of May 14th)
(Reference: Total registrants: 573)

○Program Highlights:

- A session showcasing the appeal of Japan and Tokyo's startup ecosystem
- Pitch contests by promising startups
- Networking opportunities etc.

Business Matching

More than 6,136 business matching meetings (compared to 3,485 last year)

Matching System

The app features a business matching system, allowing users to easily arrange meetings with various event participants.

Networking Event

In addition to creating opportunities to connect with VCs and investors, networking events were held in the event spaces tailored to participant profiles.

On-site Business Meeting Space

Multiple business meeting spaces were set up at the venue, allowing reservations for meetings arranged through the matching system.

Promoted Collaboration with Startups Addressing Social Challenges.

Public-Private Collaborative Pitch Event (Tokyo 2025 World Athletics Championship Integration Course)

Nine startups presented effective solutions for heat measures.

- SPACECOOL Inc. 1st
- Biodata Bank Inc. 2nd
- Aquam Co., Ltd. 2nd
- A-MEC Inc.
- ETG Japan Co., Ltd.
- FULLLIFE Co., Ltd.
- MI Creations Inc.
- Mitsufuji Corporation
- Nature Innovation Group

<Future Developments>

The solution has been adopted by leading companies and will be utilized at the Tokyo 2025 World Athletics Championships.

KING SALMON PROJECT (Overseas Urban Issue Resolution Course)

The city of Jakarta and the city of Malmö conducted a reverse pitch, followed by meetups with startups in both cities.

Urban challenges faced by both cities:

Jakarta City (Republic of Indonesia)	City of Malmö (Kingdom of Sweden)
Waste Management Renewable Energy	Reduction of Environmental Impact in the Food Sector Sustainable Urban Development

<Future Developments>

From May 8th, the day of the reverse pitch, recruitment for startups participating in the demonstration has begun.

After the on-site presentations and evaluations, selected startups will conduct pilot demonstration after autumn.

Corporate Partners

Industry-leading Companies Participated in Exhibitions and Sessions

Corporate partners: 47 companies (previously 29 companies)

Gold Partners

Silver Partners

Bronze Partners

Basic Partners

The above-mentioned Hitachi Group includes two companies, Hitachi, Ltd. and Hitachi Solutions, Ltd., which serve as corporate partners.

Participation from industries such as aviation, automobiles, general electronics, and the IT sector has expanded, leading to an increase in the number of partners.

Voices of Corporate Partners

We showcased *TAKANAWA GATEWAY CITY*, a visionary urban development project designed to shape the future for the next 100 years having opened in March, through booths, sessions, and guided tours, engaging both domestic and international visitors.

Additionally, at the booth located near the entrance, we exhibited our innovative efforts, including the *Railway Equipment Monitoring System*, which enhances the efficiency of railway maintenance operations, as well as the *Touch Trigger* service, which leverages real-time data from Suica touchpoints at ticket gates.

This year, with the inclusion of a Public Day, we had the opportunity to share our initiatives not only with corporate clients but also with members of the local community. This resulted in valuable interactions and connections across various sectors, making it a truly meaningful event.

Our purpose is to deliver trust to society through innovation and contribute to creating a more sustainable world.

Through our participation in booth exhibitions and session presentations, we were able to showcase experiences with AI technologies and highlight our open innovation initiatives under the *One Fujitsu* concept. This event also served as a valuable platform for the first announcement of our newly established co-creation hub.

Leveraging our unique position of being deeply involved across various industries, we aim to address diverse social challenges. By fostering collaboration between large corporations and harnessing the power of startups, we will continue to accelerate efforts to create new industries and drive impactful innovation.

Voices of City Partners

We would like to strengthen our collaboration with Japanese companies, and SusHi Tech presents a truly wonderful opportunity. We are fortunate to have established good connections with the high-level business representatives.

SusHi Tech is an excellent opportunity for first-time participants.

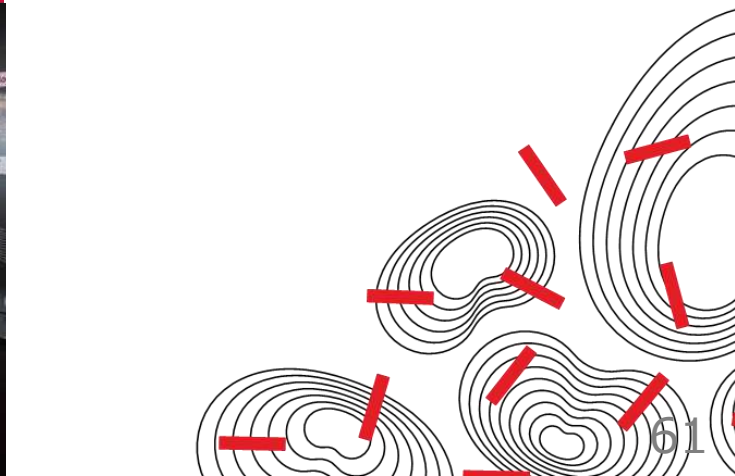

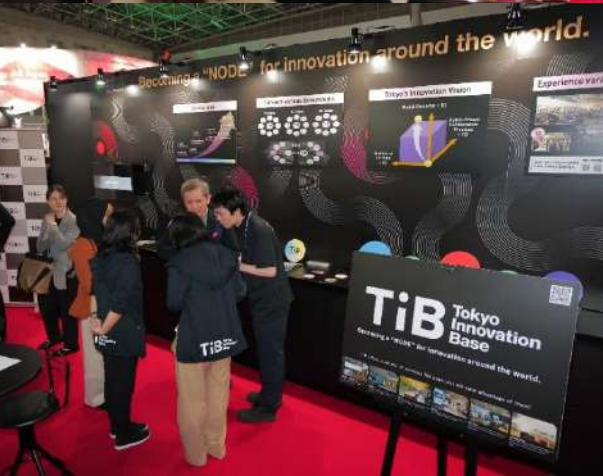

SusHi Tech was a large-scale event that attracted a significant number of attendees. The programs held throughout the venue were particularly impressive. As a City Partner, we felt that this environment provided participating startup companies with excellent exposure to local businesses.

Additionally, we were able to establish a potential partnership network with other City Partners exhibiting at the event, aimed at supporting the global expansion of Seoul-based startup companies.

Voices of Local Governments

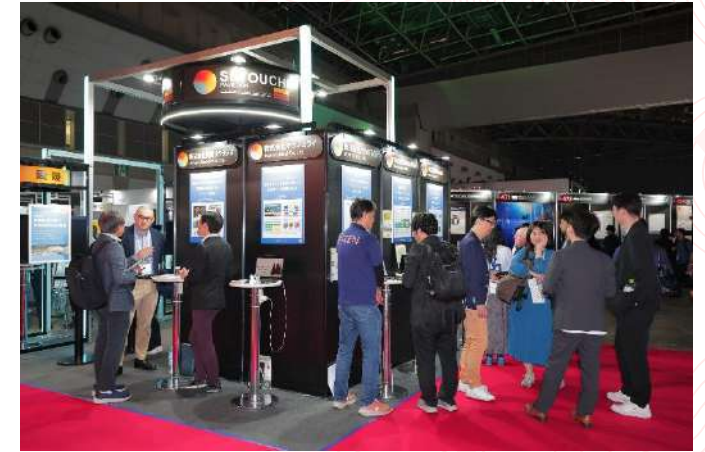

STARTUP HOKKAIDO Pavilion

This year marked our first participation in the event, with the aim of enabling exhibitors to connect with international markets and expand their reach. Additionally, the joint exhibition by multiple universities from Hokkaido, including Hokkaido University, alongside local municipalities, drew significant attention to the unified "All-Hokkaido" initiative. This experience reinforced the importance of ecosystem-building by municipalities and collaboration with universities.

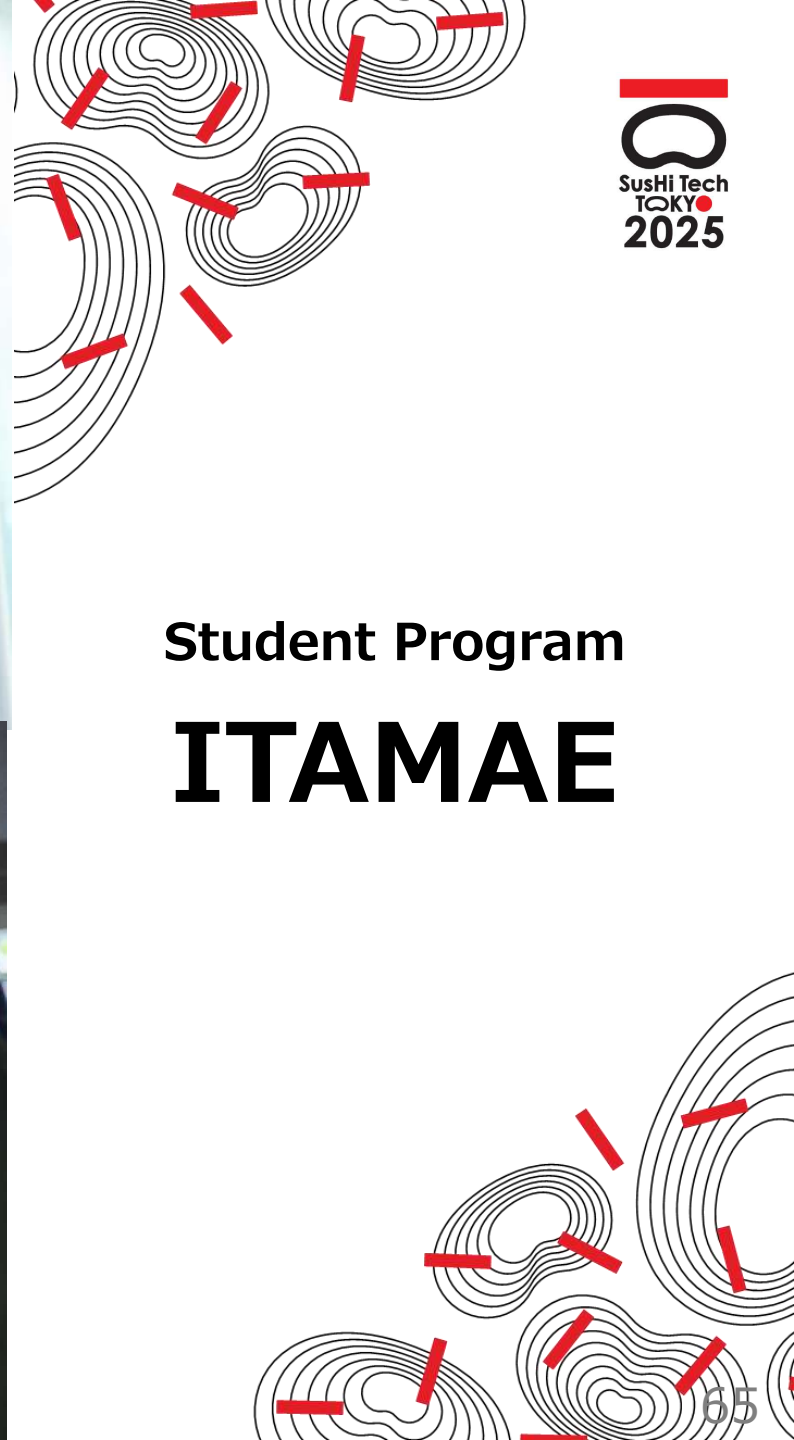

Furthermore, from an international perspective, a standalone exhibition by Hokkaido would likely have limited impact. The decision to join forces under the "All-Japan" concept proved effective in attracting both domestic and international visitors. The strategic design of the exhibition area also played a key role in maximizing engagement and visibility.

Setouchi Pavilion

Our participation in this event began after a site visit last year, which led to the opportunity to take part. Initially, Ehime Prefecture planned to exhibit independently, but after observing other regions collaborating through broader partnerships, we reached out to Hiroshima Prefecture, resulting in this joint exhibition.

At first, we were uncertain about the level of interest we might receive. However, thanks to the favorable location of our pavilion, we were delighted to welcome far more visitors than expected, which gave us a sense of relief. On Public Day, distributing local specialties such as mandarin orange juice and *momiji manju* (maple-leaf-shaped cakes) proved to be highly effective in drawing attention and engaging visitors.

Student Program

ITAMAE

"ITAMAE" : The Student Team Behind "SusHi"

Innovative Technology Academic MAestro

The next generation of young leaders (students) were taking the initiative in promoting SusHi Tech.

Session

Students organized and led sessions on the **ITAMAE Stage**.

- Themes for students who want to take on challenges include entrepreneurship, studying abroad, and career development.

Workshop

A workshop to cultivate a global mindset through interaction with entrepreneurs aiming for the global market.

- Gain business insights and feel their passion through **surprise interviews with overseas startups**.

Volunteer

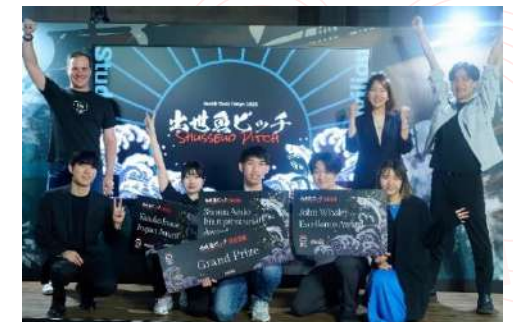

A total of **349 members** were responsible for venue operations, including visitor registration and guiding visitors within the venue.

Pitch

Held the '**Shusseuo Pitch**' contest, a **pitch competition for student entrepreneurs** before fundraising.

- 34 applicants, **5 finalists** pitched in the final round.

Dynamic "ITAMAE"

In addition to planning and managing the pavilion, students played a key role in visitor registration, venue guidance, and other activities—engaging over 300 participants across the three days.

On the Public Day, many students also took the stage, actively engaging in presentations and demonstrations.

A Daruma doll crafted by a student entrepreneur was prominently displayed in the pavilion as a symbol of ITAMAE's initiatives.

Internship Program for Students to Engage with Overseas Startups.

～ University Internship Program at SusHi Tech Tokyo ～

"Hospitality" toward overseas startups combined with cultivating a global mindset among young people creates synergy.

By having students support overseas startups visiting Japan, we aim to enhance global exchange and develop practical skills.

<Before SusHi Tech>

- Researching the company overview and products of the startup where the internship will take place.
- Providing support for their visit to Japan through online meetings with startups.

<During SusHi Tech>

- Assisted as startup staff with venue preparation and Japanese language support.
- Gained experience arranging meetings with Japanese companies.

29 students from 10 universities nationwide selected through an open call, participated.

- Waseda University
- Tokyo Woman's University
- Hyogo Prefectural University
- Meiji University
- Oita University
- Musashino University
- and others

Acceptance Startup

Company Name (Booth Number)	Product
Choiria Musictech Pvt.Ltd (A-210)	A platform for music production utilizing AI
Forsea (B-310 Israel Pavilion)	Seafood cultured meat production
uHoo(B-456)	Air monitoring service to enhance life.
ud.Impact(A-279)	Entrepreneurial education content
Unravel Carbon Pte.Ltd.(C-709)	Corporate CO2 Emission Reduction Support Tool
WeMaintain(C-643)	Cutting-edge building management system

As an initiative to foster global entrepreneurship beyond university boundaries, **Musashino University, EMC GLOBAL, and N9 PTE LTD.** were jointly implementing this activity.

Voice of ITAMAE

Keito
Uchiyama

I participated because I wanted to meet people who could broaden my horizons. Through interactions with ecosystem players, I was able to reflect on the decisions I had made regarding my career so far. There are so many things you can only experience through ITAMAE, so I strongly encourage students to give it a try.

Takuto
Hirokawa

I had a vague interest in entrepreneurship, but through ITAMAE's activities, I was able to develop a mindset that allows me to take on challenges such as starting a business or exploring new opportunities.

Saki
Yokoyama

Through ITAMAE's activities, I gained confidence in myself, feeling that I was doing something significant. By repeatedly giving speeches on stage, I was able to bring value to my words.

Satsuki
Yanashima

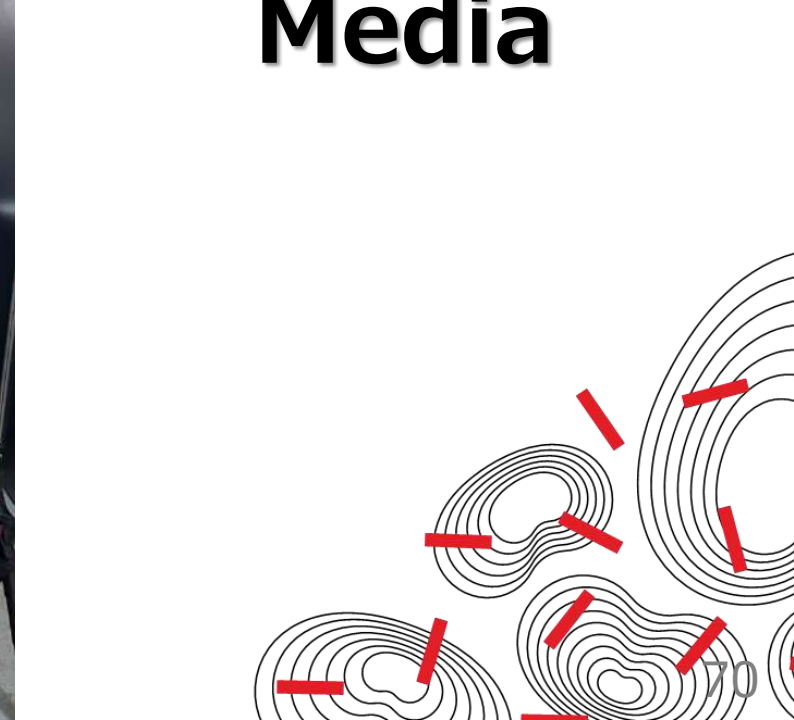

I was drawn to the concept of "Global × Startup," which is why I decided to participate. During ITAMAE's initiatives, my definition of "global" changed through discussions with external advisors. In the future, I'd like to work on projects that involve international students and similar engagements.

Yuzuki
Yanashima

I participated as a volunteer because I was interested in startups, management, and economics. By getting involved with SusHi Tech as a volunteer and preparing in advance, I was able to gain a more meaningful learning experience.

Awards

Engaging Event Attendees 「SusHi Tech Award」

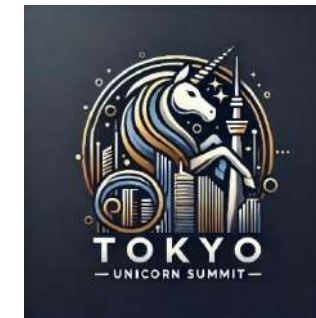

Over 400 votes from event attendees were cast to select five startups that embodied a sustainable future city and two pavilions that showcased outstanding open innovation initiatives. Additionally, one ambassador who demonstrated remarkable achievements in event promotion and participant recruitment was chosen by the secretariat after comprehensively reviewing their activities through mid-April. The awardees' company names were announced during the SusHi Tech Challenge award ceremony, where trophies were presented.

Tokyo Innovation NIGHTs

Enjoy music and Tokyo's nightlife while networking

5/7 Day0 18:00-21:00

@Tennozu (Waterfront restaurant and live house)

Network in a beautiful setting overlooking the Tennozu canals and night skyline, enjoying chill vibes and jazz music.

The venue, food, and drinks are provided by Terada Warehouse Co., Ltd.

Participants: **257** *By invitation only (Overseas ratio **54.2%**)

5/8,9 Day1,2 19:00-22:00 @TiB

At the innovation hub TiB, where startups and their supporters gather, enjoy cutting-edge performers and the entertainment and culture of Japan and Tokyo, all while connecting with diverse players.

Participants: **1,888** (Overseas ratio **25.9%**)

Site Visit Tour

Experience Tokyo's Captivating Tourist Attractions

Participants visited various iconic locations across Tokyo, including Shibuya, Asakusa, Meiji Shrine, and metropolitan facilities (such as infrastructure sites). Over the course of three days, more than 200 individuals took part in this enriching experience.

Cultural Experience

Experience the Art of Tea in an Authentic Tea Room

As an opportunity to immerse themselves in Japanese culture, an exclusive tea ceremony experience program was offered for international visitors.

A traditional tea room was set up within the venue, allowing approximately 200 participants to enjoy the authentic atmosphere and experience the tea ceremony over the three-day event.

SusHi Tech Tokyo 2025 Reception

5/8 Day1 18:00-19:30 @Tokyo Big Sight Reception Hall Participants: 540 Attendees

Public Day

A Day Filled with Joy and Smiles for Everyone – Students, Children, and Adults Alike

Experienced the future of cities through cutting-edge technology and the ideas and passion of entrepreneurs.

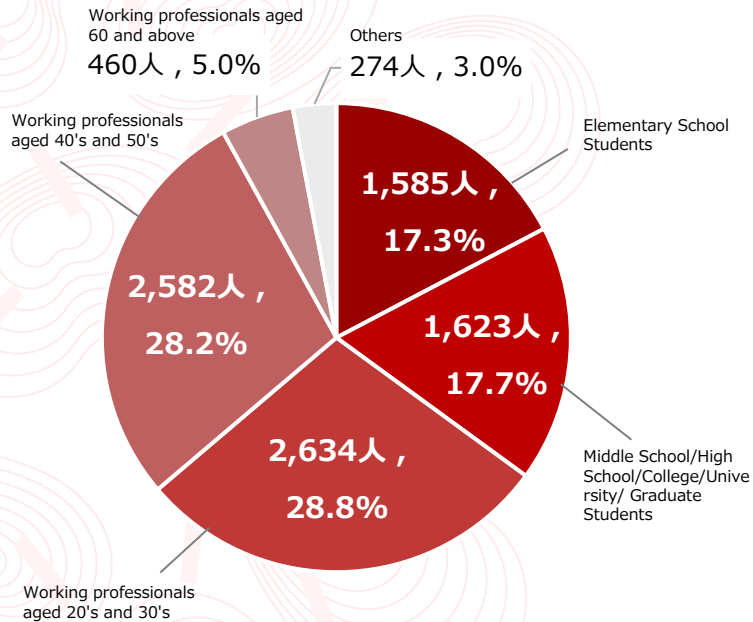

Corporate Partners and Cities Showcase Creative Exhibition Concepts

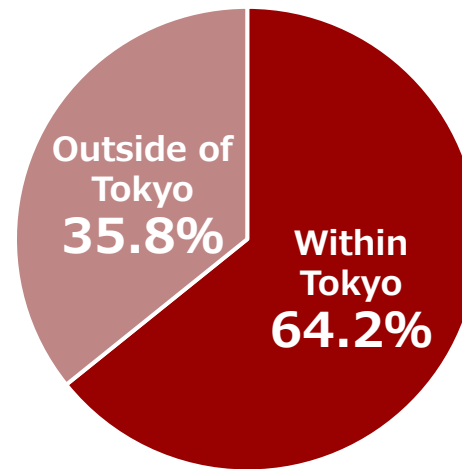

Many students, young people, and families with children attended.

- ◆ On Public Day, **35% of attendees were aged 10 or younger**, and approximately **29%** were young adults in their 20s to 30s.
- ◆ The average satisfaction score from survey respondents was **7.8** out of 10.

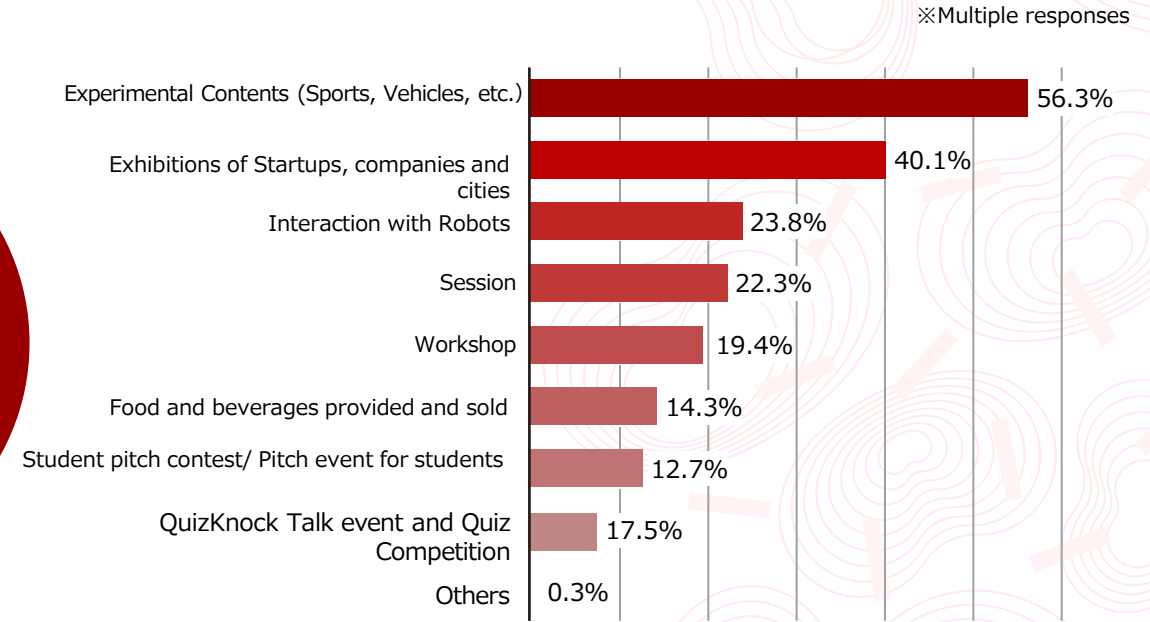

Visitor Demographics

Visitor Profile

Attendee Demographics

Comment (Positive feedback)

- All the exhibits were incredibly fascinating, and being able to see, touch, and experience them firsthand was wonderful.
- Both children and adults could enjoy and engage with the exhibits, sparking interest in fields they don't usually encounter.
- It was inspiring to see the efforts of students who will shape the future.
- This event was an excellent educational opportunity for children.
- Initially, I had no interest, but after visiting the venue, I found it enjoyable and engaging. I'd love to participate again next year.

Comment (Points to improve)

- The location was difficult to find, and the guidance was insufficient.
- It was hard to understand what each company's booth was showcasing, making it feel intimidating to approach.
- The distribution of tickets for the hands-on events took too long, and the process should be improved.
- Having interpreters or translation tools to support international exhibitors would have been better.
- Many booths lacked staff to provide explanations, and some booths closed early as a result.

Tokyo Mirai Weeks @The National Museum of Emerging Science and Innovation

In conjunction with "SusHi Tech Tokyo 2025," a cutting-edge technology experience event was held (4/26-5/11).

Held over 16 days, including the national holidays, approximately 30,000 people attended

Future Mobility Exhibition (4/26 - 5/6)

Let's ride into the future! Mobility Park (5/3 - 5)

**Cancelled on the 6th due to rain*

A test ride experience of various personal mobility devices designed to make travel more comfortable.

Future Hydrogen Energy Experience (5/10-11)

Play Equipment to Experience Hydrogen: "Produce," "Store," "Transport," and "Use"

Tokyo Mirai Park

Unique Technology Experiences with the Theme of "Softness" and a Model Display of the Hydrogen Hybrid Train "HYBARI"

➤ Workshop on the Future of Tokyo and the Superconducting Maglev (Held on May 11)

The workshop provided participants with the opportunity to think about and learn about the future of Tokyo and the groundbreaking superconducting maglev technology. Held twice daily (morning and afternoon), the sessions attracted a total of 33 participants.

In Cooperation with: Central Japan Railway Company (JR Tokai)

Pavilion Exhibition

- Utilizing Sushi Tech as a demonstration and PR venue for the redevelopment building "(Tentative Name) Toranomon Innovation Center," scheduled for completion in October 2027.
- Providing significance and opportunities for potential users of facilities to engage with social challenges.
- Exhibiting Startup: 1 company <Amekaze Taiyo Inc.>

Session Event

May 8 (Thursday) 2 sessions

- "How to realize community well-being?"
- "How do we create a new way of living in Japan?"

May 9 (Friday) 2 sessions

- "Disaster Preparedness: How to Prepare for Safety?"
- "How to ensure the safety of children with disabilities?" (Newsta Inc. Presentation)

May 10 (Saturday) 1 Session

- "How will we pass on Japan's agriculture to the next generation?" (Presented by Amakaze Taiyo Co., Ltd.)

SoftBank/LINE Yahoo

Pavilion Exhibition

SoftBank introduces products utilizing generative AI, with a focus on international merchandise and enhancing DX.

Among the various fields that LINE Yahoo is working on, we will pick up "Entertainment," "Sustainability," and "Education," and introduce the latest examples. There will also be a section where you can actually experience things, such as easily entering the world of the metaverse through LINE.

Pavilion Exhibition

Exhibiting mainly Toyota's new business creation scheme, "Becreation".

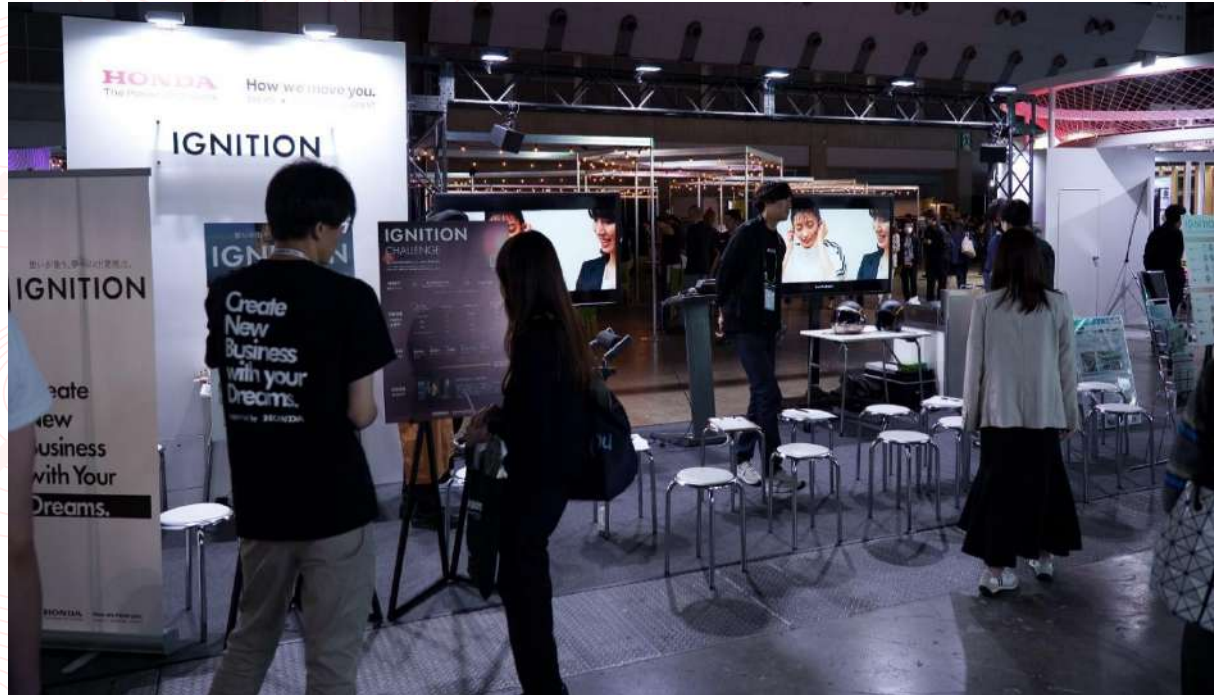

Introducing a mechanism to create new businesses by gradually conducting verification and investment towards commercialization, thereby increasing the probability of success and minimizing unnecessary investments.

Pavilion Exhibition

On Business Day, we will conduct pitch practice for IGNITION and acquire VCs, co-founders, and customer candidates through pitching.

At the Public Day, we will provide an opportunity for families to experience the UNI-ONE test drive and conduct exhibits that can enhance awareness among a wide range of households.

Pavilion Exhibition

Exhibiting the overall picture of "NEC Open Innovation," announced in February 2025, with the key message "Let's make the future."

Introducing NEC's unique open innovation model, which is developed along two axes: the "inbound type," which incorporates external technologies and ideas, and the "outbound type," which provides the company's technologies and expertise to the outside to accelerate business development.

Pavilion Exhibition

- Exhibitions will be held for seven companies with overseas aspirations among the investees of the KDDI Open Innovation Fund.
- Customized the KDDI booth reception specifications for "Kizuna AI," implemented the AI cafe robot "root C," and conducted exhibits replicating the International Space Station.

Exhibiting Startups: 7 companies <Idein Inc., Activ8 Inc., New Innovations Inc., Space Data Inc., STYLY Inc., Findy Inc., Tier IV Inc.>

Daido Life Insurance

Pavilion Exhibition

- Showcased the "**DAIDO Sustainability INITIATIVE**," which supports sustainability management for small and medium-sized enterprises (SMEs). Highlighted efforts to promote inter-company collaboration across regions and industries, contributing to the resolution of societal challenges.

Mitsubishi Electric

Booth Display

- Description of Mitsubishi Electric's CVC Fund (Fund overview, Portfolio, Collaboration examples, Areas to target in the future)
- Introduction of the Defense and Space Division and exhibition of business content.

Salesforce Japan

Booth Display

- Introducing our in-house product that enables rapid development and delivery of AI and custom agents using no-code and low-code solutions.
- Visitors can experience a live demo of the forms in action.

Sumitomo Mitsui Banking Corporation

Booth Display

- By providing **financing based on evaluations of startup growth potential**, offering a diverse product lineup (such as loans with stock acquisition rights and syndicated loans), and collaborating with public institutions (such as partnerships with the Japan Finance Corporation and the SME Support, Japan's venture debt guarantee program), we introduce a wide range of startups.

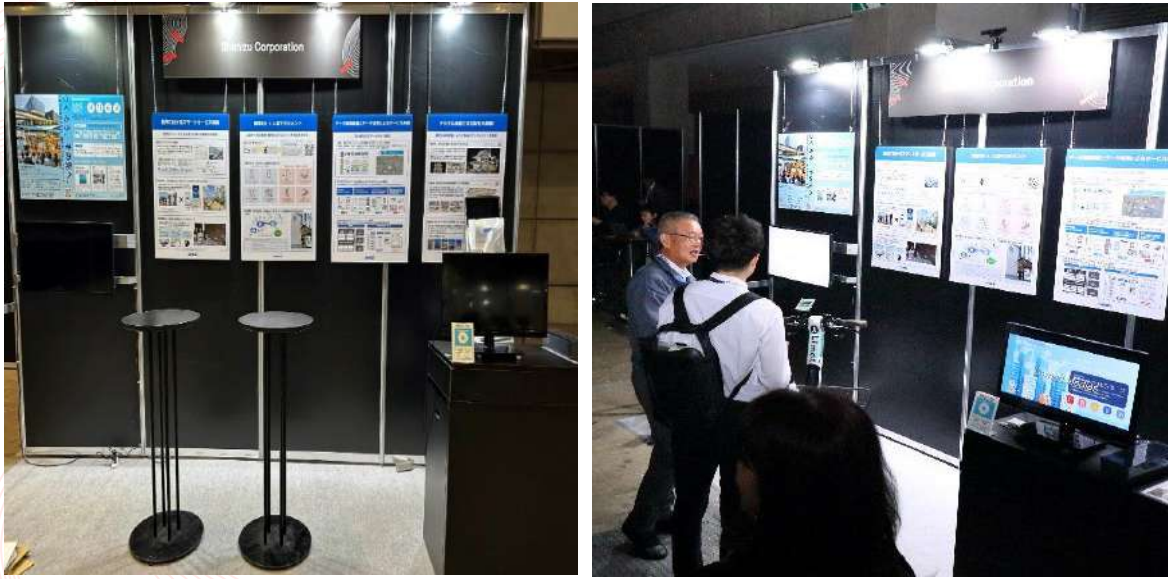

Mizuho Bank

Booth Display

- Introducing the membership service '**M's Salon**' that supports startups engaged in innovative businesses.

Shimizu Corporation

Booth Display

- We promote the use of carbon-negative backfill material **"SUSMICS-S"** to reduce CO2 emissions associated with construction, achieve carbon-negative construction, and contribute to the reduction of environmental burden.

Mitsubishi Estate

Booth Display

- Under the theme of "Creating the Future from Marunouchi," we introduce exhibitions related to the CVC **"BRICKS FUND TOKYO,"** as well as exhibitions about the **Tokyo Marunouchi Innovation Platform**, which aims to create new businesses through support for large corporations' new business creation and collaboration between large corporations, startups, industry, government, academia, and the community.

Mitsubishi Warehouse

Booth Display

- Mitsubishi Warehouse is introducing its efforts to create new value in the logistics and real estate fields in collaboration with partner companies.
- Exhibition of services by startups funded by CVC

Exhibiting Startups: 2 companies
Esmat Co., Ltd., Spectee Inc.

Fujitsu

Booth Display

- Exhibiting a booth where visitors can experience Fujitsu's open innovation and AI technology.
- Introduction of open innovation initiatives, demonstration of AI agent "**Fujitsu Kozuchi AI Agent**," and GPU utilization efficiency improvement "Ai computing broker."

Tsukurie

Booth Display

- Introducing the "**Tokyo Content Incubation Center**," a residency-based startup support facility specialized in the entertainment and content industry, and the "**IntoGlobal - Overseas Expansion Challenge Resolution Program**" aimed at content businesses seeking global expansion.
- The Public Day featured a demonstration of the latest free-roam VR game by Japan XR Center Inc.

Agora Lab.Inc

Booth Display

- A conversational AI engine released in 2025 and signage using it was showcased. **Agora.io's Conversational AI Engine** is characterized by ultra-low latency in real-time voice interactions.

Google LLC

Booth Display

- Introducing how startups can leverage Google tools to advance development, from idea generation to release.

ENEOS Holdings

Booth Display

- As ENEOS CVC, we aim to support "today's norms" and lead the way toward "tomorrow's norms." To convey this vision, we hosted a booth showcasing our CVC activities.

- Exhibiting Startups: 3 Companies
 - WasteBox Inc.
 - Eco-Pork Inc.
 - Desamis Inc.

Tokyo Stock Exchange

Booth Display

- Exhibition of a total of 12 booths supported by the Tokyo Stock Exchange and its own booth.
- Exhibiting Startups: 12 companies
<21st Financial Technology Co., Ltd., Aerodyne Group, Docquity Holdings Pte. Ltd., KKday Holdings Co., Ltd., POPS Worldwide, Inc., Shipper, Rainforest Life Pte. Ltd., Ridi Corporation, SWAT Mobility Pte. Ltd., Tricog Health Pte. Ltd., Ubitus K.K., UnaBiz Holdings Pte. Ltd.>

Terada Warehouse

Booth Display

- There are seeds of ideas, but startups that don't know how to start a business and create a venture can benefit from our introduction of "incubation facilities." Rather than focusing on narrow scales like size and speed, these facilities value the "meaning that is needed in society."

Exhibiting Startups: 2 companies (verbal and dialogue Inc., KNOTTER Inc.)

VRITIMES

Booth Display

- Introduction of our service "VRICREATIVES" and its case studies panel

Deel, Inc.

Booth Display

- Exhibiting as a rapidly growing HR tech unicorn company from the U.S.
- Displaying the company's platform and others on a panel.

Daybreak

Booth Display

- Providing 2,000 pieces of new frozen sushi developed for overseas export.

Survey of Students Who Attended SusHi Tech

Satisfaction with SusHi Tech

Visitor Survey for ITAMAE Pavilion
(182 Responses)

SusHi Tech Satisfaction (10 point scale)

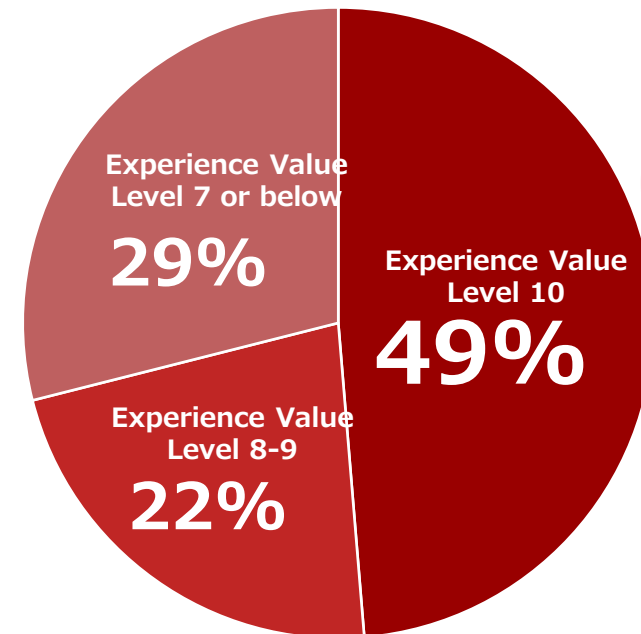

- Being in an environment where foreign languages were constantly spoken allowed me to get used to a global atmosphere, which helped build my confidence.
- I also had the chance to engage with a startup in an industry I don't usually interact with.

Value of the Volunteer Experience

ITAMAE Volunteer Survey
(52 Responses)

「Did you find "Working Globally" or "Companies thriving internationally" appealing? (10 point scale)

- By listening to the stories of the challenges faced by people in startups, I felt a sense of closeness to them.
- While looking at the exhibits, I found many exciting things that sparked my curiosity, which made me want to take on new challenges myself.
