“Realizing **Sustainable** Cities With **High Technology**”

Asia’s Largest Global Innovation Conference

Innovation leaders from around the world gather with the shared goal of realizing sustainable cities with cutting-edge technology. It will be a forum for a diverse range of players, including startups, and supporting parties such as investors, large companies, and universities, as well as companies with technologies that are attracting global attention and continuing to grow, to gather in Tokyo to meet and interact in order to create innovation and new actions that solve global challenges.

Dates

Business day

Monday, April 27 and Tuesday, April 28, 2026

Public day

Wednesday, April 29, 2026 (holiday)

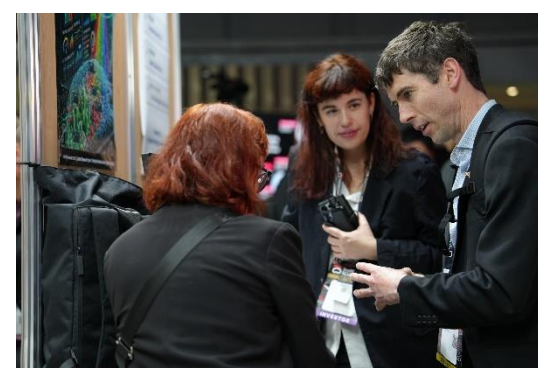

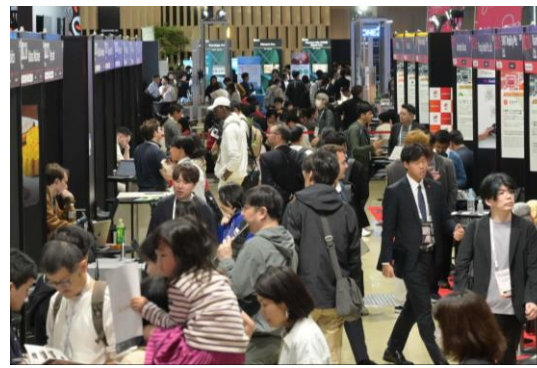

Venue

Tokyo Big Sight West Halls 1–4 and other areas
(3-11-1 Ariake, Koto-ku, Tokyo)

A day for the general public and young future leaders to come into contact with startups and their cutting-edge technologies (free admission)

Over the course of its four editions, it has grown into Asia’s largest global conference.

Bringing together innovators from across all sectors, it explores the future of cities—and continues to evolve into a place that everyone can enjoy.

Evolution and Achievements of SusHi Tech in Numbers

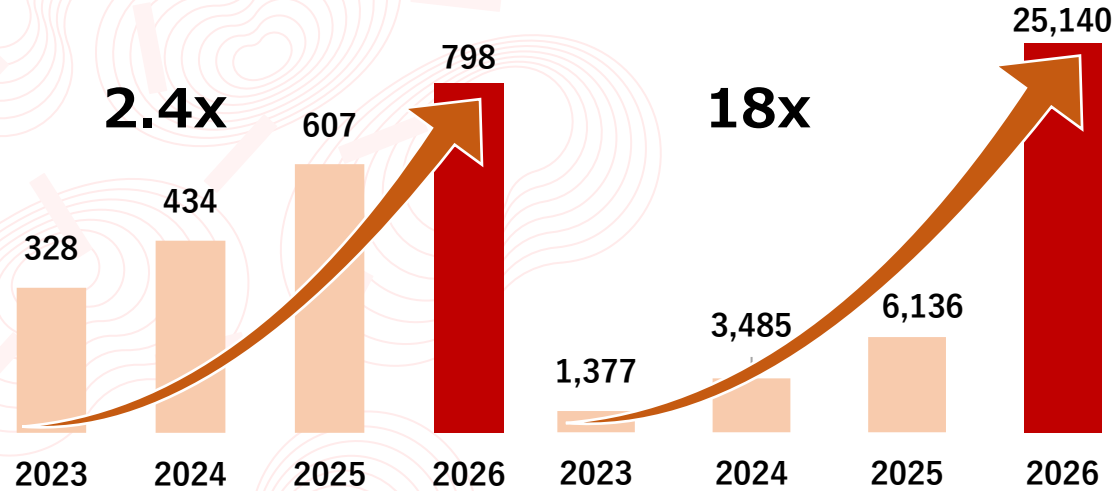

◆ The number of exhibiting startups increased by **2.4x**, business meetings by **18x**, and on-site participants by **5.4x**

◆ Participation has driven continued **scale-up**, leading to **steady growth in startup valuations**

Number of Exhibiting Startups

Number of Business Matches

Rapid Growth of Startups Participating in SusHi Tech

Oishii Farm Corporation

*Session speaker of 2024・2025・2026

- Leveraging Japanese technologies, the company has built a next-generation agricultural system utilizing AI and automation, aiming to produce high-quality strawberries at low cost, and has grown into a leading company in this field.
- Participation led to **recruitment of top talent and concrete business discussions**; media coverage resulted in global exposure and **strong international response**.
- In May 2026, announced fundraising of **JPY 24 billion** to expand U.S. farmland operations and strengthen R&D functions in Tokyo.

Kyoto Fusioneering Ltd.

*City-Tech Challenge 2023 Grand Prize winner; exhibited in 2026

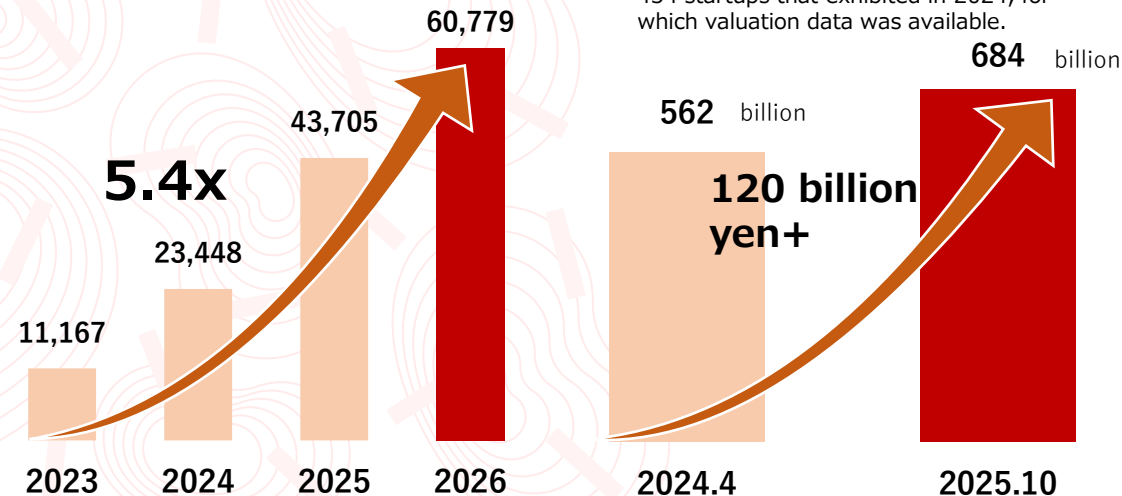

- A fusion (nuclear fusion) energy startup originating from Kyoto University, with world-class engineering expertise in areas such as plant equipment, plasma diagnostics, and fuel cycles, delivering technologies from R&D to full-scale plant implementation.
- Engaged with approximately **50 investors and around 30 startups** during the event; attracted participation from **globally top-level players**.
- Participation in City-Tech Tokyo accelerated its momentum, contributing to cumulative fundraising of approximately **JPY 16 billion** to date.

Number of Participants*

Total Valuation of Exhibiting Startups*

*In-person

*Based on the total valuation of 115 out of 434 startups that exhibited in 2024, for which valuation data was available.

Synspective Inc.

*City-Tech Challenge (2023) Session speaker; exhibited in 2024・2026

- Provides satellite data solutions, including Earth observation and land deformation analysis, using a constellation of small SAR satellites.
- After exhibiting in 2024, raised **JPY 7 billion** for the development and operation of small SAR satellites.
- Listed on **the Tokyo Stock Exchange Growth Market** in December 2024(Post-listing valuation: **JPY 44.9 billion** → Approx. **JPY 200 billion** market value as of June 2026)

Session

Opening Session

Today, the philosophy behind SusHi is more urgently needed than ever. That is because we are living in a time of profound turbulence. We face a volatile international landscape, increasingly frequent natural disasters, growing disruptions surrounding energy and resources, and a rapidly accelerating AI revolution. For this reason, I repeat we badly need a future that realizes sustainable cities through high technology.

Last November, we launched an even more ambitious startup strategy, focusing on two key areas: “Global” and “Scale-up.” Together with all of you, Tokyo will nurture startups to succeed in global markets and enhance quality of life for all.

Let me introduce “SusHi Tech Global,” our new initiative to grow scale-ups, from Tokyo. Through this initiative, we will bring together a strong cohort of startups expanding into global markets with cutting-edge technologies for realizing a sustainable society. Through close public-private collaboration, we will support them thoroughly.

G-NETS is an international network initiated by the Tokyo Metropolitan Government to address urban challenges. At a time when divisions are growing around the world, multicity lateral cooperation has never been more important. At the G-NETS Leaders Summit, leaders from over 50 cities will come together to exchange views under the theme: “Urban Resilience to Climate Change and Natural Disasters.”

Global Innovation Strategy 2.0

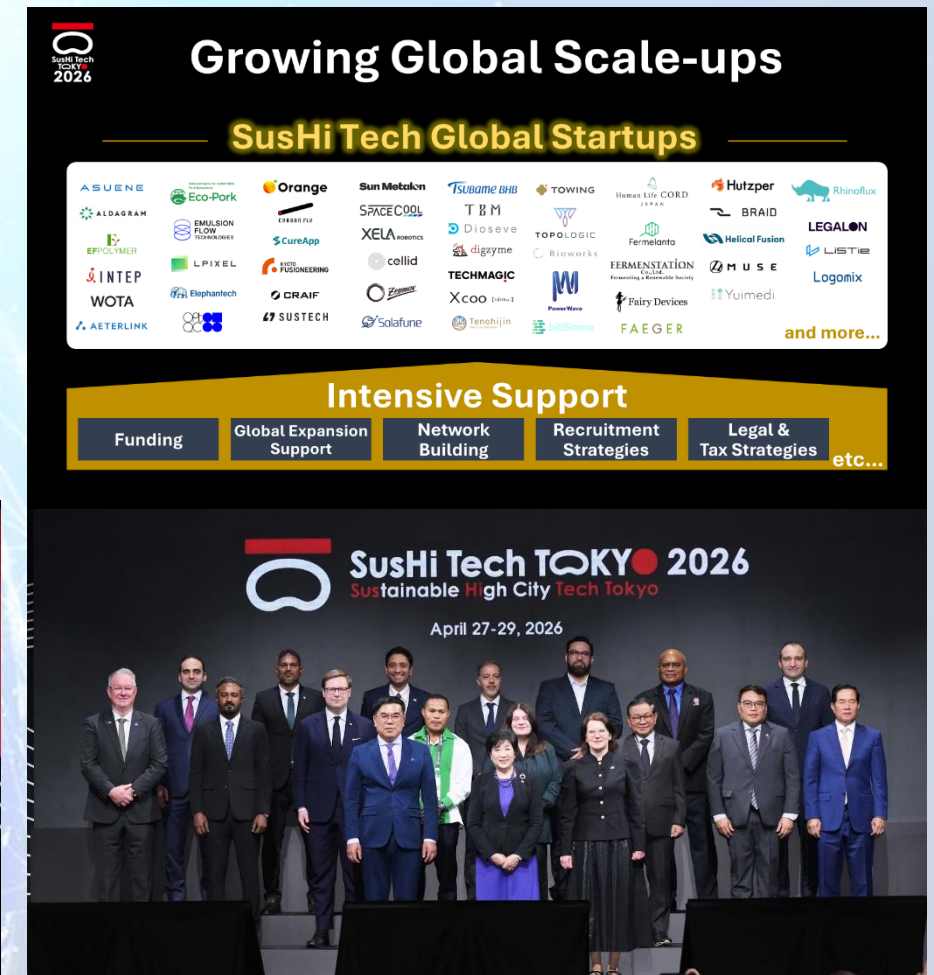

The diagram shows a 3D coordinate system with three axes: **Global** (vertical), **Scale-up** (diagonal), and **Public-Private Collaboration** (horizontal). A yellow arrow points upwards along the Global axis, and a purple arrow points along the Scale-up axis. A yellow cube is positioned at the intersection of these axes. The base of the cube is labeled **Platform**. A label **Number of Startups** is placed near the base of the cube.

April 27-29, 2026

A group photograph of approximately 20 people, mostly men in suits and a few women, standing on a stage in front of a backdrop that reads "SusHi Tech TOKYO 2026 Sustainable High City Tech Tokyo".

Special Keynote

—Prime Minister Sanae Takaichi takes the stage—

<Excerpt from Remarks by Prime Minister Sanae Takaichi>

In line with the concept of “realizing sustainable cities through high technologies,” more than 60,000 participants—including startups, large corporations, venture capital firms, and city leaders with outstanding technologies and ideas to address social challenges—have gathered in Tokyo from around the world. I believe this event holds great significance as a platform where innovators from across the globe come together and interact with one another, driving new initiatives that lead to solutions for shared global challenges.

The Takaichi administration is committed to achieving a “strong economy” under the policy of “responsible and proactive fiscal management.” A strong economy requires a solid foundation in advanced science and technology. To this end, the government is working to significantly increase funding for universities and national research institutes, as well as investments in basic research. (...)

By creating synergies between these government initiatives and the new initiatives emerging from SusHi Tech Tokyo, I expect Japan’s startup ecosystem to continue to grow, contributing not only to Japan’s economic growth but also to solving challenges around the world.

Green Intelligence and a Circular Future: AI-Driven Pathways to Net Zero and Resource Innovation

(4/27 Innovation Stage 12:30-13:15)

This session opened with a keynote address by Minister Peng Chi-Ming of Taiwan's Ministry of Environment, focusing on the use of AI to advance environmental policy, optimize resource circulation, and present the latest initiatives and global perspectives toward achieving a net-zero society.

Following the keynote, a panel discussion was held featuring Prof. Noboru Koshizuka, Prof. Anna Yokokubo, and Dr. Tomoko Nagano under the theme "Toward a Resilient Smart City Tokyo: Learning from Taiwan's Experience." The discussion explored smart cities, green initiatives, and carbon neutrality from multiple perspectives.

Governments at the Frontline in the Age of Agentic AI: Towards a Resilient Society through Global Collaboration

(4/28 Innovation Stage 13:00-13:45)

As AI evolves from a simple tool into autonomous "agents" capable of making decisions and taking action, the role of government is fundamentally changing. Governments are no longer only policy makers; they are becoming designers of the frameworks and foundations that enable AI to operate safely, sustainably, and for public value. In this session, leaders from Estonia and Ukraine shared how Agentic AI can be implemented in society, highlighting national initiatives and the importance of international collaboration.

From AI to Society: Designing AI as Social Infrastructure

(4/27 Impact Stage 14:00-14:45)

AI is no longer limited to features within specific services; It is shaping how people work and communicate, how societies address care challenges, and how cities are operated. With the advancement of robotics and digital twins, AI is extending beyond digital environments into physical spaces and urban systems. As technology becomes more seamlessly integrated into everyday life, AI is emerging as a foundational layer of social infrastructure.

Based on NAVER's experience operating large-scale services, this session presented how AI functions as infrastructure across digital and physical environments—through examples in workplace collaboration, care services, and digital twin and robotics—and highlighted the design principles required for it to operate as a reliable and sustainable component of social systems.

~Envisioning the Future of Cities~

From Research to Impact: The Vision of University Spin Off Startups in Protecting, Creating, and Commercializing Knowledge in the Age of AI (4/28 Impact Stage 16:00-16:45)

With the rapid advancement of AI technology, knowledge infrastructure, intellectual property systems, and the creative industries in society are undergoing a major transformation. Intellectual property, copyrights, content, and knowledge creation activities, which have been traditionally built on human intelligence, are being redefined through collaboration with AI or substitution by AI. At the same time, risks of AI misuse have become apparent, making security and governance critically important issues. In this session, from the perspective of promoting startups based on university research outcomes, the creation of knowledge and intellectual property in the AI era and the realization of a safe society were examined from multiple viewpoints. The session explored the transition to a sustainable and advanced knowledge-creation society. Based on this, the vision and goals that startups researching and utilizing AI should aim for were discussed.

AI x Education for Well-being in the Intelligent Age

(4/27 Impact Stage 11:00-11:45)

The rapid advancement of AI and the advent of “the Intelligent Age,” where society develops alongside AI, are significantly changing the relationships among people and of people with nature and society. How should we learn and utilize AI? Furthermore, how can we realize a society where diverse people worldwide have equal access to this technology? This session explored the ways of learning and the pursuit of individual well-being in the future society where living alongside AI with a particular focus on viewpoints from Asia.

The Supreme Entertainment “KABUKI” Passed Down to the Future

(4/27 Innovation Stage 11:15-11:55)

Kabuki, born approximately 400 years ago, was innovative entertainment at the time. It has since continued evolving by flexibly incorporating changes in the tastes, society, and technology of the times. The session explored why kabuki continues to provide hints for the future in today’s world where technology is accelerating.

What Japan Can Do Now to Prevent a Fragmented Society

(4/28 Tokyo Stage 11:30-12:15)

This session explored, from multiple angles, how social media and algorithmic systems were reshaping democratic processes. Against the backdrop of growing social polarization and algorithm-driven opinion formation, the discussion looked ahead to what democracy would have to become in the years to come. Ken Suzuki, author of A Smooth Society and Its Enemies, launched “Digital Democracy 2030,” an initiative that seeks to combat online advertising fraud through participatory democratic mechanisms. In parallel, Haruyuki Seki, Representative Director of Code for Japan, advances civic-tech-driven approaches to counter disinformation across social media platforms. Moderated by Mariko Nishimura of HEART CATCH—who has long connected creative practices across business, government, and civil society in Japan and abroad—this session delved into the critical intersections of technology and democracy, government and citizen participation, and the evolving relationship between artificial intelligence and human agency.

~Discussing the Future of Technology~

Who Will Build Trustworthy AI? : The Responsibility of Technology Companies in an Era of Disruption

(4/27 Innovation Stage 14:10-14:35)

Generative AI is no longer just a tool for operational efficiency—it has become a foundational element of social infrastructure and a determinant of national competitiveness. As discussions around AI regulation and governance intensify across countries, companies are now expected not only to “develop fast,” but also to “deliver AI that can be trusted.”

NEC, with its proprietary technologies in AI and cybersecurity, works across public- and private-sector digital transformation as well as domains central to economic security. This session examined what corporate posture and technological principles should look like in the age of AI, from the perspective of safety and trust. Against the backdrop of increasingly complex geopolitical dynamics and regulatory environments surrounding technology, the discussion explored the roles companies can—and must—play, and the unique value they can demonstrate on the global stage.

An AI-Driven Society Shaped by Technology

(4/27 Innovation Stage 13:30-14:00)

As AI rapidly evolves and its applications expand across society and businesses, we stand at a critical juncture: how will we master this technology, and how will we embrace its continued advancement? AI holds the power to solve previously intractable societal challenges and to amplify human potential and creativity. Join Fujitsu CEO, Takahito Tokita as he unveiled his vision for how we can design a richer society with AI. He will help us envision this future by showcasing compelling use cases and the cutting-edge technologies driving AI's evolution.

Crossroads in the Age of AI and Deep Tech: Betting on the Next Decade

(4/27 Innovation Stage 17:15-18:00)

At this panel, leaders from a16z, METI, UTokyo IPC and Techstars discussed a global shift from software to hardware as the next decade of value significantly lies in integrating AI into the physical world, including precision manufacturing, robotics, energy and dual-use technologies. The conversation also aimed to highlight Japan's unique advantage to lead physical AI revolution by leveraging its manufacturing heritage.

Future of AI and Transformation of the Civilization

(4/27 Impact Stage 15:00-15:30)

The rise of generative AI is a civilizational turning point that redefines the production of knowledge and society, and at its core lies the realization of a “warp drive for scientific discovery” that leads science into another dimension. “AI scientists” with extraordinary capabilities will autonomously explore uncharted domains, fundamentally transforming the way scientific research is conducted. The “Nobel Turing Challenge” symbolizes this grand challenge.

And in everyday life, AI agents that resonate emotionally with people will redefine the notion of human intimacy. As the role of AI in the evolution of civilization grows exponentially, the value of humanity will ultimately return to its singular gifts of “creativity” and “storytelling.”

From dinosaurs, to humankind, and now to a new stage of intelligence. We are now witnessing a historic moment in which civilization transitions to its next phase.

~Fostering Startups~

The Future Pioneered by AI Agents

(4/27 Impact Stage 12:00-12:45)

How AI agents are transforming work and society. From the latest trends and concrete use cases across various industries to a macro perspective, this session clearly unraveled the changes that were happening on the ground. Through the examples of Telexistence Inc. and Kakehashi Inc., the discussion examined how organizations and data should be structured to truly harness AI and AI agents, as well as the extent of their impact on social transformation. This session offered a glimpse into the near future.

Toward the Leap of Japanese Startups onto the Global Stage

(4/27 Innovation Stage 16:30-17:00)

While the base (number of startups) of Japan's startup ecosystem is expanding, the number of unicorn companies has seen only a slight increase, making it essential to significantly boost the ecosystem's overall height (level of success). As the lack of large-scale funding from overseas and a tendency to prioritize the domestic market have been pointed out, this session explored the direction Japanese startups need to take to leap onto the global stage, bringing in perspectives from leading international VCs to further invigorate the ecosystem.

What AI Takes and What It Cannot Take: And the Human Re-creation That Begins from the Margins

(4/27 Tokyo Stage 13:00-13:45)

Does AI really take something away from humans? Will we really have extra time? This session will start from the question of what AI can and cannot take away and reexamines its premises. This session examined how AI is not a replacement for people but a complement to their decisions and responsibilities, and that time is not simply created through efficiency. While covering domains such as work, learning, and creation, the session considered the value of humans and the nature of choice in a society coexisting with AI.

Kentaro Kawabe
LY Corporation Chairperson and Representative Director

Kazuto Ataka
Professor, Faculty of Environment and Information Studies, Keio University / Senior Strategist, LY Corporation

Motoko Imada
CEO & Founder, Mediagene Inc.

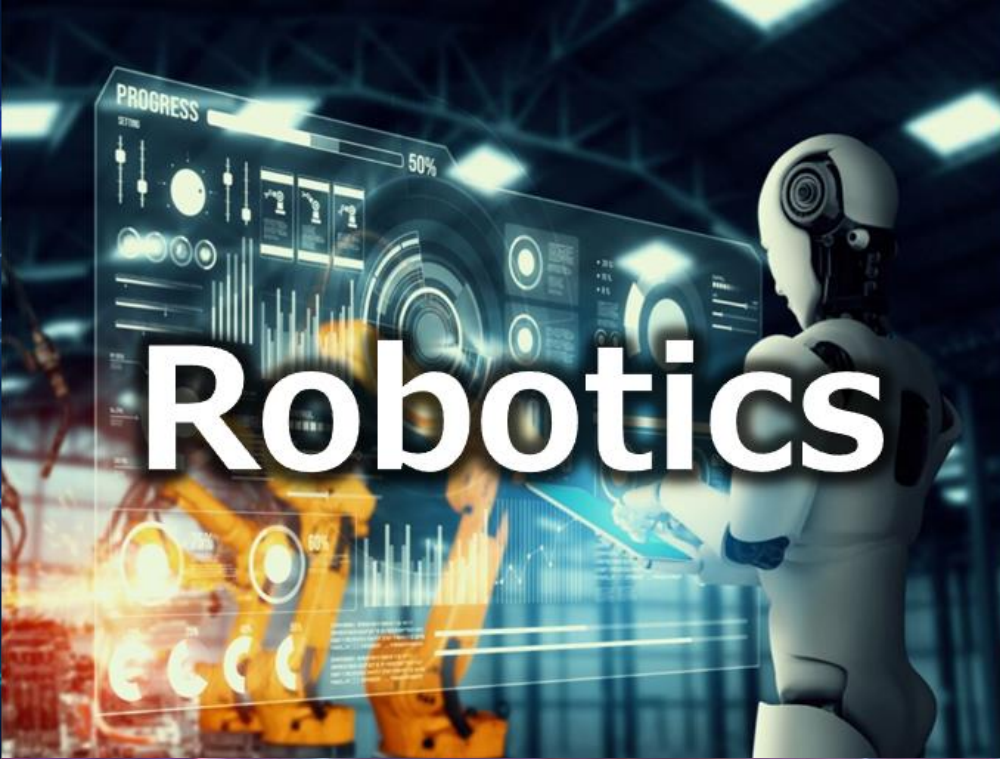

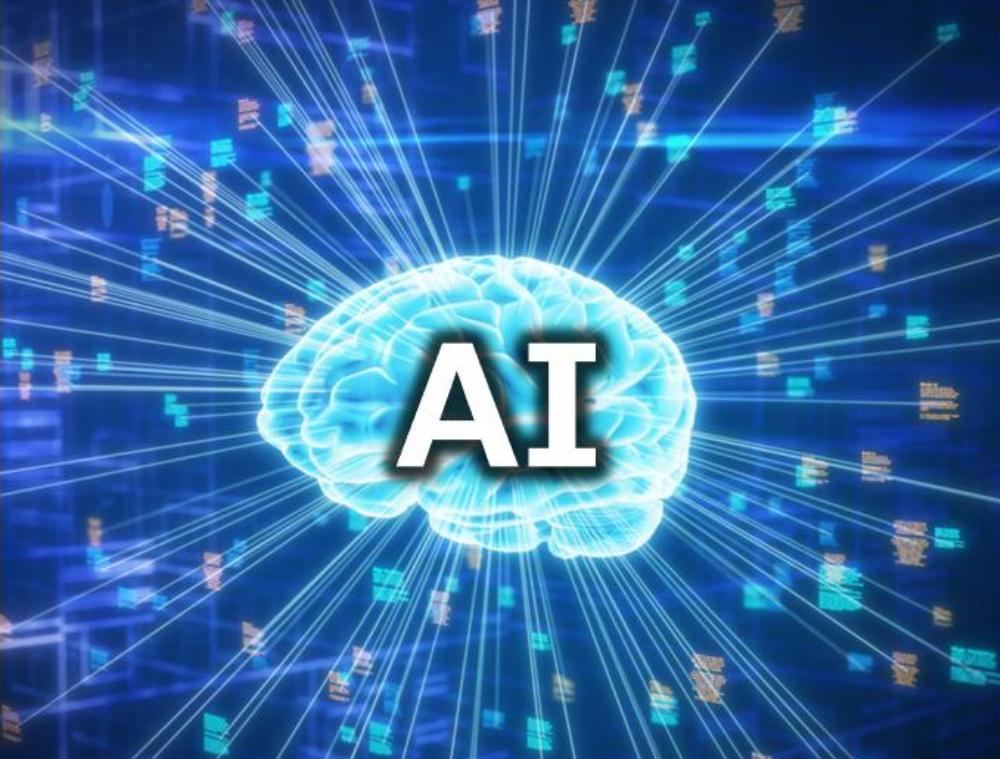

In addition, an "EmpowerHER Stage" was presented to promote DEI

(4/28 Meteor Stage)

〈Themes〉

- Truly Effective A.I. Replaces The Need For Human Workers
- The Power of Diversity in Action
- The Alpha in the Data: Why Diversity is the Core Metric for Japan's Next Unicorns
- ...etc

Special Contents - Focus on -

Focusing on areas where innovation brings transformative change to society and people's lives, discussions were held on technologies that enable sustainable cities. In 2026, centered on "**AI**," the program highlights four key domains that support everyday life—"Robotics," "**Resilience**," and "**Entertainment**"—with sessions, exhibitions, and demonstrations delivered as an integrated package.

Planning Partner: Matsuo Institute, Inc

- Rapidly evolving AI is fundamentally transforming the nature of innovation across all fields
- We explore how humans and AI can collaborate in society, and envision the role of AI in creating a more enriched and sustainable future

Planning Partner: AI Robot Association (AIRoA)

- The convergence of AI and robotics is driving the automation of a wide range of tasks
- We discuss how to advance real-world implementation to create a more convenient and enriched society

Planning Partner: The Association for Resilience Japan

- Cities around the world are facing crises such as climate change, earthquakes, floods, and cyberattacks, and are required to maintain their functions and recover swiftly.
- Drawing on the experiences of cities in Japan and around the world in overcoming such challenges, together with the power of technology, we engage in multifaceted discussions

Planning Partner: Japan Culture and Entertainment Industry Promotion Association (CEIPA)

- Innovation is not only about convenience, but also a source of emotional enrichment
- Across entertainment fields such as music, anime, gaming, art, sports, and food, we explore a wide range of topics, including shifts in creative approaches, evolving business models, and the transformation of human experiences

– AI –

- Leading figures, including executives from pioneering companies and renowned researchers, discussed the future of AI and how it can further enrich society.
- Through AI-themed pitch sessions by university-launched startups from across Japan, screenings from the AI International Film Festival, and various partner events, attendees experienced firsthand how AI is transforming society.

Session

◆ The Next Phase of AI : From Infrastructure to Impact

- AI is shifting from an infrastructure- and model-centric phase to real-world deployment through services and applications. The ability to leverage AI—driven by data readiness and business process reengineering—has become a key source of competitive advantage
- Japan is not falling behind; rather, it has strong growth potential in physical and industrial AI, supported by its industrial base, labor shortages, and strengths in robotics. However, success will require global collaboration and rapid implementation

◆ Who Will Build Trustworthy AI? :

The Responsibility of Technology Companies in an Era of Disruption

- Generative AI is evolving beyond productivity gains to become a force that impacts social infrastructure and national competitiveness
- Amid the advancement of AI regulation and governance, companies are increasingly required to deliver AI that not only offers speed but also ensures reliability and trustworthiness

Networking

- ◆ 51 attendees with a strong interest in “AI” participated
- ◆ In addition to large corporations such as WOVEN by TOYOTA and Toshiba Tec, the meetup brought together domestic and international startups, VCs/CVCs, accelerators, universities, and government representatives
- ◆ The Matsuo Institute and six startups from the Matsuo Lab delivered presentations (UnityStepAI, PortusAI, Unseed, EpicAI, ARCRA, EQUES).

– Robotics –

- Against the backdrop of rapidly accelerating advancements in AI, the implementation of physical AI in society is progressing, driving rapid developments in robotics
- As robots take on a wide range of tasks, attendees can experience technologies that enable a more convenient and enriched society

Session

◆ Physical AI × Robotics for Adaptive Living Environments: An Implementation Approach Connecting Data, Simulation, and the Real World

- With the advent of Physical AI, robotics is evolving into systems that can adapt to their environments, with data cycles that connect simulation and real-world environments becoming central to implementation. Companies are increasingly required to build development platforms that assume learning in real-world conditions. The key to social implementation lies in “real-world data.” Collaboration that takes into account data, regulation, and safety will accelerate the practical adoption of robotics
- ◆ **Where Can Japan Create Unique Value in Physical AI?**
 - Japan should differentiate itself not through AI alone, but through on-the-ground value, leveraging its strengths in robotics, manufacturing, and real-world operations, along with its strong implementation capabilities and use of real-world data. To address data-related challenges, it is essential to build open data platforms and collaborative ecosystems, establishing a position distinct from the United States and China

Networking

- ◆ 20 attendees with a strong interest in “Robotics” participated
- ◆ In addition to the AI Robotics Association, a supporting organization for this theme, the meetup brought together major corporations such as SoftBank, Fujitsu Ventures, and Kurita Water Industries, as well as domestic and international startups, VCs/CVCs, and government representative
- ◆ In addition, a “Matching Event Leveraging Patent Information,” co-hosted with the Japan Patent Office and others, was heldNumber of participants: approx. 23

– Robotics –

Demo and Exhibitions

AVITA

Humanoid (Concept Model for Customer Service) with a warm, approachable appearance shaped by its human-like proportions and silicone skin, it operates autonomously to enable natural communication with visitors.

donut robotics

A motion demo featuring the humanoid cinnamon 1, equipped with the world's first gesture-control technology, the compact humanoid cinnamon mini.

Tokyo Robotics

Demo of clearing a desk using a semi-humanoid robot via teleoperation. Intuitive operation allows for efficient collection of motion logs to be used as AI training data.

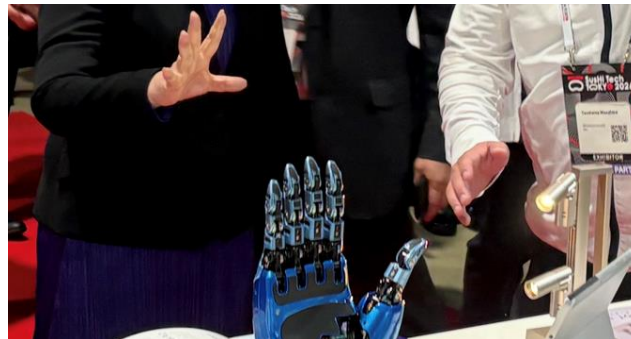

GMO AI & Robotics Corporation

A demo showcasing a humanoid performing smooth, expressive dance moves to upbeat music, powered by our in-house developed software, presented in a showtime-style format.

TIER IV, Inc.

Alongside the exhibition of the next-generation autonomous vehicle, e-Palette, advanced technologies and initiatives driving real-world deployment—powered by the open-source autonomous driving software, Autoware was showcased.

MinebeaMitsumi Inc.

Introducing robotic hand technology that achieves both high-speed motion and high payload capability through variable gear ratios, along with a motion-capture experience enabling visitors to operate the robotic hand themselves.

INNOPHYS Co., Ltd.

An exhibition of a power generator using microbial fuel cells. This device uses food and agricultural waste to generate electricity.

ONGA ENGINEERING Co., Ltd.

Suction-type wall-climbing robot that adheres to and moves along concrete walls and ceilings under remote control

– Resilience –

- Demonstration exhibits showcasing technologies that help maintain urban functions and enable rapid recovery from various risks, including earthquakes, floods, and climate-related risks
- Site visit tours offering insights into infrastructure that protects urban functions and daily life, such as underground flood control reservoirs.

Session

◆ Make the Invisible Threat Visible: The Reality of Cyber Defense and Public -Private Collaboration from a Global Perspective-

- With the emergence of AI and the industrialization of cybercrime, threats are becoming more sophisticated and less visible, with the growing convergence of state and criminal actors. As a result, isolated countermeasures are no longer sufficient, making a risk-prioritized design approach essential.
- Shifting from post-detection response to proactive risk management, the integration of management and IT, rapid response within the first 48 hours, and coordination across public-private and international stakeholders will be key factors in determining success

◆ Green Intelligence and a Circular Future: AI-Driven Pathways to Net Zero and Resource Innovation

- Achieving net zero requires both digital transformation (DX) and a circular economy. By fostering public-private collaboration and enabling trusted data sharing, ecosystems can be built to drive sustainable progress. Linking data with pricing mechanisms will help incentivize behavioral change among consumers

Networking

- ◆ 26 attendees with a strong interest in “Resilience” participated
- ◆ In addition to major corporations such as Mizuho Bank, Marubeni, NTT West, Kyushu Electric Power, Sharp, and Nomura Real Estate, the meetup brought together domestic and international startups, VCs/CVCs, and government representatives

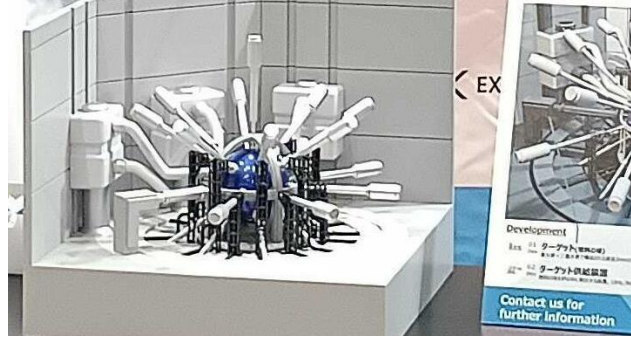

– Resilience –

Demo and Exhibitions

Kyoto Fusioneering Ltd.

Presenting a scale model of a future city centered on the FAST fusion energy (nuclear fusion) power plant, conveying a vision of enriched quality of life and economic growth enabled by power generation demonstration in the 2030s and its subsequent social implementation.

EX-Fusion Co., Ltd.

Progress updates on the development of core components toward the realization of laser fusion are unveiled. Through scale models and video presentations of fusion reactors, cutting-edge technologies paving the way for the future of energy were showcased.

EneCoat Technologies Co.,Ltd.

Displaying ultrathin, lightweight, and flexible Perovskite Solar Cells(PSCs), including a demonstration of a miniature vehicle powered by electricity generated from LED lighting through the attached solar cells.

Tokyo Fire Department Tokyo Metropolitan Government

Showcasing research and development achieved in collaboration with private companies, along with exhibits of a VR disaster-prevention experience vehicle and hands-on experiences wearing firefighting protective gear.

Synspective Inc.

A model of the small SAR satellite, which is able to observe the Earth day and night regardless of weather conditions, is on display. This technology visualizes disaster risks, infrastructure, and economic activities, supporting advanced decision-making and the development of resilient cities.

Spectee Inc.

A resilience SaaS that visualizes crises from natural disasters to geopolitical risks and helps companies for BCP and manufacturing supply chains.

Coldstorage Japan Ltd.

Displaying an off-grid trailer designed to provide refrigeration and freezing functions at evacuation sites during disasters using solar power.

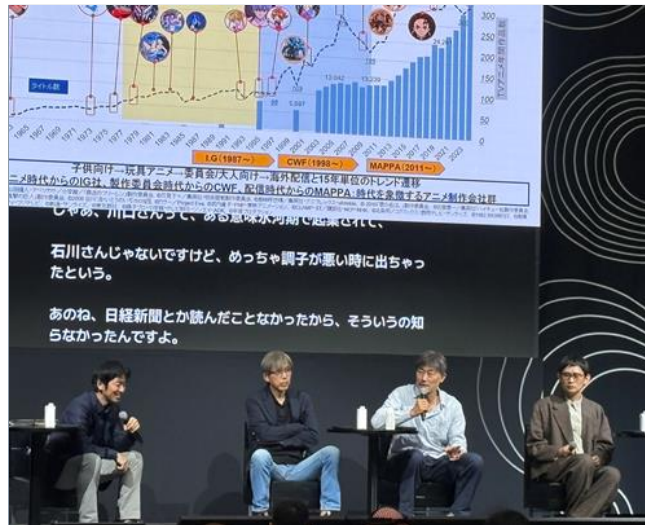

Serendix Inc.

Presenting a video showcasing the company's construction-grade 3D printer—also deployed in the development of reconstruction housing following the Noto Peninsula earthquake—demonstrating the fabrication of a residential structure within a single day, alongside the exhibition of a monument produced using the same 3D printer.

– Entertainment –

- Innovation is not only a source of “convenience,” but also of “enjoyment” and emotional “enrichment,” adding depth to a sustainable future society
- In the fields of entertainment—such as manga, anime, sports, music, and food—attendees can explore technologies that are transforming the way content is created and how people experience it

Session

◆ What Tokyo Needs to Become the “Hollywood of the Animation Industry”

- More important than talent alone is creating an environment that continuously develops human resources. Providing opportunities for younger talent and promoting generational renewal are directly linked to the industry’s sustainable growth
- Expanding beyond production to include global expansion, IP utilization, and real-world touchpoints will be key to maximizing value and driving both revenue growth and brand expansion

◆ Japanese Music Goes Global: How Technology Is Shaping the Future of Entertainment

- While AI and data utilization are significantly transforming music production, promotion, and monetization, the development of legal frameworks—such as copyright and licensing—has become a critical challenge
- The global expansion of Japanese music is accelerating, driven by digital channels; however, building ecosystems that include local partnerships, investment, and industry collaboration will be key to success

Networking

- 50 attendees with a strong interest in “Entertainment” participated
- In addition to major corporations such as Toho, Amuse, Fuji Television, Japan Airlines (JAL), DeNA, and Bandai Namco Entertainment, the meetup brought together domestic and international startups, VCs/CVCs, and government representatives

– Entertainment –

Demo and Exhibitions

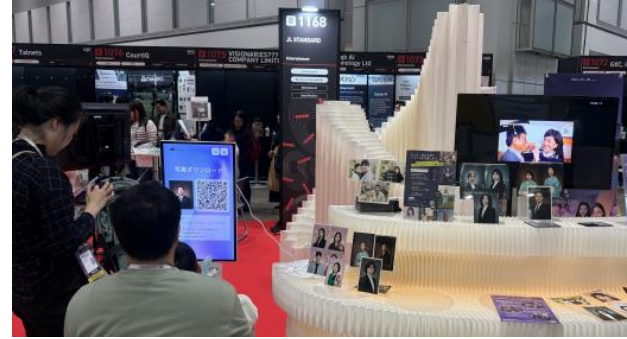

Abzero Inc.

A VR batting experience that faithfully recreates the trajectory and speed of high-velocity pitches thrown by MLB pitchers, demonstrating technology that reflects the direction and angle of the hit based on the user's swing.

SEVEN POINT ONE

An introduction to "Sally," an AI healthcare app that supports brain and physical health in everyday life, and a hands-on VR experience of "Calorie Hunters," an exercise game that enables calorie management in a fun, game-like way.

JL STANDARD

A demo offering real-time AI transformations using photos taken at the booth, allowing visitors to enjoy various alterations such as changes to facial expressions, hairstyles, clothing, and artistic painting-style effects.

SGLAB

An AI-powered diagnostic demo that analyzes golf swings in real time, visualizing form improvement points along with ball trajectory and swing data.

Magic Holic

Live demonstration of animation production using generative AI, showcasing in real time how AI brings characters to life throughout the creation process.

LINE Digital Frontier

Showcasing and introducing Japan's leading manga platforms and the global manga service "WEBTOON," while offering interactive exhibits and demos that enable visitors to engage in AI-powered conversations with characters.

Orange Inc.

Exhibition of "emaqi", a cross-publisher digital manga app available in North America, and our in-house translated and published titles. The exhibition also features our AI-powered manga translation and localization technologies.

SkyDrive Inc.

Exhibiting a 1/5 scale eVTOL (electric vertical takeoff and landing) model and panels to present a future vision of urban mobility—enabling traffic-free travel and scenic sightseeing flights.

Voices from Startups and Stakeholders

donut robotics Co., Ltd.
CEO
Taisuke Ono

We were truly fortunate to receive coverage from a wide range of media outlets, generating such a strong response that it felt as though our company has advanced to a new stage. We are sincerely grateful for the opportunity to present on such an impactful platform.

In addition, we felt an unprecedented level of positive engagement, as so many people genuinely enjoyed experiencing our robots. This provided us with extremely encouraging feedback.

The response both internally and externally has been significant and has boosted our confidence. Among the many events we participate in, this conference stands out as one of the largest in Asia, and we believe that presenting here carries great significance. We would be delighted to continue using this platform for future humanoid announcements and see it as a valuable venue for sharing our ongoing innovations and challenges.

**AI Robot
Association**

AI Robot Association
Chairperson
Tetsuya Ogata

This year's SusHi Tech provided a valuable opportunity, particularly under the theme of Robotics and Physical AI, to showcase the latest global trends alongside the strengths of Japan's technological capabilities.

On the day of the event, a large number of visitors from both Japan and overseas attended, and through dialogues with startups and corporations, we saw numerous opportunities that could lead to concrete collaborations and business development. In particular, there was strong interest in the fusion of Japan's precision manufacturing with AI, and we feel that we were able to effectively highlight Japan's distinctiveness and presence on the global stage.

Moving forward, we aim to continue leveraging platforms like this to contribute to the advancement of technology and industry, while consistently communicating value from Japan to the world.

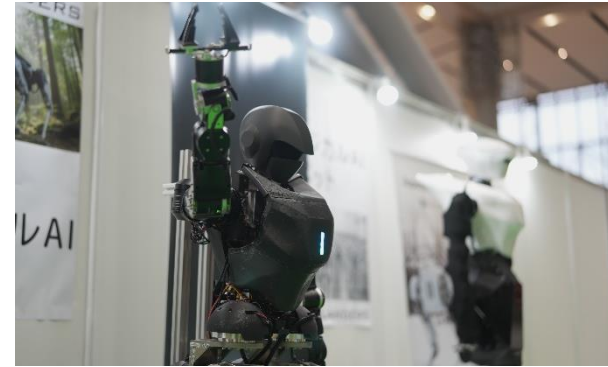

Future Experience Pavilion

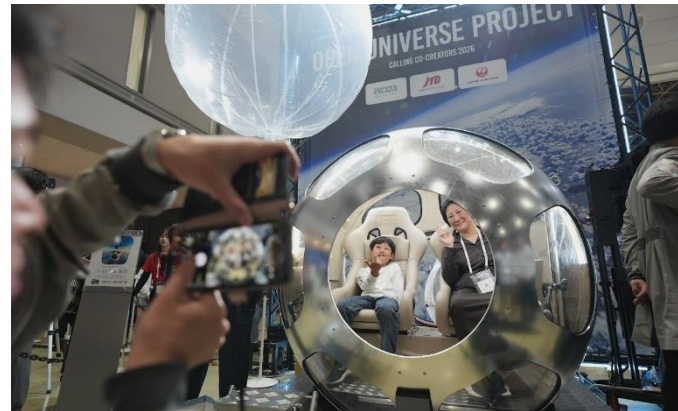

Future Experience : Future Experience Pavilion

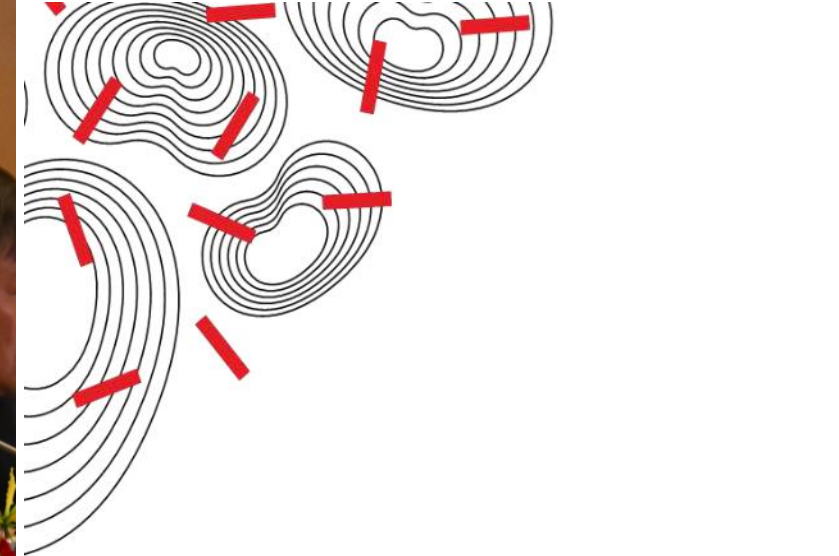

- Immersive, hands-on experiences showcasing cutting-edge technologies that bring the future to life. This year, the exhibition expanded across two floors—the 1st floor (including the atrium) and the 4th floor—A variety of Japanese innovations energized the entire event.
- On the 1st floor, visitors experienced live demonstrations and interactive exhibits featuring advanced technologies such as large-scale monuments, robots, and drones, alongside stage events and Public Day workshops.
- On the 4th floor, a wide range of exhibitions and experiences were offered across diverse technological fields, including space, robotics, dinosaurs, and XR.

1st Floor (including the atrium)

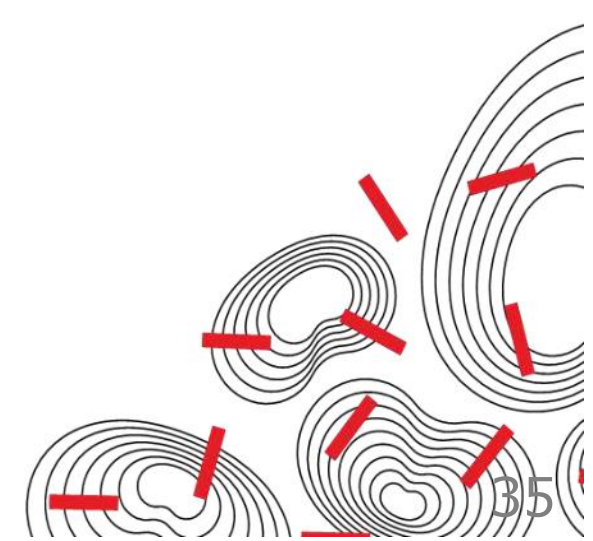

4th Floor

G-NETS

Global City Network for Sustainability

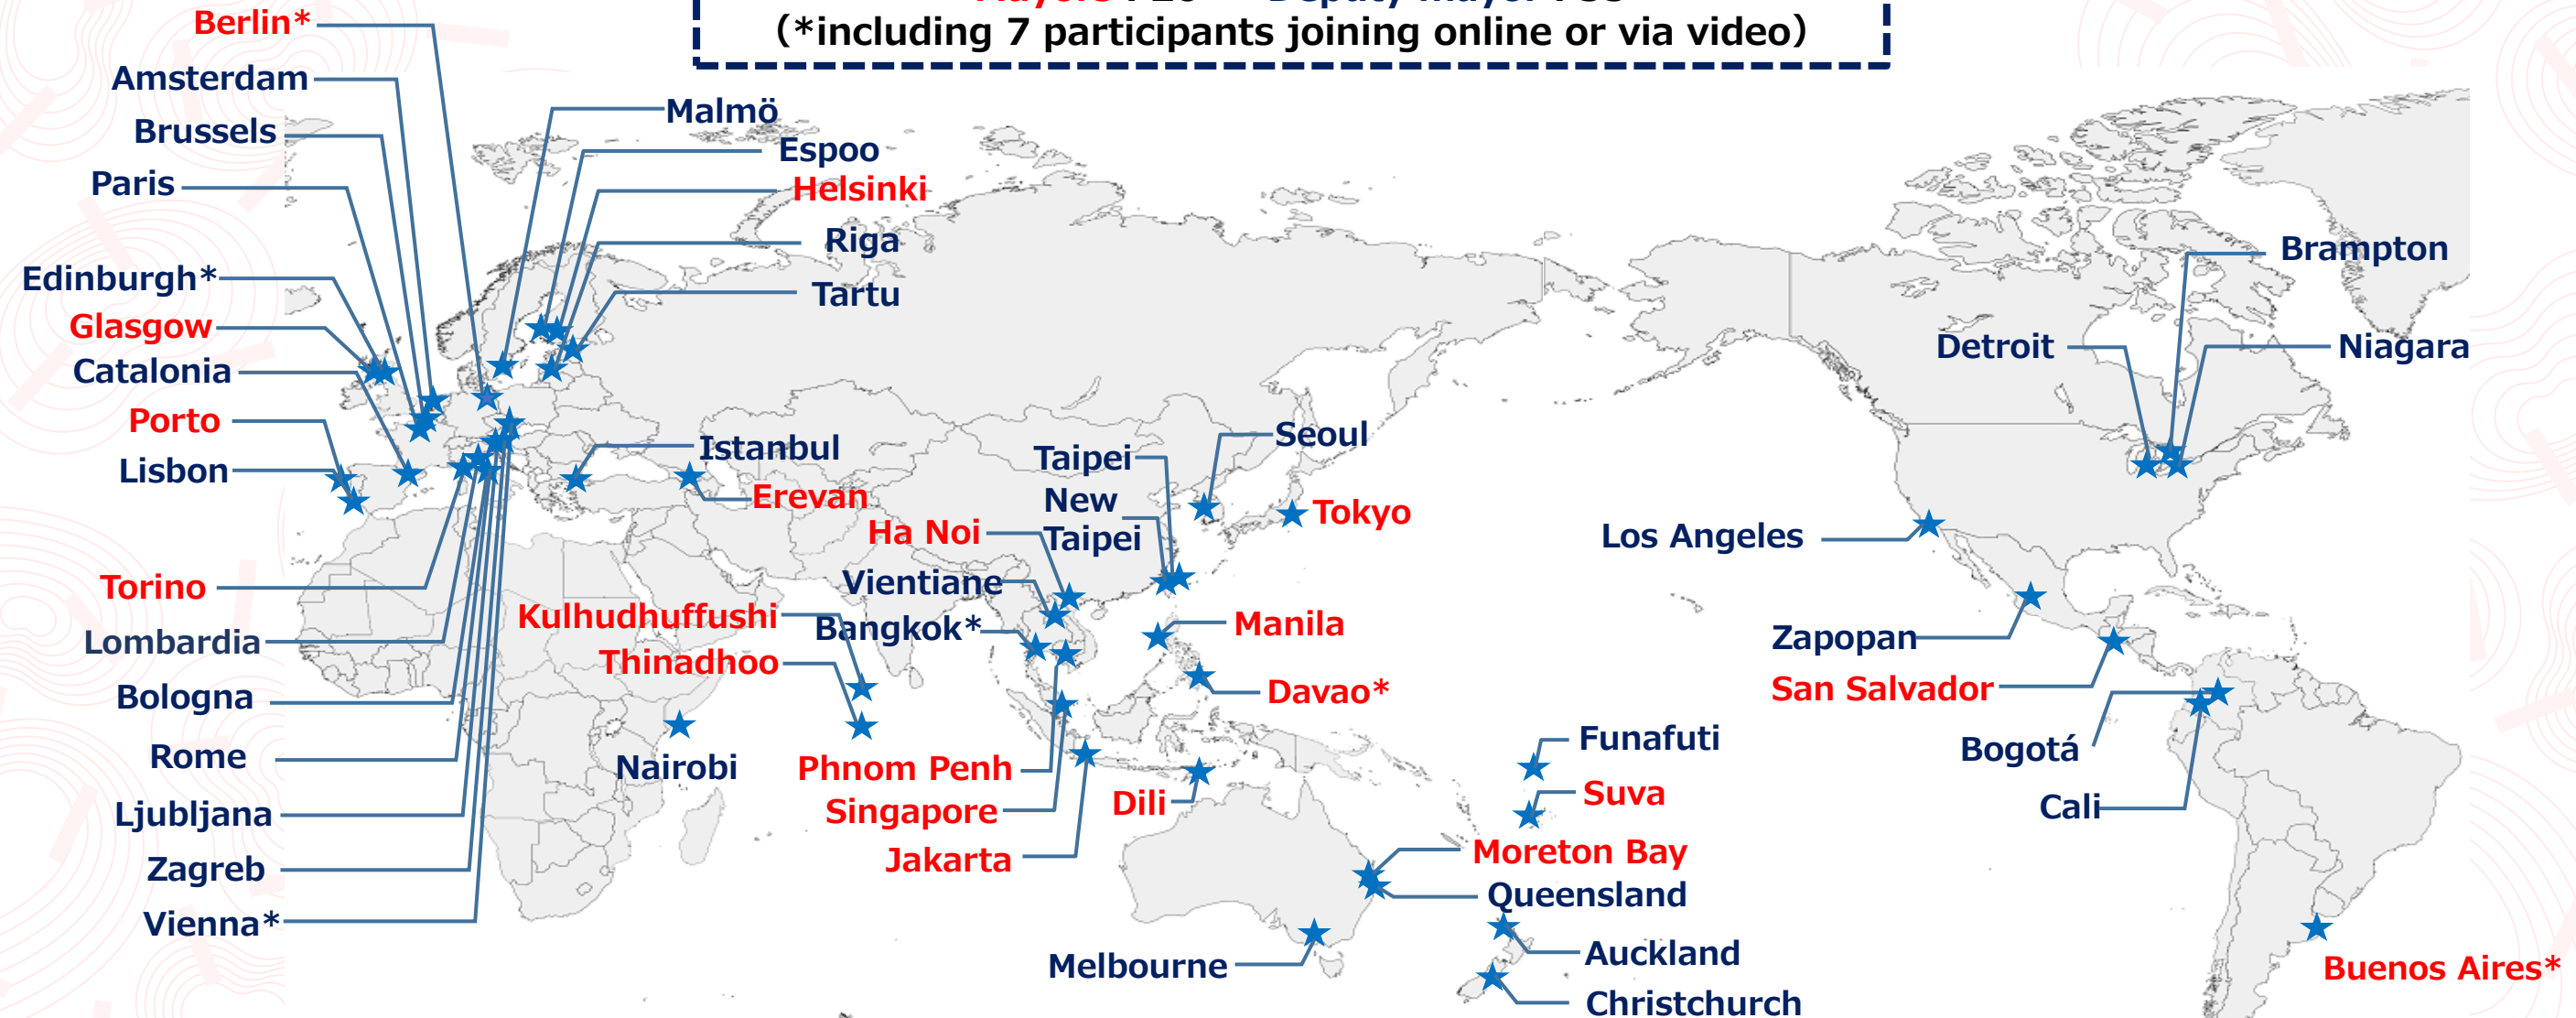

Participating Cities

55 Cities

• **Mayors** : 20 • **Deputy mayor** : 35

(*including 7 participants joining online or via video)

Programs

DAY 1 (4/27) : SusHi Tech site visit, Reverse pitch, Sessions

- ✓ Take the stage at the Opening session
- ✓ Moreton Bay and Rome presented their urban challenges to Tokyo-based startups
- ✓ Representatives from 28 cities delivered presentations and exchanged views on themes such as disaster preparedness, culture and sports, and startup collaboration

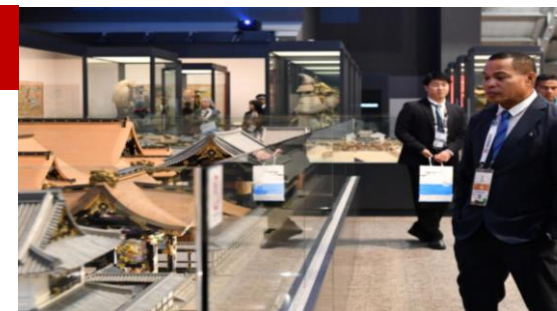

DAY 2 (4/28) : Sessions, Announcement of the Communiqué

- ✓ Representatives from 21 cities delivered presentations and exchanged views on themes such as disaster preparedness, decarbonization, and AI/digital technologies
- ✓ The Communiqué was compiled and jointly issued to the global community, along with the action statement by each city

DAY 3 (4/29) : Site visit

- ✓ Representatives from 26 cities participated in site visits, including the Edo-Tokyo Museum and resilience-related facilities (e.g. Koto River Improvement Office, Tokyo Port Construction Office, and the Chiyoda Sewer Trunk Line)

Key Presentations from Participating

Global City Network
for Sustainability
Leaders Summit

Urban Climate and Disaster Resilience

- ✓ In addition to structural measures such as regulating reservoirs, Tokyo has actively introduced digital technologies—including river monitoring systems—to reduce damage from floods and storm surges. (Tokyo)
- ✓ Glasgow has implemented the “Glasgow Strategic Drainage Partnership,” which integrates flood risk management with regional regeneration while also contributing to the creation of high-quality green spaces. (Glasgow)

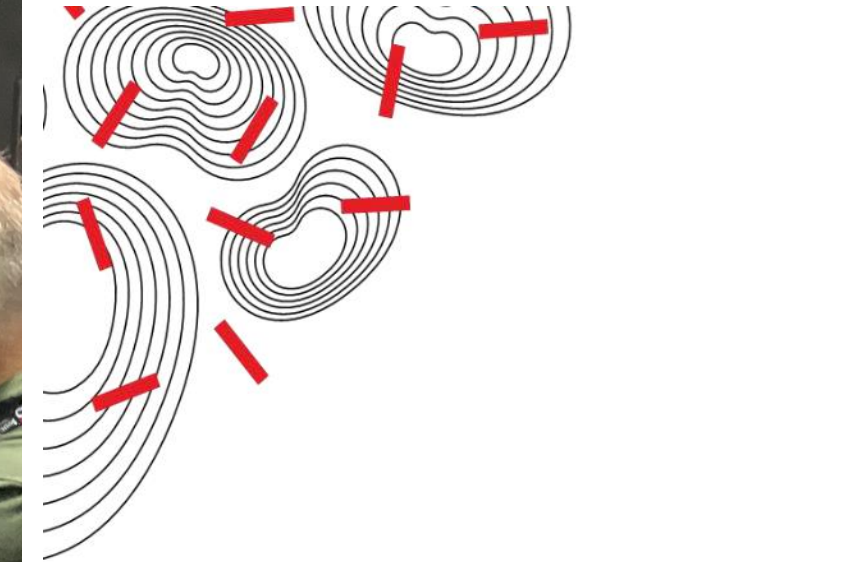

Citizen Well-being

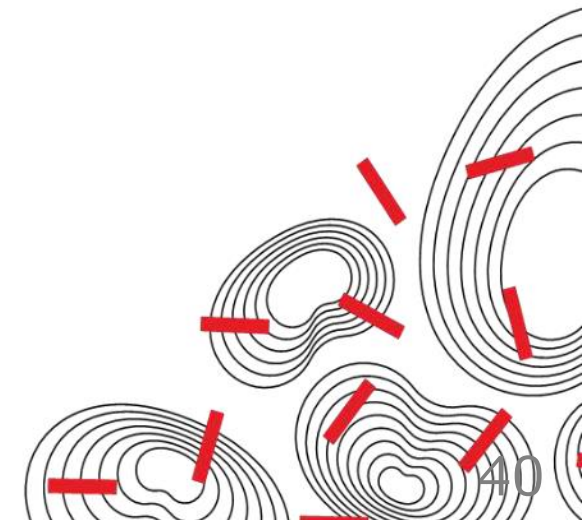

- ✓ Seoul has enhanced public safety and convenience by establishing an AI-powered CCTV network that automatically detects incidents such as fires, as well as introducing systems that instantly analyze emergency (119) calls. (Seoul)
- ✓ Detroit has revitalized previously neglected urban spaces through the “Arts Alley Project,” transforming deteriorated alleys into community art spaces that serve as places for residents to gather and support well-being. (Detroit)

Business

Business Matching

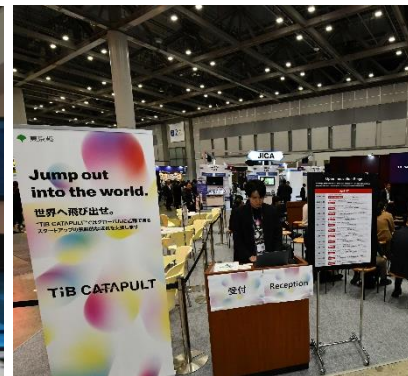

Business Matching

- The number of business matches reached 25,140, a 4.2-fold increase year-over-year (previously 6,136).
- Participation from corporations and VCs increased, particularly those that startups aim to connect with. Growth-stage startups—“SusHi Tech Global Startups”—also participated.

Large corporations

68 corporate partners and 12 TIB CATAPULT clusters

International VCs

580

SusHi Tech Global

45 exhibitors

Networking events

- Tailored networking for corporates and leading VCs
- Secretariat support for startup sourcing and selection

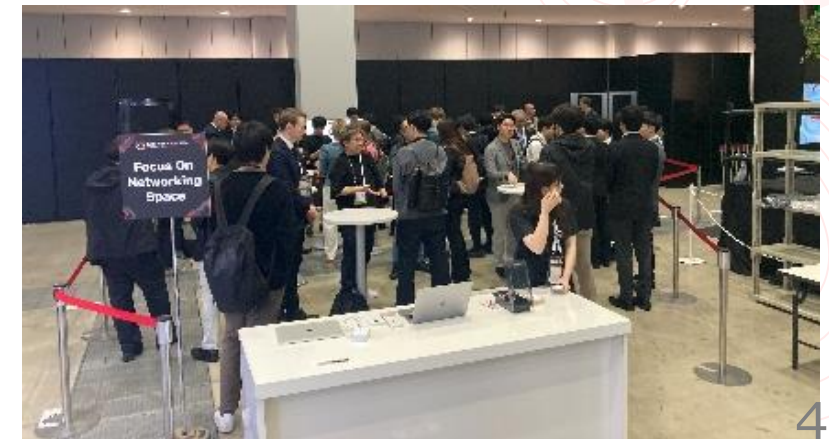

Post-session meetups

- Post-session meetups between speakers and attendees

Focus on theme meetups

- Networking among startups and supporters around themes such as AI, Robotics, Resilience, and Entertainment

Business Matching

- Multiple touchpoints, including app-based matching and on-site meetings/booths

App / Meeting Space

- ◆ Expanded on-site meeting spaces significantly
- ◆ Connect with relevant participants via the official app
 - ◆ A 4-step process: registration, participant search, messaging, meeting scheduling
 - ◆ Key features: AI-powered recommendations, meeting requests & booking, digital business cards

Open Innovation Area

- ◆ **Dedicated area** (including reverse pitches aimed at engaging startups) **for sessions and pitches by large corporations**

Matching International Cities with Startups

- ◆ **Global cities present urban challenges** (Moreton Bay: disaster & infrastructure / Rome: transport & circular waste)
- ◆ **Matching startup technologies with city needs**
- ◆ **On-site pilot projects by Tokyo startups starting this fall**

Reverse pitch sessions (Moreton Bay, Rome)

SusHi Tech Challenge 2026 Finals

Pitch Contest

SusHi Tech Challenge

Startups Competing to Solve Global Issues

SusHi Tech Challenge 2026

"Realizing sustainable cities with advanced technology", a global common challenge,
both domestically and internationally.

A global pitch contest where startups present their technology and ideas.

820 applicants from 60 countries and regions (383 domestic / 437 international)

20 semifinalists (2 withdrew) / **7 finalists**

Message from Minister in Charge of Startups, Minoru Kiuchi

<Excerpt from Remarks by Minister in charge of Startups Minoru Kiuchi>

It gives me great pleasure to extend my warmest congratulations on the occasion of SusHi Tech Tokyo, which continues to grow toward becoming Asia's largest innovation conference. I am delighted to see the event being held once again this year with such energy and vitality. (...)

In 2022, the Government of Japan formulated the Startup Development Five-Year Plan, and since then, we have actively promoted the creation and growth of startups. As a result, the number of startups in Japan has now reached 25,000—an all-time high—representing an increase of approximately 1.5 times compared to 2021. This is one clear indication that Japan's startup ecosystem is steadily developing.

I am deeply encouraged by the strong leadership of Governor Koike and the Tokyo Metropolitan Government, which is actively driving the creation and growth of startups, including through hosting SusHi Tech Tokyo. We will continue to strengthen our commitment to supporting entrepreneurs who take on bold challenges and push the boundaries of innovation. (...)

Together, let us build a startup ecosystem that future generations will be proud of.

Qarbotech Won the Grand Prize

■ Voice of the Grand Prize Winner (Presenter: Chor Chee Hoe, CEO & Co-Founder)

Winning the Grand Prize significantly boosted our global credibility, opening doors to high-level discussions with investors and partners that would typically take months.

Beyond the pitch stage, the event provided access to a vibrant ecosystem, leading to new business opportunities, technology collaborations, and community-driven impact in the dynamic Japanese market.

SusHi Tech Tokyo is a launchpad for ideas that shape the future. To all startups aiming to scale their impact and challenge the status quo—step forward, share your story, and join us next time. The world is waiting for your potential.

18 Startups on Stage (10 International / 8 Domestic)

■ International

Company	Country	Theme	Overview
Qarbotech	Malaysia	Agri / Bio	Develops nanocarbon-based photosynthesis enhancers to increase crop yields
Eztia	USA	Materials / CleanTech	Develops battery-free wearable cooling materials with 8-hour continuous use
Kubo Care	India	Healthcare / IoT	Provides AI+contactless sensing for elderly health monitoring and fall-risk insights
enaDyne	Germany	CleanTech / Chemical	Converts CO ₂ into high-value chemicals using plasma technology
DeepMentor Inc.	Taiwan	AI / B2B	Provides fast, low-power, fully offline edge AI platforms
Midwest Composites	Malaysia	Materials / Bio	Converts agricultural waste into high-performance bio-composites
Ezygreenpak Limited	Hong Kong	Materials / Platform	Develops water-soluble packaging and ESG tooling platforms
Seyond Inc.	USA	Urban Infra / Mobility	Provides LiDAR-based 3D sensing for autonomous driving and smart infrastructure
Munice	Korea	Healthcare / Platform	Offers AI-based personalized sleep improvement solutions
PragmaClin Research Inc.	Canada	Healthcare / AI	Develops AI-based remote monitoring for neurological diseases

■ Domestic

※2 withdrawals

Company	Theme	Overview
EF Polymer Co., Ltd.	Agri / Bio	Biodegradable superabsorbent polymers from agricultural waste for water scarcity
Chiral	Bio / SaaS	Provides cloud-based platforms for computational processing of scientific research
Aster Co., Ltd.	Urban Infra / Materials	Reduces earthquake damage with flexible, high-strength seismic-resistant coatings
Lifescapes Inc.	Healthcare / Robotics	Uses brain-machine interface technology for rehabilitation of severe paralysis after stroke
ENELL Co., Ltd.	CleanTech / Urban Infra	Off-grid water systems converting natural sources into sterile water without chemicals
LiSTie Co., Ltd.	Energy / Materials	Recovers ultra-high purity lithium (99.99%) from diverse sources with proprietary technology
Asue Co., Ltd.	CleanTech / SaaS	One-stop decarbonization solutions with emissions visibility and reduction
New Space Intelligence Inc.	Space / Urban Infra	Provides highly reliable satellite data infrastructure by correcting errors and noise

SusHi Tech Challenge 2026 Special Award

Provider	Benefit	Awarded Company
TechCrunch	Selected for Startup Battlefield 200 at TechCrunch Disrupt	Lifescapes Inc.

Voices from SusHi Tech Challenge Participants

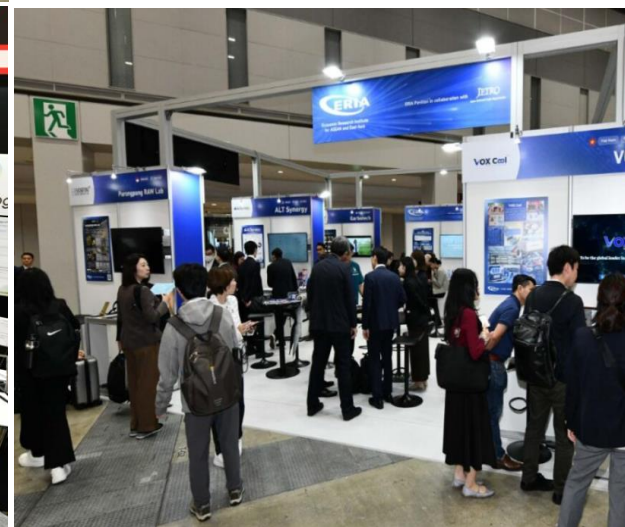

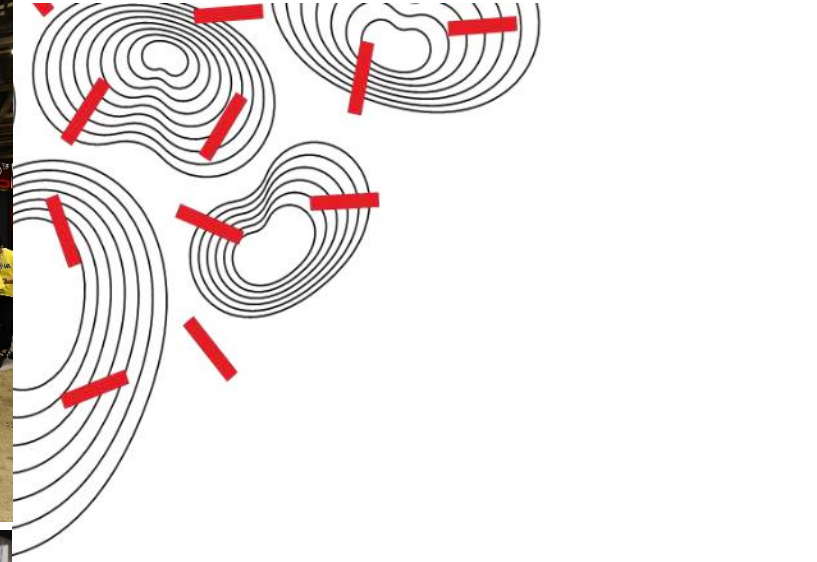

What excites me most about SusHi Tech Challenge, especially the final, is discovering truly innovative technologies—breakthroughs that can address global challenges.

I look forward to discussing solutions for issues like climate change and extreme heat, and how simple yet innovative technologies can improve everyday life.

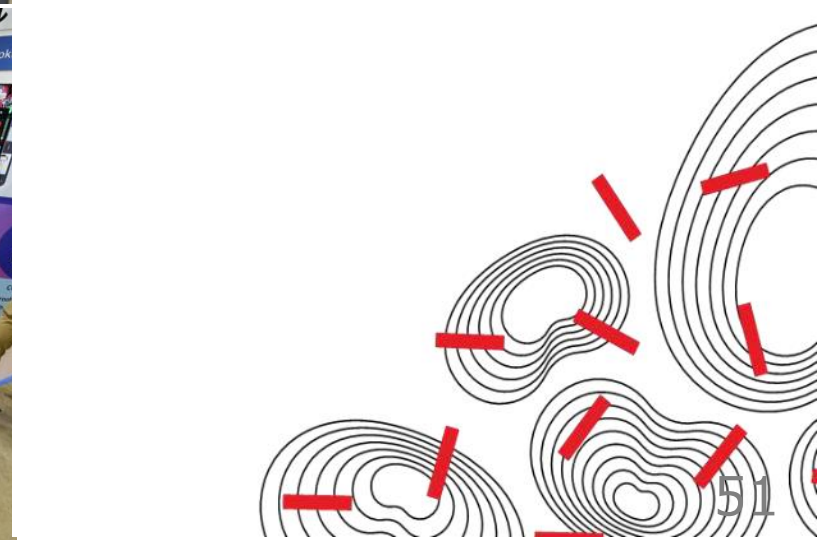

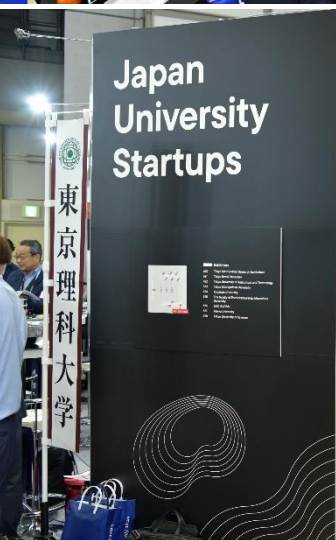

Many innovators tend to hesitate when expanding into overseas markets, especially in Japan where building trust takes time.

However, SusHi Tech removed these barriers, bringing together high-caliber participants and opening unexpected opportunities. Markets like Japan value those who engage directly and build relationships, and SusHi Tech provided exactly that opportunity alongside some of the world's leading entrepreneurs and leaders.

Startup Exhibitor

Record High Number of Startup Exhibitors

Alongside open-call startups, corporates, global cities, and public institutions exhibited with their partner startups

Category	Overseas	Domestic	Total
Individual Exhibitors	133	119	252
Corporate Partners (e.g., large corporations)	25	63	88
City Partners (countries/regions/cities)	214	6	220
All-Japan Ecosystem Area (local governments)	2	163	165
Japan University Startups Area (universities)	0	28	28
SusHi Tech Global Area	0	45	45
Total	374	424	798

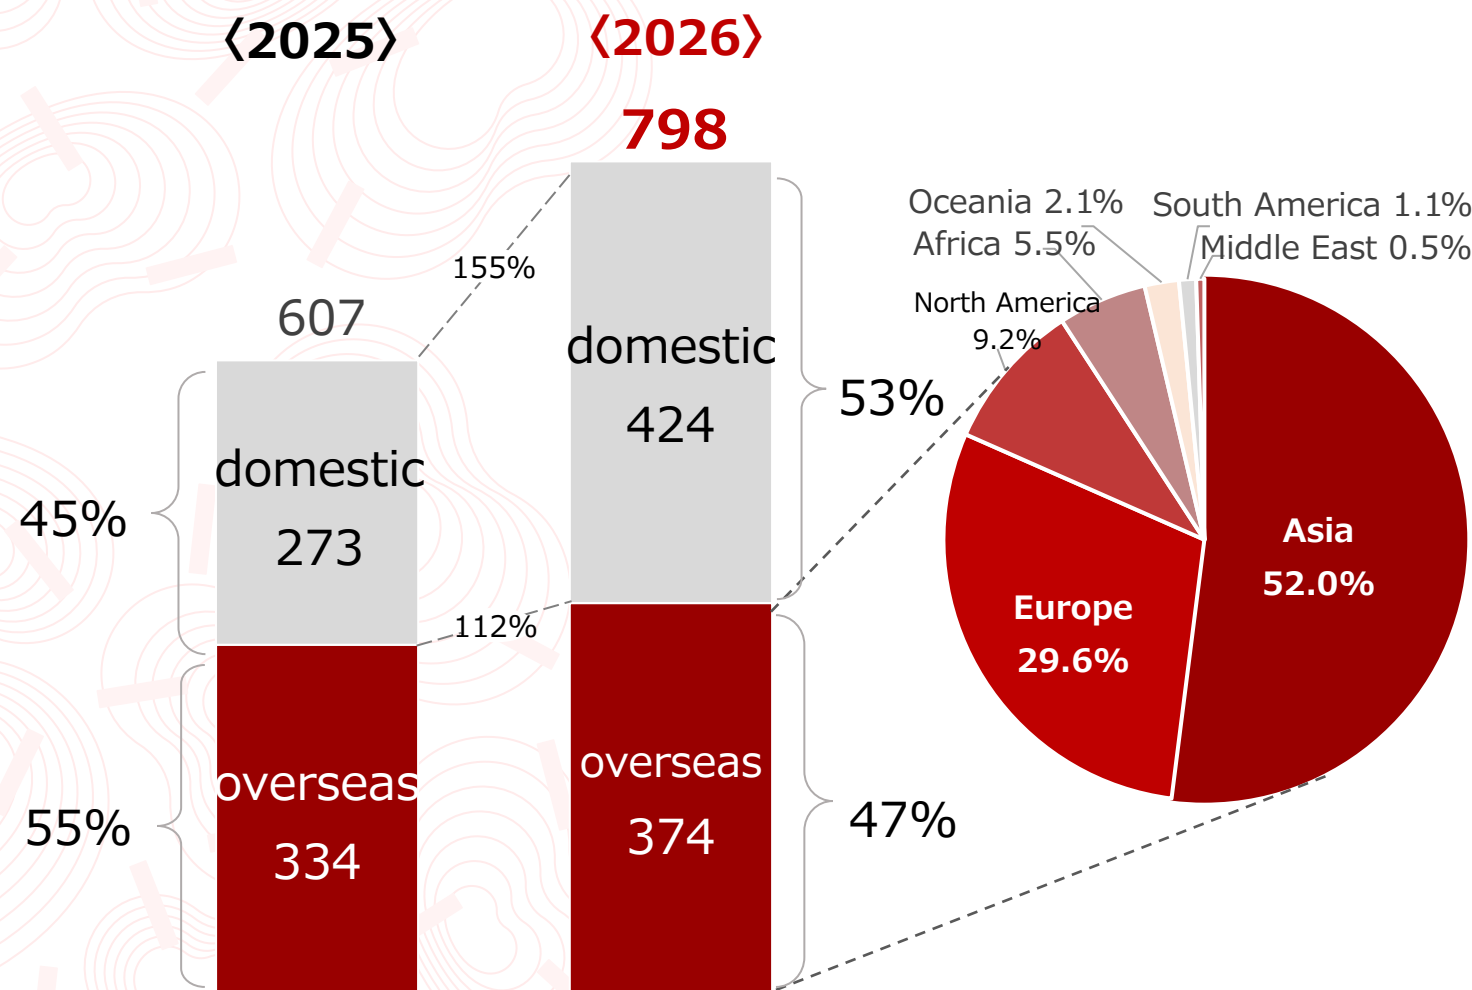

*Includes startups exhibiting within partner pavilions/booths (corporate/city partners)

*Each exhibitor is counted once under a single category (no double counting)

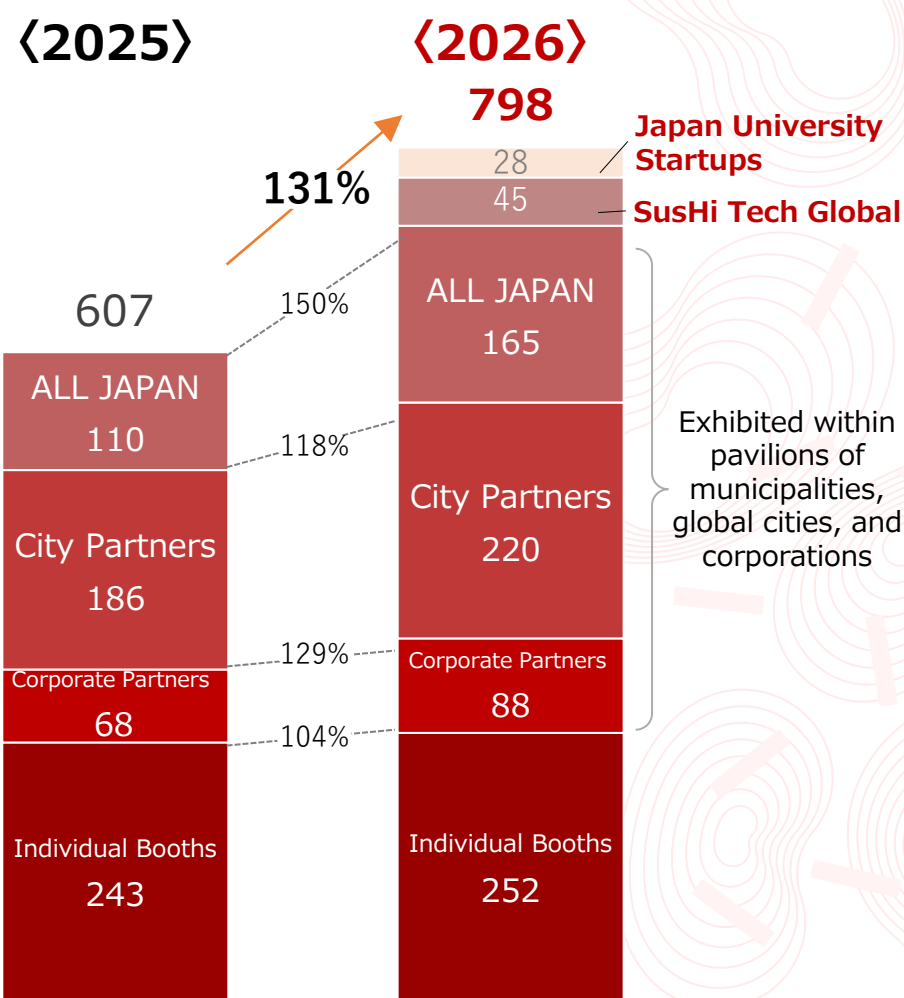

798 Startups from 42 Countries and Regions (up from 607)

- ◆ Increase in international startups despite global uncertainties
- ◆ Previously, participation was largely centered on seed- and early-stage startups. This year, the lineup expanded to include promising growth-stage startups under “SusHi Tech Global Startups.”
- ◆ University startups selected nationwide exhibited through collaboration with NINEJP

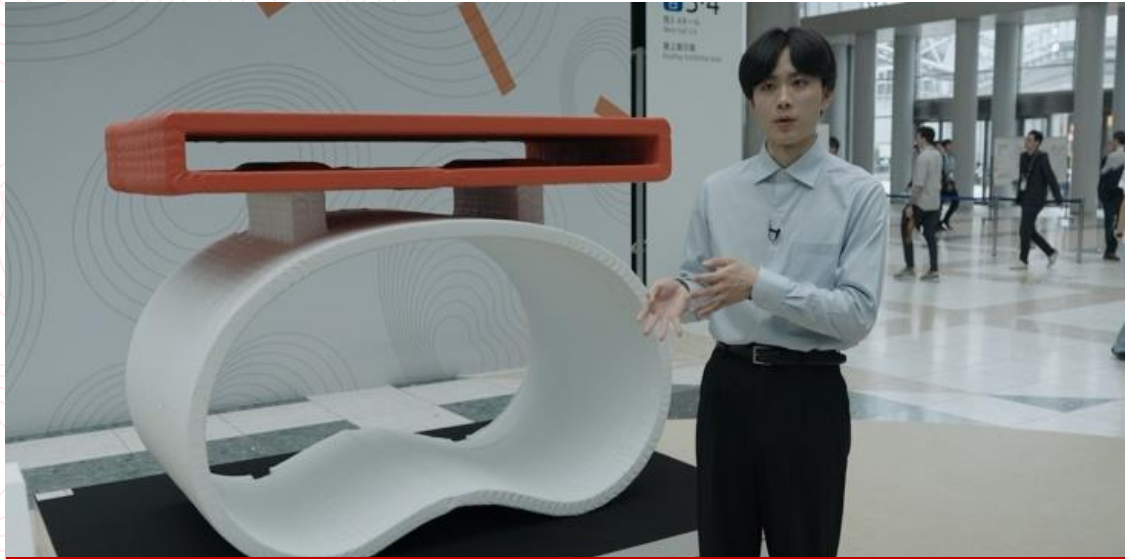

Regional Breakdown of Startups

Breakdown of Exhibiting Startups by Category

Voices from Exhibiting Startups

Serendix Inc.

We operate a 3D printing-based construction business. Exhibiting at SusHi Tech for the first time enabled not only corporate matching but also exchanges with municipalities across Japan.

Strong interest from students and children highlighted the impact of robot-based home construction.

Large-scale events like this create valuable new connections and are highly recommended to accelerate business growth.

TRISAFE HEALTHTECH PTE. LTD.

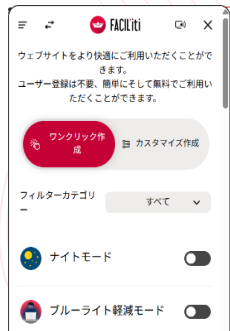

Strong interest from potential distributors and partners in Japan, with ongoing discussions on product evaluation, regulatory approval, and market entry

Valuable feedback highlighted the need to clearly communicate preventive value and clinical evidence

Participation significantly advanced Japan market entry and laid a foundation for clinical expansion, business growth, and strategic partnerships

Catalyzing Business Opportunities for SusHi Tech Global

- 45 **"SusHi Tech Global Startups"** showcased booths by theme/sector, creating a startup-friendly area with products featured on stage and staff T-shirts.
- Numerous business connections were formed, fostering new innovation opportunities.

SusHi Tech Global Pitch

- 37 **“SusHi Tech Global Startups”** pitched by theme/sector, with active discussions involving international VCs and experts.
- Post-pitch booth visits further promoted the startups globally.

Day1:①Agri Tech & Bio Tech

Day1:②AI Solutions & Digital Services

Day1:③Health & Life Sciences

Day1:④Energy & Decarbonization

Day2:①SpaceTech & Infrastructure

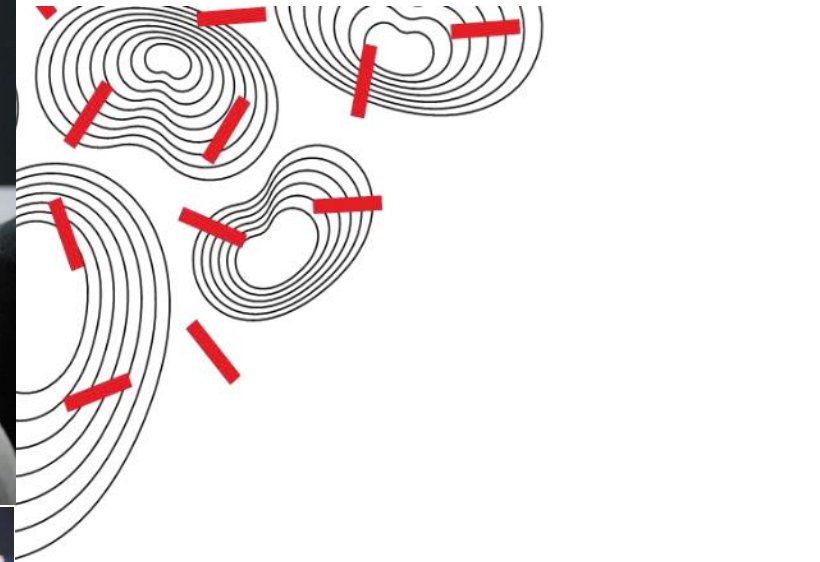

Day2:②Advanced Materials & Quantum

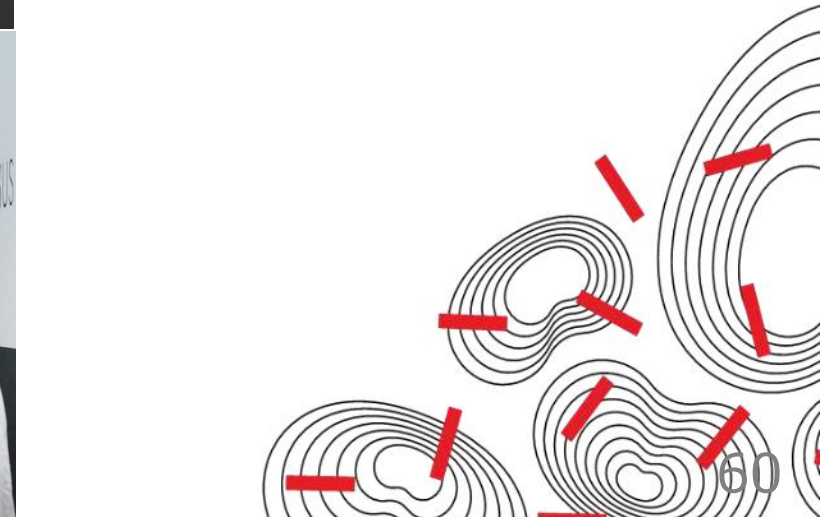

Day2:③Robotics & Automation

Stage highlights

VC/Investor

Attracting Global VCs and Investors

- ◆ 580 VCs from Asia, North America, Europe, and beyond participated.
- ◆ At the Investor Stage, leading domestic and international VCs shared global investment trends.
- ◆ Networking areas, booths, and events facilitated meetups with startups and LPs, with tailored matching and one-on-one meetings arranged with overseas VCs.

Investor area (4/27, 4/28)

○Investor Stage (featuring leading VCs)

- Session : 22

Announcement

108+ Announcements Leveraging STT 2026

Atrium stage for announcements, product launches, fundraising, and MoUs, attracting media

TIER IV, Inc.

Announced an initiative to equip partner vehicles with TIER IV's autonomous driving technology.

donut robotics Co., Ltd.

Unveiled new humanoid "cinnamon mini." Presented a vision of robots as social co-performers and its next global strategy

FinCity.Tokyo (FCT)

Memorandum of Understanding (MoU) Signing Ceremony with Luxembourg for Finance

Upstage AI (AI unicorn startup)

Released "Studio," an AI agent platform designed to transform document-related operations for Japanese companies.

Panasonic R&D Center Singapore (PRDCSG)

Signed an MoU with Roots Innovation and introduced the hybrid edge AI platform "Synstream VisionEdge"

Osaka Prefecture

Under the concept "Deep Tech, Together with the World, Into Industry," Global Startup EXPO 2026 (GSE 2026) will be held in Osaka from October 5 to 7 this year.

The background of the slide features a repeating pattern of red concentric circles and short, thick red line segments. These elements are scattered across the white background, creating a textured, organic feel. The circles vary in size and are often partially cut off by the edges of the frame. The line segments are short and appear to be floating or attached to the circular patterns.

TOKYU CORPORATION/ TOKYU LAND CORPORATION

Voice of Corporate Partner

Our company serves as the lead organization for the “Creative Entertainment Cluster” within the Tokyo Metropolitan Government’s startup support initiative, “TIB CATAPULT.” At this exhibition, we participated with the aim of fostering collaboration with startups in the entertainment sector and exploring new partnership opportunities.

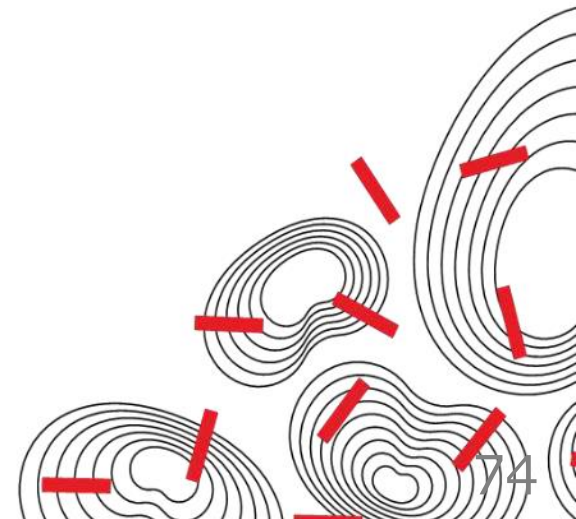

At the booth, Sony Acceleration Platform—focused on supporting innovation creation—took the lead under the theme “Creating new value for business through the power of entertainment.” We showcased examples of how combining Sony’s diverse assets can generate new business value, through exhibits of products and services.

During the exhibition period, we had the opportunity to engage with a wide range of participants, including major domestic and international companies, startups, as well as local governments and public institutions.

Through the Sony Acceleration Platform, we will continue to further promote open innovation and contribute to building a rich and sustainable society.

TIB CATAPULT

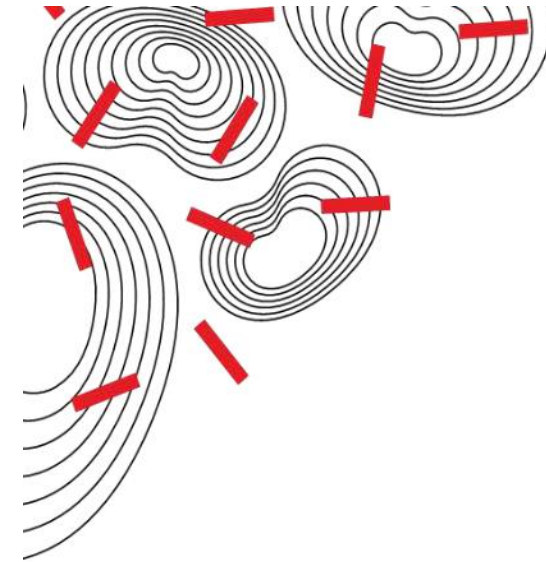

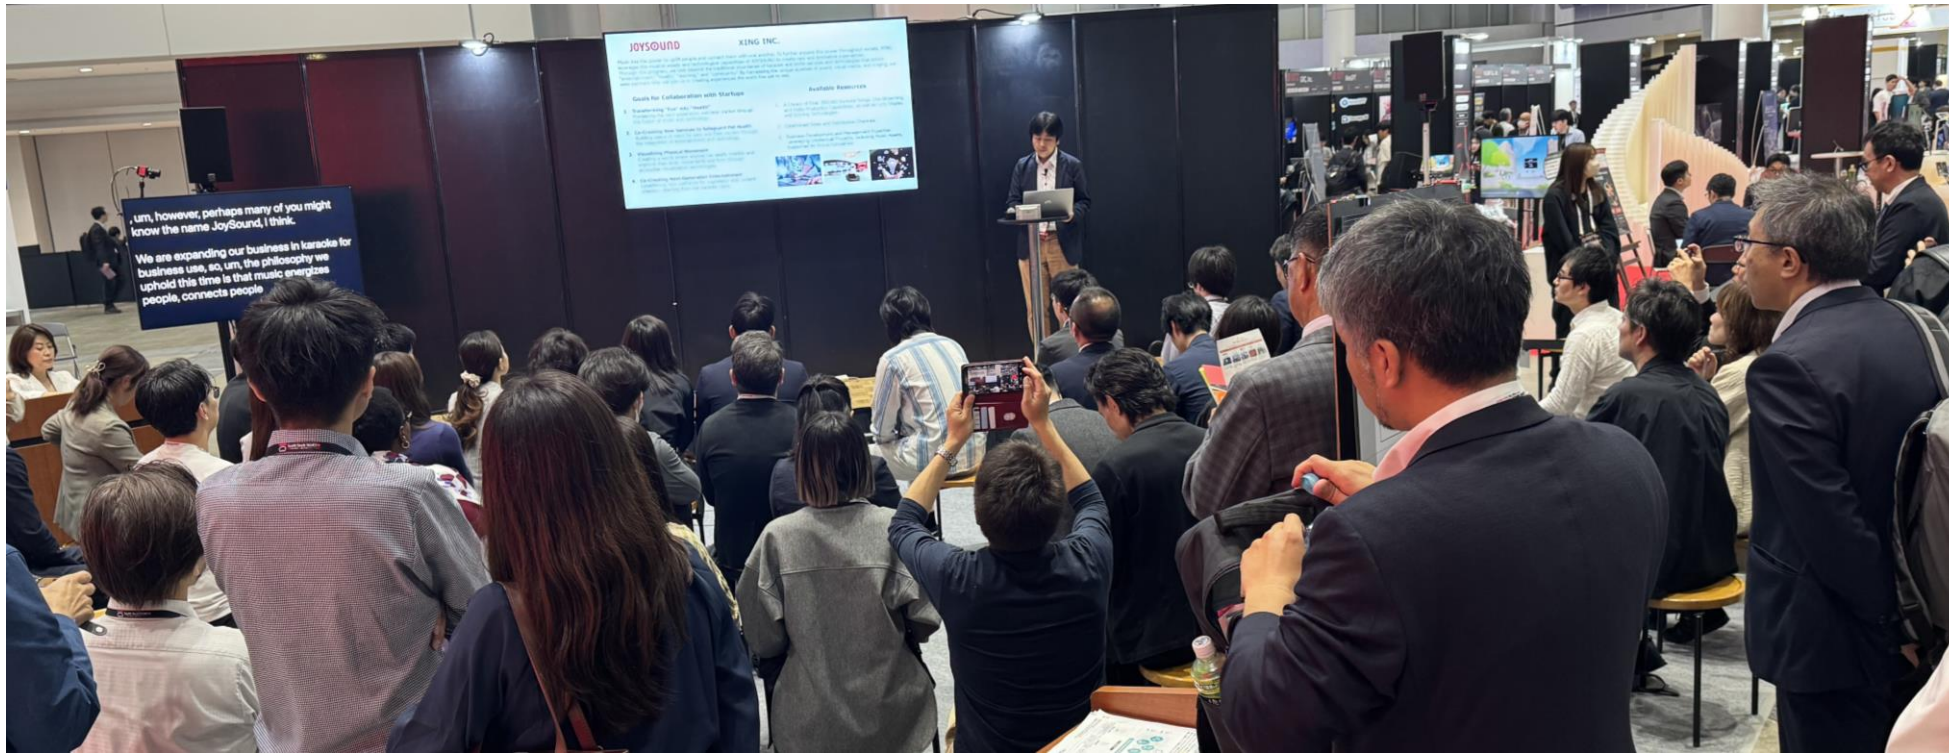

Specialized Innovation Clusters Showcasing Their Initiatives

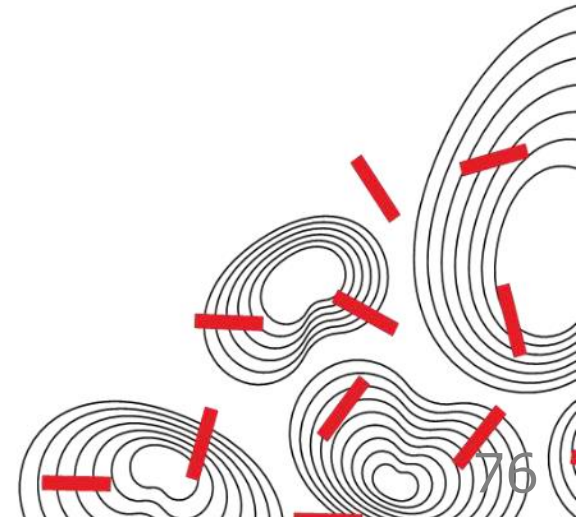

Under **"TIB CATAPULT," 12 clusters—formed by companies leveraging their strengths across various fields—**came together to drive innovation with startups, showcasing their initiatives through panels and stage presentations.

Field	Cluster	Participating companies	Cluster Overview
City Tech (Big city technology)	 Global CityTech Bridge	CIC Institute, Shimizu Corporation, Mitsubishi Estate Co., Ltd., Sekisui Chemical Co., Ltd., Sapporo Real Estate Co., Ltd., etc.	A cluster creating innovation for the social implementation of startup products solving issues of large cities both in Japan and overseas
AgriTech / FoodTech	 Sustainable AgriTech & FoodTech	General Incorporated Association AgVenture Lab, JA ZEN-NOH, The Norinchukin Bank, Umios Corporation, Asahi Soft Drinks Co., Ltd., Meiji Co., Ltd., etc.	A cluster working on advancement of the food value chain and the development of sustainable gastronomy through it
Universe	 MUGENLABO U N I V E R S E	KDDI Corporation, Shochiku Co., Ltd, TOPPAN Inc., Mitsui Sumitomo Insurance Co., Ltd., Fujita Corporation, Nippon Television Network Corporation, etc.	A cluster that aims to lower the barriers to entry in the space business with diverse assets and aims to solve global issues beyond that
Railway, Transportation	 TRIP Tokyo Railway Innovation Partnership	TIS Inc., JR East Startup Co., Ltd., Tokyu Corporation, Odakyu Electric Railway Co., Ltd., SEIBU HOLDINGS Inc., Keio Corporation, etc.	A cluster centered on railway operators creating innovation with a social impact
Climate Tech, Deep Tech	 Econovation City Cluster (ECC)	Plug and Play Japan Co., Ltd., ENEOS Corporation, Electric Power Development Co., Ltd., Tokyu Fudosan Holdings Corporation, etc.	A cluster that creates businesses that combine solutions to social issues with economic impact, with a focus on urban (regional) environmental and energy issues
Life Science	 LINK-BIOBAY TOKYO	LINK-J., BioLabs Global, Inc., Mitsui Fudosan Co., Ltd., Bayer Yakuhin, Ltd., AbbVie GK., etc.	A cluster that supports and realizes sustainable and continuous growth of startups in the life science field on a global level
Entertainment	 Creative Entertainment	Sony Group Corporation, Sony Music Solutions Inc., Frontage Inc., Sony Europe B.V., etc.	A cluster creating innovation that generates new excitement in the world through creativity and technology
Logistics	 TOKYO LOGISTICS CO-CREATION CLUSTER	eiicon Co., Ltd., Seino Holdings Co., Ltd., Sagawa Express Co., Ltd., Mitsubishi Logistics Corporation, etc.	A cluster that creates the next-generation logistics de-facto standard supporting people's lives through overall spatial transformation of logistics
XR (cross-reality)	 XR Innovation Lab	Dai Nippon Printing Co., Ltd., Imagica Infos Co., Ltd., Small Planet Co., Ltd., SoftBank Corp., Adglobe Inc., etc.	A cluster that creates new experiential value such as enjoyment, play, and advanced experiences for business and learning through social implementation of XR
Hardware	 FORGE7	Technology Seed Incubation Co., Ltd. TSUCREA Co., Ltd., Nichinan Co., Ltd., Kiraboshi Bank, Ltd., etc.	A cluster that realizes the global expansion of hardware startups through the power of small and medium-sized manufacturers and large companies
Next-generation mobility, Robotics	 MoRo make Mobility & Robotics	DMM.com LLC, IWAKITEC Co., Ltd., Kyoden Precision Inc, TDK Corporation, Jatco Ltd., Sharp Corporation, etc.	A cluster that brings together organizations possessing technology and implementation capability in next-generation mobility and robotics to solve challenges in daily life and industry
Food Tech, Well being	 Fooda X Tokyo	Urban Renaissance Agency, Leave a Nest Co., Ltd., Nippon Steel Kowa Real Estate Co., Ltd., Sustainable Food Asia Co., Ltd., UnlocX & Co., Ltd., etc.	A citywide cluster that nurtures new industries in the sustainable food and wellbeing domain and promotes global expansion from Tokyo

*TIB CATAPULT is a Tokyo Metropolitan Government initiative that brings together corporations, investors, and other organizations to form co-creation-based innovation clusters. Through these clusters, it fosters collaborative projects between startups and large companies to drive innovations that generate social impact.

Open Innovation

Participation of large corporations preparing to engage in open innovation

A Networking Events for City Partners

A networking event, **“Connect with Startups Accompanied by City Partners”** was held, bringing together large corporations, VC/CVCs, investors, and government organizations with startups exhibiting in the City Pavilion.. A total of **201 participants** attended over the two business days.

GOAL

To create a starting point for highly satisfying international collaboration and ecosystem expansion by enabling countries and cities to connect with suitable partners, share information, and deepen exchanges.

FORMAT

Tables were organized by the following three themes, with open networking conducted within each:

- ①Market Expansion
- ②Partner Matching
- ③Fundraising

Voices of City Partners

SusHi Tech 2026 has definitely grown to an international top platform for innovation-driven deeptech startups from all over the world. The exhibition and conference allowed our Swiss startups to easily approach and meet with investors, VCs, CVCs and potential business partners. Switzerland plans to be back next year!

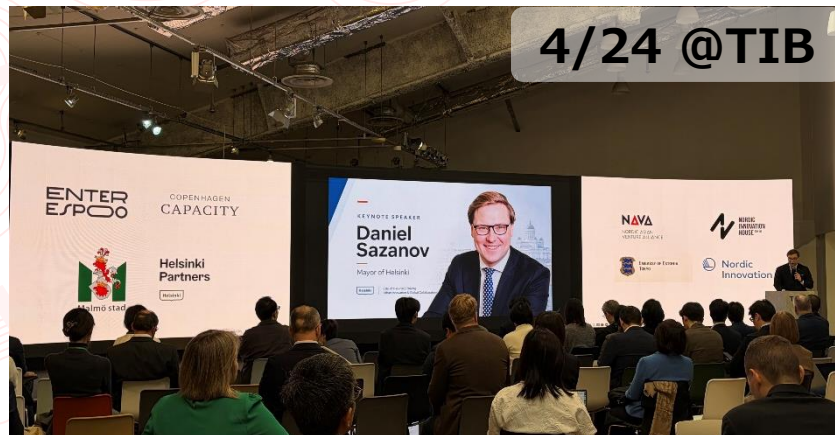

Malaysia Digital Economy Corporation (MDEC) delivered tangible outcomes for Malaysian technology companies at **SusHi Tech Tokyo 2026**, marked by a Memorandum of Understanding (MoU) exchange between a Malaysian company and a Japanese partner, alongside the facilitation of more than RM450 million in potential export opportunities during the mission. MDEC continues to connect local businesses with global partners to drive innovation-led expansion. MDEC co-organised the business mission to SusHi Tech Tokyo 2026 with Selangor Information Technology and Digital Economy Corporation (SIDECE), in partnership with MATRADE Tokyo, JETRO and the Tokyo Metropolitan Government, bringing 14 Malaysian technology companies to the platform.*¹

*¹ MDEC, [PRESS RELEASES](#), (2026/5/6)

More than 50 Overseas Delegations from Around the World Visited

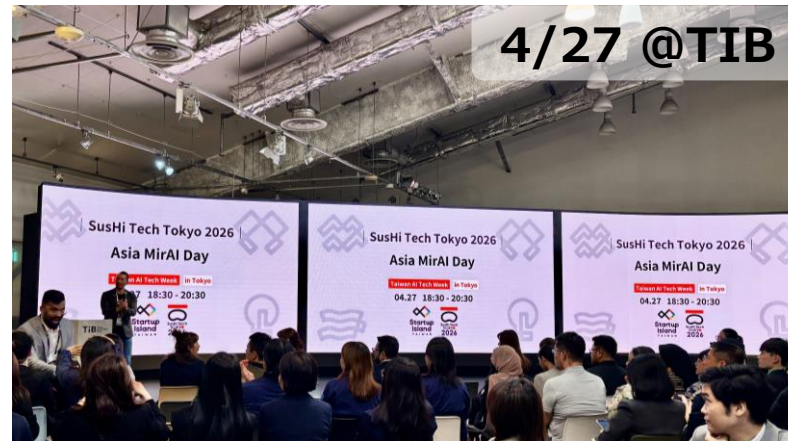

Partner events (19 in total) were held across various locations in Tokyo by international partner organizations and others.

4/24 @TIB

Japan and the New Nordics: Bridging our Futures

Cities, startups, and research institutions from the Nordic and Baltic regions participate to explore opportunities for collaboration with Japan.

4/27 @TIB

Asia MirAI Day in Tokyo

A joint event for Asian startup ecosystem stakeholders, organized by Startup Island Taiwan.

4/28 @Google Japan

New York Silicon Alley Meetup #13 AI Frontline

Sharing the latest trends in New York's startup and innovation scene, while fostering connections with key players in the local ecosystem.

4/28 @SHIBUYA QWS

Road to AVS, Japan Edition / Road to Bhutan

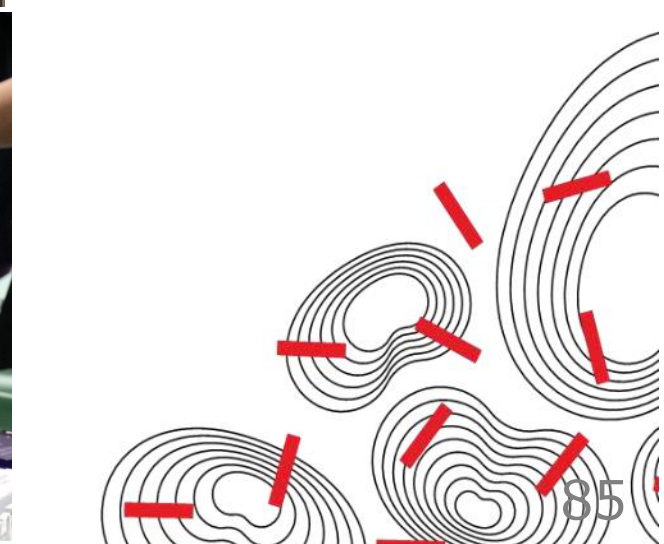

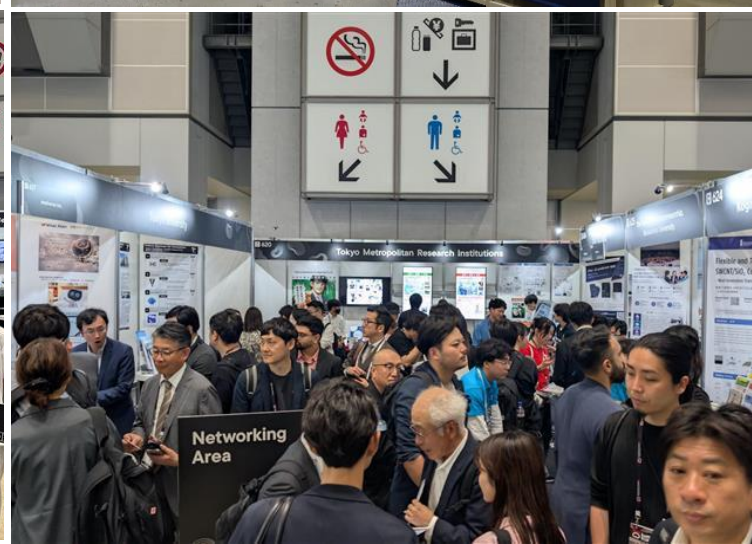

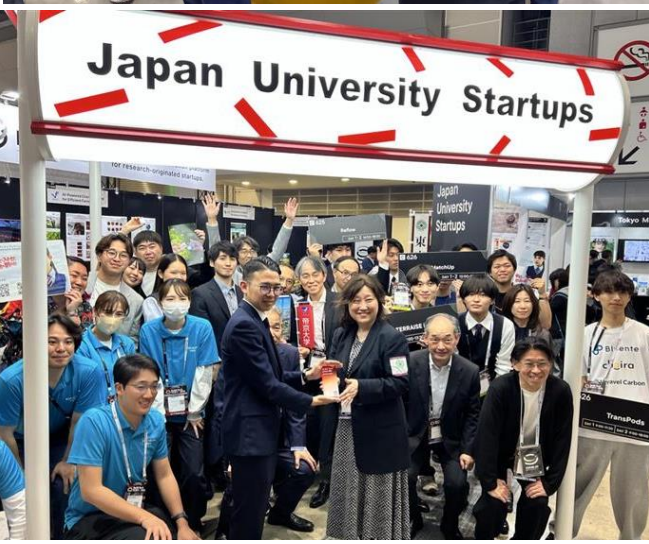

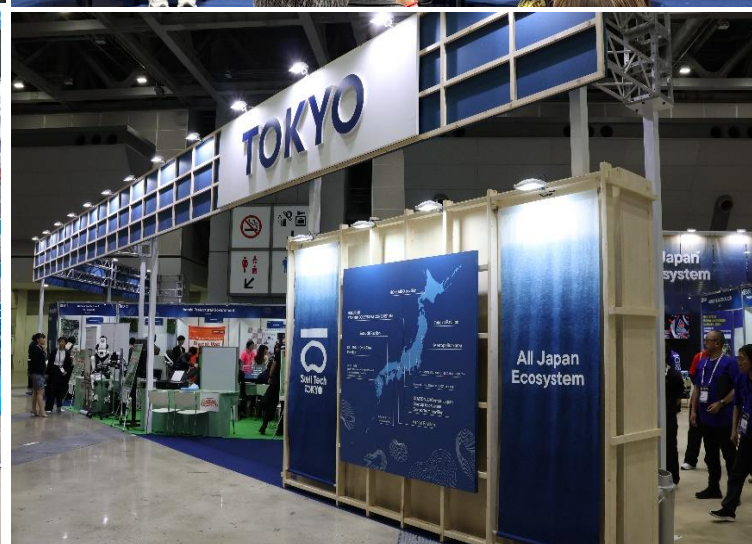

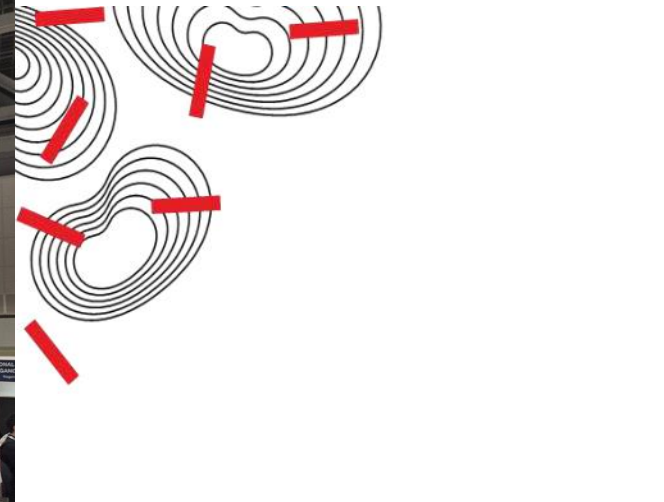

An event centered on Bhutan's national project, "Gelephu Mindfulness City."

4/30 @TIB

Startup Saudi: The New Global Magnet for Entrepreneurship Workshop

Saudi Arabia's Ministry of Investment and startup support organizations introduce the country's ecosystem.

All Japan

Showcasing a Curated Selection of Technologies and Services from Across Japan

All Japan Ecosystem Area

48 local government across Japan will participate in regional groupings, hosting exhibitions and sessions, while small and medium-sized enterprises driving new initiatives will showcase their work in a dedicated special zone*1.

Japan University Startups Area

A total of 19 universities will participate, with selected university-launched startups and researchers from across Japan will exhibit*2. An AI-themed pitch contest will also be held.

Japanese Special SME's (SMEs)

Voices of Local Government

Tohoku Pavilion

The exhibition showcased startups, creating numerous opportunities to connect with visitors. Additionally, the entire All Japan Area had an open and welcoming atmosphere, encouraging many attendees to visit booths located deeper inside the venue. A stage session was held to promote DATERISE!, a global startup event scheduled to take place in Sendai City in September. Following the session, applications for DATERISE! increased, leading to tangible outcomes. Looking ahead to next year, we will continue to explore opportunities to participate as the “Tohoku Pavilion.”

Hokuriku Pavilion

As part of the Hokuriku Startup Ecosystem Consortium (HOSTEC), we exhibited at SusHi Tech Tokyo to support the global expansion of startups in the Hokuriku region. As a result, we established new connections with overseas chambers of commerce and companies, helping us achieve our objectives. In addition, by organizing a joint exhibition with the three Hokuriku prefectures, new networks were formed between local governments and multiple startups. This resulted in meaningful outcomes, including concrete proposals from startups related to their business development plans. We were satisfied with the space provided. However, securing additional space would allow us to further enhance the appeal of the exhibition, for example by showcasing actual products and equipment.

Japan University Startups Area (Collaboration with NINEJP)

- ◆ To promote the real-world application of cutting-edge technologies such as deep tech, the role of university-launched startups leveraging academic research is essential. Therefore, a new “University Startup Area” will be established, bringing together universities from across Japan to showcase their initiatives to the world.
- ◆ In collaboration with NINE JP*, a nationwide platform supporting university-launched startups across nine regions, we will create opportunities to explore leading university-originated startups.

*NINEJP = National Innovation Network for Entrepreneur Japan

Pavilion

- Startups (10 companies) selected from nine regions across Japan, along with research seeds from four universities and one organization*, will exhibit.

*University of Yamanashi, Shimane University, Kanazawa Institute of Technology, Osaka University, and KUPAC

Pitch Contest

Green Stage

- An AI-themed program featuring two categories—university startups (8 companies) and researchers (9 universities*) selected from across Japan.

*Obihiro University of Agriculture and Veterinary Medicine, Tohoku University, Utsunomiya University, Institute of Science Tokyo, Nagoya University, Ishikawa Prefectural University, Kyoto University, Shimane University, and Oita University

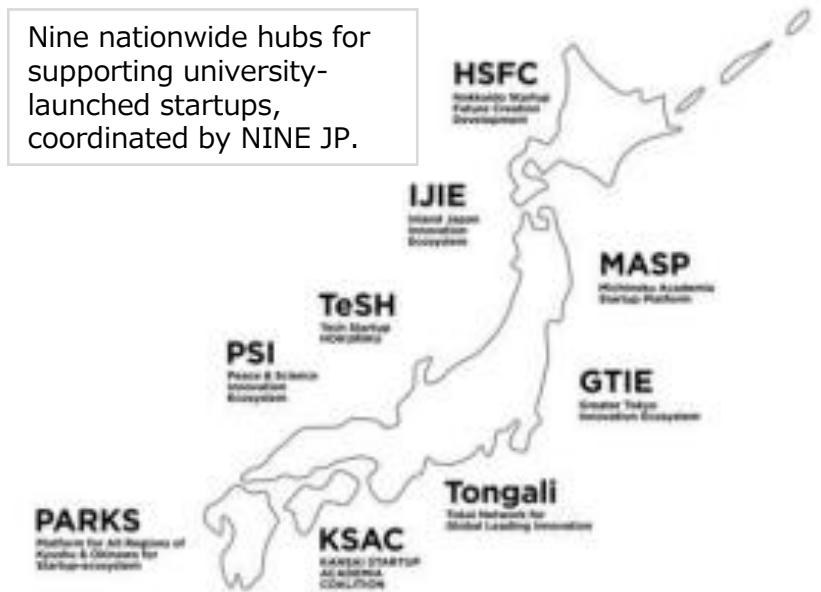

- Startup Category: ONESTRUCTION Inc. (AI × BIM construction DX)
- Researcher Category: Prof. Kenji Suzuki (Institute of Science Tokyo) – AI for diagnosing diseases from rare to common.

Session

Impact Stage

- Theme: From Research to Impact: The Vision of University Spin Off Startups in Protecting, Creating, and Commercializing Knowledge in the Age of AI
- Speakers: Prof. Yutaka Matsuo (The University of Tokyo), Saika Steinacker (CPO, Springer Nature), Prof. Toshiya Watanabe (Executive Vice President, The University of Tokyo), among others.

Featured Exhibitors

All Japan Ecosystem Area

Solallis Bio Inc.

Location: Seika Town, Soraku District, Kyoto Prefecture
Service: Realizing safe regenerative medicine. Driving innovation in regenerative medicine through next-generation cell culture and cryopreservation technologies that eliminate infectious risks and toxicity.

Features: Developed the world's first cryopreservation solution, "ELSSA OSFree," completely free of organic solvents that cause cytotoxicity, as well as animal-free culture media that contain no animal-derived components.

Exhibited within the Kansai Pavilion in the All Japan Ecosystem Area.

Acompany Co., Ltd.

Location: Nagoya City, Aichi Prefecture
Service: Confidential AI Suite. An AI product brand based on confidential computing technology that protects sensitive data.
Features: Utilizes Trusted Execution Environment (TEE) technology, enabling computation and processing while data remains encrypted. Encryption is maintained even during processing, enabling AI use cases where data is utilized without being exposed to anyone.

Exhibited within the STATION Ai / Central Japan Startup Ecosystem Consortium Pavilion in the All-Japan Ecosystem Area.

Japan University Startups Area

NIKKEN KAMISORI Co., Ltd.

Location: Seki City, Gifu Prefecture
Service: Grape vine processing machine
Features:

- Leveraging traditional blade-making techniques, the company has created a new market for grape vine processing machines.
- A finalist in the "Atotsugi Koshien" competition, where successors of SMEs and small businesses across Japan present new business ideas.

Exhibited within the SME Zone in the All Japan Ecosystem Area

Kisui Co., Ltd.

Tohoku University-originated startup
Service: AI robotic vehicle for agriculture
Features: An off-road robotic vehicle compatible with autonomous driving can be used for a wide range of applications depending on the attachments mounted on the cargo platform

Also presented at the pitch contest on the Green Stage from 11:00–13:00 on April 27 or 28.

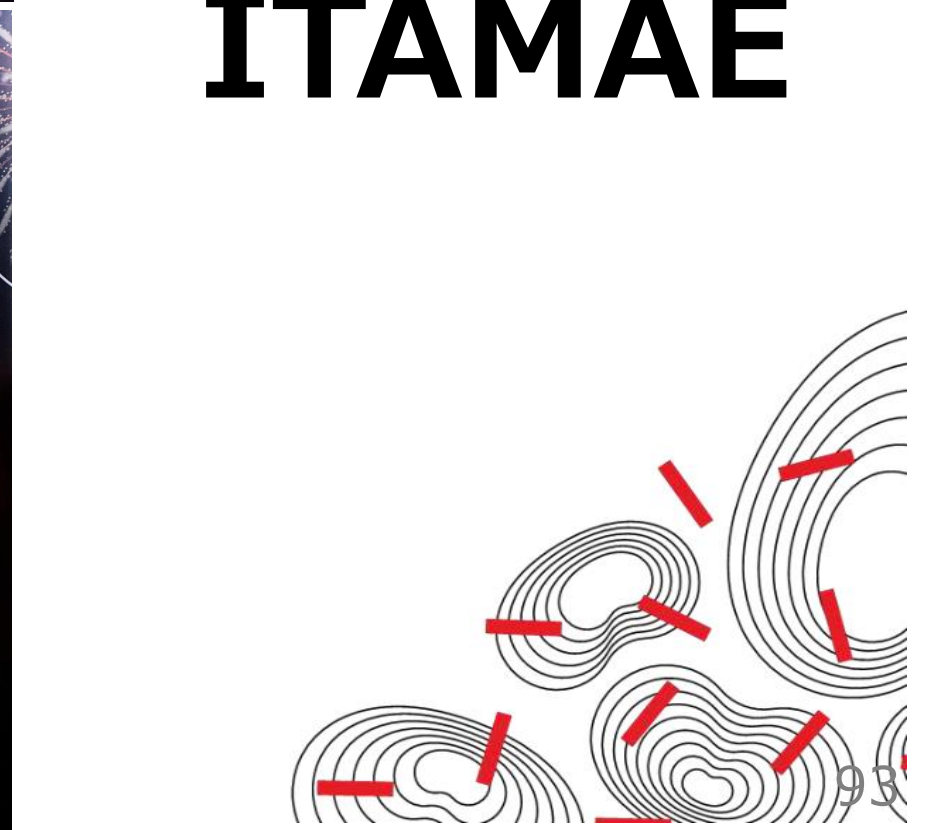

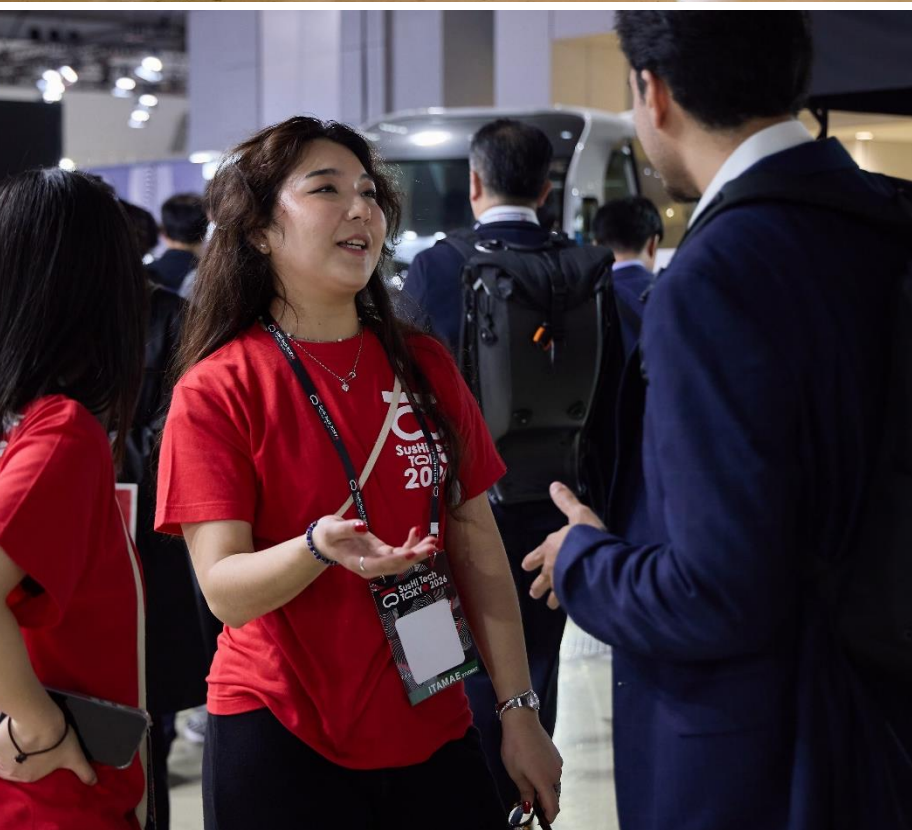

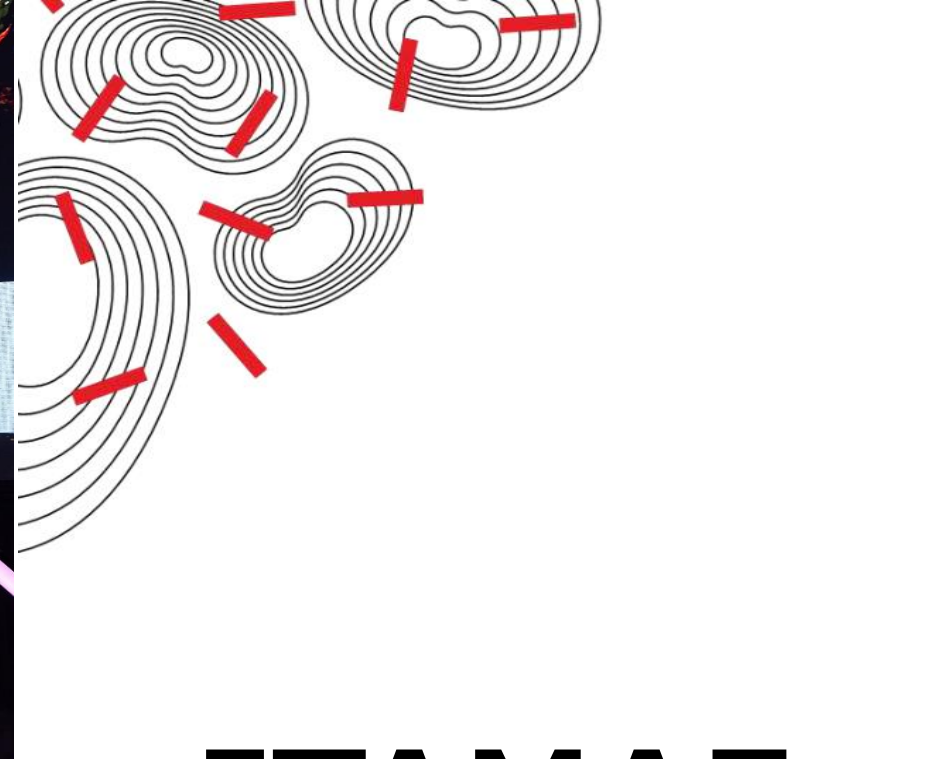

Japanese Special SMEs Area

In collaboration with the national government and other organizations, a “Japanese Special SMEs Area” was established, where small and medium-sized enterprises from across Japan showcased their innovations and manufacturing technologies, highlighting regional capabilities.

◆ Number of exhibiting SMEs: 17 companies

- Tokyo: Anything Co., Ltd.; TAIMATSU Co., Ltd.; Yamato Gokin Co., Ltd.; Myutech35 Co., Ltd.; MORITA TECH Co., Ltd.; WORKSTUDIO Corporation.
- Yamanashi: Mold Model Co., Ltd.
- Gifu: Toyomi Seiko Co., Ltd.; NIKKEN RAZOR Co., Ltd.; TSUYAKIN Co., Ltd.; Mitsubishi Keito Co., Ltd.
- Hyogo: Takamaru Industry Co., Ltd.; Kinoshita Giken Co., Ltd.
- Osaka: Denken Co., Ltd.
- Ehime: SAGAWA PRINTING Co., Ltd.
- Okayama: Daiya Industry Co., Ltd.
- Okinawa: Japan Biotech Co., Ltd.

ITAMAE

"ITAMAE" : The Student Team Behind "SusHi"

Innovative Technology Academic MAestro

The next generation of young leaders (students) is taking the initiative in promoting SusHi Tech

Pitch

- We held the **"Promoted Shusse-uo Pitch Contest"**, aimed at **student entrepreneurs who want to present their business ideas to the world in English**, with over 100 participants.
- Pitch competitions were also held by student entrepreneurship clubs in collaboration with educational consortiums.

Volunteers / Student Organizations

- **Many student members**, including high school and university students, supported event operations such as reception and venue guidance.
- **Numerous student organizations** participated as volunteers, and also exhibited and held sessions at SusHi Tech.

Promoting Interaction Between Students and Startups

- Hosted the **"Global Career Festival"**, a networking event connecting exhibiting startups with students interested in working internationally or using English. Organized guided tours of overseas startups and others that students had interviewed in advance.

Sessions

- Under the theme **"How to Utilize the Most of University"**, sessions introduced initiatives from overseas universities and encouraged **students who are interested in going abroad but hesitant to take the first step**.
- These efforts foster global entrepreneurship among the student generation.

Dynamic “ITAMAE”

Over the three days, more than 800 participants supported event operations, including visitor reception and on-site guidance. By delivering diverse, student-driven content, the initiative created opportunities for many students to take on new challenges, while fostering a global mindset and encouraging engagement with the ecosystem.

Voices of ITAMAE Planning Members

Shintaro Hanada

Having participated as a volunteer at SusHi Tech Tokyo 2025, I had the opportunity to engage with peers taking on global challenges, which inspired me to study abroad. Through my involvement in this year's SusHi Tech as a planning member, I was able to collaborate more deeply with people from diverse backgrounds and fields, further broadening my perspective.

Misaki Aruga

Compared to my previous activities, I was able to engage with a wider range of ecosystem players and discover an exciting new world, which has had a profound impact on my life. The more effort I put in, the more I learned, so I would strongly encourage others in my generation to join ITAMAE.

Kouki Matsumoto

I joined ITAMAE with the desire to take on challenges together with peers who share similar aspirations. I gained valuable experience in taking ideas from creation all the way through to execution. This experience helped me better understand my strengths and consider how I can apply them in society.

Haruka Suzuki

I joined as a planning member with the goal of becoming an internationally minded professional in the future. While I was not originally interested in entrepreneurship, I came to understand its importance. Going forward, I hope to pursue a career where I can support others in taking on challenges, building on my experience with ITAMAE.

Internship Program Connecting Students and Overseas Startups

~ University Internship Program at SusHi Tech Tokyo ~

**Connecting overseas startups with Japanese students
to foster globally minded entrepreneurial talent**

By having students support overseas startups visiting Japan, the program promotes global exchange and enhances practical skills.

〈Before STT〉

- Conduct research on the companies and products of assigned startups
- Provide support for their visit to Japan through online meetings with the startups

〈During STT〉

- Work as part of the startup team, supporting booth setup and providing Japanese-language assistance
- Gain experience in coordinating business meetings with Japanese companies

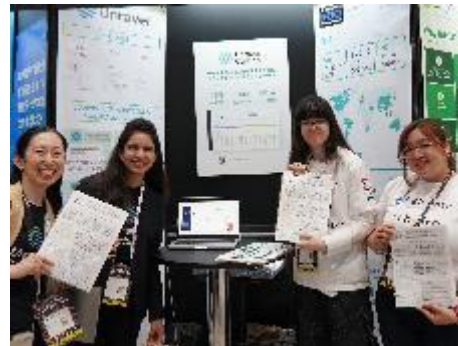

**14 students selected through open application
from four universities nationwide:**

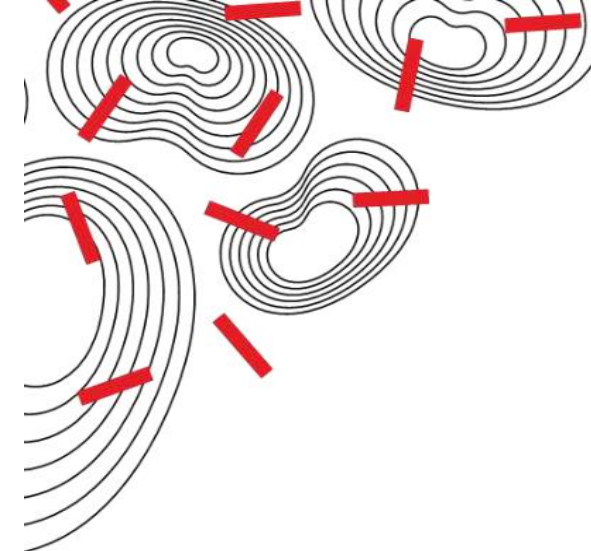

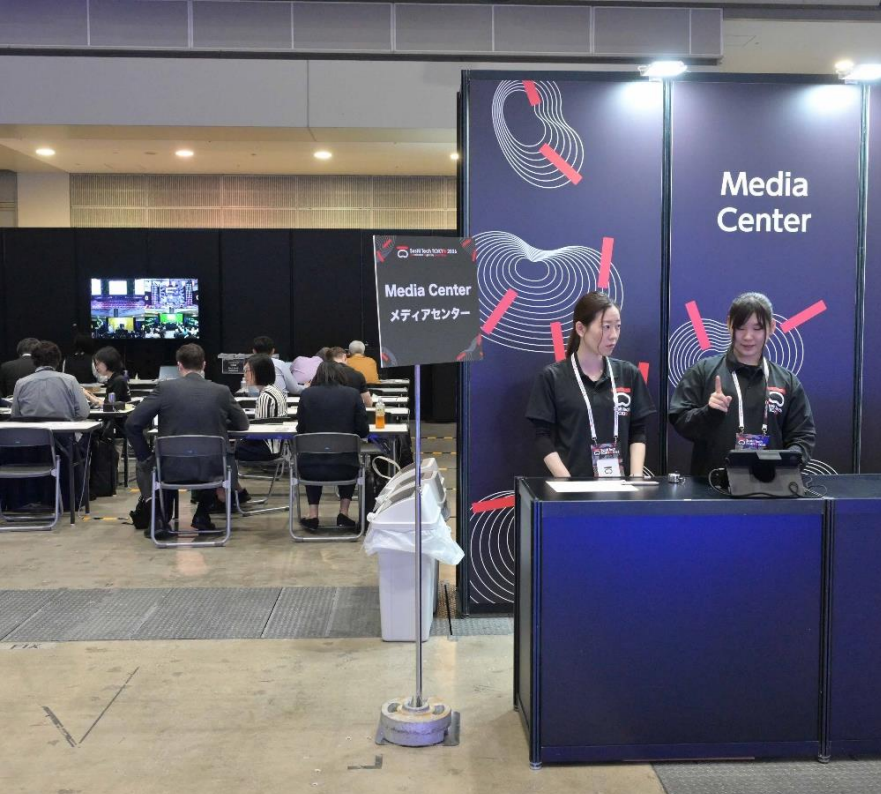

- Tohoku University (Graduate School)
- Musashino University
- Meiji Gakuin University
- Waseda University

Host Startups

Award

SusHi Tech Award 2026

At the “SusHi Tech Award 2026,” 5 startups with strong engagement in innovation, 2 pavilions with outstanding open innovation initiatives, and 1 ambassador with notable contributions to PR and attendance were selected and awarded

Category	Description	Awarded Companies
<Startup> Most Engaged Startup	A startup that actively engaged with a diverse range of players and demonstrated a high level of commitment to innovation creation	EQUES inc.
		Spectee Inc.
		NTT QONOQ Devices, Inc.
		Tripbooking Inc
		Rikkeisoft Corporation
<Pavilion> Innovative Pavilion	Pavilions that showcase outstanding open innovation initiatives and ecosystem development practices.	Swissnex in Japan
		Japan University Startups
<Ambassador> Outstanding Ambassador	Ambassadors who have made notable achievements in PR, customer attraction, and related areas	Antler Japan

Voices from Award Winners

<Startup> Most Engaged Startup

Spectee

We are honored to be recognized as a “Most Engaged Startup” at SusHi Tech Tokyo 2026.

During the event, we received strong interest and expectations around disaster prevention and crisis management from many global participants.

As climate and geopolitical risks rise, Spectee’s mission of “visualizing crises” is becoming a global priority.

Building on this recognition, we will continue advancing resilience tech from Japan to the world to protect lives and communities.

<Pavilion> Innovative Pavilion

 **swissnex**

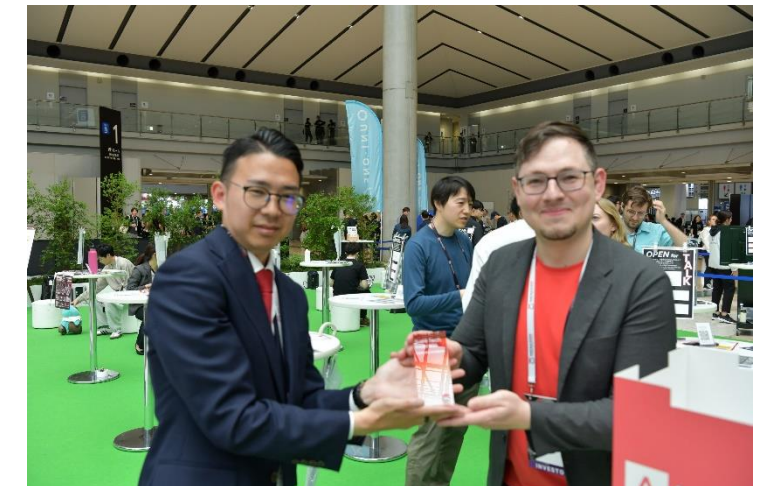

We are honored to receive this award for the second consecutive year.

This recognition reflects the high quality of startups and innovations presented at the event.

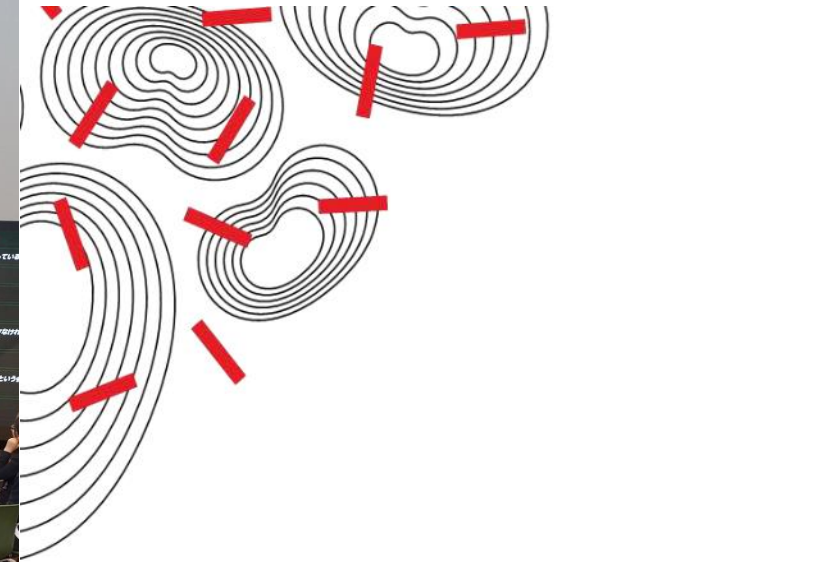

We will continue to showcase Switzerland’s cutting-edge innovation in Japan and strengthen collaboration with the Japanese ecosystem through events like SusHi Tech.

<Ambassador> Outstanding Ambassador

 **ANTLER**

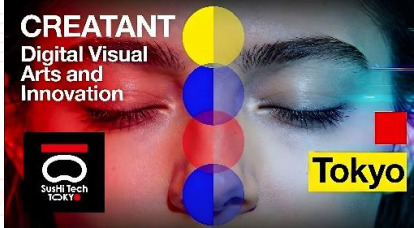

We are deeply honored to receive the Outstanding Ambassador Award at SusHi Tech Tokyo 2026. We witnessed a conference bigger and richer in content than ever before — from the creativity of the organizing team at the pre-event ambassador meetings, to the energy of startups and ecosystem players who traveled from various regions including Kyoto, Fukuoka, Southeast Asia, Europe, and beyond to connect under one roof. We also had the privilege of seeing an Antler portfolio company from India advance to the semi-finals of the pitch competition, a moment that brought SusHi Tech Tokyo's global reach to life. In the spirit of "Further, Faster," Antler works alongside founders who set their sights on global growth from the very earliest stages, and we look forward to continuing that journey together with SusHi Tech Tokyo — supporting the next wave of innovators taking Japan's best ideas to the world.

Workshops for children using Minecraft, hands-on sessions for game-based educational services utilizing Roblox, and exhibitions of startup products, and more were conducted

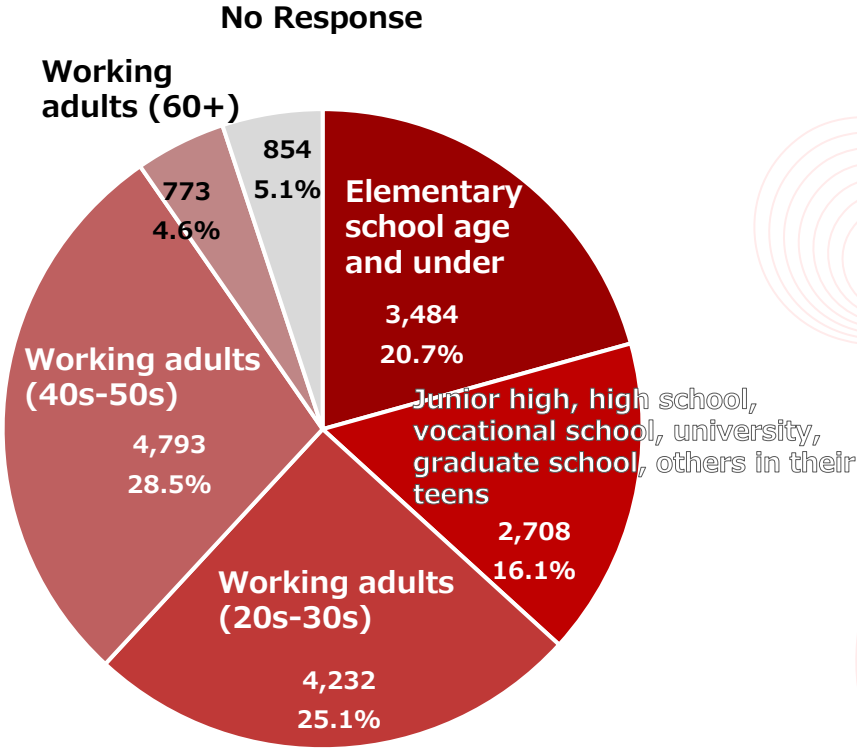

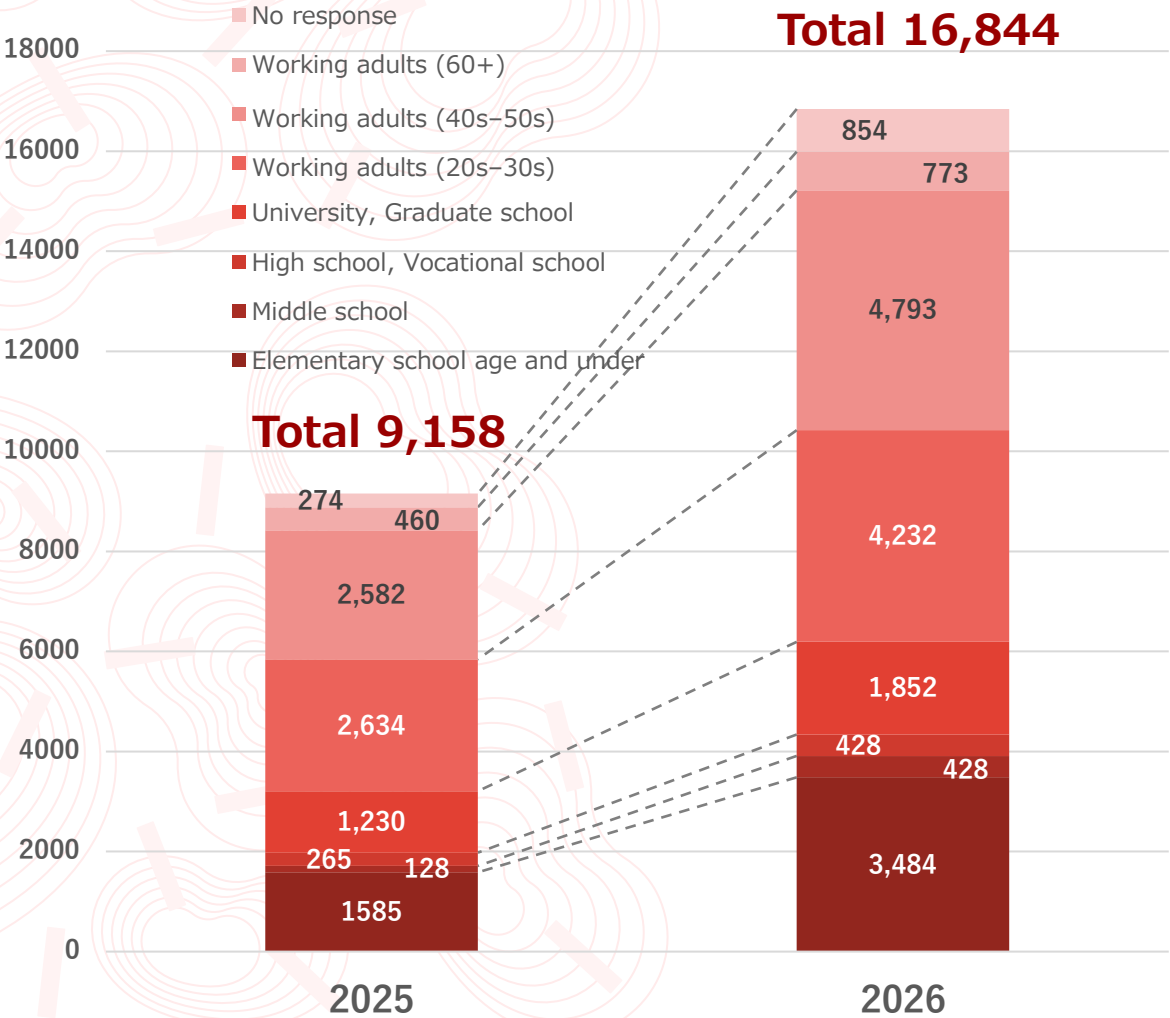

*This is not an official Minecraft product, service, or event.
It is not endorsed by, sponsored by, or affiliated with Mojang or Microsoft.

A large Number of Students and Families Attended the Event

- ◆ In 2026, the venue was even more vibrant than the previous year, with significantly more students and families in attendance. The total number of visitors (excluding exhibitors, etc.) increased by **84%** compared to the previous event.
- ◆ Visitors in their **teens or younger accounted for 37%** of total attendees, representing a **93% increase** from the previous year and reflecting growing interest among younger generations in innovation.
- ◆ There was also a substantial increase in attendance among elementary school children and their parents, positioning the event as a place where children can enjoy immersive learning experiences and gain a sense of the future.

Visitor Attributes

High school students conducting workshops for children

Many families watching the stage performances

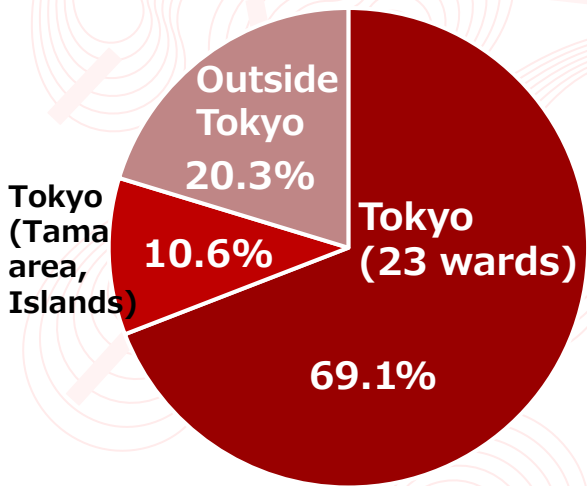

Created based on attendee attribute data

Diverse Visitor Demographics and Engagement with Technology

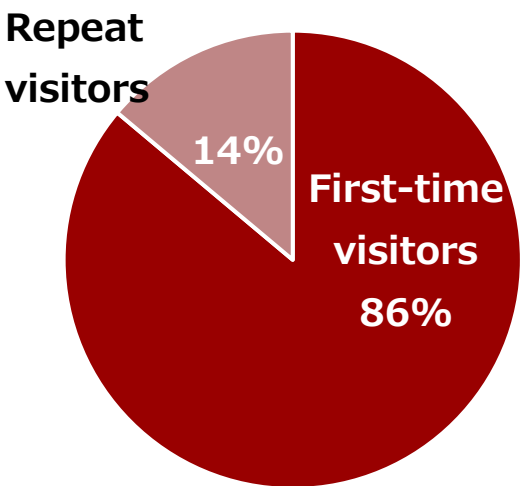

◆ **35% of Public Day visitors were aged 19 or younger**, while those in their 20s and 30s accounted for approximately **29%**.

◆ Average satisfaction score from survey respondents (10-point scale): **7.8**

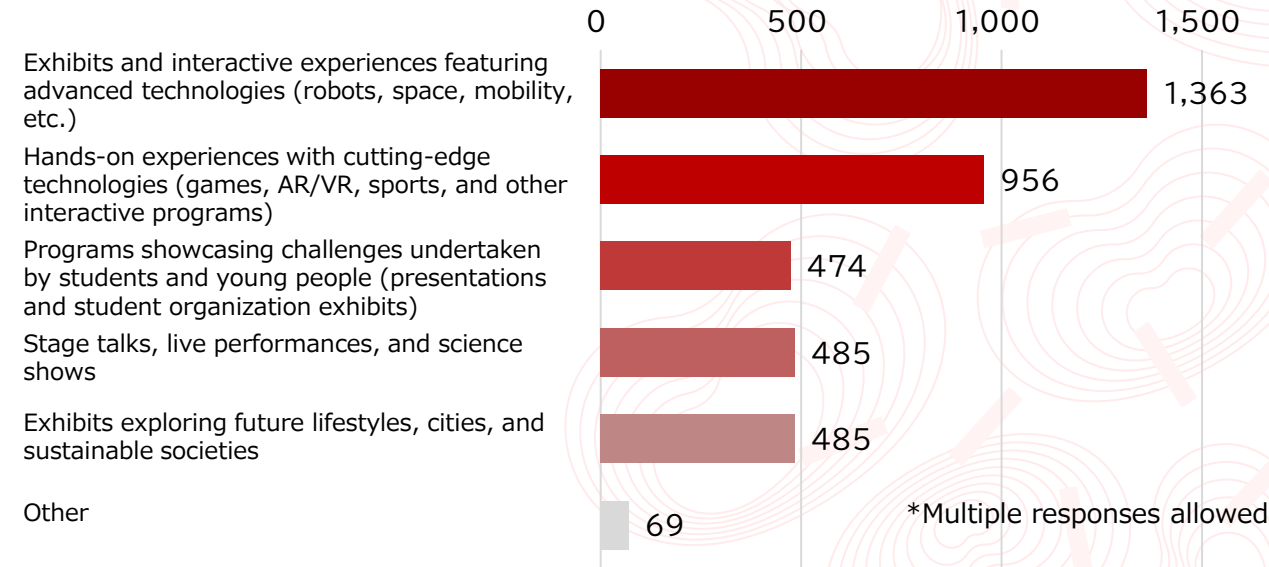

Area of Residence

Number of Visits

Memorable Content

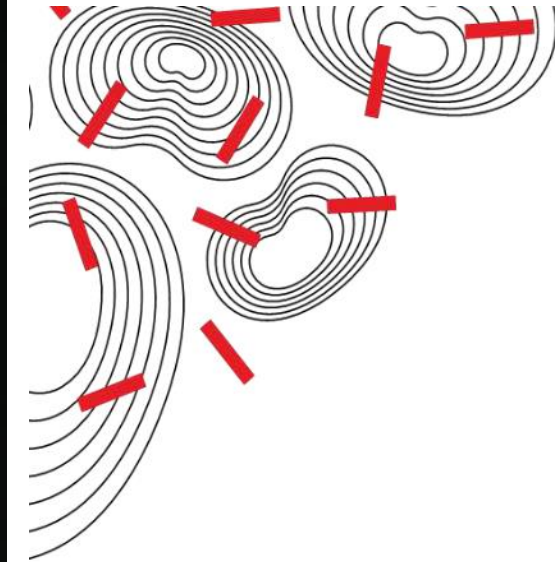

Created based on attendee survey

Visitor Comments (Positive Feedback)

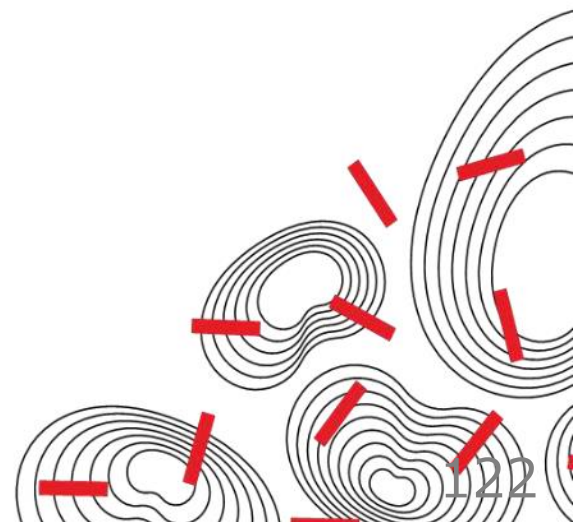

- I felt a strong sense of passion and enthusiasm from the exhibitors. I hope the event continues for many years so I can see how it evolves.
- I was impressed by the variety of events available, which inspired me to get involved in startups. It gave me hope for the future.
- It was a great opportunity to envision the future.
- It provided a valuable learning experience for elementary school children and was an excellent initiative to spark interest in the latest technologies.
- It was more enjoyable than expected, and I would definitely like to attend again.
- I enjoyed interacting with people from different countries and regions.
- Although the content was quite advanced, I was still able to enjoy it. I would also like to attend the Business Day if I have the chance.
- It was my first time attending a public day event, and I found it so appealing that I wish I had known about it earlier—adults can enjoy it just as much.

Visitor Comments (Areas for Improvement)

- The venue was crowded.
- The number of participants per workshop could be slightly increased.
- There were limited exhibits offering extended hands-on experiences.
- More maps and guides at the venue would be helpful.
- The locations of booths and stages were difficult to navigate.
- The official app was difficult to use and could be improved.
- The stamp rally booth locations were hard to find and should be more clearly indicated on the map.

Special Stage

Promoting the Appeal of Japanese Entertainment Through a Special Stage

Illuminated Kabuki Show of Light and Visuals

Kabuki dance “Shakkyo” performed on the SusHi Tech special stage (featuring kabuki actor Takanosuke Nakamura)

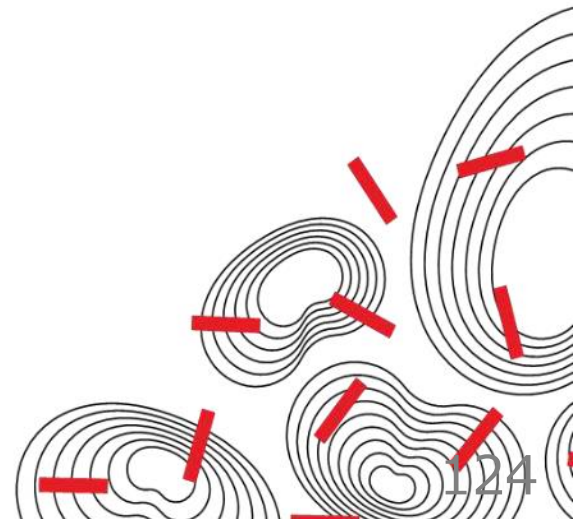

TOKYO CALLING, NEXT STAGE. ATARASHII GAKKO! × ROBOTICS STAGE

Performed songs including “Tokyo Calling,” collaborated with humanoid robots, and delivered a message to inspire challengers while showcasing Tokyo’s energy to the world¹²³

Tokyo Mirai Weeks

Tokyo Mirai Weeks: An Official Event Showcasing the Future

Approximately 25,000 visitors attended April 25 to May 6

Future Mobility Exhibition (Apr 25–May 6) Miraikan 1st floor Symbol Zone

Exhibitions and hands-on experiences featuring next-generation mobility supporting future lifestyles.

Future Mobility Ride Experience (Apr 25, 26, 29; May 2–6) Symbol Promenade Park

Hands-on trials of diverse personal mobility options suited for urban transportation in a lush outdoor park.

Workshop to Imagine the Future of Tokyo (Apr 29) Miraikan 3rd floor lab

An introductory workshop featuring drone programming and operation.

Held twice (morning and afternoon sessions), with a total of 60 participants.

Corporate Partners

Chuo-Nittochi Co., Ltd.

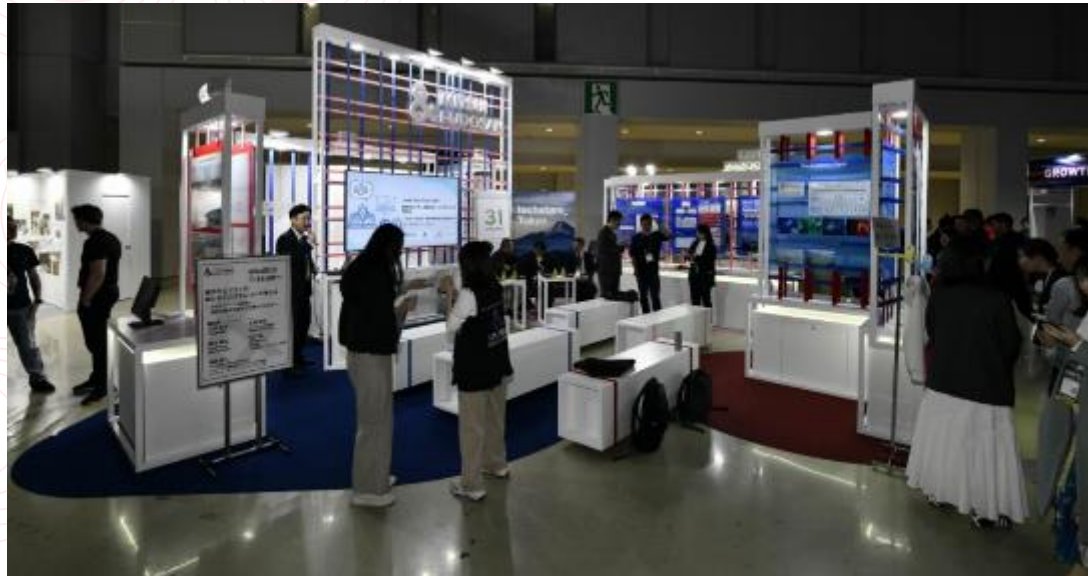

Pavilion Exhibition

- An exhibition on urban development in the Kasumigaseki, Toranomom, and Nishi-Shimbashi areas was held.
- An overview and pilot projects of “Tolaza,” a public-private co-creation hub aimed at generating social impact and to be established within TORANOGATE, were introduced.
- A talk session with partner companies was held, focusing on themes related to AI and rule-making.

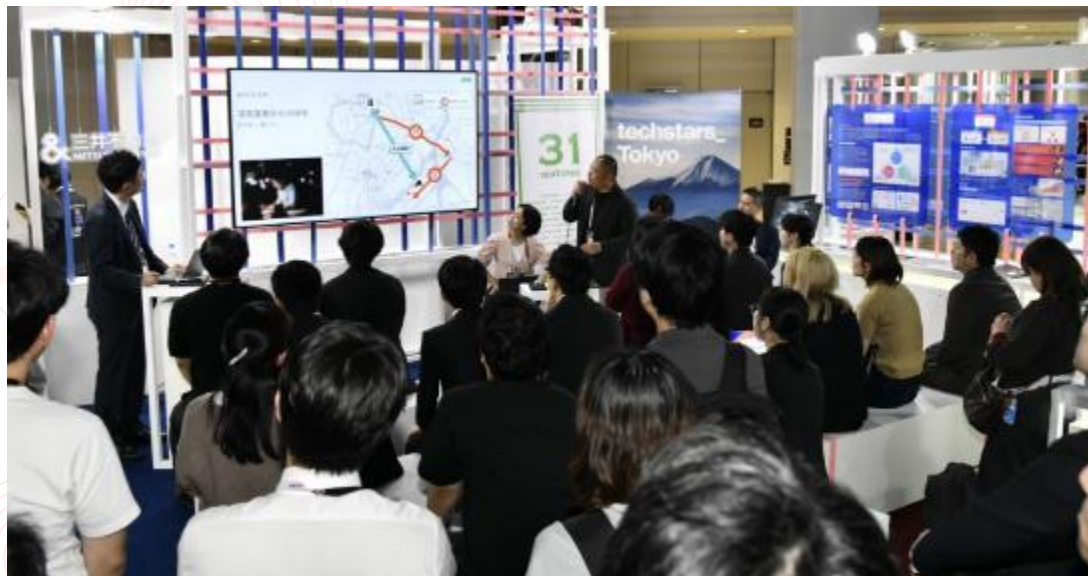

Mitsui Fudosan Co., Ltd.

Pavilion Exhibition

- Initiatives related to “exploration of new business domains and acquisition of business opportunities” based on the long-term management policy “& INNOVATION 2030” were introduced.
- Exhibitions and sessions were conducted on co-creation activities in the fields of life sciences, space, and semiconductors, as well as on open innovation with startups and academia.

Mori Building Co., Ltd.

Pavilion Exhibition

- An exhibition was held showcasing business initiatives and ideas emerging from the innovation ecosystem formed in Toranomom.
- Facility introductions operated by Mori Building, exhibitions of cutting-edge products, talk sessions, and experiential workshops offering a glimpse into the future were conducted.
- A variety of technologies enabling visitors to experience next-generation cities were introduced.
- On the Public Day, a workshop was held to decorate eco-friendly frames.

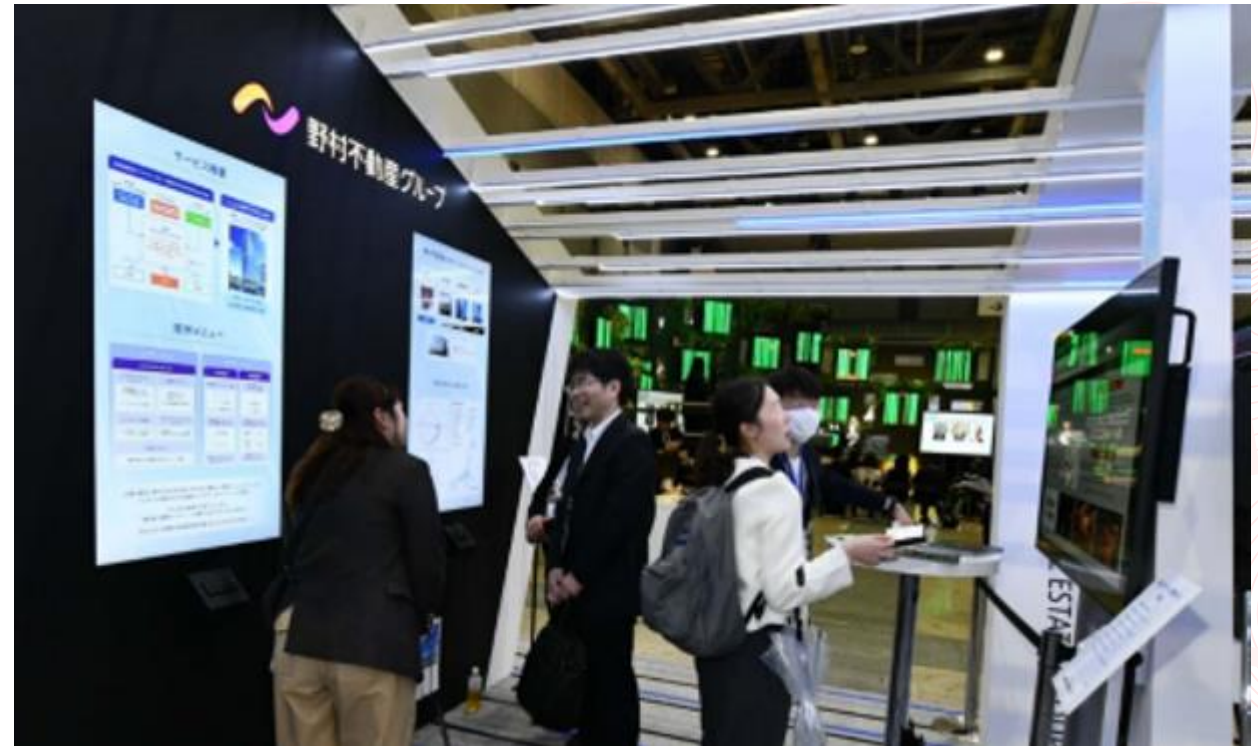

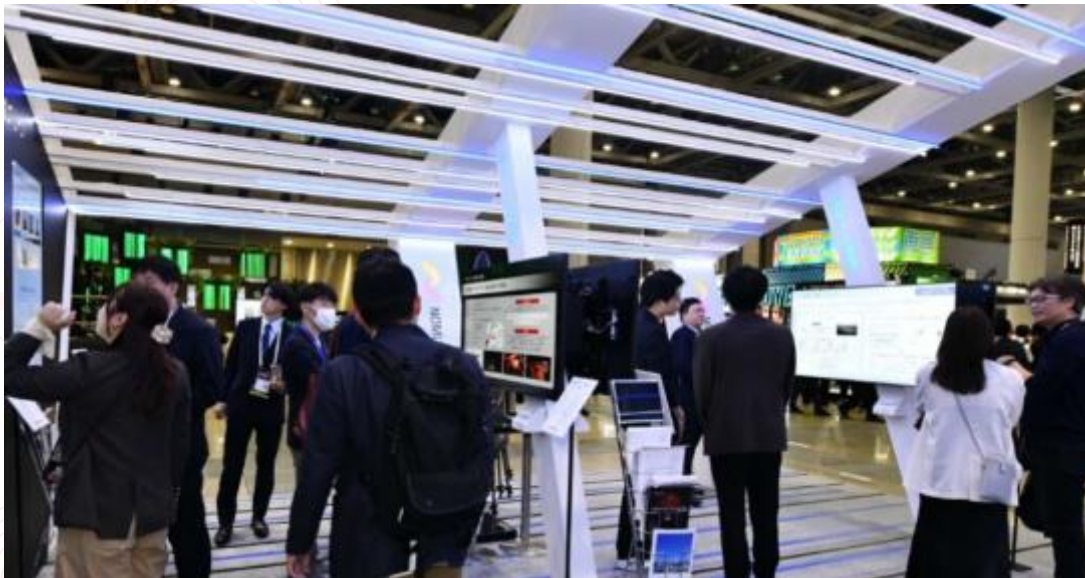

Nomura Real Estate Holdings, Inc.

Pavilion Exhibition

- An exhibition was held under the theme of the Nomura Real Estate Group's "Challenge for Transformation."
- Initiatives related to new business development and collaboration with startups were introduced.

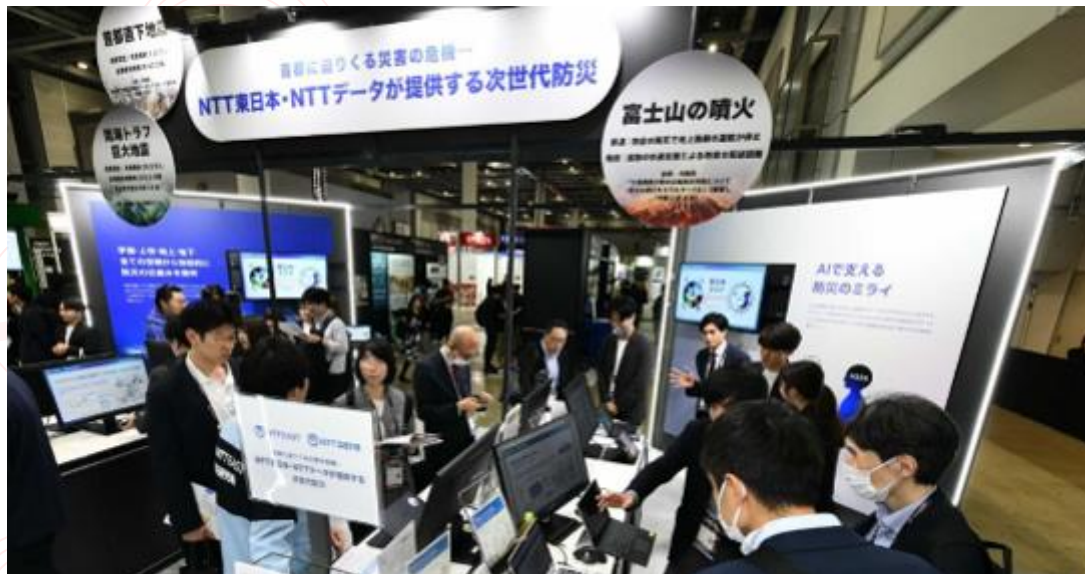

NTT DATA Japan Corporation/NTT EAST, Inc.

Pavilion Exhibition

- An exhibition was held under the theme of “disaster prevention (metropolitan disaster preparedness and the development of disaster-resilient cities)”.
- The future of disaster preparedness through a combination of advanced technologies and community-based operational frameworks

Salesforce Japan Co., Ltd.

Session

- Winning in the "Agent-First" Era: Redesigning Marketing Organizations and Strategies for AI-Driven Growth
 - As AI evolves into autonomous “agents” capable of independent decision-making and action, the concept of a “24/7 always-on marketing organization” was introduced—demonstrating how AI agents, built on Salesforce, can autonomously manage processes from new lead generation to deal creation, along with the methodologies and concrete strategies for its implementation.

Masaki Yoshida

Givery, Inc.
CMO and COO of Marketing
DX Division

Takafumi Shimada

Salesforce Japan, Inc
Head of Agentforce
Marketing, Product
Specialization

Sony Group Corporation

Pavilion Exhibition

- An exhibition was held on the fusion of technology and entertainment and the creation of innovation through global collaboration.
- Initiatives leveraging Sony's assets to create new business value were introduced, covering the full process from idea generation to commercialization and global expansion.

Sumitomo Realty & Development Co., Ltd.

Pavilion Exhibition

- An overview of the initiatives of Sumitomo Realty & Development's Growth Support Division was presented.
- The business activities and technologies of companies located in the incubation facility "GROWTH" were introduced.
- Potential collaborations leveraging Sumitomo Realty & Development's wide-ranging resources—including offices, residential properties, commercial facilities, and hotels—were presented.

Tokyo Kiraboshi Financial Group, Inc.

Pavilion Exhibition

- Initiatives by the Kiraboshi Group to support startups and overseas expansion were introduced, along with startups supported in collaboration with domestic and international venture capital firms and startup support organizations.
- On the Public Day, experiential programs were offered, including the "Maneiku" workshop for preschool children and a "Bungee Anywhere VR" experience.

<Session>

- Panel discussion by Nordic ecosystem players and related stakeholders
- Panel discussion on open innovation with overseas startups
- Pitch sessions by startups from the Nordic and Baltic regions
- Reverse pitch sessions by ecosystem stakeholders from the Nordic and Baltic regions
- Pitch sessions by startups supported by the Tokyo Stock Exchange Asia Startup Hub
- Kiraboshi pitch session

Tokyo Tatemono Co., Ltd.

Pavilion Exhibition

- An exhibition was held under the theme of “A place to get an early glimpse of ‘a slightly future’ YNK.”
- Initiatives in collaboration with startups and startup supporters active in the fields of food, regeneration, large enterprises, and culture were introduced.
- On the Public Day, hands-on experiences such as recreated cooking demonstrations and a matcha latte service combined with a “kaku-uchi” (casual standing bar) experience were offered.

TOKYU CORPORATION/TOKYU LAND CORPORATION

Pavilion Exhibition

- An exhibition was held showcasing co-creation initiatives with startups in the Shibuya and Tokyu Line areas, including projects that recreate past Shibuya in popular video games and immersive communication enabled by AR technology allowing realistic interaction with remote locations.
- Initiatives such as startup support through “SAKURA DEEPTech SHIBUYA” and the TOKYO SUTeAM program “GREEN VALLEY SHIBUYA,” as well as content investment projects leveraging IP, were introduced.

Session

- The Current State of Spatial Technologies and Urban Development— The Frontline of Co-Creation Between Tokyu and Startups
 - A discussion was held with executives from co-creating startup companies on the impact and future outlook of spatial technologies, such as digital twins, on Tokyu’s businesses and future urban development.

Silver Partners

Asian Development Bank

Pavilion Exhibition

- Practical insights were introduced on how innovation contributes to addressing challenges in urban development and the water sector in the Asia-Pacific region.

Session

- Innovation in Action: Connecting Startups to ADB Opportunities
 - As part of the Asian Development Bank's initiatives, opportunities for collaboration with startups, support channels, and the potential for business expansion through resource mobilization and networks were introduced.

Silver Partners

CIC Japan LLC

Pavilion Exhibition

- An introduction to the "One CIC" strategy, including O-Nexus
- Showcasing case studies of social implementation achieved through collaboration among research institutions, corporations, investors, and government, driven by social issue-oriented startups and deep tech companies

Silver Partners

Deel, Inc.

Pavilion Exhibition

- Super exciting gompacha machine that attracted 100s of guests and high level conversations over the 3 days at Sushi Tech.

Session

- Build Without Borders: Fastest-Growing Startups Scale Globally
 - A discussion on practical insights and solutions by Japan-based startups, addressing challenges in culture, human resources, and compliance in building global organizations

Silver Partners

DG Daiwa Ventures, Inc.

Session

- Can Japan's Physical AI Lead Again? ~Japan Is Back in Robotics~
 - A session explored whether Japan-origin robotics can regain global leadership under the theme of Physical AI, covering its competitiveness as well as challenges and opportunities for industrial implementation.
- Under the title "Let's Match(a) with Global VCs," 50 overseas venture capital firms (including CVCs) gathered in Room Fuji, actively exploring investment opportunities in the Japanese market. Approximately 130 ecosystem stakeholders—including startups selected for the Tokyo Metropolitan Government's startup support program "SusHi Tech Global," as well as domestic business companies, financial institutions, and support organizations—participated, engaging in concrete discussions toward investment and business collaboration.

Silver Partners

Fujitsu Limited

Pavilion Exhibition

- Activities of the international consortium “Frontria,” which aims to address social challenges in AI utilization—such as the spread of misinformation, AI trust, and AI security—were introduced.

Session

- Frontria: An International Consortium Tackling the Challenges of Disinformation and AI Risks
 - A discussion on the resolution of emerging challenges—such as misinformation and security risks associated with the advancement of generative AI—and the potential for social implementation through the activities of the international consortium “Frontria”

Silver Partners

Google LLC

Pavilion Exhibition

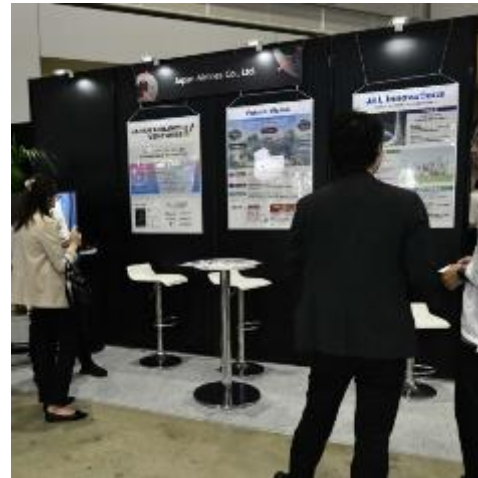

- The latest geospatial technologies provided by the Google Maps Platform were introduced.
- Case studies of business transformation were showcased, ranging from dramatic improvements in delivery operations to data-driven management decision-making.

Session

- Google AI for Society
 - Google’s initiatives were introduced, highlighting efforts to enhance the convenience of daily life through the integration of its advanced AI “Gemini” with Google products, as well as contributions to solving urban and societal challenges through the utilization of geospatial information via the Google Maps Platform.

Silver Partners

Japan Airlines Co., Ltd.

Pavilion Exhibition

- An exhibition was held on Japan Airline's vision for the future and the initiatives toward its realization, highlighting its track record in open innovation and key focus areas going forward.
- A panel discussion was conducted under the theme of future co-creation.
- On the Public Day, panels related to open innovation were displayed.

Session

- The Future Innovation Ecosystem Envisioned by Japan Airlines
 - A discussion on open innovation beyond traditional airline models, centered on a new Future Vision and newly established CVC, highlighting Japan-origin innovation's global potential.

Silver Partners

KDDI CORPORATION

Pavilion Exhibition

- An introduction to KDDI's CVC fund, the "KDDI Open Innovation Fund," and its portfolio startups

Session

- Global Expansion Strategy for Japanese Startups — The Reality of Global Growth and What Comes Next
 - A discussion on the key factors for startups to succeed globally, including strategic planning for international expansion, evaluation criteria in global markets, success and failure drivers, and recommended actions

Silver Partners

LED TOKYO Co.

Participation Details

- Provision of LED display equipment for the stage of ATARASHII GAKKO! on Public Day

Silver Partners

Microsoft Japan Co., Ltd.

Pavilion Exhibition

- An exhibition on “Microsoft for Startups,” which provides free credits for Azure, cutting-edge AI, and development and business tools, along with support from technical validation to scaling

Session

- Leading Japan-built AI Ecosystem: The Integration of Preferred Networks’ PLaMo and Microsoft Global Platforms
 - An explanation of production-ready deployment of enterprise generative AI combining the Japan-developed large language model “PLaMo” and Microsoft Azure, including security and operational considerations

Silver Partners

Mitsubishi Electric Corporation

Pavilion Exhibition

- An exhibition on the “ME Innovation Fund” CVC
- Introduction of initiatives by its portfolio startups

Silver Partners

Mitsubishi Estate Co., Ltd.

Pavilion Exhibition

- An exhibition on building an innovation ecosystem through open innovation with startups and diverse stakeholders
- Initiatives related to startup support, including “citywide demonstration experiments” utilizing TMIP and the CVC “Bricks Fund Tokyo,” were introduced
- On the Public Day, an interactive experience allowing participants to explore their “future self” style was offered

Session

- “Building a Regenerative Future: Insights from Business Cases in Japan’s Urban Centers, Regional Areas, and Europe”
 - A discussion on business creation and collaboration across urban, regional, and global perspectives toward a “regenerative” society beyond sustainability

Silver Partners

Mitsubishi Logistics Corporation

Pavilion Exhibition

- An introduction to Mitsubishi Logistics' businesses in logistics and real estate
- An introduction to initiatives in new business domains promoted by Mitsubishi Logistics
- An introduction to investment activities in domestic and international startups through its CVC subsidiary (MLC Ventures), as well as co-creation and PoC case studies primarily in the logistics and real estate sectors
- Joint exhibitions and networking with portfolio startups

Silver Partners

Mitsubishi UFJ Morgan Stanley Securities Co., Ltd.

Pavilion Exhibition

- An introduction to the Japan Inclusive Ventures Lab, an accelerator program that supports early-stage startups founded by women and entrepreneurs from diverse backgrounds

Session

- Pathways to Global Standards from the Seed and Early Stages— Insights from Hands-on Startup Support
 - A discussion on strategies and support approaches for global startup growth from the early stages, from the perspectives of both support organizations and entrepreneurs

Silver Partners

Mizuho Bank, Ltd.

Pavilion Exhibition

- Exhibitions and video screenings were conducted on initiatives aimed at developing the ecosystem, including support for startups' global expansion

Session

- Supporting global expansion for startups shaping the future
 - Based on case studies of Japan-origin startups expanding globally, key success factors for rapid growth were highlighted, along with Mizuho's initiatives to support startups from their establishment through post-IPO, and its efforts to advance Japan's innovation ecosystem

Silver Partners

National IT Industry Promotion Agency

Pavilion Exhibition

- An introduction to leading Korean AI companies driving innovation across various industries
- NIPA devotes itself to reinforcing the competitiveness of South Korea's ICT industry and contributes to national economic growth through efficient support and by laying the groundwork for industrial technology promotion.

Silver Partners

NEC Corporation

Pavilion Exhibition

- An exhibition on "NEC Open Innovation"
- Under the key message "Orchestrating the Future," initiatives involving diverse co-creation with startups, partner companies, and local governments were introduced
- Booth sessions related to the exhibition were conducted
- On the Public Day, a quiz event featuring AI avatars was held

Silver Partners

Panasonic Connect Co., Ltd.

Pavilion Exhibition

- An exhibition on spatial production solutions using high-luminance projectors
- An immersive experience themed on "visual effects emerging into space" and "synchronized audiovisual experiences," combining software with real-time motion detection technology to project onto moving objects such as balls and markers

Silver Partners

Qualcomm Technologies, Inc.

Pavilion Exhibition

- Showcased QAIPI-APAC and QITC startups leveraging Qualcomm technologies to address aging societies, accelerate industrial transformation, and enable next-generation human-machine interaction.

Session

- Empowering the next generation of AI innovation
 - Qualcomm highlighted its continued commitment to accelerating scalable, real-world edge AI adoption through its advanced platforms, developer tools, and ecosystem support, while also sharing the stage with startups from the QAIPI and QITC programs showcasing AI innovation across robotics, healthcare, and smart industry applications.

Silver Partners

Shimizu Corporation

Session

- Can We Build Cities that Capture CO₂ from the Air? Urban Innovation through Industry-Academia-Government Collaboration
 - A discussion on urban decarbonization driven by DAC technology, alongside collaborative approaches to addressing challenges and the potential of GX businesses, and Shimizu Corporation's strong commitment to advancing urban innovation through co-creation beyond demonstration toward full-scale social implementation.

Silver Partners

SoftBank Corp.

Pavilion Exhibition

- An exhibition of global-scale AI data center software stacks, including “Infrinia AI Cloud OS,” and next-generation autonomous general-purpose AI agents, “AGENTIC STAR”
- Introductions of experiential exhibits such as AI smart glasses, AI translation devices, holographic communication platforms, and immersive displays

Silver Partners

Sony Network Communications Inc.

Pavilion Exhibition

- An exhibition on internet connectivity services under the NURO and So-net brands
- An introduction to Sony Group’s entertainment content
- On the Public Day, an interactive aibo experience was offered

Silver Partners

Sumitomo Mitsui Banking Corporation

Pavilion Exhibition

- An exhibition of “Trunk,” a corporate account service that streamlines financial management and accounting operations for SMEs and startups
- Proposed as a solution to account opening and payment challenges faced by early-stage companies, introduced to participating companies

Session

- 【SMBC Presents】Next-Generation Startup Pitch for Global Market Expansion
 - A pitch session was held featuring promising startups—clients of Sumitomo Mitsui Banking Corporation—aimed at fostering global business partnerships and collaboration opportunities

Silver Partners

Tokyo Stock Exchange, Inc.

Pavilion Exhibition

- An exhibition by startups supported under the “TSE Asia Startup Hub,” which provides support for business expansion in Japan, fundraising, and IPO preparation for leading Asian startups with ties to Japan

Silver Partners

TSUCREA Co.,Ltd.

Pavilion Exhibition

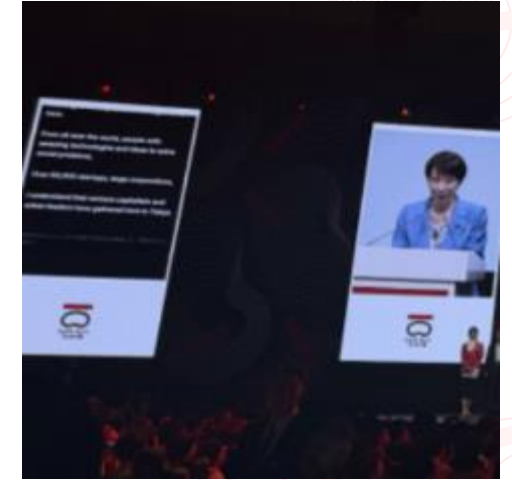

- An introduction to multifaceted initiatives centered on content, entrepreneurship education, and global collaboration
- The exhibition of TCIC highlighted programs such as the “modern-day Tokiwa-so” and the Tokyo Metropolitan Government’s “IntoGlobal” initiative

Session

- AI × Film: Exploring Innovation in the Film Industry
 - A discussion on the impact of AI on the film industry, drawing on developments at the “WORLD AI FILM FESTIVAL Cannes 2026,” from diverse perspectives including producers, actors, and startups

Silver Partners

XL8 Inc.

Pavilion Exhibition

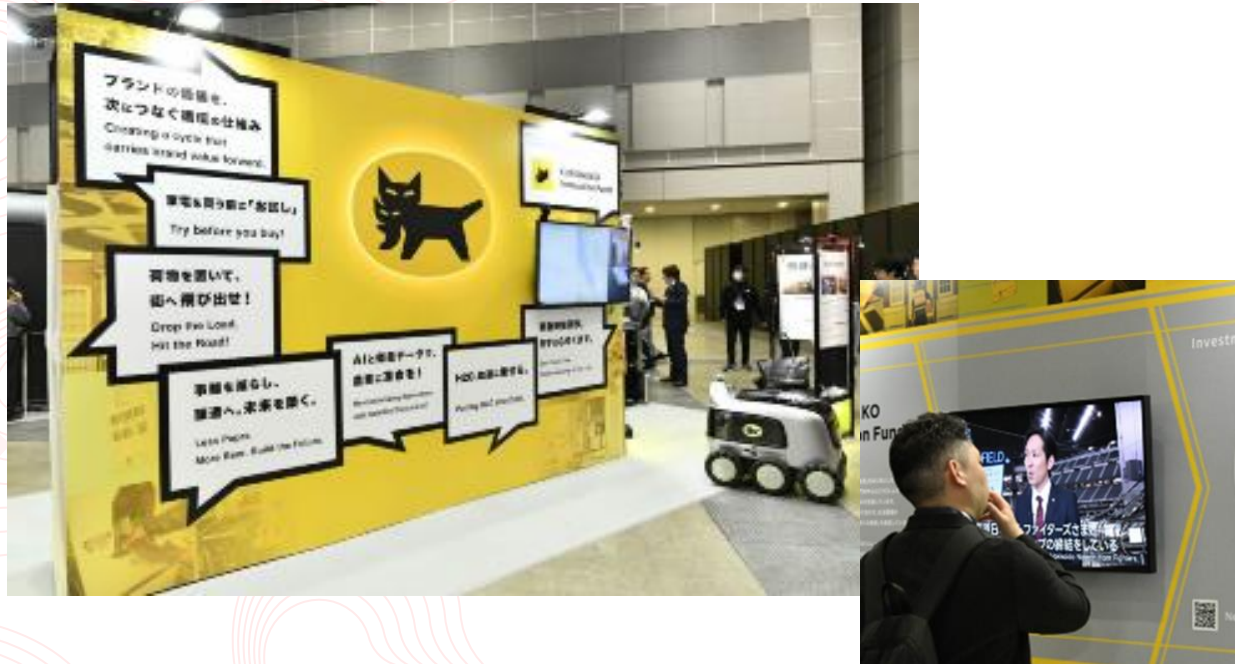

- A live demonstration of the real-time AI interpretation service “EventCAT,” along with case studies and implementation approaches for events and online meetings
- Individual consultations on operational challenges and use cases, with Public Day activities including the distribution of “greetings from around the world” stickers

Participation Details

- Real-time AI translation subtitles were provided across eight major stages, including the Innovation Stage
- Supported multiple display formats, such as vertical, horizontal, and separate screens
- A service introduction was delivered by CEO Tim Jung at the Atrium Stage

Silver Partners

YAMATO HOLDINGS CO., LTD.

Pavilion Exhibition

- An introduction to investment and co-creation initiatives by the "KURONEKO Innovation Fund"
- Seven co-creating startups were exhibited, with discussions held toward new collaboration opportunities
- Demonstrations and live operation of autonomous delivery robots by two portfolio startups

Bronze Partners

Agorize Japan Co., Ltd.

Pavilion Exhibition

- An exhibition of in-house services
- On the Public Day, simple hands-on challenge experiences were offered to booth visitors

Participation Details

- Provision of an application management system for the startup contest "SusHi Tech Challenge"

Bronze Partners

Asahi Group Holdings, Ltd.

Participation Details

- Provision of yeast-derived non-animal milk "LIKE MILK" and "GUT FIT," utilizing Calpis®-derived lactic acid bacteria

*"Calpis" is a registered trademark of Asahi Soft Drinks Co., Ltd.

Bronze Partners

Honda Motor Co., Ltd.

Participation Details

- An interactive riding experience was offered for the mobility robot "UNI-ONE," which is controlled solely through shifts in the rider's center of gravity
- Inclusive services were provided for visitors across a wide range of age groups
- Enabled seated mobility even in crowded conditions, reducing fatigue and allowing visitors to focus on exhibits

Bronze Partners

Intercom, Inc.

Pavilion Exhibition

- An introduction to Intercom and a demonstration of its AI product "Fin"
- An introduction to the startup support program "Intercom for Startups"

Bronze Partners

Nihon M&A Center Inc.

Session

- Scaling Up to Win Globally through M&A: Strategic Expansion for Japanese Startups and SMEs in Southeast Asia
 - An explanation of concrete strategies and success cases for accelerating the growth of Japanese companies through expansion into Southeast Asia and M&A

Bronze Partners

Red Bull Japan Co., Ltd.

Participation Details

- Provision of Red Bull Energy Drink

Bronze Partners

Terada Warehouse Co., Ltd.

Pavilion Exhibition

- Selected companies from among the 19 tenants of Terada Warehouse's startup incubation program "Creation Camp TENNOZ" were exhibited, showcasing their products and services
- On the Public Day, exhibitions were held by three startups, including furniture, online mental health care specializing in menopause, and barrier-free tourism plans

Participation Details

- Provision of venue support, spatial design, and cooperation in related events for the Tokyo Innovation Night
- Operational and infrastructure support, including services and docking facilities, for water transport connecting Ariake and Tennoz

Bronze Partners

VRHoldings

Pavilion Exhibition

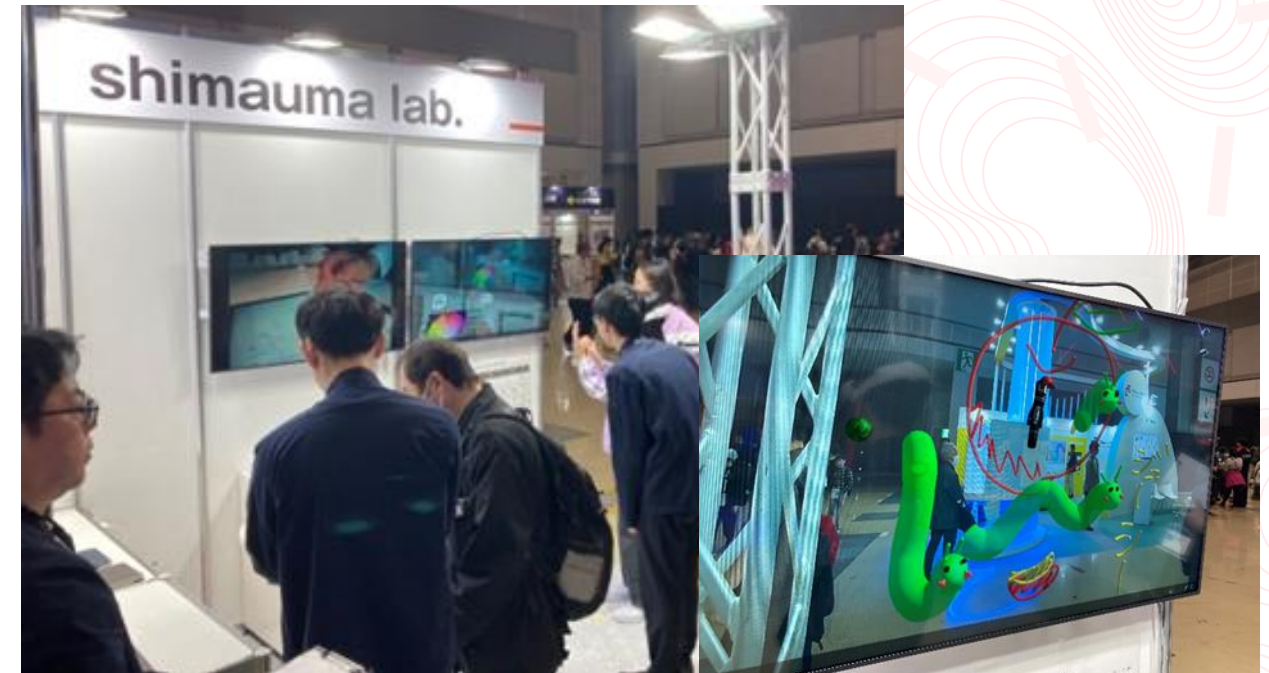

- Our press release distribution services were introduced to booth visitors
- The booth attracted over 100 visitors

Participation Details

- Press releases for the event were distributed across six Southeast Asian countries, resulting in coverage by more than 200 local media outlets

Bronze Partners

ZEBRA CO., LTD.

Pavilion Exhibition

- An exhibition on the new brand “shimauma lab.” focused on new business domains combining analog and digital
- Initiatives in the analog–digital domain were showcased
- An experiential demonstration of “shimaumaXR,” a virtual space drawing technology using T-Pen
- On the Public Day, many visitors experienced shimaumaXR

Basic Partners

DayBreak Co., Ltd.

Participation Details

- Frozen sushi made with proprietary freezing technology, preserving the taste of freshly made sushi, was provided to visitors
- In addition to sushi, frozen ramen—highly popular overseas and suitable for export—was newly offered

Basic Partners

SEGA XD CO., LTD.

Participation Details

- A workshop was held featuring the educational game "Three Numbers: CSIRT vs HACKER," where participants take on the roles of defenders (CSIRT) and attackers (hackers) and learn cybersecurity measures through an engaging card battle format

Basic Partners

TOMY Company, Ltd.

Participation Details

- An experience event for the latest fourth-generation BEYBLADE series, “BEYBLADE X,” was held
- Basic gameplay instructions were provided, enabling even first-time participants to easily join and experience the highly accelerated battles

 **SusHi Tech TOKYO●2026**

The background of the slide features a repeating pattern of red concentric circles and short, thick red line segments. These elements are scattered across the white background, creating a textured, organic feel. A solid red horizontal bar is positioned in the center of the slide, containing the text 'City Partners' in white.

City Partners

Exhibiting Startups (10)

- NovoViz • ESG-Explorer • Reor20
- AVAtronsics • AckTao • DuoKey
- REM Analytics • BeEmotion.ai
- Kido Dynamics • Jaipur Robotics

Session

- *“Swisstech @ SusHi Tech Startup Pitch 2026”*

A stage pitch event featuring 10 cutting-edge Swiss startups in the fields of AI, deep tech, cybersecurity, and climate tech

- A mini stage set up within the pavilion where startups also conducted pitch sessions

Exhibiting Startups (12)

- FACIL'iti
- Erase4good
- ABBEAL
- Geomatys
- Cypheme
- Orikio
- Ucaya / brand : la Vitre
- YellowScan
- ONLYLYON INVEST
- FAACTOPI
- Root-Me PRO
- Ekino

Session

- *"French Pavilion : startups' pitch session"*

A pitch session on stage featuring French Tech Tokyo and eight exhibiting startups

Exhibiting Startups (5)

- Asya
- Dealita
- IT Camp
- Latvijas Mobilais Telefons
- Elemexa

Session

- *"Investment and Development Agency of Latvia"*

A stage session introducing Latvia's ecosystem and tokenization practices in Latvia

Exhibiting Startups (6)

- Sensomatic • Foga • Coral
- Booqito • Literary Universe
- Kenka Puppetgame

Session

“Czech Innovation Unlocked: Smart, Secure and Human Centric Technologies Shaping the Tomorrow”

A stage session featuring pitches by three startups (Foga, Sensomatic, Literary Universe) contributing to enhancing urban resilience, along with an introduction to the City of Prague’s smart city vision

Exhibiting Startups (9)

- BADESOFA Interior Design GmbH
- Clyso •Eversyn •LexaTexer
- TissueGuard •Ucaneo •Visionlab
- Workist •Cynteract

Session

- “From Pilot to Production: What Japan Can Learn from Germany in Scaling AI for Industrial Impact”*

A stage session discussing AI scaling—from pilot projects to full deployment and toward creating industrial impact—incorporating perspectives from both Germany and Japan

UNITED KINGDOM

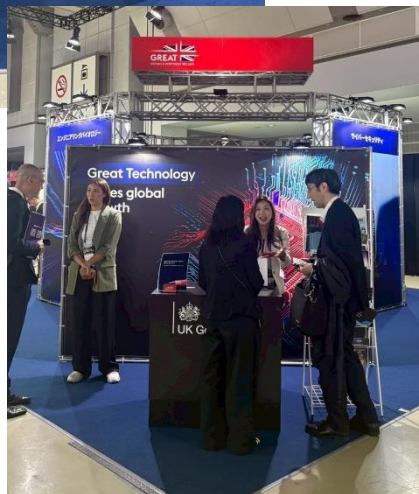

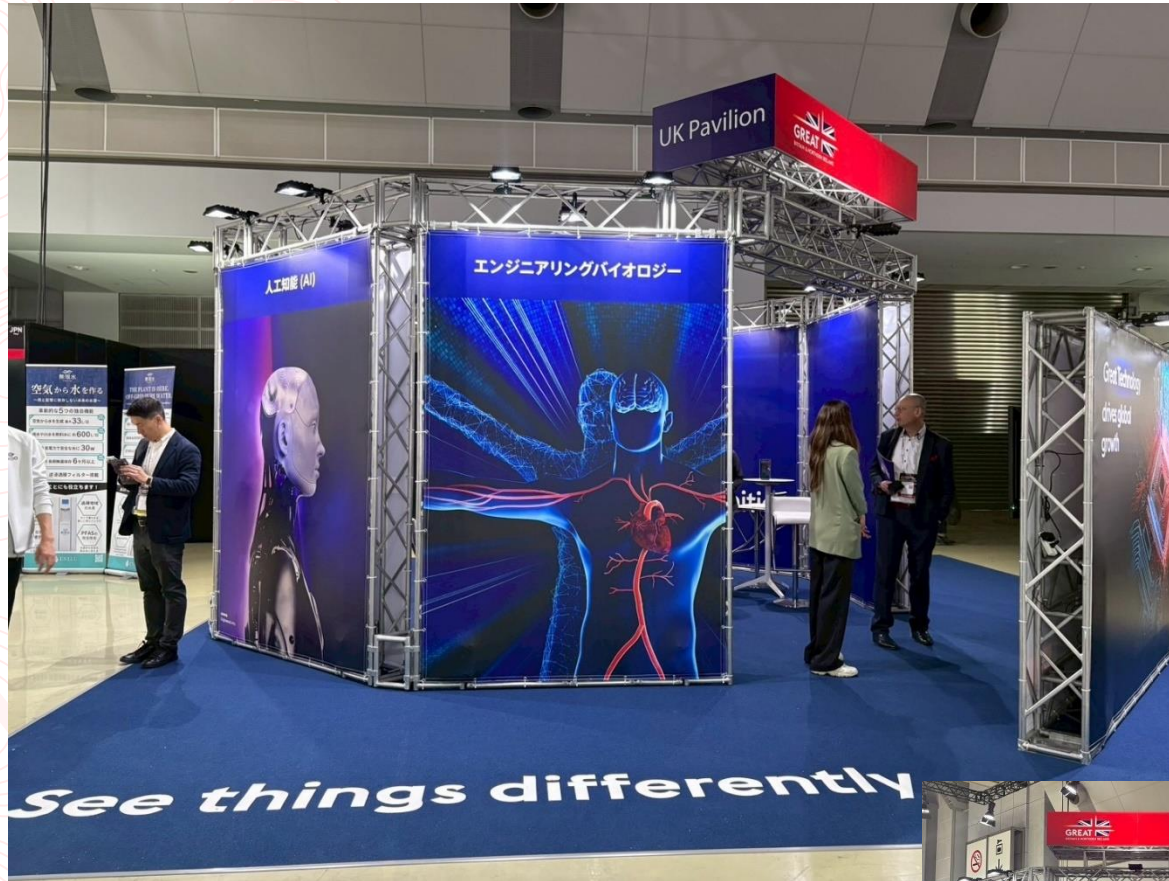

Exhibiting Startups (17)

- Bango Limited • Biodiversity Ltd.
- Blackwired UK Ltd • Colt Technology Services Group Limited • ElevenLabs Japan G.K.
- FNZ Japan K.K. • Kaiku Ltd. • Nexus FrontierTech
- Oxford Quantum Circuits • Quantexa Ltd.
- Simplified Solutions • Thought Machine Japan
- Touchlab Limited • Trainline • Transreport Limited
- TRAYDSTREAM Japan, Inc. • Trustonic

Session

“How the UK Built Europe’s #1 Tech Powerhouse — And What’s Next?”

A stage session featuring leading UK venture capitalists, prominent Japanese innovation leaders, and frontline academics, discussing the UK’s journey to becoming the world’s third-largest tech ecosystem and why Japan is an important partner

Exhibiting Startups (10)

- Athlos S.r.l.
- Digitalarca S.R.L.
- ELECTE S.R.L.
- Icarus Srl
- koala srl sb
- Moonify Srl
- MLR srl
- SLIMNET SRL
- TAKE OVER RILIEVI INTEGRATI S.R.L.
- TimelapseLab

Session and others

• “Italy: Deep Tech with a Human Edge”

A stage pitch session featuring 10 startups active in fields such as artificial intelligence, data intelligence, geospatial technology, smart infrastructure, and digital platforms

- A networking event, “Italian Hour,” will be held at the pavilion on the first day

SPAIN

Exhibiting Startups (6)

- Roi Digital Business S. L.
- FounderNest S. L. • Woza Labs S. L.
- Cardumen Capitals S. A.
- Sporalys (Koji Labs S. L.)
- Moa Biotech S. L.

Session

- *“Innovation from Spain: Intelligence Platforms and FoodTech for a Sustainable Century”*

A stage session where four leading Spanish startups (Moa Biotech, Sporalys, Woza Labs, and FounderNest) will deliver pitches and present cutting-edge solutions driving paradigm shifts in fields such as food, environment, and investment

NETHERLANDS

Exhibiting Startups (9)

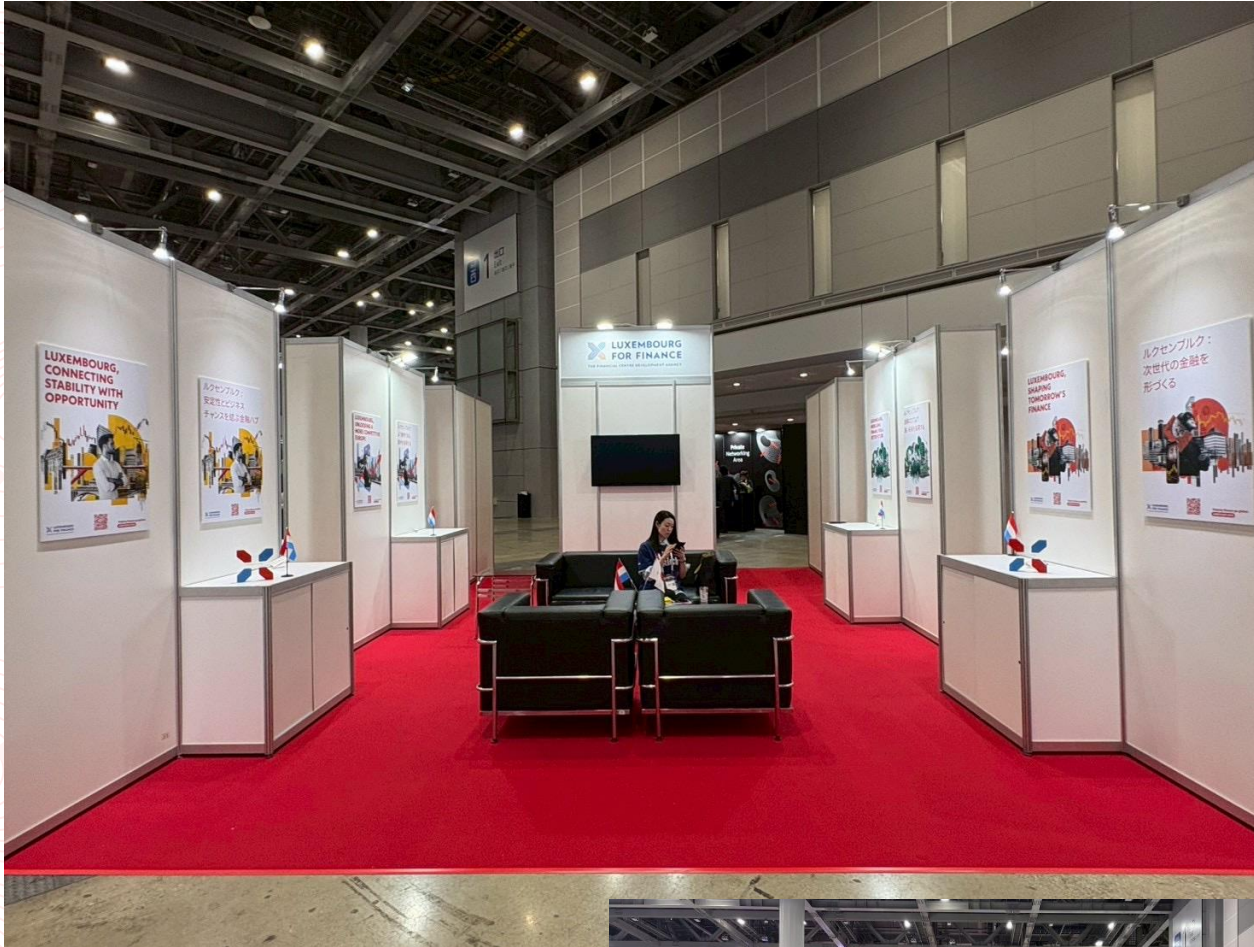

- Circularise
- Cyber.Dockside.ai
- Kalpana Systems
- Saddle Point Science Europe
- Scenwise BV
- SolarDuck
- StandIn
- Tekle Holographics
- Wonderment by Design

Session

“From Miffy to Market Leaders: Exploring the Innovative Ecosystem of the Netherlands and Its Latest Startups”

A stage session introducing the overall picture of the Netherlands' vibrant innovation ecosystem, along with pitches by nine startups

Exhibiting Startups (0)

- No startup exhibitions
- A standalone exhibition by Luxembourg for Finance

Session

- *“Luxembourg - Finance and FinTech hub in Europe”*

A stage session introducing Luxembourg’s financial services ecosystem, as well as how international companies are using Luxembourg as a base to expand their business in Europe

QUEENSLAND (AUSTRALIA)

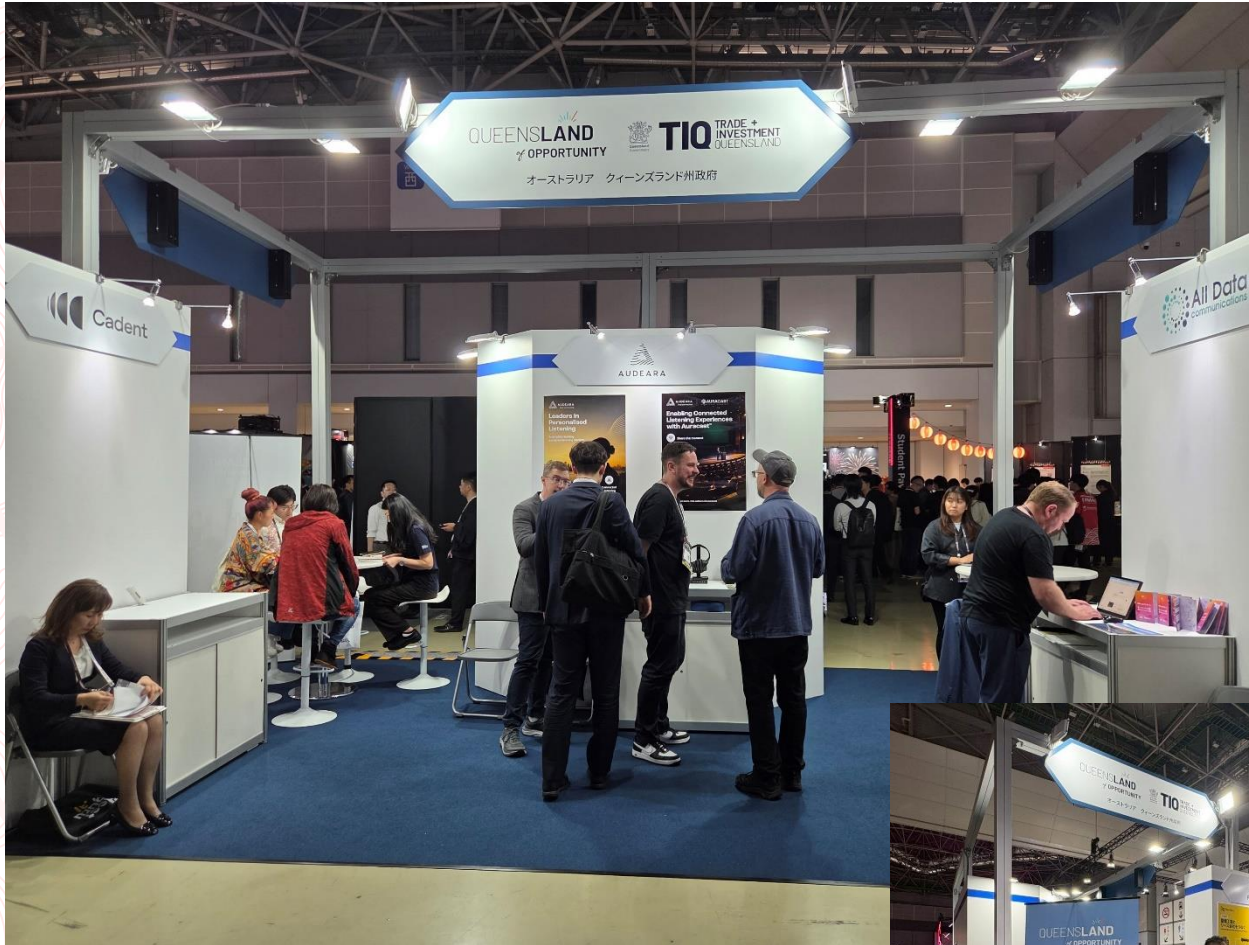

Exhibiting Startups (5)

- Audeara •Axiom Holographics
- All Data abd Commnication
- Auto Guru •Cadent

Session

- “Advanced technologies and international initiatives by five companies from Queensland, Australia”*

A stage pitch session featuring five exhibiting startups with advanced technologies, showcasing their international initiatives

TAIWAN

Exhibiting Startups (27)

- Cancerfree biotech Ltd. • Avalanche Computing Taiwan Inc. • BIG DATA Co., Ltd. • Allxon Inc.
- LE Biomedical Corp.(LEBM) • AIRA Corporation • A-TOP Health BIOTECH CO., LTD.

- RYMBA

(Supporting organization : Sidec)

Session

- *“Malaysia Tech Spotlight”*

A stage pitch session where startups and tech companies present particularly outstanding initiatives within Malaysia’s digital ecosystem

Exhibiting Startups (5)

- Matwerkz Technologies
- ImpacFat
- EtaVolt Pte Ltd
- H3 Zoom Pte Ltd
- Accelerated Materials

Session and others

- *“Twin Nodes for Frontier Tech: Japan and Singapore”*

A stage session discussing how to strengthen collaboration between the ecosystems of Japan and Singapore—functioning as “twin nodes (dual nodes)” —and how to support startups in expanding their activities across regions and markets

- A networking event, “Singapore Hour,” was held at the pavilion, along with an MOU signing ceremony between Singaporean startup Ailytics and the Japanese company Safie

Exhibiting Startups (12)

- Cleantech and Beyond
- Evergen Technologies Co., Ltd.
- Graffity Technologies
- Inflight Co., Ltd. JORDSABUY
- NEXTERE COMPANY LIMITED
- Plant Origin Food Co., Ltd.
- Primo World Co., Ltd.
- VEKIN (THAILAND) CO., LTD.
- Via Group (Thailand) Co., Ltd.
- VTK Inno Group Co., Ltd.
- YVR CO., LTD.
- ZPS Corporation Co., Ltd. (ZUPPORTS)

Session

- *“Thailand Innovation Showcase”*

A stage pitch session showcasing products, services, and technologies developed by startups selected by organizations such as the National Innovation Agency of Thailand

Exhibiting Startups (8)

- KAOPIZ
- AMELA JAPAN .Inc
- FPT Japan Holdings Co., Ltd.
- TMA Solutions Japan Inc.
- RIKAI Co. Ltd
- CMC Japan K.K.
- AIoT Inc
- Mirabo Global JSC

Session

• *“Unlocking Vietnam DX Market: Opportunities for Global Collaboration”*

A stage session featuring Vice Minister Hoang Minh of Vietnam’s Ministry of Science and Technology and eight Vietnamese startups, discussing the outlook for Vietnam DX (digital transformation) and the potential for global collaboration

Exhibiting Startups (8)

- Agro Agape
- CAS Energy
- GAWIREA (Girls and Women in Renewable Energy Academy)
- Klimatech Innovative Solutions Inc.
- Pristin Solutions
- Alterno
- CHOSEN Digital Co.,Ltd.
- Quarbotech

Session

- *"ASEAN SPARKS Elevate : Empowering Clean Energy and Climate Tech Startups through Business Matchmaking in SusHi Tech Tokyo"*

A stage pitch session featuring the top eight startups selected through the ASEAN SPARKS program, which includes three months of intensive workshops and mentoring, followed by a final pitch event

ASEAN

Exhibiting Startups (12)

- AirXCarbon
- Alterno
- ALTSynergy
- Aprisium
- BatX Energies
- Green PMU Semi
- Klimatech Innovative Solutions
- Parongpong RAW Lab
- Qarbotech
- RIFFAI
- Tech For Kids Academy
- VOX Cool

Session

- *“ERIA Innovate Bridge: Linking ASEAN & Indian Innovation's Across Borders”*

A stage pitch session featuring 12 promising startups selected from ASEAN and India

Exhibiting Startups (10)

- SURGiA
- Pharmacy Marts
- Rology
- NoorNation
- Trella
- INDOS
- Mtor E-Commerce
- Buguard
- Chefaa
- Breakfast

Session

- *“Egypt × Japan: Co Creating Scalable Tech Solutions for Emerging Markets”*

A stage session where promising startups from Egypt deliver pitches, along with a discussion exploring concrete opportunities for co-creation and business collaboration with Japanese companies

ASIA, AFRICA

Exhibiting Startups (19)

- MDaaS Global

ALL JAPAN

HOKKAIDO Pavilion

Hokkaido, Sapporo City

- Exhibiting Startups : 7 companies
MJOLNIR SPACEWORKS Co., Ltd., KISHIVR Co., Ltd.,
Hokkai Technology Agriculture Co., Ltd., AWL, Inc.,
Younode, Inc., Floatmeal Co., Ltd., Lmusubi Inc.
- Experience new innovation based on Hokkaido's strengths in 'primary industries and food,' 'space,' and 'environmental energy' as core concepts.

Tohoku Pavilion

Aomori Prefecture, Akita Prefecture, Miyagi Prefecture,
Sendai City, Fukushima Prefecture・Yamagata Prefecture

- Exhibiting Startups : 7 companies
NanoFrontier Inc., Licube, Inc.,
OKUMA TECH Co., Ltd., HAMA Inc., Outcrop Inc.
KIZUKI Inc., ZAICO Inc.
- Startups leveraging deep tech based on technologies from universities and research institutions, as well as solutions addressing societal challenges, come together to showcase the strengths of Tohoku's research capabilities and industrial foundation.

STATION Ai/Central Japan Startup Ecosystem Consortium Pavilion

Aichi Prefecture, Nagoya City, Hamamatsu City, Gifu Prefecture, Shizuoka Prefecture, Mie Prefecture

- Exhibiting Startups : 20 companies

ZeroOne Inc., Acompany Co., Ltd., mBiRS Inc.,
Silvacompass Inc., Olive Inc., m2labo Inc.,
GRA&GREEN Inc., FiberCraze Inc., Tokuiten Inc.,
MiYO ORGANIC Inc., KUROFUNE Inc., Spacewasp Co., Ltd.
FACTORY X Inc., TRON Inc., ICOMA Inc.,
CROSLAN Inc., codeless technology Inc.,
Pi PHOTONICS Inc., Prodrone Co., Ltd., Blue Farm Inc.

- Exhibitions featuring STATION Ai, one of Japan's largest open innovation hubs, and 'TechGALA Japan,' a technology festival held in December that explores innovations shaping the future of the planet.

Hokuriku Pavilion

Ishikawa Prefecture, Toyama Prefecture, Fukui Prefecture

- Exhibiting Startups : 9 companies

LABTECHS Inc., harih Inc., shukatsuradio Inc.,
Fermelanta, Inc., BioSeeds Co., Ltd., Minakano Inc.,
Environmental Microorganism Research Institute Co., Ltd.,
THE PHAGE, Inc., upcul .inc

- Startups from the three Hokuriku prefectures—Toyama, Ishikawa, and Fukui—where a diverse range of manufacturing industries is concentrated, will exhibit, seeking partnerships with companies and government organizations both in Japan and overseas, and are expected to expand globally.

Kansai Pavilion

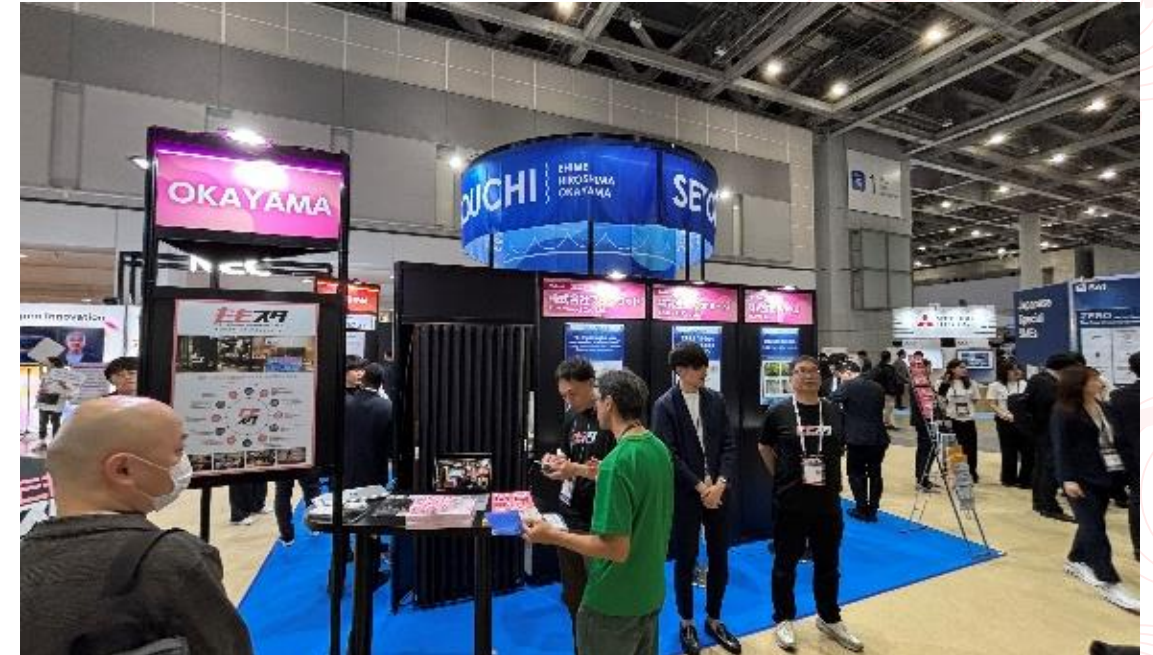

Osaka Prefecture, Osaka City, Sakai City, Kyoto Prefecture, Kyoto City, Hyogo Prefecture, Kobe City

- Exhibiting Startups : 10 companies
Solallis Bio Inc., Toregem BioPharma, Co., Ltd.,
Almaprism Inc., TSK Corporation, Wada FoodTech Co., Ltd.,
AIBTRUST Inc., IMMUNOSENS Co., Ltd.,
Institute of Advanced Chemistry Co., Ltd. iPresence Co., Ltd.,
TearExo Inc.
- To promote the startup ecosystem of the Keihanshin region and the startups located there, Kyoto, Osaka, Hyogo, and Kobe will jointly exhibit as a unified entity.

Setouchi Pavilion

Ehime Prefecture, Hiroshima Prefecture, Hiroshima City, Okayama Prefecture, Okayama City

- Exhibiting Startups : 9 companies
UNITED SILK Co., Ltd., PLANT CASE Co., Ltd.,
PITCGRAM Inc., Furanwood Co., Ltd.,
WAKU Co., Ltd., Material Gate Inc.,
TROMSO Co., Ltd., SYNRA Inc., CONE-Xi Co., Ltd.
- Showcasing distinctive startups from the Setouchi region—including Hiroshima, Ehime, and Okayama—along with startup and entrepreneurship support initiatives led by local governments.

Kyusyu・Okinawa Pavilion

Fukuoka City, Kumamoto City, Okinawa Prefecture

- Exhibiting Startups : 12 companies
curioph Co., Ltd., OYASAI, Inc., lumilight Japan Co., Ltd.,
LIFE STYLE MANAGEMENT Co., Ltd., KOALA Tech Inc.,
Interactive, Inc., sitateru Inc.,
Coatolie Co., Ltd., FUKUNARI Inc., Yamachiku Corp.,
Think Nature Co., Ltd., ARK Inc.
- Fukuoka City will highlight 'RAMEN TECH' and startups based in the city; Kumamoto City will showcase the challenges undertaken by its local startups; and Okinawa Prefecture will present the initiatives of the 'Okinawa Startup Ecosystem Consortium' along with efforts by startups across the prefecture.

Toyohashi City

- Exhibiting Startups : 1 companies
FieldWorks, Co., Ltd.
- In Toyohashi City—where agriculture and manufacturing coexist—this initiative connects on-site operations, universities, and companies in close proximity to support the demonstration and growth of startups.

REGIONAL NEXUS HUB

Nagano Prefecture, Niigata Prefecture

- Exhibiting Startups : 3 companies
PerkUP, Inc., AssistMotion Inc., Plant form Inc.
- Introducing initiatives that designate four focused areas—including medical care and healthcare—and support the creation and growth of regionally driven startups by providing unique demonstration fields not found in other regions.

RYO-FU BASE

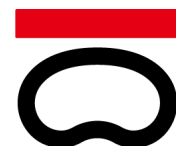

(Saga Prefectural Industrial Promotion Organization)

•Exhibiting Startups : 2 companies

tuneX,
Shinsei-Komuten

•Introducing initiatives at RYO-FU BASE, which supports the growth of companies and entrepreneurs with a focus on DX and startups.

 **SusHi Tech TOKYO 2026**

AWAODORI Tech

(Tokushima Prefecture)

•Exhibiting Startups : 3 companies

Setsuro Tech Co., Ltd., Smart Laser & Plasma Systems Co., Southwood Inc.

•Introducing Tokushima Prefecture's innovation initiatives together with three advanced startups that have the potential to lead global industrial and medical fields.

Metropolitan Area Pavilion ①

Tokyo, Chiyoda, Minato, Shibuya, Ota, Sumida, Saitama, Gunma, Utsunomiya, Ibaraki, Kawasaki

Metropolitan Area Pavilion (Overall)

Municipal Booth

Consultation Booth

Tokyo Metropolitan Government Booth
(Office for Sports Promotion)

Tokyo Metropolitan Government Booth
(Bureau of Social Welfare)

Tokyo Metropolitan Government Booth
(Bureau of Citizens and Cultural Affairs)

- Each local government introduces its startup support programs and innovation facilities, while co-exhibiting with supported startups to showcase initiatives that foster a startup ecosystem through public-private collaboration.
- At the Tokyo Metropolitan Government Booth, the Office for Sports Promotion will promote the “Nenrinpic Chōju Tokyo 2028,” to be held in Tokyo in 2028, and showcase technologies that contribute to improving the quality of life (QOL) of older adults. The Bureau of Social Welfare will present game-based digital content that allows visitors to experience, in a simulated manner, the challenges faced by people with disabilities and the accommodations they require. The Bureau of Citizens and Cultural Affairs will exhibit initiatives of the Civic Creative Base Tokyo (CCBT), which demonstrates how people’s creativity can be applied to society through art and digital technology.
- A consultation booth organized by JETRO, Shibuya City, and Business Concierge Tokyo is available, attracting a wide range of domestic and international visitors and providing tailored advice to support business expansion.

Metropolitan Area Pavilion ②

Tokyo Innovation Base

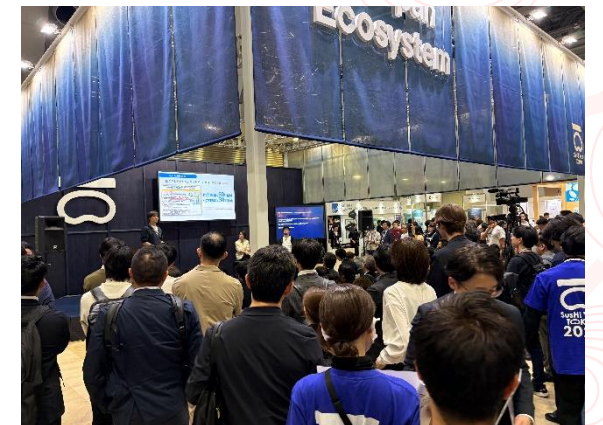

- By introducing the Tokyo Metropolitan Government’s startup strategy formulated in November 2025, Global Innovation Strategy 2.0 STARTUP & SCALEUP, along with various startup support initiatives implemented at TIB, the booth showcases the appeal of TIB to a global audience.
- Visitors can engage with TIB “Founding Members” (*) and members of the TIB management team.
*Volunteer ecosystem players who have been working with the Tokyo Metropolitan Government since the launch phase of TIB.
- On Public Day, the following initiative is conducted:
 - Startups operating at the TIB SHOP provide food and beverage samples for approximately 200 visitors.

	Product	Company	Quantity
①	Ice Cream	Eclis Foods Japan Co., Ltd.	200 units
②	Donuts	IKIGAI Ritual Co., Ltd.	150 units
③	Japanese Tea	Yosuga Inc.	150 cups

➢ A keyholder-making workshop hosted by TIB FAB is held, with approximately 142 participants.

Japan Stage (4/27 Day1)

Time	Organizer	Sessions & Stage Program

12:00	12:45~13:45【Session】 Creating “First Step to Challenge” with Students and University — Learning from MIT and UC Berkeley: How Students Can Leverage Universities —	12:15~13:15【Workshop】 DeepTech Workshop - A University Laboratory: Research that Drives Society	13:15~14:15【Pitch】 Tokai vs. Kanto — Entrepreneurship Club Battle: Spring Edition
13:00	14:00~16:15【Pitch】 Shusse-uo Pitch -Semi Final-	13:30~14:30【Session】 Mindset for Taking on Challenges in the World	
14:00		14:45~15:45【Session】 The Potential of the Space Business – Space : Next Frontier -	14:45~15:45【Session】 How to Create "Questions" and "Change" that Shift Society: From Imagination to Creation
15:00		16:00~17:30【Session】 Student Groups As Entrepreneurs	16:15~17:30【Session】 GO GLOBAL, GO CRAZY!
16:00	16:30~18:00【Session】 English Presentations that Earn Trust: The Secrets of "Non-Verbal Communication" Beyond Language Barriers		17:30~18:00【Networking】 Student Pavilion Closing ~ITAMAE Bon Odori Dance Festival~
17:00			

A Large Number of Students Participated in “ITAMAE.”

Through the involvement of student organizations and student entrepreneurs as Student Partners and Student Business Partners, a record **75 groups** joined SusHi Tech.

学生による学生のためのビジネスコンテスト
Business Contest KING

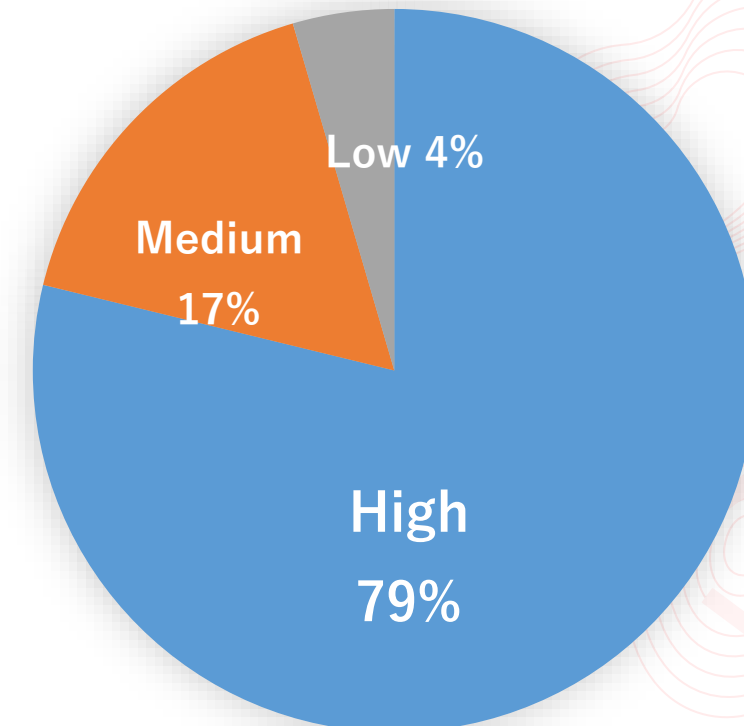

OVAL
Our Vision for Asian Leadership
JAPAN

and
more...

A total of **846** participants joined as volunteers, more than double the previous edition. High school students mainly participated on Public Day, with **over 300 attendees across the three days.**

Did the volunteer experience increase your interest in working globally or in internationally active companies?
(n=486, 10-point scale)

<Student Partner Feedback>

The program provided valuable opportunities to connect with student organizations across diverse fields. It was a highly meaningful experience for participants. Through STT, students gained significant insights into the perspectives of various companies.

The background of the slide features a repeating pattern of red concentric circles and short, thick red line segments. These elements are scattered across the white background, primarily concentrated in the corners and along the edges, creating a decorative border effect.

5/27 -30	BEYOND International Technology Innovation Expo	One of Asia's largest technology and innovation exhibitions, bringing together participants from major corporations to startups to build an innovation ecosystem through exhibitions and summits.	The Venetian Macao Cotai Expo
6/23 -24	GCV Symposium 2026	An event bringing together leaders driving innovation in Europe, centered around CVCs. The 2026 edition marks its 15th year, offering a key opportunity to understand venture trends and build partnerships in Europe.	LONDON

Tokyo Innovation NIGHTs (TIN)

A Networking Event for SusHi Tech Tokyo Participants

Tokyo Innovation NIGHTs were held at TIB and Tennozu, with a total of 2,056 participants over the three days of April 26, 27, and 28

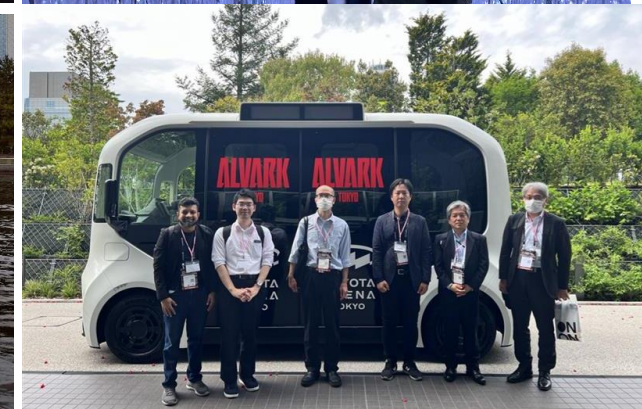

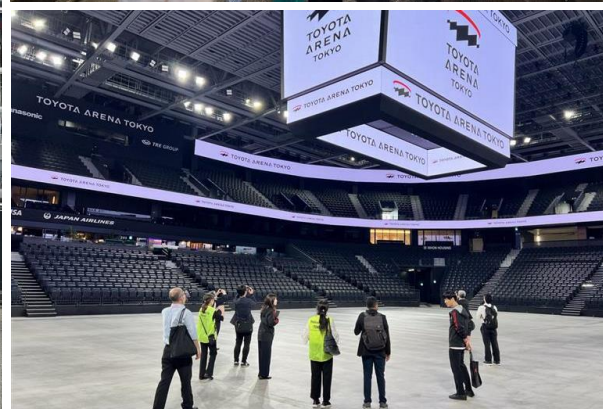

A shuttle cruise service connecting Tennozu and the STT venue, Tokyo Big Sight, was also operated

Site Visit Tour

Site Visit Tour Designed to Experience the Unique Appeal of the City

Tours were organized outside the SusHi Tech venue to showcase Tokyo's strengths and attractions, with over 200 participants joining across 23 tours

The background of the slide features a repeating pattern of red concentric circles and short, thick red line segments. These elements are scattered across the white background, creating a textured, organic feel. The circles vary in size and are often partially cut off by the edges of the frame. The line segments are short and appear to be placed at various angles, some parallel to the circles and others perpendicular.

Japanese Cultural Experience

Experience Japanese Culture in an Authentic Tea Room

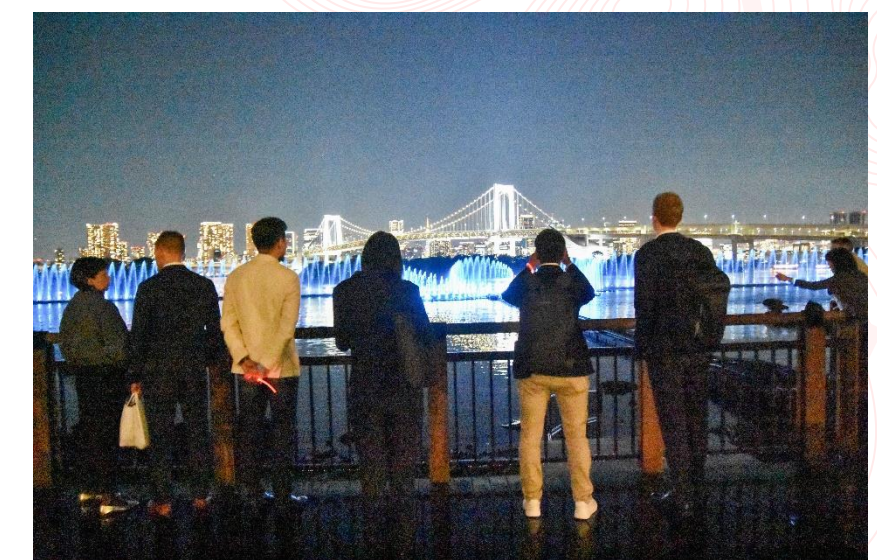

A tea room set up within the SusHi Tech venue enabled 250 participants to learn about Japanese culture through the tea ceremony

Reception Party

SusHi Tech Tokyo 2026 Reception

4/27 Day1 18:00-19:30 @Tokyo Big Sight Reception Hall Participants: approx. 450

Public Day

Venue Layout (Public Day)

Lower Floor / WEST 1-2 Hall

Impact Stage

- Junior High and High School Student Pitch Contest :
SushI Tech Teen Challenge 2026
- Think About a Sustainable Future with QuizKnock②
- GENKI LABO Science Live Show ①,② – Two Sessions
- All-Out Student Cheer Stage Stories of “What It Took to Win”

Meteor Stage

- Future Careers College

Green Stage

- Drone Piloting Experience
- Cyber KASSEN
- Valo Jump
- PROMPT RACING

Pop-up Venue

- ⑩ Future “Shikake” Lab: Solve Everyday Problems in Exciting Ways!
- ⑪ BEYBLADE X Hands-on Experience

Pop-up Venue

- ⑫ Drone Flight Experience with Programming
Tokyo Metropolitan Kitatoshima Technical High School

Sun Pillar Stage

- Robot Meetup: Chat with Communication Robots

Pop-up Venue

- ⑬ LEGO® × AI : Control a Robot with Body Movements!
- ⑭ Portal Meet
- ⑮ VR Photo Booth Experience in CROSSIA

Wind Stage

- Control Robots and Play! Robot Sports Challenge
- An Authentic “Kumihimo” Braiding Experience from a 370 -Year Tradition
- Mizuhiki (Traditional Decorative Knot) Workshop

Atrium Stage

- Beat Physical AI! Soccer Robot Battle!

Venue Layout (Public Day)

Innovation Stage

- Think About a Sustainable Future with QuizKnock①
- Student Pitch Koshien Grand Finals

Tokyo Stage

- Mobility Experience & Workshop

Pop-up Venue

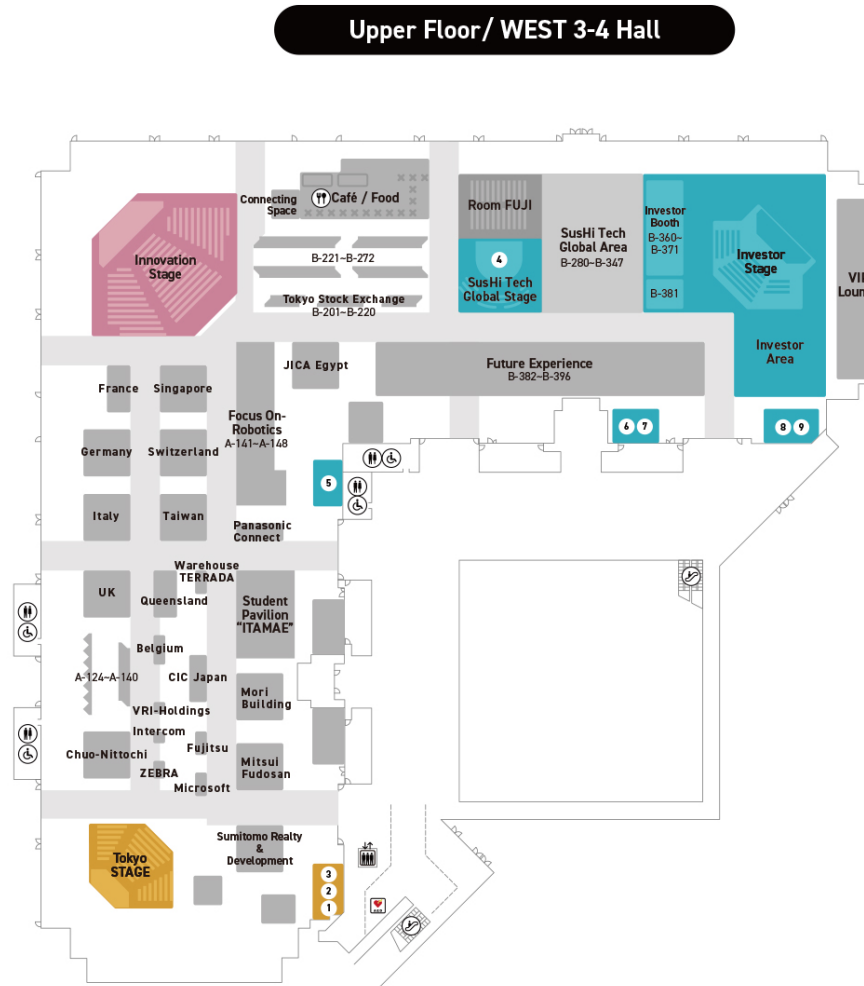

- ① Make invisible weather visible - through hands-on experience
- ② Science Workshop On Tour
- ③ Real Science Experience : Launch a Hydrogen Energy Rocket to the Moon!
