Notes to Investors:

1. TOKYO PRO-BOND Market is a market for professional investors, etc. Bonds listed on the market ("**Listed Bonds**") may involve high investment risk. Investors should be aware of the listing eligibility and timely disclosure requirements that apply to issuers of Listed Bonds on the TOKYO PRO-BOND Market and associated risks such as the fluctuation of market prices and shall bear responsibility for their investments. Prospective investors should make investment decisions only after having carefully considered the contents of this Issuer Filing Information.
2. Where this Issuer Filing Information contains (a) any false statement on important matters, or (b) lacks information on: (i) important matters that should be announced or (ii) a material fact that is necessary to avoid misleading content, a person who, at the time of announcement of this Issuer Filing Information, is an officer (meaning an officer stipulated in Article 21, Paragraph 1 of the Financial Instruments and Exchange Act of Japan (the "**Act**")) of the issuer that announced this Issuer Filing Information shall be liable to compensate persons who acquired the securities for any damage or loss arising from the false statement or lack of information in accordance with the provision of Article 22 of the Act applied mutatis mutandis in Article 27-34 of the Act. However, this shall not apply to cases where the person who acquired the securities was aware of the existence of the false statement or the lack of information at the time of subscription for acquisition of the securities. Additionally, the officer shall not be required to assume the liability prescribed above, where he/she proves that he /she was not aware of, and was unable to obtain knowledge of, even with reasonable care, the existence of the false statement or the lack of information.
3. The regulatory framework for TOKYO PRO-BOND Market is different in fundamental aspects from the regulatory framework applicable to other exchange markets in Japan. Investors should be aware of the rules and regulations of the TOKYO PRO-BOND Market, which are available on the Tokyo Stock Exchange website.
4. Tokyo Stock Exchange does not express opinions or issues guarantees regarding the content of the Issuer Filing Information (including, but not limited to, whether the Issuer Filing Information contains (a) a false statement or (b) lacks information on: (i) important matters that should be announced or (ii) a material fact that is necessary

to avoid misleading content) and shall not be liable for any damage or loss including that described above.

5. All prospective investors who consider purchasing the notes of the Macquarie Bank Limited (the “**Issuer**”) issued or to be issued under the Program Information dated 22 February 2019 (the “**Notes**”) should read the relevant Specified Securities Information before making an investment decision. Among other things, all prospective investors should be aware that the Notes are subject to certain selling restriction as set forth in the relevant Specified Securities Information.

ANNUAL
REPORT

Macquarie Bank
Year ended 31 March 2019

50TH
ANNIVERSARY

Macquarie Bank Limited is a subsidiary of Macquarie Group Limited ACN 122 169 279 and is regulated by the Australian Prudential Regulation Authority (APRA) as an authorised deposit-taking institution (ADI). Macquarie Group Limited is regulated by APRA as a non-operating holding company of an ADI.

2019 Annual General Meeting

Macquarie Bank Limited's 2019 Annual General Meeting (AGM) will be held at Macquarie's Sydney Office, Level 10, 50 Martin Place, Sydney NSW 2000, after the MGL AGM but not before 2:00pm on Thursday, 25 July 2019.

Details of the business of the meeting will be contained in the Notice of Annual General Meeting, to be sent to securityholders separately.

Macquarie Bank

The 'I Bank with Macquarie' campaign uses real Macquarie customers like Shani to illustrate how we are making banking more seamless and intuitive. From young families to business owners and established professionals, we proudly showcase real customer stories in our public campaigns.

Operating and Financial Review

Review of performance and financial position

Performance

Macquarie Bank's consolidated net profit attributable to the ordinary equity holder of \$A2,022 million for the year ended 31 March 2019 increased 29% from \$A1,568 million in the previous year.

	Full-year to 31 Mar 2019 \$A million	Full-year to 31 Mar 2018 \$A million	Movement %
Net operating income	5,911	5,002	18
Operating expenses	(4,432)	(3,611)	23
Income tax expense	(394)	(353)	12
Profit from discontinued operations after income tax	956	545	75
Profit attributable to non-controlling interests	(4)	(1)	*
Distribution paid or provided for on Macquarie Income Securities	(15)	(14)	7
Profit attributable to the ordinary equity holder	2,022	1,568	29

DISCONTINUED OPERATIONS

Profit from discontinued operations after income tax was \$A956 million for the year ended 31 March 2019. This represents the gain on disposal and operating profit from the CAF Principal Finance and Transportation Finance businesses. The economic risks and rewards from these businesses were transferred at fair value on 10 December 2018 to Macquarie Financial Holdings Pty Limited (MFHPL).

OPERATING GROUPS UPDATE

In the second half, certain businesses were reorganised between Operating Groups to better align businesses with a shared focus on particular customer segments and geographies:

- Macquarie's Australian vehicle finance business moved from CAF into BFS
- MAM's MSIS business moved into CAF

Comparatives have been restated to reflect this reorganisation between Operating Groups. The financial information disclosed relates to the Consolidated Entity's continuing operations.

ANNUITY-STYLE BUSINESSES

Corporate and Asset Finance

\$A249m⁽¹⁾

↓ 20% on prior year

- non-recurrence of one-off investment-related income
- recognition of certain legacy lending transaction-related expenses.

Partially offset by:

- improved income from the Energy, Resources and Technology portfolios.

Banking and Financial Services

\$A753m⁽¹⁾

↑ 3% on prior year

- growth in Australian mortgage, business banking loan, deposit and funds on platform average volumes.

Partially offset by:

- lower wealth management fee income associated with realigning the wealth advice business to focus on the high net worth segment
- increased costs associated with investment in technology to support business growth
- full year impact of the Australian Government Major Bank Levy relative to the prior year.

MARKETS-FACING BUSINESS

Commodities and Global Markets

\$A1,456m⁽¹⁾

↑ 68% on prior year

- strong results across the commodities platform driven by client hedging activity
- significant opportunities in North American Gas and Power due to supply-demand imbalances across regional US centres
- increased contribution from client structured foreign exchange deals across all regions.

Partially offset by:

- increased operating expenses reflecting increased client activity, changes to operating structure, and an increased investment in technology platforms
- challenging conditions impacting equity trading activities, particularly in specific Asian retail markets
- higher impairment charges due to write-downs recognised on underperforming financing facilities and a small number of specific commodity equity positions.

(1) Net profit contribution is management accounting profit before unallocated corporate costs, profit share and income tax.

Operating and Financial Review

Financial position

Net operating income

Net operating income from continuing operations of \$A5,911 million for the year ended 31 March 2019 increased 18% from \$A5,002 million in the prior year. Increases from Net interest and trading income and Fee and commission income were partially offset by higher Credit and Other impairments and lower Other operating income and charges.

Net interest and trading income

FULL YEAR TO

31 Mar 19 \$Am	31 Mar 18 \$Am
4,504	3,773

↑ 19%
on prior year

- increased contributions across the commodities platform driven by client hedging activity and significant opportunities in North American Gas and Power due to supply-demand imbalances across regional US centres in CGM
- growth in average Australian loan and lease portfolio and deposit volumes in BFS.

Partially offset by:

- challenging conditions impacting equity trading activities in CGM, particularly in specific Asian retail markets.

Fee and commission income

FULL YEAR TO

31 Mar 19 \$Am	31 Mar 18 \$Am
1,231	889

↑ 38%
on prior year

- following the adoption of AASB 15, the presentation of \$A250 million of fee expenses relating to stock borrowing activities and certain recoverable costs, previously presented net of associated revenues, have been reclassified to operating expenses
- increase in risk premia fees earned on index products and increases in brokerage driven by client activity in CGM
- growth in fees in relation to the Technology portfolio in CAF.

Net operating lease income

FULL YEAR TO

31 Mar 19 \$Am	31 Mar 18 \$Am
289	243

↑ 19%
on prior year

- improved income from the Energy and Technology portfolios and favourable foreign exchange movements in CAF.

Share of net profits of associates and joint ventures

FULL YEAR TO

31 Mar 19 \$Am	31 Mar 18 \$Am
28	25

↑ 12%
on prior year

- increased overall performance of underlying assets.

Credit and Other impairment charges

FULL YEAR TO

31 Mar 19 \$Am	31 Mar 18 \$Am
(247)	(112)

↑ significantly
on prior year

- higher impairment charges due to write-downs recognised on underperforming financing facilities and certain commodity-related equity positions in CGM
- partial reduction of central management overlay provisions in Corporate in the prior year to reflect changes in credit conditions.

Other operating income and charges

FULL YEAR TO

31 Mar 19 \$Am	31 Mar 18 \$Am
106	184

↓ 42%
on prior year

- lower income due to the sell down of infrastructure debt and the sale of the US commercial vehicles financing business in the prior year in CAF
- the prior year included the release of accruals related to certain legacy business activities in Corporate.

Partially offset by:

- gain on sale of a number of investments in the commodities sector in CGM.

Operating expenses

Total operating expenses from continuing operations of \$A4,432 million for the year ended 31 March 2019 increased 23% from \$A3,611 million in the prior year. This was driven by higher expenses across all categories.

Employment expenses

FULL YEAR TO		↑ 13% on prior year
31 Mar 19 \$Am	31 Mar 18 \$Am	
1,448	1,278	

- higher performance-related profit share, share-based payments expense and higher average headcount in the Bank Group.

Brokerage, commission and trading-related expenses

FULL YEAR TO		↑ 26% on prior year
31 Mar 19 \$Am	31 Mar 18 \$Am	
777	616	

- following the adoption of AASB 15, the presentation of \$A143 million of fee expenses relating to stock borrowing activities, previously presented net of associated revenues, have been reclassified to Brokerage, commission and trading-related expenses.

Non-salary technology expenses

FULL YEAR TO		↑ 30% on prior year
31 Mar 19 \$Am	31 Mar 18 \$Am	
167	128	

- higher technology expenses mainly to support business growth.

Occupancy and Other operating expenses

FULL YEAR TO		↑ 28% on prior year
31 Mar 19 \$Am	31 Mar 18 \$Am	
2,040	1,589	

- following the adoption of AASB 15, the presentation of \$A107 million of recoverable costs, previously presented net of associated revenues, have been reclassified to Other operating expenses
- the recognition of certain legacy-related expenses
- increased recoveries for support services received by the Bank Group due to higher business activity.

Income tax expense

Income tax expense from continuing operations for the year ended 31 March 2019 of \$A394 million increased 12% from \$A353 million in the prior year. The effective tax rate for the year ended 31 March 2019 was 26.7%, up from 25.4% in the prior year.

The increase was mainly due to the geographic composition and nature of earnings.

Note on adoption of new Australian Accounting Standards

The March 2019 financial results reflect the adoption of AASB 9 *Financial Instruments* (AASB 9) and AASB 15 *Revenue from contracts with customers* (AASB 15) on 1 April 2018. As permitted by AASB 9 and AASB 15, the Consolidated Entity has not restated previously reported financial periods.

Refer to Note 1 *Summary of significant accounting policies* in the Financial Report for details regarding the Consolidated Entity's transition to AASB 9. No material transition adjustments arose following the adoption of AASB 15.

Operating and Financial Review

Financial position continued

Balance sheet

Macquarie Bank's statement of financial position has mainly been impacted by the sale of CAF's Principal Finance and Transportation businesses to the Non-Bank Group, changes in business activities and Treasury management initiatives during the year ended 31 March 2019.

Total assets		Total liabilities	
AS AT		AS AT	
31 Mar 19 \$Am	31 Mar 18 \$Am	31 Mar 19 \$Am	31 Mar 18 \$Am
169,422	173,218	158,182	160,115

↓ 2%
on prior year

↓ 1%
on prior year

- Property, plant and equipment of \$A2.7 billion as at 31 March 2019 decreased 75% from \$A11.1 billion as at 31 March 2018 mainly due to the sale of assets of CAF's Transportation business to the Non-Bank Group, as well as the sale of Energetics in CAF's Principal Finance business
- Other assets of \$A2.1 billion as at 31 March 2019 decreased 43% from \$A3.7 billion as at 31 March 2018 primarily due to the sale of assets of CAF's Principal Finance and Transportation businesses to the Non-Bank Group and the redemption of Macquarie Life funds in BFS
- Interests in associates and joint ventures of \$A0.2 billion as at 31 March 2019 decreased 70% from \$A0.7 billion as at 31 March 2018 mainly due to the sale of assets related to CAF's Principal Finance business to the Non-Bank Group
- Trading assets of \$A17.5 billion as at 31 March 2019 increased 18% from \$A14.9 billion as at 31 March 2018 mainly due to an increase in long equity positions, partially offset by the sale of government bonds in CGM
- Loan assets of \$A73.8 billion as at 31 March 2019 increased 2% from \$A72.3 billion as at 31 March 2018 mainly due to net new loans written in BFS. This was partially offset by the sale of assets of CAF's Principal Finance and Transportation businesses to the Non-Bank Group
- Derivative assets of \$A14.1 billion as at 31 March 2019 increased 11% from \$A12.7 billion as at 31 March 2018 mainly due to mark to market movements and an increase in client trade volumes in energy products in CGM
- Margin money and settlement assets of \$A14.5 billion as at 31 March 2019 increased 6% from \$A13.7 billion as at 31 March 2018 mainly due to an increase in settlement balances with financial institutions in CGM.

- Debt issued of \$A33.6 billion as at 31 March 2019 decreased 19% from \$A41.5 billion as at 31 March 2018, mainly driven by Treasury's funding and liquidity management activities (including repayment of long term and short term debt), as well as repayments in BFS' securitisations
- Bank borrowings of \$A1.6 billion as at 31 March 2019 decreased 70% from \$A5.2 billion as at 31 March 2018 mainly due to the sale of CAF's Principal Finance and Transportation businesses to the Non-Bank Group
- Other liabilities of \$A3.0 billion as at 31 March 2019 decreased 32% from \$A4.5 billion as at 31 March 2018 primarily due to the sale of CAF's Principal Finance and Transportation businesses to the Non-Bank Group
- Cash collateral on securities lent and repurchase agreements of \$A4.2 billion as at 31 March 2019 decreased 22% from \$A5.4 billion as at 31 March 2018 mainly due to a reduction in stock lending trades in CGM
- Deposits of \$A56.1 billion as at 31 March 2019 increased 16% from \$A48.4 billion as at 31 March 2018 mainly due to an increase in business and retail deposits
- Due to related body corporate entities of \$A16.8 billion as at 31 March 2019 increased 20% from \$A14.0 billion as at 31 March 2018 mainly due to new Non-Bank debt issuances placed by MGL and other entities with MBL
- Margin money and settlement liabilities of \$A17.9 billion as at 31 March 2019 increased 8% from \$A16.6 billion as at 31 March 2018 mainly due to an increase in outstanding commodity trade settlements in CGM
- Derivative liabilities of \$A12.5 billion as at 31 March 2019 increased 6% from \$A11.8 billion as at 31 March 2018 mainly due to mark to market movements and an increase in client trade volumes in energy products in CGM.

Total equity	
AS AT	
31 Mar 19 \$Am	31 Mar 18 \$Am
11,240	13,103

↓ 14%
on prior year

- the decrease is primarily due to the return of \$A2.0 billion of capital to the parent entity Macquarie B.H Pty Ltd, as part of the sale of CAF's Principal Finance and Transportation businesses to the Non-Bank Group. This was partially offset by Retained earnings generated for the year ended 31 March 2019 (net of dividend paid).

4.5 years

The weighted average term to maturity of term funding maturing beyond one year as at 31 March 2019

Funding

Macquarie Bank's liquidity risk management framework is designed to ensure that it is able to meet its funding requirements as they fall due under a range of market conditions.

Macquarie Bank has diversity of funding by both source and maturity. The weighted average term to maturity of term funding maturing beyond one year (excluding equity which is a permanent source of funding, and securitisations) was 4.5 years as at 31 March 2019⁽¹⁾.

Term funding profile

Detail of drawn term funding maturing beyond one year

Macquarie Bank has a liability driven approach to balance sheet management, where funding is raised prior to assets being taken onto the balance sheet. Since 1 April 2018, Macquarie Bank has continued to raise term wholesale funding across various products and currencies.

Details of term funding raised between 1 April 2018 and 31 March 2019:

		Total \$Ab
Secured funding	Term securitisation	1.2
Issued paper	Senior and subordinated	0.5
Total		1.7

Macquarie Bank has continued to develop its major funding markets and products during the year ended 31 March 2019.

Capital

Under Basel III rules, APRA requires authorised deposit-taking institutions (ADIs) to have a minimum ratio of Tier 1 capital to risk-weighted assets of 8.5% including the 2.5% capital conservation buffer, with at least 7.0% in the form of Common Equity Tier 1 capital, per APRA ADI Prudential Standard 110⁽²⁾. In addition, APRA may impose ADI-specific minimum capital ratios which may be higher than these levels. The minimum Basel Committee on Banking Supervision (BCBS) Basel III leverage ratio requirement of 3% was effective from 1 January 2018⁽³⁾.

Macquarie Bank is well capitalised, with the following capital adequacy ratios as at 31 March 2019.

Macquarie Bank Basel III ratios as at 31 Mar 2019	Harmonised Basel III ⁽⁴⁾	APRA Basel III
Common Equity Tier 1 Capital Ratio	14.3%	11.4%
Tier 1 Capital Ratio	16.5%	13.5%
Leverage Ratio	6.0%	5.3%

For further information relating to the capital adequacy of Macquarie Bank, refer to section 6 Capital of the Management Discussion and Analysis available at macq.co/FY19MDA

Macquarie Bank's capital management strategy is outlined in Note 22 to the financial statements contained in the Financial Report.

- (1) Macquarie Income Securities of \$A0.4 billion are excluded as they do not have a maturity date.
- (2) Based on materiality, the countercyclical capital buffer (CCyB) of -10bps has not been included.
- (3) In November 2018, APRA released draft prudential standards on their implementation of a minimum requirement for the leverage ratio of 3.5% which is expected to be effective from January 2022.
- (4) 'Harmonised' Basel III estimates are calculated in accordance with the BCBS Basel III framework.

Operating and Financial Review

Our strategy

Our purpose

Macquarie Bank's purpose is to realise opportunity for the benefit of our clients, shareholders and people. We are in business to be profitable and to achieve an appropriate and resilient long-term return on capital. Ultimately though, it is the way we do business that defines Macquarie Bank.

What We Stand For

Opportunity, Accountability and Integrity. These long-held principles form the basis of Macquarie Bank's expectations of our staff and adherence to them is required under the *Code of Conduct*.

The balance between opportunity and accountability, while operating with integrity within a strong risk management framework, is a feature of Macquarie Bank's success and a key factor in our long record of unbroken profitability.

The *Code of Conduct* is available at macquarie.com/what-we-stand-for

Our business strategy

Consistent with our *What We Stand For* principles, Macquarie Bank's business strategy is focused on the medium-term with the following key aspects:

Risk management approach

Adopting a conservative approach to risk management underpinned by a sound risk culture. Macquarie Bank's robust risk management framework and risk culture is embedded across all Bank Group entities.

Strong balance sheet

Maintaining a strong and conservative balance sheet.

This is consistent with Macquarie Bank's longstanding policy of holding a level of capital which supports its business and managing its capital base ahead of ordinary business requirements. Macquarie Bank remains well funded, with diversified funding sources, including deposits.

We continue to pursue the strategy of diversifying funding sources by growing our deposit base and accessing different funding markets.

Business mix

Conducting a mix of annuity-style and markets-facing businesses that deliver solid returns in a range of market conditions.

Macquarie Bank has progressively developed its annuity-style businesses, providing steady returns to the business and our shareholders, and stability to clients.

Diversification

Operating a diversified set of businesses across different locations and service offerings: asset finance, lending, banking, and risk and capital solutions across debt, equity and commodities.

Macquarie Bank offers a range of services to government, institutional, corporate and retail clients. This diversity mitigates concentration risk and provides resilience to Macquarie Bank.

Proven expertise

Utilising proven deep expertise has allowed Macquarie Bank to establish leading market positions as a global specialist in sectors including resources and commodities, energy and financial institutions.

Adjacencies

Expanding progressively by pursuing adjacencies through organic opportunities and selective acquisitions.

These include products and geographies adjacent to our established areas of expertise. This results in sustainable evolutionary growth.

Pursuit of growth opportunities

Targeting continued evolution and growth through innovation. We start with knowledge and skill, and we encourage ingenuity and entrepreneurial spirit coupled with accountability.

Ideas for new businesses are typically generated in the Operating Groups. Additionally, there are no specific businesses, markets or regions in which our strategy dictates that we operate. This means that we retain operational flexibility and can adapt the portfolio mix to changing market conditions within the boundaries of the Risk Appetite Statement (RAS) approved by the Board.

Risk management

Macquarie Bank recognises that a sound risk culture is a fundamental requirement of an effective risk management framework. Macquarie Bank's risk culture is well established and the risk management framework is embedded across all operations.

The long-held foundations of Macquarie Bank's risk culture are the principles of *What We Stand For*:

Opportunity

We seek to identify opportunity and realise it for our clients, community, shareholders and our people.

Accountability

We are accountable for all our actions, to our clients, our community, our shareholders and each other.

Integrity

We earn the trust of our clients, colleagues, community and shareholders through the quality of our work and our high ethical standards.

Staff are made aware that these principles must form the basis of all behaviours and actions.

The acceptance of risk is an integral part of Macquarie Bank's businesses. Strong independent prudential management has been a key to Macquarie Bank's success and stability over many years.

The assumption of risk is made within a calculated and controlled framework that assigns clear risk roles and responsibilities.

Refer to the Risk Management Report in the MGL Annual Report for details on Macquarie Group's risk management framework, risk culture and conduct risk management, which apply to all Macquarie Group businesses including the Bank Group entities.

Macroeconomic factors

The key macroeconomic factors that impact Macquarie Bank are:

Market conditions

The general condition of markets, driven by both macroeconomic factors and geopolitical factors, as well as global regulatory trends may have a bearing on a range of Macquarie Bank's businesses. Changing market conditions, which may be impacted by these factors may influence the volume of transactions across businesses (for example increasing volatility can influence the volume of client-driven hedging activity), and the value of various equity, credit and market risk exposures held by Macquarie Bank on its balance sheet. In the event of a deterioration in global equity markets, performance fees in the asset management business may be adversely impacted.

The value of the Australian dollar

A significant proportion of Macquarie Bank's net income is denominated in foreign currency. Therefore, net income will be lower in Australian dollar terms if the Australian dollar appreciates against other foreign currencies, and net income will be higher in Australian dollar terms if the Australian dollar depreciates against other foreign currencies.

Potential regulatory changes

Macquarie Bank is affected by changes in regulation. Regulatory change continues to increase at both the global and Australian levels and has the potential to affect the regulatory capital and funding requirements and profitability of Macquarie Bank's businesses.

Funding and liquidity

Macquarie Bank uses deposits and debt markets, among other funding sources, to fund its assets. Macquarie Bank is therefore exposed to the risk of an increase in the cost of funding, or of reduced access to funding sources.

In addition, there are specific risks which relate to the nature of Macquarie Bank's operations. These include conduct, reputation, environmental and social (including climate change), credit, equity, market, liquidity, operational, cyber and information security, regulatory and compliance, legal and tax risks. All of these risks, including those mentioned above are monitored, mitigated and managed under Macquarie Bank's risk management framework.

Further details on the management of these risks are available at [macquarie.com/risk-management](https://www.macquarie.com/risk-management)

Operating and Financial Review

Our strategy continued

The risk management framework has been established on the premise that a disciplined approach to risk management is best maintained with a single risk management framework located within Macquarie Group that applies to all Macquarie businesses (including Bank Group entities). The framework is supported by a Macquarie-wide approach to policies and procedures. Macquarie Bank adopts policies, procedures and risk limits in accordance with the risk profile of each Bank Group entity.

The Risk Management Group (RMG) consistently adopts the same level of rigour in relation to risk acceptance, monitoring and reporting for all Macquarie entities.

The core risk management principles underlying the framework have remained stable and continue to be effective.

– **Ownership of risk at the business level:**

Group Heads are responsible for ownership of material risks that arise in, or because of, the business' operations, including identification, measurement, control and mitigation of these risks. Before taking decisions, clear analysis of the risks is sought to ensure those taken are consistent with the risk appetite and strategy of the Bank Group entities.

– **Understanding worst case outcomes:**

Macquarie Bank's risk management approach is based on examining the consequences of worst case outcomes and determining whether these are acceptable and within Macquarie Bank's risk appetite. This approach is adopted for all material risk types and is often achieved by stress testing. Macquarie Bank operates a number of sophisticated quantitative risk management processes, but the foundation of the approach is the informed consideration of both quantitative and qualitative inputs by highly experienced professionals.

– **Requirement for an independent sign-off by RMG:**

Macquarie Bank places significant importance on having a strong, independent RMG charged with signing off all material risk acceptance decisions. It is essential that RMG has the capability to do this effectively. RMG has invested in recruiting skilled professionals, including those with trading or investment banking experience. The approval document submitted to Senior Management must include independent input from RMG on risk and return.

Directors' Report

Shelley Street, Sydney

Australian consumers have continually sought advancements in the delivery of banking and financial services. From introducing the first Cash Management Trust in 1980 to launching Australia's first open banking platform, Macquarie has a long history of introducing innovative products to the Australian market, improving competition and increasing efficiencies for its customers.

Directors' Report

For the financial year ended 31 March 2019

The Directors of MBL submit their report with the financial report of the Consolidated Entity and the Company for the year ended 31 March 2019.

Directors

At the date of this report, the Directors of MBL are:

Independent Directors

P.H. Warne, Chairman

G.R. Banks AO

J.R. Broadbent AC

G.M. Cairns

P.M. Coffey

M.J. Coleman

D.J. Grady AM

M.J. Hawker AM

G.R. Stevens AC

N.M. Wakefield Evans

Executive Voting Directors

M.J. Reemst, Managing Director and Chief Executive Officer (CEO)

S.R. Wikramanayake

Other than Ms Wikramanayake, Mr Coffey and Ms Broadbent, the Directors listed above each held office as a Director of MBL throughout the financial year ended 31 March 2019. Ms Wikramanayake and Mr Coffey joined the Board of Directors effective from 28 August 2018. Ms Broadbent joined the Board of Directors effective from 5 November 2018.

Those Directors listed as Independent Directors have been independent throughout the period of their appointment.

Mrs P.A. Cross retired as an Independent Director on 26 July 2018.

Mr N.W. Moore retired as an Executive Voting Director on 30 November 2018.

Details of the qualifications, experience and special responsibilities of the Directors and qualifications and experience of the Company Secretaries at the date of this report are set out on pages 18 to 24 of this report.

Principal activities

The principal activity of MBL during the financial year ended 31 March 2019 was to act as a full service financial services provider offering a range of commercial banking and retail financial services in Australia and selected financial services offshore. MBL is a subsidiary of MGL and is regulated by the APRA as an authorised deposit-taking institution (ADI). In the opinion of the Directors, other than the transfer of CAF's transportation finance businesses from the Bank Group to the Non-Bank Group on 10 December 2018 (see Note 3 *Segment reporting*, Financial Report), there were no significant changes to the principal activities of the Consolidated Entity during the financial year under review that are not otherwise disclosed in this report.

Result

The financial report for the financial years ended 31 March 2019 and 31 March 2018, and the results have been prepared in accordance with Australian Accounting Standards.

The consolidated profit after income tax attributable to the ordinary equity holders for the financial year ended 31 March 2019 was \$A2,022 million (2018: \$A1,568 million). This result represents profit from continuing operations of \$A1,066 million (2018: \$A1,023 million) and profit from discontinued operations of \$A956 million (2018: \$A545 million).

Dividends and distributions

MBL paid dividends and paid or provided distributions during the financial year as set out in the table below:

Security	Payment Date	Payment Type	\$Am	In respect of financial year ended/period	Paid/provided
Ordinary Shares	16 May 2018	Periodic	924	31 March 2018	Paid
	10 December 2018	Periodic	264	31 March 2019	Paid
Macquarie Income Securities (MIS) ⁽¹⁾	16 April 2018	Periodic	3.4	15 January 2018 to 14 April 2018	Paid
	16 July 2018	Periodic	3.8	15 April 2018 to 14 July 2018	Paid
	15 October 2018	Periodic	3.8	15 July 2018 to 14 October 2018	Paid
	15 January 2019	Periodic	3.7	15 October 2018 to 14 January 2019	Paid
	15 April 2019	Periodic	3.1	15 January 2019 to 31 March 2019	Provided

(1) MIS are stapled securities comprising an interest in a note, being an unsecured debt obligation of Macquarie Finance Limited (MFL), issued to a trustee on behalf of the holders of the MIS (MFL note), and a preference share in MBL. The MIS are quoted on the ASX. The MIS distributions set out above represent payment as made, or to be made, by MBL to its members. The MIS are classified as equity under Australian Accounting Standards – see Note 24 and Note 25 to the financial statements in the Financial Report for further information on the MIS and MIS distributions.

On 31 March 2019 the Directors declared a final ordinary dividend of \$A560 million for the year ended 31 March 2019 which was paid on 5 April 2019.

No other dividends or distributions were declared or paid during the financial year.

State of affairs

There were no other significant changes in the state of affairs of the Consolidated Entity that occurred during the financial year under review that are not otherwise disclosed in this report.

Operating and financial review

Please refer to Section 1 of this Annual Report for the following in respect of the Consolidated Entity, which includes:

- a review of the operations during the year and the results of those operations
- comments on the financial position
- comments on business strategies and prospects for future financial years.

In respect of likely developments, business strategies and prospects for future financial years, material which if included would be likely to result in unreasonable prejudice to the Consolidated Entity, has been omitted.

Directors' Report

For the financial year ended 31 March 2019 continued

Directors' relevant interests

At the date of this report, none of the Directors held a relevant interest, as required to be notified by the Directors to the Australian Securities Exchange (ASX) in accordance with the *Corporations Act 2001* (Cth) (the Act), in ordinary shares or share options of MBL. The relevant interests of Directors in MBL securities, managed investment schemes made available by related companies of MBL and other disclosable relevant interests are listed in the table below:

Name and position	Direct and indirect interests	Number held

Meeting attendance

Board and Board Committee meetings and attendance

The number of meetings of the Board of Directors (the Board) and of the Committees of the Board and the individual attendance by Directors at those meetings which they were eligible to attend, during the financial year, is summarised in the table below:

	Regular Board Meetings ⁽¹⁾	BAC meetings ⁽¹⁾	BRiC meetings ⁽¹⁾	Special Board Meetings ⁽¹⁾
Number of Meetings	10	8	5	1
P.H. Warne	10/10	–	5/5	1/1
M.J. Reemst	10/10	–	–	1/1
S.R. Wikramanayake ⁽²⁾	7/7	–	–	1/1
N.W. Moore ⁽³⁾	6/6	–	–	1/1
G.R. Banks	9/10	–	5/5	1/1
J.R. Broadbent ⁽⁴⁾	4/4	–	3/3	1/1
G.M. Cairns	10/10	–	5/5	1/1
P.M. Coffey ⁽⁵⁾	6/7	–	3/4	1/1
M.J. Coleman	10/10	8/8	5/5	1/1
P.A. Cross ⁽⁶⁾	2/3	1/2	0/1	–
D.J. Grady	10/10	–	5/5	1/1
M.J. Hawker	10/10	8/8	5/5	1/1
G.R. Stevens ⁽⁷⁾	8/8	4/4	3/3	1/1
N.M. Wakefield Evans	10/10	8/8	5/5	1/1

(1) Number of meetings attended by the member/total number of meetings eligible to attend as a member.

(2) Ms Wikramanayake was appointed to the Board as an Executive Voting Director effective from 28 August 2018.

(3) Mr Moore retired from the Board as an Executive Voting Director effective 30 November 2018.

(4) Ms Broadbent was appointed to the Board as an Independent Voting Director, and as a member of the Board Risk Committee, effective from 5 November 2018.

(5) Mr Coffey was appointed to the Board as an Independent Voting Director, and as a member of the Board Risk Committee, effective from 28 August 2018.

(6) Mrs Cross retired from the Board as an Independent Voting Director effective 26 July 2018.

(7) Mr Stevens was appointed as a member of the Board Audit Committee effective from 1 July 2018. The Board approved a leave of absence, due to illness, for Mr Stevens for the period 1 February 2019 to 31 May 2019.

The Board Audit Committee (BAC) is a joint committee of MGL and MBL. The BAC assists the Boards of MGL and MBL in fulfilling the Boards' responsibility for oversight of the quality and integrity of the accounting, auditing and financial reporting practices of Macquarie Group.

The Board Risk Committee (BRiC) is a joint committee of MGL and MBL. The membership of the Committee consists of all the Non-Executive Voting Directors (NEDs) of MGL and MBL. The BRiC assists the Boards of MGL and MBL by providing oversight of the implementation and operation of Macquarie Group's risk management framework and advising the Boards on Macquarie Group's risk position, risk appetite, risk culture and risk management strategy.

There was one Board sub-committee convened during the period, with two meetings held. Both meetings were attended by all the eligible sub-committee members, being Mr Warne, Mr Moore, Ms Reemst, Mr Coleman and the Chief Financial Officer, Mr Harvey.

All Board members are sent Board Committee meeting agendas and may attend any meeting.

The Chairman of the Board, Macquarie Group CEO and the Macquarie Bank CEO, attend BAC meetings by invitation as a matter of course. The Macquarie Group CEO and Macquarie Bank CEO attend BRiC meetings as a matter of course.

Directors' Report

For the financial year ended 31 March 2019 continued

Directors' and officers' indemnification and insurance

Under MBL's Constitution, MBL indemnifies all past and present directors and secretaries of MBL and its wholly-owned subsidiaries (including at this time the Directors named in this report and the Secretaries) certain liabilities and costs incurred by them in their respective capacities.

The indemnity covers the following liabilities and legal costs (subject to the exclusions described as follows):

- every liability incurred by the person in their respective capacity
- all legal costs incurred in defending or resisting (or otherwise in connection with) proceedings in which the person becomes involved because of their respective capacity
- legal costs incurred by the person in good faith in obtaining legal advice on issues relevant to the performance and discharge of their duties as an officer of MBL or its wholly-owned subsidiaries, if that has been approved in accordance with MBL policy.

The indemnity does not apply to the extent that:

- MBL is forbidden by law to indemnify the person against the liability or legal costs, or
- an indemnity by MBL of the person against the liability or legal costs would, if given, be made void by law.

MBL has also entered into a Deed of Access, Indemnity, Insurance and Disclosure (as amended from time to time) (Deed) with each of the Directors.

Under the Deed, MBL, *inter alia*, agrees to:

- indemnify the Director upon terms broadly consistent with the indemnity contained in MBL's Constitution
- take out and maintain an insurance policy (or procure that an insurance policy is taken out and maintained) against liabilities incurred by the Director acting as an officer of MBL or its wholly owned subsidiaries. The insurance policy must be for an amount and on terms and conditions appropriate for a reasonably prudent company in MBL's position. Insurance must be maintained for seven years after the Director ceases to be a Director or until any proceedings commenced during that period have been finally resolved (including any appeal proceedings)
- grant access to Directors to all relevant company papers (including Board papers and other documents) for seven years after the Director ceases to be a Director or until any proceedings commenced during that period have been finally resolved (including any appeal proceedings).

In addition, MGL made an Indemnity and Insurance Deed Poll on 12 September 2007 (Deed Poll). The benefit of the undertakings made by MGL under the Deed Poll have been given to each of the directors, secretaries, persons involved in the management and certain other persons, of MGL and its wholly-owned subsidiaries (which includes MBL) and other companies where the person is acting as such at the specific request of MGL and its wholly-owned subsidiaries. The Deed Poll provides for broadly the same indemnity and insurance arrangements for those persons with the benefit of the Deed Poll as for the Deed described above.

However, the Deed Poll does not provide for access to company documents. The Deed Poll largely supersedes previous deed polls which were provided by MBL which were on similar terms. Certain directors and secretaries still have the benefit of the previous deed polls.

A Directors' and Officers' insurance policy, taken out by Macquarie Group, is in place that provides cover for each person in favour of whom such insurance is required to be taken out under the Deed and the Deed Poll and for MBL in indemnifying such persons pursuant to the Deed and the Deed Poll. Relevant individuals pay the premium attributable to the direct coverage under the policy and Macquarie Group pays the premium attributable to the reimbursement coverage under the policy. The Directors' and Officers' insurance policy prohibits disclosure of the premium payable under the policy and the nature of the liabilities insured.

Environmental regulations

MBL and its subsidiaries have policies and procedures in place that are designed to ensure that, where operations are subject to any particular and significant environmental regulation under a law of the Commonwealth or of a State or Territory, those obligations are identified, appropriately addressed and material breaches notified.

The Directors have determined that there has not been any material breach of those obligations during the financial year.

Non-audit services

Fees paid or payable to the auditor of the Consolidated Entity, PricewaterhouseCoopers (PwC), for non-audit services during the period ended 31 March 2019 total \$A4.6 million (2018: \$A5.5 million). Further details of amounts paid or payable to PwC and its related practices are disclosed in Note 39 *Audit and other services provided by PwC* in the Financial Report.

The Directors are satisfied that the provision of non-audit services did not compromise the auditor independence requirements of the Act for the following reasons:

- The operation of the Consolidated Entity's Auditor Independence Policy, restricts the external auditor from providing non-audit services under which the auditor assumes the role of management, becomes an advocate for the Consolidated Entity, audits its own professional expertise, or creates a mutual or conflicting interest between the auditor and the Consolidated Entity. The policy also provides that significant permissible non-audit assignments awarded to the external auditor must be approved in advance by the BAC or the BAC Chairman, as appropriate.
- The BAC has reviewed a summary of non-audit services provided by PwC, including details of the amount paid or payable to PwC for non-audit services, and has provided written advice to the Board of Directors.

Consistent with the advice of the BAC, the Directors are satisfied that the provision of non-audit services during the year by the auditor and its related practices is compatible with the general standard of independence for auditors imposed by the Act.

Rounding of amounts

In accordance with *ASIC Corporations (Rounding in Financial/ Directors' Reports) Instrument 2016/191*, amounts in the Directors' Report and Financial Report have been rounded off to the nearest million Australian dollars unless otherwise indicated.

This report is made in accordance with a resolution of the Directors.

Events subsequent to balance date

At the date of this report, the Directors are not aware of any matter or circumstance that has arisen that has significantly affected or may significantly affect the operations of the Consolidated Entity, the results of those operations or the state of affairs of the Consolidated Entity in the financial years subsequent to 31 March 2019.

Peter Warne
Independent Director and Chairman

Mary Reemst
Managing Director and Chief Executive Officer

Sydney
3 May 2019

Auditor's independence declaration

As lead auditor for the audit of Macquarie Bank Limited for the year ended 31 March 2019, I declare that to the best of my knowledge and belief, there have been:

- a) no contraventions of the auditor independence requirements of the *Corporations Act 2001* (Cth) in relation to the audit; and
- b) no contraventions of any applicable code of professional conduct in relation to the audit.

This declaration is in respect of Macquarie Bank Limited and the entities it controlled during the period.

Directors' experience and special responsibilities

Peter H Warne
BA (Macquarie), FAICD

Independent Chairman of MGL and MBL since April 2016

Independent Voting Director of MBL since July 2007

Independent Voting Director of MGL since August 2007

Mr Warne is a member of the BRiC

Experience

Peter Warne has extensive knowledge of, and experience in, financial services and investment banking, through a number of senior roles at Bankers Trust Australia Limited, including as Head of its global Financial Markets Group from 1988 to 1999. Mr Warne was a Director of the Sydney Futures Exchange (SFE) from 1990 to 1999, then from 2000 to 2006. He served as Deputy Chairman of the SFE from 1995 to 1999. When the SFE merged with the Australian Securities Exchange (ASX) in July 2006, he became a Director of ASX Limited. Mr Warne has previously served as Chairman of ALE Property Group from 2003 to 2017 and OzForex Group Limited (now trading as OFX Limited) from 2013 to 2016, and as Deputy Chairman of Crowe Horwath Australasia Limited from 2008 to 2015.

Listed Company directorships (last three years)

- Chairman, ALE Property Group (September 2003–May 2017)
- Director, ASX Limited (since July 2006)
- Chairman, OzForex Group Limited (now trading as OFX Limited) (September 2013–November 2016)

Other current directorships/ appointments

- Interim Chairman, New South Wales Treasury Corporation
- Member, Macquarie University Faculty of Business and Economics Industry Advisory Board
- Member, ASIC Director Advisory Panel
- Board member, Allens

Age: 63

Mr Warne is a resident of New South Wales.

Mary J Reemst
BA (Macquarie), Dip Fin Mgt (Accountancy) (UNE), MAICD

Managing Director and Chief Executive Officer of MBL since July 2014

Executive Voting Director of MBL since July 2014

Experience

Mary Reemst joined Macquarie Group in 1999, having held senior investment banking roles at Bankers Trust Australia.

Ms Reemst was Head of Credit in the Risk Management Group for 11 years, with oversight of Macquarie Group's wholesale and retail exposures, including lending, trading activities, equity investments and new products.

Other current directorships/ appointments

- Chair, Macquarie Group Foundation
- Director, Australian Bankers' Association
- Director, Financial Markets Foundation for Children
- Director, Australian Financial Markets Association
- Board member, Asylum Seekers Centre Incorporated
- Board member, Sisters of Charity Foundation
- Member, UNE Senior Advisory Board

Age: 61

Ms Reemst is a resident of New South Wales.

Shemara R Wikramanayake
BCom LLB (UNSW)

Managing Director and Chief Executive Officer of MGL since December 2018

Executive Voting Director of MBL and MGL since August 2018

Experience

In her time with the Macquarie Group, Shemara Wikramanayake has worked in nine cities in six countries and across several business lines, establishing and leading corporate advisory offices in New Zealand, Hong Kong and Malaysia, and the infrastructure funds management business in the US and Canada.

She joined Macquarie Bank in 1987 and was instrumental in establishing Macquarie Capital which at the time included: advisory; infrastructure funds; corporate leasing and lending; and cash equities.

Ms Wikramanayake was most recently the Head of Macquarie Asset Management, a role she held from 2008 to 2018. Macquarie Asset Management offers a diverse range of services including infrastructure and real asset management; securities investment management; and fund and equity-based investment solutions.

Before joining Macquarie Bank, she worked as a corporate lawyer at Blake Dawson Waldron in Sydney.

Other current directorships/ appointments

- Commissioner, Global Commission on Adaptation
- Member, Climate Finance Leadership Initiative

Age: 57

Ms Wikramanayake is a resident of New South Wales.

Gary R Banks AO
BEC (Hons) (Monash), MEd (ANU)

Independent Voting Director of MBL and MGL since August 2013

Mr Banks is a member of the BRiC

Experience

Gary Banks has extensive experience across economics, public policy and regulation in Australia and internationally. He was Chairman of the Australian Productivity Commission from its inception in 1998 until 2012 and subsequently Chief Executive of the Australia and New Zealand School of Government.

He has also held senior roles with the GATT Secretariat in Geneva, the Trade Policy Research Centre in London, the Centre for International Economics in Canberra and consulted to the World Bank, Organisation for Economic Co-operation and Development (OECD) and World Trade Organisation.

Other current directorships/ appointments

- Chairperson, Australian Statistics Advisory Council
- Chairman, Regulatory Policy Committee of the OECD
- Professorial Fellow and Member of Advisory Board, Melbourne Institute, University of Melbourne
- Senior Fellow, Centre for Independent Studies
- Member, NSW Government's Economic Development Advisory Panel

Age: 69

Mr Banks is a resident of Victoria.

Assistant Company Secretary since January 2014

Experience

Ida Lawrance is a Division Director of Macquarie and has over 20 years legal and governance experience. Prior to joining Macquarie in March 2006, Ms Lawrance practiced as a lawyer in both the private and public sectors.

Remuneration Report

Introduction

Macquarie Bank is a subsidiary of Macquarie Group Limited. Whilst subject to the remuneration framework determined by the Macquarie Group, the Board considers remuneration recommendations relating to the senior executives of Macquarie Bank. Throughout this Remuneration Report, for consistency, references are made to the Macquarie Group's remuneration arrangements rather than Macquarie Bank's remuneration arrangements.

Remuneration framework

This section explains the objectives and principles of our remuneration framework.

Macquarie Group's longstanding and consistent approach to remuneration continues to support the overarching objective of delivering strong company performance over the short and long-term, while prudently managing risk and reinforcing the *Code of Conduct* and *What We Stand For*. The Macquarie Group Board recognises that to achieve this objective, we must attract, motivate and retain exceptional people while aligning their interests with those of our clients and shareholders. This broad approach has been in place since the Macquarie Group's inception, evolving over time to ensure the system continues to meet its overall objectives.

The Macquarie Group's remuneration approach has been a key driver of our sustained success as an international organisation. Staff are motivated to grow businesses over the medium to long-term, to be accountable for all decisions and their accompanying risk management, customer, economic and reputational consequences.

This approach has been fundamental in attracting, motivating and retaining exceptional, entrepreneurial and ethical people. We hire world-class people in 30 highly competitive markets. These people come from and compete in various industry sectors such as hedge funds, private equity firms, global investment banks, fund managers, advisory boutiques, commodity houses and other banks. For this reason, we use an international reference group for peer comparison.

An overview of the remuneration framework is set out below.

Overall remuneration objectives and principles

STRONG COMPANY PERFORMANCE OVER THE SHORT AND LONG-TERM

Align interests of staff, shareholders and customers

Attract, motivate and retain high quality, ethical people

The Board considers this is best achieved by supporting the following principles:

- emphasising performance-based remuneration taking into consideration an individual's overall contribution to the Macquarie Group
- determining variable remuneration as a share of profits (not a short-term bonus) creating a true partnership between staff and shareholders to deliver sustained results for our customers and clients
- driving behaviours which reflect Macquarie's risk culture by motivating staff to be accountable for all decisions within the business and their accompanying risk management, customer, economic and reputational consequences
- delivering remuneration in a way that provides significant long-term alignment with shareholders
- remunerating high-performing staff appropriately, relative to global peers, so they are attracted to and stay with the Macquarie Group
- providing consistent arrangements over time to give staff the confidence to pursue multi-year initiatives.

CREATING A LONG-TERM FOCUS

Remuneration Report

Continued

Remuneration structure

This section describes the way in which remuneration is structured and delivered.

Macquarie Group's remuneration framework works as an integrated whole. An individual's remuneration comprises fixed remuneration, profit share and, for Executive Committee members (our Executive KMP), Performance Share Units (PSUs). The table below provides an overview of these components.

Fixed remuneration	
Fixed	<ul style="list-style-type: none">– for Executive KMP, is a low proportion of total remuneration relative to the industry but sufficient to avoid inappropriate risk-taking– for risk and financial control staff, generally a higher proportion of total remuneration than for front office staff.
Performance-Based Remuneration	
Profit share	<ul style="list-style-type: none">– all permanent employees are eligible to participate– significant portion of profit share is retained (80% for the MGL CEO) with a long deferral period (three to seven years for Executive Committee members)– retained profit share is delivered in a combination of MGL equity and Macquarie-managed fund equity to strengthen alignment with future performance– Malus provisions apply to certain senior employees– retained profit share is subject to forfeiture upon leaving the Macquarie Group except in limited circumstances (such as retirement from the Macquarie Group, redundancy, death, serious incapacitation, disability, serious ill-health or other limited exceptional circumstances).
PSUs	<ul style="list-style-type: none">– are only awarded to Executive Committee members to drive company-wide performance– are a meaningful incentive but not the major element of total remuneration– vesting of PSUs is subject to achievement of performance hurdles measured equally against ROE relative to an international reference group (50%) and absolute EPS growth (50%)<ul style="list-style-type: none">– PSU awards vest in two equal tranches after three and four years⁽¹⁾– no retesting of hurdles– an international reference group recognises the extent of the Macquarie Group's diversification and internationalisation– Malus provisions apply– unvested PSUs are subject to forfeiture upon leaving the Macquarie Group except in limited circumstances (such as retirement from the Macquarie Group, redundancy, death, serious incapacitation, disability, serious ill-health or other limited exceptional circumstances).

The MGL Board has discretion to change remuneration arrangements on an annual basis to meet changing market conditions as well as to comply with regulatory and corporate governance developments.

Retained profit share: retention and vesting

Macquarie Group retains a percentage of certain individuals' annual profit share allocation (retained profit share) which is invested in a combination of MGL ordinary shares under the Macquarie Group Employee Retained Equity Plan (MEREP) and Macquarie-managed fund equity notionally invested under the Directors' Profit Share (DPS) Plan⁽²⁾. During the course of their employment, an individual's retained profit share vests and is released over a period that reflects the scope and nature of their role and responsibilities. Retention and vesting arrangements are determined by the Board Remuneration Committee (BRC), according to prevailing market conditions, having regard to regulatory and remuneration trends. For each year's allocation, once the vesting period has been determined it remains fixed for that allocation.

- (1) The Banking Executive Accountability Regime (BEAR) will apply to Macquarie Bank from 1 July 2019. To ensure full compliance by this date, the vesting period of PSUs awarded from FY2020 will be extended to four years, subject to performance hurdles.
- (2) Both the MEREP and DPS Plan are fundamental tools in the Macquarie Group's retention, alignment and risk management strategies, encompassing both long-term retention arrangements and equity holding requirements. The MEREP has a flexible plan structure that offers different types of equity grants depending on the jurisdiction in which the participating employees are based. In most cases, the equity grants are in the form of units comprising a beneficial interest in Macquarie ordinary shares held in a trust for the staff member (Restricted Share Units or RSUs). For further details on the MEREP, refer to Note 29 to the financial statements in the Financial Report. The DPS Plan comprises exposure to a notional portfolio of Macquarie-managed funds. Retained amounts are notionally invested over the retention period. This investment is described as 'notional' because Executive Directors do not directly hold securities in relation to this investment.

The following table summarises the standard retention and vesting arrangements applicable for FY2019.

FY2019 Standard profit share arrangements – retention levels, investment of retained profit share and vesting periods

Role	Available profit share (%) ⁽³⁾	Profit share retention (%)	Retained profit share investment		Vesting and release of profit share
			MEREP (MGL ordinary shares) %	DPS Plan (Macquarie-managed fund equity) %	
CEO Macquarie Group ⁽⁴⁾	20	80	90	10	One-fifth in each of years 3–7
CEO Macquarie Bank	40	60	90	10	
Executive Committee members with Funds responsibilities ⁽⁵⁾	30	70	50	50	
Other Executive Committee members	40	60	80–90	10–20	
Designated Executive Directors ⁽⁶⁾	40–50	50–60	80–90	10–20	
Other Executive Directors	40–60	40–60	80–90	10–20	One-third in each of years 3–5
Executive Directors with Funds responsibilities	40–60	40–60	25–50	50–75	As above
Staff other than Executive Directors	40–75	25–60 ⁽⁷⁾	100 ⁽⁸⁾	0 ⁽⁸⁾	One-third in each of years 2–4

The MGL Board's discretion to change remuneration arrangements, as noted above, includes changes to profit share retention levels provided that the retention percentage is at least 30% for Executive Directors.

In addition to the arrangements set out in the table above, different arrangements may apply in certain circumstances:

- retention rates, vesting and release schedules may vary for certain groups of staff who have become employees as a result of an acquisition, or for staff in certain jurisdictions, for example the European Union (EU), to ensure compliance with local regulatory requirements
- in limited circumstances, retained profit share may be allocated under arrangements other than the DPS Plan or the MEREP. For example, this may include investment in funds or products of a specific business group where there is a need to directly align the interests of staff with those of their clients.

Forfeiture of retained profit share – Malus Events

Since 2012, the Board or its delegate has had the ability to reduce or eliminate unvested profit share for certain senior employees in certain circumstances (Malus).

The current Malus provisions provide the Board or its delegate with the ability to reduce or eliminate in full, the unvested profit share awarded in respect of FY2015 onwards to certain senior employees if it determined that the individual has at any time:

- acted dishonestly (including, but not limited to, misappropriating funds or deliberately concealing a transaction)
- acted or failed to act in a way that contributed to a breach of a significant legal or significant regulatory requirement relevant to the Macquarie Group
- acted or failed to act in a way that contributed to MGL, Macquarie Bank or any Operating Group within the Macquarie Group incurring:
 - significant reputational harm
 - a significant unexpected financial loss, impairment charge, cost or provision
 - acted or failed to act in a way that contributed to MGL or Macquarie Bank making a material financial misstatement.

Each of the above is a Malus Event.

Additional provisions may apply to staff in certain jurisdictions to ensure compliance with local regulations. This includes, for example, staff in the European Union (EU) who are required to comply with local regulatory requirements. These individuals are subject to additional Malus and clawback provisions under EU regulations.

(3) Available profit share is delivered in cash.

(4) The current MGL CEO is subject to these arrangements from 1 December 2018.

(5) During FY2019, the current MGL CEO was subject to these arrangements from 1 April 2018 to 30 November 2018, being the period that she was Head of MAM.

(6) Executive Directors who have a significant management or risk responsibility in the organisation.

(7) Above certain monetary thresholds.

(8) For staff other than Executive Directors, retained profit share is generally invested in Macquarie Group equity with the exception of those staff with funds responsibilities where retained profit share is invested in a combination of Macquarie Group equity and Macquarie-managed fund equity.

Remuneration Report

Continued

Macquarie has always had and continues to have, the ability to terminate staff where a Malus Event has occurred, at which time any unvested profit share would be forfeited in full. The BRC considers whether, and the extent to which, to apply Malus, taking into account local employment laws, the nature and circumstances of the event and any other redress that has been or may be applied.

Early vesting and release of retained profit share

An Executive Director's unvested retained profit share is only paid out on termination of employment in the case of retirement from the Macquarie Group, redundancy, death, serious incapacitation, disability, serious ill-health or other limited exceptional circumstances. The Board has discretion to accelerate the vesting of retained profit share under these circumstances (subject to the conditions of early release as set out below).

Discretion may be exercised in certain other limited exceptional circumstances on the grounds of business efficacy, in relation to strategic business objectives, including in connection with the divestment or internalisation of Macquarie Group businesses, or when an employee resigns to fulfil a public service role in a governmental organisation or agency. Where such discretion is exercised, the Board may impose such other conditions as it considers appropriate.

This year such discretion has been exercised and retained profit share was released for one executive due to the transfer of their employment to an asset owned or managed by the Macquarie Group.

Conditions of early release to departing Executive Directors – Post Employment Events

In addition to the Malus provisions set out above, where discretion has been exercised to accelerate the vesting of the retained profit share of any departing Executive Director, the Board may reduce or eliminate in full their retained profit share, if it determines that the Executive Director has at any time during their employment or the relevant release periods after their employment committed a Malus Event (as described on page 27) or:

- (a) taken staff to a competitor of the Macquarie Group or been instrumental in causing staff to go to a competitor, or
- (b) joined a competitor of the Macquarie Group or otherwise participated in a business that competes with the Macquarie Group.

Each of the above is a Post Employment Event.

In the case of death or serious incapacitation, the Board will typically accelerate the vesting of retained profit share and immediately release it to the Executive Director, or to the Executive Director's legal personal representative. In other circumstances, the release will occur over the period from six months to two years after the Executive Director leaves, in accordance with the following table:

	First Period	Second Period	Third Period
Time post-departure	Six months	Six months to one year	One year to two years
Unvested retained profit share released	From all but the last two years of employment	From the second year prior to the end of employment	From the year prior to the end of employment
Subject to	No Malus Event as set out on the previous page or Post Employment Event as set out above	No Malus Event or Post Employment Event during the First Period, and	No Malus Event or Post Employment Event during the First Period, and
		No Malus Event or Post Employment Event a) above during Second Period	No Malus Event or Post Employment Event a) during the Second Period, and
			No Malus Event during the Third Period
Where the release is by reason of retirement from Macquarie	As above	As above and in addition, the release is subject to no Post Employment Event b) during the Second Period	As above and in addition, the release is subject to no Post Employment Event b) during the Second and/or Third Period

Where an Executive Director has a tax liability on termination of employment in respect of any unvested retained profit share, the Board has discretion to release unvested retained profit share up to an amount equal to the Executive Director's tax liability at an earlier time than noted above.

Performance Share Units (PSUs)

Executive Committee members are the only group of staff eligible to receive PSUs, which are subject to forward-looking performance hurdles and determined with reference to the Macquarie Group's performance as a whole. As such, they provide an additional incentive to Executive Committee members to drive company-wide performance over the long-term and beyond their business group responsibilities. PSU awards are a meaningful incentive but are generally not the major element of an Executive Committee member's total remuneration.

Since their introduction, PSUs have been structured as DSUs⁽⁹⁾ with performance hurdles. Holders have no right to dividend equivalent payments. There is no exercise price for PSUs.

The PSU hurdles are periodically reviewed by the BRC to ensure they continue to align the interests of staff and shareholders and provide a challenging but meaningful incentive to Executive Committee members. The BRC considers historical and forecast market data, the views of corporate governance bodies, shareholders and regulators as well as market practice. No change has been made to the hurdles for FY2019.

The following summarises the key terms of PSUs and the performance hurdles:

	EPS CAGR hurdle	ROE hurdle
Application	50% of PSU award	50% of PSU award
Performance measure	Compound annual growth rate (CAGR) in EPS over the vesting period (three to four years)	Average annual ROE over the vesting period (three to four years) relative to a reference group of global financial institutions ⁽¹⁰⁾
Hurdle	Sliding scale applies: <ul style="list-style-type: none"> – 50% becoming exercisable at EPS CAGR of 7.5% – 100% at EPS CAGR of 12% For example, if EPS CAGR was 9.75%, 75% of the relevant awards would become exercisable.	Sliding scale applies: <ul style="list-style-type: none"> – 50% becoming exercisable above the 50th percentile – 100% at the 75th percentile For example, if ROE achievement was at the 60th percentile, 70% of the relevant awards would become exercisable.
Forfeiture	<ul style="list-style-type: none"> – Malus provisions apply – The standard policy is that unvested PSUs will be forfeited upon termination – To ensure continued alignment with shareholders post-termination, in the case of retirement from the Macquarie Group, redundancy, death, serious incapacitation, disability, serious ill-health or other limited exceptional circumstances, the Board or the BRC has the authority to either accelerate the vesting of PSUs or to permit the PSUs to continue to vest in accordance with the original vesting schedule and remain subject to the same performance hurdles – Should a change of control occur, the Board or the BRC has discretion to determine how unvested PSUs should be treated, having regard to factors such as the length of time elapsed in the performance period, the level of performance to date and the circumstances of the change in control. 	

Rationale for hurdles

- ROE and EPS growth drive long-term shareholder value and are appropriate as the Executive Committee can affect outcomes on both measures. In contrast, Total Shareholder Return (TSR) is influenced by many external factors over which executives have limited control
- the approach is consistent with that advocated by APRA in not using TSR as a measure
- can be substantiated using information that is disclosed in audited financial statements
- a sliding scale diversifies the risk of not achieving the hurdles and provides rewards proportionate to performance for shareholders and is preferable to an all-or-nothing test, which some have argued could promote excessive risk-taking
- designed to reward sustained strong performance and are relatively well-insulated from short-term fluctuations. The time frame used for PSUs should also be considered in light of the three to seven year deferral of profit share for members of the Executive Committee.

Use of a global reference group:

A global reference group recognises the extent of the Macquarie Group's diversification and internationalisation. As at 31 March 2019, total international income represented approximately 66% of the Macquarie Group's total income with approximately 58% of our staff located outside Australia. The BRC considers a global reference group to be appropriate on the basis that the Macquarie Group has no comparable Australian-listed peers. These international firms broadly operate in the same markets and compete for the same people as the Macquarie Group.

(9) A DSU is a Deferred Share Unit and is one of the award types under the MEREP. For further details, refer to Note 32 to the financial statements in the Financial Report.

(10) The reference group for awards from 2013 is Bank of America Corporation, Barclays PLC, Credit Suisse Group AG, Deutsche Bank AG, Goldman Sachs Group Inc., JP Morgan Chase & Co., Lazard Ltd, Morgan Stanley and UBS AG. Comparator company information is presented in the same order throughout the Remuneration Report.

Remuneration Report

Continued

Macquarie's Group EPS CAGR performance

EPS for FY2019 was 883.3 cents per share which has increased by 17% on the prior year. For PSUs to fully vest, Macquarie Group needs to achieve at least 12% CAGR over the vesting period.

Supporting the rigour of the hurdle, to achieve a full vesting the following cumulative EPS is required:

- Over three years, a cumulative EPS growth of 40% is required
- Over four years, a cumulative EPS growth of 57% is required.

The below graph shows EPS CAGR for Macquarie Group over three and four years. The average EPS CAGR of Macquarie Group's international reference group is shown for comparison though this does not form part of Macquarie Group's PSU hurdle.

Macquarie Group's 3 and 4 year EPS CAGR compared to an international reference group

Source: Bloomberg

Macquarie Group's ROE performance compared to international reference group

The Macquarie Group's ROE for FY2019 of 18.0% has improved from 16.8% in the prior year, and is higher than all but one of the international reference group. In addition, the Macquarie Group's three, five and ten-year average annual ROE exceeds all but one of the reference group.

Reference group ROE over ten years FY2010–2019

	1 year average % p.a.	3 year average % p.a.	5 year average % p.a.	10 year average % p.a.
Macquarie Group	18.0	16.7	15.7	12.3
Average of reference group	12.8	8.3	10.2	8.5
Company	10.9	8.2	6.5	3.5
Company	2.6	0.7	0.2	3.6
Company	4.7	(1.3)	(1.3)	3.7
Company	0.0	(1.5)	(2.5)	1.8
Company	13.2	9.2	9.2	10.5
Company	13.3	11.1	10.7	9.8
Company	49.8	33.7	53.2	32.4
Company	11.7	9.3	8.3	5.5
Company	8.6	5.5	7.0	5.5

Source: Bloomberg, Macquarie as reported

Testing of hurdles

Under both performance hurdles, the objective is examined once only. Testing occurs annually on 30 June immediately before vesting on 1 July, based on the most recent financial year-end results available. PSUs that do not meet performance hurdles expire.

The PSUs that vested in July 2018 comprised the second tranche of those awards granted in 2014 and the first tranche of those granted in 2015. The performance hurdles under each tranche were fully met and 100% of the awards became exercisable. As a result:

PSU tranche	EPS CAGR Hurdle			ROE Hurdle		
	Macquarie Group result (for vesting period)	Hurdle	Outcome	Macquarie Group result (for vesting period)	Hurdle	Outcome
2014 Tranche 2	18.57%	50% at 7.5% CAGR 100% at 12% CAGR	100% exercisable	13.59%	50% above the 50th percentile ⁽¹¹⁾ 100% at the 75th percentile ⁽¹¹⁾	100% exercisable
2015 Tranche 1	14.71%	50% at 7.5% CAGR 100% at 12% CAGR	100% exercisable	14.18%	50% above the 50th percentile ⁽¹²⁾ 100% at the 75th percentile ⁽¹²⁾	100% exercisable

Other features of Macquarie's remuneration structure

Minimum shareholding requirement	Executive Directors are required to hold a relevant interest in MGL ordinary shares that have a value equal to 5% of an Executive Director's aggregate profit share allocation for each of the past five years (10 years for Executive Committee members), which can be satisfied by the requirements of the profit share retention policy. For Executive Committee members, compliance with this policy equates to a minimum shareholding requirement of between 160% to 670% of fixed remuneration.
Promotion Awards	Staff who are promoted to Associate Director, Division Director or Executive Director receive an allocation of MEREP awards based on Director-level set with reference to an Australian dollar value. Currently these awards range from \$A25,000 to \$A175,000 depending on the promotion level.
Hedging	The Macquarie Group prohibits staff from hedging shares held to meet the minimum shareholding requirement and unvested equity in the MEREP.

Employment contracts

The following table summarises key features of the employment contracts for Executive Committee members including the CEO:

Length of contract	Permanent open-ended
Remuneration review period	1 April to 31 March annually
Profit share participation	Executive Committee members are eligible to be considered for a profit share allocation that ensures that a large part of their remuneration is 'at risk'. Refer to pages 26 to 28 for details. Profit share allocations are subject to the Malus and Post-Employment events provisions as set out on page 26 to 28.
PSU participation	Executive Committee members are eligible to receive PSUs. Refer to pages 29 to 31 for details.
Termination of employment	Requires no more than four weeks' notice ⁽¹³⁾ by the Macquarie Group or the Executive Committee member (Post-employment restrictions apply).
Post-employment restrictions	Restrictions include non-solicitation provisions applicable for six months, and paid non-competition provisions applicable, at the Macquarie Group's election, for up to three months post-termination.

(11) Peer group ROE at 50th percentile 6.66% and peer group ROE at 75th percentile 8.26%

(12) Peer group ROE at 50th percentile 6.64% and peer group ROE at 75th percentile 8.26%

(13) Subject to compliance with local regulatory and legal requirements. In Australia, Executive Directors given notice by the Macquarie Group may receive an additional week's notice if they are over 45 years of age and have more than two years' continuous service at the time of the termination of their employment. In the UK, the statutory minimum notice period increases from four weeks to a maximum 12 weeks based on years of service.

Remuneration Report

Approach to determining remuneration outcomes

This section provides an overview of the Macquarie Group's approach to determining remuneration outcomes.

The Macquarie Group's remuneration framework works as an integrated whole. An individual's remuneration comprises fixed remuneration, profit share and, for Executive Committee members (our Executive KMP), PSUs. The table below provides an overview of these components.

Fixed remuneration	
Fixed	Reviewed annually and reflects technical and functional expertise, role scope, market practice and regulatory requirements.
Performance-based remuneration	
Profit share	<p>The company-wide profit share pool is determined through a bottom-up assessment at both the business group and individual level:</p> <p>Business groups</p> <ul style="list-style-type: none"> – Reflects each business' contribution to company-wide profits taking into account liquidity, capital and funding usage – For support groups, based on the quality and integrity of control functions and support services; not primarily determined with reference to profitability – Considers the risk profile of each business including consideration of any significant reputational or compliance matters – Also considers overall remuneration levels in the market in which each business operates. <p>Individuals</p> <ul style="list-style-type: none"> – Based on business profits and individual contribution to profits for front office staff – Primarily based on contribution to high quality control functions for risk management and financial control staff – For other support staff, based on their contribution to delivering high quality services to support the businesses – Other factors considered include risk management and compliance (both financial and non-financial risks), business leadership (including customer outcomes), people leadership and professional conduct – May be adjusted downwards based on an assessment of both financial and non-financial risks including conduct issues that have arisen during the year – Also considers relativities in the market in which each business operates. <p>Company-wide profit share pool</p> <ul style="list-style-type: none"> – Is an aggregate of the bottom-up assessment conducted at both the business and individual level – Is assessed for overall reasonableness, including consideration of: <ul style="list-style-type: none"> – an internal reference based on the Macquarie Group's after-tax profits and its earnings over and above the estimated cost of capital – the resultant compensation expense to income ratio and how it compares to that of peers – The MGL Board retains discretion to amend the final pool determined in accordance with the bottom-up assessment to ensure that all relevant factors, including risk and conduct matters, have been appropriately taken into consideration – The Chief Financial Officer (CFO) confirms that payment of the profit share pool would not result in elimination of capital surpluses.
PSUs	<ul style="list-style-type: none"> – The pool is determined with reference to profits over recent years – The Board retains discretion to determine the final PSU pool taking into consideration the risk profile of the Macquarie Group – Individual allocations reflect role and complexity, and contribution to driving the collective performance of the Macquarie Group – The BRC considers both fair and face value when determining individual PSU allocations – PSUs are granted in August each year.

Risk considerations and consequence management

This section describes how risk is considered throughout the Macquarie Group's remuneration approach.

Risk culture

A sound risk culture has been integral to the Macquarie Group's risk management framework since inception. Staff are made aware that our *What We Stand For* principles of Opportunity, Accountability and Integrity must form the basis of all behaviours and actions. These behavioural expectations are outlined in the Board approved *Code of Conduct*, which is actively promoted by Management and cascaded through the organisation.

Alignment of remuneration with prudent risk-taking

The Board considers that the effective alignment of remuneration with prudent risk-taking is fundamental to its remuneration approach. Performance-based remuneration reflects an individual's performance, which includes an assessment of a range of factors including risk management and compliance as well as behavioural measures to promote good conduct and commitment to the *Code of Conduct* and *What We Stand For*. In addition, the remuneration framework is characterised by significant retention and long deferral periods, which enable risk outcomes to be taken into account over long periods.

The Board and the BRC continue to take risk and conduct matters very seriously. There are robust processes in place to ensure that risk, reputation and conduct-related matters, as well as financial losses and impairments, and other breaches of the risk management framework are specifically considered when assessing performance and determining remuneration outcomes. These processes may result in a downward adjustment to group and/or individual profit share allocations where appropriate. A wide range of risks that could have a financial or non-financial impact on the Macquarie Group are considered, including if there has been a detriment to customers.

To assist the Board and the BRC:

- The Board receives regular reports to assist Board members in assessing the Macquarie Group's risk culture as well as through personal observation including visits to our overseas offices
- The Chief Risk Officer (CRO) provides the BRC with an independent annual report detailing significant regulatory and legal matters, significant compliance and operational incidents, material losses, internal audit issues and other non-financial risk matters. In addition, the report details residual risks associated with large transactions concluded during the current financial year, return on economic capital by business and the relationship between profitability and risk
- The Global Head of HR discusses the CRO's report with the Group Heads to ensure any matters listed in the report have been appropriately reflected in remuneration outcomes for relevant staff and provides a report to the BRC detailing how this has been achieved
- The General Counsel, in conjunction with HR, considers whether there are any incidents that should be brought to the attention of the BRC which might lead to a Malus determination and reports to the BRC at year end.

The BRC conducts a detailed review of all the material presented and uses this information when considering remuneration outcomes for relevant businesses and individuals.

Consequence management

The Macquarie Group operates a robust consequence management process whereby incidents, breaches of policy and misconduct are regularly reported to senior management. Macquarie Group's Consequence Management Guideline applies wherever a breach of internal policy, including the *Code of Conduct*, or regulatory requirement is identified. Consequences may include requirements to undergo further training, removal of delegated authorities or permissions, adjustments to performance-based remuneration, impact on promotion, formal warnings or termination. In any given year, each of these different types of consequences may be imposed on individuals working or the Macquarie Group. The most serious consequences are formal warnings and terminations. Where an employee has received a formal warning, in most cases the discretionary component of their remuneration will be impacted and in some cases the outcome is that no profit share allocation is made. Promotion decisions may also be impacted. Impacts may also be applied where a formal warning has not been issued. In each case, judgement is exercised as to the appropriate consequence/s based on all the relevant circumstances. In the event that an individual's employment is terminated due to a compliance or conduct concern (or they resign), Macquarie Group's standard policy would apply, whereby retained and unvested remuneration is forfeited.

To assist the Board and the BRC:

- RMG and HR routinely provide information on identified breaches of policies and regulatory rules to (amongst other purposes) ensure appropriate consequence management is applied. RMG and HR data relating to employee conduct, including individual employee warnings, incidents and breaches, is collated from various sources and regularly reported to senior management
- The Global Head of HR annually reports to the BRC on the outcomes from the consequence management process and confirms these matters have been considered in determining remuneration and promotion outcomes where appropriate.

Remuneration Report

Continued

In 2019, for Macquarie Bank, there were 89 matters involving conduct/policy breaches that resulted in formal consequences.

Of those matters:

- for 9 matters, termination of employment was the outcome
- for 80 matters, a formal warning was issued. Where a formal warning was issued, additional consequences were applied as appropriate including additional training, removal of delegated authorities or permissions, adjustments to performance-based remuneration and/or impact to promotion. Of the 80 matters, 19 have resulted in individuals subsequently leaving Macquarie Bank.

These matters were considered to be isolated issues and there was no evidence of broader systemic conduct issues.

Alignment of remuneration outcomes to results

Macquarie Bank's FY2019 results include the gain on sale on the transfer of the Principal Finance and Transportation Finance business from the Bank to the Non-Bank⁽¹⁴⁾. Net profit after tax (NPAT) has increased 4% excluding the profit from discontinued operations and has increased by 29% when the profit from discontinued operations is included.

	2015	2016	2017	2018 ⁽¹⁵⁾	2019 ⁽¹⁵⁾	2018 ⁽¹⁶⁾	2019 ⁽¹⁶⁾
NPAT attributable to the ordinary equity holder (\$Am)	906	1,050	1,221	1,568	2,022	1,023	1,066

Remuneration governance

Effective governance is central to Macquarie Group's remuneration strategy and approach. The key elements of Macquarie Group's remuneration governance framework are described below.

Strong Board oversight

The MGL Board oversees the Macquarie Group's remuneration framework. The MGL Board has a BRC whose objective is to assist the Board and the Board of Macquarie Bank, a key operating subsidiary, with the Macquarie Group's remuneration policies and practices.

The BRC currently comprises five independent NEDs:

- Michael Hawker (Chairman)
- Gary Banks
- Gordon Cairns
- Diane Grady
- Peter Warne.

The BRC members have the required experience and expertise in human resources, remuneration and risk to enable them to achieve effective governance of the Macquarie Group's remuneration framework. The BRC has a regular meeting cycle and it met six times during FY2019. Attendance at meetings by the BRC members is set out in the Directors' Report. Strict processes are in place to ensure conflicts of interest are appropriately managed.

The BRC pays close attention to the design and operation of remuneration practices for all of the Macquarie Group, not just for the most senior executives. The responsibilities of the BRC are outlined in its Charter, which is reviewed and approved annually by the Board. Some of the responsibilities include:

- recommending to the Board the remuneration outcomes for all Executive KMP, Designated Executive Directors and other senior executives

- assessing the effectiveness of the *Remuneration Policy* to ensure compliance with legal and regulatory requirements, as well as to support the alignment of remuneration with prudent risk taking and professional conduct across the organisation
- recommending the *Remuneration Policy* to the Board for approval, and
- overseeing the process for the annual performance review of the CEOs' by the Macquarie Group and Macquarie Bank Boards.

The Charter is available at macquarie.com/leadership-corporate-governance.

Macquarie Group's strong remuneration governance framework provides the BRC with multiple opportunities to review and challenge both individual remuneration outcomes and the company-wide profit share pool. There is a consistent and robust process for the BRC to assess performance and determine remuneration outcomes for Macquarie Bank's most senior staff.

(14) On 10 December 2018, the Transportation and Principal Finance businesses within CAF were disposed of to the Non-Bank by MBL in response to the evolving strategic direction of these businesses.

(15) Including the profit from discontinued operations on the transfer of the CAF Principal Finance and Transportation Finance businesses from the Bank to the Non-Bank as reported in the Financial Statements for the year ended 31 March 2019.

(16) Excluding the profit from discontinued operations on the transfer of the CAF Principal Finance and Transportation Finance businesses from the Bank to the Non-Bank as reported in the Financial Statements for the year ended 31 March 2019.

As part of the Board's annual review of the Macquarie Bank CEO's performance, the CEO meets with the Non-Executive Directors (NEDs) of the Board towards the end of each financial year to consider formal documentation that outlines her views of Macquarie Bank's performance. The presentation includes a broad range of Macquarie Bank's activities covering the following main areas:

- regulatory
- risk management and compliance
- customer outcomes
- financial performance
- investing in the future.

Over the course of the year the Board receives regular reports and updates on many of these areas. These are summarised in the CEO's presentation, together with additional information on any particular matters of interest the Board has identified for further discussion as a part of the review process. The Board then considers the CEO's performance and progress against all of these topics in determining her remuneration for the year.

The MGL Board and the BRC also consider formal documentation for each Executive Committee member, which covers financial performance, risk management and compliance, business leadership (including customer outcomes), and people leadership and professional conduct consistent with the *Code of Conduct* and *What We Stand For*.

The BRC also consider the risk-related matters raised in the CRO Report.

Finally, the BRC considers remuneration levels for organisations in an international reference group that broadly operate in the same markets and compete for the same people as the Macquarie Group.

This information helps the BRC and Board make decisions about remuneration.

Independent remuneration review

The BRC has retained Pay Governance as its independent remuneration consultant, for the use of the Board to obtain advice on the appropriateness of the Macquarie Group's remuneration framework.

The only service that Pay Governance provides to the Macquarie Group is executive compensation consulting to the BRC. Pay Governance has not made any remuneration recommendations, as defined by the *Corporations Act 2001* (Cth). The BRC is responsible for making decisions within the terms of its Charter. Pay Governance's terms of engagement set out their independence from members of Macquarie Group's management. This year, Pay Governance:

- provided information on global remuneration and regulatory trends
- considered alignment with shareholder interests
- compared individual remuneration for Executive KMP where relevant comparator company information was available
- considered the Macquarie Group's overall remuneration approach compared to comparator company organisations.

Pay Governance's findings included that:

- the objectives of the Macquarie Group's remuneration framework are similar to those cited by other leading global investment banks
- the Macquarie Group's remuneration components support its remuneration objectives and principles and are largely consistent with practices at other leading global investment banks, including that performance-based remuneration takes risk management into account.

Remuneration Report

Continued

Non-Executive Director remuneration

The Macquarie Board seeks to attract and appoint high calibre Non-Executive Directors (NEDs). Reflecting the Board's role, the remuneration arrangements applicable to NEDs, as outlined in this section, differ significantly from the arrangements applicable to Executives.

Non-Executive Director remuneration

Non-Executive Director fees are set acknowledging the level required to appropriately remunerate highly qualified NEDs who have the relevant skills and experience to govern as a member of the Board.

Macquarie Group's NED remuneration framework seeks to remunerate high-calibre directors by:

- setting an overall fee that reflects the scale and complexity of the Macquarie Group, including risk management and regulatory responsibilities and the global financial nature of Macquarie's activities
- setting Board and Committee fees to reflect the time commitment required to meet the responsibilities involved in the annual scheduled calendar, taking into account market rates for relevant organisations and market trends
- paying separate fees for additional responsibilities that may arise on an ad hoc basis
- delivering these fees in a form that is not contingent on the Macquarie Group performance
- setting a minimum shareholding requirement to align the interest of NEDs with shareholders.

All NEDs of MGL are also NEDs of MBL. The framework governs the remuneration of NEDs of both MGL and MBL. The CEO is not remunerated separately for acting as an Executive Voting Director.

Unlike Macquarie Group executives, NEDs are not granted equity, nor are they eligible to receive profit share payments. There are no termination payments to NEDs on their retirement from office other than payments relating to their accrued superannuation contributions comprising part of their remuneration.

NEDs may elect to receive their remuneration, in part, in the form of superannuation contributions over and above the minimum level of contribution required under applicable legislation.

NEDs are remunerated for their services from the maximum aggregate amount approved for this purpose. MGL shareholders approved the current limit (\$A4.6 million per annum) at MGL's 2015 AGM. The Board ensures that NED remuneration for MGL and MBL taken together does not exceed this shareholder approved maximum amount.

MBL does not have standalone Board committees. The MGL BAC and the MGL BRiC are joint committees of MGL and MBL. The BRC also advises both Boards.

Board and Committee fees are reviewed annually. Guerdon Associates was engaged by the Board during FY2019 to provide trend and peer analysis against an Australian and international comparator group. The Board reviewed NED remuneration in the context of external market factors. To address the increasing demands on NEDs given the growth in the scale of the Macquarie Group's operations and regulatory initiatives that have increased the responsibilities and time commitment of NEDs, the Board determined to increase the Macquarie Bank Board member base fee from \$A72,500 to \$A78,000 while leaving Committee fees unchanged. The Macquarie Bank annual Board Chairman fee was also increased from \$A250,000 to \$A267,000. Both fee increases were effective from 1 July 2018.

Board fees were last changed in FY2016. This increase in Macquarie Bank fees of \$A66,500 per annum was accommodated within the current MGL cap.

MBL Annual Director Fees (from 1 July 2018)

	Chairman \$A	Member \$A
Board	267,000	78,000

Appendix 1: Key Management Personnel (KMP) for FY2019

All the individuals listed below have been determined to be KMP for FY2019 for the purposes of the *Corporations Act 2001* (Cth) and as defined by AASB 124 *Related Party Disclosures*. KMP include Executive Voting Directors and Executives with authority and responsibility for planning, directing and controlling the activities of MBL and its controlled entities (together making Executive KMP) and NEDs. MBL's NEDs are required by the Act to be included as KMP for the purposes of disclosures in the Remuneration Report. However, the NEDs do not consider themselves part of Management.

Name	Position	Term as KMP for FY2019
Executive Voting Director		
S.R. Wikramanayake ⁽¹⁾	Macquarie Group CEO	Full year as Executive KMP. Appointed to the Board effective from 28 August 2018
N.W. Moore	Former Macquarie Group CEO	Ceased to be a member of the Board and Executive Committee on 30 November 2018
M.J. Reemst	Macquarie Bank CEO	Full year
Non-Executive Directors		
G.R. Banks AO	Independent Director	Full year
J.R. Broadbent AC	Independent Director	Appointed to the Board effective from 5 November 2018
G.M. Cairns	Independent Director	Full year
P.M. Coffey	Independent Director	Appointed to the Board effective from 28 August 2018
M.J. Coleman	Independent Director	Full year
P.A. Cross	Independent Director	Ceased to be a member of the Board on 26 July 2018
D.J. Grady AM	Independent Director	Full year
M.J. Hawker AM	Independent Director	Full year
G.R. Stevens AC ⁽²⁾	Independent Director	Full year
N.M. Wakefield Evans	Independent Director	Full year
P.H. Warne	Independent Chairman	Full year
Executives⁽³⁾		
B.A. Brazil	Former Co-Head of CAF	Ceased to be a member of the Executive Committee on 30 November 2018
A.J. Downe	Head of CGM	Full year – ceased to be a member of the Executive Committee on 31 March 2019
G.A. Farrell	Co-Head of CAF	Full year
A.H. Harvey	CFO, Head of FMG	Full year
N. O'Kane ⁽⁴⁾	Head of Commodity Markets and Finance (CMF)	Full year
N. Sorbara	COO, Head of COG	Full year
P.C. Upfold	CRO, Head of RMG	Full year
G.C. Ward	Deputy Managing Director and Head of BFS	Full year

(1) Ms Wikramanayake was appointed as Macquarie Group CEO on 1 December 2018. She was formerly Head of MAM.

(2) The Board approved a leave of absence for Mr Stevens, due to illness, for the period 1 February 2019 to 31 May 2019.

(3) Except where indicated otherwise, all of the Executives as well as the CEO were members of the Executive Committee as at 3 May 2019.

(4) Mr O'Kane was Head of Commodity Markets and Finance for the full year to 31 March 2019 and has succeeded Mr Downe as Head of CGM effective 1 April 2019.

(1) Ms Wikramanayake commenced as Macquarie Group CEO effective from 1 December 2018. She was previously Head of MAM.

(2) Comparable KMP are Executive KMP who are members of the Executive Committee for the full year in both FY2019 and FY2018.

(3) Mr Brazil ceased to be a member of the Executive Committee on 30 November 2018. Mr McLaughlin ceased to be a member of the Executive Committee on 15 June 2017. Both individuals are currently still employed by Macquarie Group.

(4) Mr Harvey and Mr O’Kane were appointed to the Executive Committee effective from 1 January 2018 and 15 June 2017 respectively.

(5) Mr Moore stated his intention to retire and stepped down from his role as Macquarie Group CEO on 30 November 2018. From 1 December 2018, he has continued to provide services to the Macquarie Group to ensure a smooth leadership transition. For FY2019, his statutory remuneration of \$A15.2 million includes \$A5.3 million relating to the current year and \$A9.9 million of accelerated amortisation of prior years’ equity awards which have been previously disclosed and approved by shareholders. As a result of his intention to retire, the amortisation of his equity awards is being

recognised over an accelerated vesting period resulting in further accounting amortisation of \$A7.7 million in FY2019 and \$A6.0 million in FY2020. Subject to BRC approval, the release of the RSUs will take place over a two-year period post termination of employment and will be subject to Macquarie's Malus and Post Employment events provisions set out on pages 27 to 28. Also, subject to BRC approval, the continuing employment condition attached to Mr Moore's previously granted PSUs will be waived. The PSUs released will only become exercisable upon the achievement of the performance hurdles tested at each vesting date.

Remuneration Report

Continued

Additional information in regards to the statutory remuneration disclosures set out in this Appendix

The remuneration disclosures set out in this Appendix have been prepared in accordance with Australian Accounting standards.

Under the requirements of AASB 124 *Related Party Disclosures*, the remuneration disclosures for the years ended 31 March 2019 and 31 March 2018 only include remuneration relating to the portion of the relevant periods that each person was an Executive KMP.

The following information provides more detail with regard to some of the column headings in this Appendix:

(1) Short-term employee benefits:

- (a) *Salary*: includes superannuation and an accrual for long service leave.
- (b) *Performance-related remuneration*: this represents the cash portion of each person's profit share allocation for the reporting period as an Executive KMP.

(2) Long-term employee benefits:

- (a) *Restricted profit share*: this represents the amount of retained profit share that is deferred to future periods and held as a notional investment in Macquarie-managed fund equity (DPS Plan).
- (b) *Earnings on prior years, restricted profit share*: Profit share amounts retained under the DPS Plan are notionally invested in Macquarie-managed funds, providing Executive Directors with an economic exposure to the underlying investments. Executive Directors are each entitled to amounts equivalent to the investment earnings (dividends/distributions and security price appreciation) on the underlying securities. The notional returns are calculated based on Total Shareholder Return. Where these amounts are positive, they may be paid to Executive Directors and are included in these remuneration disclosures as part of 'Earnings on prior year restricted profit share'. If there is a notional loss, this loss will be offset against any future notional income until the loss is completely offset, and is reported as a negative amount in the same column. These earnings reflect the investment performance of the assets in which prior year retained amounts have been notionally invested. Their inclusion in the individual remuneration disclosures on the following pages may, therefore, cause distortions when year-on-year remuneration trends are examined. They do not reflect remuneration review decisions made about the individual's current year performance.

(3) Share-based payments:

- (a) *Equity awards including shares*: This represents the current year expense for retained profit share that is invested in MGL ordinary shares under the MEREP as described on page 26 to 27. This is recognised as an expense over the respective vesting periods, or service period if shorter, as described on page 27 and includes amounts relating to prior year equity awards that have been previously disclosed. Equity awards in respect of FY2019 performance will be granted during FY2020, however the Macquarie Bank begins recognising an expense for these awards (based on an initial estimate) from 1 April 2018. The expense is estimated using the price of MGL ordinary shares as at 31 March 2019 and the number of equity awards expected to vest. In the following financial year, Macquarie Bank will adjust the accumulated expense recognised for the final determination of fair value for each equity award when granted and will use this validation for recognising the expense over the remaining vesting period.
- (b) *PSUs*: This represents the current year expense for PSUs that is recognised over the vesting period as described on page 29. This includes amounts relating to prior year PSU awards. PSUs will be granted during FY2020, however Macquarie Bank begins recognising an expense for these awards (based on an initial estimate) from 1 April 2018. The expense is estimated using the price of MGL ordinary shares as at 31 March 2019 and the number of PSUs expected to vest. The estimate also incorporates an interest rate to maturity of 1.65% per annum, expected vesting dates of 1 July 2022 and 1 July 2023, and a dividend yield of 5.08% per annum. In the following financial year, Macquarie will adjust the accumulated expense recognised for the final determination of fair value for each PSU when granted and will use this validation for recognising the expense over the remaining vesting period.

Appendix 3: Non-Executive Director remuneration

The remuneration arrangements for all of the persons listed below as NEDs are described on page 69 of the Remuneration Report. The fees shown include fees paid as members of both the MGL and MBL Boards.

Total Remuneration – Non-Executive KMP	2019	901,722	–	901,722
	2018	787,708	–	787,708

(1) Ms Broadbent was appointed to the MGL and MBL Boards as an Independent Voting Director effective 5 November 2018.

(2) Mr Coffey was appointed to the MGL and MBL Boards as an Independent Voting Director effective 28 August 2018.

(3) Mrs Cross ceased to be a member of the MGL and MBL Boards effective 26 July 2018.

(4) Mr Stevens was appointed to the MGL and MBL Boards as an Independent Voting Director effective 1 November 2017. The Board approved a leave of absence, due to illness, for Mr Stevens for the period 1 February 2019 to 31 May 2019.

Remuneration Report

Continued

Appendix 4: Loan disclosures

Loans to Key Management Personnel and their related parties

Details of loans provided by Macquarie Bank to KMP and their related parties⁽¹⁾ are disclosed in the following table:

Name and Position	Balance at 1 April 2018 ⁽²⁾ \$A'000	Interest charged ⁽³⁾ \$A'000	Write downs \$A'000	Balance as at 31 March 2019 \$A'000	Highest balance during the year \$A'000
Non-Executive Directors					
D.J. Grady (related party)	464	19	–	454	464
M.J. Hawker (related party)	100	9	–	340	340
P.W. Warne (related party)	–	5	–	481	485

(1) There were no other loans provided by Macquarie Bank to KMP and their related parties during the financial year ended 31 March 2019.

(2) Or date of appointment if later.

(3) All loans provided by Macquarie Bank to Directors and Executives are made in the ordinary course of business on an arm's length basis and are entered into under normal terms and conditions consistent with other customers and employees. There have been no write-downs or allowances for doubtful debts.

This Remuneration Report has been prepared in accordance with the Act. The Remuneration Report contains disclosures as required by Accounting Standard AASB 124 *Related Party Disclosures* as permitted by *Corporations Regulation 2M.3.03*.

Throughout this Remuneration Report financial information for Macquarie Bank relating to the years ended 31 March 2015 through to 31 March 2019 has been presented in accordance with Australian Accounting Standards. Compliance with Australian Accounting Standards ensures compliance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

Financial Report

Macquarie's holey dollar

The symbol of Macquarie, the holey dollar was Australia's first official currency and earliest example of financial innovation. More than two hundred years since its creation by Governor Lachlan Macquarie, the holey dollar remains a relevant symbol of financial innovation and, within the Macquarie business, inspires our best efforts to deliver new ideas and products for our clients.

Notes to the financial statements

For the financial year ended 31 March 2019

Note 1

Summary of significant accounting policies

(i) Basis of preparation

The principal accounting policies adopted in the preparation of this Financial Report are set out below. These policies have been consistently applied to all the financial years presented and are applicable to both the Consolidated Entity (Macquarie Bank Limited and its subsidiaries) as well as to the Company (Macquarie Bank Limited), unless otherwise stated.

This Financial Report is a General Purpose Financial Report which has been prepared in accordance with Australian Accounting Standards and the *Corporations Act 2001* (Cth). Macquarie Bank is a for-profit Company for the purposes of preparing financial statements.

Compliance with IFRS as issued by the IASB

Compliance with Australian Accounting Standards ensures that the Financial Report complies with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). Consequently, this Financial Report has also been prepared in accordance with and complies with IFRS as issued by the IASB.

Basis of measurement

This Financial Report has been prepared under the historical cost convention except for the following items:

- financial instruments (including derivatives) required to be measured at fair value through profit or loss (FVTPL), financial assets classified as fair value through other comprehensive income (FVOCI) and financial instruments that are designated as FVTPL (DFVTPL)
- financial assets and liabilities that are otherwise measured on an amortised cost basis but adjusted for changes in fair value attributable to the risk being hedged in qualifying fair value hedge relationships
- non-current assets and disposal groups that have been classified as held for sale and where the disposal group has been written down to its fair value less costs to sell
- liabilities in terms of cash-settled share-based payment obligations
- commodities that are measured at fair value less costs to sell in accordance with the broker-trader exemption
- investment property that is subsequently measured at fair value.

Presentation changes

Statement of financial position

Following the adoption of AASB 9 *Financial Instruments* (AASB 9), and in order to present items on the basis of the nature of the underlying item as opposed to its measurement basis, the Consolidated Entity has made changes to the presentation of certain items in its statement of financial position.

The effect of these presentation changes has been disclosed in the 'Change on initial application of AASB 9' section of this note and as footnotes to the other relevant notes to the financial statements.

Income statement

The Consolidated Entity has made certain presentation changes in its income statements and Note 2 *Operating profit from continuing operations before income tax*, in order to align the presentation of items of income and expense with the categories of financial instruments presented in the statement of financial position.

This has had no effect on the measurement of these items and therefore on retained earnings or profit for any period. Comparative information has been represented, for all presentation changes in the statement of financial position and income statement.

Critical accounting estimates and significant judgements

The preparation of the Financial Report in conformity with Australian Accounting Standards requires the use of certain critical accounting estimates. It also requires management to exercise judgement in the process of applying the accounting policies. The notes to the financial statements set out areas involving a higher degree of judgement or complexity, or areas where assumptions are significant to the Consolidated Entity and the consolidated Financial Report such as:

- determining the appropriate business model for a group of financial assets and assessing whether the cash flows generated by an asset constitute solely payment of principal and interest (SPPI) (Note 1(viii))
- measurement of Expected Credit Loss (ECL) including the choice of inputs, estimates and assumptions relating to information about past events, current conditions and forecasts of economic conditions (Notes 1(xxiii) and 11)
- timing and amount of impairment of interests in associates and joint ventures, investment in subsidiaries (Notes 1(ii), 1(xxiii), 13, and 15)
- fair value of financial assets and financial liabilities including accounting for day 1 profit or loss (Note 36)
- distinguishing between whether assets or a business is acquired under a business combination (Note 1(iii))
- determination of control of subsidiaries and structured entities (Notes 1(ii) and 32)
- determination of significant influence over associates and joint control over joint ventures (Note 1(ii))
- recoverability of tax receivables, deferred tax assets and measurement of current and deferred tax liabilities (Notes 1(vii), 4 and 16)
- reclassification of foreign currency translation reserve on disposal of a foreign operation (Notes 1(iv) and 25)
- recognition of fees by determining whether multiple services provided in a single contract are distinct and whether incurred expenses can be presented net of any associated revenue (Note 1(v))
- recognition and measurement of provisions related to actual and potential claims, including contingent liabilities, and supplemental income, maintenance liabilities and end of lease compensation (Note 1(v), 9, 20 and 30).

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including reasonable expectations of future events.

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

Management believes the estimates used in preparing the Financial Report are reasonable. Actual results in the future may differ from those reported and it is therefore reasonably possible, on the basis of existing knowledge, that outcomes within the next financial year that are different from management's assumptions and estimates could require an adjustment to the carrying amounts of the assets and liabilities.

(a) New Accounting Standards and amendments to Accounting Standards and Interpretations that are not yet effective for the financial year

(i) AASB 16 Leases

AASB 16 *Leases* (AASB 16) replaces the current AASB 117 *Leases* standard for the Consolidated Entity's financial year commencing on 1 April 2019.

AASB 16 sets out a comprehensive model for identifying and measuring lease arrangements. A contract contains a lease if it conveys the right to control the use of an identified asset for a period of time. Contracts that are leases within the scope of AASB 16 from the lessee's perspective require the recognition of a right-of-use (ROU) asset and a related lease liability, being the present value of future lease payments. This results in an increase in the recognised assets and liabilities in the Consolidated Entity's statement of financial position. The income statement will include interest expense on the lease liability together with depreciation of the ROU asset. As compared to AASB 117, the pattern of expense recognition changes with higher costs in the earlier stages of the lease as a result of the interest expense being determined on the lease liability that amortises over the lease term. The classification of leases when the Consolidated Entity is lessor remains unchanged under AASB 16.

Transition:

Alternative methods of calculating the ROU asset are permitted under AASB 16 which impacts the size of the transition adjustment. The Consolidated Entity will apply the modified retrospective approach as permitted by AASB 16. Under the modified retrospective transition approach prior period comparative financial statements are not restated and the Consolidated Entity can choose between two alternate methods of measuring the lease assets on a lease by lease basis. The Consolidated Entity will measure the ROU for existing operating leases of office space from which it conducts its business as if AASB 16 had always been applied. The resulting transition adjustment will be recognised as an adjustment to the Consolidated Entity's retained earnings as at 1 April 2019. For other leases the ROU will be measured based on the lease liability.

Based on the elected transition method, the Consolidated Entity will recognise lease liabilities of approximately \$50 million and ROU assets of \$50 million with no material impact to opening retained earnings. This transition adjustment has, as permitted by AASB 16, been determined by the Consolidated Entity by electing practical expedients to not recognise short term or low value leases on its statement of financial position at the transition date.

Judgement has been applied by the Consolidated Entity in determining the transition adjustment which includes the determination of which contractual arrangements represent a lease, the period over which the lease exists, the incremental borrowing rate of the Consolidated Entity, and the variability of future cash flows.

A schedule of current operating lease commitments is disclosed in Note 31.

(ii) AASB Interpretation 23 (Interpretation 23) *Uncertainty over Income Tax Treatments*

Interpretation 23, which clarifies the application of the recognition and measurement criteria in AASB 112 *Income Taxes* (AASB 112) where there is uncertainty over income tax treatments, and requires an assessment of each uncertain tax position as to whether it is probable that a taxation authority will accept the position. Where it is not probable, the effect of the uncertainty will be reflected in determining the relevant taxable profit or loss, tax bases, unused tax losses and unused tax credits or tax rates. The amount will be determined as either the single most likely amount or the sum of the probability weighted amounts in a range of possible outcomes, whichever better predicts the resolution of the uncertainty. Judgements will be reassessed as and when new facts and circumstances are presented.

Interpretation 23 will apply to the Consolidated Entity from 1 April 2019. The Consolidated Entity's existing recognition and measurement accounting policies are aligned with that as required by Interpretation 23 and hence no transition adjustment to retained earnings is required. For the Consolidated Entity, the application of Interpretation 23 will however increase income tax payable to approximately \$230 million with an offsetting decrease in deferred tax liabilities to approximately \$9 million. For the Company, the application of Interpretation 23 will increase other liabilities to approximately \$78 million with an offsetting decrease in deferred tax liabilities.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

(iii) Revised IFRS Conceptual Framework

The IASB has issued the revised IFRS Conceptual Framework (Framework) for financial reporting. The Australian equivalent Conceptual Framework has not yet been issued. The main purpose of the Framework is to assist the IASB in developing accounting standards and assist financial report preparers to develop accounting policies when there is no specific or similar standard that addresses a particular issue.

Amendments include the definition and recognition criteria for assets, liabilities, income and expenses, and other relevant financial reporting concepts. The Framework is effective for Macquarie's annual reporting periods beginning on 1 April 2020. The Consolidated Entity is currently assessing the impact of the revised Framework.

(iv) AASB 123 *Borrowing costs*

An amendment to AASB 123 *Borrowing costs* (AASB 123) clarifies that, to the extent that an entity borrows funds generally and uses them for the purpose of obtaining a qualifying asset, the entity shall determine the amount of borrowing costs eligible for capitalisation by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate shall be the weighted average of the borrowing costs applicable to all borrowings of the entity that are outstanding during the period. However, an entity shall exclude from this calculation borrowing costs applicable to borrowings made specifically for the purpose of obtaining a qualifying asset until substantially all the activities necessary to prepare that asset for its intended use or sale are complete. The amount of borrowing costs that an entity capitalises during a period shall not exceed the amount of borrowing costs it incurred during that period.

The amendment to AASB 123 will apply to borrowing costs that the Consolidated Entity incurs on or after 1 April 2019. The amendment is not expected to have a material impact to the Consolidated Entity's financial statements.

(v) AASB 119 *Employee Benefits*

An amendment to AASB 119 *Employee Benefits* (AASB 119) specifies that an entity should account for defined benefit plans when a plan amendment, curtailment or settlement occurs during a reporting period. The amendment requires the use of assumptions for the remeasurement of the net defined benefit liability or asset to determine the current service cost and the net interest for the remainder of the reporting period after a plan event occurs. The amendment also clarifies that, when a plan event occurs, the past service cost or a gain or loss on settlement is to be recognised separately from its assessment of the asset ceiling.

The amendment to AASB 119 will apply to the Consolidated Entity from 1 April 2019 and is not expected to have a material impact on the Consolidated Entity's financial statements.

(b) New Australian Accounting Standards and amendments to Accounting Standards that are either effective in the current financial year or have been early adopted

(i) AASB 3 *Business combinations*

An amendment to AASB 3 revised the definition of a business to provide additional guidance to assist entities to determine whether the acquisition of activities and assets should be accounted as a business combination or as an asset acquisition. Existence of a process (or processes) has been identified as a key criteria for distinguishing business combination from an asset acquisition. To be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create an output. The amendment also limited the definition of output to focus on goods or services provided to customers, investment income (such as dividend or interest) or other income from ordinary activities.

A concentration test has also been included which the Consolidated Entity may elect to apply on a transaction by transaction basis for assessment whether an acquired set of activities and assets is not a business.

Whilst the amendment is effective for annual reporting periods starting on or after 1 January 2020, the Consolidated Entity has early adopted the amendment from 1 April 2018.

(ii) AASB 9 *Financial Instruments*

AASB 9 replaced AASB 139 *Financial Instruments: Recognition and Measurement* from 1 April 2018. AASB 9 resulted in changes to accounting policies covering the classification, measurement and impairment of financial assets and the application of hedge accounting.

The Consolidated Entity early adopted from 1 October 2016 the provisions relating to the presentation in other comprehensive income (OCI) of changes in the credit risk of the Consolidated Entity of financial liabilities that have been designated at FVTPL. The Consolidated Entity has applied all other requirements of AASB 9 from 1 April 2018.

Transition:

As permitted by AASB 9, the Consolidated Entity and the Company have not restated its comparative financial statements and have recorded transition adjustment to its opening balance sheet, retained earnings and OCI at 1 April 2018.

The transition adjustment, which mainly relates to AASB 9's expected credit loss (ECL) impairment requirements reduced the Consolidated Entity's shareholders' equity by \$140 million after tax and the Company's shareholder's equity by \$73 million. The transition to AASB 9 did not have a material impact on the Consolidated Entity's minimum regulatory capital requirements.

Refer to the next section 'Change on initial application of AASB 9' for further details of the transition impact.

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

The key changes in the Consolidated Entity's significant accounting policies following the transition to AASB 9 have been included within the relevant sections of this note and other notes in this Financial Report. Accounting policies applicable to the prior period have been provided in *italics* as appropriate for comparability purposes.

AASB 2017-6 Amendments to Australian Accounting Standards – Prepayment features with negative compensation

AASB 2017-6 amended AASB 9 to permit entities to measure at amortised cost or fair value through OCI, particular financial assets that would otherwise have contractual cash flows that meet the SPPI test but do not meet that condition only as a result of a prepayment feature. This is subject to meeting other conditions, including the business model relevant to the financial asset.

Whilst AASB 2017-6 is effective for annual periods beginning on or after 1 January 2019, the Consolidated Entity has early adopted the amendment from 1 April 2018. The impact of this amendment is included in the transition adjustment for AASB 9.

AASB 2017-7 Amendments to Australian Accounting Standards – Long-term interests in associates and joint ventures

AASB 2017-7 clarifies the accounting for long-term interests (debt instruments) in an associate or joint venture, which in substance form part of the net investment in the associate or joint venture, but to which the equity method is not applied. AASB 9's ECL requirements are applied to these long term interests before applying the loss allocation and impairment requirements in AASB 128 *Investments in Associates and Joint Ventures* (AASB 128).

Whilst AASB 2017-7 is effective for annual periods beginning on or after 1 January 2019. The Consolidated Entity has early adopted the amendment on 1 April 2018. The impact of this amendment is included in the transition adjustment for AASB 9.

Change on initial application of AASB 9:

The table on the following page summarises the presentation and carrying amount changes in the Consolidated Entity's statement of financial position as a result of the adoption of AASB 9 as at 1 April 2018 and includes:

- a comparison of AASB 139 and AASB 9's measurement categories
- the impact of the classification and measurement changes and the new ECL requirements on the Consolidated Entity's and Company's statement of financial position.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

Footnotes to the AASB 9 Transition Table

Presentational changes

On adoption of AASB 9 the Consolidated Entity elected to make the following presentation changes to certain of its financial assets and financial liabilities in order to better reflect the nature of the underlying assets and liabilities:

- (1) The following balances were previously presented as 'Receivables from financial institutions':
 - \$28,777 million of balances now presented as 'Cash collateral on securities borrowed and reverse repurchase agreements'
 - \$7,852 million now presented as 'Cash and bank balances'.Similarly, \$5,380 million of balances previously presented as a part of 'Payables to financial institutions' are now presented as part of 'Cash collateral on securities lent and repurchase agreements' and \$5,223 million presented as 'Bank Borrowings'.
- (2) Available for sale debt and equity securities of \$5,322 million were re-presented to be included within 'Financial investments'.
- (3) Debt and equity securities of \$707 million that were previously presented as part of 'Other financial assets at fair value through profit or loss' were re-presented to be included as part of 'Financial investments' (\$414 million), 'Loan assets' (\$153 million) and 'Other assets' (\$143 million).
- (4) Margin placed (\$8,007 million) that was previously presented as part of 'Loan assets' and security and commodity settlement balances (\$5,716 million) previously presented as a part of 'Other assets' were re-presented as 'Margin money and settlement assets'.

Margin received that was previously presented in 'Deposits' of \$11,008 million, in 'Payables to financial institutions' of \$1,050 million and security and commodity settlement balances of \$4,517 million previously presented in 'Other liabilities' were re-presented to be included as part of 'Margin money and settlement liabilities'.
- (5) Financial liabilities that were previously presented as part of 'Other debt issued at fair value through profit or loss' were re-presented to be included in 'Other liabilities' (\$153 million) and 'Debt issued' (\$1,839 million).

AASB 9 Classification and measurement changes

Following the adoption of AASB 9, the following classification and measurement changes arose:

- (A) Reverse repurchase agreements of \$16,083 million, that were classified as at amortised cost under AASB 139 were classified as FVTPL under AASB 9. This AASB 9 measurement basis reflects the Consolidated Entity's business model of managing the financial assets on a fair value basis in order to realise gains and losses as opposed to a business model in which the objective is to collect contractual cash flows. Repurchase agreements of \$2,522 million, that were classified as at amortised cost under AASB 139, were reclassified to DFVTPL on adoption of AASB 9 as these repurchase agreements are managed together with the reverse repurchase agreements and evaluated on a fair value basis.
- (B) Debt financial investments of \$112 million, that were classified as available for sale under AASB 139, were classified as FVTPL as they either did not meet AASB 9's SPPI criteria or were held in a business model with the intention to sell. Other debt financial investments of \$5,131 million, that were previously classified as available for sale, were classified as at FVOCI on adoption of AASB 9 since these financial assets were held in a business model to both collect contractual cash flows and with the intention to sell. Equity financial investments of \$79 million, that were classified as available for sale under AASB 139 and equity financial investments of \$339 million that were classified as DFVTPL under AASB 139, were classified as FVTPL on adoption of AASB 9 since the Consolidated Entity did not elect to measure such financial assets as FVOCI.
- (C) Commodity-related debtors of \$254 million, which were classified as at amortised cost under AASB 139, were classified as FVTPL on adoption of AASB 9 since these financial assets were held in a business model with the intention to sell.
- (D) Loans of \$672 million, that were classified as at amortised cost under AASB 139, were classified as at FVTPL on adoption of AASB 9 as they either did not meet AASB 9's SPPI criteria or were originated with the intention to sell.
- (E) Loans of \$121 million, that were classified as at amortised cost under AASB 139, were determined to be held within a business model to both collect cash flows and to realise through sale. These loans were accordingly re-classified as at FVOCI on adoption of AASB 9.
- (F) Loans of \$4 million that were previously classified as at amortised cost under AASB 139 were reclassified to FVTPL on adoption of AASB 9 since such financial assets were held in a business model with the intention to sell.

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

The following table provides a reconciliation between the closing impairment allowance for financial assets under AASB 139 (incurred credit loss) to the opening impairment allowance determined in accordance with AASB 9 (ECL) as at 1 April 2018. Changes to the impairment allowance from AASB 139 to AASB 9 are due to the reclassification of financial assets between amortised cost and fair value and the remeasurement of impairment allowances under AASB 9's new ECL requirements.

Financial assets	Measurement category under AASB 139	Measurement category under AASB 9	Loss allowance under AASB 139 \$m	Re-classification \$m	Re-measurement ⁽¹⁾ \$m	Adjusted to fair value at transition date ⁽²⁾ \$m	ECL allowance under AASB 9 \$m
CONSOLIDATED							
Other assets	Amortised cost	Amortised cost	22	–	16	–	38
Loan assets	Amortised cost	Amortised cost	367	(37)	170	–	500
		FVTPL	–	37	–	(37)	–
		FVOCI	–	–	4	–	4
			367	–	174	(37)	504

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

Presentational changes

On adoption of AASB 9 the Company elected to make the following presentation changes to certain of its financial assets and liabilities in order to better reflect the nature of the underlying assets and liabilities:

- (1) The following balances were previously presented as 'Receivables from financial institutions':
 - \$28,437 million of balances now presented as 'Cash collateral on securities borrowed and reverse repurchase agreements'
 - \$6,648 million now presented as 'Cash and bank balances'Similarly, \$5,380 million of balances previously presented as a part of 'Payables to Financial Institution' are now presented as part of 'Cash collateral on securities lent and repurchase agreements' and \$2,582 million presented as 'Bank Borrowings'.
- (2) Available for sale debt and equity securities of \$5,158 million were re-presented to be included within 'Financial investments'.
- (3) Debt and equity securities of \$542 million that were previously presented as part of 'Other financial assets at fair value through profit or loss' were re-presented to be included as part of 'Financial investments' of \$389 million and 'Loan assets' of \$153 million.
- (4) Margin placed of \$4,862 million that was previously presented as part of 'Loan assets' and security and commodity settlement balances of \$4,246 million previously presented as a part of 'Other assets' were re-presented as 'Margin money and settlement assets'.

Margin received that was previously presented in 'Deposits' of \$9,699 million, in 'Payables to financial institutions' of \$1,049 million and security and commodity settlement balances of \$3,595 million previously presented in 'Other liabilities' were re-presented to be included as part of 'Margin money and settlement liabilities'.
- (5) Financial liabilities that were previously presented as part of 'Other debt issued at fair value through profit or loss' of \$1,839 million were re-presented to be included in 'Debt issued'.

Classification and measurement changes

Following the adoption of AASB 9, the following classification and measurement changes arose:

- (A) Reverse repurchase agreements of \$15,750 million, that were classified as at amortised cost under AASB 139 were classified as FVTPL under AASB 9. This AASB 9 measurement basis reflects the Company's business model of managing the financial assets on a fair value basis in order to realise gains and losses as opposed to a business model in which the objective is to collect contractual cash flows. Repurchase agreements of \$2,522 million, that were classified as at amortised cost under AASB 139, were reclassified to DFVTPL on adoption of AASB 9 as these repurchase agreements are managed together with the reverse repurchase agreements and evaluated on a fair value basis.
- (B) Debt financial investments of \$112 million, that were classified as available for sale under AASB 139, were classified as FVTPL as they either did not meet AASB 9's SPPI criteria or were held in a business model with the intention to sell. Other debt financial investments of \$5,001 million, that were previously classified as available for sale, were classified as at FVOCI on adoption of AASB 9 since these financial assets were held in a business model to both collect contractual cash flows and with the intention to sell. Equity financial investments of \$45 million, that were classified as available for sale under AASB 139 and equity financial investments of \$317 million that were classified as DFVTPL under AASB 139, were classified as FVTPL on adoption of AASB 9 since the Company did not elect to measure such financial assets as FVOCI.
- (C) The mortgages loan portfolio of \$31,642 million that was measured at amortised cost under AASB 139 was determined to be held within a business model to both collect cash flows and to realise through sale since such assets may be securitised. Accordingly these loans were re-classified to be measured as FVOCI on AASB 9 adoption.
- (D) Loans of \$295 million, that were classified as at amortised cost under AASB 139, were classified as at FVTPL on adoption of AASB 9 as they either did not meet AASB 9's SPPI criteria or were originated with the intention to sell.
- (E) A loan to a subsidiary of \$865 million, which was classified as at amortised under AASB 139, was classified as at FVTPL in terms of AASB 9 since the loan did not meet AASB 9's SPPI criteria.
- (F) Loans of \$3 million that were previously classified as at amortised cost under AASB 139 were reclassified to FVTPL on adoption of AASB 9 since such financial assets were held in a business model with the intention to sell.

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

The following table provides a reconciliation between the closing impairment allowance for financial assets under AASB 139 (incurred credit loss) to the opening impairment allowance determined in accordance with AASB 9 (ECL) as at 1 April 2018. Changes to the impairment allowance from AASB 139 to AASB 9 are due to the reclassification of financial assets between amortised cost and fair value and the remeasurement of impairment allowances under AASB 9's new ECL requirements.

Financial assets	Measurement Category under AASB 139	Measurement category under AASB 9	Loss allowance under AASB 139 \$m	Re-classification \$m	Re-measurement ⁽¹⁾ \$m	Adjusted to value at transition date ⁽²⁾ \$m	ECL allowance under AASB 9 \$m
COMPANY							
Loan assets	Amortised cost	Amortised cost	313	(126)	86	–	273
		FVTPL	–	118	–	(118)	–
		FVOCI	–	8	34	–	42
			313	–	120	(118)	315
Other assets	Amortised cost	Amortised cost	8	–	5	–	13
Due from subsidiaries	Amortised cost	Amortised cost	–	–	38	–	38
Interests in associates and joint ventures – loans	Amortised cost	Amortised cost	1	(1)	–	–	–
		FVTPL	–	1	–	(1)	–
			1	–	–	(1)	–
Undrawn commitments and financial guarantees			–	–	10	–	10
Total			322	–	173	(119)	376

(1) The ECL movement on loan assets of \$120 million primarily represents an increase in provisions due to a lifetime ECL allowance recognised on exposures that have experienced a SICR since origination.

(2) Represents an AASB 139 impairment allowance on amortised cost financial assets that were reclassified to FVTPL on transition to AASB 9.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

(iii) AASB 15 Revenue from Contracts with Customers

AASB 15 replaces all the previous guidance on revenue recognition from contracts with customers. It requires the identification of discrete performance obligations within a customer contract and an associated transaction price is allocated to these obligations. Revenue is recognised upon satisfaction of these performance obligations, which occurs when control of the goods or services are transferred to the customer.

The Consolidated Entity and the Company adopted AASB 15 on 1 April 2018. No material adjustment to opening retained earnings was recognised as the amendments to accounting policies did not result in significant changes to the timing or amount of revenue recognised as at 31 March 2018. However, the Consolidated Entity and the Company have prospectively presented certain amounts of expenses, which were previously presented on a net basis within fee and commission income, on a gross basis under AASB 15 within other fee and commission expense and operating expenses.

The key changes in significant accounting policies from the transition to AASB 15 are included within the relevant sections of this note and other notes in this Financial Report. Accounting policies applicable to the prior period have also been provided in **Italics** in relevant sections for comparability.

(iv) AASB 3 Business combinations

An amendment to AASB 3 revised the definition of a business to provide additional guidance to assist entities to determine whether the acquisition of activities and assets should be accounted as a business combination or as an asset acquisition. Existence of a process (or processes) has been identified as a key criteria for distinguishing business combination from an asset acquisition.

To be considered a business, an integrated set of activities and assets must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create an output. The amendment also limited the definition of output to focus on goods or services provided to customers, investment income (such as dividend or interest) or other income from ordinary activities.

A concentration test has also been included which the Consolidated Entity may elect to apply on a transaction by transaction basis for assessment whether an acquired set of activities and assets is not a business.

The amendment is to be effective for annual reporting periods starting on or after 1 January 2020, however the Consolidated Entity has early adopted the amendment from 1 April 2018.

Other amendments made to existing standards that are mandatorily effective for this annual reporting period did not result in a material impact to the Consolidated Entity's Financial report.

(c) Other developments

(i) IBOR reform: Transition to alternative reference rates

Interbank-offered rates (IBOR), are interest rate benchmarks used in a wide variety of financial instruments such as derivatives,

loans and bonds. Examples of IBOR include 'LIBOR', 'EURIBOR' and 'BBSW'. IBOR have become increasingly based on the expert judgement of panel banks due to the declining amount of unsecured, wholesale borrowings by banks since the financial crisis. For this reason, these IBOR are less robust, and do not constitute transactions-based market interest rates as envisioned by regulators for international standards for benchmarks. As a result, an IBOR reform process is underway whereby regulators and industry bodies plan to reform or replace existing IBORs with more suitable alternative reference rates (ARRs). In addition, many banks have grown uncomfortable in providing submissions based on expert judgement. For LIBOR, the most widely used interest rate benchmark in the world, the UK Financial Conduct Authority (the regulator of LIBOR) has convinced banks to remain on the LIBOR panels but will not compel them to make LIBOR submissions beyond the end of 2021. As such, there can be no guarantee that LIBOR will be determined after 2021 on the same basis as at present, if at all.

IBOR reform will impact the accounting for financial instruments that reference IBORs. IBOR reform is expected to affect financial reporting including: hedge accounting; the accounting for contractual amendments necessary to facilitate a transition to ARR, and; updating fair value methodologies to reflect the new ARR.

Given the uncertainty around the timing and method of transition from IBOR to ARR, the current absence of term structures on new ARR and the continued reliance on IBORs in pricing long-term financial instruments, management has, consistent with other market participants in the preparation of their financial statements, applied judgement in the current reporting period to determine that certain hedge relationships continue to qualify for hedge accounting. Impacted hedge relationships are those that hedge the variability of cash flows (cash flow hedges) and fixed interest rate risk (fair value hedges) due to changes in IBORs.

The IASB has commenced a project to address accounting issues leading up to IBOR reform and upon transition to ARR. The IASB has tentatively decided to grant certain mandatory relief to support the continuation of hedge accounting despite the uncertainty arising from IBOR reform. The IASB intends to publish its proposals in May 2019. Management continues to monitor market developments and the activities of standard setters and regulators, has commenced a project to prepare for the introduction of ARR, and will continue to monitor its judgements regarding hedge accounting.

(ii) Principles of consolidation

Subsidiaries

This consolidated financial report comprises the financial report of the Consolidated Entity. Subsidiaries are all those entities (including structured entities) which the Consolidated Entity controls. The Consolidated Entity controls entities where it has:

- (i) power to direct the relevant activities
- (ii) exposure, or rights, to significant variable returns
- (iii) the ability to utilise power to affect the Consolidated Entity's returns.

Note 1

Summary of significant accounting policies continued

(i) Basis of preparation continued

The determination of control is based on current facts and circumstances and is continuously assessed. The Consolidated Entity has power over an entity when it has existing substantive rights that provide it with the current ability to direct the entity's relevant activities. Relevant activities are those activities that significantly affect the entity's returns. The Consolidated Entity also considers the entity's purpose and design. If the Consolidated Entity determines that it has power over an entity, the Consolidated Entity then evaluates whether it has exposure or rights to variable returns that, in aggregate, are significant. All variable returns are considered including, but not limited to, returns from debt or equity investments, guarantees, liquidity arrangements, variable fees and certain derivative contracts.

Structured entities

Structured Entities (SEs) are those entities that have been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when voting rights relate to administrative tasks only and the relevant activities of the SE are directed by means of contractual arrangements. When assessing whether the Consolidated Entity controls (and therefore consolidates) a SE, judgement is required as to whether the Consolidated Entity has power over the relevant activities as well as exposure to significant variable returns of the SE. Where the Consolidated Entity has power over the SE's relevant activities, is exposed to significant variable returns through the residual risk associated with its involvement in SEs and is able to affect its returns, the underlying assets, liabilities, revenues and expenses of these SEs are reported in the consolidated financial statements.

Consolidation

The effects of all transactions between entities in the Consolidated Entity are eliminated in full. Unrealised losses are eliminated in the same manner as unrealised gains but only to the extent that there is no evidence of impairment. Non-controlling interests (NCI) in the results and equity of subsidiaries, are shown separately in the consolidated income statements, consolidated statements of comprehensive income and consolidated statements of financial position and are determined on the basis of the Consolidated Entity's present ownership interest in the entity.

Where control of an entity was obtained during the financial year, its results are included in the consolidated income statements from the date on which control was obtained. Where control of an entity ceased during the financial year, its results are included for that part of the financial year during which control existed.

The Consolidated Entity determines the dates of obtaining control (i.e. acquisition date) and losing control (i.e. disposal date) of another entity based on an assessment of all pertinent facts and circumstances that affect the ability to direct the relevant activities and the capacity to influence returns of that entity.

Facts and circumstances that have the most impact include the contractual arrangements agreed with the counterparty, the manner in which those arrangements are expected to operate in practice and whether regulatory approval is required (including the nature of such approval). The acquisition or disposal date does

not necessarily occur when the transaction is closed or finalised under law.

Subsidiaries held by the Company are carried in its financial statements at cost less impairment.

Interests in associates and joint ventures

Associates and joint ventures are entities over which the Consolidated Entity has significant influence or joint control, but not control. Existing ownership interests (including in-substance existing ownership interests) in associates and joint ventures are accounted for under the equity method. Equity accounting is applied from the date that the Consolidated Entity has significant influence or joint control and ceases when the Consolidated Entity no longer has significant influence or joint control.

The Consolidated Entity determines the dates of obtaining or losing significant influence or joint control of another entity based on an assessment of all pertinent facts and circumstances that affect the ability to significantly influence the financial and operating policies or jointly control the relevant activities of that entity. Facts and circumstances that have the most impact include the contractual arrangements agreed with the counterparty, the manner in which those arrangements are expected to operate in practice, and whether regulatory approval (including the nature of such approval) is required to complete. The acquisition or disposal date does not necessarily occur when the transaction is closed or finalised under law.

The equity method of accounting is applied in the consolidated financial report and involves the recognition of the Consolidated Entity's share of its associates' and joint ventures' post-acquisition profits or loss in the consolidated income statement, and the share of the post-acquisition movements in reserves in the consolidated statement of comprehensive income. Equity accounting of losses is restricted to the Consolidated Entity's interests in its associate or joint venture, unless the Consolidated Entity has an obligation or has made payment on behalf of the entity.

Long-term interests in an associate or joint venture, which are in the nature of debt and in substance form part of the net investment in the associate or joint venture, but to which the equity method is not applied are accounted for in accordance with the Consolidated Entity's financial instruments accounting policies, before applying the loss allocation and impairment requirements in AASB 128 *Investments in Associates and Joint Ventures*. The Consolidated Entity calculates ECL on these loans in accordance with AASB 9 *Financial Instruments*.

Where there is an indicator of impairment, the carrying amount of the investment is tested for impairment by comparing its recoverable amount with its carrying value. Impairment losses are recognised as impairment charges as part of other operating income and charges. A reversal of a previously recognised impairment loss is recognised only to the extent that the investment's carrying value does not exceed the carrying amount that would have been determined (including consideration of any equity accounted losses), if no impairment loss had been recognised.

Interests in associates and joint ventures are classified as held for sale when the Consolidated Entity determines that the interest will be recovered principally through a sale transaction rather than through continuing use. Equity accounting is suspended when the interest is classified as held for sale.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(ii) Principles of consolidation continued

On disposal of an investment in an associate or a joint venture, the difference between the sales consideration, any retained interest and the carrying value is recognised as a gain or loss in investment income as part of other operating income and charges together with any gains and losses in OCI that related to the associate or joint venture.

Prior to the adoption of AASB 9, the impairment of long-term interests in the nature of debt and that in-substance formed part of the net investment in the associate or joint venture, were determined in accordance with AASB 12's impairment requirements, as compared to AASB 9's ECL approach.

Changes in ownership interests

When acquiring additional interests of a financial asset (such that it becomes an associate, joint venture or subsidiary) or an investment in an associate or joint venture (such that it becomes a subsidiary), previously held interests are revalued to their current fair value and any gain or loss is immediately recognised in investment income as part other operating income and charges as part of other operating income and charges.

Similarly, when selling ownership interests of a subsidiary (such that control is lost), or an investment in an associate or joint venture (such that it becomes a financial asset), retained ownership interests are revalued to their current fair value and any gain or loss is immediately recognised in investment income as part of other operating income and charges. To the extent the sale represents a contribution to an associate or joint venture, retained ownership interests are not revalued.

Changes in the Consolidated Entity's interest in an entity that does not result in the loss of control are accounted for directly within equity. Increases in the Consolidated Entity's ownership of an associate or joint venture are accounted for as an increase in the carrying value of the interest in associate or joint venture. The difference between the reduction in the Consolidated Entity's interest in an associate or joint venture that remains an associate or joint venture and the proceeds received is accounted for as investment income as part of other operating income and charges. A proportionate amount of associated OCI is reclassified to profit or loss, or reclassified within equity, as would otherwise be required on disposal of the underlying position.

(iii) Business combinations

Business combinations are accounted for using the acquisition method. The consideration exchanged is measured as the aggregate of the acquisition date fair values of assets transferred, equity instruments issued, and liabilities incurred. Transaction costs of a business combination are recognised directly in the consolidated income statement.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured at their fair values on the acquisition date. The Consolidated Entity elects, on a transaction-by-transaction basis, to measure NCI relating to ordinary shares either at fair value or at the NCI's proportionate

share of the fair values of the identifiable assets and liabilities. Goodwill is measured as the excess of the consideration exchanged, recognised NCI, and the fair value of previously-held equity interests over the fair value of the identifiable net assets of the business acquired and is recognised as part of intangible assets in the statement of financial position. Goodwill is subsequently measured at cost less accumulated impairments. If the consideration is less than the Consolidated Entity's share of the fair value of the identifiable net assets of the business acquired, the difference is recognised directly in investment income as part of other operating income and charges, but only after a reassessment of the identification and measurement of the net assets acquired.

Contingent consideration that is dependent on any subsequent event is measured at fair value with changes in its fair value recognised in investment income as part of the other operating income and charges.

Where settlement of any part of cash consideration is deferred, the amounts payable in the future are discounted to their present values as at the acquisition date. The discount rate used is the Consolidated Entity's incremental borrowing rate, being the rate at which a similar borrowing could be obtained from an independent financier under comparable terms and conditions.

Distinguishing between whether assets or a business is acquired involves judgement. The Consolidated Entity identifies a business where an acquired integrated set of activities and assets includes an economic resource (input) and a substantive process that together significantly contribute to the ability to provide goods or services to customers, generate investment income or other income from ordinary activities (outputs).

On a transaction by transaction basis, the Consolidated Entity may perform a simplified assessment to determine that an acquired set of activities is not a business. Under this assessment, the transaction is accounted for as an asset acquisition if substantially all of the fair value of the gross assets acquired is concentrated in a single identifiable asset or group of similar identifiable assets.

Prior to the adoption of amendments to the definition of a business under AASB 3, some of the factors that the Consolidated Entity used in identifying a business combination included:

- *the nature of the Consolidated Entity's industry and business model, which affects the nature of an input, process or output*
- *whether the acquisition included at least a majority of the critical inputs and a majority of the critical processes*
- *the relative ease of replacing the critical processes not acquired by either integrating within the Consolidated Entity's existing processes or sub-contracting them to third parties*
- *the presence of goodwill.*

Combinations between entities or businesses under common control

Common control transactions which are business combinations involving entities or businesses that are ultimately controlled by the same parent entity are accounted for at book value.

Note 1

Summary of significant accounting policies continued

(iii) Business combinations continued

Where the Company acquires, as part of a common control transaction, assets that meet the definition of a business, the assets and liabilities acquired are recorded using the book values included in the consolidated financial statements of the entity having the highest level within the common control group. The Company accounts for consideration paid with any difference recorded in equity within retained earnings.

In the Consolidated Entity's financial statements, to the extent the common control transaction occurred between entities ultimately controlled by Macquarie Bank Limited, gains and losses relating to a common control transaction are eliminated against the amount recorded in the acquirer's equity relating to the common control transaction.

(iv) Foreign currency translation

Functional and presentation currency

The functional currency of each entity in the Consolidated Entity is determined as the currency of the primary economic environment in which the entity operates (the functional currency). The Consolidated Entity's and the Company's financial statements are presented in Australian dollars (the presentation currency), which is also the Company's functional currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the transaction date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in net trading income, except when deferred in OCI as a result of meeting cash flow hedge or net investment hedge accounting requirements (see Note 1(xi)).

Translation differences on financial instrument measured at fair value through profit or loss, are reported as part of the fair value gain or loss in the income statement.

Translation differences on financial assets classified as FVOCI are included in OCI, unless they form part of fair value hedge relationships in which case the translation differences are recognised in the income statement (see Note 1(xi)).

For the detailed policy on Financial instruments refer Note 1(viii).

Subsidiaries and other entities

The results and financial position of all entities that have a functional currency other than Australian dollars are translated into Australian dollars as follows:

- assets and liabilities for each statement of financial position presented are translated at the closing exchange rate at the date of that statement of financial position. Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the closing exchange rate

- income and expenses for each income statement are translated at actual or average exchange rates at the dates of the transactions
- all resulting exchange differences are recognised in OCI reserves within a separate component of equity, being the foreign currency translation reserve (FCTR).

On consolidation, exchange differences arising from the translation of any net investment in foreign operations and of borrowings and other foreign currency instruments designated as hedges of such investments, are recognised as part of the FCTR in OCI.

Foreign currency gains and losses on intragroup loans are recognised in the income statement except where the loan is in substance part of the Consolidated Entity's net investment in the foreign operation, in which case the foreign currency gains and losses are recognised in the Consolidated Entity's FCTR.

When a foreign operation is disposed of, exchange differences recognised in the FCTR are reclassified to the income statement and recognised in investment income as part of other operating income and charges.

(v) Revenue and expense recognition

Net interest income

Interest income and interest expense (with the exception of borrowing costs that are capitalised on a qualifying asset, which is not measured at fair value) is recognised using the effective interest rate (EIR) method for financial assets and liabilities carried at amortised cost or debt financial assets classified as at fair value through OCI. The EIR method calculates the amortised cost of a financial instrument at a rate that discounts estimated future cash receipts or payments through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset or liability.

Fees and transaction costs that are integral to the lending arrangement are recognised in the income statement over the expected life of the instrument in accordance with the EIR method.

When the estimates of payments or receipts of a financial instrument are subsequently revised, the carrying amount is adjusted to reflect the actual or revised cash flows with the re-measurement recognised as part of interest income (financial assets) or interest expense (financial liabilities).

The calculation of EIR does not include ECL, except for financial assets which on initial recognition are classified as purchased or originated credit-impaired (POCI). Interest income on these assets is determined using credit adjusted EIR by discounting the estimated future cash receipts, including credit losses expected at initial recognition, through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset. Interest income on financial assets that are not classified as POCI but are subsequently classified as credit-impaired, is recognised by applying the EIR to the amortised cost carrying value (being the gross carrying value after deducting the impairment loss).

Interest income on financial assets and liabilities that are classified as FVTPL is accounted for on a contractual rate basis.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(v) Revenue and expense recognition continued

Prior to the adoption of AASB 9, interest income on financial assets that were measured at amortised cost (being loans and receivables and held to maturity financial assets) or classified as available for sale, was recognised in accordance with the EIR method. There was no specified accounting treatment under AASB 139 for financial assets that are now classified as POCI. These assets were accounted for on a consistent basis as other financial assets that were measured at amortised cost.

Fee and commission income

Revenue earned by the Consolidated Entity from its contracts with customers primarily consists of the following categories of fee and commission income:

Brokerage and Commission – The Consolidated Entity enters into contracts with customers to act as an agent to buy and sell securities and fees related to this service are recognised on trade date. The brokerage and commission income is presented net of any rebates.

Other fee and commission income – Other fee and commission income includes fees earned on a range of banking products and services platforms, wealth services, credit cards, structuring fees, lending services, stock borrowings and lending activities and income on structured products which are recognised when the performance obligation is satisfied.

The above revenue recognition policies are consistently applied to internal fee sharing arrangements.

Management fees and other cost recoveries are recognised as and when the Company performs a service to other entities in the Group as per the agreed cost sharing arrangements.

Prior to the adoption of AASB 15, fee and commission income was recognised as the related services were performed. Where commissions and fees were subject to clawback or meeting certain performance hurdles, they were recognised as income when it became highly probable that those conditions would not affect the outcome.

Net operating lease income

Operating lease income is recognised on a straight-line basis over the lease term. It comprises operating lease income and supplemental rent and is presented net of the related depreciation expense.

Supplemental rent, maintenance liability and end of lease compensation

Under certain leases, the Consolidated Entity requires lessees to make regular additional rent payments based on aircraft utilisation to contribute towards maintenance expenditure related to Major Maintenance Events (MMEs). These payments are typically calculated on the basis of hourly utilisation, calendar time or the number of cycles operated at an agreed rate specified in the lease. These payments are recorded as supplemental rent revenue in the period in which these are earned.

In certain circumstances, the Consolidated Entity agrees to an alternative mechanism to earn supplemental rent known as end of lease compensation. This compensation is typically calculated on the basis of the condition of each major component at the end of the lease relative to the commencement of the lease measured by hours, number of cycles or calendar time at an agreed rate specified in the lease. The Consolidated Entity accrues the expected lessee's compensation for the use of the aircraft over the term of the lease and agrees to defer the receipt of this compensation until the end of the lease.

At the beginning and throughout the term of each lease, the Consolidated Entity estimates the maintenance liability for MMEs which are expected to occur during the lease and accrues for this over the same term. Management determines this estimate based on quantitative and qualitative information including aircraft utilisation, area of operation, costs and timing of MMEs.

Maintenance expenses are recognised in the income statement net of supplemental rent revenue. Maintenance liabilities are recognised separately and disclosed in Note 20 *Other liabilities*.

Other operating income and charges

Investment income include gains and losses arising from subsequent changes in the fair values of equity investment securities, debt investment securities at fair value through profit or loss and dividends or distributions on these securities, which represent the return on such investments. Impairment losses/reversal of impairment losses on such financial assets are not reported separately from other changes in fair value.

Gain or loss on change of control, joint control and/or significant influence and reclassifications to/from held for sale also forms part of investment income. Refer Note 1(ii) *Principles of consolidation* for details on timing of recognition of gains and losses.

Dividend

Dividends or distributions on financial assets are recognised as income when the Consolidated Entity becomes entitled to the dividend or distribution. Dividends or distributions from associates and joint ventures reduce the carrying amount of the investment in the Consolidated Entity's statement of financial position. Dividends or distributions from subsidiaries, associates and joint ventures are recognised in the income statement of the Company when the right to receive the dividend or distribution is established.

Expenses

Expenses are recognised in the income statement as and when the provision of services is received.

Note 1

Summary of significant accounting policies continued

(vi) Segment reporting

Operating segments are identified on the basis of internal reports to senior management about components of the Consolidated Entity that are regularly reviewed by senior management who have been identified as the chief operating decision makers, in order to allocate resources to the segment and to assess its performance. Information reported to senior management for the purposes of resource allocation and assessment of performance is specifically focused on core products and services offered, comprising five reportable segments as disclosed in Note 3.

Information about products and services is based on the financial information used to produce the Consolidated Entity's financial statements. Information about geographical segments is based on the jurisdiction of the respective entities.

Information about products and services is based on the financial information used to produce the Consolidated Entity's financial statements. Information about geographical segments is based on the jurisdiction of the respective entities.

(vii) Taxation

The principles of the balance sheet method of tax effect accounting have been adopted whereby the income tax expense for the financial year is the tax payable on the current year's taxable income adjusted for changes in deferred tax assets and liabilities attributable to temporary differences between the tax bases of assets and liabilities and their carrying amounts in the financial statements and unused tax losses.

Deferred tax assets are recognised when temporary differences arise between the tax bases of assets and liabilities and their respective carrying amounts which give rise to a future tax benefit, or when a benefit arises due to unused tax losses. In both cases, deferred tax assets are recognised only to the extent that it is probable that future taxable amounts will be available against which to utilise those temporary differences or tax losses. Deferred tax liabilities are recognised when such temporary differences give rise to taxable amounts that are payable in future periods. Deferred tax assets and liabilities are recognised at the tax rates expected to apply when the assets are recovered, or the liabilities are settled under enacted or substantively enacted tax law.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

Current tax assets and liabilities are offset when there is a legally enforceable right to offset and an intention to either settle on a net basis or realise the asset and settle the liability simultaneously.

Current and deferred taxes attributable to amounts recognised in OCI are also recognised directly in OCI.

The Consolidated Entity exercises judgement in determining whether deferred tax assets, particularly in relation to tax losses, are probable of recovery.

Factors considered include the ability to offset tax losses within the tax consolidated group in Australia or groups of entities in overseas jurisdictions, the nature of the tax loss, the length of time

that tax losses are eligible for carry forward to offset against future taxable profits and whether future taxable profits are expected to be sufficient to allow recovery of deferred tax assets.

The Consolidated Entity undertakes transactions in the ordinary course of business where the income tax treatment requires the exercise of judgement. The Consolidated Entity estimates the amount expected to be paid to/(recovered from) tax authorities based on its understanding of the law.

Tax consolidation

The Consolidated Entity's Australian tax liabilities are determined according to tax consolidation legislation.

All eligible Australian resident wholly-owned subsidiaries of Macquarie Group comprise a tax consolidated group with Macquarie Group Limited (MGL, the Company's ultimate parent entity) as the head entity. As a consequence, the Company and the relevant subsidiaries are not liable to make income tax payments and do not recognise any current tax balances or any deferred tax assets arising from unused tax losses. Under the terms and conditions of a tax funding agreement, MGL charges each subsidiary for all current tax liabilities incurred in respect of their activities and reimburses each subsidiary for any tax assets arising from unused tax losses.

Should MGL be in default of its tax payment obligations, or a default is probable, the current tax balances of the subsidiaries will be determined in accordance with the terms and conditions of a tax sharing agreement between MGL and entities in the tax consolidated group.

Goods and services tax (GST)

Where GST (or other value added tax) is not recoverable from global tax authorities, it is either capitalised to the statement of financial position as part of the cost of the related asset or is recognised in the income statement.

Where GST (or other value added tax) is recoverable from or payable to global tax authorities, the amount is recorded as a separate asset or liability in the statement of financial position.

(viii) Financial instruments

Recognition of financial instruments

Financial instruments are recognised when the Consolidated Entity becomes a party to the contractual provisions of the instrument.

A financial instrument is initially recognised at fair value and is adjusted for (in the case of instruments not carried at FVTPL) transaction costs that are incremental and directly attributable to the acquisition or issuance of the financial instrument. Transaction costs relating to financial instruments carried at FVTPL are expensed in the income statement.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(viii) Financial instruments continued

De-recognition of financial instruments

Financial assets

Financial assets are de-recognised from the statement of financial position when:

- the rights to cash flows have expired or
- the Consolidated Entity has transferred the financial asset such that it has transferred substantially all the risks and rewards of ownership of the financial asset.

In transactions where the Consolidated Entity neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset, the asset is derecognised if control over the asset is lost. Any interest in the transferred and derecognised financial asset that is created or retained by the Consolidated Entity is recognised as a separate asset or liability. In transfers where control over the asset is retained, the Consolidated Entity continues to recognise the asset to the extent of its continuing involvement as determined by the extent to which it is exposed to changes in the value of the transferred asset.

Financial liabilities

Financial liabilities are de-recognised from the statement of financial position when the Consolidated Entity's obligation has been discharged, cancelled or has expired.

Gains and losses on the derecognition of non-trading related financial assets and liabilities are recognised as other income as part of other operating income and charges.

Modification of financial instruments

A financial instrument is modified when its original contractual cash flows are renegotiated or modified. A financial instrument that is renegotiated is derecognised if the existing agreement is cancelled and a new agreement is made on substantially different terms or if the existing terms are modified such that the renegotiated financial instrument is a substantially different financial instrument. Where the modification results in derecognition of the original financial instrument, the new financial instrument is recorded initially at its fair value and the resulting difference is recorded in other income.

For financial instruments measured at amortised cost, and for financial assets measured at fair value through OCI, when the modification does not result in derecognition, a gain or loss is recognised in other income as the difference between the financial instrument's original contractual cash flows and the modified cash flows discounted at the original EIR.

Classification and subsequent measurement

Financial assets

Financial assets are classified based on the business model within which the asset is held and on the basis of the financial asset's contractual cash flow characteristics.

Business model assessment

The Consolidated Entity determines the business model at the level that reflects how groups of financial assets are managed. In determining the business model, all relevant evidence that is available at the date of the assessment is used including:

- how the performance of the financial assets held within that business model is evaluated and reported to the Consolidated Entity's senior management personnel and senior executives
- the risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way in which those risks are managed
- how managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected).

The Consolidated Entity exercises judgement to determine the appropriate level at which to assess its business models and its intention with respect to its financial assets.

Solely payment of principal and interest (SPPI)

Key considerations for the SPPI assessment include the timing of the contractual cash flows and the interest component, where interest primarily reflects the time value of money and the credit risk of the principal outstanding.

Amortised cost

A financial asset is subsequently measured at amortised cost using the EIR method if the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows
- the contractual terms of the financial asset give rise on specified dates to cash flows that meet the SPPI requirements
- the financial asset has not been designated to be measured at FVTPL (DFVTPL).

Interest income determined in accordance with the EIR is recognised in interest income. Gains and losses arising from the derecognition of financial assets that are measured on an amortised cost basis are recognised in other income as part of other operating income and charges.

Note 1

Summary of significant accounting policies continued

(viii) Financial instruments continued

Fair value through other comprehensive income (FVOCI)

A financial asset is subsequently measured at FVOCI if the following conditions are met:

- (i) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets
- (ii) the contractual terms of the financial asset give rise on specified dates to cash flows that meet the SPPI requirements
- (iii) the financial asset has not been designated to be measured at FVTPL (DFVTPL).

Subsequent changes in fair value are recognised in OCI, with the exception of interest, which is recognised as part of interest income, ECL which is recognised as a credit impairment charge in other operating income and charges, and foreign exchange gains and losses which are recognised in net trading income. When debt financial assets at FVOCI are derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from OCI and recognised in investment income as part of other operating income and charges.

Fair value through profit or loss

Financial assets that do not meet the criteria to be measured at amortised cost or FVOCI are measured at FVTPL, with all changes in fair value recognised in investment income as part of other operating income and charges.

For the purposes of the Consolidated Entity's and the Company's financial statements, the FVTPL classification consists of the following:

- financial assets that are held for active trading (held for trading or HFT). This classification includes all derivative financial assets
- financial assets that have been designated to be measured at fair value through profit or loss to eliminate or significantly reduce an accounting mismatch (DFVTPL)
- financial assets in a business model whose objective is achieved by managing the financial assets on a fair value basis in order to realise gains and losses as opposed to a business model in which the objective is to collect contractual cash flows or financial assets that fail the SPPI test (FVTPL).

Changes in the fair value of HFT instruments are recognised in net trading income. Changes in the fair value of financial assets that are DFVTPL and FVTPL are recognised as investment income as part of other operating income and charges. The interest component of financial assets that are classified as HFT, DFVTPL and FVTPL are all recognised in interest income.

Equity financial assets are measured at FVTPL.

Reclassification of financial instruments

The Consolidated Entity reclassifies debt financial assets when and only when its business model for managing those assets changes. Financial assets that are reclassified are subsequently measured based on the financial asset's new measurement category.

The Consolidated Entity does not reclassify financial liabilities after initial recognition.

Prior to the adoption of AASB 9, the Consolidated Entity's financial assets were classified into the following categories:

- *loans and receivables, being receivables and amounts due from subsidiaries that were non-derivative financial assets with fixed or determinable payments and that were not quoted in an active market. The measurement and recognition of gains and losses of such assets aligns with that for financial assets classified as at amortised cost under AASB 9*
- *held for trading financial assets, being those financial assets that were held for trading purposes. The measurement and recognition of gains and losses of such assets aligns with the HFT category in terms of AASB 9*
- *available for sale, being financial assets that were initially carried at fair value plus transaction costs. Gains and losses arising from subsequent changes in fair values were recognised through OCI in the available for sale reserve in equity until the asset was derecognised or impaired, at which time the cumulative gain or loss was recognised in the income statement. Interest income on available for sale debt financial assets was aligned with the treatment for financial assets classified as FVOCI under AASB 9*
- *when the fair value of an available for sale equity financial asset was less than its initial carrying amount and there was objective evidence of impairment, the cumulative loss was transferred from OCI and to investment income in the income statement. Such impairment losses were not permitted to be reversed through the income statement*
- *other financial assets were designated at FVTPL if:*
 - *the asset contained embedded derivatives which should otherwise have been separated and carried at fair value*
 - *the asset was part of a group of financial assets and financial liabilities managed and evaluated on a fair value basis in accordance with a documented risk management or investment strategy, and reporting is provided on that basis to key management personnel or*
 - *doing so eliminated or significantly reduced a measurement or recognition inconsistency that would otherwise have arisen.*

Embedded derivatives in financial assets classified as loans and receivables and available for sale were required to be separately accounted for at fair value through profit or loss.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(viii) Financial instruments continued

Financial liabilities

Financial liabilities are subsequently measured at amortised cost, unless they are either held for trading purposes, in which case they are classified as HFT, or have been designated to be measured at FVTPL (DFVTPL). A financial liability may be DFVTPL if:

- the liability contains embedded derivatives which must otherwise be separated and carried at fair value or
- doing so eliminates or significantly reduces an accounting mismatch.

All derivative liabilities are classified as HFT.

Gains and losses arising from the derecognition of financial liabilities that are subsequently measured on an amortised cost basis are recognised in other income as part of other operating income and charges. The changes in fair value of financial liabilities that are classified as HFT are recognised as part of net trading income. Changes in the fair value of financial liabilities that are classified as DFVTPL are recognised in other income as part of other operating income and charges, with the exception of changes in fair value relating to changes in the Consolidated Entity's own credit risk that is presented separately in OCI and is not subsequently reclassified to profit or loss. The interest component of financial liabilities that are classified as HFT or DFVTPL is recognised in interest expense.

Offsetting of financial instruments

Financial assets and financial liabilities are offset, and the net amount reported on the statement of financial position when there is a legally enforceable right to offset the amounts and either there is an intention to settle on a net basis or realise the financial asset and settle the financial liability simultaneously.

(ix) Cash collateral on securities borrowed & lent and repurchase & reverse repurchase agreements

As part of its trading and financing activities, the Consolidated Entity borrows and lends securities on a collateralised basis. The securities subject to the arrangement are not derecognised from the statements of financial position of the relevant parties, as the risks and rewards of ownership remain with the initial holder. These transactions include:

- reverse repurchase transactions, where the Consolidated Entity purchases securities under an agreement to resell
- repurchase transactions, where the Consolidated Entity sells securities under an agreement to repurchase.

The Consolidated Entity continually reviews the fair values of the securities on which the above transactions are based and, where appropriate, requests or provides additional collateral to support the transactions, in accordance with the underlying agreements.

Reverse repurchase agreements except for commodity agreements are measured at FVTPL to reflect the Consolidated Entity's business model to realise fair value gains and losses as opposed to a business model in which the objective is to collect contractual cash flows. Repurchase agreements are measured at DFVTPL to eliminate accounting mismatch created by managing these agreements together with the reverse repurchase agreements. Commodity agreements are measured at amortised cost as they are held in a business model to collect contractual cash flows and AASB 9's SPPI criteria are met.

The Consolidated Entity uses trade date accounting when recording regular purchases and sales of these assets and liabilities. At the date a purchase transaction is entered into (trade date), the Consolidated Entity recognises the resulting financial asset or liability and any subsequent unrealised profit or loss arising from revaluing that contract to fair value is recognised in the income statement. Refer Note 1(viii) for the detailed *Financial instruments* accounting policy.

Prior to the adoption of AASB 9, reverse repurchase and repurchase agreements were respectively classified as loans and receivables and financial liabilities measured at amortised cost.

(x) Trading assets and liabilities

Trading assets (long positions) comprise financial instruments such as debt and equity securities, bank bills and treasury notes purchased with the intent of being actively traded. It also includes bullion and commodities for which the Consolidated Entity has a trading intention. Trading liabilities comprise obligations to deliver assets (short positions) across the same trading categories and which the Consolidated Entity intends to actively trade.

Trading assets and liabilities classified as HFT. Commodities are measured at fair value less costs to sell in accordance with the broker-trader exception.

The Consolidated Entity uses trade date accounting when recording regular purchases and sales of trading assets and liabilities. At the date a purchase transaction is entered into (trade date), the Consolidated Entity recognises the resulting financial asset or liability and any subsequent unrealised profit or loss arising from revaluing that contract to fair value is recognised in the income statement. When the Consolidated Entity becomes party to a sale contract, and the de-recognition criteria are met, it derecognises the trading asset or liability and recognises a trade receivable or trade payable from trade date until settlement date.

(xi) Derivative instruments

Derivative instruments entered into by the Consolidated Entity include futures, forwards and forward rate agreements, swaps and options in the interest rate, foreign exchange, commodity and equity markets. These derivative instruments are principally used by the Consolidated Entity for the purposes of risk management of existing financial and non-financial assets and liabilities and entered into for client trading purposes.

All derivatives, including those held for hedging purposes, are classified as HFT. Derivatives are recognised in the statement of financial position as an asset where they have a positive fair value at balance date or as a liability where the fair value at the balance date is negative.

Fair values are obtained from quoted market prices in active markets including recent market transactions, and valuation techniques including discounted cash flow models and option pricing models, as appropriate.

The best evidence of a derivative's fair value at initial recognition is its transaction price, unless its fair value is evidenced by comparison with other observable current market transactions in the same instrument or based on a valuation technique for which variables include only data from observable markets. Where such alternative evidence exists, the Consolidated Entity recognises profit or loss immediately when the derivative is recognised ('day 1 profit or loss'). When significant unobservable inputs are used to determine fair value, the day 1 profit or loss is deferred and is recognised in the income statement over the life of the transaction or when the inputs become observable. The Consolidated Entity applies this day 1 profit or loss policy to all financial instruments measured at fair value.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(xi) Derivative instruments continued

Hedge accounting

As part of its ongoing business, the Consolidated Entity is exposed to several financial risks, principally that of interest and foreign exchange rates and commodity price risk (collectively referred to as the hedged risk or exposure). The Consolidated Entity has limited appetite for such risks and has policies and practices in place to ensure that these risks are effectively managed. The Consolidated Entity mitigates these risks through the use of derivative financial instruments and, in the case of foreign currency risk, foreign-denominated debt issued (collectively referred to as hedging instruments). In order to account for the difference in measurement bases or location of the gains and losses between the exposure that is being hedged and the hedging instrument, the Consolidated Entity applies hedge accounting as detailed in the table below.

	Fair value hedge	Cash flow hedge	Net investment in a foreign operation hedge
Nature of hedge	The hedge of the fair value risk of a financial asset, liability or non-financial contract.	The hedge of the change in cash flows of a financial asset or liability (or a highly probable forecast transaction).	The hedge of changes in the Consolidated Entity's foreign denominated net assets for changes in foreign currency rates.
Hedged risk	<ul style="list-style-type: none"> – Interest rate risk – Commodity price risk 	<ul style="list-style-type: none"> – Interest rate risk – Foreign exchange risk 	<ul style="list-style-type: none"> – Foreign exchange risk (spot)
Hedged item	<ul style="list-style-type: none"> – Fixed interest rate financial assets and liabilities – Commodity transportation contracts 	<ul style="list-style-type: none"> – Floating interest rate financial assets and liabilities – Foreign currency denominated interest bearing financial assets and liabilities 	<ul style="list-style-type: none"> – Foreign operations
Hedging instruments	<ul style="list-style-type: none"> – Interest rate swaps – Commodity forward contracts 	<ul style="list-style-type: none"> – Interest rate swaps – Cross currency swaps 	<ul style="list-style-type: none"> – Foreign exchange forward contracts – Foreign currency denominated issued debt
Designation and documentation	At inception of the hedge relationship, documentation is required of the Consolidated Entity's risk management objective and strategy for the hedge, hedging instrument, hedged item, hedged risk and how the hedge relationship will meet the hedge effectiveness requirements.		
Hedge effectiveness method	<p>All hedge relationships are required to be assessed for hedge ineffectiveness both at the inception and throughout the hedge relationship by demonstrating that:</p> <ul style="list-style-type: none"> – an economic relationship exists between the hedged item and the hedging instrument – credit risk does not dominate the changes in value of either the hedged item or the hedging instrument – the hedge ratio is reflective of the Consolidated Entity's risk management approach. <p>The hedge effectiveness assessment is performed by a combination of qualitative and, where applicable, quantitative assessments. Changes in the hedge ratio, or rebalancing, may be required to adjust the hedged item or the hedging instrument.</p>		
Accounting treatment for the hedging instrument	Fair value through the income statement.	Fair value through the cash flow hedge reserve and then recognised in the income statement at the time at which the hedged item affects the income statement for the hedged risk.	Fair value through the foreign currency translation reserve and recognised in the income statement at the time at which there is a disposal of the hedged foreign operation or to non-controlling interests where there is a partial disposal of a subsidiary that remains consolidated.

Note 1

Summary of significant accounting policies continued

(xi) Derivative instruments continued

	Fair value hedge	Cash flow hedge	Net investment in a foreign operation hedge
Accounting treatment for the hedged item	Carrying value adjusted for changes in fair value attributable to the hedged risk.	Accounted for on an amortised cost basis or under other accounting standards.	Foreign exchange gains and losses are recognised in the Consolidated Entity's foreign currency translation reserve.
Accounting treatment for hedge ineffectiveness	Recognised in the income statement to the extent that changes in fair value of the hedged item attributable to the hedged risk are not offset by changes in fair value of the hedging instrument.	Recognised in the income statement to the extent to which changes in fair value of the hedging instrument exceed, in absolute terms, the change in the fair value of the hedged item.	
Accounting treatment if the hedge relationship is discontinued	Where the hedged item still exists, adjustments to the hedged item are amortised to the income statement on an effective interest rate basis.	The gain or loss remains in the cash flow hedge reserve to the extent that the hedged cash flows are still expected to take place and subsequently recognised in the income statement at the time at which the hedged item affects the income statement for the hedged risk. Where the hedged cash flows are no longer expected to take place, the gain and loss in the cash flow hedge reserve is recognised immediately in the income statement.	The gain or loss remains recognised in the foreign currency translation reserve until such time as there is a disposal of the hedged foreign operation or is recognised in non-controlling interests where there is a partial disposal of a subsidiary that remains consolidated.
Other accounting policies	None	The foreign currency basis spread of hedging instruments, being the liquidity charge for exchanging different currencies, is excluded from the hedge designation. This spread is deferred in the Consolidated Entity's reserves and released to the income statement at the time when the hedged exposure affects the income statement.	

AASB 139's hedge accounting requirements, which were applied prior to the adoption of AASB 9, for the Consolidated Entity and Company are substantially the same as that of AASB 9 with the exception of the requirement for the hedge to be highly effective and the limit on the application of hedge accounting for financial risks in non-financial contracts.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(xii) Margin money and settlement assets and liabilities

Margin money and settlement assets and liabilities includes trade settlement balances, margin money and client monies, balances with clearing houses. Margin and client money primarily represents deposits placed with clearing house or received from clients in relation to future trading and other derivatives transactions. The balance includes both initial margin and variance margin which varies based on trading activities. Settlement balances represents outstanding trade timing balances as at the reporting date due to the timing difference between trade date and settlement date. Balances are carried at amortised cost except for certain margin money balances in the form of money market funds and certain settlement balances which are carried at FVTPL.

(xiii) Financial investments

Investment securities in this category include investments in equity or debt securities which are not actively traded by the Consolidated Entity.

Debt investment securities in this category are in the nature of bonds, negotiable certificates of deposits (NCD), floating rate notes (FRN), commercial paper and other debt securities.

Financial investments are initially recognised at fair value adjusted for directly attributable transaction costs on settlement date and subsequently measured in accordance with the Consolidated Entity's accounting policy for financial instruments Note 1(viii).

(xiv) Loan Assets

This category includes loans and receivables that are not held for trading purposes and typically includes the Consolidated Entity's lending activities to its customers. Loan assets are initially recognised at fair value adjusted for directly attributable transaction costs on settlement date. Loan assets are subsequently measured in accordance with the Consolidated Entity's accounting policy for financial instruments Note 1(viii). Certain finance lease receivables are also presented under loan assets. For the detailed policy on Financial instruments refer to Note 1(viii).

(xv) Property, plant and equipment

Property, plant and equipment are stated at historical cost (which includes, where applicable, directly attributable borrowing costs) less, where applicable, accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure directly attributable to the acquisition of the asset. Property, plant and equipment includes assets leased out under operating leases. Depreciation on aviation assets is calculated on a diminishing balance method and depreciation on all other assets is calculated on a straight-line basis to allocate the difference between cost and residual values over their estimated useful lives, at the following annual depreciation rates:

Property, Plant and Equipment	Depreciation rate
Buildings	2 to 3.3%
Furniture, fittings and leasehold improvements ⁽¹⁾	10 to 20%
Equipment	33 to 50%
Infrastructure assets	2 to 10%
Aviation ⁽²⁾	2 to 8%
Meters	5 to 15%
Rail cars	3 to 5%
Telecommunications	33%
Other operating lease assets	2 to 50%

(1) Where remaining lease terms are less than five years, leasehold improvements are depreciated over the remaining lease term.

(2) Includes aircraft, for which depreciation is calculated on a diminishing-value basis.

Useful lives, residual values and depreciation methods are reviewed annually and reassessed in light of commercial and technological developments.

Adjustments arising from such items and on disposal of property, plant and equipment are recognised in the income statement.

Gains and losses on disposal are determined by comparing the proceeds with the asset's carrying amount and are recognised in other income as part of other operating income and charges.

(xvi) Goodwill and other identifiable intangible assets

Goodwill

Goodwill is measured as the excess of consideration, recognised NCI, and the fair value of previously held equity interests over the fair value of the identifiable net assets of the entity or business acquired. Goodwill arising from business combinations is included in intangible assets in the statement of financial position.

Other acquired identifiable intangible assets

At the time at which the Consolidated Entity determines that it controls an entity, the Consolidated Entity identifies intangible assets that are required to be initially recognised at fair value. An intangible asset is considered to have an indefinite useful life where it is expected to contribute to the Consolidated Entity's net cash inflows indefinitely.

Note 1

Summary of significant accounting policies continued

(xvi) Goodwill and other identifiable intangible assets continued

The following intangible assets are typically identified and recognised by the Consolidated Entity:

- Licences and trading rights: generally carried at cost less accumulated impairment loss. Where no contractual or legal limitation exists, these assets are not amortised because they are considered to have an indefinite useful life
- Customer and servicing contracts acquired with a finite useful life: carried at cost less accumulated amortisation and accumulated impairment loss. Amortisation is calculated over the period for which the customer relationship is expected to exist
- Customer and servicing contracts with an indefinite useful life: carried at cost less accumulated impairment loss.

Amortisation of intangible assets is recognised in other operating expenses and impairments are recognised in other operating income and charges.

Software

Certain internal and external costs directly incurred in acquiring and developing certain computer software programmes are capitalised and amortised over the estimated useful life, usually a period of three to seven years. The capitalised software asset is subject to impairment testing on an annual basis. Amortisation of computer software programmes and impairments, where applicable, is recognised in other operating expenses.

Cost incurred on the maintenance of software is expensed as incurred and recognised in other operating expenses.

(xvii) Deposits

Deposits include business banking and mortgage deposits and other balances such as client monies which are initially recognised at fair value less directly attributable transaction costs and are subsequently measured at amortised cost.

(xviii) Other assets and liabilities

Life investment linked assets and liabilities

Life investment policies consist of two components: a financial instrument (deposit component) and an investment management fee. The investment management fee is recognised in the income statement over the period for which the service is provided. The deposit component of the financial instrument is designated at fair value through profit or loss to eliminate the accounting mismatch created by the Life investment linked assets, which are managed on a fair value basis and measured at FVTPL. Life investment contract liabilities are directly linked to the performance and market value of the assets that back them and the fair value is measured as the minimum current surrender value. Withdrawals and surrenders of life investment contracts are treated as a reduction in the investment contract liability.

Non-current assets and liabilities of disposal groups classified as held for sale

This category includes interests in businesses, subsidiaries, associates and joint ventures and other assets and liabilities, and subsidiaries that are acquired exclusively with a view to sale or distribute, for which their carrying amount will be recovered principally through a sale or distribution transaction rather than through continuing use. These assets and disposal groups are classified as held for sale when they are available for immediate sale in their present condition and it is highly probable that it will be sold or distributed within 12 months. Where there is a planned partial disposal of a subsidiary resulting in loss of control, but the Consolidated Entity retains an interest in the disposed subsidiary, the entire carrying value for the subsidiary's assets and liabilities are classified as held for sale.

Non-current assets and liabilities of disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. Equity accounting and depreciation are suspended when the held for sale criteria is satisfied.

An impairment loss is recognised for any initial or subsequent write down of the asset to fair value less costs to sell and is recognised in the income statement. A gain is recognised for any subsequent increase in fair value less costs to sell, limited to the cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of sale is recognised at the date of sale.

Financial assets and liabilities that are classified as held for sale are measured in accordance with the Consolidated Entity's financial instruments policies.

Provisions

Provisions are recognised when it is probable that an outflow of economic benefits will be required to settle a present legal or constructive obligation that has arisen as a result of past events and for which a reliable estimate can be made.

A contingent liability is disclosed when there is a possible obligation or a present obligation that may, but probably will not, require an outflow of resources. Refer to Note 30 *Contingent liabilities and commitments*.

Employee benefits provision

A liability for employee benefits is recognised by the entity that has the obligation to the employee. Generally, this is consistent with the legal position of the parties to the employment contract.

Liabilities for unpaid salaries, salary related costs and provisions for annual leave are recorded in the statement of financial position at the salary rates which are expected to be paid when the liability is settled. Provisions for long service leave and other long-term benefits are recognised at the present value of expected future payments to be made.

In determining this amount, consideration is given to expected future salary levels and employee service histories. Expected future payments are discounted to their net present value using discount rates on high quality corporate bonds, except where there is no deep market, in which case rates on Commonwealth Government securities are used. Such discount rates have terms that match as closely as possible the expected future cash flows.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(xviii) Other assets and liabilities continued

Provisions for unpaid employee benefits are derecognised when the benefit is settled or is transferred to another entity and the Company and Consolidated Entity are legally released from the obligation and do not retain a constructive obligation.

Dividends

Provisions for dividends to be paid by the Company are recognised in the statement of financial position as a liability and a reduction in retained earnings when the dividend has been declared.

(xix) Bank borrowings

Bank borrowings includes loans and other payables due to banks and financial institutions. These balances are subsequently measured at amortised cost using the EIR method.

(xx) Due to/from related body corporate entities and subsidiaries

Transactions between the Consolidated Entity and other related body corporate entities under common control and between the Company and its subsidiaries, principally arise from the provision of banking and other financial services, lending arrangements and acceptance of funds on deposit, the provision of management and administration services, facilities and accommodation and the provision of guarantees. These transactions are measured at amortised cost except for lending arrangements that do not satisfy the SPPI criterion. Refer Note 1(v) *Revenue and expense recognition* for revenue recognition and Note 1(viii) *Financial instruments* for more details on the recognition, classification and measurement of financial instruments.

(xxi) Debt issued

Debt issued includes debt securities issued by the Consolidated Entity. These balances are subsequently measured at amortised cost using the EIR method and at fair value for DFVTPL items.

(xxii) Loan Capital

Loan capital is debt issued by the Consolidated Entity with terms and conditions that qualify for inclusion as capital under Australian Prudential Regulatory Authority (APRA) Standards. For compound instruments that have both equity and liability features, the liability component is initially measured at fair value plus directly attributable transaction costs (and is thereafter measured at amortised cost using the EIR method), with the residual being accounted for within the Consolidated Entity's equity.

Capital instruments with conversion features, such as Common Equity Capital Trigger Events or Non-Viability Trigger Events are assessed as to whether they contain embedded derivatives and, where applicable, changes in the fair value of the embedded derivative are recognised as part of net trading income to the extent the derivative is not considered closely related to the capital instrument.

(xxiii) Impairment

Expected credit losses

The ECL requirements apply to financial assets measured at amortised cost and FVOCI, lease receivables, amounts receivable from contracts with customers, loan commitments, certain letters of credit and financial guarantee contracts.

The Consolidated Entity applies a three-stage approach to measuring the ECL based on changes in the asset's underlying credit risk and includes forward-looking or macro-economic information (FLI). Where ECL is modelled collectively for portfolios of exposures, it is modelled as the product of the probability of default (PD), the loss given default (LGD) and the exposure at default (EAD).

The calculation of ECL requires judgement and the choice of inputs, estimates and assumptions. Refer Note 11 *Expected credit losses* for further information. Outcomes within the next financial period that are different from management's assumptions and estimates could result in changes to the timing and amount of ECL to be recognised.

The ECL is determined with reference to the following stages:

(i) Stage I – 12 month ECL

At initial recognition, and for financial assets for which there has not been a significant increase in credit risk (SICR) since initial recognition (or for those financial assets for which the credit risk is considered to be low), ECL is determined based on the PD over the next 12 months and the lifetime losses associated with such PD, adjusted for FLI.

Interest income is determined by applying the financial asset's EIR to the financial asset's gross carrying amount.

(ii) Stage II – Lifetime ECL not credit-impaired

When there has been a SICR since initial recognition, the ECL is determined with reference to the financial asset's life-time PD and the lifetime losses associated with that PD, adjusted for FLI. The Consolidated Entity assesses whether there has been a SICR since initial recognition based on qualitative, quantitative, and reasonable and supportable FLI that includes significant management judgment.

Use of more alternative criteria could result in significant changes to the timing and amount of ECL to be recognised. Lifetime ECL is generally determined based upon the contractual maturity of the financial asset. For revolving facilities, the Consolidated Entity exercises judgement based on the behavioural, rather than contractual characteristics of the facility type.

Interest income is determined by applying the financial asset's EIR to the financial asset's gross carrying amount.

(iii) Stage III – Lifetime ECL credit-impaired

Financial assets are classified as Stage III where they are determined to be credit impaired, which generally matches the APRA definition of default. This includes exposures that are at least 90 days past due and where the obligor is unlikely to pay without recourse against available collateral.

The ECL for credit impaired financial assets is generally measured as the difference between the contractual and expected cash flows from the individual exposure, discounted using the EIR for that exposure. For credit-impaired exposures that are modelled collectively, ECL is measured as the product of the lifetime PD, LGD and EAD, adjusted for FLI.

Note 1

Summary of significant accounting policies continued

(xxiii) Impairment continued

Interest income is determined by applying the financial asset's EIR to the financial asset's amortised cost carrying value, being the gross carrying value after the ECL provision.

(iv) Purchased or originated credit-impaired financial assets

Purchased or originated credit-impaired (POCI) financial assets are initially recognised at fair value with interest income subsequently determined using a credit-adjusted EIR.

The credit-adjusted EIR is the EIR adjusted for expected credit losses on initial recognition.

The ECL is measured as the product of the lifetime PD, LGD and EAD adjusted for FLI or by discounting the difference between the contractual and expected cash flows from the individual exposure using the credit-adjusted EIR, with increases and decreases in the measured ECL from the date of origination or purchase being recognised in the income statement as either an impairment gain or loss.

Presentation of loss allowances

The loss allowances for ECL are presented in the statement of financial position as follows:

- (i) Loan assets, loans to related body corporate entities and subsidiaries, associates and joint ventures measured at amortised cost – as a deduction to the gross carrying amount
- (ii) Loan assets, loan to associates and joint ventures, and debt financial investments measured at fair value through OCI – as a reduction in the fair value reserve account under equity. The carrying amount of the asset is not adjusted as it is recognised at fair value
- (iii) Lease receivables, contract receivables and other assets measured at amortised cost – as a deduction to the gross carrying amount
- (iv) Undrawn credit commitments – as a provision included in other liabilities.

When the Consolidated Entity concludes that there is no reasonable expectation of recovering cash flows from financial asset and all possible collateral has been realised, the financial asset is written off, either partially or in full, against the related provision. Recoveries of loans previously written off are recorded based on the cash received.

Prior to the adoption of AASB 9, credit impairment provisions were recognised on an incurred loss basis. Key differences included:

- *an impairment loss was recorded where there was objective evidence of impairment as a result of one or more events (loss event) which had an impact on the estimated future cash flows of the financial asset that could be reliably estimated*
- *where the credit risk of an exposure had deteriorated but there was no objective evidence of impairment, no credit impairment was required to be recognised*
- *forward looking or macroeconomic information was not required to be incorporated into the determination of the credit impairment loss*
- *credit impairments were only required to be recognised for on-balance sheet exposures.*

Credit impairments were calculated on the basis of the difference between the exposure's carrying value and the present value of expected future cash flows, discounted using the original EIR.

For available for sale debt securities, where there was objective evidence of impairment and the fair value of the financial asset was less than its initial carrying amount then the cumulative loss was transferred from OCI to the income statement. Impairment losses recognised for debt investment securities classified as available for sale were subsequently reversed through the income statement if the fair value increased and the increase was objectively related to an event after the impairment loss was recognised in the income statement.

Impairment of interests in associates and joint ventures

The Consolidated Entity performs an assessment at each balance date to determine whether there is any objective evidence that its interests in associates and joint ventures are impaired. The main indicators of impairment are significant changes in the market, economic or legal environment and a significant or prolonged decline in fair value below cost. In making this judgement, the Consolidated Entity evaluates, among other factors, the normal volatility in share price and the period of time for which fair value has been below cost.

If there is an indication that an investment in an associate or joint venture may be impaired, then the entire carrying amount of the investment in the associate or joint venture is tested for impairment by comparing the recoverable amount, being the higher of value in use and fair value less costs to sell, with its carrying amount.

Impairment losses recognised in the income statement for investments in associates and joint ventures are subsequently reversed through the income statement if there has been a change in the estimates used to determine the recoverable amount since the impairment loss was recognised.

Fair value less costs to sell is estimated using market based approaches using revenues, earnings and assets under management and multiples based on companies deemed comparable as well as other publicly available information relevant to the business.

Value in use is calculated using pre-tax cashflow projections of operating revenue and expenses. Forecasts are extrapolated using a growth rate and discounted using a discount rate incorporating market risk determinants, adjusted for specific risks related to the cash generating units, if any, and the environment in which it operates.

Impairment of investments in subsidiaries

Investments in subsidiaries in the Company's financial statements are reviewed annually for indicators of impairment or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment is recognised for the amount by which the investment's carrying amount exceeds its recoverable amount, being the higher of fair value less costs to sell and value in use. At each reporting date, investments in subsidiaries that have been impaired are reviewed for possible reversal of impairment.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 1

Summary of significant accounting policies continued

(xxiii) Impairment continued

Impairment of goodwill and other intangible assets and property, plant and equipment

Intangible assets with indefinite lives (goodwill and certain intangible assets) are not subject to amortisation but are tested annually for impairment, or more frequently if events or changes in circumstances indicate that the carrying amount may not be recoverable. For intangible assets that have a finite useful life and property, plant and equipment, an assessment is made at each reporting date for indications of impairment.

Impairment losses are recognised in other impairment charges as part of other operating income and charges for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell and value in use.

For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating units). Intangible assets (other than goodwill) for which an impairment loss was recognised, are reviewed for possible reversal of the impairment at each reporting date.

In relation to businesses acquired and held for disposal, the individual business is treated as a cash generating unit. Assets associated with strategic business acquisitions are allocated to each of the operating segments (see Note 3 *Segment reporting*) and assessed for impairment.

(xxiv) Performance based remuneration

Share-based payments

The ultimate parent company, MGL operates share-based compensation plans, which include awards (including those delivered through the Macquarie Group Employee Retained Equity Plan (MEREP)) granted to employees under share acquisition plans. Information relating to these schemes is set out in Note 29 *Employee equity participation*. The Consolidated Entity accounts for its share-based payments as follows:

- **Equity settled awards:** The awards are measured at their grant date fair value and based on the number of equity instruments expected to vest. Expenses are recognised as part of employment expenses with a corresponding increase in equity with reference to the vesting period of those awards. Performance hurdles attached to Performance Share Units (PSUs) under the MEREP are not taken into account when determining the fair value of the PSUs at the grant date. Instead, these vesting conditions are taken into account by adjusting the number of equity instruments expected to vest. On vesting, the amount recognised in the share-based payment reserve is transferred to contributed equity.

- **Cash settled awards:** The liability of the awards is measured with reference to the number of awards and the fair value of those awards at each reporting date. Expenses are recognised as part of employment expenses with reference to the vesting period of those awards. Changes in the value of the liability are recognised in employment expenses.

Profit share remuneration

The Consolidated Entity recognises a liability and an expense for profit share remuneration to be paid in cash with reference to the performance period to which the profit share relates.

(xxv) Leases

Determine whether an arrangement contains a lease

At inception of an arrangement, the Consolidated Entity determines whether the arrangement is or contains a lease.

At inception or on reassessment of an arrangement that contains a lease, the Consolidated Entity separates payments and other consideration required by the arrangement into those for the lease and those for other elements on the basis of their relative fair values.

Arrangement where the Consolidated Entity is the lessor

Leases where the lessee has substantially all the risks and rewards incidental to ownership of the leased assets are classified as finance leases. All other leases are classified as operating leases.

Finance lease

Where finance leases are granted to third parties, the present value of the minimum lease payments plus an estimate of the value of any unguaranteed residual value is recognised as a receivable and included in loan assets. The difference between the gross receivable and the present value of the receivable is unearned interest income. Lease receipts are discounted using the interest rate implicit in the lease. Lease income is recognised over the term of the lease using the EIR method, which reflects a constant rate of return.

Operating lease

Where the Consolidated Entity is the lessor under an operating lease, the underlying asset is carried at cost and depreciated over their useful lives which vary depending on each class of asset and range from 2 to 50 years (Note 1(xv) *Property, plant and equipment*). Operating lease income is recognised on a straight-line basis over the period of the lease unless another systematic basis is more appropriate. Assets leased out under operating leases are included in property, plant and equipment.

Arrangement where the Consolidated Entity is the lessee

Leases entered into by the Consolidated Entity as lessee are primarily operating leases. The total fixed payments made under operating leases are charged to the income statement on a straight-line basis over the period of the lease. The difference between the cumulative expense recognised and cash paid is recorded on the balance sheet.

Note 1

Summary of significant accounting policies continued

(xxvi) Contributed equity

Ordinary shares and other similar instruments are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

(xxvii) Fiduciary assets

The Consolidated Entity engages in trust, fund or other fiduciary activities that result in the holding or placing of assets on behalf of third parties. These assets and the income arising directly thereon are excluded from the Consolidated Entity's financial statements as they are not assets of the Consolidated Entity. However, fee income earned, and fee expenses incurred by the Consolidated Entity relating to its responsibilities from fiduciary activities are recognised in its income statement.

(xxviii) Cash and cash equivalents

Cash and cash equivalents comprise of:

- cash and bank balance
- certain trading assets and liquid financial investments with an original contractual maturity of three months or less.

(xxix) Investment property

Investment properties are initially recognised at cost and subsequently stated at fair value at each balance date. Any change in fair value is recognised in other income as part of other operating income and charges.

(xxx) Discontinued operations

Discontinued operations are a component of the entity's business that represents a separate major line of business or area of operation that has been disposed of or is classified as held for sale. The classification as a discontinued operation occurs upon disposal or when the operation meets the criteria to be classified as held for sale, if earlier. When an operation is classified as a discontinued operation, the comparative income statement is re-presented as if the operation had been discontinued from the start of the comparative period. The results of the discontinued operations are presented separately on the face of the income statements. Transactions between continuing and discontinuing operations are presented on a gross basis.

Assets and liabilities of discontinued operations are derecognised on the date of disposal and a realised gain or loss is presented separately in the income statement.

Cash flows generated from discontinued operations are separately presented in the statement of cash flows.

(xxxi) Comparatives

Where necessary, comparative information has been restated to conform to changes in presentation in the current year.

(xxxii) Rounding of amounts

In accordance with ASIC Corporations (Rounding in Financial/Directors' Reports) Instrument 2016/191, amounts in the Directors' Report and Financial Report have been rounded off to the nearest million Australian dollars unless otherwise indicated.

(1) The change in ECL relating to financial assets under AASB 9 is recorded under Credit impairment charges. Individual and collective provisions for prior financial year remain in accordance with AASB 139 and have not been restated as permitted by AASB 9.

(2) Includes ECL on Due from subsidiaries \$6 million for the company.

(3) The current year includes fair value gains and losses and dividend income from investments that have been classified as at FVTPL. Prior financial year includes gain from sale of and dividend income from available for sale investments.

(4) Prior financial year primarily includes gain on sale of DFVTPL debt investments of \$46 million.

(5) Income and expense related to the discontinued operations have been presented as part of 'Profit from discontinued operations after income tax' under Note 40 *Discontinued operations*. The prior year comparatives have been reclassified in accordance with AASB 5 to conform to the current financial year presentation.

(1) On adoption of AASB 15 from 1 April 2018, fee expense relating to stock lending activities of \$143 million and certain recoverable costs of \$107 million, previously recognised net of associated revenue, have been reclassified to fee and commission expenses and other expenses respectively. Prior financial year comparatives were not reclassified.

(2) Other expenses include service cost recoveries from Consolidated Entity's related corporate entity, Macquarie Group Services Australia Pty Limited (MGSA).

(3) Income and expense related to the discontinued operations have been presented as part of 'Profit from discontinued operations after income tax' under Note 40 *Discontinued operations*. The prior year comparatives have, in accordance with AASB 5, been reclassified to conform to the current financial year presentation.

This page has been intentionally left blank.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 3

Segment reporting

(i) Operating segments

AASB 8 *Operating Segments* requires the 'management approach' to disclose information about the Consolidated Entity's reportable segments. The financial information is reported on the same basis as used internally by senior management for evaluating operating segment performance and for deciding how to allocate resources to operating segments. Such information may be produced using different measures to that used in preparing the statutory income statement.

For internal reporting, performance measurement and risk management purposes, the Consolidated Entity is divided into three Operating Groups and a Corporate segment. As a result of the re-organisations, as noted below, MAM is no longer an Operating Group in the Consolidated Entity.

These segments have been set up based on the different core products and services offered. Segment information has been prepared in accordance with the basis of preparation described below.

The Operating Groups comprise:

- **CAF's** Asset Finance business delivers a range of tailored finance solutions globally across a variety of industries and asset classes
- **BFS** provides a diverse range of personal banking, wealth management, business banking and vehicle finance products and services to retail clients, advisers, brokers and business clients
- **CGM** provides integrated, end-to-end offering across global markets including equities, fixed income, foreign exchange and commodities.

In the second half of the current year, certain businesses were reorganised between Operating Group to better align businesses with a shared focus on particular customer segments and geographies:

- Macquarie's Australian vehicles finance business moved from CAF into BFS
- MAM's MSIS business moved into CAF.

Comparatives have been restated to reflect this reorganisation between Operating Groups.

Effective 10 December 2018, CAF's Principal Finance and Transportation Finance businesses have been transferred from the Bank Group to the Non-Bank Group to simplify the overall structure of MGL and better reflect the latest activities of the individual businesses. The financial information disclosed relates to the Consolidated Entity's continuing operations

The **Corporate** segment, which is not considered an Operating Group, comprises head office and central service groups, including Group Treasury, and certain investments that are neither core for strategic reasons nor aligned to an Operating Group.

Items of income and expense within the Corporate segment include the net result of managing Macquarie's liquidity and funding requirements, earnings on capital and the residual accounting volatility relating to economically hedged positions

for which hedge accounting has been achieved as well as accounting volatility for other economically hedge positions for which hedge accounting is not able to be achieved. Other items of income and expenses include earnings from investments, central overlay on credit and other impairments or valuation of assets, unallocated head office costs and costs of central service groups, the Consolidated Entity's performance-related profit share and share-based payments expense, income tax expense and certain distributions attributable to non-controlling interests and holders of Macquarie Income Securities (MIS).

Below is a selection of key policies applied in determining operating segment results.

Internal funding arrangements

Group Treasury has the responsibility for managing funding for the Consolidated Entity, and Operating Groups obtain their funding from Group Treasury. The interest rates charged by Group Treasury are determined by the currency and term of the funding. Break costs are charged to Operating Groups for the early repayment of term funding.

Generally, Operating Groups may only source funding directly from external sources where the funding is secured by the assets of the Operating Group. In such cases the Operating Group bears the funding costs directly and Group Treasury may levy additional charges where appropriate.

Deposits are a funding source for the Consolidated Entity. BFS receives a deposit premium from Group Treasury on deposits they generate. This deposit premium is included within net interest and trading income for segment reporting purposes.

Transactions between Operating Segments

Operating Segments that enter into arrangements with other Operating Segments must do so on commercial terms or as agreed by the Consolidated Entity's CEO or Chief Financial Officer. There is a requirement for accounting symmetry in such transactions.

Internal transactions are recognised in each of the relevant categories of income and expense and eliminated on aggregation/consolidation as appropriate.

Accounting for derivatives that economically hedge interest rate risk

For businesses that predominately earn income from lending activities (CAF and BFS), derivatives that economically hedge interest rate risk are required to be measured at fair value. This volatility is recognised in net trading income unless hedge accounting is applied by the Consolidated Entity, where either the hedged item is revalued for the hedged risk to remove the volatility, or the fair value volatility on the derivative is deferred until the hedged transaction is recognised in the income statement. For segment reporting, derivatives are accounted for on an accrual basis in the results of CAF and BFS with changes in fair value recognised within Corporate, managed via the application of hedge accounting.

Central Service Groups

Central Service Groups recover their costs from Operating Groups generally on either a time and effort allocation basis or a fee for service basis. The Central Service Groups include Corporate Operations Group (COG), Financial Management Group (FMG), Risk Management Group (RMG), Legal and Governance and Central Executive.

Performance-related profit share and share-based payments expense

Performance-related profit share and share-based payments expense relating to the Macquarie Group Employee Retained Equity Plan (MEREP) is recognised in the Corporate segment and not allocated to Operating Groups.

Income tax

Income tax expense and benefits are recognised in the Corporate segment and not allocated to the Operating Groups. However, to recognise an Operating Group's contribution to permanent income tax differences, an internal management revenue/charge is used. These internal management revenue/charges are offset by an equal and opposite amount recognised in the Corporate segment such that they are eliminated on consolidation.

Presentation of segment income statements

The income statements in the following pages for each of the reported segments are in some cases summarised by grouping non-material balances together. Where appropriate, all material or key balances have been reported separately to provide users with information relevant to the understanding of the Consolidated Entity's financial performance. The financial information disclosed relates to the Consolidated Entity's ordinary activities.

Reportable segment assets

Segment assets are the external operating assets that are employed by a segment in its operating activities.

Segment reporting continued

(iii) Products and services

For the purpose of preparing a segment report based on products and services, the activities of the Consolidated Entity have been divided into the following four areas:

- **Lending:** corporate and structured finance, banking activities, mortgages and leasing
- **Financial Markets:** trading in fixed income, equities, currency, commodities and derivative products
- **Asset and Wealth Management:** manufacture and distribution of fund management products
- **Capital Markets:** underwriting, facilitation, broking and real estate/property development.

	CONSOLIDATED	
	2019 \$m	2018 \$m
Revenue from external customers		
Lending	4,655	4,349
Financial Markets	4,595	3,475
Asset and Wealth Management	790	510
Capital Markets	133	102
Total revenue from external customers⁽¹⁾	10,173	8,436

(1) Revenue from external customers includes fee and commission income relating to contracts with customers, interest and similar income, net trading income, operating lease income, income associated with investing activities and other income.

(iv) Geographical areas

Geographical segments have been determined based on where the transactions have been recorded. The operations of the Consolidated Entity are headquartered in Australia.

	CONSOLIDATED 2019		CONSOLIDATED 2018

(1) The ECL relating to loan assets under AASB 9 are recorded under ECL allowance. As the prior year has not been restated for AASB 9, individually assessed provisions and collective allowance for credit losses provided for as at March 2018 remain in accordance with AASB 139, accordingly the amounts are not necessarily comparable.

(2) Includes \$10,753 million (2018: \$11,560 million) held by consolidated Special Purpose Entities (SPEs), which are available as security to Note holders and debt providers.

(3) Gross balance as at 31 March 2019 includes \$366 million (Company: \$468 million) of loans measured at FVTPL and \$146 million (Company: \$146 million) of loans measured at DFVTPL which are not subject to ECL allowance under AASB 9. This also includes \$37,698 million of loans measured at FVOCI for the Company on which an ECL allowance of \$46 million has been recognised in OCI and is hence not included in carrying value above.

Of the above amounts, \$22,510 million (2018: \$23,582 million) is expected to be recovered within 12 months of the balance date by the Consolidated Entity and \$17,741 million (2018: \$15,234 million) by the Company.

Repossessed collateral

In the event of a customer default on facilities, the Consolidated Entity may take possession of real estate or other assets held as security. During the financial year, the Consolidated Entity has taken possession of fixed assets and property assets with a carrying value of \$32 million (2018: \$66 million) for cases of corporate, commercial and other lending where its customers defaulted on facilities.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Loan assets continued		
The table below represents the movements in individually assessed provisions and collective allowance for credit losses for the year ended 31 March 2018. Refer to Note 11 <i>Expected credit losses</i> , for the reconciliation of ECL on loan assets for the year ended 31 March 2019.		
Individually assessed provisions for impairment		
Balance at the beginning of the financial year	357	379
Provided for during the financial year	91	80
Loan assets written off or sold, previously provided for	(311)	(275)
Recovery of loans previously provided for	(23)	(20)
Net transfer from collective provisions	5	5
Foreign exchange movements	1	1
Balance at the end of the financial year	120	170
Individually assessed provisions as a percentage of total gross loan assets	0.17%	0.34%
Collective allowance for credit losses		
Balance at the beginning of the financial year	396	261
Reversed during the financial year	(140)	(114)
Disposal during the financial year	(7)	–
Net transfer to individually assessed provisions	(5)	(5)
Foreign exchange movements	3	1
Balance at the end of the financial year	247	143

Finance lease receivables

Finance lease receivables are included within loan assets. The Consolidated Entity provides finance leases to a broad range of clients to support financing needs in acquiring movable assets such as motor vehicles, small plant and equipment, electronic and IT equipment. Finance lease receivables do not include retail products such as hire purchase, mortgages related to movable property and consumer loans.

Note 11

Expected credit losses

At the reporting date the Consolidated Entity has presented the ECL allowances in its statement of financial position as follows:

- financial assets measured at amortised cost: Deduction against the gross carrying amount
- debt investments measured at FVOCI: Included in OCI since the asset's carrying value is measured at fair value
- undrawn credit commitments, financial guarantee contracts and letters of credit: Recognised as a provision and included in other liabilities
- purchased or originated credit-impaired financial assets: Recognised as part of the net carrying value of the asset.

Transition impact

On transition to AASB 9 on 1 April 2018 the Consolidated Entity's total credit impairment allowances increased by \$165 million as a result of the following principle differences between AASB 139's incurred credit loss requirements and AASB 9's ECL impairment requirements:

- Forward-Looking Information (FLI): AASB 9 requires the calculation of the ECL to include FLI, which incorporates macro-economic information. Previously AASB 139 required the consideration of historical information that was updated to reflect current conditions at the balance sheet date
- a 12-month minimum ECL requirement (stage I): AASB 9 requires a 12-month ECL impairment allowance to be held on all exposures, unless the contractual period is shorter
- Significant Increase in Credit Risk (SICR) (stage II): AASB 9 requires the Consolidated Entity to determine whether there has been a SICR since initial recognition, and in such instances, to classify the exposure as stage II and recognise a lifetime expected credit loss
- off balance sheet exposures: AASB 9's scope includes certain off balance sheet exposures such as undrawn credit commitments, financial guarantee contracts and letters of credit for which an ECL is required to be recognised. No impairment allowance was specifically required to be recognised under AASB 139.

Model inputs

The Consolidated Entity models the ECL for on-balance sheet financial assets measured at amortised cost or FVOCI such as loans, debt securities and lease receivables, as well as off-balance sheet items such as undrawn loan commitments, certain financial guarantees and letters of credit. The Consolidated Entity segments its credit portfolio between retail and wholesale exposures, and further splits these portfolios into representative groupings which are typically based on shared risk characteristics. These groupings are subject to review to ensure that the portfolios remain homogeneous.

For retail portfolios, behavioural variables are also considered in the determination of inputs for ECL modelling.

The key model inputs used in measuring the ECL include:

- Exposure at default (EAD): The EAD represents the estimated exposure in the event of a default. The EAD is estimated taking into consideration a range of possible exposures including both repayments and future drawdowns of unutilised commitments up to when the exposure is expected to default
- Probability of default (PD): The calculation of PDs for retail and wholesale exposures is generally performed at a facility level. Retail exposures are segmented based on product type and shared characteristics that are highly correlated to credit risk such as region, product, counterparty groupings, loan-to-value ratio (LVR) and other similar criteria. In calculating the PD, credit performance information for each portfolio is gathered and statistically analysed to determine a point in time PD. Wholesale portfolio PDs are a function of industry type, internal credit ratings and transition matrices used to determine a point in time PD estimate. PD estimates for both retail and wholesale portfolios are also adjusted for FLI
- Loss given default (LGD): The LGD associated with PD used is the magnitude of the ECL in a default event. The LGD is estimated using historical loss rates considering relevant factors for individual exposures or portfolios. These factors include collateral, seniority, industry, recovery costs and the structure of the facility. LGD estimates are also adjusted for FLI.

Method of determining significant increase in credit risk (SICR)

The Consolidated Entity periodically assesses exposures to determine whether there has been a SICR, which may be evidenced by either qualitative or quantitative factors. Quantitative factors are described below for the Consolidated Entity's material retail and wholesale portfolios. Qualitative factors include, but are not limited to, whether an exposure has been identified and placed on CreditWatch. Where there is a deteriorating credit risk profile, the exposures are monitored on a monthly basis through the CreditWatch reports. The business remains responsible for management of the counterparty and of the risk position, but RMG oversight is increased to ensure that positions are managed for optimal outcomes. All exposures on CreditWatch are classified as stage II or, if defaulted, as stage III.

SICR thresholds, which require judgement, are used to determine whether an exposure's credit risk has increased significantly. The SICR methodology is based on a relative credit risk approach which considers changes in an underlying exposure's credit risk since origination. This may result in exposures being classified in stage II that are of a higher credit quality than other exposures that are classified as stage I. Accordingly, while increases in the quantum of stage II exposures will suggest an increase in credit risk, it should not necessarily be inferred that the assets are of a lower credit quality.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 11

Expected credit losses continued

Retail exposures

Exposures are assigned a behavioural score which considers the exposure's lifetime PD on initial recognition. This behavioural score is periodically assessed and updated to reflect changes in the underlying exposure's behaviour. The score includes factors such as limit utilisation, payment history (including delinquency) and product specific features (for example cash advances for credit cards or changes in novation status for selected car leases).

SICR thresholds referencing the movement between origination and reporting date behavioural score movements have been established that, where exceeded, result in the exposure being categorised as stage II. Where the behavioural score subsequently improves such that the change since origination is back within the SICR threshold, the exposure is assessed for categorisation back to stage I. The pre-defined SICR thresholds are periodically reviewed and calibrated based on historical default experience.

Wholesale exposures

The Consolidated Entity assigns an internal credit rating to each exposure at origination based on information available at that date. These internal ratings are broadly aligned to external credit rating agencies such as Standard & Poor's and Moody's. The internal ratings for each exposure are reviewed at least once a year, or more frequently if necessary, to ensure any deterioration is identified and reflected in an adjustment to their rating. Furthermore, other indicators of deterioration in credit quality are regularly monitored, such as payment history, credit limit utilisation, requests to modify the debt for forbearance, changes in the exposure's business, external data from credit reference agencies, media reports, external credit ratings external quoted bond and credit default swap prices.

Where an exposure's assigned credit rating deteriorates beyond pre-defined thresholds, the exposure is categorised as stage II. If the exposure's rating subsequently improves so that it does not exceed the threshold, the exposure is assessed for reclassification to stage I. The methodology has been calibrated so that a larger change in rating is required for higher quality credit rated exposures than for lower quality credit rated exposures to be classified as stage II. The rating methodology is periodically reviewed and calibrated based on historical default experience.

For both retail and wholesale portfolios

- The AASB 9 'low credit risk' exemption is not applied by the Consolidated Entity to material portfolios
- For material retail portfolios the credit risk for an exposure or portfolio is generally deemed to have increased significantly if the exposure is more than 30 days past due, unless there are product specific characteristics that indicate that this threshold should be rebutted.

Definition of default

The Consolidated Entity's definition of default determines the reference point for the calculation of the ECL components, and in particular the PD. Default is generally defined as the point when the borrower is unlikely to pay its credit obligations in full, without recourse by the Consolidated Entity to the realisation of collateral;

or the borrower is 90 days or more past due. The Consolidated Entity periodically monitors its exposures for potential indicators of default such as significant financial difficulty of the borrower including breaches of lending covenants; it is probable that the borrower will enter bankruptcy or other financial reorganisation; the disappearance of an active market for that financial asset because of financial difficulties; or the purchase or origination of a financial asset at a deep discount that reflects the incurred credit losses.

Retail and wholesale exposures that are identified as in default can be reclassified from stage III following a pre-defined period over which the exposure demonstrates that it has returned to a performing status and, in the case of wholesale exposures, based on an individual assessment of the exposure.

Forward-looking information (FLI)

The inclusion of FLI in calculating ECL allowances adjusts the PD, the determination of SICR as well as the LGD (that is relevant to the determination of the recovery rates on collateral). The Consolidated Entity has identified a number of key indicators that are used in modelling the ECL, the most significant of which are gross domestic product (GDP), unemployment rate and the level of house prices, interest rates, equity indices and commodity prices. The predicted relationships between these key indicators and the key model inputs in measuring the ECL have been developed by analysing historical data as part of the development of internal models, calibration and validation process. These indicators, both in terms of the magnitude and type of indicator, are reviewed throughout the financial year.

The Consolidated Entity's Risk Management Group, which consults with a range of internal specialists, is responsible for the FLI including the development of scenarios and the weighting applied to those scenarios. For this purpose, four possible economic scenarios have been developed, being one upside case, two downside cases (of varying severity given that impairment losses will not react linearly to economic downturn scenarios) as well as a base case scenario. In calculating the ECL, each of the scenarios is probability weighted and then applied to the exposure's PDs and LGDs. The scenarios and the assigned probabilities are updated semi-annually or more frequently if a material disruption event were to occur.

The scenarios, including its underlying indicators, are developed using a combination of publicly available data, internal forecasts and third party information to form the initial baseline. Internal specialists within the Consolidated Entity are consulted to assist in refining and challenging the baseline. The upside and downside scenarios are created through a process that initially anchors them to a certain degree of deviation in GDP growth from the baseline. The scenarios are refined through consultation with internal specialists and benchmarking to external data from reputable sources, which includes forecasts published from a range of market economists and official data sources, including major central banks. Assigning probabilities to these scenarios requires professional judgement which draws on internal risk and economics specialist input and comparison to general market outlooks and publicly-available market commentary.

The scenarios and the associated probabilities are ultimately approved by senior risk and finance executives.

Note 11

Expected credit losses continued

The Consolidated Entity reviews and, where appropriate, updates its FLI, which includes the scenarios and related probabilities, on a semi-annual basis. There have been some changes in the scenarios and the probabilities assigned thereto from the date of transition to AASB 9 to 31 March 2019. The key elements for each of the key regions where the Consolidated Entity's ECL is derived have been set-out below:

Scenario	Weighting	Expectation
Baseline	Probable	<p>Global: The baseline scenario assumes global economic performance is relatively stable throughout most of the forecast period.</p> <p>Australia: GDP growth is forecast to slow down significantly during the first half of 2019 and recover to a moderate pace after 2020, house prices continue to decline in 2019 and recover thereafter, the unemployment rate initially rises and then remains stable, and the Reserve Bank of Australia (RBA) cuts its cash rate in 2019 and resumes hikes in 2021.</p> <p>United States: Growth is forecast to decelerate through mid-2020 and remain stable through to the end of the forecast period, while 10-year government bond yields are expected to rise by 2020 and the unemployment rate is expected to remain stable at low levels.</p> <p>Europe: Moderate to low growth forecasted for the forecast period, 10-year government bond yields increasing from late 2020 and levels of unemployment slowly falling.</p>
Upside	Possible	<p>Global: Marginally higher growth in GDP against the baseline scenario during the forecast period.</p> <p>Australia: Marginally higher GDP over the baseline scenario during the forecast period. Following the RBA increasing the cash rate in 2019, house prices decline but recover during 2020 and end higher than current peak price levels.</p> <p>United States: Marginally higher GDP over the baseline during the forecast period with a peak early in 2019 and moderating thereafter. 10-year government bond yields peak higher than the baseline in 2021 and the unemployment rate falling further than the forecasts in the baseline scenario.</p> <p>Europe: Marginally higher GDP over the baseline during the forecast period. 10-year government bond yields peak higher than the baseline in 2022 and the unemployment rate falling further than the forecasts in the baseline scenario.</p>
Downside	Possible	<p>Globally: Marginally lower growth in GDP against the baseline through to 2022.</p> <p>Australia: GDP growth falls in 2019 and marginally recovers after 2021. House prices decline further than the forecasts in the baseline scenario to 2019 but are expected to recover to current levels by 2021. During 2020 the level of unemployment rate peaks and the RBA cuts interest rates.</p> <p>United States: GDP growth reduces and gradually recovers after 2021, 10-year government bond yields fall through to 2020 and remain at those levels and the unemployment rate rises from current levels through to 2022.</p> <p>Europe: Low levels of GDP growth through to 2022, 10-year government bond yields remaining low and rising unemployment rates.</p>
More Severe Downside	Unlikely	<p>Globally: A recession from 2019–2020 following a marked retraction in GDP growth before recovering in 2021.</p> <p>Australia: GDP growth contracts through mid-2020 and recovers above existing levels by end 2021. House prices register a significant decline from current levels to mid-2020 and the RBA cuts interest rates in 2019 and they remain low through most of the forecast period.</p> <p>United States: GDP contracts through mid-2020 and stages a strong recovery to current levels by mid-2021. 10-year government bond rates drop to reach a trough by 2020 and recover gradually over the forecast period. Unemployment peaks before declining again in mid-2021.</p> <p>Europe: Growth contracts through Q12020 and recovers to current levels by end 2021. 10-year government bond yields fall and rise marginally through to 2021. Unemployment levels peak in 2021 before moderating towards the end of the forecast period but still above that of the baseline.</p>

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 11

Expected credit losses continued

The table below presents the gross exposure and related ECL allowance for assets measured at amortised cost or FVOCI and off balance sheet exposures subject to the impairment requirements of AASB 9^{(1),(2)}.

	AS AT 31 MARCH 2019		AS AT 1 APRIL 2018

Total	115,028	356	118,959	376

(1) The Consolidated Entity has not restated its comparative information for 31 March 2018 on adoption of AASB 9. Amounts as at 1 April 2018 represent amounts as at the transition date.

(2) Gross exposure of financial assets measured at amortised cost represents the amortised cost before ECL allowance and gross exposure of financial assets measured at FVOCI represents amortised cost before fair value adjustments and ECL allowance.

(3) Consists of short term, fully collateralised or high quality assets with minimal historical losses.

(4) Includes ECL allowance of \$510 million (1 April 2018: \$500 million) for the Consolidated Entity and \$270 million (1 April 2018: \$273 million) for the Company on loan assets carried at amortised cost and \$1 million (1 April 2018: \$4 million) for the Consolidated entity and \$46 million (1 April 2018: \$42 million) for the Company on loan assets measured at FVOCI.

(5) Gross exposure for undrawn credit commitments and financial guarantees represents the notional values of these contracts.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 11

Expected credit losses continued

The table below represents the reconciliation from the opening balance to the closing balance of the ECL allowance on loan assets to which the impairment requirements under AASB 9 are applied.

ECL on loan assets

	STAGE I	STAGE II	STAGE III	Collective allowance for credit losses \$m	Individually assessed provisions \$m	Total \$m
	12 month ECL \$m	Not credit impaired \$m	Credit impaired \$m			
	LIFETIME ECL					
						CONSOLIDATED
Balance as at 31 Mar 18	–	–	–	247	120	367
Change on initial application of AASB 9	144	202	158	(247)	(120)	137
Balance as at 1 Apr 18	144	202	158	–	–	504
Transfers during the period:						
To 12 month ECL	61	(58)	(3)	–	–	–
To lifetime ECL not credit impaired	(13)	49	(36)	–	–	–
To lifetime ECL credit impaired	–	(36)	36	–	–	–
Impairment (reversal)/charge (Note 2)	(46)	19	164	–	–	137
Amounts written off, previously provided for	–	–	(115)	–	–	(115)
Disposal during the financial year	(11)	(5)	(1)	–	–	(17)
Foreign exchange and other movements	–	2	–	–	–	2
Balance as at 31 Mar 19	135	173	203	–	–	511
The net movement in ECL allowance for loan assets is primarily due to change in forward outlook information considering noticeable change in macro-economic variables and re-weighting of scenarios and deterioration in the credit quality. Amount written off primarily relates to Stage II Asset Financing exposure.

- Macquarie Leasing Pty Limited (Australia)
- Macquarie Physical Metals (USA) Inc. (United Kingdom)
- Macquarie Private Debt Europe Limited (Ireland)
- Macquarie Securitisation Limited (Australia)
- Puma Subfund B-1 (Australia)

The country of incorporation has been stated in brackets.

Overseas subsidiaries conduct business predominantly in their place of incorporation.

Beneficial interest in all material subsidiaries is 100%.

All material subsidiaries have a 31 March reporting date.

In accordance with ASIC instruments 15-0518, 16-0119, 18-0476 and 08-00792 the Consolidated Entity has been granted relief under section 340 of the *Corporations Act 2001* (Cth) from synchronising the year-end of the following consolidated subsidiaries to 31 March:

- Macquarie Energy Mexico, S. de R.L. de C.V. (formerly Macquarie Gas de Sonora S. de R.L. de C.V.)
- Comercializadora Energia de la Reforma S. de R.L. de C.V
- Macquarie Commodities Trading (Shanghai) Co. Ltd
- Taurus Aerospace Group Inc.

Note 22

Capital management strategy

The Consolidated Entity's and the Company's capital management strategy is to maximise shareholder value through optimising the level and use of capital resources, whilst also providing the flexibility to take advantage of opportunities as they may arise.

The Consolidated Entity's capital management objectives are to:

- continue to support the Consolidated Entity's credit rating
- ensure sufficient capital resources to support the Consolidated Entity's business and operational requirements
- maintain sufficient capital to exceed externally imposed capital requirements
- safeguard the Consolidated Entity's ability to continue as a going concern.

The Consolidated Entity's capital management strategy uses both internal and external measures of capital. Internally, the Consolidated Entity has developed an Economic Capital Adequacy Model (ECAM) that is used to quantify the Company's aggregate level of risk. The economic capital framework complements the management of specific risk types such as equity, credit, market and operational risk by providing an aggregate view of the Company's risk profile. The economic capital model is used to support business decision-making and has three main applications:

- capital adequacy assessment
- risk appetite setting, and
- risk-adjusted performance measurement.

The Consolidated Entity is subject to minimum capital requirements externally imposed by APRA, following the guidelines developed by the Basel Committee on Banking Supervision. APRA requires the Consolidated Entity to have an Internal Capital Adequacy Assessment Process (ICAAP) that is Board approved and which meets a range of minimum requirements. The Consolidated Entity reports to APRA under Basel III capital requirements and is accredited under the Foundation Internal Ratings Based Approach (FIRB) for credit risk, the Advanced Measurement Approach (AMA) for operational risk, the internal model approach for market risk and the internal model approach for interest rate risk in the banking book (IRRBB).

Regulatory capital requirements are measured for the Company and certain subsidiaries which meet the definition of Extended Licensed Entities (Level 1 reporting), and for the Banking Group (Level 2 reporting). Level 2 consists of the Company, its subsidiaries and its immediate parent less certain subsidiaries of the Company which are deconsolidated for APRA reporting purposes. These include mortgage and leasing special purpose vehicles (SPVs) and entities conducting insurance, funds management and non-financial operations.

Under Basel III rules, APRA requires Authorised Deposit-taking Institutions (ADIs) to have a minimum ratio of Tier 1 capital to risk weighted assets (RWA) of 8.5% including 2.5% of capital conservation buffer plus an ADI specific countercyclical capital buffer, with at least 7.0% in the form of Common Equity Tier 1 capital. In addition, APRA may impose ADI-specific minimum capital ratios which may be higher than these levels.

The Consolidated Entity's Common Equity Tier 1 capital consists of share capital, retained earnings, and certain reserves, net of deductions. Additional Tier 1 capital consists of hybrid instruments. The hybrid instruments include Macquarie Additional Capital Securities, Macquarie Income Securities and Macquarie Bank Capital Notes. Information on details of capital instruments is available in the Regulatory Disclosures section of the Macquarie public website. Deductions from Common Equity Tier 1 capital include intangibles, certain capitalised expenses and deferred tax assets. In addition, APRA's Basel III rules require that equity investments and investments in subsidiaries that are insurance entities, fund management entities, special purpose securitisation entities and non-financial entities are fully deducted from Common Equity Tier 1 capital. The Consolidated Entity's Tier 2 capital includes term subordinated debt, certain reserves and applicable deductions.

The Consolidated Entity and the Company have complied with all internal and external capital management requirements throughout the financial year.

Note 23

Loan capital

Subordinated debt

Agreements between the Consolidated Entity and the lenders provide that, in the event of liquidation, entitlement of such lenders to repayment of the principal sum and interest thereon is and shall at all times be and remain subordinated to the rights of all other present and future creditors of the Consolidated Entity.

Below table highlights key capital instruments with conditional payment obligations issued by the Consolidated Entity and the Company:

Opening balance of fully paid ordinary shares	589,276,303	589,276,303	9,328	9,328
Return of capital to Macquarie B.H. Pty Ltd ⁽²⁾	–	–	(2,040)	–
Closing balance of fully paid ordinary shares	589,276,303	589,276,303	7,288	9,328

(1) Ordinary shares have no par value.

(2) The Consolidated Entity returned capital of \$2,040 million to Macquarie B.H. Pty Ltd. following disposal of the CAF Principal Finance and CAF Transportation Finance business (the businesses). Refer to Note 40 *Discontinued operations* for further information.

	CONSOLIDATED		COMPANY	
	2019 \$m	2018 \$m	2019 \$m	2018 \$m
(ii) Equity contribution from ultimate parent entity				
Balance at the beginning of the financial year	209	192	102	93
Additional paid up capital	10	17	4	9
Balance at the end of the financial year	219	209	106	102

MEREP awards are primarily settled in MGL ordinary shares. Where MEREP Awards are issued by MGL to employees of the Consolidated Entity, and MGL is not subsequently reimbursed by the Consolidated Entity, the Consolidated Entity recognises the grant date fair value of the award net of tax as a capital contribution from MGL. If the issued awards expire, the reversal of the original contribution is recognised as a return of capital. For further information regarding the terms and conditions of MEREP refer to Note 29 *Employee equity participation*.

The Macquarie Income Securities (MIS) are redeemable (in whole or in part) at the Company's discretion. They are classified as equity in accordance with AASB 132 *Financial Instruments: Presentation*. Interest is paid quarterly at a floating rate of Bank Bill Swap Rate (BBSW) plus 1.7% p.a. Payment of interest to holders is subject to certain conditions, including the profitability of the Company. The MIS is a perpetual instrument with no conversion rights. Distributions on the MIS have been presented in Note 5 *Dividends and distributions paid or provided for*.

Net cash flows (utilised in)/generated from operating activities	(2,918)	2,666	(809)	908

(1) The March 2019 financial results reflect the adoption of AASB 9 on 1 April 2018. As permitted by AASB 9, the Consolidated Entity and the Company have not restated previously reported financial periods. Prior comparative financial year has been reclassified to conform to current year presentation. Refer to Note 1 for the impact from initial adoption of AASB 9.

(2) Includes unrealised foreign exchange movements relating to derivatives which largely offsets the unrealised foreign exchange movements on financial assets and liabilities.

Note 27

Related party information

Ultimate and immediate parent entities

The Company's ultimate parent entity is MGL. The Company's immediate parent entity is Macquarie B.H. Pty Limited (MBHPL). Both MGL and MBHPL are incorporated in Australia. MGL produces financial statements that are available for public use.

Transactions between the Consolidated Entity and the ultimate and immediate parent entities principally arise from the provision and repayment of loans, repayment of capital and distribution of dividends.

MGL as the ultimate parent entity of the Macquarie Group is the head entity of the Australian tax consolidated group. The terms and conditions of this agreement are set out in Note 1(vii) *Taxation*. Amounts receivable from MGL includes amount receivable by the Company under the tax funding agreement of the tax consolidated group.

Balances outstanding with MGL and MBHPL are included in Due from related body corporate entities and Due to related body corporate entities, as appropriate, in the statement of financial position. Transactions with Macquarie Financial Holdings Pty. Ltd. (MFHPL), a 100% holding subsidiary of MGL, relating to the discontinued operations have been provided in Note 40 *Discontinued operations*.

The following balances with the ultimate parent entity were outstanding as at the financial year end:

	CONSOLIDATED		COMPANY	
	2019 \$'000	2018 \$'000	2019 \$'000	2018 \$'000
Amounts receivable ⁽¹⁾	166,996	159,979	130,112	110,250
Amounts payable	(87,652)	(4,153,013)	(79,187)	(3,430,424)

(1) As described in Note 1(xxiv) *Performance based remuneration*, the amounts receivable by the Company includes \$88,201 thousand (2018: \$119,250 thousand) for amounts paid in advance for MEREP awards offered to its employees' net of share-based payment expense.

The following balances with the immediate parent entity were outstanding as at the financial year end:

	CONSOLIDATED		COMPANY	
	2019 \$'000	2018 \$'000	2019 \$'000	2018 \$'000
Dividend payable (Note 5)	(560,000)	–	(560,000)	–

Subsidiaries

Transactions between the Company and its subsidiaries principally arise from the provision of banking and other financial services, the granting of loans and acceptance of funds on deposit, derivative transactions, the provision of management and administration services and the provision of guarantees.

All transactions with subsidiaries are in accordance with regulatory requirements, the majority of which are on commercial terms.

All transactions undertaken with subsidiaries are eliminated in the consolidated financial statements except for transactions between the Consolidated Entity's continuing and discontinuing operations as disclosed in Note 40 *Discontinued operations*. Amounts due from and due to subsidiaries are presented separately in the statement of financial position of the Company except when the parties have the legal right and intention to offset.

Balances may arise from lending and borrowing activities between the Company and subsidiaries which are generally repayable on demand or may be extended on a term basis and where appropriate may be either subordinated or collateralised.

Before disposing its CAF Principal Finance and CAF Transportation businesses (the businesses), the Company entered into legal arrangements with certain subsidiaries and

their customers whereby security deposits and maintenance claims were defeased to the Company. This removed the legal requirement for the subsidiary to reimburse the external counterpart and that liability was recognised by the Company. As at 31 March 2019, these defeased balances were \$Nil (2018: \$570,789 thousand) and \$Nil (2018: \$115,393 thousand) for maintenance and security deposits respectively.

The Company enters into a repurchase transaction and pledged collateral to its subsidiary Macquarie Bank International Ltd for managing regulatory exposures in relation to over-the-counter derivatives. As at 31 March 2019, the collateral placed was \$445,863 thousand (2018: \$ 381,410 thousand).

A list of material subsidiaries is set out in Note 15 *Investments in subsidiaries*.

During the year, as part of internal restructure by MGL (refer Note 40 *Discontinued operations*), the company transferred the businesses to MFHPL and its subsidiaries (entities under common control). Transactions with the subsidiaries preceding the date of their disposal are included in this section.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 27

Related party information continued

Subsidiaries continued

During the financial year, the following amounts of income/(expense) resulted from transactions with subsidiaries during the financial year:

	COMPANY	
	2019 \$'000	2018 \$'000
Interest income ⁽¹⁾	914,821	901,720
Interest expense	(544,508)	(589,343)
Fee and commission (expense)/income	(14,369)	65,388
Other operating income	61,882	40,631

Management fees, group service charges and cost recoveries ⁽³⁾	344,560	342,532
Other expenses	(7,785)	(6,038)

(1) Includes \$18,558 thousand (2018: \$37,069 thousand) of interest income from the subsidiaries forming part of its discontinued operations.

(2) During the year, the company received dividends of \$714,361 thousand (2018: \$798,514 thousand) from subsidiaries that formed part of its discontinued operations.

(3) Includes \$21,856 thousand (2018: \$56,603 thousand) of management fees, service charges and cost recoveries from the subsidiaries forming part of its discontinued operations.

The following balances with subsidiaries were outstanding as at the end of the financial year:

Amounts receivable	23,894,388	27,841,404
Amounts payable	(10,115,509)	(10,549,451)
Guarantees ⁽¹⁾	1,027,801	1,112,922
Letter of credit	304,151	16,997

(1) Includes transactions where the company has contractually guaranteed the performance and other obligations of its subsidiaries.

Other related parties

Transactions between the Consolidated Entity and other related body corporate entities under common control principally arise from the provision of banking and other financial services, the granting of loans and acceptance of funds on deposit, the provision of management and administration services, facilities and accommodation and the provision of guarantees and restructure of businesses.

Balances may arise from lending and borrowing activities between the Consolidated Entity and other related body corporate entities which are generally repayable on demand or may be extended on a term basis and where appropriate, may be either subordinated or collateralised.

During the year, as part of internal restructure by MGL (refer Note 40 *Discontinued operations*), the company transferred the businesses to MFHPL and its subsidiaries (entities under common control). Transactions and balances with the subsidiaries after the date of their disposal are included in this section.

During the financial year, the following amounts of income/(expense) resulted from transactions with other related body corporate entities during the financial year:

	CONSOLIDATED		COMPANY	
	2019 \$'000	2018 \$'000	2019 \$'000	2018 \$'000

Note 27

Related party information continued

Other related parties continued

The following balances with other related body corporate entities were outstanding at the reporting date:

	CONSOLIDATED		COMPANY	
	2019 \$'000	2018 \$'000	2019 \$'000	2018 \$'000
Amounts receivable	1,354,761	1,222,857	908,537	1,101,575
Amounts payable	(16,703,745)	(9,840,305)	(15,027,254)	(8,399,667)
Performance related contingents ⁽¹⁾	820,921	–	820,921	–
Undrawn credit facilities and securities underwriting ⁽²⁾	2,395,068	–	2,395,068	–
Letter of credit	151,879	109,434	151,879	109,434

(1) Includes performance guarantee in favour of a related party. Refer Note 30 *Contingent liabilities and commitments*.

(2) Includes undrawn credit facilities granted to a related body corporate.

Associates and joint ventures

Transactions between the Consolidated Entity and its associates and joint ventures principally arise from the provision of corporate advisory services, the granting of loans and the provision of management services. Balances may arise from lending and borrowing activities between the Consolidated Entity and its associates and joint ventures which are generally extended on a term basis and where appropriate may be either subordinated or collateralised. During the financial year, the following amounts of income/(expense) arose from transactions with associates and joint ventures:

Interest income	1,962	46,934	215	46,715
Fee and commission expense	(40,769)	(47,806)	(48,437)	(47,481)
Brokerage and commission expense	(8,354)	(6,015)	(8,354)	(5,529)

Dividends and distributions of \$21,535 thousand (2018: 19,075 thousand) were received from the Consolidated Entity's associates and joint ventures. Under the equity method of accounting, these amounts are not included as income but are recorded as a reduction from the carrying amount of the investment.

The following balances with associates and joint ventures were outstanding as at financial year end (these exclude amounts which in substance form part of the Consolidated Entity's net investment in associates, disclosed in Note 13 *Interests in associates and joint ventures*):

Amounts receivable	13,294	82,504	8,959	46,546
Amounts payable	(3,862)	(3,636)	(3,862)	(3,636)
Undrawn commitment ⁽¹⁾	(16,174)	–	(62,549)	(42,854)

(1) Undrawn commitments are included in Note 30 *Contingent liabilities and commitments*.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 28

Key Management Personnel disclosure

Key Management Personnel (KMP)

The following persons were Directors of the Company during the financial years ended 31 March 2019 and 31 March 2018, unless indicated otherwise:

Executive Voting Directors

S.R. Wikramanayake ⁽¹⁾	Macquarie Group CEO (appointed as CEO effective 1 December 2018)
N.W. Moore	Former Macquarie Group CEO (retired as CEO on 30 November 2018)
M.J. Reemst	Macquarie Bank CEO

Non-Executive Directors

P.H. Warne	Chairman
G.R. Banks AO	
G.M. Cairns	
M.J. Coleman	
D.J. Grady AM	
M.J. Hawker AM	
G.R. Stevens AC	(appointed effective 1 November 2017)
N.M. Wakefield Evans	
J.R. Broadbent AC	(appointed effective 5 November 2018)
P.M. Coffey	(appointed effective 28 August 2018)

Former Non-Executive Director

P.A. Cross	(retired effective 26 July 2018)
------------	----------------------------------

In addition to the Executive Directors listed above, the following persons also had authority and responsibility for planning, directing and controlling the activities of MBL during the past two financial years ended 31 March 2019 and 31 March 2018, unless otherwise indicated.

Current Executives⁽²⁾

G.A. Farrell	Co-Head of CAF
A.H. Harvey	CFO, Head of FMG (appointed effective 1 January 2018)
N. O'Kane ⁽³⁾	Head of CMF (appointed effective 15 June 2017)
N. Sorbara	COO, Head of COG
P.C. Upfold	CRO, Head of RMG
G.C. Ward	Macquarie Group Deputy Managing Director and Head of BFS

Former Executives

N.W. Moore	Former MGL CEO (ceased to be a member of the Executive Committee on 28 August 2018)
B.A. Brazil	Former Co-Head of CAF (ceased to be a member of the Executive Committee on 30 November 2018)
A.J. Downe	Former Head of CGM (ceased to be a member of the Executive Committee on 31 March 2019)

The remuneration arrangements for all of the persons listed above are described on pages 25 to 42 of the Remuneration Report, contained in the Directors' Report.

- (1) Ms Wikramanayake, formerly Head of MAM, was appointed to the Board on 28 August 2018 and as CEO on 1 December 2018.
- (2) Except where indicated otherwise, the Executive Voting Directors and all Current Executives listed above are members of the Company's Executive Committee as at 3 May 2019.
- (3) Mr N O'Kane was Head of Commodity Markets and Finance for the full year to 31 March 2019 and has succeeded Mr Downe as Head of CGM effective 1 April 2019.

Note 28

Key Management Personnel disclosure continued

Key Management Personnel remuneration

The following table details the aggregate remuneration for KMP:

	SHORT-TERM EMPLOYEE BENEFITS			Total short term Employee Benefits	LONG-TERM EMPLOYEE BENEFITS	SHARE-BASED PAYMENTS			Total remuneration
	Salary and fees (including superannuation)	Performance related remuneration ⁽¹⁾	Other benefits		Restricted profit share including earnings on restricted profit share ⁽²⁾	Equity awards including shares ⁽³⁾	PSUs ⁽⁴⁾		
	\$	\$	\$	\$	\$	\$	\$	\$	\$
Executive remuneration									
2019	5,635,488	33,345,490	–	38,980,978	9,444,048	43,366,193	16,077,868		107,869,087

2019	464	825	33	(47)	–	1,275
2018	–	–	3	–	–	464

(1) Number of persons included in the aggregate as at 31 March 2019: 3 (31 March 2018: 1).

Loans and other financial instrument transactions were made by the Consolidated Entity in the ordinary course of business with related parties.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 29

Employee equity participation

MEREP

MBL participates in its ultimate parent company's, Macquarie Group Limited (MGL), share based compensation plans, being the Macquarie Group Employee Retained Equity Plan (the MEREP). In terms of this plan, awards are granted by MGL to qualifying employees for delivery of MGL shares.

Award types under the MEREP

Restricted Share Units (RSUs)

An RSU is a beneficial interest in an MGL ordinary share held on behalf of a MEREP participant by the plan trustee (Trustee).

The participant is entitled to receive dividends on the share and direct the Trustee how to exercise voting rights of the share. The participant also has the right to request the release of the share from the MEREP Trust, subject to the vesting and forfeiture provisions of the MEREP.

	NUMBER OF RSU AWARDS	
	2019	2018
RSUs on issue at the beginning of the financial year	5,662,386	6,619,655
Granted during the financial year	1,199,782	1,571,969
Forfeited during the financial year	(118,612)	(180,167)
Vested RSUs withdrawn or sold from the MEREP during the financial year	(1,786,852)	(1,815,730)
Net transfers to related body corporate entities	(1,167,262)	(533,341)
RSUs on issue at the end of the financial year	3,789,442	5,662,386
RSUs vested and not withdrawn from the MEREP at the end of the financial year	–	1,979

The weighted average fair value of the RSU awards granted during the financial year was \$121.95 (2018: \$90.20).

Deferred Share Units (DSUs)

A DSU represents the right to receive on exercise of the DSU either an MGL share held in the Trust or a newly issued MGL share (as determined by MGL in its absolute discretion) for no cash payment, subject to the vesting and forfeiture provisions of the MEREP. A MEREP participant holding a DSU has no right or interest in any share until the DSU is exercised. MGL may issue shares to the Trustee or direct the Trustee to acquire shares on-market, or via a share acquisition arrangement for potential future allocations to holders of DSUs.

Generally, where permitted by law, DSUs will provide for cash payments in lieu of dividends paid on MGL ordinary shares before the DSU is exercised. Further, the number of shares underlying a DSU will be adjusted upon any bonus issue or other capital reconstruction of MGL in accordance with the ASX Listing Rules, so that the holder of a DSU does not receive a benefit that holders of the Company's shares do not generally receive. These provisions are intended to provide the holders of DSUs, as far as possible, with the same benefits and risks as holders of RSUs. However, holders of DSUs will have no voting rights with respect to any underlying MGL ordinary shares.

DSUs will only be offered in jurisdictions where legal or tax rules make the grant of RSUs impractical, or where PSUs are structured as DSUs (see PSUs). DSUs have been granted with an expiry period of up to nine years.

	NUMBER OF DSU AWARDS	
	2019	2018
DSUs on issue at the beginning of the financial year	1,313,047	1,281,176
Granted during the financial year	342,138	453,383
Forfeited during the financial year	(12,133)	(55,598)
Exercised during the financial year	(295,630)	(358,627)
Transfers to related body corporate entities	(482,258)	(7,287)
DSUs on issue at the end of the financial year	865,164	1,313,047
DSUs exercisable at the end of the financial year	187,326	197,274

The weighted average fair value of the DSU awards granted during the financial year was \$110.42 (2018: \$90.21).

Note 29

Employee equity participation continued

Award Types under the MEREP continued

Performance Share Units (PSUs)

All PSUs currently on issue are structured as DSUs with performance hurdles related to MGL's performance that must be met before the underlying share or cash equivalent (as the case may be) will be delivered. PSU holders have no right to dividend equivalent payments before the PSUs vest.

	NUMBER OF PSU AWARDS	
	2019	2018
PSUs on issue at the beginning of the financial year	454,228	539,176
Granted during the financial year	85,749	132,018
Exercised during the financial year	(152,580)	(186,212)
Net transfers to related body corporate entities	(21,101)	(30,754)
PSUs on issue at the end of the financial year	366,296	454,228
PSUs exercisable at the end of the financial year	–	–

The weighted average fair value of the PSU awards granted during the financial year was \$102.06 (2018: \$73.00).

Participation in the MEREP is currently provided to the following Eligible Employees:

- Executive Directors with retained Directors' Profit Share (DPS) from 2009 onwards, a proportion of which is allocated in the form of MEREP awards (Retained DPS Awards)
- Staff other than Executive Directors with retained profit share above a threshold amount (Retained Profit Share Awards) and staff who were promoted to Associate Director, Division Director or Executive Director, who received a fixed Australian dollar value allocation of MEREP awards (Promotion Awards)
- Macquarie Bank staff with retained commission (Commission Awards)
- Macquarie Bank staff who receive a discretionary payment in recognition of contributions over a predetermined period (Incentive Awards)
- New Macquarie Bank staff who commence at Associate Director, Division Director or Executive Director level and are awarded a fixed Australian dollar value, depending on level (New Hire Awards)
- Members of the MBL Executive Committees who are eligible for PSUs (PSU awards)
- In limited circumstances, Macquarie Bank staff may receive an equity grant instead of a remuneration or consideration payment in cash. Current examples include individuals who become employees of the Macquarie Bank upon the acquisition of their employer by an Macquarie Bank entity or who receive an additional award at the time of joining Macquarie (also referred to above as New Hire Awards).

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 29

Employee equity participation continued

Award Types under the MEREP continued

Vesting periods are as follows:

Award type	Level	Vesting
Retained Profit Share Awards and Promotion Awards	Below Executive Director	1/3 rd in the 2 nd , 3 rd and 4 th year following the year of grant ⁽¹⁾
Retained DPS Awards representing 2009 retention	Executive Director	1/5 th in the 3 rd , 4 th , 5 th , 6 th and 7 th year following the year of grant ⁽²⁾
Retained DPS Awards for 2010 and all future years' retention	Executive Committee member and Designated Executive Director	1/5 th in the 3 rd , 4 th , 5 th , 6 th and 7 th year following the year of grant ⁽²⁾
Retained DPS Awards for 2010 and all future years' retention	All other Executive Directors	1/3 rd in the 3 rd , 4 th and 5 th year following the year of grant ⁽¹⁾
PSU Awards granted in relation to 2012 and following years	Executive Committee members	50% three and four years after the year of grant ⁽³⁾
Commission Awards	Below Executive Director	1/3 rd in the 2 nd , 3 rd and 4 th year following the year of grant ⁽¹⁾
Incentive Awards	All Macquarie Group staff	1/3 rd on each first day of a staff trading window on or after the 2 nd , 3 rd and 4 th anniversaries of the date of allocation
New Hire Awards	All Director-level staff	1/3 rd on each first day of a staff trading window on or after the 2 nd , 3 rd and 4 th anniversaries of the date of allocation

(1) Vesting will occur during an eligible staff trading window.

(2) Vesting will occur during an eligible staff trading window. If an Executive Director has been on leave without pay (excluding leave to which the Executive Director may be eligible under local laws) for 12 months or more, the vesting period may be extended accordingly.

(3) Subject to achieving certain performance hurdles – refer below.

In limited cases, the application form for awards may set out a different vesting period, in which case that period will be the vesting period for the award. For example, staff in jurisdictions outside Australia may have a different vesting period due to local regulatory requirements.

For Retained Profit Share awards representing 2018 retention, the allocation price was the weighted average price of the shares acquired for the 2018 purchase period, which was 14 May 2018 to 21 June 2018. That price was calculated to be \$113.76 (2017 retention: \$89.25).

Performance Share Units (PSUs)

PSUs will only be released or become exercisable upon the achievement of certain performance hurdles related to MGL's performance. Only members of the MBL Executive Committees are eligible to receive PSUs. For the PSUs allocated to Executive Committee Members, two performance hurdles have been determined and each will apply individually to 50% of the total number of PSUs awarded. The hurdles are outlined below.

Performance hurdle 1

Hurdle	REFERENCE GROUP	
	Granted after 31 March 2013	Granted on or before 31 March 2013
50% of the PSUs based solely on the relative average annual return on ordinary equity (ROE) over the vesting period (three to four years) compared to a reference group of global financial institutions.	The current reference group comprises Barclays PLC, Bank of America Corporation, Credit Suisse Group AG, Deutsche Bank AG, Goldman Sachs Group Inc., JPMorgan Chase & Co., Lazard Limited, Morgan Stanley and UBS AG.	The reference group comprised Bank of America Corporation, Citigroup Inc, Credit Suisse Group AG, Deutsche Bank AG, Goldman Sachs Group Inc., JPMorgan Chase & Co., Morgan Stanley and UBS AG as well as significant Australian commercial banks within the ASX 100 (ANZ Group Limited, Commonwealth Bank of Australia, National Australia Bank Limited, Westpac Banking Corporation and Suncorp Metway Limited).

Note 29

Employee equity participation continued

PSUs continued

Performance hurdle 2

Hurdle	REQUIRED RESULT	
	Granted after 31 Mar 13	Granted on or before 31 Mar 13
50% of the PSUs based solely on the compound annual growth rate (CAGR) in earnings per share (EPS) over the vesting period (three to four years).	A sliding scale applies with 50% becoming exercisable at EPS CAGR of 7.5% and 100% at EPS CAGR of 12%. For example, if EPS CAGR were 9.75%, 75% of the relevant awards would become exercisable.	A sliding scale applies with 50% becoming exercisable at EPS CAGR of 9% and 100% at EPS CAGR of 13%. For example, if EPS CAGR were 11%, 75% of the relevant awards would become exercisable.

Under both performance hurdles, the objective is examined once only. Testing occurs annually on 30 June immediately before vesting on 1 July, based on the most recently available year-end financial results. To the extent that a condition is not met when examined, the PSUs due to vest will not be exercisable upon vesting, resulting in a nil benefit to Executive Committee members.

Assumptions used to determine fair value of MEREP awards

RSUs and DSUs are measured at their grant dates based on their fair value⁽¹⁾ and for each PSU, the number expected to vest. This amount is recognised as an expense evenly over the respective vesting periods.

RSUs, DSUs and PSUs relating to the MEREP plan for Executive Committee members have been granted in the current financial year in respect of 2018. The fair value of each of these grants is estimated using the MGL's share price on the date of grant and for each PSU also incorporates a discounted cash flow method using the following key assumptions:

- interest rate to maturity: 2.58% per annum
- expected vesting dates of PSUs: 1 July 2021 and 1 July 2022
- dividend yield: 4.96% per annum.

While RSUs, DSUs and PSUs (for Executive Committee members) for the FY2019 will be granted during FY2020, the Consolidated Entity begins recognising an expense for these awards (based on an initial estimate) from 1 April 2018. The expense is estimated using the price of MGL ordinary shares as at 31 March 2019 and the number of equity instruments expected to vest.

For PSUs, the estimate also incorporates an interest rate to maturity of 1.95% per annum, expected vesting dates of PSUs of 1 July 2022 and 1 July 2023, and a dividend yield of 5.08% per annum. In the following financial year, the Consolidated Entity will adjust the accumulated expense recognised for the final determination of fair value for each RSU, DSU and PSU when granted and will use this validation for recognising the expense over the remaining vesting period.

The Consolidated Entity annually revises its estimates of the number of awards (including those delivered through MEREP) that are expected to vest. It recognises the impact of the revision to original estimates, if any, in the employment expenses in the income statement.

(1) Remuneration requirements the fair value of the awards granted for performance periods after 1 April 2018 have been adjusted to take into account the prohibition of dividends on unvested awards. For employees categorised as Material Risk Takers who are required to comply with the European Banking Authority Guidelines on the CRD IV.

For the financial year ended 31 March 2019, compensation expense relating to the MEREP totalled \$143,283 thousand (2018: \$151,351 thousand).

Other arrangements

There are certain arrangements with employees which take the form of a share-based payment arrangement but which are held outside the MEREP. Whilst the employees do not have a legal or beneficial interest in the underlying shares; the arrangements have the same economic benefits as those held in MEREP.

Compensation expense relating to these awards for the financial year ended 31 March 2019 was \$3 thousand (2018: \$70 thousand).

Employee Share Plan

MBL also participates in MGL's Macquarie Group Employee Share Plan (ESP) whereby each financial year eligible employees are offered up to \$1,000 worth of fully paid MGL ordinary shares for no cash consideration.

Shares allocated under the ESP cannot be sold until the earlier of three years after allocation or the time when the participant is no longer employed by MGL or a subsidiary of MGL. In all other respects, shares allocated rank equally with all other fully paid ordinary shares then on issue.

The latest offer under the ESP was made during November 2018. A total of 870 (2018: 591) staff participated in this offer. On 30 November 2018, the participants were each allocated 8 (2018: 10) fully paid ordinary shares based on the offer amount of \$1,000 and the then calculated average market share price of \$114.36 (2018: \$99.33), resulting in a total of 6,960 (2018: 5,910) shares were allocated. The shares were allocated to staff for no cash consideration. The aggregate value of the shares allocated was deducted from staff profit share and commissions.

For the financial year ended 31 March 2019, compensation expense relating to the ESP totalled \$797 thousand (2018: \$585 thousand).

Other plans

MBL operates other local share-based compensation plans, none of which, individually or in aggregate are material.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

	CONSOLIDATED		COMPANY	
	2019 \$m	2018 \$m	2019 \$m	2018 \$m
Note 30				
Contingent liabilities and commitments				
Contingent liabilities exist in respect of:				
Letters of credit	1,221	874	1,241	891
Performance related contingents ⁽¹⁾	1,112	237	1,122	247
Indemnities	389	44	389	44
Guarantees	114	107	1,140	1,220
Total contingent liabilities^{(2),(3)}	2,836	1,262	3,892	2,402
Commitments exist in respect of:				
Undrawn credit facilities and securities' underwriting ^{(4),(5),(6)}	7,300	6,146	6,816	5,200
Property, plant and equipment and other asset developments	1,026	7	1,004	–
Total commitments	8,326	6,153	7,820	5,200
Total contingent liabilities and commitments	11,162	7,415	11,712	7,602

(1) Includes \$821 million (2018: \$Nil) in favour of a related party for which collateral of a similar amount has been received.

(2) Contingent liabilities exist in respect of actual and potential claims and proceedings that arise in the conduct of the Consolidated Entity's and the Company's business. In the event it is likely that a loss is probable and can be reliably measured then a liability is recognised, and the exposure is excluded from the contingent liabilities above. Other than those recognised liabilities, the Consolidated Entity and the Company is currently not engaged in any litigation or claim which is likely to have a material adverse effect on the Consolidated Entity's and the Company's business, financial condition or performance.

(3) It is not practicable to ascertain the timing of any outflow and the possibility of any reimbursement related to these contingent liabilities.

(4) Undrawn credit facilities are irrevocably extended to clients. These amounts include fully or partially undrawn commitments that are legally binding and cannot be unconditionally cancelled by the Consolidated Entity and the Company. Securities underwriting includes firm commitments to underwrite debt and equity securities issuances and private equity commitments.

(5) Includes a \$2,395 million (2018: \$2,352 million) credit facility granted to a related body corporate party.

(6) Includes \$1,038 million (2018: \$1,434 million) for certain contractual irrevocable mortgage related facilities which have been reassessed during the year.

Note 31

Lease commitments

Non-cancellable operating leases expiring:

Not later than one year	21	10	–	–
Later than one year and not later than five years	18	16	–	–
Later than five years	11	1	–	–
Total operating lease commitments	50	27	–	–

Operating leases relate to commercial buildings, oil storage and leases of land. The future lease commitments disclosed are net of any rental incentives received.

Note 32

Structured entities

The Consolidated Entity engages with structured entities (SEs) for securitisation and asset backed financing in order to diversify its sources of funding for asset origination and capital efficiency purposes. SEs are designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual agreements. Generally, SEs do not have a range of operating and financing activities for which substantive decision making is required continuously.

Securitisations

Securitisations involve transferring assets into a vehicle that sells beneficial interests to investors through the issue of debt and equity notes with varying levels of subordination. The notes are collateralised by the assets transferred to these vehicles and pay a return based on the returns of those assets, with residual returns paid to the most subordinated investor. These vehicles are created for securitising assets, including mortgages, finance leases and credit card receivables, of the Consolidated Entity or of its clients.

The Consolidated Entity may serve as a sponsor, servicer, underwriter, liquidity provider, derivative counterparty, purchaser of notes and/or purchaser of residual interest units. The Consolidated Entity may also provide redraw facilities or loan commitments to securitisation vehicles.

Asset-backed financing

Asset-backed vehicles are used to provide tailored lending for the purchase or lease of assets transferred by the Consolidated Entity or its clients. The assets are normally pledged as collateral to the lenders.

The Consolidated Entity engages in raising finance for assets such as vessels, electronic and IT equipment. The Consolidated Entity may act as a lender, manager, derivative counterparty, purchaser of notes and/or purchaser of residual interest units or guarantor.

SEs are consolidated when they meet the criteria described in Note 1(ii) *Principles of consolidation*.

Interests held in unconsolidated structured entities

Interests in unconsolidated SEs include, but are not limited to, debt and equity investments, guarantees, liquidity agreements, commitments, fees from investment structures, and fees from derivative instruments that expose the Consolidated Entity to the risks of the unconsolidated SE. Interests do not include plain vanilla derivatives (for example interest rate swaps and currency swaps) and positions where the Consolidated Entity:

- (i) creates rather than absorbs variability of the unconsolidated SE (for example purchase of credit protection under a credit default swap)
- (ii) acts as underwriter or placement agent, or provides administrative, trustee or other services to third party managed SEs
- (iii) transfers assets and does not have any other interest deemed to be significant in the SE. Trading positions have been included in the table that follows.

Income received by the Consolidated Entity during the financial year from interests held at the reporting date relates to interest, management fees, servicing fees, dividends and gains or losses from revaluing financial instruments.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 32

Structured entities continued

The following table presents the carrying value and maximum exposure to loss (before the benefit of collateral and credit enhancements) of the Consolidated Entity's interests in unconsolidated SEs:

	CONSOLIDATED 2019		CONSOLIDATED 2018	
	Securitisations \$m	Asset-backed financing \$m	Securitisations \$m	Asset-backed financing \$m
Carrying value of assets				
Trading assets	368	72	128	189
Derivative assets	163	–	110	–
Financial investments ⁽¹⁾	1,734	2	1,366	–
Loan assets	536	603	237	794
Total carrying value of assets ⁽²⁾	2,801	677	1,841	983
Maximum exposure to loss⁽³⁾				
Debt & equity	2,801	677	1,841	983
Derivatives & Undrawn commitments	–	–	–	7
Total maximum exposure to loss	2,801	677	1,841	990

(1) Securitisations includes \$1,248 million (2018: \$1,158 million) of investments that are managed by the Consolidated Entity under the liquid assets' holding policy described in Note 34.2 *Liquidity risk*.

(2) Total carrying value of assets includes \$741 million (2018: \$798 million) in subordinated interests, of which \$182 million (2018: \$47 million) is included in securitisation activities and \$559 million (2018: \$751 million) included in asset backed financing activities of the subordinated interests maximum loss borne by others whose interest rank lower is \$537 million (2018: \$685 million)

(3) Maximum exposure to loss is the carrying value of debt, equity and derivatives held and the undrawn amount for commitments.

The Consolidated entity's exposure in subordinated securitisation entities includes trading and non-traded positions that are typically managed under market risk described in Note 34.3 *Market risk*. For these reasons, information on size and structure for these SEs is not considered meaningful for understanding the related risks, and so have not been presented. The Consolidated entity's exposure in subordinated asset backed financing entities are included in loan assets and the total size of the unconsolidated SEs is \$3,575 million (2018: \$3,913 million). Size represents either the total assets of the SE (measured either at amortised cost excluding impairments or fair values if readily available); outstanding notional of issued notes or the principal amount of liabilities if there is nominal equity. Size is based on the most current publicly available information to the Consolidated Entity.

Note 33

Hedge accounting

Hedging strategy

The use of derivative and other hedging instruments to hedge non-traded positions potentially gives rise to income statement volatility as a result of mismatches in the accounting treatment between the derivative and other hedging instruments and the related exposure. The Consolidated Entity's objective is to reduce the risk of volatility in earnings. This volatility may be managed by allowing hedges to naturally offset one another or, where the earnings volatility exceeds pre-defined limits, is considered for designation in a hedge accounting relationship to reduce earnings volatility.

Hedging instruments

The following table details the hedging instruments, nature of hedged risks, as well as the notional and the carrying amount of derivative financial instruments and, in the case of net investment hedges, the notional of foreign denominated debt issued for each type of hedge relationship. The maturity profile for the hedging instruments' notional amounts are reported based on their contractual maturity. Dual designations of cross-currency swaps for interest rate risk and foreign exchange risk are included as a single notional amount per derivative. Increases in notional profiles of hedging instruments are presented as negative figures, with decreases and maturities presented as positive figures.

Note 33

	Foreign exchange contracts	Foreign exchange	768	710	659	34	2,171	113

(1) The carrying amounts in the table above represent balances in the statement of financial position as at March period end and include accrued interest where applicable.

(2) In order to hedge the currency exposure of certain of the Consolidated Entity's net investment in foreign operations, the Consolidated Entity jointly designates both forward exchange derivative contracts (the currency of the underlying foreign operation to USD) and foreign denominated debt issued (for USD to AUD). As a result, the notional value of hedging instruments presented in the table above of \$9,142 million (2018: 8,699 million) represents the notional of both the derivative hedging instruments and the debt issued and hence exceeds the \$4,986 million (2018: 5,521 million) notional of the underlying net investment in foreign operations designated in a hedge relationship.

(1) The carrying amounts in the table above represent balances in the statement of financial position at balance date end and include accrued interest where applicable.

Note 33

Hedge accounting continued

Hedge accounting executed rates

The following table shows the executed rates for the most significant hedging instruments that have been designated in cash flow hedges and net investment hedges⁽¹⁾ that were in place at the balance date. Executed rates for fair value hedges of interest rate risk have not been shown below as these would represent the market reference rates at the time of designation which are primarily 1 month, 3 month or 6 month USD LIBOR, GBP LIBOR, AUD BBSW, EUR EURIBOR and JPY LIBOR.

	Hedging instruments	Currency/ currency pair	CONSOLIDATED		COMPANY	
			2019	2018	2019	2018
Cash flow hedges	Interest rate swaps	AUD	2.03–4.99%	1.77–4.99%	2.03–2.42%	1.77–2.42%
		GBP	1.30–2.13%	0.40–2.13%	1.30–2.13%	0.40–2.17%
		USD	N/A	2.02%	N/A	NA
Cash flow hedges	Cross currency swaps	USD/CHF	0.92–0.93	0.92–0.93	0.92–0.93	0.92–0.93
		AUD/EUR	0.64–0.69	0.64–0.69	0.68–0.69	0.68–0.69
		AUD/USD	0.76–0.78	0.72–0.78	0.78	0.78
Net investment hedges	Foreign exchange contracts	USD/GBP	0.65–0.78	0.64–0.81	0.69–0.77	0.64–0.81
		USD/SGD	1.35–1.39	1.31–1.39	1.35–1.39	1.31–1.39
		AUD/GBP	0.53	N/A	0.53	N/A
		USD/CAD	1.31–1.36	1.25–1.30	N/A	N/A
		AUD/CAD	0.94	N/A	N/A	N/A

(1) United States dollar (USD) denominated debt issued has been paired with foreign exchange contracts to hedge some of the Consolidated Entity's net investment in foreign operations back to Australian dollars (AUD). The executed rate on the issued debt has not been included in the above table as they reflect the spot rate at reporting date, this being the AUD/USD exchange rate of \$0.71 (2018: \$0.77).

Hedging relationships

Cash flows hedges

The cash flow hedge reserve, representing the effective portion of the movements in the hedging instrument, is disclosed in Note 25 *Reserves*. Changes in this reserve are reported in the Consolidated Entity's statement of other comprehensive income. The cumulative amount of fair value adjustments remaining in the cash flow hedge reserve for hedging relationships that have ceased, but for which the hedged cash flows are still expected to occur is \$1 million (2018: \$7 million). This amount will be transferred to the income statement as a loss as and when the hedged item affects the income statement.

Net investment in foreign operation hedges

The Consolidated Entity's net investment in foreign operations (NIFO) changes as a result of earnings, dividends, other capital-related events and changes in the Consolidated Entity's group structure as a result of internal restructures. The risk of changes in the NIFO for movements in foreign exchange rates is hedged by the Consolidated Entity through the use of a combination of derivatives and foreign denominated borrowings. Refer to Note 34.3 *Financial risk management: Non-traded market risk* for further information on the Consolidated Entity's risk management strategy.

In order to reflect the Consolidated Entity's risk management strategy, hedge accounting is applied where changes in the derivatives and foreign denominated borrowings are recognised, together with the related foreign currency translation reserve, in the Consolidated Entity's other comprehensive income and is subsequently released to the income statement when the foreign operation is disposed. Hedge ineffectiveness is recognised in the income statement. Given that the Consolidated Entity's NIFO frequently changes, the hedge designations are reviewed on a monthly basis or more frequently where required, which includes updating the NIFO exposure and rebalancing the associated hedge designations.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 33

Hedge accounting continued

Fair value hedges

The following table shows the carrying value of hedged items designated in fair value hedge accounting relationships and the cumulative fair value hedge accounting adjustment that has been recognised as part of that carrying value. These balances are being amortised to the income statement on an effective yield basis. The Consolidated Entity does not hedge its entire exposure to a class of financial instruments, nor does it apply hedge accounting in all instances, therefore the carrying amounts below will not equal the total carrying amounts disclosed in other notes to these financial statements. As noted in the Consolidated Entity's accounting policies, since the hedged item is adjusted only for the hedged risk, the hedged item's carrying value disclosed in the table will not be equivalent to its fair value as disclosed in other notes to these financial statements. The accumulated amount of fair value hedge adjustments remaining in the statement of financial position for hedged items that have ceased to be adjusted for hedging gains and losses is a balance of \$7 million (2018: \$61 million) for the Consolidated Entity. This amount will be amortised to the income statement as a gain on an effective interest rate basis.

	CONSOLIDATED 2019		CONSOLIDATED 2018	
	Carrying amount ⁽¹⁾	Fair value hedge adjustments	Carrying amount ⁽¹⁾	Fair value hedge adjustments

(1) The carrying amounts in the table above exclude accrued interest from the carrying amount of hedged items.

Note 33

Hedge accounting continued

Hedge ineffectiveness

Hedge ineffectiveness, in the case of a fair value hedge, is the extent to which the changes in the fair value of the hedging instrument differ to that of the hedged item, and in the case of cash flow and net investment hedge relationships, the extent to which the change in the hedging instrument exceeds that of the hedged item. Sources of hedge ineffectiveness primarily arise from basis and timing differences between the hedged items and hedging instruments.

The following table contains the hedge ineffectiveness associated with cash flow hedge and fair value hedge relationships during the period, as reported in trading income in the income statement:

	Hedging instruments	Risk	Gains/(losses) on hedging instruments \$m	Gains/(losses) on hedged items attributable to the hedged risk \$m	Hedge ineffectiveness recognised in the income statement \$m
CONSOLIDATED 2019					
Cash flow hedges	Cross currency swaps	Interest and foreign exchange	1	(1)	–

A gain of \$1 million for the Consolidated Entity and \$Nil for the Company was recognised in the income statement related to hedge ineffectiveness from net investment hedge relationships (2018: \$1 million gain for the Consolidated Entity, \$Nil for the Company).

Note 34

Financial risk management

Risk Management Group (RMG)

Risk is an integral part of the Consolidated Entity's businesses. The main risks faced by the Consolidated Entity are strategic, reputation, conduct, credit, equity, asset, liquidity, market, compliance, operational, legal and tax.

The primary responsibility for risk management lies at the business level. Part of the role of all staff throughout Macquarie is to ensure they manage risks appropriately.

RMG is independent of all other areas of the Consolidated Entity. RMG approval is required for all material risk acceptance decisions. RMG independently assesses and accepts all material risks and sets prudential limits, consistent with the Board approved Risk Appetite Statement. The Head of RMG, as Macquarie's CRO, is a member of the Executive Committee of MGL and MBL and reports directly to the CEO with a secondary reporting line to the Board Risk Committee. Further details on the Risk Management Framework in the Consolidated Entity can be found in the Risk Management Report of this Annual Report.

Note 34.1 Credit risk

Credit risk is the risk of a counterparty failing to complete its contractual obligations when they fall due. The consequent loss is either the amount of the loan or financial obligation not repaid, or the loss incurred in replicating a trading contract with a new counterparty.

Analysis and limit approval

Responsibility for approval of credit exposures is delegated to specific individuals by the Board or CRO. Credit risk analysis is focused on ensuring that risks have been fully identified and that the downside risk is properly understood and acceptable. After this analysis is undertaken, limits are set for an acceptable level of potential exposure. All wholesale limits and ratings are reviewed at least once a year or more frequently if required. Retail credit exposures are monitored on a portfolio basis.

All credit exposures are monitored regularly against limits. Credit exposures for loans are evaluated as either the full current face value or, for distressed debt, the acquisition cost when acquired in the secondary market. Derivative exposures are measured using high confidence potential future underlying asset prices. To mitigate credit risk, where appropriate, the Consolidated Entity makes use of margining and other forms of collateral or credit enhancement techniques (including guarantees, letters of credit, the purchase of credit default swaps and mortgage insurance).

Ratings and reviews

Refer to Note 11 *Expected credit losses* for details regarding the manner in which the Consolidated Entity has adopted and applied AASB 9's expected credit loss impairment requirements.

Wholesale rating:

Macquarie wholesale ratings broadly correspond to Standard & Poor's credit ratings as follows:

Credit grading	Internal rating	External equivalent
Investment Grade	MQ1 to MQ8	AAA to BBB-
Non-Investment Grade	MQ9 to MQ16	BB+ to C
Default	MQ99	Default

Retail rating:

Retail pools are mapped to the credit quality grades based on their PDs.

Mapping retail portfolios to the credit grades has been done for comparability of the overall presentation and does not reflect the distribution of risk in the portfolio. Management reviews a range of information, including past due status for the portfolio, to assess the credit quality of these assets.

Under AASB 139, credit quality of retail lending exposures was disclosed based on regulatory PDs (through-the-cycle PDs) and considered the credit rating of the insurance provider for insured mortgages.

Due from subsidiaries/due from related body corporate entities:

Balances with subsidiaries and related body corporate entities are mapped to the rating grades assigned internally to these counterparties for the pricing of internal funding arrangements on an arm's length basis.

Portfolio and country risk

A review of the credit portfolio that involves monitoring credit concentrations by counterparty, country, risk type, industry and credit quality is carried out quarterly and reported to the Board semi-annually. Policies are in place to regulate large exposures to single counterparties or groups of counterparties.

The Consolidated Entity has a country risk management framework which covers the assessment of country risk and the approval of country risk limits. Where appropriate the country risk is mitigated by political risk insurance.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 34

Note 34

Financial risk management continued

Note 34.1 Credit risk continued

Maximum exposure to credit risk

For on-balance sheet instruments, the maximum exposure to credit risk is the carrying amount reported on the balance sheet (refer Note 35 *Measurement categories of financial instruments*). For off balance sheet instruments, the maximum exposure to credit risk is a function of the contractual notional amount and is disclosed in Note 11 *Expected credit losses*.

Prior year comparative credit risk disclosures

The credit risk disclosures that follow were included in the 2018 annual report and do not reflect the adoption of AASB 9,

principally because the analysis includes the consideration of the credit rating of the insurance provider to ensure mortgages. These tables are accordingly not directly comparable to that provided under AASB 9. These disclosures have been restated for balance sheet presentation changes (Refer Note 1). The balances disclosed in the credit risk tables below exclude financial assets that are subject to risks other than credit risk, such as equity investments, commodities or bank notes and coins.

Credit quality of financial assets

The table below details the credit quality of the Consolidated Entity's financial assets for the maximum exposure to credit risk. The credit quality is based on the individual counterparty's credit rating and industry type using the Consolidated Entity's credit rating system and excludes the benefit of collateral and credit enhancements except as otherwise indicated (refer to section on collateral and credit enhancements).

A facility is considered to be past due when a contractual payment falls overdue by one or more days. When a facility is classified as past due, the entire facility balance after provisions is disclosed in the past due analysis.

The factors taken into consideration by the Consolidated Entity when determining whether an asset is impaired are set out in Note 1(xxiii) *Impairment*.

Included in the past due category are balances which were overdue by one day or more.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 34

Financial risk management continued

Note 34.1 Credit risk continued

Collateral and credit enhancements held

Cash collateral on securities borrowed and reverse repurchase agreements

The Consolidated Entity enters into stock borrowing and reverse repurchase transactions with counterparties which require lodgement of non-cash collateral. Securities borrowed require the deposit of cash collateral at amounts equal to or greater than the market value of the securities borrowed. Reverse repurchase agreements are collateralised financing arrangements with the market value of the securities provided as collateral generally in excess of the principal amount.

The fair value of collateral held not recognised in the statement of financial position as at 31 March 2019 is \$29,304 million (2018: \$28,615 million). The Consolidated entity is permitted to sell or re-pledge the entire value of securities received, of which the fair value of collateral sold or re-pledged is \$7,448 million (2018: \$11,750 million).

Loan assets

Mortgage loans

Mortgages are secured by fixed charges over a borrower's property. Prior to April 2017, the Consolidated Entity obtained LMI from an investment grade counterparty to cover a substantial portion of the mortgage portfolio against a potential shortfall between the value of a repossessed property sold and loan outstanding, including accrued interest. Since April 2017, the Consolidated Entity has purchased risk protection from a panel of investment grade counterparties via an excess of loss structure.

The tables below provide information on Loan to Value Ratios (LVRs) determined using current loan balances and the most recent valuation of mortgaged assets in response to variation in the loan request.

Note 34

Financial risk management continued

Note 34.1 Credit risk continued

Asset financing

The Consolidated Entity leases assets and provides asset-related financing, predominantly motor vehicles, to corporate and retail clients. Title to the underlying assets are held by the Consolidated Entity as collateral. For the Consolidated Entity, of the asset finance portfolio of \$17,985 million (2018: \$19,084 million), the credit exposure after considering the depreciated value of collateral is \$8,033 million (2018: \$8,414 million). For the Company, of the asset finance portfolio of \$3,361 million (2018: \$3,539 million), the credit exposure after considering the depreciated value of collateral is \$1,371 million (2018: \$1,487 million).

The collateralised value is based on standard recovery rates for the underlying assets of retail and corporate clients.

Corporate, commercial and other lending

Collateral held against corporate, commercial and other lending consists of secured positions over assets of the counterparty, often in the form of corporate assets. For the Consolidated Entity, of the term lending of \$12,151 million (2018: \$14,384 million), the credit exposure after considering the estimated value of collateral and credit enhancements is \$2,616 million (2018: \$3,207 million). For the Company, of the term lending of \$9,441 million (2018: \$10,787 million), the credit exposure after the estimated value of collateral and credit enhancements is \$2,049 million (2018: \$2,464 million).

Investment lending

The Consolidated Entity lends to clients for investment lending, where it holds the underlying investment and/or alternative acceptable assets as collateral or holds security by way of a registered pledge over the underlying investment. For the Consolidated Entity, of the investment lending portfolio of \$1,780 million (2018: \$2,134 million), \$1,780 million (2018: \$2,134 million) is fully collateralised. For the Company, of the investment lending portfolio of \$265 million (2018: \$272 million), \$265 million (2018: \$272 million) is fully collateralised.

Additional collateral

The Consolidated Entity and the Company also holds other types of collateral, such as unsupported guarantees. While such mitigants have value, as a credit risk mitigant, often providing rights in insolvency, their assignable values are uncertain and therefore are assigned no value for disclosure purposes. The loan balance includes \$10,753 million (2018: \$11,560 million) which has been securitised by consolidated SPEs.

Derivative instruments

Derivatives may be traded on an exchange (exchange traded) or they may be privately negotiated contracts, which are referred to as Over the Counter (OTC) derivatives. The Consolidated Entity's and Company's OTC derivatives are cleared and settled either through central clearing counterparties (OTC-cleared), or bilateral contracts between two counterparties.

Exchange traded and OTC derivative contracts have reduced credit risk as the Consolidated Entity's counterparty is a clearing

house. The clearing house is responsible for managing the risk associated with the process on behalf of their members and providing a high level of confidence that adequate resources exist to fulfil its obligations when they become due. Members are required to provide initial margins in accordance with the exchange rules in the form of cash or securities and provide daily variation margins in cash to cover changes in market values of the underlying derivatives. Further, all members are generally required to contribute to (and guarantee) the compensation or reserve fund which may be used in the event of default and shortfall of a member. The Consolidated Entity held exchange traded derivatives with positive replacement values as at 31 March 2019 of \$802 million (2018: \$658 million). The Company held exchange traded derivatives with positive replacement values as at 31 March 2019 of \$699 million (2018: \$554 million).

For OTC derivative contracts, the Consolidated Entity and Company often have master netting agreements (usually ISDA Master Agreements) with certain counterparties to manage the credit risk. The credit risk associated with positive replacement value contracts is reduced by master netting arrangements.

In the event of default, they require balances with a particular counterparty covered by the agreement (for example derivatives and cash margins) to be terminated and settled on a net basis. The Consolidated Entity and Company also often execute a Credit Support Annex in conjunction with a master netting agreement. This facilitates the transfer of margin between parties during the term of arrangements and mitigates counterparty risk arising from changes in market values of the derivatives.

As at 31 March 2019, the Consolidated Entity held OTC contracts with a positive replacement value of \$13,288 million (2018: \$12,037 million). The credit risk of these contracts has been reduced due to master netting agreements covering negative OTC contracts of \$7,311 million (2018: \$6,589 million) and margins held (excluding the impact of over-collateralisation) of \$2,068 million (2018: \$1,377 million).

As at 31 March 2019, the Company held OTC contracts with a positive replacement value of \$11,550 million (2018: \$10,114 million). The credit risk of these contracts is reduced due to master netting agreements covering negative OTC contracts of \$6,368 million (2018: \$5,549 million) and margins held (excluding the impact of over-collateralisation) of \$1,802 million (2018: \$1,159 million).

Financial investments

This classification mainly includes debt securities held by Group Treasury for liquidity management purposes and other securities for short term gains.

The Consolidated Entity utilises Credit Default Swaps (CDS), guarantees, other forms of credit enhancements or collateral in order to reduce the exposure to this credit risk.

Margin money and settlement assets

Security settlements of \$3,203 million (2018: \$3,108 million) in the Consolidated Entity and \$2,811 million (2018: \$2,729 million), in the Company are included in Margin money and settlement assets, represent amounts owed by an exchange (or a client) for equities sold (or bought on behalf of a client). These assets are collateralised with the underlying equity securities or cash held by the Consolidated Entity until the date of settlement.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 34

Note 34.1 Credit risk continued

Credit commitments

Undrawn facilities and lending commitments of \$5,952 million (2018: \$4,182 million) in the Consolidated Entity and \$5,818 million (2018: \$3,872 million) in the Company are secured through collateral and credit enhancement out of total undrawn facilities and lending commitments of \$7,300 million (2018: \$6,146 million) in the Consolidated Entity and \$6,816 million (2018: \$5,200 million) in the Company.

Note 34.2 Liquidity risk

Governance and oversight

Macquarie's liquidity risk management framework is designed to ensure that it is able to meet its funding requirements as they fall due under a range of market conditions.

Liquidity management is performed centrally by Group Treasury, with oversight from the Asset and Liability Committee (ALCO) and RMG. Macquarie's liquidity policy is approved by the MGL and MBL Boards after endorsement by the ALCO and liquidity reporting is provided to the Boards on a monthly basis. The ALCO includes the MGL CEO, MBL CEO, CFO, CRO, Group Treasurer, Head of Balance Sheet Management and Operating Group Heads.

RMG provides independent oversight of liquidity risk management, including ownership of liquidity policies and key limits and approval of material liquidity scenario assumptions.

Liquidity policy and risk appetite

The *MGL and MBL Liquidity Policy* is designed so that each of the Bank Group and the Non-Bank Group maintains sufficient liquidity to meet its obligations as they fall due.

Macquarie Group's liquidity risk appetite is set to ensure that Macquarie Group is able to meet all of its liquidity obligations during a period of liquidity stress: being a twelve month period with constrained access to funding markets for MBL, no access to funding markets for MGL and with only a limited reduction in Macquarie Group's franchise businesses. MBL is an Authorised Deposit-taking Institution (ADI) and is funded mainly with capital, long-term liabilities and deposits.

Liquidity contingency plan

Group Treasury maintains a *Liquidity Contingency Plan*, which outlines how a liquidity crisis would be managed. The plan defines roles and responsibilities and actions to be taken in a liquidity event, including identifying key information requirements and appropriate communication plans with both internal and external parties.

Specifically, the plan details:

- factors that may constitute a crisis
- the officer responsible for enacting the contingency management
- a committee of senior executives responsible for managing a crisis
- the information required to effectively manage a crisis
- a communications strategy

- a high level checklist of possible actions to conserve or raise additional liquidity
- contact lists to facilitate prompt communication with all key internal and external stakeholders.

In addition, Macquarie Group monitors a range of early warning indicators on a daily basis that might assist in identifying emerging risks in Macquarie Group's liquidity position. These indicators are reviewed by Senior Management and are used to inform any decisions regarding invoking the plan.

The *Liquidity Contingency Plan* is subject to regular review by both Group Treasury and RMG. It is submitted to the ALCO and MGL and MBL Boards for approval.

Macquarie is a global financial institution, with branches and subsidiaries in a variety of countries. Regulations in certain countries may require some branches or subsidiaries to have specific local contingency plans. Where that is the case, the Liquidity Contingency Plan contains a supplement providing the specific information required for those branches or subsidiaries.

Funding strategy

Macquarie prepares a *Funding Strategy* on an annual basis and monitors progress against the strategy throughout the year. The Funding Strategy aims to maintain Macquarie's diversity of current and projected funding sources, ensure ongoing compliance with all liquidity policy requirements and facilitate forecast asset growth. The *Funding Strategy* is reviewed by the ALCO and approved by the respective Boards.

Scenario analysis

Scenario analysis is central to Macquarie's liquidity risk management framework. In addition to regulatory defined scenarios, Group Treasury models a number of additional liquidity scenarios covering both market-wide and Macquarie-specific crises.

The scenarios are run over a number of timeframes and a range of conservative assumptions are used regarding the level of access to capital markets, deposit outflows, contingent funding requirements and asset sales.

As an example, one internal scenario projects the expected cash and liquid asset position during a combined market-wide and Macquarie-specific crisis over a twelve month time frame. This scenario assumes no access to new funding sources, a significant loss of customer deposits and contingent funding outflows resulting from undrawn commitments, market moves impacting derivatives and other margined positions combined with a multiple notch credit rating downgrade items of Macquarie's liquidity risk management. Macquarie's cash and liquid asset portfolio must exceed the minimum requirement as calculated in this scenario at all times.

Liquid asset holdings

Group Treasury centrally maintains a portfolio of highly liquid unencumbered assets to ensure adequate liquidity is available in all funding environments, including worst case wholesale and retail market conditions. The minimum level of cash and liquid assets is calculated with reference to internal scenario projections and regulatory requirements.

Note 34

Financial risk management continued

Note 34.2 Liquidity risk continued

The cash and liquid asset portfolio contains only unencumbered assets that can be relied on to maintain their liquidity in a crisis scenario. Specifically, cash and liquid assets held to meet minimum internal and regulatory requirements must be held in cash, qualifying High Quality Liquid Assets (HQLA) or be an asset type that is eligible as collateral in the Reserve Bank of Australia's (RBA) Committed Liquidity Facility (CLF) – so called 'Alternative Liquid Assets' (ALA). Composition constraints are also applied to ensure appropriate diversity and quality of the assets in the portfolio. The cash and liquid asset portfolio are held in a range of currencies to ensure Macquarie's liquidity requirements are broadly matched by currency.

Funds transfer pricing

An internal funds transfer pricing framework is in place that has been designed to produce appropriate incentives for business decision-making by reflecting the true funding costs arising from business actions. Under this framework, each business is allocated the full cost of the funding required to support its products and business lines, recognising the actual and contingent funding-related exposures their activities create for Macquarie Group as a whole. Businesses that raise funding are compensated at a level that is appropriate for the liquidity benefit provided by the funding.

Contractual undiscounted cash flows

The following tables summarise the maturity profile of the Consolidated Entity's financial liabilities as at 31 March based on a contractual undiscounted repayment basis and hence would vary from the carrying value as at the balance sheet date. Repayments subject to notice are treated as if notice were given immediately. However, the Consolidated Entity expects that many customers will not request repayment on the earliest date the Consolidated Entity could be required to pay since the deposits are reported at their contractual maturity, the table does not reflect the behaviour expected cash flows indicated by the Consolidated Entity's deposit retention history.

(1) Derivative liabilities (other than those designated in a hedging relationship) and trading liabilities are included in the 'less than 3 months' column at their fair value. Liquidity risk on these items is not managed on the basis of contractual maturity, since they are not held for settlement according to such maturity and will frequently be settled in the short-term at fair value.

(2) Where multiple derivatives are combined in order to form a single hedge instrument designated in a hedge accounting relationship, each derivative is considered independently for the purposes of assessing liquidity risk and for the disclosure requirements.

(3) Excludes non-contractual accruals and provisions.

(4) Includes \$9,617 million payables to SPE holders disclosed on a contractual maturity basis. The expected maturity of the notes is dependent on the repayment of the underlying loans included in the loan assets.

(5) Includes securities with conditional repayment obligations. The cash outflow on the principal component on these securities is disclosed using the earliest optional exchange dates and the cash outflow of the interest component is disclosed using repricing dates instead of the contractual maturity. For contractual maturity of these securities refer Note 23 *Loan Capital*.

(6) Cash flows on contingent liabilities and commitments are dependent on the occurrence of various future events and conditions and may or may not result in an outflow of resources. These are reported in the less than 3 months unless they are payable on demand or the contractual terms specify a longer dated cash flow.

Note 34

Financial risk management continued

Note 34.3 Market risk

Traded market risk

Market risk is the risk of adverse changes in the value of the Consolidated Entity's trading positions as a result of changes in market conditions. The Consolidated Entity is exposed to the following risks:

- **Price:** The risk of loss due to changes in price of a risk factor (interest rates, foreign exchange, commodities etc)
- **Volatility:** The risk of loss due to changes in the volatility of a risk factor
- **Basis:** Risk of imperfect correlation between offsetting investments in a hedging strategy
- **Correlation:** Risk that the actual correlation between two assets or variables is different from the assumed correlation
- **Illiquid market:** Risk of inability to sell assets or close out positions in thinly-traded markets at close to the last market prices
- **Concentration:** Risk of over concentration of trading exposures in certain markets and products
- **Valuation adjustments (XVA):** Risk of actual valuation adjustments to derivative positions; specifically Credit Valuation Adjustment (CVA), Debit Valuation Adjustment (DVA), Funding Valuation Adjustment (FVA) and Collateral Valuation Adjustment (CoVA).

It is recognised that all trading activities contain calculated elements of risk taking. The Consolidated Entity is prepared to accept such risks provided they are within agreed limits, independently and correctly identified, calculated and monitored by RMG, and reported to Senior Management on a regular basis.

RMG monitors positions within the Consolidated Entity according to a limit structure which sets limits for all exposures in all markets. Limits are for both individual trading desks and divisions as well as in aggregate.

RMG sets three complementary limit structures:

- **contingent loss limits:** worst case scenarios that shock prices and volatilities by more than that which has occurred historically. Multiple scenarios are set for each market to capture the non-linearity and complexity of exposures arising from derivatives. A wide range of assumptions about the correlations between markets is applied
- **position limits:** volume, maturity and open position limits are set on a large number of market instruments and securities in order to constrain concentration risk and to avoid the accumulation of risky, illiquid positions
- **Value-at-Risk (VaR) limits:** statistical measure based on a 10-day holding period and a 99% confidence level, as stipulated by the APRA capital adequacy standard. The model is validated daily by back testing a one-day VaR against hypothetical and actual daily trading profit or loss.

Note 34

Note 34.3 Market risk continued

Value-at-Risk figures (1 day, 99% confidence level)

The tables below show the average, maximum and minimum VaR over the financial year for the major markets in which the Consolidated Entity and Company operate. The VaR shown in the tables are based on a one-day holding period. The aggregated VaR is on a correlated basis.

	2019			2018		
	Average \$m	Maximum \$m	Minimum \$m	Average \$m	Maximum \$m	Minimum \$m
CONSOLIDATED						
Equities	5.29	8.60	2.59	7.18	10.90	2.60

Note 34.3 Market risk continued

Value-at-Risk

The VaR model uses a Monte Carlo simulation to generate normally distributed price and volatility paths, based on three years of historical data. VaR focuses on unexceptional price moves so that it does not account for losses that could occur beyond the 99% level of confidence. These factors can limit the effectiveness of VaR in predicting future price moves when changes to future risk factors deviate from the movements expected by the above assumptions. For capital adequacy purposes, debt-specific risk is measured using APRA's standard method, whilst all other exposures are captured by the VaR model. This combined approach has been approved by APRA and is subject to periodic review.

Non-traded market risk

The Consolidated Entity and the Company have exposure to non-traded market risks arising from transactions entered into during its normal course of business and as a result of its investments in foreign operations. These risks include:

- Interest rate: changes in the level, shape and volatility of yield curves, and/or client behaviour given these changes
- Foreign exchange: changes in the spot exchange rates.

The Consolidated Entity has limited appetite for non-traded market risks. Where commercially feasible, these risks are transferred into the trading books of CGM and Group Treasury and governed within the traded market risk framework described above.

Responsibility for managing exposures rests with individual businesses, with additional central monitoring from FMG for foreign exchange risks. Any residual non-traded market risks are subject to independent limits approved by RMG and reported regularly to Senior Management.

Where foreign exchange exposures arise as a result of investments in foreign operations, a key objective of the Non-traded market risk policy of the Consolidated Entity is to reduce the sensitivity of regulatory capital ratios to foreign currency movements. This is achieved by leaving specific investments in core foreign operations exposed to foreign currency translation movements and captured in the foreign currency translation reserve, a component of regulatory capital. This aligns the currency of capital supply with capital requirements.

As a result of this policy, the Consolidated Entity is therefore partially exposed to currency risk in relation to the translation of its net investment in foreign operations to Australian dollars. Apart from this there is no material non-trading foreign exchange risk in the income statement.

Accounting considerations arising from hedging activities

The use of derivative and other financial instruments to hedge non-traded positions potentially gives rise to income statement volatility due to accounting treatments. The Consolidated Entity manages this through hedge accounting as set out in Note 1(xi) *Derivative instruments* and Note 33 *Hedge accounting*.

Note 34

Financial risk management continued

Note 34.3 Market risk continued

Foreign currency risk

The table below indicates the sensitivity of its partial exposure to movements in the Australian dollar rate against various foreign currencies as at 31 March in relation to its net investment in foreign operations. The Consolidated Entity is active in various currencies globally. Those with the most impact on the sensitivity analysis below are United States dollar, Great British pound, Euro and Canadian dollar as shown below.

	2019		2018	
	Movement in exchange rates %	Sensitivity of equity after tax \$m	Movement in exchange rates %	Sensitivity of equity after tax \$m
CONSOLIDATED				
United States dollar	+10	(261)	+10	(366)
Great British pound	+10	(48)	+10	(82)
Canadian dollar	+10	(14)	+10	(13)
Euro	+10	–	+10	(38)
Total		(323)		(499)
United States dollar	-10	319	-10	448
Great British pound	-10	59	-10	100
Canadian dollar	-10	16	-10	16
Euro	-10	–	-10	46
Total		394		610

Equity price risk

The Consolidated Entity and the Company is not exposed to significant equity risk on their non-trading investment portfolios.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 35

Measurement categories of financial instruments

The following table contains information relating to the measurement categories of financial instruments under AASB 9 of the Consolidated Entity. The descriptions of measurement categories are included in Note 1(viii) *Financial instruments*. The methods and significant assumptions that have been applied in determining the fair values of financial instruments are disclosed in Note 36 *Fair value of financial assets and financial liabilities*.

(4) Non-financial liabilities primarily represents tax payables, employee related provisions and aircraft and rail maintenance liabilities.

(5) Items measured at amortised cost and FVOCI includes, where applicable, hedge accounting adjustments for the designated hedged risks.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 36

Fair value of financial assets and financial liabilities

Fair value reflects the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Quoted prices or rates are used to determine fair value where an active market exists. If the market for a financial instrument is not active, fair values are estimated using present value or other valuation techniques, using inputs based on market conditions prevailing at the measurement date.

The values derived from applying these techniques are affected by the choice of valuation model used and the underlying assumptions made regarding inputs such as timing and amounts of future cash flows, discount rates, credit risk, volatility and correlation.

Financial instruments measured at fair value are categorised in their entirety, in accordance with the levels of the fair value hierarchy as outlined below:

Level 1:	quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2:	inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
Level 3:	inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The appropriate level for an instrument is determined on the basis of the lowest level input that is significant to the fair value measurement.

AASB 13 *Fair Value Management* requires the use of the price within the bid-offer spread that is most representative of fair value. Valuation systems will typically generate mid-market prices. The bid-offer adjustment reflects the extent to which bid-offer costs would be incurred if substantially all residual net portfolio market risks were closed using available hedging instruments.

The following methods and significant assumptions have been applied in determining the fair values of financial instruments which are carried at amortised cost:

- the fair values of liquid assets and other instruments maturing within three months are approximate to their carrying amounts. This assumption is applied to liquid assets and the short-term elements of all other financial assets and financial liabilities
- the fair value of demand deposits with no fixed maturity approximates their carrying amount as they are short-term in nature or are payable on demand
- the fair values of variable rate financial instruments, including cash collateral on securities borrowed/cash collateral on securities lent, repurchase agreements over commodities approximates by their carrying amounts. Fair value of all loan assets and debt liabilities carried at amortised cost, is determined with reference to changes in credit markets as well as interest rates
- the fair value of fixed rate loans and debt investments carried at amortised cost is estimated by reference to current market rates offered on similar loans and the creditworthiness of the borrower
- the fair value of debt issued, and loan capital issued at amortised cost is based on market prices where available.

Where market prices are not available the fair value is based on discounted cash flows using rates appropriate to the term and issue and incorporates changes in the Consolidated Entity's own credit spread

- substantially all of the Consolidated Entity's commitments to extend credit are at variable rates. As such, there is no significant exposure to fair value fluctuations resulting from interest rate movements relating to these commitments
- the fair value of balances due from/to related body corporate entities and subsidiaries is approximated by their carrying amount as the balances are generally of a short term nature.

The following methods and significant assumptions have been applied in determining the fair values of financial instruments including balances with related body corporate entities and subsidiaries measured at fair value:

- trading portfolio assets and liabilities, derivative financial instruments and other transactions undertaken for trading purposes are measured at fair value by reference to quoted market prices where available (for example listed securities). If quoted market prices are not available, then fair values are estimated on the basis of pricing models or other recognised valuation techniques
- repurchase and reverse repurchase agreements being collateralised financing arrangements, are measured at fair value with reference to the securities which are held or provided as the collateral for the financing
- Financial investments at FVOCI and FVTPL are measured at fair value by reference to active quoted market prices where available (for example listed securities). If quoted market prices are not available, then fair values are estimated on the basis of pricing models or other recognised valuation techniques. For FVOCI assets, unrealised gains and losses, excluding impairment write-downs on debt instruments, are recorded in the FVOCI reserve in equity until the asset is sold, collected or otherwise disposed of
- fair values of variable rate loans classified at FVOCI in the Company approximates its amortised cost carrying value on the basis that the interest rates are reflective of market rates offered on similar loans
- fair values of fixed rate loans classified as at FVTPL and FVOCI and issued debt classified as DFVTPL is estimated by reference to current market rates offered on similar loans and issued debt
- for financial assets carried at fair value, in order to measure counterparty credit risk, a Credit Valuation Adjustment (CVA) is incorporated into the valuation. The CVA is calculated at a counterparty level taking into account all exposures to that counterparty
- for financial liabilities carried at fair value, in order to measure the Consolidated Entity's own credit risk, a Debit Valuation Adjustment (DVA) is incorporated into the valuations
- for uncollateralised derivative positions, the Consolidated Entity has incorporated the market implied funding costs for these uncollateralised derivative positions as a Funding Valuation Adjustment (FVA). FVA is determined by calculating the net expected exposures at a counterparty level and applying MGL's internal Treasury lending rates as an input into the calculation. The approach takes into account the probability of default of each counterparty, as well as any mandatory break clauses.

Note 36

Fair value of financial assets and financial liabilities continued

Where valuation techniques are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. All models are certified before they are used, and models are calibrated periodically to test that outputs reflect prices from observable current market transactions in the same instrument or other available observable market data. To the extent possible, models use only observable market data (for example for OTC derivatives), however management is required to make assumptions for certain inputs that are not supported by prices from observable current market transactions in the same instrument such as volatility and correlation.

The fair values calculated for financial assets which are carried in the statement of financial position at amortised cost are for disclosure purposes only. The methods and assumptions applied to derive these fair values, as described below, can require significant judgement by management and therefore may not necessarily be comparable to other financial institutions.

The following table summarises the levels of the fair value hierarchy for financial assets and liabilities held at amortised cost:

	Level 1 \$m	Level 2 \$m	Level 3 \$m	Total \$m

(1) Includes loans held by the Company measured at amortised cost under AASB 139. Under AASB 9, these loans were determined to be held within a business model to both collect contractual cash flows and realise through securitisation and accordingly classified to be measured as FVOCI. These loans are recognised at amortised cost in the Consolidated Entity since the securitisation vehicles to which such loans may be sold are consolidated, and on a consolidated basis are held in a business model to collect contractual cash flows. For details refer to the AASB 9 transition disclosure under Note 1.

(2) Includes subordinated notes held by the Company in consolidated securitisation vehicles measured at amortised cost under AASB 139 which had certain features resulting in failing AASB 9 SPPI requirements, and accordingly concluded to be measured at FVTPL on AASB 9 adoption. For details refer to the AASB 9 transition disclosure under Note 1.

The realised and unrealised gain and loss for assets and liabilities in Level 3 presented in the table above do not reflect the related realised or unrealised gain and loss arising on economic hedging instruments classified in Levels 1 and/or 2.

(2) The derivative financial instruments in the table above are represented on a net basis. On a gross basis, derivative assets are \$332 million (2018: \$278 million) and derivative liabilities are \$161 million (2018: \$131 million).

(3) Assets and liabilities transferred in or out of Level 3 are presented as if those had been transferred at the beginning of the period.

Note 36

Fair value of financial assets and financial liabilities continued

Significant transfers between levels of the fair value hierarchy

During the financial year the Consolidated Entity and the Company did not have significant transfers between Level 1 and Level 2.

Transfers into Level 3 were due to the lack of observable valuation inputs for certain securities and investments. Transfers out of Level 3 were principally due to valuation inputs becoming observable during the financial year.

Unrecognised gains

For financial instruments measured at FVTPL, the best evidence of fair value at initial recognition is its transaction price, unless its fair value is evidenced by comparison with other observable current market transactions in the same instrument or based on a valuation technique for which variables include only data from observable markets. Where such alternative evidence exists, the Consolidated Entity recognises profit or loss immediately when the financial instrument is recognised ('day 1 profit or loss'). When significant unobservable inputs are used to determine fair value, the day 1 profit is deferred and is recognised in the income statement over the life of the transaction or when the inputs become observable.

The table below summarises the deferral and recognition of profit or loss where a valuation technique has been applied for which not all inputs are observable in the market:

	CONSOLIDATED		COMPANY	
	2019 \$m	2018 \$m	2019 \$m	2018 \$m
Balance at the beginning of the financial year	178	185	144	143
Deferral on new transactions	69	47	54	24
Amounts recognised in the income statement during the financial year	(64)	(54)	(46)	(23)
Balance at the end of the financial year	183	178	152	144

Sensitivity analysis of valuations using unobservable inputs

The table below shows the sensitivity to reasonably possible alternative assumptions, for Level 3 financial instruments whose fair values are determined in whole or in part using unobservable inputs, valuation techniques such as discounted cash flows based on assumptions by reference to historical company and industry experience.

Commodities	35	–	(41)	–
Interest rate and other products	6	–	(6)	–
Total	41	6	(47)	(2)

(1) Includes subordinated notes held by the Company in consolidated securitisation vehicles which were earlier measured at amortised cost under AASB 139 had certain features resulting in failing AASB 9 SPPI requirements, and accordingly concluded to be measured at FVTPL on AASB 9 adoption. For details refer AASB 9 transition disclosure under Note 1.

Note 36

Fair value of financial assets and financial liabilities continued

Significant unobservable inputs

The following table contains information about the significant unobservable inputs used in Level 3 valuations, and the valuation techniques used to measure fair values of instruments. The range of values represent the highest and lowest input used in the valuation techniques. Therefore, the range does not reflect the level of uncertainty regarding a particular input, but rather the different underlying characteristics of the relevant assets and liabilities.

	Assets \$m	Liabilities \$m	Valuation technique(s)	Significant unobservable inputs	RANGE OF INPUTS	
					Minimum value	Maximum value
CONSOLIDATED 2019						
Equity and equity-linked products	82	–	Market comparability Pricing model	Price in % ⁽¹⁾ Earnings multiple		
Commodities	546	317	Pricing model	Volatility	3.7%	176.4%
Interest rate and other products	719	–	Discounted cash flows Pricing Model Market comparability	Discount rate ⁽²⁾ Correlation Price in % ⁽¹⁾	0.0%	100%
Total	1,347	317				
CONSOLIDATED 2018						
Equity and equity-linked products	101	29	Market comparability Pricing model	Price in % ⁽¹⁾ Earnings multiple		
Commodities	635	322	Pricing model	Volatility	5.0%	106.0%
Interest rate and other products	189	2	Discounted cash flows Pricing model Market comparability	Discount rate ⁽²⁾ Correlation Price in % ⁽¹⁾	0.0%	95.0%
Total	925	353				

(1) The range of inputs relating to market comparability is not disclosed as the diverse nature of the underlying investments results in a wide range of inputs.

(2) The range of inputs relating to discounted cash flows is not disclosed as the diverse nature of the underlying products results in a wide range of inputs.

Correlation

Correlation is a measure of the relationship between the movements of two variables (i.e. how the change in one variable influences a change in the other variable). Correlation is a key input of derivatives with more than one underlying and is generally used to value hybrid and exotic instruments.

Volatility

Volatility is a measure of the variability or uncertainty in returns for a given derivative underlying. It represents an estimate of how much a particular underlying instrument, parameter or index will change in value over time. Volatility is an input in the valuation of derivatives containing optionality. Volatility and skew are impacted by the underlying risk, term and strike price of a derivative.

Inputs for unlisted equity securities (discount rate, earnings multiple)

Unlisted equity instruments are generally valued based on earnings multiples of comparable companies. Significant unobservable inputs may include earnings multiple discount rates and forecast earnings of the investee companies.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 37

Offsetting financial assets and financial liabilities

The Consolidated Entity reports financial assets and financial liabilities on a net basis in the statement of financial position when they meet the criteria described in Note 1(viii) *Financial instruments: Offsetting of financial instruments*. The following tables provide information on the impact of offsetting that has occurred in the statement of financial position, as well as amounts subject to enforceable netting arrangements that do not meet all the criteria for offsetting in the statement of financial position. Enforceable netting arrangements may allow for net settlement of specified contracts with a counterparty only in the event of default or other pre-determined events, such that their potential effects on the Consolidated Entity's and Company's financial position in that circumstance is to settle as one arrangement. The Consolidated Entity uses a variety of credit risk mitigation strategies in addition to netting and collateral arrangements, therefore amounts presented in this note are not intended to represent the credit risk exposure of the entity, refer to Note 34.1 *Credit risk for information on credit risk management*.

Intercompany balances with subsidiaries are presented on net basis in the statement of financial position where subsidiaries have signed master netting agreements while cases where a subsidiary is not a party to a master netting agreement the balances are presented on gross basis.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 38

Pledged assets and transfers of financial assets

Pledged assets

Assets pledged as security for liabilities include the following:

- Securities included under trading assets provided as collateral for repurchase transactions, stock lending arrangements and arrangements relating to trading liabilities. These transactions are governed by standard industry agreements
- Loan assets held by the consolidated SPEs provided as collateral against debt issued
- Property, plant and equipment, loan assets, financial investments, other assets and cash and bank balance provided as collateral for bank borrowings.

The table below represents assets presented within the statement of financial position that have been pledged as security for liabilities.

	CONSOLIDATED	
	2019 \$m	2018 \$m
Cash and bank balances	22	130
Trading assets ⁽¹⁾	1,421	2,837
Financial investments	188	522
Other assets	17	510
Loan assets	11,039	12,173
Property, plant and equipment	79	2,765
Total pledged assets⁽²⁾	12,766	18,937

(1) For trading securities, the transferee has the right to sell or re-pledge the entire value of securities received.

(2) The fair value of collateral held not recognised in the statement of financial position as at 31 March 2019 is \$29,304 million (2018: \$28,615 million). The Consolidated entity is permitted to sell or re-pledge the entire value of securities received, of which the fair value of collateral sold or re-pledged is \$7,448 million (2018: \$11,750 million).

Transfers of financial assets

The Consolidated Entity may enter into transactions in the normal course of business that transfer financial assets recognised in the statement of financial position to other entities. Depending on the criteria discussed in Note 1(viii) *Financial instruments* the Consolidated Entity may be unable to derecognise the transferred asset, be able to derecognise the transferred assets in full or continue to recognise the asset to the extent of its continuing involvement.

Transferred financial assets that are derecognised

When financial assets are derecognised, some continuing involvement may be retained in the assets through liquidity support, financial guarantees, certain derivatives or certain securitisation interests. For the financial years ending 31 March 2019 and 31 March 2018, there were no material transfers of financial assets where the Consolidated Entity or Company retained continuing involvement in the transferred asset.

Transferred financial assets that are not derecognised

The Consolidated Entity and the Company did not derecognise any financial assets only to the extent of continuing involvement in the years ending 31 March 2019 and 31 March 2018. The following transactions typically result in the transferred assets continuing to be recognised in full.

Repurchase and securities lending agreements

Securities sold under agreement to repurchase and securities subject to lending agreements continue to be recognised in

the statement of financial position and an associated liability is recognised for the consideration received. In certain arrangements, the securities transferred cannot otherwise be pledged or sold by the transferee, however the assets may be substituted if the collateral is maintained.

Asset swaps

Financial assets sold, while concurrently entering into an asset swap with the counterparty, continue to be recognised along with an associated liability for the consideration received. The Consolidated Entity and Company do not have legal rights to these assets but have full economic exposure to them. The transferred assets cannot otherwise be pledged or sold by the transferee.

Interests in securitisations

Financial assets (principally mortgage loans and finance lease receivables) are packaged and securities issued to investors. Securitisation vehicles used to achieve this purpose are consolidated when the rights to the residual income of the vehicles, after all payments to investors and costs of the program have been met, is retained. When the Company is entitled to any residual income of a securitisation vehicle, the Company continues to recognise the financial assets. The transferred assets cannot otherwise be pledged or sold.

Other transfers

Includes loans and leases sold or lent to an external funder but the Consolidated Entity still has full economic exposure to them. In such instances the Consolidated Entity has an obligation to receive cash and pay them to external funder.

(1) Other assurance services consist of engagements in relation to an audit that are not the direct audit or review of financial reports. These services include regulatory compliance, accounting advice, comfort letters on debt issuance programs, certifications, due diligence and reviews of controls and other agreed upon procedures.

Use of PwC's services for engagements other than audit and assurance is restricted in accordance with the Consolidated Entity's *Auditor Independence Policy*. It is the Consolidated Entity's policy to seek competitive tenders for all major advisory projects and all non-audit services provided by PwC have been approved in accordance with its *Auditor Independence Policy*.

Notes to the financial statements

For the financial year ended 31 March 2019 continued

Note 40

Discontinued operations

(i) Description

On 10 December 2018, the Consolidated Entity disposed of its CAF Principal Finance and Transportation Finance businesses (the businesses) to MFHPL and its subsidiaries, resulting in a pre-tax gain of \$507 million. CAF Principal Finance provides flexible primary financing solutions and engages in secondary market investing across the capital structure. CAF Transportation Finance involves the financing of aircraft, rotorcraft and rail assets. Prior to the disposal date the businesses were reported as part of the CAF operating segment.

The Consolidated Entity utilised the sale proceeds to repay capital of \$2,040 million and pay a dividend of \$264 million to its holding company – Macquarie B.H. Pty Ltd.

The gain on disposal and the financial results of the businesses are disclosed as profit from discontinued operations in the income statement.

(ii) Income statement

The financial results of the businesses including the impacts of the sale transaction are presented below:

	CONSOLIDATED		COMPANY	
	2019 \$m	2018 \$m	2019 \$m	2018 \$m
Operating profit from discontinued operations before income tax				
Net operating lease income ⁽¹⁾	459	694	–	–

(1) Includes \$820 million (2018: \$1,199 million) of rental income (of which \$40 million (2018: \$82 million) is net supplemental rent on aircraft) net of \$361 million (2018: \$505 million) of depreciation on operating lease assets.

(2) Includes \$195 million (2018: \$360 million) of interest expenses in the Consolidated Entity and \$43 million (2018: \$67 million) in the Company paid by the businesses to Group Treasury (own funds). These amounts have been reported as interest income in the Consolidated entity's continuing operations.

(3) Includes income under fee sharing and other arrangements from subsidiaries.

(4) Includes \$339 million (2018: \$Nil) of gain on disposal of assets and liabilities held for sale and \$Nil (2018: \$90 million) net gain on change of control or significant influence on investments in the Consolidated Entity.

(5) Includes \$715 million (2018: \$603 million) of dividend income and \$219 million (2018: \$24 million) of net gain on disposal of subsidiaries in the Company.

(6) Includes ECL allowance of \$8 million (2018: \$52 million) of the Consolidated Entity and \$2 million (2018: \$12 million) for the Company.

(7) 10 December 2018, being the disposal date.

Events after the reporting date

There were no material events subsequent to 31 March 2019 that have not been reflected in the financial statements.

Directors' declaration

Macquarie Bank Limited

In the Directors' opinion:

- (a) the financial statements and notes set out on pages 44 to 187 are in accordance with the *Corporations Act 2001* (Cth), including:
 - (i) complying with the Australian accounting standards, and
 - (ii) giving a true and fair view of the Company's and the Consolidated Entity's financial positions as at 31 March 2019 and their performance for the financial year ended on that date, and
- (b) there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Note 1(i) includes a statement that the financial report complies with International Financial Reporting Standards.

The Directors have been given the declarations by the CEO and CFO required by section 295A of the *Corporations Act 2001* (Cth). This declaration is made in accordance with a resolution of the Directors.

Independent auditor's report

To the members of Macquarie Bank Limited

Report on the audit of the financial report

Our opinion

In our opinion:

The accompanying financial report of Macquarie Bank Limited (the Company) and its controlled entities (together the Consolidated Entity) is in accordance with the *Corporations Act 2001* (Cth), including:

- (a) giving a true and fair view of the Company's and Consolidated Entity's financial positions as at 31 March 2019 and of their financial performance for the year then ended
- (b) complying with Australian Accounting Standards and the *Corporations Regulations 2001* (Cth).

What we have audited

The Consolidated and Company financial report comprises:

- the Consolidated and Company statements of financial position as at 31 March 2019
- the Consolidated and Company statements of comprehensive income for the year then ended
- the Consolidated and Company statements of changes in equity for the year then ended
- the Consolidated and Company statements of cash flows for the year then ended
- the Consolidated and Company income statements for the year then ended
- the notes to the financial statements, which include a summary of significant accounting policies
- the directors' declaration.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial report* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company and the Consolidated Entity in accordance with the auditor independence requirements of the *Corporations Act 2001* (Cth) and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Our audit approach for the Consolidated Entity

An audit is designed to provide reasonable assurance about whether the financial report is free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial report

as a whole, taking into account the geographic and management structure of the Consolidated Entity, its accounting processes and controls and the industry in which it operates.

The Consolidated Entity is structured into three operating groups and a corporate segment. The Consolidated Entity has operations in multiple overseas locations, including sites in Gurugram, Jacksonville and Manila which undertake operational activities that are important to the financial reporting processes. The Consolidated Entity's financial report includes the three operating groups and the corporate segment.

Consolidated Entity materiality

For the purpose of our audit we used overall Consolidated Entity materiality of \$93 million, which represents approximately 1% of the Consolidated Entity's net assets.

We applied this threshold, together with qualitative considerations, to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements on the financial report as a whole.

We chose Consolidated Entity net assets as the benchmark as the Consolidated Entity is a wholly owned subsidiary with listed debt and, in our view, net assets represent an important benchmark against which the performance of the Consolidated Entity is measured by relevant stakeholders.

We utilised a 1% threshold based on our professional judgement, noting it is within the range of commonly acceptable thresholds.

Consolidated Entity audit scope

Our audit focused on where the Consolidated Entity made subjective judgements; for example, significant accounting estimates involving assumptions and inherently uncertain future events. To conduct this risk assessment, we considered the inherent risks facing the Consolidated Entity, including those arising from its respective business operations, and how the Consolidated Entity manages these risks. We also considered a number of other factors including the design and implementation of the Consolidated Entity's control environment relevant to the audit, the appropriateness of the use of the going concern basis of accounting in the preparation of the financial report and the risk of management override of controls.

We aligned our audit to the Consolidated Entity's structure by instructing a component audit team for each of the three operating groups and the corporate segment. These component audit teams established an audit strategy tailored for each operating group and the corporate segment, in consultation with the group audit team.

Independent auditor's report

To the members of Macquarie Bank Limited *continued*

Given the extent of the overseas operations of the Consolidated Entity, the component audit teams instructed a number of other PwC firms in overseas locations to perform audit procedures ranging from an audit of financial information to specified audit procedures. The group audit team determined the level of supervision and direction it needed to have over the audit work performed by the component audit teams, including over the component audit teams' review and supervision of the overseas audit teams they, in turn instructed. As part of the overall supervision of our audit and to develop our understanding of the Consolidated Entity's global operations, the group audit team or the component audit teams also visited overseas locations, including Gurugram, Hong Kong, Houston, Jacksonville, London, Manila, New York and Singapore.

The work performed by the component audit teams and the overseas audit teams, together with additional audit procedures performed by the group audit team such as procedures over

the Consolidated Entity's consolidation and the financial report disclosures, provided us with the information we needed for our opinion on the Consolidated Entity's financial report as a whole.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report for the current period. The key audit matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Further, any commentary on the outcomes of a particular audit procedure is made in that context. We communicated the key audit matters to the Board Audit Committee. The key audit matters identified below relate to the audit of both the Consolidated Entity and the Company, and references to the Consolidated Entity also apply to the Company.

Key audit matter	How our audit addressed the key audit matter
Provision for expected credit losses on loan assets held at amortised cost (Refer to Note 11)	
<p>The Consolidated Entity implemented AASB 9 on 1 April 2018.</p> <p>Under the AASB 9 credit impairment model, losses are recognised on an Expected Credit Loss (ECL) basis. ECLs are required to incorporate forward-looking information, reflecting the Consolidated Entity's view of potential future economic scenarios.</p> <p>In order to meet the ECL requirements of AASB 9, the Consolidated Entity has exercised judgement in developing ECL models and also in determining assumptions such as defining a significant increase in credit risk. The ECL models of the Consolidated Entity rely on numerous data inputs and certain post model adjustments are applied based on the Consolidated Entity's judgement.</p> <p>Loan assets held at amortised cost are classified as stage III under the ECL model where they are determined to be credit impaired. The ECL for credit impaired loan assets is measured as the difference between the contractual and expected cash flows from the individual exposure, discounted using the effective interest rate for that exposure.</p> <p>Given the extent of judgement involved, we considered this to be a key audit matter.</p>	<p>Our procedures included assessing the design and testing the operating effectiveness of certain controls supporting the Consolidated Entity's estimate of the ECL including controls relating to:</p> <ul style="list-style-type: none"> – review and approval of certain forward looking information used in the key models – the accuracy of certain critical data elements used in key ECL models, and – the review and challenge forums to assess the ECL output and post model adjustments. <p>In addition to controls testing, we also performed substantive procedures including:</p> <ul style="list-style-type: none"> – engaging PwC credit modelling experts to assess the reasonableness of the model monitoring performed for key models and to assess the reasonableness of the critical data elements identified by the Consolidated Entity – testing the completeness and accuracy of certain critical data elements used in key ECL models – testing the reasonableness of certain forward looking economic data selected by the Consolidated Entity, and – assessing certain post model adjustments identified by the Consolidated Entity <p>For credit impaired loan (stage III) provisions, we examined a sample of individual loan exposures to consider the reasonableness of provisions adopted.</p> <p>We assessed the appropriateness of the Consolidated Entity's disclosures in the financial report.</p>

Key audit matter	How our audit addressed the key audit matter
Valuation of financial assets and liabilities held at fair value (Refer to Note 36)	
<p>The Consolidated Entity exercises judgement in valuing certain financial assets and liabilities at fair value where there are significant unobservable inputs for the valuation of these assets and liabilities. These assets and liabilities are known as Level 3 financial instruments.</p> <p>For the Consolidated Entity, these Level 3 financial instruments predominantly consist of derivatives and unlisted equity and debt investments. Judgement is required in estimating the fair value of these financial instruments in determining appropriate models, assumptions and inputs.</p> <p>Given the extent of judgement involved in valuing these Level 3 financial instruments, we considered this to be a key audit matter.</p>	<p>Our procedures included assessing the design and testing the operating effectiveness of certain controls relating to Level 3 financial instruments, including controls over:</p> <ul style="list-style-type: none"> – approval and validation of the models adopted – accuracy of data and inputs to models – the Consolidated Entity's process for testing valuations, and – governance and review. <p>For derivatives, we assessed a sample of valuations by considering the modelling approaches and inputs, assisted by PwC valuation experts. We also considered a sample of collateral disputes, gains and losses on disposals and other events to help assess the appropriateness of the valuations.</p> <p>For a sample of unlisted equity and debt investments, we assessed the appropriateness of the valuation methodologies applied, and assessed the sensitivity of the Consolidated Entity's valuations to alternative assumptions where appropriate.</p> <p>We assessed the appropriateness of the Consolidated Entity's disclosures in the financial report.</p>
IT systems and controls over financial reporting	
<p>The Consolidated Entity's operations and financial reporting systems are heavily dependent on IT systems, including automated accounting procedures and IT dependent manual controls. The Consolidated Entity's controls over IT systems include:</p> <ul style="list-style-type: none"> – the framework of governance over IT systems – controls over program development and changes – controls over access to programs, data and IT operations, and – governance over generic and privileged user accounts. <p>Given the reliance on the IT systems in the financial reporting process, we considered this to be a key audit matter.</p>	<p>Our procedures included evaluating and testing the design and operating effectiveness of certain controls over the continued integrity of the IT systems that are relevant to financial reporting.</p> <p>We also carried out direct tests, on a sample basis, of system functionality that was key to our audit testing in order to assess the accuracy of certain system calculations, the generation of certain reports and the operation of certain system enforced access controls.</p> <p>Where we noted design or operating effectiveness matters relating to IT system or application controls relevant to our audit, we performed alternative audit procedures. We also considered mitigating controls in order to respond to the impact on our overall audit approach.</p>
Provisions for tax payable and deferred tax liabilities (Refer to Note 16 and 20)	
<p>The Consolidated Entity is subject to taxation in a number of jurisdictions. The assessment of the amounts expected to be paid to tax authorities is considered initially by the Consolidated Entity at a local level and then reviewed centrally, with consideration given to particular tax positions in certain jurisdictions. In some cases, the treatment of tax positions requires judgement to estimate the ultimate amounts of tax that will be paid.</p> <p>Given the extent of judgement involved, we considered this to be a key audit matter.</p>	<p>Our procedures included evaluating the analysis conducted by the Consolidated Entity which sets out the basis for judgements made in respect of the ultimate amounts expected to be paid to tax authorities.</p> <p>Assisted by PwC tax experts, we read a risk focused selection of correspondence with tax authorities and external advice obtained by the Consolidated Entity and used our understanding of the business to assess and challenge the completeness and quantum of the provisions for tax. We independently considered the likelihood of additional tax exposures occurring based on our knowledge of tax legislation, applicable precedent and industry developments, noting the level of judgement involved.</p> <p>We assessed the appropriateness of the Consolidated Entity's disclosures in the financial report.</p>

Independent auditor's report

To the members of Macquarie Bank Limited *continued*

Other information

The directors are responsible for the other information. The other information comprises the information included in the annual report for the year ended 31 March 2019, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* (Cth) and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the Company and the Consolidated Entity to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or the Consolidated Entity or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: www.auasb.gov.au/auditors_responsibilities/ar1.pdf. This description forms part of our auditor's report.

Report on the remuneration report

Our opinion on the remuneration report

We have audited the remuneration report included in pages 25 to 42 of the Directors' Report for the year ended 31 March 2019.

In our opinion, the remuneration report of Macquarie Bank Limited for the year ended 31 March 2019 complies with section 300A of the *Corporations Act 2001* (Cth).

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the remuneration report in accordance with section 300A of the *Corporations Act 2001* (Cth). Our responsibility is to express an opinion on the remuneration report, based on our audit conducted in accordance with Australian Auditing Standards.

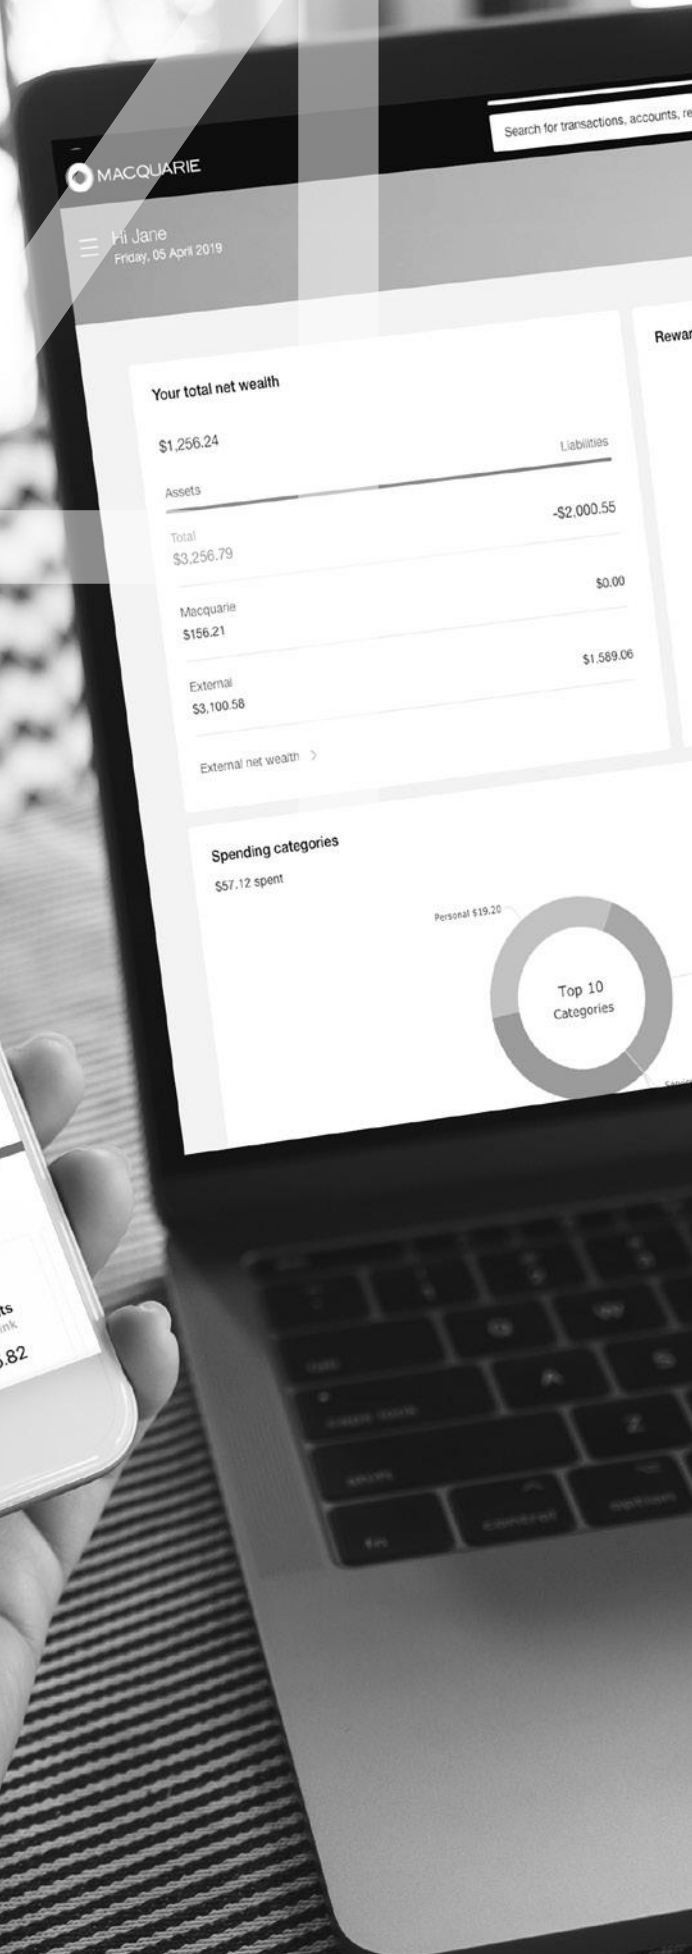

Liability limited by a scheme approved under Professional Standards Legislation.

Securities on issue

The following information is correct as at 31 March 2019.

Fully paid ordinary shares

Voting Rights

At meetings of members or classes of members, each member may vote in person or by proxy, attorney or (if the member is a body corporate) corporate representative. On a show of hands, every person present who is a member or a proxy, attorney or corporate representative of a member has one vote and on a poll every member present in person or by proxy, attorney or corporate representative has:

- one vote for each fully paid share held by the member, and
- that proportion of a vote for any partly paid ordinary share held that the amount paid on the partly paid share bears to the total issue price of the share.

Macquarie Income Securities

Voting rights

Holders of MIS, as holders of a stapled security that includes a preference share, have the right to vote at any general meeting of members of MBL only in one or more of the following circumstances and in no others:

- during a period when two consecutive Semi-Annual Dividends (as defined in the preference share terms) due and payable on the preference shares have not been paid in full, and no optional Dividend (as defined in the preference share terms) has been paid
- on any proposal to reduce MBL's share capital
- on any resolution to approve the terms of a buy-back agreement
- on any proposal that affects the rights attaching to the preference shares
- on a proposal to wind up MBL
- on any proposal for the disposal of the whole of MBL's property, business and undertaking
- during the winding up of MBL.

In these circumstances, holders of MIS have the same rights as to attendance and voting (in respect of each preference share) as those conferred on holders of ordinary shares of MBL.

Cremorne Co Pty Ltd <Cremorne Co A/C>	15,000	0.35%
	1,151,660	26.82%

Spread of noteholdings

Range	Number of BCN holders	Number of BCN
1–1,000	5,657	1,910,645
1,001–5,000	462	957,291
5,001–10,000	32	250,573
10,001–100,000	19	626,393
100,001 notes and over	3	549,203
Total	6,173	4,294,105

There were four noteholders (representing seven BCN) who held less than a marketable parcel.

Macquarie Income Preferred Securities (MIPS)

Voting rights

Unpaid preference shares were issued by MBL as part of the MIPS issue. MIPS have now been fully redeemed, although the unpaid preference shares remain on issue and are held by Macquarie B.H. Pty Limited, the immediate parent of MBL. While these preference shares remain unpaid, they have no voting rights in respect of meetings of members of MBL. If paid up, these preference shares will have the same voting rights as holders of MIS, except that instead of having a right to vote in situation (i) above, they have a right to vote at any general meeting of members of MBL during a period in which a dividend has been declared on these preference shares but the dividend has not been paid in full by the relevant dividend payment date.

Register of holders

MBL issued convertible debentures and 350,000 unpaid preference shares as part of the MIPS. The convertible debentures were fully redeemed on 22 June 2015. The unpaid preference shares are held by Macquarie B.H. Pty Limited. The register in respect of the preference shares is kept at MBL's principal administrative office at 50 Martin Place, Sydney NSW 2000; telephone number +61 2 8232 3333.

Macquarie Additional Capital Securities (MACS)

Voting rights

MACS are unsecured subordinated notes issued by MBL, acting through its London Branch that may be exchanged for MGL ordinary shares in certain limited circumstances. MACS holders have no voting rights in respect of meetings of members of MBL and have no voting rights in respect of meetings of members of MGL in the absence of such an exchange.

Single Shareholder

As at 31 March 2019, the \$US250 million of MACS were held by one holder, Cede & Co, as authorised representative for the Depository Trust Company being the common depository for the MACS global security. The Bank of New York Mellon as Registrar keeps the register in respect of MACS.

Enquiries

Share registry
