Depending on the scenario selection and related macro-economic assumptions for the risk factors, the components of the relevant weighted average ECL change. This is particularly relevant for interest rates, which can move in both directions under a given growth assumption (for example, low growth with high interest rates in a stagflation scenario, versus low growth and falling interest rates in a recession). Management generally looks for scenario narratives that reflect the key risk drivers of a given credit portfolio.

As forecasting models are complex, due to the combination of multiple factors, simple what-if analyses involving a change of individual parameters do not necessarily provide realistic information on the exposure of segments to changes in the macroeconomy. Portfolio-specific analyses based on their key risk factors would also not be meaningful, as potential compensatory effects in other segments would be ignored. The table below indicates some sensitivities to ECLs if a key macroeconomic variable for the forecasting period is amended across all scenarios with all other factors remaining unchanged.

**Potential effect on stage 1 and stage 2 positions from changing key parameters as of 31 December 2021**

| *USD million* | Baseline | Upside | Mild downside | Severe downside | Weighted average |
|---|---|---|---|---|---|
| Change in key parameters | | | | | |
| Fixed income: Government bonds (absolute change) | | | | | |
| −0.50% | (1) | 0 | (29) | (9) | (4) |
| +0.50% | 1 | 1 | 39 | 11 | 5 |
| +1.00% | 4 | 2 | 88 | 23 | 14 |
| Unemployment rate (absolute change) | | | | | |
| −1.00% | (2) | (2) | (30) | (48) | (13) |
| −0.50% | (1) | (1) | (17) | (27) | (7) |
| +0.50% | 1 | 1 | 21 | 31 | 8 |
| +1.00% | 3 | 2 | 47 | 68 | 18 |
| Real GDP growth (relative change) | | | | | |
| −2.00% | 4 | 2 | 8 | 17 | 10 |
| −1.00% | 2 | 1 | 4 | 8 | 5 |
| +1.00% | (1) | 0 | (10) | (8) | (4) |
| +2.00% | (2) | 0 | (14) | (16) | (7) |
| House Price Index (relative change) | | | | | |
| −5.00% | 6 | 4 | 50 | 73 | 24 |
| −2.50% | 3 | 2 | 24 | 34 | 12 |
| +2.50% | (2) | (1) | (26) | (31) | (11) |
| +5.00% | (4) | (3) | (46) | (31) | (13) |
| Equity (S&P500, EuroStoxx, SMI) (relative change) | | | | | |
| −10.00% | 2 | 2 | 5 | 6 | 5 |
| −5.00% | 1 | 0 | 2 | 3 | 2 |
| +5.00% | (1) | 0 | (2) | (3) | (2) |
| +10.00% | (2) | 0 | (4) | (6) | (3) |

**Note 20 Expected credit loss measurement (continued)**

Sensitivities can be more meaningfully assessed in the context of coherent scenarios with consistently developed macroeconomic factors. The table on the previous page outlines favorable and unfavorable effects, based on reasonably possible alternative changes to the economic conditions for stage 1 and stage 2 positions. The ECL impact is calculated for material portfolios and disclosed for each scenario.

The forecasting horizon is limited to three years, with a model-based mean reversion of PD and LGD assumed thereafter. Changes to these timelines may have an effect on ECLs: depending on the cycle, a longer or shorter forecasting horizon will lead to different annualized lifetime PD and average LGD estimations. This is currently not deemed to be material for UBS AG, as a large proportion of loans, including mortgages in Switzerland, have maturities that are within the forecasting horizon.

## Scenario weights

ECL is sensitive to changing scenario weights, in particular if narratives and parameters are selected that are not close to the baseline scenario, highlighting the non-linearity of credit losses.

As shown in the table on the bottom of this page, the ECL for stage 1 and stage 2 positions would have been USD 387 million (31 December 2020: USD 442 million) instead of USD 503 million (31 December 2020: USD 639 million) if ECL had been determined solely on the baseline scenario. The weighted average ECL therefore amounts to 130% (31 December 2020: 145%) of the baseline value. The effects of weighting each of the four scenarios 100% are shown in the table below.

## Stage allocation and SICR

The determination of what constitutes an SICR is based on management judgment, as explained in Note 1a. Changing the SICR trigger will have a direct effect on ECLs, as more or fewer positions would be subject to lifetime ECLs under any scenario.

The relevance of the SICR trigger on overall ECL is demonstrated in the table below with the indication that the ECL allowances and provisions for stage 1 and stage 2 positions would have been USD 1,060 million if all non-impaired positions across the portfolio had been measured for lifetime ECLs irrespective of their actual SICR status. This amount compares to actual stage 1 and 2 allowances and provisions of USD 503 million as of 31 December 2021.

**Potential effect on stage 1 and stage 2 positions from changing scenario weights or moving to an ECL lifetime calculation as of 31 December 2021**

| | Actual ECL allowances and provisions, including staging (as per Note 9) | Pro forma ECL allowances and provisions, including staging and assuming application of 100% scenario weighting | | | | Pro forma ECL allowances and provisions, assuming all positions being subject to lifetime ECL |
|---|---|---|---|---|---|---|
| Scenarios | Weighted average | 100% Baseline | 100% Upside | 100% Mild downside | 100% Severe downside | Weighted average |
| *USD million, except where indicated* | | | | | | |
| Segmentation | | | | | | |
| Private clients with mortgages | (95) | (53) | (52) | (119) | (207) | (277) |
| Real estate financing | (62) | (50) | (48) | (101) | (97) | (118) |
| Large corporate clients | (150) | (116) | (107) | (148) | (244) | (257) |
| SME clients | (65) | (56) | (55) | (71) | (91) | (117) |
| Other segments | (130) | (112) | (108) | (135) | (166) | (291) |
| Total | (503) | (387) | (370) | (574) | (806) | (1,060) |

## Maturity profile

The maturity profile is an important driver for changes in ECL due to transfers to stage 2 and from stage 2 to stage 1. The current maturity profile of most lending books is relatively short; hence a movement to stage 2 may have a moderate effect on ECLs. A significant portion of our lending to SMEs is documented under multi-purpose credit agreements, which allow for various forms of utilization but are unconditionally cancelable by UBS AG at any time. For drawings under such agreements with a fixed maturity the respective term is applied for ECL calculations, or a maximum of 12 months in stage 1. For unused credit lines and all drawings that have no fixed maturity (e.g., current accounts), UBS AG generally applies a 12-month maturity from the reporting date, given the credit review policies, which require either continuous monitoring of key indicators and behavioral patterns for smaller positions or an annual formal review for any other limit. The ECLs for these products are sensitive to shortening or extending the maturity assumption.

## Note 21 Fair value measurement

### a) Valuation principles

All financial and non-financial assets and liabilities measured or disclosed at fair value are categorized into one of three fair value hierarchy levels in accordance with IFRS. The fair value hierarchy is based on the transparency of inputs to the valuation of an asset or liability as of the measurement date. In certain cases, the inputs used to measure fair value may fall within different levels of the fair value hierarchy. For disclosure purposes, the level in the hierarchy within which an instrument is classified in its entirety is based on the lowest level input that is significant to the position's fair value measurement:
- Level 1 – quoted prices (unadjusted) in active markets for identical assets and liabilities;
- Level 2 – valuation techniques for which all significant inputs are, or are based on, observable market data; or
- Level 3 – valuation techniques for which significant inputs are not based on observable market data.

Fair values are determined using quoted prices in active markets for identical assets or liabilities, where available. Where the market for a financial instrument or non-financial asset or liability is not active, fair value is established using a valuation technique, including pricing models. Valuation adjustments may be made to allow for additional factors, including model, liquidity, credit and funding risks, which are not explicitly captured within the valuation technique, but which would nevertheless be considered by market participants when establishing a price. The limitations inherent in a particular valuation technique are considered in the determination of the classification of an asset or liability within the fair value hierarchy. Generally, the unit of account for a financial instrument is the individual instrument, and UBS applies valuation adjustments at an individual instrument level, consistent with that unit of account. However, if certain conditions are met, UBS may estimate the fair value of a portfolio of financial assets and liabilities with substantially similar and offsetting risk exposures on the basis of the net open risks.

› **Refer to Note 21d for more information**

### b) Valuation governance

UBS's fair value measurement and model governance framework includes numerous controls and other procedural safeguards that are intended to maximize the quality of fair value measurements reported in the financial statements. New products and valuation techniques must be reviewed and approved by key stakeholders from the risk and finance control functions. Responsibility for the ongoing measurement of financial and non-financial instruments at fair value is with the business divisions.

Fair value estimates are validated by the risk and finance control functions, which are independent of the business divisions. Independent price verification is performed by Finance through benchmarking the business divisions' fair value estimates with observable market prices and other independent sources. A governance framework and associated controls are in place in order to monitor the quality of third-party pricing sources where used. For instruments where valuation models are used to determine fair value, independent valuation and model control groups within Finance and Risk Control evaluate UBS's models on a regular basis, including valuation and model input parameters, as well as pricing. As a result of the valuation controls employed, valuation adjustments may be made to the business divisions' estimates of fair value to align with independent market data and the relevant accounting standard.

## Note 21 Fair value measurement (continued)

### c) Fair value hierarchy

The table below provides the fair value hierarchy classification of financial and non-financial assets and liabilities measured at fair value. The narrative that follows describes valuation techniques used in measuring their fair value of different product types (including significant valuation inputs and assumptions used), and the factors considered in determining their classification within the fair value hierarchy.

**Determination of fair values from quoted market prices or valuation techniques[1]**

| Total liabilities measured at fair value | 25,922 | 257,637 | 17,357 | 300,916 | 27,635 | 282,233 | 15,212 | 325,080 |

1 Bifurcated embedded derivatives are presented on the same balance sheet lines as their host contracts and are not included in this table. The fair value of these derivatives was not material for the periods presented. 2 As of 31 December 2021, USD 16 billion (31 December 2020: USD 20 billion) of Financial assets at fair value not held for trading, USD 8 billion (31 December 2020: USD 8 billion) of Financial assets measured at fair value through other comprehensive income, USD 33 billion (31 December 2020: USD 15 billion) of Debt issued designated at fair value and USD 3 billion (31 December 2020: USD 3 billion) of Other financial liabilities designated at fair value are expected to be recovered or settled after 12 months. 3 Other non-financial assets primarily consist of properties and other non-current assets held for sale, which are measured at the lower of their net carrying amount or fair value less costs to sell.

**Note 21 Fair value measurement (continued)**

## Valuation techniques

UBS uses widely recognized valuation techniques for determining the fair value of financial and non-financial instruments that are not actively traded and quoted. The most frequently applied valuation techniques include discounted value of expected cash flows, relative value and option pricing methodologies.

Discounted value of expected cash flows is a valuation technique that measures fair value using estimated expected future cash flows from assets or liabilities and then discounts these cash flows using a discount rate or discount margin that reflects the credit and / or funding spreads required by the market for instruments with similar risk and liquidity profiles to produce a present value. When using such valuation techniques, expected future cash flows are estimated using an observed or implied market price for the future cash flows or by using industry-standard cash flow projection models. The discount factors within the calculation are generated using industry-standard yield curve modeling techniques and models.

Relative value models measure fair value based on the market prices of equivalent or comparable assets or liabilities, making adjustments for differences between the characteristics of the observed instrument and the instrument being valued.

Option pricing models incorporate assumptions regarding the behavior of future price movements of an underlying referenced asset or assets to generate a probability-weighted future expected payoff for the option. The resulting probability-weighted expected payoff is then discounted using discount factors generated from industry-standard yield curve modeling techniques and models. The option pricing model may be implemented using a closed-form analytical formula or other mathematical techniques (e.g., binomial tree or Monte Carlo simulation).

Where available, valuation techniques use market-observable assumptions and inputs. If such data is not available, inputs may be derived by reference to similar assets in active markets, from recent prices for comparable transactions or from other observable market data. In such cases, the inputs selected are based on historical experience and practice for similar or analogous instruments, derivation of input levels based on similar products with observable price levels, and knowledge of current market conditions and valuation approaches.

For more complex instruments, fair values may be estimated using a combination of observed transaction prices, consensus pricing services and relevant quotes. Consideration is given to the nature of the quotes (e.g., indicative or firm) and the relationship of recently evidenced market activity to the prices provided by consensus pricing services. UBS also uses internally developed models, which are typically based on valuation methods and techniques recognized as standard within the industry. Assumptions and inputs used in valuation techniques include benchmark interest rate curves, credit and funding spreads used in estimating discount rates, bond and equity prices, equity index prices, foreign exchange rates, levels of market volatility and correlation. Refer to Note 21f for more information. The discount curves used by UBS incorporate the funding and credit characteristics of the instruments to which they are applied.

## Financial instruments excluding derivatives: valuation and classification in the fair value hierarchy

| Product | Valuation and classification in the fair value hierarchy | |
|---|---|---|
| **Government bills and bonds** | Valuation | – Generally valued using prices obtained directly from the market.<br>– Instruments not priced directly using active-market data are valued using discounted cash flow valuation techniques that incorporate market data for similar government instruments. |
| | Fair value hierarchy | – Generally traded in active markets with prices that can be obtained directly from these markets, resulting in classification as Level 1, while the remaining positions are classified as Level 2 and Level 3. |
| **Corporate and municipal bonds** | Valuation | – Generally valued using prices obtained directly from the market for the security, or similar securities, adjusted for seniority, maturity and liquidity.<br>– When prices are not available, instruments are valued using discounted cash flow valuation techniques incorporating the credit spread of the issuer or similar issuers.<br>– For convertible bonds without directly comparable prices, issuances may be priced using a convertible bond model. |
| | Fair value hierarchy | – Generally classified as Level 1 or Level 2, depending on the depth of trading activity behind price sources.<br>– Level 3 instruments have no suitable pricing information available. |
| **Traded loans and loans measured at fair value** | Valuation | – Valued directly using market prices that reflect recent transactions or quoted dealer prices, where available.<br>– Where no market price data is available, loans are valued by relative value benchmarking using pricing derived from debt instruments in comparable entities or different products in the same entity, or by using a credit default swap valuation technique, which requires inputs for credit spreads, credit recovery rates and interest rates. Recently originated commercial real estate loans are measured using a securitization approach based on rating agency guidelines. |
| | Fair value hierarchy | – Instruments with suitably deep and liquid pricing information are classified as Level 2.<br>– Positions requiring the use of valuation techniques, or for which the price sources have insufficient trading depth, are classified as Level 3. |

## Note 21 Fair value measurement (continued)

| Product | Valuation and classification in the fair value hierarchy | |
|---|---|---|
| **Investment fund units** | Valuation | – Predominantly exchange-traded, with readily available quoted prices in liquid markets.<br>– Where market prices are not available, fair value may be measured using net asset values (NAVs). |
| | Fair value hierarchy | – Listed units are classified as Level 1, provided there is sufficient trading activity to justify active-market classification, while other positions are classified as Level 2.<br>– Positions for which NAVs are not available are classified as Level 3. |
| **Asset-backed securities (ABS)** | Valuation | – For liquid securities, the valuation process will use trade and price data, updated for movements in market levels between the time of trading and the time of valuation. Less liquid instruments are measured using discounted expected cash flows incorporating price data for instruments or indices with similar risk profiles. |
| | Fair value hierarchy | – Residential mortgage-backed securities, commercial mortgage-backed securities and other ABS are generally classified as Level 2. However, if significant inputs are unobservable, or if market or fundamental data is not available, they are classified as Level 3. |
| **Auction rate securities (ARS)** | Valuation | – ARS are valued utilizing a discounted cash flow methodology. The model captures interest rate risk emanating from the note coupon, credit risk attributable to the underlying closed-end fund investments, liquidity risk as a function of the level of trading volume in these positions, and extension risk, as ARS are perpetual instruments that require an assumption regarding their maturity or issuer redemption date. |
| | Fair value hierarchy | – Granular and liquid pricing information is generally not available for ARS. As a result, these securities are classified as Level 3. |
| **Equity instruments** | Valuation | – Listed equity instruments are generally valued using prices obtained directly from the market.<br>– Unlisted equity holdings, including private equity positions, are initially marked at their transaction price and are revalued when reliable evidence of price movement becomes available or when the position is deemed to be impaired. |
| | Fair value hierarchy | – The majority of equity securities are actively traded on public stock exchanges where quoted prices are readily and regularly available, resulting in Level 1 classification. |
| **Financial assets for unit-linked investment contracts** | Valuation | – The majority of assets are listed on exchanges and fair values are determined using quoted prices. |
| | Fair value hierarchy | – Most assets are classified as Level 1 if actively traded, or Level 2 if trading is not active.<br>– Instruments for which prices are not readily available are classified as Level 3. |
| **Securities financing transactions** | Valuation | – These instruments are valued using discounted expected cash flow techniques. The discount rate applied is based on funding curves that are relevant to the collateral eligibility terms. |
| | Fair value hierarchy | – Collateral funding curves for these instruments are generally observable and, as a result, these positions are classified as Level 2.<br>– Where the collateral terms are non-standard, the funding curve may be considered unobservable and these positions are classified as Level 3. |
| **Brokerage receivables and payables** | Valuation | – Fair value is determined based on the value of the underlying balances. |
| | Fair value hierarchy | – Due to their on-demand nature, these receivables and payables are deemed as Level 2. |
| **Amounts due under unit-linked investment contracts** | Valuation | – The fair values of investment contract liabilities are determined by reference to the fair value of the corresponding assets. |
| | Fair value hierarchy | – The liabilities themselves are not actively traded, but are mainly referenced to instruments that are actively traded and are therefore classified as Level 2. |

**Note 21 Fair value measurement (continued)**

## Derivative instruments: valuation and classification in the fair value hierarchy

The curves used for discounting expected cash flows in the valuation of collateralized derivatives reflect the funding terms associated with the relevant collateral arrangement for the instrument being valued. These collateral arrangements differ across counterparties with respect to the eligible currency and interest terms of the collateral. The majority of collateralized derivatives are measured using a discount curve based on funding rates derived from overnight interest in the cheapest eligible currency for the respective counterparty collateral agreement.

Uncollateralized and partially collateralized derivatives are discounted using the alternative reference rate (the ARR) (or equivalent) curve for the currency of the instrument. As described in Note 21d, the fair value of uncollateralized and partially collateralized derivatives is then adjusted by credit valuation adjustments (CVAs), debit valuation adjustments (DVAs) and funding valuation adjustments (FVAs), as applicable, to reflect an estimation of the effect of counterparty credit risk, UBS's own credit risk, and funding costs and benefits.

› **Refer to Note 10 for more information about derivative instruments**

| Derivative product | Valuation and classification in the fair value hierarchy | |
|---|---|---|
| **Interest rate contracts** | Valuation | – Interest rate swap contracts are valued by estimating future interest cash flows and discounting those cash flows using a rate that reflects the appropriate funding rate for the position being measured. The yield curves used to estimate future index levels and discount rates are generated using market-standard yield curve models using interest rates associated with current market activity. The key inputs to the models are interest rate swap rates, forward rate agreement rates, short-term interest rate futures prices, basis swap spreads and inflation swap rates.<br>– Interest rate option contracts are valued using various market-standard option models, using inputs that include interest rate yield curves, inflation curves, volatilities and correlations.<br>– When the maturity of an interest rate swap or option contract exceeds the term for which standard market quotes are observable for a significant input parameter, the contracts are valued by extrapolation from the last observable point using standard assumptions or by reference to another observable comparable input parameter to represent a suitable proxy for that portion of the term. |
| | Fair value hierarchy | – The majority of interest rate swaps are classified as Level 2 as the standard market contracts that form the inputs for yield curve models are generally traded in active and observable markets.<br>– Options are generally treated as Level 2 as the calibration process enables the model output to be validated to active-market levels. Models calibrated in this way are then used to revalue the portfolio of both standard options and more exotic products.<br>– Interest rate swap or option contracts are classified as Level 3 when the terms exceed standard market-observable quotes.<br>– Exotic options for which appropriate volatility or correlation input levels cannot be implied from observable market data are classified as Level 3. |
| **Credit derivative contracts** | Valuation | – Credit derivative contracts are valued using industry-standard models based primarily on market credit spreads, upfront pricing points and implied recovery rates. Where a derivative credit spread is not directly available, it may be derived from the price of the reference cash bond.<br>– Asset-backed credit derivatives are valued using a valuation technique similar to that of the underlying security with an adjustment to reflect the funding differences between cash and synthetic form. |
| | Fair value hierarchy | – Single-entity and portfolio credit derivative contracts are classified as Level 2 when credit spreads and recovery rates are determined from actively traded observable market data. Where the underlying reference name(s) are not actively traded and the correlation cannot be directly mapped to actively traded tranche instruments, these contracts are classified as Level 3.<br>– Asset-backed credit derivatives follow the characteristics of the underlying security and are therefore distributed across Level 2 and Level 3. |

| Derivative product | Valuation and classification in the fair value hierarchy | |
|---|---|---|
| **Foreign exchange contracts** | Valuation | – Open spot foreign exchange (FX) contracts are valued using the FX spot rate observed in the market.<br>– Forward FX contracts are valued using the FX spot rate adjusted for forward pricing points observed from standard market-based sources.<br>– Over-the-counter (OTC) FX option contracts are valued using market-standard option valuation models. The models used for shorter-dated options (i.e., maturities of five years or less) tend to be different than those used for longer-dated options because the models needed for longer-dated OTC FX contracts require additional consideration of interest rate and FX rate interdependency.<br>– The valuation for multi-dimensional FX options uses a multi-local volatility model, which is calibrated to the observed FX volatilities for all relevant FX pairs. |
| | Fair value hierarchy | – The markets for FX spot and FX forward pricing points are both actively traded and observable and therefore such FX contracts are generally classified as Level 2.<br>– A significant proportion of OTC FX option contracts are classified as Level 2 as inputs are derived mostly from standard market contracts traded in active and observable markets.<br>– OTC FX option contracts classified as Level 3 include multi-dimensional FX options and long-dated FX exotic option contracts where there is no active market from which to derive volatility or correlation inputs. |
| **Equity / index contracts** | Valuation | – Equity forward contracts have a single stock or index underlying and are valued using market-standard models. The key inputs to the models are stock prices, estimated dividend rates and equity funding rates (which are implied from prices of forward contracts observed in the market). Estimated cash flows are then discounted using market-standard discounted cash flow models using a rate that reflects the appropriate funding rate for that portion of the portfolio. When no market data is available for the instrument maturity, they are valued by extrapolation of available data, use of historical dividend data, or use of data for a related equity.<br>– Equity option contracts are valued using market-standard models that estimate the equity forward level as described for equity forward contracts and incorporate inputs for stock volatility and for correlation between stocks within a basket. The probability-weighted expected option payoff generated is then discounted using market-standard discounted cash flow models applying a rate that reflects the appropriate funding rate for that portion of the portfolio. When volatility, forward or correlation inputs are not available, they are valued using extrapolation of available data, historical dividend, correlation or volatility data, or the equivalent data for a related equity. |
| | Fair value hierarchy | – As inputs are derived mostly from standard market contracts traded in active and observable markets, a significant proportion of equity forward contracts are classified as Level 2.<br>– Equity option positions for which inputs are derived from standard market contracts traded in active and observable markets are also classified as Level 2. Level 3 positions are those for which volatility, forward or correlation inputs are not observable. |
| **Commodity contracts** | Valuation | – Commodity forward and swap contracts are measured using market-standard models that use market forward levels on standard instruments.<br>– Commodity option contracts are measured using market-standard option models that estimate the commodity forward level as described for commodity forward and swap contracts, incorporating inputs for the volatility of the underlying index or commodity. For commodity options on baskets of commodities or bespoke commodity indices, the valuation technique also incorporates inputs for the correlation between different commodities or commodity indices. |
| | Fair value hierarchy | – Individual commodity contracts are typically classified as Level 2, because active forward and volatility market data is available. |

**Note 21 Fair value measurement (continued)**

## d) Valuation adjustments and other items

The output of a valuation technique is always an estimate of a fair value that cannot be measured with complete certainty. As a result, valuations are adjusted, where appropriate and when such factors would be considered by market participants in estimating fair value, to reflect close-out costs, credit exposure, model-driven valuation uncertainty, funding costs and benefits, trading restrictions and other factors.

The table below summarizes the valuation adjustment reserves recognized on the balance sheet. Details about each category are provided further below.

**Valuation adjustment reserves on the balance sheet**

| | As of | | |
|---|---|---|---|
| *Life-to-date gain / (loss), USD million* | 31.12.21 | 31.12.20 | 31.12.19 |
| Deferred day-1 profit or loss reserves | 418 | 269 | 146 |
| Own credit adjustments on financial liabilities designated at fair value | (315) | (381) | (88) |
| CVAs, FVAs, DVAs and other valuation adjustments | (1,004) | (959) | (706) |

### Deferred day-1 profit or loss reserves

For new transactions where the valuation technique used to measure fair value requires significant inputs that are not based on observable market data, the financial instrument is initially recognized at the transaction price. The transaction price may differ from the fair value obtained using a valuation technique, where any such difference is deferred and not initially recognized in the income statement.

Deferred day-1 profit or loss is generally released into *Other net income from financial instruments measured at fair value through profit or loss* when pricing of equivalent products or the underlying parameters becomes observable or when the transaction is closed out.

The table below summarizes the changes in deferred day-1 profit or loss reserves during the respective period.

**Deferred day-1 profit or loss reserves**

| *USD million* | 2021 | 2020 | 2019 |
|---|---|---|---|
| Reserve balance at the beginning of the year | 269 | 146 | 255 |
| Profit / (loss) deferred on new transactions | 459 | 362 | 171 |
| (Profit) / loss recognized in the income statement | (308) | (238) | (278) |
| Foreign currency translation | (2) | 0 | (2) |
| Reserve balance at the end of the year | 418 | 269 | 146 |

### Own credit

Own credit risk is reflected in the valuation of UBS's fair value option liabilities where this component is considered relevant for valuation purposes by UBS's counterparties and other market participants.

Changes in the fair value of financial liabilities designated at fair value through profit or loss related to own credit are recognized in *Other comprehensive income* directly within *Retained earnings,* with no reclassification to the income statement in future periods. This presentation does not create or increase an accounting mismatch in the income statement, as UBS does not hedge changes in own credit.

Own credit is estimated using own credit adjustment (OCA) curves, which incorporate observable market data, including market-observed secondary prices for UBS's debt, UBS's credit default swap spreads and debt curves of peers. In the table below, the change in unrealized own credit consists of changes in fair value that are attributable to the change in UBS's credit spreads, as well as the effect of changes in fair values attributable to factors other than credit spreads, such as redemptions, effects from time decay and changes in interest and other market rates. Realized own credit is recognized when an instrument with an associated unrealized OCA is repurchased prior to the contractual maturity date. Life-to-date amounts reflect the cumulative unrealized change since initial recognition.

› **Refer to Note 16 for more information about debt issued designated at fair value**

## Note 21 Fair value measurement (continued)

**Own credit adjustments on financial liabilities designated at fair value**

| | Included in Other comprehensive income | | |
|---|---|---|---|
| | For the year ended | | |
| *USD million* | 31.12.21 | 31.12.20 | 31.12.19 |
| Recognized during the period: | | | |
| Realized gain / (loss) | (14) | 2 | 8 |
| Unrealized gain / (loss) | 60 | (295) | (408) |
| Total gain / (loss), before tax | 46 | (293) | (400) |

| | As of | | |
|---|---|---|---|
| *USD million* | 31.12.21 | 31.12.20 | 31.12.19 |
| Recognized on the balance sheet as of the end of the period: | | | |
| Unrealized life-to-date gain / (loss) | (315) | (381) | (88) |

### Credit valuation adjustments

In order to measure the fair value of OTC derivative instruments, including funded derivative instruments that are classified as *Financial assets at fair value not held for trading,* CVAs are needed to reflect the credit risk of the counterparty inherent in these instruments. This amount represents the estimated fair value of protection required to hedge the counterparty credit risk of such instruments. A CVA is determined for each counterparty, considering all exposures with that counterparty, and is dependent on the expected future value of exposures, default probabilities and recovery rates, applicable collateral or netting arrangements, break clauses, funding spreads and other contractual factors.

### Funding valuation adjustments

FVAs reflect the costs and benefits of funding associated with uncollateralized and partially collateralized derivative receivables and payables and are calculated as the valuation effect from moving the discounting of the uncollateralized derivative cash flows from the ARR to OCA using the CVA framework, including the probability of counterparty default. An FVA is also applied to collateralized derivative assets in cases where the collateral cannot be sold or repledged.

### Debit valuation adjustments

A DVA is estimated to incorporate own credit in the valuation of derivatives where an FVA is not already recognized. The DVA calculation is effectively consistent with the CVA framework, being determined for each counterparty, considering all exposures with that counterparty and taking into account collateral netting agreements, expected future mark-to-market movements and UBS's credit default spreads.

### Other valuation adjustments

Instruments that are measured as part of a portfolio of combined long and short positions are valued at mid-market levels to ensure consistent valuation of the long- and short-component risks. A liquidity valuation adjustment is then made to the overall net long or short exposure to move the fair value to bid or offer as appropriate, reflecting current levels of market liquidity. The bid–offer spreads used in the calculation of this valuation adjustment are obtained from market transactions and other relevant sources and are updated periodically.

Uncertainties associated with the use of model-based valuations are incorporated into the measurement of fair value through the use of model reserves. These reserves reflect the amounts that UBS estimates should be deducted from valuations produced directly by models to incorporate uncertainties in the relevant modeling assumptions, in the model and market inputs used, or in the calibration of the model output to adjust for known model deficiencies. In arriving at these estimates, UBS considers a range of market practices, including how it believes market participants would assess these uncertainties. Model reserves are reassessed periodically in light of data from market transactions, consensus pricing services and other relevant sources.

### Other items

In the first half of 2021, UBS AG incurred a loss of USD 861 million as a result of closing out a significant portfolio of swaps with a US-based client of its prime brokerage business and the unwinding of related hedges, following the client's default. This loss is presented within *Other net income from financial instruments measured at fair value through profit or loss*.

**Valuation adjustments on financial instruments**

| | As of | |
|---|---|---|
| *Life-to-date gain / (loss), USD million* | 31.12.21 | 31.12.20 |
| Credit valuation adjustments[1] | (44) | (66) |
| Funding valuation adjustments | (49) | (73) |
| Debit valuation adjustments | 2 | 0 |
| Other valuation adjustments | (913) | (820) |
| *of which: liquidity* | *(341)* | *(340)* |
| *of which: model uncertainty* | *(571)* | *(479)* |

1 Amounts do not include reserves against defaulted counterparties.

**Note 21 Fair value measurement (continued)**

## e) Transfers between Level 1 and Level 2

Assets and liabilities transferred from Level 2 to Level 1 during 2021 were not material. Assets and liabilities transferred from Level 1 to Level 2 during 2021 were also not material.

## f) Level 3 instruments: valuation techniques and inputs

The table below presents material Level 3 assets and liabilities, together with the valuation techniques used to measure fair value, the inputs used in a given valuation technique that are considered significant as of 31 December 2021 and unobservable, and a range of values for those unobservable inputs.

The range of values represents the highest- and lowest-level inputs used in the valuation techniques. Therefore, the range does not reflect the level of uncertainty regarding a particular input or an assessment of the reasonableness of UBS's estimates and assumptions, but rather the different underlying characteristics of the relevant assets and liabilities held by UBS. The ranges will therefore vary from period to period and parameter to parameter based on characteristics of the instruments held at each balance sheet date. Furthermore, the ranges of unobservable inputs may differ across other financial institutions, reflecting the diversity of the products in each firm's inventory.

**Valuation techniques and inputs used in the fair value measurement of Level 3 assets and liabilities**

| | Fair value | | | | | | Range of inputs | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Assets | | Liabilities | | | | 31.12.21 | | | 31.12.20 | | | |
| *USD billion* | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 | Valuation technique(s) | Significant unobservable input(s)[1] | low | high | weighted average[2] | low | high | weighted average[2] | unit[1] |
| Financial assets and liabilities at fair value held for trading and Financial assets at fair value not held for trading | | | | | | | | | | | | | |
| *Corporate and municipal bonds* | *0.9* | *1.2* | *0.0* | *0.0* | Relative value to market comparable | Bond price equivalent | 16 | 143 | 98 | 1 | 143 | 100 | points |
| | | | | | Discounted expected cash flows | Discount margin | 434 | 434 | | 268 | 268 | | basis points |
| *Traded loans, loans measured at fair value, loan commitments and guarantees* | *2.8* | *2.4* | *0.0* | *0.0* | Relative value to market comparable | Loan price equivalent | 0 | 101 | 99 | 0 | 101 | 99 | points |
| | | | | | Discounted expected cash flows | Credit spread | 175 | 800 | 436 | 190 | 800 | 398 | basis points |
| | | | | | Market comparable and securitization model | Credit spread | 28 | 1,544 | 241 | 40 | 1,858 | 333 | basis points |
| *Auction rate securities* | *1.6* | *1.5* | | | Discounted expected cash flows | Credit spread | 115 | 197 | 153 | 100 | 188 | 140 | basis points |
| *Investment fund units[3]* | *0.1* | *0.1* | *0.0* | *0.0* | Relative value to market comparable | Net asset value | | | | | | | |
| *Equity instruments[3]* | *0.8* | *0.7* | *0.1* | *0.0* | Relative value to market comparable | Price | | | | | | | |
| Debt issued designated at fair value[4] | | | *11.9* | *9.6* | | | | | | | | | |
| Other financial liabilities designated at fair value | | | *3.2* | *2.1* | Discounted expected cash flows | Funding spread | 24 | 175 | | 42 | 175 | | basis points |
| Derivative financial instruments | | | | | | | | | | | | | |
| *Interest rate contracts* | *0.5* | *0.5* | *0.3* | *0.5* | Option model | Volatility of interest rates | 65 | 81 | | 29 | 69 | | basis points |
| *Credit derivative contracts* | *0.2* | *0.3* | *0.3* | *0.5* | Discounted expected cash flows | Credit spreads | 1 | 583 | | 1 | 489 | | basis points |
| | | | | | | Bond price equivalent | 2 | 136 | | 0 | 100 | | points |
| *Equity / index contracts* | *0.4* | *0.9* | *1.5* | *2.3* | Option model | Equity dividend yields | 0 | 11 | | 0 | 13 | | % |
| | | | | | | Volatility of equity stocks, equity and other indices | 4 | 98 | | 4 | 100 | | % |
| | | | | | | Equity-to-FX correlation | (29) | 76 | | (34) | 65 | | % |
| | | | | | | Equity-to-equity correlation | (25) | 100 | | (16) | 100 | | % |

1 The ranges of significant unobservable inputs are represented in points, percentages and basis points. Points are a percentage of par (e.g., 100 points would be 100% of par). 2 Weighted averages are provided for most non-derivative financial instruments and were calculated by weighting inputs based on the fair values of the respective instruments. Weighted averages are not provided for inputs related to Other financial liabilities designated at fair value and Derivative financial instruments, as this would not be meaningful. 3 The range of inputs is not disclosed, as there is a dispersion of values given the diverse nature of the investments. 4 Debt issued designated at fair value primarily consists of UBS structured notes, which include variable maturity notes with various equity and foreign exchange underlying risks, rates-linked and credit-linked notes, all of which have embedded derivative parameters that are considered to be unobservable. The equivalent derivative instrument parameters are presented in the respective derivative financial instruments lines in this table.

## Significant unobservable inputs in Level 3 positions

This section discusses the significant unobservable inputs used in the valuation of Level 3 instruments and assesses the potential effect that a change in each unobservable input in isolation may have on a fair value measurement. Relationships between observable and unobservable inputs have not been included in the summary below.

| Input | Description |
|---|---|
| **Bond price equivalent** | – Where market prices are not available for a bond, fair value is measured by comparison with observable pricing data from similar instruments. Factors considered when selecting comparable instruments include credit quality, maturity and industry of the issuer. Fair value may be measured either by a direct price comparison or by conversion of an instrument price into a yield (either as an outright yield or as a spread to the relevant benchmark rate).<br>– For corporate and municipal bonds, the range represents the range of prices from reference issuances used in determining fair value. Bonds priced at 0 are distressed to the point that no recovery is expected, while prices significantly in excess of 100 or par relate to inflation-linked or structured issuances that pay a coupon in excess of the market benchmark as of the measurement date.<br>– For credit derivatives, the bond price range represents the range of prices used for reference instruments, which are typically converted to an equivalent yield or credit spread as part of the valuation process. |
| **Loan price equivalent** | – Where market prices are not available for a traded loan, fair value is measured by comparison with observable pricing data for similar instruments. Factors considered when selecting comparable instruments include industry segment, collateral quality, maturity and issuer-specific covenants. Fair value may be measured either by a direct price comparison or by conversion of an instrument price into a yield. The range represents the range of prices derived from reference issuances of a similar credit quality used to measure fair value for loans classified as Level 3. Loans priced at 0 are distressed to the point that no recovery is expected, while a current price of 100 represents a loan that is expected to be repaid in full. |
| **Credit spread** | – Valuation models for many credit derivatives require an input for the credit spread, which is a reflection of the credit quality of the associated referenced underlying. The credit spread of a particular security is quoted in relation to the yield on a benchmark security or reference rate, typically either US Treasury or ARR, and is generally expressed in terms of basis points. An increase / (decrease) in credit spread will increase / (decrease) the value of credit protection offered by credit default swaps and other credit derivative products. The income statement effect from such changes depends on the nature and direction of the positions held. Credit spreads may be negative where the asset is more creditworthy than the benchmark against which the spread is calculated. A wider credit spread represents decreasing creditworthiness. The range represents a diverse set of underlyings, with the lower end of the range representing credits of the highest quality and the upper end of the range representing greater levels of credit risk. |
| **Discount margin** | – The discount margin (DM) spread represents the discount rates applied to present value cash flows of an asset to reflect the market return required for uncertainty in the estimated cash flows. DM spreads are a rate or rates applied on top of a floating index (e.g., Secured Overnight Financing Rate (SOFR)) to discount expected cash flows. Generally, a decrease / (increase) in the DM in isolation would result in a higher / (lower) fair value.<br>– The high end of the range relates to securities that are priced low within the market relative to the expected cash flow schedule. This indicates that the market is pricing an increased risk of credit loss into the security that is greater than what is being captured by the expected cash flow generation process. The low ends of the ranges are typical of funding rates on better-quality instruments. |
| **Funding spread** | – Structured financing transactions are valued using synthetic funding curves that best represent the assets that are pledged as collateral for the transactions. They are not representative of where UBS can fund itself on an unsecured basis, but provide an estimate of where UBS can source and deploy secured funding with counterparties for a given type of collateral. The funding spreads are expressed in terms of basis points, and if funding spreads widen, this increases the effect of discounting.<br>– A small proportion of structured debt instruments and non-structured fixed-rate bonds within financial liabilities designated at fair value had an exposure to funding spreads that was longer in duration than the actively traded market. |
| **Volatility** | – Volatility measures the variability of future prices for a particular instrument and is generally expressed as a percentage, where a higher number reflects a more volatile instrument, for which future price movements are more likely to occur. Volatility is a key input into option models, where it is used to derive a probability-based distribution of future prices for the underlying instrument. The effect of volatility on individual positions within the portfolio is driven primarily by whether the option contract is a long or short position. In most cases, the fair value of an option increases as a result of an increase in volatility and is reduced by a decrease in volatility. Generally, volatility used in the measurement of fair value is derived from active-market option prices (referred to as implied volatility). A key feature of implied volatility is the volatility "smile" or "skew," which represents the effect of pricing options of different option strikes at different implied volatility levels.<br>– Volatilities of low interest rates tend to be much higher than volatilities of high interest rates. In addition, different currencies may have significantly different implied volatilities. |

## Note 21 Fair value measurement (continued)

| Input | Description |
|---|---|
| **Correlation** | – Correlation measures the interrelationship between the movements of two variables. It is expressed as a percentage between –100% and +100%, where +100% represents perfectly correlated variables (meaning a movement of one variable is associated with a movement of the other variable in the same direction) and –100% implies that the variables are inversely correlated (meaning a movement of one variable is associated with a movement of the other variable in the opposite direction). The effect of correlation on the measurement of fair value depends on the specific terms of the instruments being valued, reflecting the range of different payoff features within such instruments.<br>– Equity-to-FX correlation is important for equity options based on a currency other than the currency of the underlying stock. Equity-to-equity correlation is particularly important for complex options that incorporate, in some manner, different equities in the projected payoff. |
| **Equity dividend yields** | – The derivation of a forward price for an individual stock or index is important for measuring fair value for forward or swap contracts and for measuring fair value using option pricing models. The relationship between the current stock price and the forward price is based on a combination of expected future dividend levels and payment timings, and, to a lesser extent, the relevant funding rates applicable to the stock in question. Dividend yields are generally expressed as an annualized percentage of the share price, with the lowest limit of 0% representing a stock that is not expected to pay any dividend. The dividend yield and timing represent the most significant parameter in determining fair value for instruments that are sensitive to an equity forward price. |

## g) Level 3 instruments: sensitivity to changes in unobservable input assumptions

The table below summarizes those financial assets and liabilities classified as Level 3 for which a change in one or more of the unobservable inputs to reflect reasonably possible favorable and unfavorable alternative assumptions would change fair value significantly, and the estimated effect thereof. The table below does not represent the estimated effect of stress scenarios. Interdependencies between Level 1, 2 and 3 parameters have not been incorporated in the table. Furthermore, direct inter-relationships between the Level 3 parameters discussed below are not a significant element of the valuation uncertainty.

Sensitivity data is estimated using a number of techniques, including the estimation of price dispersion among different market participants, variation in modeling approaches and reasonably possible changes to assumptions used within the fair value measurement process. The sensitivity ranges are not always symmetrical around the fair values, as the inputs used in valuations are not always precisely in the middle of the favorable and unfavorable range.

Sensitivity data is determined at a product or parameter level and then aggregated assuming no diversification benefit. Diversification would incorporate estimated correlations across different sensitivity results and, as such, would result in an overall sensitivity that would be less than the sum of the individual component sensitivities. However, UBS believes that the diversification benefit is not significant to this analysis.

**Sensitivity of fair value measurements to changes in unobservable input assumptions[1]**

| | 31.12.21 | | 31.12.20 | |
|---|---|---|---|---|
| *USD million* | Favorable changes | Unfavorable changes | Favorable changes | Unfavorable changes |
| Traded loans, loans designated at fair value, loan commitments and guarantees | 19 | (13) | 29 | (28) |
| Securities financing transactions | 41 | (53) | 40 | (52) |
| Auction rate securities | 66[2] | (66)[2] | 105 | (105) |
| Asset-backed securities | 20 | (20) | 41 | (41) |
| Equity instruments | 173 | (146) | 129 | (96) |
| Interest rate derivative contracts, net | 29 | (19) | 11 | (16) |
| Credit derivative contracts, net | 5 | (8) | 10 | (14) |
| Foreign exchange derivative contracts, net | 19 | (11) | 20 | (15) |
| Equity / index derivative contracts, net | 368 | (335) | 318 | (294) |
| Other | 50 | (73) | 91 | (107) |
| Total | 790 | (744) | 794 | (768) |

1 Sensitivity of issued and over-the-counter debt instruments is reported with the equivalent derivative or securities financing instrument. 2 Includes refinements applied in estimating valuation uncertainty across various parameters and a change in assumptions regarding the underlying statistical distribution.

## Note 21 Fair value measurement (continued)

### h) Level 3 instruments: movements during the period

The table below presents additional information about material movements in Level 3 assets and liabilities measured at fair value on a recurring basis, excluding any related hedging activity.

Assets and liabilities transferred into or out of Level 3 are presented as if those assets or liabilities had been transferred at the beginning of the year.

**Movements of Level 3 instruments**

## Note 21 Fair value measurement (continued)

### i) Maximum exposure to credit risk for financial instruments measured at fair value

The tables below provide UBS AG's maximum exposure to credit risk for financial instruments measured at fair value and the respective collateral and other credit enhancements mitigating credit risk for these classes of financial instruments.

The maximum exposure to credit risk includes the carrying amounts of financial instruments recognized on the balance sheet subject to credit risk and the notional amounts for off-balance sheet arrangements. Where information is available, collateral is presented at fair value. For other collateral, such as real estate, a reasonable alternative value is used. Credit enhancements, such as credit derivative contracts and guarantees, are included at their notional amounts. Both are capped at the maximum exposure to credit risk for which they serve as security. The "Risk management and control" section of this report describes management's view of credit risk and the related exposures, which can differ in certain respects from the requirements of IFRS.

**Maximum exposure to credit risk**

| | 31.12.21 | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Collateral | | | | Credit enhancements | | | |
| *USD billion* | Maximum exposure to credit risk | Cash collateral received | Collateral-ized by securities | Secured by real estate | Other collateral | Netting | Credit derivative contracts | Guarantees | Exposure to credit risk after collateral and credit enhancements |
| Financial assets measured at fair value on the balance sheet[1] | | | | | | | | | |
| Financial assets at fair value held for trading – debt instruments[2,3] | 22.6 | | | | | | | | 22.6 |
| Derivative financial instruments[4,5] | 118.1 | | 4.2 | | | 103.2 | | | 10.7 |
| Brokerage receivables | 21.8 | 0.0 | 21.6 | | | | | | 0.2 |
| Financial assets at fair value not held for trading – debt instruments[6] | 37.0 | 0.0 | 11.2 | | | | | | 25.7 |
| Total financial assets measured at fair value | 199.5 | 0.0 | 37.1 | 0.0 | 0.0 | 103.2 | 0.0 | 0.0 | 59.2 |
| Guarantees[7] | 0.2 | | | | 0.0 | | | 0.2 | 0.0 |

| | 31.12.20 | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | Collateral | | | | Credit enhancements | | | |
| *USD billion* | Maximum exposure to credit risk | Cash collateral received | Collateral-ized by securities | Secured by real estate | Other collateral | Netting | Credit derivative contracts | Guarantees | Exposure to credit risk after collateral and credit enhancements |
| Financial assets measured at fair value on the balance sheet[1] | | | | | | | | | |
| Financial assets at fair value held for trading – debt instruments[2,3] | 24.7 | | | | | | | | 24.7 |
| Derivative financial instruments[4,5] | 159.6 | | 6.0 | | | 138.4 | | | 15.2 |
| Brokerage receivables | 24.7 | | 24.4 | | | | | | 0.3 |
| Financial assets at fair value not held for trading – debt instruments[6] | 58.2 | 0.0 | 13.2 | | | | | | 45.0 |
| Total financial assets measured at fair value | 267.2 | 0.0 | 43.6 | 0.0 | 0.0 | 138.4 | 0.0 | 0.0 | 85.2 |
| Guarantees[7] | 0.5 | | | | 0.1 | | | 0.3 | 0.0 |

1 The maximum exposure to loss is generally equal to the carrying amount and subject to change over time with market movements. 2 These positions are generally managed under the market risk framework. For the purpose of this disclosure, collateral and credit enhancements were not considered. 3 Does not include investment fund units. 4 Includes USD 0 million (31 December 2020: USD 0 million) fair values of loan commitments and forward starting reverse repurchase agreements classified as derivatives. The full contractual committed amount of forward starting reverse repurchase agreements (generally highly collateralized) of USD 27.8 billion (31 December 2020: USD 21.9 billion) and derivative loan commitments (generally unsecured) of USD 8.2 billion, of which USD 0.8 billion has been sub-participated (31 December 2020: USD 9.4 billion, of which USD 0.8 billion had been sub-participated), is presented in Note 10 under notional amounts. 5 The amount shown in the "Netting" column represents the netting potential not recognized on the balance sheet. Refer to Note 22 for more information. 6 Financial assets at fair value not held for trading collateralized by securities consisted of structured loans and reverse repurchase and securities borrowing agreements. 7 The amount shown in the "Guarantees" column largely relates to sub-participations.

## Note 21 Fair value measurement (continued)

### j) Financial instruments not measured at fair value

The table below provides the estimated fair values of financial instruments not measured at fair value.

**Financial instruments not measured at fair value**

| | 31.12.21 | | | | | | 31.12.20 | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Carrying amount | Fair value | | | | | Carrying amount | Fair value | | | | |
| *USD billion* | Total | Carrying amount approximates fair value[1] | Level 1 | Level 2 | Level 3 | Total | Total | Carrying amount approximates fair value[1] | Level 1 | Level 2 | Level 3 | Total |
| Assets[2] | | | | | | | | | | | | |
| Cash and balances at central banks | 192.8 | 192.7 | 0.1 | 0.0 | 0.0 | 192.8 | 158.2 | 158.1 | 0.1 | 0.0 | 0.0 | 158.2 |

| Other financial assets measured at amortized cost | 26.2 | 4.1 | 9.3 | 10.7 | 2.4 | 26.5 | 27.2 | 5.4 | 9.4 | 10.9 | 2.3 | 28.0 |
| Liabilities[2] | | | | | | | | | | | | |
| Amounts due to banks | 13.1 | 9.1 | 0.0 | 4.0 | 0.0 | 13.1 | 11.0 | 8.5 | 0.0 | 2.6 | 0.0 | 11.1 |
| Payables from securities financing transactions | 5.5 | 4.1 | 0.0 | 1.5 | 0.0 | 5.5 | 6.3 | 6.0 | 0.0 | 0.2 | 0.0 | 6.3 |
| Cash collateral payables on derivative instruments | 31.8 | 31.8 | 0.0 | 0.0 | 0.0 | 31.8 | 37.3 | 37.3 | 0.0 | 0.0 | 0.0 | 37.3 |
| Customer deposits | 544.8 | 537.6 | 0.0 | 7.3 | 0.0 | 544.8 | 527.9 | 521.8 | 0.0 | 6.2 | 0.0 | 528.0 |
| Funding from UBS Group AG | 57.3 | 2.8 | 0.0 | 56.0 | 0.0 | 58.8 | 54.0 | 0.0 | 0.0 | 55.6 | 0.0 | 55.6 |
| Debt issued measured at amortized cost | 82.4 | 13.0 | 0.0 | 69.8 | 0.0 | 82.8 | 85.4 | 16.4 | 0.0 | 70.0 | 0.0 | 86.3 |
| Other financial liabilities measured at amortized cost[3] | 6.3 | 6.3 | 0.0 | 0.0 | 0.0 | 6.3 | 6.6 | 6.6 | 0.0 | 0.0 | 0.1 | 6.7 |

1 Includes certain financial instruments where the carrying amount is a reasonable approximation of the fair value due to the instruments' short-term nature (instruments that are receivable or payable on demand, or with a remaining maturity (excluding the effects of callable features) of three months or less). 2 As of 31 December 2021, USD 0 billion (31 December 2020: USD 0 billion) of Cash and balances at central banks, USD 0 billion (31 December 2020: USD 0 billion) of Loans and advances to banks, USD 1 billion (31 December 2020: USD 1 billion) of Receivables from securities financing transactions, USD 175 billion (31 December 2020: USD 163 billion) of Loans and advances to customers, USD 19 billion (31 December 2020: USD 20 billion) of Other financial assets measured at amortized cost, USD 1 billion (31 December 2020: USD 0 billion) of Amounts due to banks, USD 4 billion (31 December 2020: USD 3 billion) of Customer deposits, USD 53 billion (31 December 2020: USD 49 billion) of Funding from UBS Group AG, USD 31 billion (31 December 2020: USD 31 billion) of Debt issued measured at amortized cost and USD 3 billion (31 December 2020: USD 3 billion) of Other financial liabilities measured at amortized cost were expected to be recovered or settled after 12 months. 3 Excludes lease liabilities.

The fair values included in the table above have been calculated for disclosure purposes only. The valuation techniques and assumptions described below relate only to the fair value of UBS's financial instruments not measured at fair value. Other institutions may use different methods and assumptions for their fair value estimations, and therefore such fair value disclosures cannot necessarily be compared from one financial institution to another. The following principles were applied when determining fair value estimates for financial instruments not measured at fair value:

- For financial instruments with remaining maturities greater than three months, the fair value was determined from quoted market prices, if available.
- Where quoted market prices were not available, the fair values were estimated by discounting contractual cash flows using current market interest rates or appropriate yield curves for instruments with similar credit risk and maturity. These estimates generally include adjustments for counterparty credit risk or UBS's own credit.
- For short-term financial instruments with remaining maturities of three months or less, the carrying amount, which is net of credit loss allowances, is generally considered a reasonable estimate of fair value.

## Note 22 Offsetting financial assets and financial liabilities

UBS AG enters into netting agreements with counterparties to manage the credit risks associated primarily with repurchase and reverse repurchase transactions, securities borrowing and lending, over-the-counter derivatives and exchange-traded derivatives. These netting agreements and similar arrangements generally enable the counterparties to set off liabilities against available assets received in the ordinary course of business and / or in the event that the counterparties to the transaction are unable to fulfill their contractual obligations.

The tables on this page and the next page provide a summary of financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar agreements, as well as financial collateral received or pledged to mitigate credit exposures for these financial instruments.

UBS AG engages in a variety of counterparty credit risk mitigation strategies in addition to netting and collateral arrangements. Therefore, the net amounts presented in the tables on this page and the next page do not purport to represent their actual credit risk exposure.

**Financial assets subject to offsetting, enforceable master netting arrangements and similar agreements**

| | Assets subject to netting arrangements | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Netting recognized on the balance sheet | | | Netting potential not recognized on the balance sheet[3] | | | Assets not subject to netting arrangements[4] | Total assets | |
| *As of 31.12.21, USD billion* | Gross assets before netting | Netting with gross liabilities[2] | Net assets recognized on the balance sheet | Financial liabilities | Collateral received | Assets after consideration of netting potential | Assets recognized on the balance sheet | Total assets after consideration of netting potential | Total assets recognized on the balance sheet |
| Receivables from securities financing transactions | 67.7 | (13.8) | 53.9 | (2.9) | (51.0) | 0.0 | 21.1 | 21.1 | 75.0 |
| Derivative financial instruments | 116.0 | (3.6) | 112.4 | (88.9) | (18.5) | 5.0 | 5.8 | 10.7 | 118.1 |
| Cash collateral receivables on derivative instruments[1] | 29.4 | 0.0 | 29.4 | (15.2) | (3.3) | 11.0 | 1.1 | 12.1 | 30.5 |
| Financial assets at fair value not held for trading | 93.1 | (87.6) | 5.5 | (1.1) | (4.4) | 0.0 | 54.1 | 54.1 | 59.6 |
| *of which: reverse repurchase agreements* | *93.1* | *(87.6)* | *5.5* | *(1.1)* | *(4.4)* | *0.0* | *0.3* | *0.3* | *5.8* |
| Total assets | 306.2 | (105.0) | 201.2 | (108.1) | (77.2) | 15.9 | 82.1 | 98.1 | 283.3 |
| | | | | | | | | | |
| *As of 31.12.20, USD billion* | | | | | | | | | |
| Receivables from securities financing transactions | 70.3 | (13.4) | 57.0 | (1.7) | (55.3) | 0.0 | 17.3 | 17.3 | 74.2 |
| Derivative financial instruments | 156.9 | (5.0) | 151.9 | (117.2) | (27.2) | 7.5 | 7.7 | 15.2 | 159.6 |
| Cash collateral receivables on derivative instruments[1] | 31.9 | 0.0 | 31.9 | (19.6) | (1.5) | 10.8 | 0.8 | 11.6 | 32.7 |
| Financial assets at fair value not held for trading | 85.6 | (79.1) | 6.5 | (0.8) | (5.8) | 0.0 | 73.5 | 73.5 | 80.0 |
| *of which: reverse repurchase agreements* | *85.6* | *(79.1)* | *6.5* | *(0.8)* | *(5.8)* | *0.0* | *0.2* | *0.2* | *6.7* |
| Total assets | 344.8 | (97.5) | 247.3 | (139.3) | (89.8) | 18.3 | 99.3 | 117.6 | 346.6 |

1 The net amount of Cash collateral receivables on derivative instruments recognized on the balance sheet includes certain OTC derivatives that are net settled on a daily basis either legally or in substance under IAS 32 principles and exchange-traded derivatives that are economically settled on a daily basis. 2 The logic of the table results in amounts presented in the "Netting with gross liabilities" column corresponding directly to the amounts presented in the "Netting with gross assets" column in the liabilities table presented on the following page. Netting in this column for reverse repurchase agreements presented within the lines "Receivables from securities financing transactions" and "Financial assets at fair value not held for trading" taken together corresponds to the amounts presented for repurchase agreements in the "Payables from securities financing transactions" and "Other financial liabilities designated at fair value" lines in the liabilities table presented on the following page. 3 For the purpose of this disclosure, the amounts of financial instruments and cash collateral presented have been capped so as not to exceed the net amount of financial assets presented on the balance sheet; i.e., over-collateralization, where it exists, is not reflected in the table. 4 Includes assets not subject to enforceable netting arrangements and other out-of-scope items.

## Note 22 Offsetting financial assets and financial liabilities (continued)

**Financial liabilities subject to offsetting, enforceable master netting arrangements and similar agreements**

| | Liabilities subject to netting arrangements | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|
| | Netting recognized on the balance sheet | | | Netting potential not recognized on the balance sheet[3] | | | Liabilities not subject to netting arrangements[4] | Total liabilities | |
| *As of 31.12.21, USD billion* | Gross liabilities before netting | Netting with gross assets[2] | Net liabilities recognized on the balance sheet | Financial assets | Collateral pledged | Liabilities after consideration of netting potential | Liabilities recognized on the balance sheet | Total liabilities after consideration of netting potential | Total liabilities recognized on the balance sheet |
| Payables from securities financing transactions | 16.9 | (12.8) | 4.1 | (1.8) | (2.3) | 0.0 | 1.4 | 1.4 | 5.5 |
| Derivative financial instruments | 118.4 | (3.6) | 114.9 | (88.9) | (18.1) | 7.9 | 6.4 | 14.3 | 121.3 |

| | | | | | | | | | |
| *As of 31.12.20, USD billion* | | | | | | | | | |
| Payables from securities financing transactions | 18.2 | (13.3) | 4.9 | (1.6) | (3.3) | 0.0 | 1.4 | 1.4 | 6.3 |
| Derivative financial instruments | 157.1 | (5.0) | 152.1 | (117.2) | (23.9) | 10.9 | 9.0 | 19.9 | 161.1 |
| Cash collateral payables on derivative instruments[1] | 35.6 | 0.0 | 35.6 | (19.6) | (2.1) | 13.9 | 1.7 | 15.7 | 37.3 |
| Other financial liabilities designated at fair value | 87.0 | (79.2) | 7.8 | (0.8) | (6.3) | 0.7 | 24.0 | 24.7 | 31.8 |
| *of which: repurchase agreements* | *86.2* | *(79.2)* | *7.0* | *(0.8)* | *(6.3)* | *0.0* | *0.3* | *0.3* | *7.3* |
| Total liabilities | 297.8 | (97.5) | 200.3 | (139.2) | (35.5) | 25.6 | 36.2 | 61.7 | 236.5 |

1 The net amount of Cash collateral payables on derivative instruments recognized on the balance sheet includes certain OTC derivatives that are net settled on a daily basis either legally or in substance under IAS 32 principles and exchange-traded derivatives that are economically settled on a daily basis. 2 The logic of the table results in amounts presented in the "Netting with gross assets" column corresponding to the amounts presented in the "Netting with gross liabilities" column in the assets table presented on the previous page. Netting in this column for repurchase agreements presented within the lines "Payables from securities financing transactions" and "Other financial liabilities designated at fair value" taken together corresponds to the amounts presented for reverse repurchase agreements in the "Receivables from securities financing transactions" and "Financial assets at fair value not held for trading" lines in the assets table presented on the previous page. 3 For the purpose of this disclosure, the amounts of financial instruments and cash collateral presented have been capped so as not to exceed the net amount of financial liabilities presented on the balance sheet; i.e., over-collateralization, where it exists, is not reflected in the table. 4 Includes liabilities not subject to enforceable netting arrangements and other out-of-scope items.

## Note 23 Restricted and transferred financial assets

This Note provides information about restricted financial assets (Note 23a), transfers of financial assets (Note 23b and 23c) and financial assets that are received as collateral with the right to resell or repledge these assets (Note 23d).

### a) Restricted financial assets

Restricted financial assets consist of assets pledged as collateral against an existing liability or contingent liability and other assets that are otherwise explicitly restricted such that they cannot be used to secure funding.

Financial assets are mainly pledged as collateral in securities lending transactions, in repurchase transactions, against loans from Swiss mortgage institutions and in connection with the issuance of covered bonds. UBS AG generally enters into repurchase and securities lending arrangements under standard market agreements. For securities lending, the cash received as collateral may be more or less than the fair value of the securities loaned, depending on the nature of the transaction. For repurchase agreements, the fair value of the collateral sold under an agreement to repurchase is generally in excess of the cash borrowed. Pledged mortgage loans serve as collateral for existing liabilities against Swiss central mortgage institutions and for existing covered bond issuances of USD 10,843 million as of 31 December 2021 (31 December 2020: USD 12,456 million).

Other restricted financial assets include assets protected under client asset segregation rules, assets held by UBS AG's insurance entities to back related liabilities to the policy holders, assets held in certain jurisdictions to comply with explicit minimum local asset maintenance requirements. The carrying amount of the liabilities associated with these other restricted financial assets is generally equal to the carrying amount of the assets, with the exception of assets held to comply with local asset maintenance requirements, for which the associated liabilities are greater.

**Restricted financial assets**

| *USD million* | 31.12.21 | | | 31.12.20 | | |
|---|---|---|---|---|---|---|
| | Restricted financial assets | *of which: assets pledged as collateral that may be sold or repledged by counterparties* | *of which: mortgage loans*[1] | Restricted financial assets | *of which: assets pledged as collateral that may be sold or repledged by counterparties* | *of which: mortgage loans*[1] |

| Cash collateral receivables on derivative instruments | 4,747 | | | 3,765 | | |
| Loans and advances to customers | 1,237 | | | 756 | | |
| Financial assets at fair value not held for trading | 22,328 | | | 22,917 | | |
| Financial assets measured at fair value through other comprehensive income | 894 | | | 0 | | |
| Other | 97 | | | 110 | | |
| Total other restricted financial assets | 33,104 | | | 32,019 | | |
| Total financial assets pledged and other restricted financial assets | 118,292 | | | 121,593 | | |

1 All related to mortgage loans that serve as collateral for existing liabilities toward Swiss central mortgage institutions and for existing covered bond issuances. Of these pledged mortgage loans, approximately USD 2.7 billion as of 31 December 2021 (31 December 2020: approximately USD 2.7 billion) could be withdrawn or used for future liabilities or covered bond issuances without breaching existing collateral requirements. 2 Does not include assets placed with central banks related to undrawn credit lines and for payment, clearing and settlement purposes (31 December 2021: USD 4.4 billion; 31 December 2020: USD 1.3 billion).

In addition to restrictions on financial assets, UBS AG and its subsidiaries are, in certain cases, subject to regulatory requirements that affect the transfer of dividends and capital within UBS AG, as well as intercompany lending. Supervisory authorities also may require entities to measure capital and leverage ratios on a stressed basis, such as the Federal Reserve Board's Comprehensive Capital Analysis and Review process, which may limit the relevant subsidiaries' ability to make distributions of capital based on the results of those tests.

Supervisory authorities generally have discretion to impose higher requirements or to otherwise limit the activities of subsidiaries.

Non-regulated subsidiaries are generally not subject to such requirements and transfer restrictions. However, restrictions can also be the result of different legal, regulatory, contractual, entity- or country-specific arrangements and / or requirements.

› **Refer to the "Financial and regulatory key figures for our significant regulated subsidiaries and sub-groups" section of this report for financial information about significant regulated subsidiaries of UBS AG**

## b) Transferred financial assets that are not derecognized in their entirety

The table below presents information for financial assets that have been transferred but are subject to continued recognition in full, as well as recognized liabilities associated with those transferred assets.

**Transferred financial assets subject to continued recognition in full**

| *USD million* | 31.12.21 | | 31.12.20 | |
|---|---|---|---|---|
| | Carrying amount of transferred assets | Carrying amount of associated liabilities recognized on balance sheet | Carrying amount of transferred assets | Carrying amount of associated liabilities recognized on balance sheet |
| Financial assets at fair value held for trading that may be sold or repledged by counterparties | 43,397 | 17,687 | 47,098 | 18,874 |
| *relating to securities lending and repurchase agreements in exchange for cash received* | *17,970* | *17,687* | *19,177* | *18,874* |
| *relating to securities lending agreements in exchange for securities received* | *24,146* | | *27,595* | |
| *relating to other financial asset transfers* | *1,281* | | *326* | |
| Financial assets at fair value not held for trading that may be sold or repledged by counterparties | 961 | 898 | 2,140 | 1,378 |
| Debt securities classified as Other financial assets measured at amortized cost that may be sold or repledged by counterparties | 1,870 | 1,725 | 2,506 | 1,963 |
| Financial assets measured at fair value through other comprehensive income that may be sold or repledged by counterparties | 0 | 0 | 149 | 148 |
| Total financial assets transferred | 46,227 | 20,311 | 51,893 | 22,363 |

Transactions in which financial assets are transferred, but continue to be recognized in their entirety on UBS AG's balance sheet include securities lending and repurchase agreements, as well as other financial asset transfers. Repurchase and securities lending arrangements are, for the most part, conducted under standard market agreements and are undertaken with counterparties subject to UBS AG's normal credit risk control processes.

› **Refer to Note 1a item 2e for more information about repurchase and securities lending agreements**

As of 31 December 2021, approximately 41% of the transferred financial assets were assets held for trading transferred in exchange for cash, in which case the associated recognized liability represents the amount to be repaid to counterparties. For securities lending and repurchase agreements, a haircut of between 0% and 15% is generally applied to the transferred assets, which results in associated liabilities having a carrying amount below the carrying amount of the transferred assets. The counterparties to the associated liabilities presented in the table above have full recourse to UBS AG.

In securities lending arrangements entered into in exchange for the receipt of other securities as collateral, neither the securities received nor the obligation to return them are recognized on UBS AG's balance sheet, as the risks and rewards of ownership are not transferred to UBS AG. In cases where such financial assets received are subsequently sold or repledged in another transaction, this is not considered to be a transfer of financial assets.

Other financial asset transfers primarily include securities transferred to collateralize derivative transactions, for which the carrying amount of associated liabilities is not provided in the table above, because those replacement values are managed on a portfolio basis across counterparties and product types, and therefore there is no direct relationship between the specific collateral pledged and the associated liability.

Transferred financial assets that are not subject to derecognition in full but remain on the balance sheet to the extent of UBS AG's continuing involvement were not material as of 31 December 2021 and as of 31 December 2020.

**Note 23 Restricted and transferred financial assets (continued)**

## c) Transferred financial assets that are derecognized in their entirety with continuing involvement

Continuing involvement in a transferred and fully derecognized financial asset may result from contractual provisions in the particular transfer agreement or from a separate agreement, with the counterparty or a third party, entered into in connection with the transfer.

The fair value and carrying amount of UBS AG's continuing involvement from transferred positions as of 31 December 2021 and 31 December 2020 was not material. Life-to-date losses reported in prior periods primarily relate to legacy positions in securitization vehicles which have been fully marked down, with no remaining exposure to loss.

## d) Off-balance sheet assets received

The table below presents assets received from third parties that can be sold or repledged and that are not recognized on the balance sheet, but that are held as collateral, including amounts that have been sold or repledged.

**Off-balance sheet assets received**

| *USD million* | 31.12.21 | 31.12.20 |
|---|---|---|
| Fair value of assets received that can be sold or repledged | 497,828 | 500,689 |
| *received as collateral under reverse repurchase, securities borrowing and lending arrangements, derivative and other transactions[1]* | *483,426* | *487,904* |
| *received in unsecured borrowings* | *14,402* | *12,785* |
| Thereof sold or repledged[2] | 367,440 | 367,258 |
| *in connection with financing activities* | *319,176* | *315,603* |
| *to satisfy commitments under short sale transactions* | *31,688* | *33,595* |
| *in connection with derivative and other transactions[1]* | *16,575* | *18,059* |

1 Includes securities received as initial margin from its clients that UBS AG is required to remit to central counterparties, brokers and deposit banks through its exchange-traded derivative clearing and execution services. 2 Does not include off-balance sheet securities (31 December 2021: USD 12.7 billion; 31 December 2020: USD 18.9 billion) placed with central banks related to undrawn credit lines and for payment, clearing and settlement purposes for which there are no associated liabilities or contingent liabilities.

## Note 24 Maturity analysis of financial liabilities

The residual contractual maturities for non-derivative and non-trading financial liabilities as of 31 December 2021 are based on the earliest date on which UBS AG could be contractually required to pay. The total amounts that contractually mature in each time band are also shown for 31 December 2020. Derivative positions and trading liabilities, predominantly made up of short sale transactions, are assigned to the *Due within 1 month* column, as this provides a conservative reflection of the nature of these trading activities. The residual contractual maturities may extend over significantly longer periods.

**Maturity analysis of financial liabilities**

| | 31.12.21 | | | | | |
|---|---|---|---|---|---|---|
| *USD billion* | Due within 1 month | Due between 1 and 3 months | Due between 3 and 12 months | Due between 1 and 5 years | Due after 5 years | Total |

| Forward starting transactions, reverse repurchase and securities borrowing agreements[7] | 3.2 | | | | | 3.2 |
| Total | 61.3 | 0.5 | 0.4 | 0.0 | 0.0 | 62.2 |

1 Except for financial liabilities at fair value held for trading and derivative financial instruments (see footnote 3), the amounts presented generally represent undiscounted cash flows of future interest and principal payments. 2 The time-bucket Due after 5 years includes perpetual loss-absorbing additional tier 1 capital instruments. 3 Carrying amount is fair value. Management believes that this best represents the cash flows that would have to be paid if these positions had to be settled or closed out. 4 Contractual maturities of financial liabilities at fair value held for trading are: USD 30.8 billion due within 1 month (31 December 2020: USD 32.6 billion), USD 0.9 billion due between 1 month and 1 year (31 December 2020: USD 1.0 billion) and USD 0 billion due between 1 and 5 years (31 December 2020: USD 0 billion). 5 Includes USD 34 million (31 December 2020: USD 32 million) related to fair values of derivative loan commitments and forward starting reverse repurchase agreements classified as derivatives, presented within "Due within 1 month." The full contractual committed amount of USD 36.0 billion (31 December 2020: USD 31.3 billion) is presented in Note 10 under notional amounts. 6 Future interest payments on variable-rate liabilities are determined by reference to the applicable interest rate prevailing as of the reporting date. Future principal payments that are variable are determined by reference to the conditions existing at the relevant reporting date. 7 Excludes derivative loan commitments and forward starting reverse repurchase agreements measured at fair value (see footnote 5).

## Note 25 Interest rate benchmark reform

### Background

A market-wide reform of major interest rate benchmarks is being undertaken globally, with the Financial Conduct Authority (the FCA) announcing in March 2021 that the publication of London Interbank Offered Rates (LIBORs) would cease after 31 December 2021 for all non-US dollar LIBORs, as well as for one-week and two-month USD LIBOR. Publication of the remaining USD LIBOR tenors will cease immediately after 30 June 2023.

The majority of UBS AG's IBOR exposure was linked to CHF LIBOR and USD LIBOR. The alternative reference rate (the ARR) for CHF LIBOR is the Swiss Average Rate Overnight (SARON). The ARR for USD LIBOR is the Secured Overnight Financing Rate (SOFR); in addition, there are recommended ARRs for GBP LIBOR, JPY LIBOR and EUR LIBOR.

The Euro Interbank Offered Rate (EURIBOR) was reformed in 2019, with the reform consisting of a change in the underlying calculation method. Consequently, contracts linked to EURIBOR are not considered throughout the rest of this Note.

On 25 January 2021, the IBOR Fallbacks Supplement and IBOR Fallbacks Protocol, which amend the International Swaps and Derivatives Association (ISDA) standard definitions for interest rate derivatives to incorporate fallbacks for derivatives linked to certain IBORs, came into effect. From that date, all newly cleared and non-cleared derivatives between adhering parties that reference ISDA standard definitions now include these fallbacks. UBS AG adhered to the protocol in November 2020.

UBS AG's focus throughout 2021 was on transitioning existing contracts via bi-lateral and multi-lateral agreements, by leveraging industry solutions (e.g., the use of fallback provisions) and through third-party actions (those by clearing houses, agents, etc.). UBS AG has established a framework to address the transition of contracts that do not contain adequate fallback provisions. Furthermore, in line with regulatory guidance, UBS AG has implemented a framework to limit new contracts referencing IBORs.

### Governance over the transition to alternative benchmark rates

UBS AG established a global cross-divisional, cross-functional governance structure and change program to address the scale and complexity of the transition. This global program is sponsored by the Group CFO and led by senior representatives from the business divisions and UBS AG's control and support functions. The program includes governance and execution structures within each business division, together with cross-divisional teams from each control and support function. During 2021, progress was overseen centrally via a monthly operating committee and a monthly steering committee, as well as quarterly updates to the joint Audit and Risk Committees. A dedicated Group-wide forum, with an increased US regional focus, will oversee progress of the remaining USD LIBOR transition.

### Risks

A core part of UBS AG's change program is the identification, management and monitoring of the risks associated with IBOR reform and transition. These risks include, but are not limited to, the following:

- economic risks to UBS AG and its clients, through the repricing of existing contracts, reduced transparency and / or liquidity of pricing information, market uncertainty or disruption;
- accounting risks, where the transition affects the accounting treatment, including hedge accounting and consequential income statement volatility;
- valuation risks arising from the variation between benchmarks that will cease and ARRs, affecting the risk profile of financial instruments;
- operational risks arising from changes to UBS AG's front-to-back processes and systems to accommodate the transition, e.g., data sourcing and processing and bulk migration of contracts; and
- legal and conduct risks relating to UBS AG's engagement with clients and market counterparties around new benchmark products and amendments required for existing contracts referencing benchmarks that will cease.

Overall, the effort required to transition is affected by multiple factors, including whether negotiations need to take place with multiple stakeholders (as is the case for syndicated loans or certain listed securities), market readiness – such as liquidity in ARR-equivalent products – and a client's technical readiness to handle ARR market conventions. UBS AG remains confident that it has the transparency, oversight and operational preparedness to progress with the IBOR transition consistent with market timelines, given the significant progress made as of 31 December 2021. UBS AG did not have and does not expect changes to its risk management approach and strategy as a result of interest rate benchmark reform.

## Transition progress

### Non-derivative instruments

UBS AG's significant non-derivative exposures subject to IBOR reform primarily related to brokerage receivable and payable balances, corporate and private loans, and mortgages, linked to CHF and USD LIBORs. During 2020, UBS AG transitioned most of its CHF LIBOR-linked deposits to SARON. In that same year, UBS AG launched SARON-based mortgages and corporate loans based on all major ARRs in the Swiss market, as well as SOFR-based mortgages in the US market.

Throughout 2021, UBS AG transitioned substantially all of its private and corporate loans linked to non-USD IBORs, with the remaining CHF LIBOR-linked contracts planned to transition on their first roll date in 2022.

In addition, as of 31 December 2021 UBS AG had completed the transition of IBOR-linked non-derivative financial assets and liabilities related to brokerage accounts, except for balances originated in the US, which transitioned to SOFR in January 2022.

In March 2021, following the FCA announcement regarding the cessation timelines for IBORs, UBS AG initiated a centralized communication initiative for private mortgages linked to CHF LIBOR, with the objective of transitioning these exposures, either through the activation of existing fallbacks or the amendment of contractual terms where such fallbacks do not exist. During 2021, mortgages that were linked to CHF LIBOR were reduced to USD 21 billion as of 31 December 2021, with these remaining mortgages automatically transitioning to SARON from their next coupon roll date.

The transition of US securities-based lending to SOFR, amounting to USD 37 billion as of 31 December 2021, was for the most part completed in January 2022, with US mortgages linked to USD LIBOR planned to transition to SOFR in 2022–2023.

As of 31 December 2021, UBS AG had approximately USD 3 billion equivalent of Japanese yen- and US dollar-denominated funding from UBS Group AG that, per current contractual terms, if not called on their respective call dates, would reset based directly on JPY LIBOR and USD LIBOR. These bonds have robust IBOR fallback language and the confirmation of interest rate calculation mechanics will be communicated as market standards formalize and in advance of any rate resets. In addition, several US dollar- and Swiss franc-denominated contracts providing funding from UBS Group AG reference rates indirectly derived from IBORs, if they are not called on their respective call dates. UBS AG aims to transition these contracts in advance of their reset dates, with the transition of Swiss franc-denominated funding completed in January 2022. These debt instruments have not been included in the table on the following page, given their current fixed-rate coupon.

As of 31 December 2021, UBS AG had approximately USD 5 billion of irrevocable commitments that may be drawn down in different currencies with IBOR-linked interest rates and that expire after the relevant benchmark cessation dates; approximately USD 3 billion of these contracts had transitioned for all IBORs, except USD LIBOR, and USD 2 billion of these commitments retained a non-USD IBOR interest rate as of 31 December 2021 with transition dependent upon the actions of other parties. To the extent non-USD IBOR-linked amounts are requested under these contracts, UBS AG will seek to renegotiate current terms or rely on legislative solutions.

### Derivative instruments

UBS AG holds derivatives for trading and hedging purposes, including those designated in hedge accounting relationships. A significant number of interest rate and cross-currency swaps have floating legs that reference various benchmarks that are subject to IBOR reform.

The majority of derivatives are transacted with clearing houses, in particular LCH, with the transition of these non-USD IBOR-linked derivatives substantially completed in December 2021. UBS AG had also completed the transition of all non-USD IBOR-linked exchange-traded derivatives (ETDs) through participation in activities organized by respective exchanges by 31 December 2021.

For derivatives not transacted with clearing houses or exchanges, UBS AG and a significant proportion of UBS AG's counterparties have adhered to the ISDA IBOR Fallbacks Protocol, which builds in agreed fallbacks. The majority of these contracts had transitioned as of 31 December 2021, with a small number of contracts transitioned in January 2022, to ensure an orderly transition when converting high volumes of transactions at the time of cessation.

## Note 25 Interest rate benchmark reform (continued)

### Financial instruments yet to transition to alternative benchmarks

The amounts included in the table below relate to financial instrument contracts across UBS AG's business divisions where UBS AG has material exposures subject to IBOR reform that have not yet transitioned to ARRs, and that:

– contractually reference an interest rate benchmark that will transition to an alternative benchmark; and
– have a contractual maturity date (including open-ended contracts) after the agreed cessation dates.

Contracts where penalty terms reference IBORs, or where exposure to an IBOR is not the primary purpose of the contract, have not been included, as these contracts do not have a material impact on the transition process.

In line with information provided to management and external parties monitoring UBS AG's transition progress, the table below includes the following financial metrics for instruments external to UBS AG that are subject to interest rate benchmark reform:

– gross carrying value / exposure for non-derivative financial instruments; and
– total trade count for derivative financial instruments.

The exposures included in the table below represent the maximum IBOR exposure, without regard for early termination rights, with the actual exposure being dependent upon client preferences and investment decisions.

As of 31 December 2021, UBS AG had made significant progress in transitioning LIBOR exposures to ARRs. The remaining non-USD LIBOR-linked exposures included in the table below primarily relate to derivatives that successfully transitioned in January 2022 and CHF LIBOR mortgages that will automatically transition to SARON on their first roll date in 2022.

| | | 31.12.21 | | | | |
|---|---|---|---|---|---|---|
| | | LIBOR benchmark rates | | | | |
| | Measure | CHF | USD | GBP | EUR[1] | JPY |
| Carrying value of non-derivative financial instruments | | | | | | |
| Total non-derivative financial assets | USD million | 21,616[2] | 65,234[3] | 45[4] | 1 | 0 |
| Total non-derivative financial liabilities | USD million | 27[4] | 1,985[4] | 3[4] | 5[5] | 0 |
| Trade count of derivative financial instruments | | | | | | |
| Total derivative financial instruments | Trade count | 829[6] | 40,500[7] | 183[6] | 3,744[6] | 184[6] |
| Off-balance sheet exposures | | | | | | |
| Total irrevocable loan commitments | USD million | 0 | 11,863[8] | 0 | 0 | 0 |

1 Relates primarily to EUR LIBOR positions. 2 Relates primarily to CHF LIBOR mortgages, which will automatically transition to SARON on their first roll date in 2022. 3 Includes USD LIBOR securities-based lending and brokerage accounts, amounting to USD 37 billion, and USD 5 billion respectively, which for the most part transitioned to SOFR in January 2022, as well as USD 1 billion of loans related to revolving multi-currency credit lines, where IBOR transition efforts are complete, except for USD LIBOR. The remainder primarily relates to US mortgages and corporate lending. 4 Relates to floating-rate notes that per their contractual terms can reset to rates linked to LIBOR, with transition dependent upon the actions of respective issuers. 5 Relates to contracts that transitioned in January 2022. 6 Includes predominantly bilateral derivatives, which transitioned in January 2022, and an insignificant amount of cleared derivatives, where the respective clearing houses' organized transition happened in January 2022. 7 Includes approximately 5,000 cross-currency derivatives, of which approximately 500 have both a non-USD LIBOR leg and a USD LIBOR leg, where the non-USD leg transitioned in January 2022 before the next fixing date. The remainder represents cross-currency swaps with an ARR leg and a USD IBOR leg. 8 Includes loan commitments that can be drawn in different currencies at the client's discretion, of which approximately USD 3 billion have only USD LIBOR exposure remaining and approximately USD 2 billion retain a non-USD LIBOR interest rate as of 31 December 2021, with transition dependent upon the actions of other parties. The remainder represents loan commitments that can be drawn in US dollars only and will transition in 2022–2023.

## Derivatives designated in hedge accounting relationships

UBS AG applies hedge accounting to interest rate risk and foreign exchange risk including structural foreign exchange risk related to net investments in foreign operations.

› **Refer to "Market risk" in the "Risk management and control" section of this report for more information about how risks arise and how they are managed by UBS AG**

### Hedging instruments and hedged risk

Interest rate swaps are designated in fair value hedges or cash flow hedges of interest rate risk arising solely from changes in benchmark interest rates. Fair value changes arising from such risk are usually the largest component of the overall change in the fair value of the hedged position in transaction currency.

Cross-currency swaps are designated as fair value hedges of foreign exchange risk. Foreign exchange forwards and foreign exchange swaps are mainly designated as hedges of structural foreign exchange risk related to net investments in foreign operations. In both cases the hedged risk arises solely from changes in spot foreign exchange rate.

The notional of the designated hedging instruments matches the notional of the hedged items, except when the interest rate swaps are re-designated in cash flow hedges, in which case the hedge ratio designated is determined based on the swap sensitivity.

### Hedged items and hedge designation

#### *Fair value hedges of interest rate risk related to debt instruments and loan assets*

Fair value hedges of interest rate risk related to debt instruments and loan assets involve swapping fixed cash flows associated with the debt issued, debt securities held and, from 2021 onward, loan assets (principally long-term fixed-rate mortgage loans in Swiss francs formerly designated within "Fair value hedges of portfolio interest rate risk related to loans designated under IAS 39") to floating cash flows by entering into interest rate swaps that either receive fixed and pay floating cash flows or that pay fixed and receive floating cash flows.

Designations have been made in US dollars, euros, Swiss francs, Australian dollars, Japanese yen and Singapore dollars. For new hedging instruments and hedged risk designations entered into in 2021 in these currencies (with the exception of euro), the benchmark rate was the relevant alternative reference rate (ARR). Following the interbank offered rate (IBOR) transition for swaps with LCH (formerly the London Clearing House) in December 2021, the benchmark hedge rate for Swiss franc and Japanese yen designations was changed from an IBOR rate to the relevant ARR with the hedge relationship continuing in accordance with *Interest Rate Benchmark Reform – Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16).*

#### *Fair value hedges of portfolio interest rate risk related to loans designated under IAS 39*

Prior to December 2021, UBS AG hedged an open portfolio of long-term fixed-rate mortgage loans in Swiss francs using interest rate swaps that paid a fixed rate of interest and received a floating rate of interest. Both the hedged portfolio and the hedging instruments were adjusted on a monthly basis to reflect changes in size and the maturity profile of the hedged portfolio. Each month the hedge relationship was discontinued and a new one designated. Changes in the portfolio were driven by new loans being originated or loans being repaid.

#### *Cash flow hedges of forecast transactions*

UBS AG hedges forecast cash flows on non-trading financial assets and liabilities that bear interest at variable rates or are expected to be refinanced or reinvested in the future, due to movements in future market rates. The amounts and timing of future cash flows, representing both principal and interest flows, are projected on the basis of contractual terms and other relevant factors, including estimates of prepayments and defaults. The aggregate principal balances and interest cash flows across all portfolios over time form the basis for identifying the non-trading interest rate risk of UBS AG, which is hedged with interest rate swaps, the maximum maturity of which is 10 years. Cash flow forecasts and risk exposures are monitored and adjusted on an ongoing basis, and consequently additional hedging instruments are traded and designated, or are terminated resulting in a hedge discontinuance. Hedge designations have been made in the following currencies: US dollars, euros, Swiss francs, pounds sterling and Hong Kong dollars. The cash flow hedges in US dollars, Swiss francs and pounds sterling were discontinued and replaced with new ARR designations in December 2021.

#### *Fair value hedges of foreign exchange risk related to issued debt instruments*

Debt instruments denominated in currencies other than the US dollar are designated in fair value hedges of spot foreign exchange risk, in addition to and separate from the fair value hedges of interest rate risk. Cross currency swaps economically convert debt denominated in currencies other than the US dollar to US dollars. This hedge accounting program started on 1 January 2020, with the adoption of the hedge accounting requirements of IFRS 9, *Financial Instruments,* by UBS AG.

› **Refer to Note 1b for more information**

#### *Hedges of net investments in foreign operations*

UBS AG applies hedge accounting for certain net investments in foreign operations, which include subsidiaries, branches and associates. Upon maturity of hedging instruments, typically two months, the hedge relationship is terminated and new designations are made to reflect any changes in the net investments in foreign operations.

**Note 26 Hedge accounting (continued)**

## Economic relationship between hedged item and hedging instrument

For hedges designated under IFRS 9, the economic relationship between the hedged item and the hedging instrument is determined based on a qualitative analysis of their critical terms. In cases where hedge designation takes place after origination of the hedging instrument, a quantitative analysis of the possible behavior of the hedging derivative and the hedged item during their respective terms is also performed.

Prior to December 2021, for the fair value hedge of portfolio interest rate risk related to loans designated under IAS 39, hedge effectiveness was assessed by comparing changes in the fair value of the hedged portfolio of loans attributable to changes in the designated benchmark interest rate with the changes in the fair value of the interest rate swaps.

## Sources of hedge ineffectiveness

In hedges of interest rate risk, hedge ineffectiveness can arise from mismatches of critical terms and / or the use of different curves to discount the hedged item and instrument, or from entering into a hedge relationship after the trade date of the hedging derivative.

In hedges of foreign exchange risk related to debt issued, hedge ineffectiveness can arise due to the discounting of the hedging instruments and undesignated risk components and lack of such discounting and risk components in the hedged items.

In hedges of net investments in foreign operations, ineffectiveness is unlikely unless the hedged net assets fall below the designated hedged amount. The exceptions are hedges where the hedging currency is not the same as the currency of the foreign operation, where the currency basis may cause ineffectiveness.

Hedge ineffectiveness from financial instruments measured at fair value through profit or loss is recognized in *Other net income.*

## Derivatives not designated in hedge accounting relationships

Non-hedge accounted derivatives are mandatorily held for trading with all fair value movements taken to *Other net income from financial instruments measured at fair value through profit or loss*, even when held as an economic hedge or to facilitate client clearing. The one exception relates to forward points on certain short- and long-duration foreign exchange contracts acting as economic hedges, which are reported in *Net interest income.*

**All hedges: designated hedging instruments and hedge ineffectiveness**

| | As of or for the year ended 31.12.21 | | | | | |
|---|---|---|---|---|---|---|
| | | Carrying amount | | | | |
| *USD million* | Notional amount | Derivative financial assets | Derivative financial liabilities | Changes in fair value of hedging instruments[1] | Changes in fair value of hedged items[1] | Hedge ineffectiveness recognized in the income statement |
| Interest rate risk | | | | | | |
| Fair value hedges | 89,525 | 0 | 7 | (1,604) | 1,602 | (2) |
| Cash flow hedges | 79,573 | 12 | 1 | (1,185) | 990 | (196) |
| Foreign exchange risk | | | | | | |
| Fair value hedges[2] | 27,875 | 87 | 261 | (2,139) | 2,181 | 42 |

| Amounts related to hedge relationships for which hedge accounting continues to be applied | (61) | (569) |
| Amounts related to hedge relationships for which hedge accounting is no longer applied | 262 | 268 |
| Total other comprehensive income recognized directly in equity related to hedging instruments designated as net investment hedges, on a pre-tax basis | 201 | (302) |

**Note 26 Hedge accounting (continued)**

## Interest rate benchmark reform

UBS AG continues to apply the relief provided by *Interest Rate Benchmark Reform* (amendments to IFRS 9, IAS 39 and IFRS 7), published by the IASB in September 2019.

The interest rate benchmarks subject to interest rate benchmark reforms to which the Group's hedge relationships were exposed were USD LIBOR, CHF LIBOR, GBP LIBOR, AUD LIBOR, JPY LIBOR, HKD LIBOR, SGD LIBOR and EONIA. Interest rate swaps designated in hedge relationships referencing GBP, CHF and JPY LIBOR transitioned to ARRs in December 2021 when LCH transitioned its contracts. For other currencies, IBOR quotations remain available, but all new designations will reference ARR. As such, ARR designations in these currencies will replace IBOR designations as IBOR contracts mature.

UBS AG's hedge relationships are also exposed to the Euro Inter-bank Offered Rate (EURIBOR), which is expected to continue to exist as a benchmark rate for the foreseeable future. Thus, the Group does not consider its hedges involving the EURIBOR benchmark interest rate to be directly affected by interest rate benchmark reform.

Apart from EURIBOR hedges, UBS AG applied the relief to all its fair value hedges of interest rate risk and to those cash flow hedge relationships where the hedged risk is LIBOR or EONIA. The following table provides details on the notional amount and carrying amount of the hedging instruments in those hedge relationships maturing after 31 December 2021, or 30 June 2023 for USD LIBOR hedges, which are the cessation dates of the applicable interest rate benchmarks.

Hedges of net investments in foreign operations are not affected by the amendments.

› **Refer to Note 1a item 2j for more information about the relief provided by the amendments to IFRS 9, IAS 39 and IFRS 7 related to interest rate benchmark reform**

› **Refer to Note 25 Interest rate benchmark reform for more information about the transition progress**

**Hedging instruments referencing LIBOR**

## Note 27 Post-employment benefit plans

### a) Defined benefit plans

UBS AG has established defined benefit plans for its employees in various jurisdictions in accordance with local regulations and practices. The major plans are located in Switzerland, the UK, the US and Germany. The level of benefits depends on the specific plan rules.

#### Swiss pension plan

The Swiss pension plan covers employees of UBS AG in Switzerland and employees of companies in Switzerland having close economic or financial ties with UBS AG, and exceeds the minimum benefit requirements under Swiss pension law.

In 2017, a significant number of employees were transferred from UBS AG to UBS Business Solutions AG, which is a directly held subsidiary of UBS Group AG. There continues to be one pooled pension plan in Switzerland covering the employees of UBS AG and those transferred to UBS Business Solutions AG. UBS AG and UBS Business Solutions AG both are legal sponsors of UBS's Swiss pension plan. Since the date of the employee transfer, UBS AG and UBS Business Solutions AG apply proportionate defined benefit accounting, i.e., the net pension cost and the net pension asset / liability of the Swiss pension plan are allocated proportionally between UBS AG and UBS Business Solutions AG based on the aggregated net pension cost and defined benefit obligations related to their employees.

The Swiss plan offers retirement, disability and survivor benefits and is governed by a Pension Foundation Board. The responsibilities of this board are defined by Swiss pension law and the plan rules.

Savings contributions to the Swiss plan are paid by both employer and employee. Depending on the age of the employee, UBS AG pays a savings contribution that ranges between 6.5% and 27.5% of contributory base salary and between 2.8% and 9% of contributory variable compensation. UBS AG also pays risk contributions that are used to fund disability and survivor benefits. Employees can choose the level of savings contributions paid by them, which vary between 2.5% and 13.5% of contributory base salary and between 0% and 9% of contributory variable compensation, depending on age and choice of savings contribution category.

The plan offers to members at the normal retirement age of 65 a choice between a lifetime pension and a partial or full lump sum payment. Participants can choose to draw early retirement benefits starting from the age of 58, but can also continue employment and remain active members of the plan until the age of 70. Employees have the opportunity to make additional purchases of benefits to fund early retirement benefits.

The pension amount payable to a participant is calculated by applying a conversion rate to the accumulated balance of the participant's retirement savings account at the retirement date. The balance is based on credited vested benefits transferred from previous employers, purchases of benefits, and the employee and employer contributions that have been made to the participant's retirement savings account, as well as the interest accrued. The annual interest rate credited to participants is determined by the Pension Foundation Board at the end of each year.

Although the Swiss plan is based on a defined contribution promise under Swiss pension law, it is accounted for as a defined benefit plan under IFRS, primarily because of the obligation to accrue interest on the participants' retirement savings accounts and the payment of lifetime pension benefits.

An actuarial valuation in accordance with Swiss pension law is performed regularly. Should an underfunded situation on this basis occur, the Pension Foundation Board is required to take the necessary measures to ensure that full funding can be expected to be restored within a maximum period of 10 years. If a Swiss plan were to become significantly underfunded on a Swiss pension law basis, additional employer and employee contributions could be required. In this situation, the risk is shared between employer and employees, and the employer is not legally obliged to cover more than 50% of the additional contributions required. As of 31 December 2021, the Swiss plan had a technical funding ratio in accordance with Swiss pension law of 134.8% (31 December 2020: 132.6%).

The investment strategy of the Swiss plan complies with Swiss pension law, including the rules and regulations relating to diversification of plan assets, and is derived from the risk budget defined by the Pension Foundation Board on the basis of regularly performed asset and liability management analyses. The Pension Foundation Board strives for a medium- and long-term balance between assets and liabilities.

As of 31 December 2021, the Swiss plan was in a surplus situation on an IFRS measurement basis, as the fair value of the plan's assets exceeded the defined benefit obligation (DBO) by USD 3,716 million (31 December 2020: a surplus of USD 2,739 million). However, a surplus is only recognized on the balance sheet to the extent that it does not exceed the estimated future economic benefit, which equals the difference between the present value of the estimated future net service cost and the present value of the estimated future employer contributions. As of both 31 December 2021 and 31 December 2020, the estimated future economic benefit was zero and hence no net defined benefit asset was recognized on the balance sheet.

##### *Changes to the Swiss pension plan in 2019*

The Pension Foundation Board and UBS AG agreed to implement measures that took effect from the start of 2019 to support the long-term financial stability of the Swiss pension fund. The measures, among other things, lowered the conversion rate and increased the normal retirement age from 64 to 65. Pensions already in payment on 1 January 2019 were not affected.

To mitigate the effects for active participants, UBS AG committed to pay an extraordinary contribution of up to CHF 450 million (USD 494 million at the closing exchange rate on 31 December 2021) in three installments in 2020, 2021 and 2022. Two installments of USD 143 million and USD 152 million paid in 2020 and 2021 reduced OCI with no effect on the income statement.

The third installment, CHF 116 million (USD 127 million at the closing exchange rate on 31 December 2021), will be paid in the first quarter of 2022. The regular employer contributions to be made to the Swiss plan in 2022 are estimated at USD 277 million.

**Note 27 Post-employment benefit plans (continued)**

UK pension plan

The UK plan is a career-average revalued earnings scheme, and benefits increase automatically based on UK price inflation. The normal retirement age for participants in the UK plan is 60. The plan provides guaranteed lifetime pension benefits to participants upon retirement. The UK plan has been closed to new entrants for more than 20 years and, since 2013, participants are no longer accruing benefits for current or future service. Instead, employees participate in the UK defined contribution plan.

The governance responsibility for the UK plan lies jointly with the Pension Trustee Board and UBS AG. The employer contributions to the pension fund reflect agreed-upon deficit funding contributions, which are determined on the basis of the most recent actuarial valuation using assumptions agreed by the Pension Trustee Board and UBS AG. In the event of underfunding, UBS AG and the Pension Trustee Board must agree on a deficit recovery plan within statutory deadlines. In 2021, UBS AG made no deficit funding contributions to the UK plan. In 2020, UBS AG made deficit funding contributions of USD 46 million.

The plan assets are invested in a diversified portfolio of financial assets, which include a longevity swap with an external insurance company. This swap enables the UK pension plan to hedge the risk between expected and actual longevity, which should mitigate volatility in the net defined benefit asset / liability. As of 31 December 2021, the longevity swap had a negative value of USD 3 million (31 December 2020: zero).

In 2019, UBS AG and the Pension Trustee Board entered into an arrangement whereby a collateral pool was established to provide security for the pension fund. The value of the collateral pool as of 31 December 2021 was USD 337 million (31 December 2020: USD 347 million) and includes corporate bonds, government-related debt instruments and other financial assets. The arrangement provides the Pension Trustee Board dedicated access to a pool of assets in the event of UBS AG's insolvency or not paying a required deficit funding contribution.

The employer contributions to be made to the UK defined benefit plan in 2022 are estimated at USD 5 million, subject to regular funding reviews during the year.

US pension plans

There are two distinct major defined benefit plans in the US, with a normal retirement age of 65. Both plans were closed to new entrants more than 20 years ago. Since they closed, new employees have participated in a defined contribution plan.

One of the defined benefit plans is a contribution-based plan in which each participant accrues a percentage of salary in a retirement savings account. The retirement savings account is credited annually with interest based on a rate that is linked to the average yield on one-year US government bonds. For the other defined benefit plan, retirement benefits accrue based on the career-average earnings of each individual plan participant. Former employees with vested benefits have the option to take a lump sum payment or a lifetime annuity.

As required under applicable pension laws, both plans have fiduciaries who, together with UBS AG, are responsible for the governance of the plans.

The plan assets of both plans are invested in diversified portfolios of financial assets. Each plan's fiduciaries are responsible for the investment decisions with respect to the plan assets.

The employer contributions to be made to the US defined benefit plans in 2022 are estimated at USD 10 million.

German pension plans

There are two defined benefit plans in Germany, which are both unfunded. The normal retirement age is 65 and benefits are paid directly by UBS AG. In the larger of the two plans each participant accrues a percentage of salary in a retirement savings account. The accumulated account balance of the participant is credited on an annual basis with guaranteed interest at a rate of 5%. The plan has been closed to new entrants and all participants younger than the age of 55 no longer accrue benefits. In the other plan, amounts are accrued annually based on employee elections related to variable compensation. For this plan, the accumulated account balance is credited on an annual basis with a guaranteed interest rate of 6% for amounts accrued before 2010, of 4% for amounts accrued from 2010 to 2017 and of 0.9% for amounts accrued after 2017. Both plans are subject to German pension law, whereby the responsibility to pay pension benefits when they are due resides entirely with UBS AG. A portion of the pension payments is directly increased in line with price inflation.

In June 2021, UBS AG implemented a new funded pension plan with interest credited to participants equal to actual investment returns with a guaranteed minimum of 0%. The plan was implemented retrospectively for new hires since June 2018 and for all eligible active participants younger than 55 from July 2021. Each participant accrues a percentage of salary in a retirement savings account.

The employer contributions to be made to the German defined benefit plans in 2022 are estimated at USD 12 million.

Financial information by plan

The tables on the following pages provide an analysis of the movement in the net asset / liability recognized on the balance sheet for defined benefit plans, as well as an analysis of amounts recognized in net profit and in *Other comprehensive income*.

## Note 27 Post-employment benefit plans (continued)

1 Experience (gains) / losses are a component of actuarial remeasurements of the defined benefit obligation and reflect the effects of differences between the previous actuarial assumptions and what has actually occurred. 2 Includes the effect from employees being transferred between UBS AG and UBS Business Solutions during the period. 3 Refer to the "Statement of comprehensive income."

The table below provides information about the duration of the DBO and the timing for expected benefit payments.

| | Swiss pension plan | | UK pension plan | | US and German pension plans[1] | |
|---|---|---|---|---|---|---|
| | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 |
| Duration of the defined benefit obligation (in years) | 15.5 | 16.2 | 18.8 | 19.0 | 9.5 | 10.2 |
| Maturity analysis of benefits expected to be paid | | | | | | |
| *USD million* | | | | | | |
| Benefits expected to be paid within 12 months | 719 | 710 | 110 | 114 | 123 | 122 |
| Benefits expected to be paid between 1 and 3 years | 1,440 | 1,442 | 248 | 232 | 237 | 235 |
| Benefits expected to be paid between 3 and 6 years | 2,097 | 2,100 | 418 | 406 | 338 | 346 |
| Benefits expected to be paid between 6 and 11 years | 3,467 | 3,408 | 743 | 744 | 495 | 532 |
| Benefits expected to be paid between 11 and 16 years | 3,156 | 3,184 | 751 | 758 | 392 | 413 |
| Benefits expected to be paid in more than 16 years | 10,733 | 11,186 | 3,028 | 3,206 | 519 | 541 |

1 The duration of the defined benefit obligation represents a weighted average across US and German plans.

## Actuarial assumptions

The actuarial assumptions used for the defined benefit plans are based on the economic conditions prevailing in the jurisdiction in which they are offered. Changes in the defined benefit obligation are most sensitive to changes in the discount rate. The discount rate is based on the yield of high-quality corporate bonds quoted in an active market in the currency of the respective plan. A decrease in the discount curve increases the DBO. UBS AG regularly reviews the actuarial assumptions used in calculating the DBO to determine their continuing relevance.

› **Refer to Note 1a item 5 for a description of the accounting policy for defined benefit plans**

The tables below show the significant actuarial assumptions used in calculating the DBO at the end of the year.

**Significant actuarial assumptions**

| | Swiss pension plan | | UK pension plan | | US and German pension plans[1] | |
|---|---|---|---|---|---|---|
| *In %* | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 |
| Discount rate | 0.34 | 0.10 | 1.82 | 1.42 | 2.10 | 1.62 |
| Rate of salary increase | 2.01 | 2.00 | 0.00 | 0.00 | 2.35 | 2.25 |
| Rate of pension increase | 0.00 | 0.00 | 3.32 | 2.89 | 1.80 | 1.70 |
| Rate of interest credit on retirement savings | 1.04 | 0.60 | 0.00 | 0.00 | 1.18 | 1.12 |

1 Represents weighted average assumptions across US and German plans.

**Mortality tables and life expectancies for major plans**

| | | Life expectancy at age 65 for a male member currently | | | |
|---|---|---|---|---|---|
| | | aged 65 | | aged 45 | |
| Country | Mortality table | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 |
| Switzerland | BVG 2020 G with CMI 2019 projections | 21.7 | 21.7 | 23.3 | 23.2 |
| UK | S3PA with CMI 2020 projections[1] | 23.4 | 23.4 | 24.5 | 24.6 |
| USA | Pri-2012 with MP-2021 projection scale[2] | 21.9 | 21.8 | 23.3 | 23.2 |
| Germany | Dr. K. Heubeck 2018 G | 20.5 | 20.8 | 23.2 | 23.6 |

| | | Life expectancy at age 65 for a female member currently | | | |
|---|---|---|---|---|---|
| | | aged 65 | | aged 45 | |
| Country | Mortality table | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 |
| Switzerland | BVG 2020 G with CMI 2019 projections | 23.4 | 23.4 | 25.0 | 24.9 |
| UK | S3PA with CMI 2020 projections[1] | 24.9 | 24.9 | 26.3 | 26.3 |
| USA | Pri-2012 with MP-2021 projection scale[2] | 23.3 | 23.2 | 24.7 | 24.5 |
| Germany | Dr. K. Heubeck 2018 G | 23.9 | 24.3 | 26.1 | 26.5 |

1 In 2020, S3PA with CMI 2019 projections was used. 2 In 2020, Pri-2012 with MP-2020 projection scale was used.

## Note 27 Post-employment benefit plans (continued)

### Sensitivity analysis of significant actuarial assumptions

The table below presents a sensitivity analysis for each significant actuarial assumption, showing how the DBO would have been affected by changes in the relevant actuarial assumption that were reasonably possible at the balance sheet date. Unforeseen circumstances may arise, which could result in variations that are outside the range of alternatives deemed reasonably possible. Caution should be used in extrapolating the sensitivities below on the DBO, as the sensitivities may not be linear.

**Sensitivity analysis of significant actuarial assumptions[1]**

| Increase / (decrease) in defined benefit obligation | Swiss pension plan | | UK pension plan | | US and German pension plans | |
|---|---|---|---|---|---|---|
| *USD million* | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 |
| Discount rate | | | | | | |
| Increase by 50 basis points | (975) | (1,030) | (361) | (370) | (78) | (91) |
| Decrease by 50 basis points | 1,116 | 1,181 | 411 | 423 | 84 | 99 |
| Rate of salary increase | | | | | | |
| Increase by 50 basis points | 69 | 74 | –[2] | –[2] | 0 | 1 |
| Decrease by 50 basis points | (66) | (71) | –[2] | –[2] | 0 | (1) |
| Rate of pension increase | | | | | | |
| Increase by 50 basis points | 749 | 793 | 334 | 358 | 6 | 8 |
| Decrease by 50 basis points | –[3] | –[3] | (306) | (316) | (6) | (7) |
| Rate of interest credit on retirement savings | | | | | | |
| Increase by 50 basis points | 134 | 142 | –[4] | –[4] | 8 | 9 |
| Decrease by 50 basis points | (134)[5] | (113) | –[4] | –[4] | (7) | (8) |
| Life expectancy | | | | | | |
| Increase in longevity by one additional year | 475 | 566 | 184 | 182 | 56 | 60 |

1 The sensitivity analyses are based on a change in one assumption while holding all other assumptions constant, so that interdependencies between the assumptions are excluded. 2 As the plan is closed for future service, a change in assumption is not applicable. 3 As the assumed rate of pension increase was 0% as of 31 December 2021 and as of 31 December 2020, a downward change in assumption is not applicable. 4 As the UK plan does not provide interest credits on retirement savings, a change in assumption is not applicable. 5 As of 31 December 2021, 17% of retirement savings were subject to a legal minimum rate of 1.00%.

## Note 27 Post-employment benefit plans (continued)

### Fair value of plan assets

The tables below provide information about the composition and fair value of plan assets of the Swiss, UK, US and German pension plans.

**Composition and fair value of plan assets**

**Swiss pension plan**

| | 31.12.21 | | | | 31.12.20 | | | |
|---|---|---|---|---|---|---|---|---|
| | Fair value | | | Plan asset allocation % | Fair value | | | Plan asset allocation % |

| Bonds[1] | | | | | | | | |
| Domestic, AAA to BBB– | 2,512 | 0 | 2,512 | 13 | 2,096 | 0 | 2,096 | 11 |
| Foreign, AAA to BBB– | 2,877 | 0 | 2,877 | 15 | 3,462 | 0 | 3,462 | 19 |
| Foreign, below BBB– | 742 | 0 | 742 | 4 | 734 | 0 | 734 | 4 |
| Other | 2,379 | 2,010 | 4,389 | 23 | 1,894 | 2,097 | 3,991 | 22 |
| Other investments | 377 | 385 | 762 | 4 | 373 | 266 | 640 | 3 |
| Total fair value of plan assets | 12,980 | 6,216 | 19,196 | 100 | 12,688 | 5,670 | 18,358 | 100 |

| | 31.12.21 | 31.12.20 |
|---|---|---|
| Total fair value of plan assets | 19,196 | 18,358 |
| *of which:*[2] | | |
| *Bank accounts at UBS AG* | *109* | *130* |
| *UBS AG debt instruments* | *16* | *19* |
| *UBS Group AG shares* | *14* | *13* |
| *Securities lent to UBS AG*[3] | *608* | *796* |
| *Property occupied by UBS AG* | *52* | *54* |
| *Derivative financial instruments, counterparty UBS AG*[3] | *72* | *84* |

1 The bond credit ratings are primarily based on S&P's credit ratings. Ratings AAA to BBB– and below BBB– represent investment grade and non-investment grade ratings, respectively. In cases where credit ratings from other rating agencies were used, these were converted to the equivalent rating in S&P's rating classification. 2 Bank accounts at UBS AG encompass accounts in the name of the Swiss pension fund. The other positions disclosed in the table encompass both direct investments in UBS AG instruments and UBS Group AG shares and indirect investments, i.e., those made through funds that the pension fund invests in. 3 Securities lent to UBS AG and derivative financial instruments are presented gross of any collateral. Securities lent to UBS AG were fully covered by collateral as of 31 December 2021 and 31 December 2020. Net of collateral, derivative financial instruments amounted to USD 24 million as of 31 December 2021 (31 December 2020: negative USD 9 million).

## Note 27 Post-employment benefit plans (continued)

### b) Defined contribution plans

UBS AG sponsors a number of defined contribution plans, with the most significant plans in the US and the UK. UBS AG's obligation is limited to its contributions made in accordance with each plan, which may include direct contributions and matching contributions. Employer contributions to defined contribution plans are recognized as an expense.

**Expenses related to defined contribution plans**

| Remaining plans | 64 | 65 | 71 |
| Total[1] | 303 | 291 | 278 |

1 Refer to Note 6.

### c) Related-party disclosure

UBS AG is the principal provider of banking services for the pension fund of UBS AG in Switzerland. In this capacity, UBS AG is engaged to execute most of the pension fund's banking activities. These activities can include, but are not limited to, trading, securities lending and borrowing and derivative transactions. The non-Swiss UBS AG pension funds do not have a similar banking relationship with UBS AG.

Also, UBS AG leases certain properties that are owned by the Swiss pension fund. As of 31 December 2021, the minimum commitment toward the Swiss pension fund under the related leases was approximately USD 5 million (31 December 2020: USD 6 million).

› **Refer to the "Composition and fair value of plan assets" table in Note 27a for more information about fair value of investments in UBS AG and UBS Group AG instruments held by the Swiss pension fund**

The following amounts have been received or paid by UBS AG from and to the post-employment benefit plans located in Switzerland, the UK, the US and Germany in respect of these banking activities and arrangements.

## Note 28 Employee benefits: variable compensation

### a) Plans offered

UBS has several share-based and other deferred compensation plans that align the interests of Group Executive Board (GEB) members and other employees with the interests of investors.

Share-based awards are granted in the form of notional shares and, where permitted, carry a dividend equivalent that may be paid in notional shares or cash. Awards are settled by delivering UBS shares at vesting, except in jurisdictions where this is not permitted for legal or tax reasons.

Deferred compensation awards are generally forfeitable upon, among other circumstances, voluntary termination of employment with UBS. These compensation plans are also designed to meet regulatory requirements and include special provisions for regulated employees.

The most significant deferred compensation plans are described below.

For the majority of variable compensation awards granted under such plans to employees of UBS AG, the grantor entity is UBS Group AG. Expenses associated with these awards are charged by UBS Group AG to UBS AG. For the purpose of this Note, references to shares refer to UBS Group AG shares.

› **Refer to Note 1a item 5 for a description of the accounting policy related to share-based and other deferred compensation plans**

#### Mandatory deferred compensation plans

##### The Long-Term Incentive Plan

The Long-Term Incentive Plan (LTIP) is a mandatory deferred share-based compensation plan for senior leaders of the Group (i.e., GEB members and selected senior management).

The number of notional shares delivered at vesting depends on two equally weighted performance metrics over a three-year performance period: reported return on common equity tier 1 capital and relative total shareholder return, which measures the performance of UBS against an index of Global Systemically Important Banks as determined by the Financial Stability Board. The final number of shares will vest in three equal installments in each of the three years following the performance period for GEB members, and cliff vest in the first year following the performance period for selected senior management.

##### The Equity Ownership Plan

The Equity Ownership Plan (EOP) is a deferred share-based compensation plan for employees who are subject to deferral requirements but do not receive LTIP awards. Vesting under the EOP generally occurs in equal installments two and three years after grant, subject to continued employment and, in certain cases, achievement of defined performance conditions.

Asset Management employees receive some or all of their EOP in the form of cash-settled notional investment funds. The amount delivered depends on the value of the underlying investment funds at the time of vesting.

##### The Deferred Contingent Capital Plan

The Deferred Contingent Capital Plan (DCCP) is a deferred compensation plan for all employees who are subject to deferral requirements. Such employees are awarded notional additional tier 1 (AT1) capital instruments, which, at the discretion of UBS, can be settled as a cash payment or a perpetual, marketable AT1 capital instrument. DCCP awards generally vest in full after five years, unless the award is written down following the occurrence of a viability event (as defined under the terms of an AT1 instrument) or if the Group's CET1 capital ratio falls below a defined threshold. Additional performance conditions apply to GEB members.

Interest payments on DCCP awards are paid at the discretion of UBS. Where interest payments are not permitted, such as for certain regulated employees, the DCCP award reflects the fair value of the granted non-interest-bearing award.

#### Financial advisor variable compensation

In line with market practice for US wealth management businesses, the compensation for US financial advisors in Global Wealth Management predominantly includes production payout and deferred compensation awards. Production payout is primarily based on compensable revenue. Financial advisors may also qualify for deferred compensation awards, which generally vest over a six-year period. These awards are based on strategic performance measures, including production and length of service with UBS. Production payout rates and deferred compensation awards may be reduced for, among other things, errors, negligence or carelessness, or failure to comply with the firm's rules, standards, practices and / or policies, and / or applicable laws and regulations.

Financial advisor compensation also includes expenses related to compensation commitments with financial advisors entered into at the time of recruitment that are subject to vesting requirements.

## Note 28 Employee benefits: variable compensation (continued)

### b) Effect on the income statement

**Effect on the income statement for the financial year and future periods**

The table below provides information about compensation expenses related to total variable compensation, including financial advisor variable compensation, that were recognized in the financial year ended 31 December 2021, as well as expenses that were deferred and will be recognized in the income statement for 2022 and later.

The majority of expenses deferred to 2022 and later that are related to the 2021 performance year pertain to awards granted in February 2022. The total unamortized compensation expense for unvested share-based awards granted up to 31 December 2021 will be recognized in future periods over a weighted average period of 2.5 years.

**Variable compensation including financial advisor variable compensation**

A further USD 54 million in expenses related to share-based compensation was recognized within other expense categories included in Note 6 (salaries: USD 10 million related to role-based allowances; social security: USD 23 million; other personnel expenses: USD 22 million related to the Equity Plus Plan).

## Note 28 Employee benefits: variable compensation (continued)

### c) Outstanding share-based compensation awards

#### Share and performance share awards

Movements in outstanding share-based awards under the EOP during 2021 and 2020 are provided in the table below. The awards presented are granted by UBS AG, but are based on UBS Group AG shares.

**Movements in outstanding share-based compensation awards**

| | Number of shares 2021 | Weighted average grant date fair value (USD) | Number of shares 2020 | Weighted average grant date fair value (USD) |
|---|---|---|---|---|
| Outstanding, at the beginning of the year | 54,557 | 13 | 90,443 | 14 |
| Awarded during the year | 278,756 | 15 | 19,229 | 11 |
| Distributed during the year | (24,176) | 13 | (55,114) | 14 |
| Forfeited during the year | (13,215) | 15 | 0 | 0 |
| Outstanding, at the end of the year | 295,921 | 15 | 54,557 | 13 |
| *of which: shares vested for accounting purposes* | *116,775* | | *53,216* | |

The total carrying amount of the liability related to cash-settled share-based awards as of 31 December 2021 and 31 December 2020 was USD 3 million and USD 1 million, respectively.

### d) Valuation

#### UBS share awards

UBS measures compensation expense based on the average market price of UBS shares on the grant date as quoted on the SIX Swiss Exchange, taking into consideration post-vesting sale and hedge restrictions, non-vesting conditions and market conditions, where applicable. The fair value of the share awards subject to post-vesting sale and hedge restrictions is discounted on the basis of the duration of the post-vesting restriction and is referenced to the cost of purchasing an at-the-money European put option for the term of the transfer restriction. The grant date fair value of notional shares without dividend entitlements also includes a deduction for the present value of future expected dividends to be paid between the grant date and distribution.

## Note 29 Interests in subsidiaries and other entities

### a) Interests in subsidiaries

UBS AG defines its significant subsidiaries as those entities that, either individually or in aggregate, contribute significantly to UBS AG's financial position or results of operations, based on a number of criteria, including the subsidiaries' equity and contribution to UBS AG's total assets and profit or loss before tax, in accordance with the requirements set by IFRS 12, Swiss regulations and the rules of the US Securities and Exchange Commission (the SEC).

#### Individually significant subsidiaries

The table below lists UBS AG's individually significant subsidiaries as of 31 December 2021. Unless otherwise stated, the subsidiaries listed below have share capital consisting solely of ordinary shares held entirely by UBS AG, and the proportion of ownership interest held is equal to the voting rights held by UBS AG.

The country where the respective registered office is located is also the principal place of business. UBS AG operates through a global branch network and a significant proportion of its business activity is conducted outside Switzerland, including in the UK, the US, Singapore, Hong Kong SAR and other countries. UBS Europe SE has branches and offices in a number of EU Member States, including Germany, Italy, Luxembourg and Spain. Share capital is provided in the currency of the legally registered office.

**Individually significant subsidiaries of UBS AG as of 31 December 2021[1]**

| Company | Registered office | Primary business | Share capital in million | | Equity interest accumulated in % |
|---|---|---|---|---|---|
| UBS Americas Holding LLC | Wilmington, Delaware, USA | Group Functions | USD | 4,150.0[2] | 100.0 |
| UBS Americas Inc. | Wilmington, Delaware, USA | Group Functions | USD | 0.0 | 100.0 |

## Consolidated structured entities

Consolidated structured entities (SEs) include certain investment funds, securitization vehicles and client investment vehicles. UBS AG has no individually significant subsidiaries that are SEs.

In 2021 and 2020, UBS AG did not enter into any contractual obligation that could require UBS AG to provide financial support to consolidated SEs. In addition, UBS AG did not provide support, financial or otherwise, to a consolidated SE when UBS AG was not contractually obligated to do so, nor does UBS AG have any intention to do so in the future. Furthermore, UBS AG did not provide support, financial or otherwise, to a previously unconsolidated SE that resulted in UBS AG controlling the SE during the reporting period.

## Note 29 Interests in subsidiaries and other entities (continued)

### b) Interests in associates and joint ventures

As of 31 December 2021 and 2020, no associate or joint venture was individually material to UBS AG. Also, there were no significant restrictions on the ability of associates or joint ventures to transfer funds to UBS AG or its subsidiaries as cash dividends or to repay loans or advances made. There were no quoted market prices for any associates or joint ventures of UBS AG.

**Investments in associates and joint ventures**

| *USD million* | 2021 | 2020 |

1 In the second quarter of 2021, UBS reclassified its minority investment (48.8%) in Clearstream Fund Centre AG (previously Fondcenter AG) of USD 386 million to Properties and other non-current assets held for sale and sold the investment in the same quarter. Refer to Note 30 for more information. 2 For 2021, consists of USD 79 million from associates and USD 26 million from joint ventures. For 2020, consists of USD 64 million from associates and USD 19 million from joint ventures. 3 For 2021, consists of USD 44 million from associates and USD 1 million from joint ventures. For 2020, consists of negative USD 1 million from associates. 4 In 2021, UBS AG's equity interest amounted to 17.31%. UBS AG is represented on the Board of Directors.

## Note 29 Interests in subsidiaries and other entities (continued)

### c) Unconsolidated structured entities

UBS AG is considered to sponsor another entity if, in addition to ongoing involvement with the entity, it had a key role in establishing that entity or in bringing together relevant counterparties for a transaction facilitated by the entity. During 2021, UBS AG sponsored the creation of various SEs and interacted with a number of non-sponsored SEs, including securitization vehicles, client vehicles and certain investment funds, that UBS AG did not consolidate as of 31 December 2021 because it did not control them.

#### Interests in unconsolidated structured entities

The table below presents UBS AG's interests in and maximum exposure to loss from unconsolidated SEs, as well as the total assets held by the SEs in which UBS had an interest as of year-end, except for investment funds sponsored by third parties, for which the carrying amount of UBS AG's interest as of year-end has been disclosed.

#### Sponsored unconsolidated structured entities in which UBS did not have an interest at year-end

During 2021 and 2020, UBS AG did not earn material income from sponsored unconsolidated SEs in which UBS AG did not have an interest at year-end.

During 2021 and 2020, UBS AG and third parties did not transfer any assets into sponsored securitization vehicles created in the year. UBS AG and third parties transferred assets, alongside deposits and debt issuances (which are assets from the perspective of the vehicle), of USD 1 billion and USD 2 billion, respectively, into sponsored client vehicles created in 2021 (2020: USD 0 billion and USD 9 billion, respectively). For sponsored investment funds, transfers arose during the period as investors invested and redeemed positions, thereby changing the overall size of the funds, which, when combined with market movements, resulted in a total closing net asset value of USD 46 billion (31 December 2020: USD 37 billion).

**Interests in unconsolidated structured entities**

| | 31.12.21 | | | | |
|---|---|---|---|---|---|

| Assets held by the unconsolidated structured entities in which UBS AG had an interest (USD billion) | 39[4] | 136[5] | 89[6] | | |

1 For the purpose of this disclosure, maximum exposure to loss amounts do not consider the risk-reducing effects of collateral or other credit enhancements. 2 Represents the carrying amount of loan commitments. The maximum exposure to loss for these instruments is equal to the notional amount. 3 As of 31 December 2021, USD 0.1 billion of the USD 0.6 billion (31 December 2020: USD 0.2 billion of the USD 0.4 billion) was held in Group Functions – Non-core and Legacy Portfolio. 4 Represents the principal amount outstanding. 5 Represents the market value of total assets. 6 Represents the net asset value of the investment funds sponsored by UBS AG and the carrying amount of UBS AG's interests in the investment funds not sponsored by UBS AG. In 2021, UBS AG updated the presentation of this table to remove its interests in unconsolidated structured investment funds and the corresponding total asset information, where UBS AG's interest is driven solely from UBS AG's role as the fund's investment manager and the fees it receives. This information is now separately disclosed in the accompanying text on the following page. Prior-period information has been aligned with this new presentation.

UBS AG retains or purchases interests in unconsolidated SEs in the form of direct investments, financing, guarantees, letters of credit, derivatives, as well as through management contracts. UBS AG's maximum exposure to loss is generally equal to the carrying amount of UBS AG's interest in the SE, with this subject to change over time with market movements. Guarantees, letters of credit and credit derivatives are an exception, with the contract's notional amount, adjusted for losses already incurred, representing the maximum loss that UBS AG is exposed to.

The maximum exposure to loss disclosed in the table on the previous page does not reflect UBS AG's risk management activities, including effects from financial instruments that may be used to economically hedge risks inherent in the unconsolidated SE or risk-reducing effects of collateral or other credit enhancements.

In 2021 and 2020, UBS AG did not provide support, financial or otherwise, to an unconsolidated SE when not contractually obligated to do so, nor does UBS AG have any intention to do so in the future.

In 2021 and 2020, income and expenses from interests in unconsolidated SEs primarily resulted from mark-to-market movements recognized in *Other net income from financial instruments measured at fair value through profit of loss*, which have generally been hedged with other financial instruments, as well as fee and commission income received from UBS-sponsored funds.

### Interests in securitization vehicles

As of 31 December 2021 and 31 December 2020, UBS AG held interests, both retained and acquired, in various securitization vehicles that relate to financing, underwriting, secondary market and derivative trading activities.

The numbers outlined in the table on the previous page may differ from the securitization positions presented in the 31 December 2021 Pillar 3 Report, available under "Pillar 3 disclosures" at *ubs.com/investors*, for the following reasons: (i) exclusion of synthetic securitizations transacted with entities that are not SEs and transactions in which UBS AG did not have an interest because it did not absorb any risk; (ii) a different measurement basis in certain cases (e.g., IFRS carrying amount within the previous table compared with net exposure amount at default for Pillar 3 disclosures); and (iii) different classification of vehicles viewed as sponsored by UBS AG versus sponsored by third parties.

› **Refer to the 31 December 2021 Pillar 3 Report, available under "Pillar 3 disclosures" at *ubs.com/investors*, for more information**

### Interests in client vehicles

Client vehicles are established predominantly for clients to gain exposure to specific assets or risk exposures. Such vehicles may enter into derivative agreements, with UBS or a third party, to align the cash flows of the entity with the investor's intended investment objective, or to introduce other desired risk exposures.

As of 31 December 2021 and 31 December 2020, UBS AG retained interests in client vehicles sponsored by UBS and third parties that relate to financing, secondary market and derivative trading activities, and to hedge structured product offerings.

### Interests in investment funds

Investment funds have a collective investment objective, and are either passively managed, so that any decision making does not have a substantive effect on variability, or are actively managed and investors or their governing bodies do not have substantive voting or similar rights.

UBS AG holds interests in a number of investment funds, primarily resulting from seed investments or in order to hedge structured product offerings. In addition to the interests disclosed in the table on the previous page, UBS AG manages the assets of various pooled investment funds and receives fees based, in whole or part, on the net asset value of the fund and / or the performance of the fund. The specific fee structure is determined based on various market factors and considers the fund's nature and the jurisdiction of incorporation, as well as fee schedules negotiated with clients. These fee contracts represent an interest in the fund, as they align UBS AG's exposure with investors, providing a variable return based on the performance of the entity. Depending on the structure of the fund, these fees may be collected directly from the fund's assets and / or from the investors. Any amounts due are collected on a regular basis and are generally backed by the fund's assets. Therefore interest in such funds is not represented by the on-balance sheet fee receivable but rather by the future exposure to variable fees. The total assets of such funds were USD 425 billion and USD 395 billion as of 31 December 2021 and 31 December 2020, respectively, and have been excluded from the table on the previous page. UBS AG did not have any material exposure to loss from these interests as of 31 December 2021 or as of 31 December 2020.

## Note 30 Changes in organization and acquisitions and disposals of subsidiaries and businesses

### Strategic partnership with Sumitomo Mitsui Trust Holdings

In 2019, UBS AG entered into a strategic wealth management partnership in Japan with Sumitomo Mitsui Trust Holdings, Inc. (SuMi Trust Holdings). In January 2020, the first phase was launched, with operations commencing in the joint venture that was established to promote the respective services. At the time, UBS AG and SuMi Trust Holdings also started offering each other's products and services to their respective clients.

In the third quarter of 2021, the second phase of the partnership was completed, with the launch of a new operational partnership entity, UBS SuMi TRUST Wealth Management Co., Ltd., which is 51%-owned and controlled by UBS AG, requiring UBS AG to consolidate this entity. The new entity offers global securities and wealth management capabilities, together with the custody, real estate, inheritance and wealth transfer expertise of a Japanese trust banking group. Upon completion of this transaction in the third quarter of 2021, shareholders' equity of UBS AG increased by USD 155 million, with no effect on profit or loss.

### Disposals of subsidiaries and businesses

#### Sale of remaining investment in Clearstream Fund Centre AG

In the second quarter of 2021, UBS AG sold its remaining minority investment in Clearstream Fund Centre AG to Deutsche Börse AG for CHF 390 million. The transaction followed the sale of a majority investment and successful transfer of control of Fondcenter AG to Deutsche Börse AG in 2020, when UBS AG recognized a post-tax gain on sale of USD 631 million in *Other income*. The sale of the remaining 48.8% investment resulted in a post-tax gain of USD 37 million in 2021, which was recognized in *Other income*, with no associated net tax expense. Long-term commercial cooperation arrangements remain in place for the provision of services by Clearstream to UBS, including jointly servicing banks and insurance companies.

#### Sale of wealth management business in Austria

In the third quarter of 2021, UBS AG completed the sale of its domestic wealth management business in Austria to LGT. The sale resulted in a pre-tax gain of USD 100 million, which was recognized in *Other income*, and an associated tax expense of USD 25 million.

#### Sale of wealth management business in Spain in 2022

In October 2021, UBS AG signed an agreement to sell its domestic wealth management business in Spain to Singular Bank. The agreement includes the transition of employees, client relationships, products and services of the wealth management business of UBS AG in Spain. The transaction is subject to customary closing conditions and is expected to close in the third quarter of 2022.

As of 31 December 2021, the assets and liabilities of the business were presented in Global Wealth Management as a disposal group held for sale within *Other non-financial assets* and *Other non-financial liabilities* and amounted to USD 647 million and USD 823 million, respectively. Upon the closing of the transaction, UBS AG expects to record a pre-tax gain of approximately USD 0.2 billion.

#### Sale of UBS Swiss Financial Advisers AG in 2022

In December 2021, UBS AG signed an agreement to sell its wholly owned subsidiary UBS Swiss Financial Advisers AG (SFA) to Vontobel. SFA is an SEC-registered investment advisor and FINMA-licensed securities firm that offers US clients tailored investment solutions in a Switzerland-based environment. The transaction is subject to customary closing conditions and regulatory approvals and is expected to close in the third quarter of 2022.

As of 31 December 2021, the assets and liabilities that are subject to the transaction were presented in Global Wealth Management as a disposal group held for sale within *Other non-financial assets* and *Other non-financial liabilities* and amounted to USD 446 million and USD 475 million, respectively. Upon the closing of the transaction, UBS AG does not expect a material effect on profit or loss or shareholders' equity.

### Acquisitions of subsidiaries and businesses in 2022

#### Acquisition of Wealthfront in 2022

In January 2022, UBS AG entered into an agreement to acquire Wealthfront, an industry-leading digital wealth management provider, for a cash consideration of USD 1.4 billion. The acquisition is aligned with UBS's growth strategy in the Americas, will broaden our reach among affluent investors and will add a new digital-first offering increasing our distribution capabilities. The transaction is subject to customary closing conditions, including regulatory approvals, and is expected to close in the second half of 2022. Upon the closing of the transaction, Wealthfront will become a wholly owned subsidiary of UBS AG and UBS AG expects to recognize additional goodwill and other intangible assets of approximately USD 1.2 billion.

## Note 31 Related parties

UBS AG defines related parties as associates (entities that are significantly influenced by UBS), joint ventures (entities in which UBS shares control with another party), post-employment benefit plans for UBS AG employees, key management personnel, close family members of key management personnel and entities that are, directly or indirectly, controlled or jointly controlled by key management personnel or their close family members. Key management personnel is defined as members of the Board of Directors (BoD) and Executive Board (EB).

### a) Remuneration of key management personnel

The Chairman of the BoD has a specific management employment contract and receives pension benefits upon retirement. Total remuneration of the Chairman of the BoD and all EB members is included in the table below.

**Remuneration of key management personnel**

| *USD million, except where indicated* | 31.12.21 | 31.12.20 | 31.12.19 |
|---|---|---|---|
| Base salaries and other cash payments[1] | 30 | 31 | 30 |
| Incentive awards – cash[2] | 17 | 17 | 13 |
| Annual incentive award under DCCP | 26 | 26 | 20 |
| Employer's contributions to retirement benefit plans | 2 | 2 | 2 |
| Benefits in kind, fringe benefits (at market value) | 1 | 1 | 1 |
| Share-based compensation[3] | 45 | 45 | 34 |
| Total | 122 | 122 | 101 |
| Total (CHF million)[4] | 112 | 115 | 101 |

1 May include role-based allowances in line with market practice and regulatory requirements. 2 The cash portion may also include blocked shares in line with regulatory requirements. 3 Compensation expense is based on the share price on grant date taking into account performance conditions. Refer to Note 27 for more information. For EB members, share-based compensation for 2021, 2020 and 2019 was entirely composed of LTIP awards. For the Chairman of the BoD, the share-based compensation for 2021, 2020 and 2019 was entirely composed of UBS shares. 4 Swiss franc amounts disclosed represent the respective US dollar amounts translated at the applicable performance award currency exchange rates (2021: USD / CHF 0.92; 2020: USD / CHF 0.94; 2019: USD / CHF 0.99).

The independent members of the BoD do not have employment or service contracts with UBS AG, and thus are not entitled to benefits upon termination of their service on the BoD. Payments to these individuals for their services as external board members amounted to USD 7.5 million (CHF 6.9 million) in 2021, USD 7.0 million (CHF 6.6 million) in 2020 and USD 7.3 million (CHF 7.3 million) in 2019.

### b) Equity holdings of key management personnel

**Equity holdings of key management personnel[1]**

| | 31.12.21 | 31.12.20 |
|---|---|---|
| Number of shares held by members of the BoD, EB and parties closely linked to them[2] | 4,175,515 | 4,956,640 |

1 No options were held in 2021 and 2020 by non-independent members of the BoD and any GEB member or any of its related parties. 2 Excludes shares granted under variable compensation plans with forfeiture provisions.

Of the share totals above, no shares were held by close family members of key management personnel on 31 December 2021 and 31 December 2020. No shares were held by entities that are directly or indirectly controlled or jointly controlled by key management personnel or their close family members on 31 December 2021 and 31 December 2020. As of 31 December 2021, no member of the BoD or EB was the beneficial owner of more than 1% of UBS Group AG's shares.

**Note 31 Related parties (continued)**

## c) Loans, advances and mortgages to key management personnel

The non-independent members of the BoD and EB members are granted loans, fixed advances and mortgages in the ordinary course of business on substantially the same terms and conditions that are available to other employees, including interest rates and collateral, and neither involve more than the normal risk of collectability nor contain any other unfavorable features for the firm. Independent BoD members are granted loans and mortgages in the ordinary course of business at general market conditions.

Movements in the loan, advances and mortgage balances are as follows.

**Loans, advances and mortgages to key management personnel[1]**

| *USD million, except where indicated* | 2021 | 2020 |
|---|---|---|
| Balance at the beginning of the year | 31 | 23 |
| Additions | 11 | 13 |
| Reductions | (15) | (5) |
| Balance at the end of the year[2] | 28 | 31 |
| Balance at the end of the year (CHF million)[2, 3] | 25 | 28 |

1 All loans are secured loans. 2 There were no unused uncommitted credit facilities as of 31 December 2021 and 31 December 2020. 3 Swiss franc amounts disclosed represent the respective US dollar amounts translated at the relevant year-end closing exchange rate.

## d) Other related-party transactions with entities controlled by key management personnel

In 2021 and 2020, UBS AG did not enter into transactions with entities that are directly or indirectly controlled or jointly controlled by UBS AG's key management personnel or their close family members and as of 31 December 2021, 31 December 2020 and 31 December 2019, there were no outstanding balances related to such transactions. Furthermore, in 2021 and 2020, entities controlled by key management personnel did not sell any goods or provide any services to UBS AG, and therefore did not receive any fees from UBS AG. UBS AG also did not provide services to such entities in 2021 and 2020, and therefore also received no fees.

## Note 31 Related parties (continued)

### e) Transactions with associates and joint ventures

**Loans to and outstanding receivables from associates and joint ventures**

| *USD million* | 2021 | 2020 |

| Foreign currency translation | (14) | 123 |
| Carrying amount at the end of the year | 251 | 630 |
| *of which: unsecured loans and receivables* | *243* | *621* |

**Other transactions with associates and joint ventures**

| | As of or for the year ended | |
|---|---|---|
| *USD million* | 31.12.21 | 31.12.20 |
| Payments to associates and joint ventures for goods and services received | 157 | 139 |
| Fees received for services provided to associates and joint ventures | 104 | 128 |
| Liabilities to associates and joint ventures | 127 | 91 |
| Commitments and contingent liabilities to associates and joint ventures | 7 | 9 |

› **Refer to Note 29 for an overview of investments in associates and joint ventures**

### f) Receivables and payables from / to UBS Group AG and other subsidiaries of UBS Group AG

| *USD million* | 31.12.21 | 31.12.20 |
|---|---|---|
| Receivables | | |
| Loans and advances to customers | 1,049 | 1,470 |
| Financial assets at fair value held for trading | 187 | 76 |
| Other financial assets measured at amortized cost | 45 | 38 |
| Payables | | |
| Customer deposits | 2,828 | 3,324 |
| Funding from UBS Group AG | 57,295 | 53,979 |
| Other financial liabilities measured at amortized cost | 1,887 | 1,820 |
| Other financial liabilities designated at fair value[1] | 2,340 | 1,375 |

1 Represents funding recognized from UBS Group AG that is designated at fair value. Refer to Note 19b for more information.

## Note 32 Invested assets and net new money

The following disclosures provide a breakdown of UBS AG's invested assets and a presentation of their development, including net new money, as required by the Swiss Financial Market Supervisory Authority.

### Invested assets

Invested assets consist of all client assets managed by or deposited with UBS AG for investment purposes. Invested assets include managed fund assets, managed institutional assets, discretionary and advisory wealth management portfolios, fiduciary deposits, time deposits, savings accounts, and wealth management securities or brokerage accounts. All assets held for purely transactional purposes and custody-only assets, including corporate client assets held for cash management and transactional purposes, are excluded from invested assets, as the Group only administers the assets and does not offer advice on how they should be invested. Also excluded are non-bankable assets (e.g., art collections) and deposits from third-party banks for funding or trading purposes.

Discretionary assets are defined as client assets that UBS AG decides how to invest. Other invested assets are those where the client ultimately decides how the assets are invested. When a single product is created in one business division and sold in another, it is counted in both the business division managing the investment and the one distributing it. This results in double counting within UBS AG total invested assets, as both business divisions are independently providing a service to their respective clients, and both add value and generate revenue.

### Net new money

Net new money in a reporting period is the amount of invested assets entrusted to UBS AG by new and existing clients, less those withdrawn by existing clients and clients who terminated relationships with UBS AG.

Net new money is calculated using the direct method, under which inflows and outflows to / from invested assets are determined at the client level, based on transactions. Interest and dividend income from invested assets are not counted as net new money inflows. Market and currency movements, as well as fees, commissions and interest on loans charged, are excluded from net new money, as are effects resulting from any acquisition or divestment of a UBS AG subsidiary or business. Reclassifications between invested assets and custody-only assets as a result of a change in service level delivered are generally treated as net new money flows. However, where the change in service level directly results from an externally imposed regulation or a strategic decision by UBS AG to exit a market or specific service offering, the one-time net effect is reported as *Other effects*.

The Investment Bank does not track invested assets and net new money. However, when a client is transferred from the Investment Bank to another business division, this may produce net new money even though the client assets were already with UBS AG.

**Invested assets and net new money**

| | As of or for the year ended | |
|---|---|---|
| *USD billion* | 31.12.21 | 31.12.20 |
| Fund assets managed by UBS | 419 | 397 |
| Discretionary assets | 1,705 | 1,459 |
| Other invested assets | 2,472 | 2,331 |
| Total invested assets[1] | 4,596 | 4,187 |
| *of which: double counts* | *356* | *311* |
| Net new money[1] | 159 | 127 |

1 Includes double counts.

## Note 33 Currency translation rates

The following table shows the rates of the main currencies used to translate the financial information of UBS AG's operations with a functional currency other than the US dollar into US dollars.

| | Closing exchange rate | | Average rate[1] | | |
|---|---|---|---|---|---|
| | As of | | For the year ended | | |
| | 31.12.21 | 31.12.20 | 31.12.21 | 31.12.20 | 31.12.19 |
| 1 CHF | 1.10 | 1.13 | 1.09 | 1.07 | 1.01 |
| 1 EUR | 1.14 | 1.22 | 1.18 | 1.15 | 1.12 |
| 1 GBP | 1.35 | 1.37 | 1.37 | 1.29 | 1.28 |
| 100 JPY | 0.87 | 0.97 | 0.91 | 0.94 | 0.92 |

1 Monthly income statement items of operations with a functional currency other than the US dollar are translated into US dollars using month-end rates. Disclosed average rates for a year represent an average of 12 month-end rates, weighted according to the income and expense volumes of all operations of UBS AG with the same functional currency for each month. Weighted average rates for individual business divisions may deviate from the weighted average rates for UBS AG.

## Note 34 Events after the reporting period

### Russia's invasion of Ukraine

Russia's invasion of Ukraine on 24 February 2022 has triggered disruptions and uncertainties in the markets and the global economy, as well as coordinated implementation of sanctions by Switzerland, the United States, the European Union, the United Kingdom and others against Russia and, certain Russian entities and nationals. These events, together with potential counter-sanctions and other measures taken by Russia, impact UBS AG's businesses.

UBS AG's country risk exposure to Russia was approximately USD 0.6 billion across its business divisions as of 31 December 2021. This exposure has been reduced since year-end 2021. In addition, UBS AG is currently monitoring settlement risk on certain open transactions with Russian bank- or non-bank counterparties or Russian underlyings, as market closures, the imposition of exchange controls, sanctions or other measures may limit our ability to settle existing transactions or to realize on collateral, which may result in unexpected increases in exposures. UBS AG's balance sheet as of 31 December 2021 also included net assets of USD 51 million held in UBS AG's Russian subsidiary, OOO UBS Bank. As of 3 March 2022, UBS AG also had approximately USD 0.2 billion of exposure arising from reliance on Russian assets as collateral on Lombard lending and other secured financing in Global Wealth Management.

As of 3 March 2022, UBS identified a small number of Global Wealth Management clients subject to the recently introduced sanctions with total loans outstanding of under USD 10 million.

UBS AG continues to closely monitor related effects on its financial statements, including estimated direct and indirect impacts on expected credit loss calculations and on fair value measurement of assets, liabilities and off-balance sheet exposures. The situation continues to evolve and broader implications for other counterparties of UBS AG, including financial institutions, are not possible to assess at this time; however, there were no material adverse effects on UBS AG's financial statements as of 4 March 2022.

## Note 35 Main differences between IFRS and Swiss GAAP

The consolidated financial statements of UBS AG are prepared in accordance with International Financial Reporting Standards (IFRS). The Swiss Financial Market Supervisory Authority (FINMA) requires financial groups presenting financial statements under IFRS to provide a narrative explanation of the main differences between IFRS and Swiss generally accepted accounting principles (GAAP) (the FINMA Accounting Ordinance, FINMA Circular 2020/1 "Accounting – banks" and the Banking Ordinance (the BO)). Included in this Note are the significant differences in the recognition and measurement between IFRS and the provisions of the BO and the guidelines of FINMA governing true and fair view financial statement reporting pursuant to Art. 25 to Art. 42 of the BO.

### 1. Consolidation

Under IFRS, all entities that are controlled by the holding entity are consolidated. Under Swiss GAAP, controlled entities deemed immaterial to the Group or held only temporarily are exempt from consolidation, but instead are recorded as participations accounted for under the equity method of accounting or as financial investments measured at the lower of cost or market value.

### 2. Classification and measurement of financial assets

Under IFRS, debt instruments are measured at amortized cost, fair value through other comprehensive income (FVOCI) or fair value through profit or loss (FVTPL), depending on the nature of the business model within which the asset is held and the characteristics of the contractual cash flows of the asset. Equity instruments are accounted for at FVTPL by UBS AG. Under Swiss GAAP, trading assets and derivatives are measured at FVTPL in line with IFRS. However, non-trading debt instruments are generally measured at amortized cost, even when the assets are managed on a fair value basis. In addition, the measurement of financial assets in the form of securities depends on the nature of the asset: debt instruments not held to maturity, i.e., instruments available for sale, and equity instruments with no permanent holding intent, are classified as *Financial investments* and measured at the lower of (amortized) cost or market value. Market value adjustments up to the original cost amount and realized gains or losses upon disposal of the investment are recorded in the income statement as *Other income from ordinary activities.* Equity instruments with a permanent holding intent are classified as participations in *Non-consolidated investments in subsidiaries and other participations* and are measured at cost less impairment. Impairment losses are recorded in the income statement as *Impairment of investments in non-consolidated subsidiaries and other participations.* Reversals of impairments up to the original cost amount and realized gains or losses upon disposal of the investment are recorded as *Extraordinary income / Extraordinary expenses*.

### 3. Fair value option applied to financial liabilities

Under IFRS, UBS AG applies the fair value option to certain financial liabilities not held for trading. Instruments for which the fair value option is applied are accounted for at FVTPL. The amount of change in the fair value attributable to changes in UBS AG's own credit is presented in *Other comprehensive income* directly within *Retained earnings*. The fair value option is applied primarily to issued structured debt instruments, certain non-structured debt instruments, certain payables under repurchase agreements and cash collateral on securities lending agreements, amounts due under unit-linked investment contracts, and brokerage payables.

Under Swiss GAAP, the fair value option can only be applied to structured debt instruments consisting of a debt host contract and one or more embedded derivatives that do not relate to own equity. Furthermore, unrealized changes in fair value attributable to changes in UBS AG's own credit are not recognized, whereas realized own credit is recognized in *Net trading income*.

### 4. Allowances and provisions for credit losses

Swiss GAAP permit use of IFRS for accounting for allowances and provisions for credit losses based on an expected credit loss (ECL) model. UBS AG has chosen to apply the IFRS 9 ECL approach to the substantial majority of exposures in scope of Swiss GAAP ECL requirements, including all exposures in scope of ECL under both Swiss GAAP and IFRS.

In addition, for a small population of exposures within the scope of Swiss GAAP ECL requirements, which are not subject to ECL under IFRS due to classification and measurements differences, UBS AG applies an alternative approach. Where Pillar 1 internal ratings-based (IRB) models are applied to measure credit risk, ECL for such exposures is determined by the regulatory expected loss (EL), with an add-on for scaling up to the residual maturity of exposures maturing beyond the next 12 months. For detailed information on regulatory EL, refer to the "Risk management and control" section of this report. For exposures where the Pillar 1 standardized approach (SA) is used to measure credit risk, ECL is determined using a portfolio approach that derives a conservative probability of default (PD) and loss given default (LGD) for the entire portfolio.

### 5. Hedge accounting

Under IFRS, when cash flow hedge accounting is applied, the fair value gain or loss on the effective portion of a derivative designated as a cash flow hedge is recognized initially in equity and reclassified to the income statement when certain conditions are met. When fair value hedge accounting is applied, the fair value change of the hedged item attributable to the hedged risk is reflected in the measurement of the hedged item and is recognized in the income statement along with the change in the fair value of the hedging derivative. Under Swiss GAAP, the effective portion of the fair value change of a derivative instrument designated as a cash flow or as a fair value hedge is deferred on the balance sheet as *Other assets* or *Other liabilities*. The carrying amount of the hedged item designated in fair value hedges is not adjusted for fair value changes attributable to the hedged risk.

## 6. Goodwill and intangible assets

Under IFRS, goodwill acquired in a business combination is not amortized but tested annually for impairment. Intangible assets with an indefinite useful life are also not amortized but tested annually for impairment. Under Swiss GAAP, goodwill and intangible assets with indefinite useful lives are amortized over a period not exceeding five years, unless a longer useful life, which may not exceed 10 years, can be justified. In addition, these assets are tested annually for impairment.

## 7. Post-employment benefit plans

Swiss GAAP permit the use of IFRS or Swiss accounting standards for post-employment benefit plans, with the election made on a plan-by-plan basis.

UBS AG has elected to apply IFRS (IAS 19) for the non-Swiss defined benefit plans in the UBS AG standalone financial statements and Swiss GAAP (FER 16) for the Swiss pension plan in the UBS AG and the UBS Switzerland AG standalone financial statements. The requirements of Swiss GAAP are better aligned with the specific nature of Swiss pension plans, which are hybrid in that they combine elements of defined contribution and defined benefit plans, but are treated as defined benefit plans under IFRS. Key differences between Swiss GAAP and IFRS include the treatment of dynamic elements, such as future salary increases and future interest credits on retirement savings, which are not considered under the static method used in accordance with Swiss GAAP. Also, the discount rate used to determine the defined benefit obligation in accordance with IFRS is based on the yield of high-quality corporate bonds of the market in the respective pension plan country. The discount rate used in accordance with Swiss GAAP (i.e., the technical interest rate) is determined by the Pension Foundation Board based on the expected returns of the Board's investment strategy.

For defined benefit plans, IFRS require the full defined benefit obligation net of the plan assets to be recorded on the balance sheet subject to the asset ceiling rules, with changes resulting from remeasurements recognized directly in equity. However, for non-Swiss defined benefit plans for which IFRS accounting is elected, changes due to remeasurements are recognized in the income statement of UBS AG standalone under Swiss GAAP.

Swiss GAAP require employer contributions to the pension fund to be recognized as personnel expenses in the income statement. Swiss GAAP also require an assessment of whether, based on the pension fund's financial statements prepared in accordance with Swiss accounting standards (FER 26), an economic benefit to, or obligation of, the employer arises from the pension fund that is recognized in the balance sheet when conditions are met. Conditions for recording a pension asset or liability would be met if, for example, an employer contribution reserve is available or the employer is required to contribute to the reduction of a pension deficit (on an FER 26 basis).

## 8. Leasing

Under IFRS, a single lease accounting model applies that requires UBS AG to record a right-of-use (RoU) asset and a corresponding lease liability on the balance sheet when UBS AG is a lessee in a lease arrangement. The RoU asset and the lease liability are recognized when UBS AG acquires control of the physical use of the asset. The lease liability is measured based on the present value of the lease payments over the lease term, discounted using UBS AG's unsecured borrowing rate. The RoU asset is recorded at an amount equal to the lease liability but is adjusted for rent prepayments, initial direct costs, any costs to refurbish the leased asset and / or lease incentives received. The RoU asset is depreciated over the shorter of the lease term or the useful life of the underlying asset.

Under Swiss GAAP, leases that transfer substantially all the risks and rewards, but not necessarily legal title in the underlying assets, are classified as finance leases. All other leases are classified as operating leases. Whereas finance leases are recognized on the balance sheet and measured in line with IFRS, operating leases are not recognized on the balance sheet, with payments recognized as *General and administrative expenses* on a straight-line basis over the lease term, which commences with control of the physical use of the asset. Lease incentives are treated as a reduction of rental expense and recognized on a consistent basis over the lease term.

## 9. Netting of derivative assets and liabilities

Under IFRS, derivative assets, derivative liabilities and related cash collateral not settled to market are reported on a gross basis unless the restrictive IFRS netting requirements are met: (i) existence of master netting agreements and related collateral arrangements that are unconditional and legally enforceable, in both the normal course of business and the event of default, bankruptcy or insolvency of UBS AG and its counterparties; and (ii) UBS AG's intention to either settle on a net basis or to realize the asset and settle the liability simultaneously. Under Swiss GAAP, derivative assets, derivative liabilities and related cash collateral not settled to market are generally reported on a net basis, provided the master netting and the related collateral agreements are legally enforceable in the event of default, bankruptcy or insolvency of UBS AG's counterparties.

## 10. Negative interest

Under IFRS, negative interest income arising on a financial asset does not meet the definition of interest income and, therefore, negative interest on financial assets and negative interest on financial liabilities are presented within interest expense and interest income, respectively. Under Swiss GAAP, negative interest on financial assets is presented within interest income and negative interest on financial liabilities is presented within interest expense.

## 11. Extraordinary income and expense

Certain non-recurring and non-operating income and expense items, such as realized gains or losses from the disposal of participations, fixed and intangible assets, and reversals of impairments of participations and fixed assets, are classified as extraordinary items under Swiss GAAP. This distinction is not available under IFRS. ▲

## Note 36 Supplemental guarantor information required under SEC regulations

### Joint liability of UBS Switzerland AG

In 2015, the Personal & Corporate Banking and Wealth Management businesses booked in Switzerland were transferred from UBS AG to UBS Switzerland AG through an asset transfer in accordance with the Swiss Merger Act. Under the terms of the asset transfer agreement, UBS Switzerland AG assumed joint liability for contractual obligations of UBS AG existing on the asset transfer date, including the full and unconditional guarantee of certain registered debt securities issued by UBS AG. To reflect this joint liability, UBS Switzerland AG is presented in a separate column as a subsidiary co-guarantor.

The joint liability of UBS Switzerland AG for contractual obligations of UBS AG decreased in 2021 by USD 4.4 billion to USD 5.7 billion as of 31 December 2021, mainly driven by contractual maturities and, to a lesser extent, early extinguishments of UBS AG liabilities.

1 The financial information disclosed does not represent financial statements under the respective GAAP / IFRS. 2 Refer to the 31 December 2021 Pillar 3 Report, available under "Pillar 3 disclosures" at ubs.com/investors, for more information. 3 Consists of positions that meet the conditions laid down in Art. 72a–b of the Capital Requirements Regulation (CRR) II with regard to contractual, structural or legal subordination. 4 Consists of eligible long-term debt that meets the conditions specified in 12 CFR 252.162 of the final TLAC rules. TLAC is the sum of tier 1 capital and eligible long-term debt. 5 Leverage ratio denominators and going concern leverage ratios for UBS AG standalone and UBS Switzerland AG standalone for 31 December 2020 do not reflect the effects of the temporary exemption that applied from 25 March 2020 until 1 January 2021 and was granted by FINMA in connection with COVID-19. Refer to the "Introduction and basis for preparation" section of the 31 December 2021 Pillar 3 Report. 6 US regulatory authorities temporarily eased the requirements for the supplementary leverage ratio (the SLR), allowing for the exclusion of US Treasury securities and deposits at the Federal Reserve Banks from the SLR denominator through March 2021. This exclusion resulted in an increase in the SLR of 170 bps on 31 December 2020. 7 There was no local disclosure requirement for UBS Americas Holding LLC as of 31 December 2020. 8 In the fourth quarter of 2021, the liquidity coverage ratio (the LCR) of UBS AG was 173%, remaining above the prudential requirements communicated by FINMA. 9 In the fourth quarter of 2021, the LCR of UBS Switzerland AG, which is a Swiss SRB, was 143%, remaining above the prudential requirement communicated by FINMA in connection with the Swiss Emergency Plan. 10 For UBS AG standalone and UBS Switzerland AG standalone, the local disclosure requirement for the net stable funding ratio (the NSFR) came into force in July 2021. For UBS Europe SE consolidated, the local disclosure requirement for the NSFR came into force in June 2021. For UBS Americas Holding LLC consolidated, the NSFR requirement became effective as of 1 July 2021 and related disclosures will come into effect in the second quarter of 2023. 11 In accordance with Art. 17h para. 3 and 4 of the Liquidity Ordinance, UBS AG standalone is required to maintain a minimum NSFR of at least 80% without taking into account excess funding of UBS Switzerland AG and 100% after taking into account such excess funding. 12 Refer to the "Capital, liquidity and funding, and balance sheet" section of this report for more information about the joint and several liability. Under certain circumstances, the Swiss Banking Act and FINMA's Banking Insolvency Ordinance authorize FINMA to modify, extinguish or convert to common equity liabilities of a bank in connection with a resolution or insolvency of such bank.

UBS Group AG is a holding company and conducts substantially all of its operations through UBS AG and subsidiaries thereof. UBS Group AG and UBS AG have contributed a significant portion of their respective capital to, and provide substantial liquidity to, such subsidiaries. Many of these subsidiaries are subject to regulations requiring compliance with minimum capital, liquidity and similar requirements. The table in this section summarizes the regulatory capital components and capital ratios of our significant regulated subsidiaries and sub-groups determined under the regulatory framework of each subsidiary's or sub-group's home jurisdiction.

› **Refer to "Capital and capital ratios of our significant regulated subsidiaries" in the "Capital, liquidity and funding, and balance sheet" section of this report for more information**

› **Refer to "Note 23 Restricted and transferred financial assets" in the "Consolidated financial statements" section of this report for more information.**

Supervisory authorities generally have discretion to impose higher requirements or to otherwise limit the activities of subsidiaries. Supervisory authorities also may require entities to measure capital and leverage ratios on a stressed basis and may limit the ability of an entity to engage in new activities or take capital actions based on the results of those tests.

Effective 1 October 2021, UBS Americas Holding LLC is subject to a stress capital buffer (an SCB) of 7.1%, in addition to minimum capital requirements. The SCB was determined by the Federal Reserve Board following the completion of the Comprehensive Capital Analysis and Review (based on Dodd–Frank Act Stress Test (DFAST) results and planned future dividends). The SCB, which replaces the static capital conservation buffer of 2.5%, is subject to change on an annual basis or as otherwise determined by the Federal Reserve Board.

Standalone regulatory information for UBS AG and UBS Switzerland AG, as well as consolidated regulatory information for UBS Europe SE and UBS Americas Holding LLC, is provided in the 31 December 2021 Pillar 3 Report, available under "Pillar 3 disclosures" at *ubs.com/investors*.

Standalone financial statements for UBS Group AG, as well as standalone financial statements and regulatory information for UBS AG and UBS Switzerland AG, are available under "Holding company and significant regulated subsidiaries and sub-groups" at *ubs.com/investors.*

# UBS Group AG consolidated supplemental disclosures required under SEC regulations

## A – Introduction

The following pages contain supplemental UBS Group AG disclosures that are required under SEC regulations. In September 2020, the SEC issued final rules updating and codifying the disclosure requirements for banking registrants set forth in Industry Guide 3, Statistical Disclosure by Bank Holding Companies. Under the final rules, Industry Guide 3 was rescinded and replaced with a new Subpart 1400 of Regulation S-K, which has come into effect for UBS Group AG's 2021 reporting. Part D of this section provides the information required by Subpart 1400 of Regulation S-K and where applicable, prior-period comparative information has been revised to align with the new requirements.

UBS Group AG's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and are denominated in US dollars (USD), which is also the functional currency of: UBS Group AG; UBS AG's Head Office; UBS AG London Branch; and UBS's US-based operations.

1 Refer to "Share information and earnings per share" in the "Consolidated financial statements" section of this report for more information. 2 Dividends and / or distributions out of the capital contribution reserve are normally approved and paid in the year subsequent to the reporting period. Beginning in 2020, dividends have been declared in US dollars. The Swiss franc equivalent amount for the 2021 dividend will be determined after the Annual General Meeting using the exchange rate applicable on that date and is therefore not provided in this table. 3 Refer to "Statement of proposed appropriation of total profit and dividend distribution out of total profit and capital contribution reserve" in the "Standalone financial statements" section of this report for more information.

## Cash dividends received from investments in subsidiaries

In 2021, UBS Group AG received cash dividends of USD 4,672 million (2020: USD 3,853 million; 2019: USD 3,400 million) from its subsidiaries. Dividends disclosed have been translated to US dollars from the functional currency of the entity paying the dividend, using the closing exchange rate of the month the dividend was received.

# C – Information about the company

## Property, plant and equipment

As of 31 December 2021, UBS operated about 690 business and banking locations worldwide, of which approximately 33% were in Switzerland, 47% in the Americas, 10% in the rest of Europe, Middle East and Africa, and 10% in Asia Pacific. Of the business and banking locations in Switzerland, 30% were owned directly by UBS, with the remainder, along with most of UBS's offices outside Switzerland, being held under commercial leases. These premises are subject to continuous maintenance and upgrading and are considered suitable and adequate for current and anticipated operations.

# D – Information required by Subpart 1400 of Regulation S-K

## Selected statistical information

The following tables set forth select statistical information regarding the Group's banking operations extracted from its financial statements. Unless otherwise indicated, average balances for the years ended 31 December 2021, 31 December 2020 and 31 December 2019 are calculated from monthly data. Unless otherwise indicated, the distinction between domestic (Swiss) and foreign (non-Swiss) is generally based on the booking location.

## Average balances and interest rates

The following table sets forth average interest-earning assets and average interest-bearing liabilities, along with the average yield, for 2021, 2020 and 2019. Refer to "Note 3 Net interest income and other net income from financial instruments measured at fair value through profit or loss" in the "Consolidated financial statements" section of this report for more information about interest income and interest expense.

1 Repurchase agreements are presented on a gross basis and therefore, for the purpose of this disclosure, do not reflect the effect of netting permitted under IFRS. 2 Includes financial liabilities at fair value held for trading, other financial liabilities designated at fair value and brokerage payables designated at fair value. 3 For the purpose of this disclosure, negative interest expense on liabilities is presented as a reduction to interest expense, while in the consolidated income statement negative interest income on liabilities is presented as interest income. Refer to Note 3 in the "Consolidated financial statements" section of this report for more information. 4 Mainly includes derivative financial instruments, equity instruments at fair value held for trading and financial liabilities related to unit-linked investment contracts.

The percentage of total average interest-earning assets attributable to foreign activities was 60% for 2021 (2020: 62%; 2019: 64%). The percentage of total average interest-bearing liabilities attributable to foreign activities was 56% for 2021 (2020: 61%; 2019: 62%). All assets and liabilities are translated into US dollars at uniform month-end rates. Interest income and expense are translated at monthly average rates.

Average rates earned and paid on assets and liabilities can change from period to period based on the changes in interest rates in general, but are also affected by changes in the currency mix included in the assets and liabilities. Tax-exempt income is not recorded on a tax-equivalent basis. For all three years presented, tax-exempt income is considered to be insignificant and the effect from such income is therefore negligible.

## Analysis of changes in interest income and expense

The following tables provide information by categories of interest-earning assets and interest-bearing liabilities on the changes in interest income and expense due to changes in volume and interest rates for the year ended 31 December 2021 compared with the year ended 31 December 2020, and for the year ended 31 December 2020 compared with the year ended 31 December 2019. Volume and rate variances have been calculated on movements in average balances and changes in interest rates. Changes due to a combination of volume and rates have been allocated proportionally.

## Deposits

The following table analyzes average deposits and average rates on each deposit category for the years ended 31 December 2021, 2020 and 2019. For the purpose of this disclosure, foreign deposits represent deposits from depositors who are based outside of Switzerland. Deposits by foreign depositors in domestic offices were USD 77,011 million as of 31 December 2021 (31 December 2020: USD 76,167 million; 31 December 2019: USD 54,251 million).

| | 31.12.21 | | 31.12.20 | | 31.12.19 | |
|---|---|---|---|---|---|---|

| Time deposits | 8,371 | (0.4) | 17,610 | (0.1) | 13,776 | 0.4 |
| Total domestic | 224,502 | (0.1) | 218,008 | (0.1) | 199,456 | 0.0 |
| Foreign[1] | | | | | | |
| Demand deposits | 140,906 | (0.1) | 112,486 | 0.0 | 93,979 | 0.1 |
| Savings deposits | 111,345 | 0.1 | 82,806 | 0.2 | 59,593 | 0.3 |
| Time deposits | 44,507 | 0.1 | 65,104 | 0.5 | 75,554 | 1.9 |
| Total foreign | 296,758 | 0.0 | 260,397 | 0.2 | 229,126 | 0.8 |
| Total customer deposits | 521,260 | 0.0 | 478,404 | 0.1 | 428,582 | 0.4 |

1 For the purpose of this table, the distinction between foreign and domestic deposits is based on the domicile of the depositor, while foreign and domestic deposits disclosed in previous tables are based on the booking location.

## Uninsured deposits

From the combined total of Due to banks and Customer deposits as of 31 December 2021, total estimated uninsured deposits were USD 392 billion (31 December 2020: USD 380 billion; 31 December 2019: USD 318 billion). Uninsured deposits are deposits that are in excess of local deposit insurance or protection scheme limits in the key locations in which UBS operates, calculated based on the respective local regulations, as well as deposits in uninsured accounts. The main deposit insurance schemes applicable to UBS deposits are the Swiss depositor protection scheme in Switzerland (which protects applicable deposits up to a maximum of CHF 100,000 per client and per bank or securities firm), the Compensation Scheme of German Banks, EdB, in combination with the Deposit Protection Fund of the Association of German Banks in Germany (which protects applicable deposits up to a maximum of EUR 597 million per client) and the Federal Deposit Insurance Corporation (the FDIC) scheme in the Americas (which protects applicable deposits up to a maximum of USD 250,000 per depositor, per insured bank, for each account ownership category).

The table below presents the maturity of estimated uninsured time deposits as of 31 December 2021. Where a depositor holds multiple accounts, which in aggregate are in excess of a deposit insurance or protection limit, the insured amount is first allocated to the account with the shortest time to maturity.

| *USD million* | Uninsured time deposits[1] |
|---|---|
| Within 3 months | 44,912 |
| 3 to 6 months | 2,748 |
| 6 to 12 months | 2,437 |
| Over 12 months | 85 |
| Total uninsured time deposits as of 31 December 2021 | 50,182 |

1 Amounts are estimated based on the methodologies defined in each local jurisdiction. As of 31 December 2021, there were no US time deposits subject to the FDIC scheme that were in excess of the FDIC insurance limit.

## Investments in debt instruments

The table below presents the carrying amount and weighted average yield of debt instruments presented within Financial assets measured at fair value through other comprehensive income and Other financial assets measured at amortized cost on the balance sheet by contractual maturity bucket. The yield for each range of maturities is calculated by dividing the annualized interest income by the average balance of the investment per contractual maturity bucket. The maturity information presented does not consider any early redemption features and debt instruments without fixed maturities are not included.

| | Within 1 year | | 1 up to 5 years | | 5 to 10 years | | Over 10 years | | Total carrying amount |
|---|---|---|---|---|---|---|---|---|---|
| *USD million, except where indicated* | Carrying amount | Yield (%) | Carrying amount | Yield (%) | Carrying amount | Yield (%) | Carrying amount | Yield (%) | |

| Total | 223,205 | 105,785 | 49,005 | 22,218 | 400,214 | *119,708* | *57,301* |

## Allowance for credit losses

For the years ended 31 December 2021, 2020 and 2019, the ratio of net charge-offs (i.e., write-offs of expected credit loss allowances to gross carrying amount of the average loans outstanding) during the period was not material for UBS's core loan portfolio, both on an overall basis and on an individual loan category basis. Total write-offs for 31 December 2021 were USD 137 million (31 December 2020: USD 356 million, 31 December 2019: USD 142 million). Refer to the coverage ratio tables in "Note 9 Financial assets at amortized cost and other positions in scope of expected credit loss measurement" in the "Consolidated financial statements" section of this report for the ratio of expected credit loss allowances to total loans outstanding at each period end.

# UBS AG consolidated supplemental disclosures required under SEC regulations

## A – Introduction

The following pages contain supplemental UBS AG disclosures that are required under SEC regulations. In September 2020, the SEC issued final rules updating and codifying the disclosure requirements for banking registrants set forth in Industry Guide 3, Statistical Disclosure by Bank Holding Companies. Under the final rules, Industry Guide 3 was rescinded and replaced with a new Subpart 1400 of Regulation S-K, which has come into effect for UBS AG's 2021 reporting. Part D of this section provides the information required by Subpart 1400 of Regulation S-K and where applicable, prior-period comparative information has been revised to align with the new requirements.

UBS AG's consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and are denominated in US dollars (USD), which is also the functional currency of: UBS AG's Head Office; UBS AG London Branch; and UBS AG's US-based operations.

# C – Information about the company

### Property, plant and equipment

As of 31 December 2021, UBS AG operated about 680 business and banking locations worldwide, of which approximately 33% were in Switzerland, 48% in the Americas, 10% in the rest of Europe, Middle East and Africa, and 9% in Asia Pacific. Of the business and banking locations in Switzerland, 30% were owned directly by UBS AG, with the remainder, along with most of UBS AG's offices outside Switzerland, being held under commercial leases. These premises are subject to continuous maintenance and upgrading and are considered suitable and adequate for current and anticipated operations.

# D – Information required by Subpart 1400 of Regulation S-K

## Selected statistical information

The following tables set forth select statistical information regarding UBS AG's banking operations extracted from its financial statements. Unless otherwise indicated, average balances for the years ended 31 December 2021, 31 December 2020 and 31 December 2019 are calculated from monthly data. Unless otherwise indicated, the distinction between domestic (Swiss) and foreign (non-Swiss) is generally based on the booking location.

## Average balances and interest rates

The following table sets forth average interest-earning assets and average interest-bearing liabilities, along with the average yield, for 2021, 2020 and 2019. Refer to "Note 3 Net interest income and other net income from financial instruments measured at fair value through profit or loss" in the "Consolidated financial statements" section of this report for more information about interest income and interest expense.

1 Repurchase agreements are presented on a gross basis and therefore, for the purpose of this disclosure, do not reflect the effect of netting permitted under IFRS. 2 Includes financial liabilities at fair value held for trading, other financial liabilities designated at fair value and brokerage payables designated at fair value. 3 For the purpose of this disclosure, negative interest expense on liabilities is presented as a reduction to interest expense, while in the consolidated income statement negative interest income on liabilities is presented as interest income. Refer to Note 3 in the "Consolidated financial statements" section of this report for more information. 4 Mainly includes derivative financial instruments, equity instruments at fair value held for trading and financial liabilities related to unit-linked investment contracts.

The percentage of total average interest-earning assets attributable to foreign activities was 60% for 2021 (2020: 62%; 2019: 64%). The percentage of total average interest-bearing liabilities attributable to foreign activities was 56% for 2021 (2020: 61%; 2019: 61%). All assets and liabilities are translated into US dollars at uniform month-end rates. Interest income and expense are translated at monthly average rates.

Average rates earned and paid on assets and liabilities can change from period to period based on the changes in interest rates in general, but are also affected by changes in the currency mix included in the assets and liabilities. Tax-exempt income is not recorded on a tax-equivalent basis. For all three years presented, tax-exempt income is considered to be insignificant and the effect from such income is therefore negligible.

## Analysis of changes in interest income and expense

The following tables provide information by categories of interest-earning assets and interest-bearing liabilities on the changes in interest income and expense due to changes in volume and interest rates for the year ended 31 December 2021 compared with the year ended 31 December 2020, and for the year ended 31 December 2020 compared with the year ended 31 December 2019. Volume and rate variances have been calculated on movements in average balances and changes in interest rates. Changes due to a combination of volume and rates have been allocated proportionally.

## Deposits

The following table analyzes average deposits and average rates on each deposit category for the years ended 31 December 2021, 2020 and 2019. For the purpose of this disclosure, foreign deposits represent deposits from depositors who are based outside of Switzerland. Deposits by foreign depositors in domestic offices were USD 77,070 million as of 31 December 2021 (31 December 2020: USD 76,200 million; 31 December 2019: USD 54,262 million).

| | 31.12.21 | | 31.12.20 | | 31.12.19 | |
|---|---|---|---|---|---|---|
| *USD million, except where indicated* | Average deposits | Average rate (%) | Average deposits | Average rate (%) | Average deposits | Average rate (%) |
| Due to banks | | | | | | |
| Domestic | | | | | | |
| Demand deposits | 927 | (0.5) | 1,037 | (0.4) | 925 | (0.3) |
| Time deposits | 3,026 | 0.0 | 1,775 | 0.4 | 44 | 0.9 |
| Total domestic | 3,953 | (0.1) | 2,812 | 0.1 | 969 | (0.3) |
| Foreign[1] | | | | | | |
| Interest-bearing deposits | 9,313 | (0.1) | 8,454 | 0.1 | 7,740 | 0.1 |
| Total due to banks | 13,266 | (0.1) | 11,266 | 0.1 | 8,709 | 0.1 |
| | | | | | | |
| Customer deposits | | | | | | |
| Domestic | | | | | | |
| Demand deposits | 103,267 | (0.2) | 91,404 | (0.1) | 85,115 | (0.1) |
| Savings deposits | 114,792 | 0.0 | 110,328 | 0.0 | 101,845 | 0.0 |
| Time deposits | 10,306 | (0.2) | 19,256 | 0.0 | 15,064 | 0.3 |
| Total domestic | 228,366 | (0.1) | 220,988 | 0.0 | 202,024 | 0.0 |
| Foreign[1] | | | | | | |
| Demand deposits | 140,975 | (0.1) | 112,499 | 0.0 | 93,988 | 0.1 |
| Savings deposits | 111,345 | 0.1 | 82,806 | 0.2 | 59,593 | 0.3 |
| Time deposits | 44,507 | 0.1 | 65,104 | 0.5 | 75,554 | 1.9 |
| Total foreign | 296,826 | 0.0 | 260,410 | 0.2 | 229,135 | 0.8 |
| Total customer deposits | 525,192 | 0.0 | 481,398 | 0.1 | 431,159 | 0.4 |

1 For the purpose of this table, the distinction between foreign and domestic deposits is based on the domicile of the depositor, while foreign and domestic deposits disclosed in previous tables are based on the booking location.

## Uninsured deposits

From the combined total of Due to banks and Customer deposits as of 31 December 2021, total estimated uninsured deposits were USD 395 billion (31 December 2020: USD 383 billion; 31 December 2019: USD 320 billion). Uninsured deposits are deposits that are in excess of local deposit insurance or protection scheme limits in the key locations in which UBS AG operates, calculated based on the respective local regulations, as well as deposits in uninsured accounts. The main deposit insurance schemes applicable to UBS AG deposits are the Swiss depositor protection scheme in Switzerland (which protects applicable deposits up to a maximum of CHF 100,000 per client and per bank or securities firm), the Compensation Scheme of German Banks, EdB, in combination with the Deposit Protection Fund of the Association of German Banks in Germany (which protects applicable deposits up to a maximum of EUR 597 million per client) and the Federal Deposit Insurance Corporation (the FDIC) scheme in the Americas (which protects applicable deposits up to a maximum of USD 250,000 per depositor, per insured bank, for each account ownership category).

The table below presents the maturity of estimated uninsured time deposits as of 31 December 2021. Where a depositor holds multiple accounts, which in aggregate are in excess of a deposit insurance or protection limit, the insured amount is first allocated to the account with the shortest time to maturity.

| *USD million* | Uninsured time deposits[1] |
|---|---|
| Within 3 months | 46,223 |
| 3 to 6 months | 2,748 |
| 6 to 12 months | 2,437 |
| Over 12 months | 720 |
| Total uninsured time deposits as of 31 December 2021 | 52,128 |

1 Amounts are estimated based on the methodologies defined in each local jurisdiction. As of 31 December 2021, there were no US time deposits subject to the FDIC scheme that were in excess of the FDIC insurance limit.

## Investments in debt instruments

The table below presents the carrying amount and weighted average yield of debt instruments presented within Financial assets measured at fair value through other comprehensive income and Other financial assets measured at amortized cost on the balance sheet by contractual maturity bucket. The yield for each range of maturities is calculated by dividing the annualized interest income by the average balance of the investment per contractual maturity bucket. The maturity information presented does not consider any early redemption features and debt instruments without fixed maturities are not included.

| | Within 1 year | | 1 up to 5 years | | 5 to 10 years | | Over 10 years | | Total carrying amount |
|---|---|---|---|---|---|---|---|---|---|
| *USD million, except where indicated* | Carrying amount | Yield (%) | Carrying amount | Yield (%) | Carrying amount | Yield (%) | Carrying amount | Yield (%) | |
| Debt instruments measured at fair value through other comprehensive income | | | | | | | | | |
| Asset-backed securities | | | | | 1,129 | 1.63 | 3,720 | 1.42 | 4,849 |
| Government bills/bonds | 27 | 1.67 | 416 | 2.40 | 1,998 | 1.20 | 244 | 1.64 | 2,686 |
| Corporate and other | 1,193 | 1.61 | 116 | 2.48 | | | | | 1,310 |
| Subtotal as of 31 December 2021 | 1,220 | | 533 | | 3,127 | | 3,964 | | 8,844 |
| Debt securities measured at amortized cost | | | | | | | | | |
| Asset-backed securities | | | | | | | 2,418 | 2.32 | 2,418 |
| Government bills/bonds | 1,693 | 1.20 | 5,924 | 1.85 | 2,216 | 2.00 | | | 9,833 |
| Corporate and other | 1,025 | 0.77 | 4,264 | 0.30 | 1,318 | 0.33 | | | 6,608 |
| Subtotal as of 31 December 2021 | 2,718 | | 10,189 | | 3,534 | | 2,418 | | 18,858 |
| Total as of 31 December 2021 | 3,939 | | 10,721 | | 6,661 | | 6,382 | | 27,702 |

## Loan portfolio

The table below provides the maturity profile of UBS AG's core loan portfolio as of 31 December 2021. The contractual maturity is based on carrying amounts and includes the effect of callable features. For loans due after one year, a breakdown between fixed and adjustable or floating interest rates is also provided.

| *USD million* | 31.12.21 | | | | | | |
|---|---|---|---|---|---|---|---|
| | Within 1 year | 1 - 5 years | 5 - 15 years | Over 15 years | Total | *of which: over 1 year* | |
| | | | | | | *Fixed rate* | *Adjustable or floating rate* |
| Private clients with mortgages | 30,119 | 66,165 | 34,226 | 21,969 | 152,479 | *78,826* | *43,533* |
| Real estate financing | 20,010 | 15,628 | 8,266 | 41 | 43,945 | *19,057* | *4,878* |
| Large corporate clients | 8,787 | 4,396 | 807 | 1 | 13,990 | *3,879* | *1,325* |
| SME clients | 6,772 | 4,205 | 3,027 | 0 | 14,004 | *3,817* | *3,414* |
| Lombard | 142,261 | 6,733 | 247 | 42 | 149,283 | *6,481* | *540* |
| Credit cards | 1,716 | 0 | 0 | 0 | 1,716 | *0* | *0* |
| Commodity trade finance | 3,809 | 0 | 4 | 0 | 3,813 | *4* | *0* |
| Other loans and advances to customers | 10,293 | 7,679 | 1,393 | 100 | 19,464 | *5,411* | *3,760* |
| Loans to financial advisors | 118 | 1,196 | 1,073 | 66 | 2,453 | *2,335* | *0* |
| Total | 223,884 | 106,002 | 49,042 | 22,218 | 401,146 | *119,811* | *57,450* |

## Allowance for credit losses

For the years ended 31 December 2021, 2020 and 2019, the ratio of net charge-offs (i.e., write-offs of expected credit loss allowances to gross carrying amount of the average loans outstanding) during the period was not material for UBS AG's core loan portfolio, both on an overall basis and on an individual loan category basis. Total write-offs for 31 December 2021 were USD 137 million (31 December 2020: USD 356 million, 31 December 2019: USD 142 million). Refer to the coverage ratio tables in "Note 9 Financial assets at amortized cost and other positions in scope of expected credit loss measurement" in the "Consolidated financial statements" section of this report for the ratio of expected credit loss allowances to total loans outstanding at each period end.

A

# Alternative performance measures

## Alternative performance measures

An alternative performance measure (an APM) is a financial measure of historical or future financial performance, financial position or cash flows other than a financial measure defined or specified in the applicable recognized accounting standards or in other applicable regulations. We report a number of APMs in the discussion of the financial and operating performance of the Group, our business divisions and our Group Functions. We use APMs to provide a more complete picture of our operating performance and to reflect management's view of the fundamental drivers of our business results. A definition of each APM, the method used to calculate it and the information content are presented in alphabetical order in the table below. Our APMs may qualify as non-GAAP measures as defined by US Securities and Exchange Commission (SEC) regulations.

| APM label | Calculation | Information content |
|---|---|---|
| **Active Digital Banking clients in Corporate & Institutional Clients (%) – P&C** | Calculated as the average number of active clients for each month in the relevant period divided by the average number of total clients. "Clients" refers to the number of unique business relationships or legal entities operated by Corporate & Institutional Clients, excluding clients that do not have an account, mono-product clients and clients that have defaulted on loans or credit facilities. At the end of each month, any client that has logged on at least once in that month is determined to be "active" (a log-in time stamp is allocated to all business relationship numbers or per legal entity in a digital banking contract). | This measure provides information about the proportion of active Digital Banking clients in the total number of UBS clients (within the aforementioned meaning) which are serviced by Corporate & Institutional Clients. |
| **Active Digital Banking clients in Personal Banking (%) – P&C** | Calculated as the average number of active clients for each month in the relevant period divided by the average number of total clients. "Clients" refers to the number of unique business relationships operated by Personal Banking, excluding persons under the age of 15, clients who do not have a private account, clients domiciled outside Switzerland and clients who have defaulted on loans or credit facilities. At the end of each month, any client that has logged on at least once in that month is determined to be "active" (a log-in time stamp is allocated to all business relationship numbers in a digital banking contract). | This measure provides information about the proportion of active Digital Banking clients in the total number of UBS clients (within the aforementioned meaning) who are serviced by Personal Banking. |
| **Business volume for Personal Banking (CHF and USD) – P&C** | Calculated as the sum of client assets and loans. | This measure provides information about the volume of client assets and loans. |
| **Client assets (USD and CHF) – P&C** | Calculated as the sum of invested assets and other assets held purely for transactional purposes or custody only. Net new money is not measured for Personal & Corporate Banking. | This measure provides information about the volume of client assets managed by or deposited with UBS for investment purposes, including other assets held purely for transactional purposes or custody only. |
| **Cost / income ratio (%)** | Calculated as operating expenses divided by operating income before credit loss expense or release (annualized as applicable). | This measure provides information about the efficiency of the business by comparing operating expenses with gross income. |
| **Fee-generating assets (USD) – GWM** | Calculated as the sum of discretionary and non-discretionary wealth management portfolios (mandate volume) and assets where generated revenues are predominantly of a recurring nature, i.e., mainly investment and mutual funds, including hedge funds and private markets, where we have a distribution agreement. | This measure provides information about the volume of invested assets that create a revenue stream, whether as a result of the nature of the contractual relationship with clients or through the fee structure of the asset. An increase in the level of fee-generating assets results in an increase in the associated revenue stream. |

| APM label | Calculation | Information content |
|---|---|---|
| **Fee-generating asset margin (bps) – GWM** | Calculated as revenues from fee-generating assets (a portion of which is included in recurring fee income and a portion of which is included in transaction-based income, annualized as applicable) divided by average fee-generating assets for the relevant mandate fee billing period. For the US, fees have been billed on daily balances since the fourth quarter of 2020 and average fee-generating assets are calculated as the average of the monthly average balances. Prior to the fourth quarter 2020, billing was based on prior quarter-end balances, and the average fee-generating assets were thus the prior quarter-end balance. For balances outside of the US, billing is based on prior month-end balances and average fee-generating assets are thus the average of the prior month-end balances. | This measure provides information about the revenues from fee-generating assets in relation to their average volume during the relevant mandate fee billing period. |
| **Gross margin on invested assets (bps) – AM** | Calculated as operating income before credit loss expense or release (annualized as applicable) divided by average invested assets. | This measure provides information about the operating income before credit loss expense or release of the business in relation to invested assets. |
| **Impaired loan portfolio as a percentage of total loan portfolio, gross (%) – GWM, P&C** | Calculated as impaired loan portfolio divided by total gross loan portfolio. | This measure provides information about the proportion of impaired loan portfolio in the total gross loan portfolio. |
| **Invested assets (USD and CHF) – GWM, P&C, AM** | Calculated as the sum of managed fund assets, managed institutional assets, discretionary and advisory wealth management portfolios, fiduciary deposits, time deposits, savings accounts, and wealth management securities or brokerage accounts. | This measure provides information about the volume of client assets managed by or deposited with UBS for investment purposes. |
| **Loan penetration (%) – GWM** | Calculated as loans divided by invested assets. | This measure provides information about loan volume in relation to invested assets. |
| **Mobile Banking log-in share in Personal Banking (%) – P&C** | Calculated as the number of Mobile Banking app log-ins divided by total log-ins via E-Banking and the Mobile Banking app in Personal Banking. If a digital banking contract is linked to multiple business relationships, the log-in is attributed to the business relationship with the most banking products in use. | This measure provides information about the proportion of Mobile Banking app log-ins in the total number of log-ins via E-Banking and the Mobile Banking app in Personal Banking. |
| **Net interest margin (bps) – P&C** | Calculated as net interest income (annualized as applicable) divided by average loans. | This measure provides information about the profitability of the business by calculating the difference between the price charged for lending and the cost of funding, relative to loan value. |
| **Net margin on invested assets (bps) – AM** | Calculated as operating profit before tax (annualized as applicable) divided by average invested assets. | This measure provides information about the operating profit before tax of the business in relation to invested assets. |
| **Net new business volume for Personal Banking (CHF and USD) – P&C** | Calculated as the sum of net inflows and outflows of client assets and loans during a specific period (annualized as applicable). | This measure provides information about the business volume as a result of net new business volume flows during a specific period. |
| **Net new business volume growth for Personal Banking (%) – P&C** | Calculated as the sum of net inflows and outflows of client assets and loans during a specific period (annualized as applicable) divided by total business volume / client assets at the beginning of the period. | This measure provides information about the growth of business volume as a result of net new business volume flows during a specific period. |
| **Net new fee-generating assets (USD) – GWM** | Calculated as the sum of the net amount of fee-generating assets inflows and outflows, including dividend and interest inflows into mandates and outflows from mandate fees paid by clients, during a specific period. | This measure provides information about the development of fee-generating assets during a specific period as a result of net flows and excludes movements due to market performance and foreign exchange translation. |
| **Net new money (USD) – GWM, AM** | Calculated as the sum of the net amount of inflows and outflows of invested assets (as defined in UBS policy) recorded during a specific period. | This measure provides information about the development of invested assets during a specific period as a result of net new money flows and excludes movements due to market performance, foreign exchange translation, dividends, interest and fees. |
| **Net profit growth (%)** | Calculated as the change in net profit attributable to shareholders from continuing operations between current and comparison periods divided by net profit attributable to shareholders from continuing operations of the comparison period. | This measure provides information about profit growth in comparison with the prior period. |

| APM label | Calculation | Information content |
|---|---|---|
| **Pre-tax profit growth (%)** | Calculated as the change in net profit before tax attributable to shareholders from continuing operations between current and comparison periods divided by net profit before tax attributable to shareholders from continuing operations of the comparison period. | This measure provides information about pre-tax profit growth in comparison with the prior period. |
| **Recurring net fee income (USD and CHF) – GWM, P&C** | Calculated as the total of fees for services provided on an ongoing basis, such as portfolio management fees, asset-based investment fund fees and custody fees, which are generated on client assets, and administrative fees for accounts. | This measure provides information about the amount of recurring net fee income. |
| **Return on attributed equity (%)** | Calculated as annualized business division operating profit before tax divided by average attributed equity. | This measure provides information about the profitability of the business divisions in relation to attributed equity. |
| **Return on common equity tier 1 capital (%)** | Calculated as annualized net profit attributable to shareholders divided by average common equity tier 1 capital. | This measure provides information about the profitability of the business in relation to common equity tier 1 capital. |
| **Return on equity (%)** | Calculated as annualized net profit attributable to shareholders divided by average equity attributable to shareholders. | This measure provides information about the profitability of the business in relation to equity. |
| **Return on leverage ratio denominator, gross (%)** | Calculated as annualized operating income before credit loss expense or release divided by average leverage ratio denominator. | This measure provides information about the revenues of the business in relation to leverage ratio denominator. |
| **Return on risk-weighted assets, gross (%)** | Calculated as annualized operating income before credit loss expense or release divided by average risk-weighted assets. | This measure provides information about the revenues of the business in relation to risk-weighted assets. |
| **Return on tangible equity (%)** | Calculated as annualized net profit attributable to shareholders divided by average equity attributable to shareholders less average goodwill and intangible assets. | This measure provides information about the profitability of the business in relation to tangible equity. |
| **Secured loan portfolio as a percentage of total loan portfolio, gross (%) – P&C** | Calculated as secured loan portfolio divided by total gross loan portfolio. | This measure provides information about the proportion of the secured loan portfolio in the total gross loan portfolio. |
| **Tangible book value per share (USD and CHF[1])** | Calculated as equity attributable to shareholders less goodwill and intangible assets divided by the number of shares outstanding. | This measure provides information about tangible net assets on a per-share basis. |
| **Total book value per share (USD and CHF[1])** | Calculated as equity attributable to shareholders divided by the number of shares outstanding. | This measure provides information about net assets on a per-share basis. |
| **Transaction-based income (USD and CHF) – GWM, P&C** | Calculated as the total of the non-recurring portion of net fee and commission income, mainly composed of brokerage and transaction-based investment fund fees, and credit card fees, as well as fees for payment and foreign exchange transactions, together with other net income from financial instruments measured at fair value through profit or loss. | This measure provides information about the amount of the non-recurring portion of net fee and commission income. |

1 Total book value per share and tangible book value per share in Swiss francs are calculated based on a translation of equity under our US dollar presentation currency.

# Information sources

## Reporting publications

### Annual publications

*Annual Report (SAP No. 80531):* Published in English, this single-volume report provides descriptions of: our Group strategy and performance; the strategy and performance of the business divisions and Group Functions; risk, capital and funding, and balance sheet management; corporate governance, corporate responsibility and our compensation framework, including information about compensation for the Board of Directors and the Group Executive Board members; and financial information, including the financial statements.
*Geschäftsbericht (SAP No. 80531):* This publication provides a translation into German of selected sections of our Annual Report.
*Annual Review (SAP No. 80530):* This booklet contains key information about our strategy and performance, with a focus on corporate responsibility at UBS. It is published in English, German, French and Italian.
*Compensation Report (SAP No. 82307):* This report discusses our compensation framework and provides information about compensation for the Board of Directors and the Group Executive Board members. It is available in English and German.

### Quarterly publications

The quarterly financial report provides an update on our strategy and performance for the respective quarter. It is available in English.

### How to order publications

The annual and quarterly publications are available in .pdf format at *ubs.com/investors*, under "Financial information," and printed copies can be requested from UBS free of charge. For annual publications, refer to the "Investor services" section at *ubs.com/investors.* Alternatively, they can be ordered by quoting the SAP number and the language preference, where applicable, from UBS AG, F4UK–AUL, P.O. Box, CH-8098 Zurich, Switzerland.

## Other information

### Website

The "Investor Relations" website at *ubs.com/investors* provides the following information about UBS: news releases; financial information, including results-related filings with the US Securities and Exchange Commission (the SEC); information for shareholders, including UBS share price charts, as well as data and dividend information, and for bondholders; the UBS corporate calendar; and presentations by management for investors and financial analysts. Information is available online in English, with some information also available in German.

### Results presentations

Our quarterly results presentations are webcast live. Playbacks of most presentations can be downloaded from *ubs.com/presentations*.

### Messaging service

Email alerts to news about UBS can be subscribed for under "UBS News Alert" at *ubs.com/global/en/investor-relations/contact/investor-services.html*. Messages are sent in English, German, French or Italian, with an option to select theme preferences for such alerts.

### Form 20-F and other submissions to the US Securities and Exchange Commission

We file periodic reports and submit other information about UBS to the US Securities and Exchange Commission (the SEC). Principal among these filings is the annual report on Form 20-F, filed pursuant to the US Securities Exchange Act of 1934. The filing of Form 20-F is structured as a wrap-around document. Most sections of the filing can be satisfied by referring to the combined UBS Group AG and UBS AG annual report. However, there is a small amount of additional information in Form 20-F that is not presented elsewhere and is particularly targeted at readers in the US. Readers are encouraged to refer to this additional disclosure. Any document that we file with the SEC is available on the SEC's website: *sec.gov*. Refer to *ubs.com/investors* for more information.

**Cautionary Statement Regarding Forward-Looking Statements |** This report contains statements that constitute "forward-looking statements," including but not limited to management's outlook for UBS's financial performance, statements relating to the anticipated effect of transactions and strategic initiatives on UBS's business and future development and goals or intentions to achieve climate, sustainability and other social objectives. While these forward-looking statements represent UBS's judgments, expectations and objectives concerning the matters described, a number of risks, uncertainties and other important factors could cause actual developments and results to differ materially from UBS's expectations. Russia's invasion of Ukraine has led to heightened volatility across global markets and to the coordinated implementation of sanctions on Russia, Russian entities and nationals. Russia's invasion of Ukraine already has caused significant population displacement, and as the conflict continues, the disruption will likely increase. The scale of the conflict and the speed and extent of sanctions, as well as the uncertainty as to how the situation will develop, may have significant adverse effects to the market and macroeconomic conditions, including in ways that cannot be anticipated. This creates significantly greater uncertainty about forward-looking statements. The COVID-19 pandemic and the measures taken to manage it have had and may also continue to have a significant adverse effect on global and regional economic activity, including disruptions to global supply chains, inflationary pressures, and labor market displacements. Factors that may affect our performance and ability to achieve our plans, outlook and other objectives also include, but are not limited to: (i) the degree to which UBS is successful in the ongoing execution of its strategic plans, including its cost reduction and efficiency initiatives and its ability to manage its levels of risk-weighted assets (RWA) and leverage ratio denominator (LRD), liquidity coverage ratio and other financial resources, including changes in RWA assets and liabilities arising from higher market volatility; (ii) the degree to which UBS is successful in implementing changes to its businesses to meet changing market, regulatory and other conditions; (iii) the continuing low or negative interest rate environment in Switzerland and other jurisdictions; (iv) developments in the macroeconomic climate and in the markets in which UBS operates or to which it is exposed, including movements in securities prices or liquidity, credit spreads, and currency exchange rates, and the effects of economic conditions, market developments, and increasing geopolitical tensions, and changes to national trade policies on the financial position or creditworthiness of UBS's clients and counterparties, as well as on client sentiment and levels of activity; (v) changes in the availability of capital and funding, including any changes in UBS's credit spreads and ratings, as well as availability and cost of funding to meet requirements for debt eligible for total loss-absorbing capacity (TLAC); (vi) changes in central bank policies or the implementation of financial legislation and regulation in Switzerland, the US, the UK, the European Union and other financial centers that have imposed, or resulted in, or may do so in the future, more stringent or entity-specific capital, TLAC, leverage ratio, net stable funding ratio, liquidity and funding requirements, heightened operational resilience requirements, incremental tax requirements, additional levies, limitations on permitted activities, constraints on remuneration, constraints on transfers of capital and liquidity and sharing of operational costs across the Group or other measures, and the effect these will or would have on UBS's business activities; (vii) UBS's ability to successfully implement resolvability and related regulatory requirements and the potential need to make further changes to the legal structure or booking model of UBS Group in response to legal and regulatory requirements, or other external developments; (viii) UBS's ability to maintain and improve its systems and controls for complying with sanctions and for the detection and prevention of money laundering to meet evolving regulatory requirements and expectations, in particular in current geopolitical turmoil; (ix) the uncertainty arising from domestic stresses in certain major economies; (x) changes in UBS's competitive position, including whether differences in regulatory capital and other requirements among the major financial centers adversely affect UBS's ability to compete in certain lines of business; (xi) changes in the standards of conduct applicable to our businesses that may result from new regulations or new enforcement of existing standards, including measures to impose new and enhanced duties when interacting with customers and in the execution and handling of customer transactions; (xii) the liability to which UBS may be exposed, or possible constraints or sanctions that regulatory authorities might impose on UBS, due to litigation, contractual claims and regulatory investigations, including the potential for disqualification from certain businesses, potentially large fines or monetary penalties, or the loss of licenses or privileges as a result of regulatory or other governmental sanctions, as well as the effect that litigation, regulatory and similar matters have on the operational risk component of our RWA, as well as the amount of capital available for return to shareholders; (xiii) the effects on UBS's cross-border banking business of sanctions, tax or regulatory developments and of possible changes in UBS's policies and practices relating to this business; (xiv) UBS's ability to retain and attract the employees necessary to generate revenues and to manage, support and control its businesses, which may be affected by competitive factors; (xv) changes in accounting or tax standards or policies, and determinations or interpretations affecting the recognition of gain or loss, the valuation of goodwill, the recognition of deferred tax assets and other matters; (xvi) UBS's ability to implement new technologies and business methods, including digital services and technologies, and ability to successfully compete with both existing and new financial service providers, some of which may not be regulated to the same extent; (xvii) limitations on the effectiveness of UBS's internal processes for risk management, risk control, measurement and modeling, and of financial models generally; (xviii) the occurrence of operational failures, such as fraud, misconduct, unauthorized trading, financial crime, cyberattacks, data leakage and systems failures, the risk of which is increased with cyberattack threats from nation states and while COVID-19 control measures require large portions of the staff of both UBS and its service providers to work remotely; (xix) restrictions on the ability of UBS Group AG to make payments or distributions, including due to restrictions on the ability of its subsidiaries to make loans or distributions, directly or indirectly, or, in the case of financial difficulties, due to the exercise by FINMA or the regulators of UBS's operations in other countries of their broad statutory powers in relation to protective measures, restructuring and liquidation proceedings; (xx) the degree to which changes in regulation, capital or legal structure, financial results or other factors may affect UBS's ability to maintain its stated capital return objective; (xxi) uncertainty over the scope of actions that may be required by UBS, governments and others to achieve goals relating to climate, environmental and social matters, as well as the evolving nature of underlying science and industry and governmental standards; and (xxii) the effect that these or other factors or unanticipated events may have on our reputation and the additional consequences that this may have on our business and performance. The sequence in which the factors above are presented is not indicative of their likelihood of occurrence or the potential magnitude of their consequences. Our business and financial performance could be affected by other factors identified in our past and future filings and reports, including those filed with the SEC. More detailed information about those factors is set forth in documents furnished by UBS and filings made by UBS with the SEC, including UBS's Annual Report on Form 20-F for the year ended 31 December 2021. UBS is not under any obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements, whether as a result of new information, future events, or otherwise.

**Rounding |** Numbers presented throughout this report may not add up precisely to the totals provided in the tables and text. Percentages and percent changes disclosed in text and tables are calculated on the basis of unrounded figures. Absolute changes between reporting periods disclosed in the text, which can be derived from numbers presented in related tables, are calculated on a rounded basis.

**Tables |** Within tables, blank fields generally indicate non-applicability or that presentation of any content would not be meaningful, or that information is not available as of the relevant date or for the relevant period. Zero values generally indicate that the respective figure is zero on an actual or rounded basis. Values that are zero on a rounded basis can be either negative or positive on an actual basis.

# Articles of Association UBS Group AG (UBS Group SA) (UBS Group Inc.)

8 April 2021

The present text is a translation of the original German Articles of Association ("Statuten") which constitute the definitive text and are binding in law.

In these Articles of Association, references to the generic masculine equally apply to both sexes.

# Contents

# Section 1
## Name, registered office, business object and duration of the Corporation

**Article 1**

**Name and registered office**

A corporation limited by shares under the name of UBS Group AG / UBS Group SA / UBS Group Inc. is established with its registered office in Zurich.

**Article 2**

**Purpose**

[1] The purpose of the Corporation is to acquire, hold, manage and sell direct and indirect participations in enterprises of any kind, in particular in the area of banking, financial, advisory, trading and service activities in Switzerland and abroad.
[2] The Corporation may establish enterprises of any kind in Switzerland and abroad, hold equity interests in these enterprises, and conduct their management.
[3] The Corporation is authorized to acquire, mortgage and sell real estate and building rights in Switzerland and abroad.
[4] The Corporation may provide loans, guarantees and other kinds of financing and security for Group companies and borrow and invest money on the money and capital markets.

**Article 3**

**Duration**

The duration of the Corporation shall not be limited by time.

# Section 2
## Share capital

**Article 4**

**Share capital**

[1] The share capital of the Corporation is CHF 370,242,299.50, divided into 3,702,422,995 registered shares with a par value of CHF 0.10 each. The share capital is fully paid up.
[2] Registered shares may be converted into bearer shares and bearer shares into registered shares by resolution of the General Meeting.

**Article 4a**

**Conditional capital**

[1] The share capital may be increased by a maximum of CHF 12,170,583.00 through the issuance of a maximum of 121,705,830 fully paid registered shares with a par value of CHF 0.10 each upon exercise of employee options issued to employees and members of the management and of the Board of Directors of the Corporation and its subsidiaries. The preemptive rights and the advance subscription rights of the shareholders shall be excluded. The
issuance of these options to employees and members of the management and of the Board of Directors of the Corporation and its subsidiaries will take place in accordance with the plan rules issued by the Board of Directors and its compensation committee. The acquisition of shares through the exercise of option rights as well as every subsequent transfer of these shares shall be subject to the registration requirements set forth in Article 5 of the Articles of Association.

[2] The share capital may be increased in an amount not to exceed CHF 38,000,000 by the issuance of up to 380,000,000 fully paid registered shares with a nominal value of CHF 0.10 each through the voluntary or mandatory exercise of conversion rights and/or warrants granted in connection with the issuance of bonds or similar financial instruments by the Corporation or one of its Group companies on national or international capital markets. The pre-emptive rights of the shareholders shall be excluded. The then current owners of conversion rights and/or warrants
shall be entitled to subscribe for the new shares. The conditions of the conversion rights and/or warrants shall be determined by the Board of Directors.
The acquisition of shares through voluntary or mandatory exercise of conversion rights and/or warrants, as well as each subsequent transfer of the shares, shall be subject to the registration requirements set forth in Article 5 of the Articles of Association.
In connection with the issuance of convertible bonds or bonds with warrants or similar financial instruments, the Board of Directors shall be authorized to restrict or exclude the advance subscription rights of shareholders if such instruments are issued (i) on national or international capital markets or (ii) to one or more financial investors. If the advance subscription rights are restricted or excluded by the Board of Directors, the following shall apply: the issuance of such instrument shall be made at prevailing market conditions, and the new shares shall be issued pursuant to the relevant conditions of that financial instrument. Conversion rights may be exercised during a maximum 10-year period, and warrants may be exercised during a maximum 7-year period, in each case from the date of the respective issuance. The issuance of the new shares upon voluntary or mandatory exercise of conversion rights and/or warrants shall be made at conditions taking into account the market price of the shares and/or comparable instruments with a market price at the time of the issuance of the relevant
financial instrument.

## Article 5

**Share register and nominees**

[1] A share register is maintained for the registered shares, in which owners' and usufructuaries' family and given names are entered, with their complete address and nationality (or registered office for legal entities). Shares held in joint accounts may be registered jointly with voting rights, if all registered owners of the shares provide the declaration requested in paragraph 3 below.
[2] If the mailing address of a shareholder changes, the new address must be communicated to the Corporation. As long as this has not been done, all written communications will be sent to the address entered in the share register, this being valid according to the requirements of the law.
[3] Those who acquire registered shares shall be entered in the share register as shareholders with voting rights if they expressly declare that they acquired these registered shares in their own names and for their own account. If the party acquiring the shares is not prepared to provide such a declaration, the Board of Directors may refuse to allow the shares to be entered with voting rights.
[4] The restriction on registration under paragraph 3 above also applies to shares acquired by the exercise of preemptive, option or conversion rights.
[5] The Board of Directors is authorized, after hearing the position of the registered shareholder or nominee affected, to strike the entry of a shareholder with voting rights from the share register retroactively with effect to the date of the entry, if it was obtained under false pretenses. The party affected must be informed of the action immediately.
[6] The Board of Directors formulates general principles relating to the registration of fiduciaries/nominees and issues the necessary regulations to ensure compliance with the above provisions.

## Article 6

**Form of shares**

[1] Registered shares of the Corporation will be, subject to paragraph 2, in the form of uncertificated securities (in the sense of the Swiss Code of Obligations) and intermediary-held securities (in the sense of the Swiss Federal Intermediated Securities Act).

[2] Following his registration in the share register, the shareholder may request the Corporation to issue a written statement in respect of his registered shares at any time; however, he has no entitlement to the printing and delivery of share certificates. In contrast, the Corporation may print and deliver share certificates for registered shares (single certificates, certificates representing multiples of shares or global certificates) at any time. It may withdraw registered shares issued as intermediary-held securities from the respective custody system. With the consent of the shareholder, the Corporation may cancel issued certificates which are returned to it without replacement.

## Article 7

**Exercise of rights**

[1] The Corporation recognizes only one representative per share.

[2] Voting rights and associated rights may only be exercised in relation to the Corporation by a party entered in the share register as having the right to vote.

# Section 3
# Corporate bodies

## A. General Meeting

**Article 8**

**Authority**

The General Meeting is the Corporation's supreme corporate body.

**Article 9**

**Types of General Meetings**
**a. Annual General Meeting**

The Annual General Meeting takes place every year within six months after the close of the financial year; the annual report, the compensation report and the reports of the Auditors must be available for inspection by shareholders at the Corporation's registered office at least twenty days before the meeting.

**Article 10**

**b. Extraordinary General Meetings**

1 Extraordinary General Meetings are convened whenever the Board of Directors or the Auditors consider it necessary.
2 Such a meeting must also be convened upon a resolution of the General Meeting or a written request from one or more shareholders representing together at least one tenth of the share capital, specifying the items to be included on the agenda and the proposals to be put forward.

**Article 11**

**Convening**

1 The General Meeting shall be called by the Board of Directors or, if need be, by the Auditors at least twenty days before the meeting is to take place. The meeting is called by publishing a single notice in the publication of record designated by the Corporation. An invitation will be sent to all registered shareholders.
2 The notice to convene the General Meeting shall specify the agenda with the proposals of the Board of Directors and proposals from shareholders and, in the event of elections, the names of the proposed candidates.

**Article 12**

**Placing of items on the agenda**

[1] Shareholders representing shares with an aggregate par value of CHF 62,500 may submit proposals for matters to be placed on the agenda for consideration by the General Meeting, provided that their proposals are submitted in writing within the deadline published by the Corporation and include the actual motion(s) to be put forward.
[2] No resolutions may be passed concerning matters which have not been duly placed on the agenda, except on a motion put forward at the General Meeting to call an Extraordinary General Meeting or a motion for a special audit to be carried out.

**Article 13**

**Chairmanship, tellers, minutes**

[1] The Chairman of the Board of Directors or, if the Chairman cannot attend, a Vice Chairman or another member designated by the Board of Directors, shall preside over the General Meeting and appoint a secretary and the necessary tellers.
[2] Minutes are kept of the proceedings and must be signed by the presiding chair of the meeting and the secretary.

**Article 14**

**Shareholder proxies**

[1] The Board of Directors issues procedural rules for participation and representation of shareholders at the General Meeting, including the requirements as to powers of attorney.
[2] A shareholder may only be represented at the General Meeting by his legal representative, under a written power of attorney by another shareholder eligible to vote or, under a written or electronic power of attorney, by the Independent Proxy.
[3] The presiding chair of the meeting decides whether to recognize the power of attorney.

**Article 15**

**Independent Proxy**

[1] The Independent Proxy shall be elected by the General Meeting for a term of office expiring after completion of the next Annual General Meeting.
[2] Re-election is permitted.
[3] If the Corporation does not have an Independent Proxy, the Board of Directors shall appoint the Independent Proxy for the next General Meeting.

**Article 16**

**Voting right**

Each share conveys the right to cast one vote.

**Article 17**

**Resolutions, elections**

[1] Resolutions and elections are decided at the General Meeting by an absolute majority of the votes cast, excluding blank and invalid ballots, subject to these Articles of Association and the compulsory provisions of the law.
[2] A resolution to change Article 19 of the Articles of Association, to remove one fourth or more of the members of the Board of Directors or to delete or modify Article 17 paragraph 2 of the Articles of Association must receive at least two thirds of the votes represented.
[3] The presiding chair of the meeting shall decide whether voting on resolutions and elections be conducted electronically, by a show of hands or by a written ballot. Shareholders representing at least 3% of the votes represented may always request that a vote or election take place electronically or by a written ballot.
[4] In the case of a written ballot, the presiding chair of the meeting may rule that only the ballots of those shareholders shall be collected who choose to abstain or to cast a negative vote, and that all other shares represented at the General Meeting at the time of the vote shall be counted in favor, in order to expedite the counting of the votes.
[5] The presiding chair of the meeting may order that a resolution or election be repeated if, in his view, the results of the vote are in doubt. In this case, the preceding resolution or election shall be deemed to have not occurred.

**Article 18**

**Powers**

The General Meeting has the following powers:

a) To establish and amend the Articles of Association
b) To elect the members and the Chairman of the Board of Directors and the members of the compensation committee
c) To elect the Auditors
d) To elect the Independent Proxy
e) To approve the management report and the Group financial statements

f) To approve the financial statements and to decide upon the appropriation of the net profit shown in the balance sheet
g) To approve the compensation for the Board of Directors and the Group Executive Board pursuant to Article 43 of the Articles of Association
h) To give the members of the Board of Directors and of the Group Executive Board a discharge
i) To take decisions on all matters reserved to the General Meeting by law or by the Articles of Association, or which are placed before it by the Board of Directors.

# B. Board of Directors

**Number of Board members**

**Article 19**
The Board of Directors shall consist of at least six and no more than twelve members.

**Term of office**

**Article 20**
[1] The term of office for members of the Board of Directors and its Chairman expires after completion of the next Annual General Meeting.
[2] Members whose term of office has expired are immediately eligible for re-election.

**Organization**

**Article 21**
[1] Except for the election of the Chairman and the members of the compensation committee by the General Meeting, the Board of Directors shall constitute itself. It shall elect at least one Vice Chairman and a Senior Independent Director from among its members.
[2] The Board of Directors shall appoint its secretary, who need not be a member of the Board.
[3] If the office of the Chairman is vacant, the Board of Directors shall appoint a new Chairman from among its members for the remaining term of office.

**Convening, participation**

**Article 22**
[1] The Chairman shall convene the Board of Directors as often as business requires, but at least six times a year.
[2] The Board of Directors shall also be convened if one of its members or the Group Chief Executive Officer submits a written request to the Chairman to hold such a meeting.

**Decisions**

**Article 23**
[1] Decisions of the Board of Directors are taken by an absolute majority of the votes present. In case of a tie, the presiding chair of the meeting shall cast the deciding vote.
[2] The number of members who must be present to constitute a quorum and the modalities for the passing of resolutions shall be laid down by the Board of Directors in the
Organization Regulations. No such quorum is required for decisions confirming and amending resolutions relating to capital increases.

### Article 24

**Duties and powers**

[1] The Board of Directors has ultimate responsibility for the management of the Corporation and the supervision and control of its executive management.
[2] The Board of Directors may also take decisions on all matters which are not expressly reserved to the General Meeting or to another corporate body by law or by the Articles of Association.

### Article 25

**Ultimate responsibility for the management of the Corporation**

The ultimate responsibility for the management of the Corporation comprises in particular:

a) Preparing of and deciding on proposals to be placed before the General Meeting
b) Issuing the regulations necessary for the conduct of business and for the delineation of authority, in particular the Organization Regulations and the regulations governing the Group Internal Audit
c) Laying down the principles for the accounting, financial and risk controls and financial planning, in particular the allocation of equity resources and risk capital for business operations
d) Decisions on Group strategy and other matters reserved to the Board of Directors under the Organization Regulations
e) Appointment and removal of (i) the Group Chief Executive Officer, (ii) such other members of the Group Executive Board as the Organization Regulations require to be appointed by the Board of Directors and (iii) the Head of Group Internal Audit
f) Decisions on increasing the share capital, to the extent this falls within the authority of the Board of Directors (Article 651 paragraph 4 of the Swiss Code of Obligations), on the report concerning an increase in capital (Article 652e of the Swiss Code of Obligations) and on the ascertainment of capital increases and the corresponding amendments to the Articles of Association.

**Article 26**

**Supervision, control**

Supervision and control of the business management comprises in particular the following:

a) Review of the management report, Group and parent company financial statements, the compensation report as well as quarterly financial statements
b) Acceptance of regular reports covering the course of business and the position of the Group, the status and development of country, counterparty and market risks and the extent to which equity and risk capital are tied up due to business operations
c) Consideration of reports prepared by the Auditors.

**Article 27**

**Delegation, Organization Regulations**

The Board of Directors may delegate part of its authority to one or more of its members or to third parties, subject to Articles 25 and 26 of the Articles of Association. The allocation of authority and functions shall be defined in the Organization Regulations.

**Article 28**

**Number of members, term of office and organization of the compensation committee**

1 The compensation committee shall consist of at least three members of the Board of Directors.
2 The compensation committee shall organize itself within the limits of the law and of the Articles of Association. The Board of Directors shall appoint a chairperson.
3 If there are vacancies on the compensation committee, the Board of Directors shall appoint the missing members from among its members for the remaining term of office.

**Article 29**

**Duties and powers of the compensation committee**

1 The compensation committee supports the Board of Directors in establishing and reviewing the Corporation's compensation strategy and guidelines and in articulating the performance criteria relevant for determining individual total compensation for each member of the Group Executive Board. The compensation committee also prepares the proposals to the General Meeting regarding the compensation of the Board of Directors and of the Group Executive Board and may submit proposals to the Board of Directors on
other compensation-related issues.

[2] The Board of Directors shall determine, and codify in the Organization Regulations, for which functions of the Group Executive Board the compensation committee shall establish and review financial and non-financial performance targets and assess the performance against these targets to determine compensation recommendations for the members of the Group Executive Board. In accordance with the Organization Regulations, these recommendations shall be presented to the Board of Directors for review or approval, subject to the approval by the General Meeting as set out in Article 43 of the Articles of Association. The compensation committee shall, in accordance with the Organization Regulations, also submit a proposal for the compensation for the members of the Board of Directors to the Board of Directors, subject to the approval by the General Meeting as set out in Article 43 of the Articles of Association.
[3] The Board of Directors may delegate further tasks to the compensation committee which shall be determined in the Organization Regulations approved by the Board of Directors.

**Article 30**

**Signatures**

The due and valid representation of the Corporation by members of the Board of Directors or further persons shall be determined in the Organization Regulations and a specific directive.

**Article 31**

**Mandates**

[1] No member of the Board of Directors may hold more than four additional mandates in listed companies and five additional mandates in non-listed companies.
[2] The following mandates are not subject to the limitations set forth in paragraph 1:

a) Mandates in companies which are controlled by the Corporation or which control the Corporation
b) Mandates held at the request of the Corporation or companies controlled by it. No member of the Board of Directors shall hold more than ten such mandates

c) Mandates in associations, charitable organizations, foundations, trusts and employee welfare foundations. No member of the Board of Directors shall hold more than ten such mandates.

[3] Mandates shall mean mandates in the supreme governing body of a legal entity which is required to be registered in the commercial register or a comparable foreign register. Mandates in different legal entities which are under joint control are deemed one mandate.

**Article 32**

**Terms of agreements relating to compensation**

The Corporation or companies controlled by it may enter into agreements for a fixed term with members of the Board of Directors relating to their compensation. Duration and termination shall comply with the term of office and the law.

**Article 33**

**Loans**

Loans to the independent members of the Board of Directors shall be made in accordance with the customary business and market conditions. Loans to the non-independent members of the Board of Directors shall be made in the ordinary course of business on substantially the same terms as those granted to employees of the Corporation or companies controlled by it. The total amount of such loans shall not exceed CHF 20,000,000 per member.

# C. Group Executive Board

**Article 34**

**Organization**

The Group Executive Board is composed of the Group Chief Executive Officer and at least three other members as further set forth in the Organization Regulations.

**Article 35**

**Functions, authorities**

[1] The Group Executive Board acting under the leadership of the Group Chief Executive Officer is responsible for the management of the Group. It is the supreme executive body as defined by the Swiss Federal Law on Banks and Savings Banks. It implements the Group strategy decided by the Board of Directors and ensures the execution of the decisions of the Board of Directors. It is responsible for the Group's results.
[2] The responsibilities and authorities of the Group Executive Board and other management units designated by the Board of Directors are set forth in the Organization Regulations.

**Article 36**

**Mandates**

[1] No member of the Group Executive Board may hold more than one additional mandate in a listed company and five additional mandates in non-listed companies, subject to approval by the Board of Directors.
[2] The following mandates are not subject to the limitations set forth in paragraph 1:

a) Mandates in companies which are controlled by the Corporation or which control the Corporation
b) Mandates held at the request of the Corporation or companies controlled by it. No member of the Group Executive Board shall hold more than ten such mandates
c) Mandates in associations, charitable organizations, foundations, trusts and employee welfare foundations. No member of the Group Executive Board shall hold more than eight such mandates.

[3] Mandates shall mean mandates in the supreme governing body of a legal entity which is required to be registered in the commercial register or a comparable foreign register. Mandates in different legal entities which are under joint control are deemed one mandate.

### Article 37

**Employment contract terms**

[1] The term of employment contracts with the members of the Group Executive Board may be unlimited with a notice period of up to twelve months or may be fixed with a term of up to one year.

[2] The Corporation or companies controlled by it may enter into non-compete agreements with the members of the Group Executive Board for the time after termination of the employment agreement for a duration of up to one year. The respective consideration shall not exceed the total compensation paid or granted to such member of the Group Executive Board for the last full financial year prior to termination.

### Article 38

**Loans**

Loans to the members of the Group Executive Board shall be made in the ordinary course of business on substantially the same terms as those granted to employees of the Corporation or companies controlled by it. The total amount of such loans shall not exceed CHF 20,000,000 per member.

# D. Auditors

**Term of office, authority and duties**

**Article 39**

[1] An auditing company subject to governmental supervision as required by law is to be appointed as Auditors.

[2] The General Meeting shall elect the Auditors for a term of office of one year. The rights and duties of the Auditors are determined by the provisions of the law.

[3] The General Meeting may appoint Special Auditors for a term of three years, who provide the attestations required for capital increases.

# Section 4
## Financial statements and appropriation of profit, reserves

**Article 40**

**Financial year**

The financial statements and the Group financial statements are closed on 31 December of each year.

**Article 41**

**Appropriation of disposable profit**

1 At least 5% of the profit for the year is allocated to the general statutory reserve until such time as said reserve amounts to 20% of the share capital.
2 The remaining profit is, subject to the provisions of the Swiss Code of Obligations and of the Swiss Federal Banking Act, at the disposal of the General Meeting who may also use it for the formation of free or special reserves.

**Article 42**

**Reserves**

The General Meeting determines the utilization of the general statutory reserve in accordance with the legal provisions acting upon the proposal of the Board of Directors.

# Section 5
## Compensation of the members of the Board of Directors and the Group Executive Board

**Article 43**

**Approval of the compensation of the Board of Directors and the Group Executive Board**

1 The General Meeting shall approve the proposals of the Board of Directors in relation to:

a) The maximum aggregate amount of compensation of the Board of Directors for the period until the next Annual General Meeting
b) The maximum aggregate amount of fixed compensation of the Group Executive Board for the following financial year
c) The aggregate amount of variable compensation of the Group Executive Board for the preceding financial year.

2 The Board of Directors may submit for approval by the General Meeting deviating or additional proposals relating to the same or different periods.
3 In the event the General Meeting does not approve a proposal of the Board of Directors, the Board of Directors shall determine, taking into account all relevant factors, the respective (maximum) aggregate amount or (maximum) partial amounts and submit the amount(s) so determined for approval by the General Meeting.
4 The Corporation or companies controlled by it may pay or grant compensation prior to approval by the General Meeting, subject to subsequent approval.

**Article 44**

**General compensation principles**

1 The compensation system of the Corporation is designed to align reward with sustainable performance and to support appropriate and controlled risk-taking.
2 When determining individual compensation, the Board of Directors or, where delegated to it, the compensation committee takes into account position and level of responsibility of the recipient and performance of the Corporation and companies controlled by it. It ensures compliance with applicable regulatory requirements.
3 Compensation may be paid or granted in the form of cash, shares, financial instruments or units, in kind, or in the form of benefits. The Board of Directors or, where delegated to it, the compensation committee determines the key features, such as grant, vesting, exercise and forfeiture conditions and applicable harmful acts provisions. The Board of Directors, or where delegated to it, the compensation committee may provide, among other things, for continuation, acceleration or removal of vesting and exercise conditions, for payment or grant of compensation assuming target achievement or for forfeiture in the event of predetermined events such as a change-of-control or termination of an employment or mandate agreement. The Corporation or companies controlled by it may procure any shares required to meet any resulting payment obligations through purchases in the market or, to the extent available, by using the Corporation's conditional share capital.
4 Compensation may be paid or granted by the Corporation or companies controlled by it.

## Article 45

**Compensation of the Board of Directors**

1 Compensation of the members of the Board of Directors shall comprise a base remuneration and may comprise other compensation elements and benefits.
2 Compensation of the members of the Board of Directors is intended to recognize the responsibility and governance nature of their role, to attract and retain qualified individuals and to ensure alignment with shareholders' interest.

## Article 46

**Compensation of the Group Executive Board**

1 Compensation of the members of the Group Executive Board shall comprise fixed and variable compensation elements.
2 Fixed compensation shall comprise the base salary and may comprise other compensation elements and benefits.
3 Variable compensation elements shall be governed by financial and non-financial performance measures that take into account the performance of the Corporation and/or parts thereof, targets in relation to the market, other companies or comparable benchmarks, short- and long-term strategic objectives and/or individual targets. The Board of Directors or, where delegated to it, the compensation committee determines the respective performance measures, the overall and individual performance targets, and their achievements.
4 The Board of Directors or, where delegated to it, the compensation committee aims to ensure alignment with sustainable performance and appropriate risk-taking through adequate deferrals, forfeiture conditions, caps on compensation, harmful acts provisions and similar means with regard to parts of or all of the compensation. Parts of variable compensation shall be subject to a multi-year vesting period.

[5] If the maximum aggregate amount of compensation already approved by the General Meeting is not sufficient to also cover the compensation of a person who becomes a member of or is being promoted within the Group Executive Board after the General Meeting has approved the compensation, the Corporation or companies controlled by it shall be authorized to pay or grant each such Group Executive Board member a supplementary amount during the compensation period(s) already approved. The aggregate pool for such supplementary amounts per compensation period shall not exceed 40% of the average of total annual compensation paid or granted to the Group Executive Board during the previous three years.

# Section 6
## Notices and jurisdiction

### Article 47

**Official publication media**

Public notices appear in the Swiss Official Gazette of Commerce (in French "Feuille Officielle Suisse du Commerce", or German "Schweizerisches Handelsamtsblatt"). The Board of Directors may designate other publications as well.

### Article 48

**Jurisdiction**

Jurisdiction for any disputes arising out of the corporate relationship shall solely be at the registered office of the Corporation.

# Section 7
## Disclosure of contributions in kind

### Article 49

**Contribution in kind**

[1] In connection with the capital increase dated 26 November 2014, the Corporation acquires from UBS AG, Zurich and Basel, acting as contributor in kind and exchange agent in its own name but for account of certain shareholders of UBS AG, Zurich and Basel, who have tendered their shares in the course of the public exchange offer of the Corporation, 3,183,370,731 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 32,718,731,974.95. In return, the Corporation has issued 3,183,370,731 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.

[2] In connection with the capital increase dated 26 November 2014, the Corporation acquires from UBS Securities LLC, 1285 Avenue of the Americas, New York, NY 10019, U.S., acting as contributor in kind and exchange agent in its own name but for account of certain shareholders of UBS AG, Zurich and Basel, who have tendered their shares in the course of the public exchange offer of the Corporation, 201,494,824 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 2,070,966,814.07. In return, the Corporation has issued 201,494,824 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.

[3] In connection with the capital increase dated 26 November 2014, the Corporation acquires from UBS AG, Zurich and Basel, acting as contributor in kind in its own name and in relation to shares tendered during the initial offer period in the course of the public exchange offer of the Corporation, 90,490,886 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 1,533,820,517.70. In return, the Corporation has issued, on a one-to-one basis, 90,490,886 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.

[4] In connection with the capital increase dated 16 December 2014, the Corporation acquires from UBS AG, Zurich and Basel, acting as contributor in kind in its own name but for account of certain shareholders of UBS AG, Zurich and Basel, who (i) have tendered their shares in the course of the public exchange offer of the Corporation or (ii) have offered their registered shares for a private exchange under the terms of this public exchange offer, 229,042,914 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 2,244,527,510.81. In return, the Corporation has issued, on a one-to-one basis, 229,042,914 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.
[5] In connection with the capital increase dated 16 December 2014, the Corporation acquires from UBS Securities LLC, 1285 Avenue of the Americas, New York, NY 10019, U.S., acting as contributor in kind in its own name but for account of certain shareholders of UBS AG, Zurich and Basel, who have tendered their shares in the course of the public exchange offer of the Corporation, 12,510,852 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 122,601,267.19. In return, the Corporation has issued, on a one-to-one basis, 12,510,852 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.
[6] In connection with the capital increase dated 10 February 2015, the Corporation acquires from UBS AG, Zurich and Basel, 11,800,250 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 130,476,501.09. In return, the Corporation has issued 11,800,250 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.
[7] In connection with the capital increase dated 9 March 2015, the Corporation acquires from UBS AG, Zurich and Basel, 9,525,000 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 104,986,854.19. In return, the Corporation has issued, on a one-to-one basis, 9,525,000 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.

[8] In connection with the capital increase dated 12 June 2015, the Corporation acquires from UBS AG, Zurich and Basel, 17,500,000 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 199,898,088.25. In return, the Corporation has issued, on a one-to-one basis, 17,500,000 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.
[9] In connection with the capital increase dated 28 August 2015, the Corporation acquires from UBS AG, Zurich and Basel, 88,825,456 shares of UBS AG, Zurich and Basel, with a par value of CHF 0.10 each and a total value of CHF 968,693,952.29. In return, the Corporation has issued, on a one-to-one basis, 88,825,456 registered shares in the Corporation with a par value of CHF 0.10 each to the contributor in kind.

# Preamble by the Chairman

UBS draws on its more than 150-year heritage to serve private, institutional and corporate clients worldwide, as well as retail clients in Switzerland. Our shareholders, employees, clients and other interest groups hold high expectations of how we conduct our business. Good governance policies and processes are thereby an important foundation and, together with the strong values we have defined, are at the heart of UBS's culture. UBS and its employees apply the highest standards of business ethics and personal integrity to all of our business dealings and interactions.

The Organization Regulations constitute the Group's primary corporate governance guidelines establishing a corporate governance structure for UBS Group AG and its subsidiaries. These Organization Regulations have been approved by the Board of UBS Group AG, they comply with all relevant corporate governance requirements but are not intended in any way to be a substitute for mandatory provisions of law, rules or regulations applicable to the Group.

In the interest of transparency, the Organization Regulations are published on our website.

Axel A. Weber

# Introduction

## 1 Basis and purpose

**1.1 Basis**

These ORs are enacted by the Board of UBS Group AG pursuant to article 716b of the CO and articles 25 and 27 of the AoA.

**1.2 Purpose**

The purpose of these ORs is:
(i) to implement and supplement requirements contained in applicable laws, stock exchange regulations, supervisory regulations and the AoA having regard to pertinent codes of best practice. In addition, these ORs constitute the corporate governance guidelines required by the New York Stock Exchange;
(ii) to define the functions, responsibilities and authorities of UBS Group AG's and the Group's Corporate Bodies and their members; and
(iii) to establish a coherent and efficient corporate governance structure by constituting the Group's primary governance guidelines to be applied to all direct and indirect subsidiaries of UBS Group AG and which supersede any other regulations and shall prevail in case of a conflict with such documents, subject to local law.

Mandatory provisions of applicable laws, rules and regulations or rules contained in the AoA take precedence over the ORs.

## 2 Organization of the Group

**2.1 Organization in general**

The Group and its business are organized as follows:
(i) The Board, under the leadership of the Chairman, has the ultimate responsibility for the direction, supervision and control of the Group, and performs the other duties described herein or as prescribed by mandatory provisions of law. The Board is responsible for deciding all matters and taking business decisions where such decisions exceed the authority delegated by the Board to the Committees, the GEB or the Group CEO.
(ii) As provided by mandatory law, rules and regulations, the AoA or these ORs, the executive management of the Group is delegated to the GEB under the leadership of the Group CEO.
(iii) The following permanent Committees assist the Board in the performance of its responsibilities:
   (a) the Audit Committee;
   (b) the Compensation Committee;
   (c) the Corporate Culture and Responsibility Committee;
   (d) the Governance and Nominating Committee; and
   (e) the Risk Committee.

**2.2 Group steering**

UBS Group AG, as the listed parent company of the Group, controls directly or indirectly all subsidiaries and leads the Group by setting a harmonized strategic direction. It further sets principles and organizational structures to enable efficient and coordinated management of the Group and control of its subsidiaries.

Notwithstanding these endeavors, the legal independence of all subsidiaries, including formal decision-making by the Corporate Bodies of the respective entities as required under applicable constitutional documents, and the provisions of applicable local laws, rules and regulations relating to them, must be observed to the extent legally required.

**2.3 Corporate culture**

Under the leadership of the Chairman and the Group CEO, the Board and the GEB issue a Code of Conduct and Ethics to foster a coherent and effective corporate and compliance culture for the Group.

**2.4 Organization of the Group's business**

The banking business and support operations are performed by UBS Group AG's direct or indirect subsidiaries within the scope of applicable licenses. The business of the Group is organized into:

(i) business divisions;
(ii) Group Functions; and
(iii) other structures as the Group CEO and the GEB consider appropriate for the effective management and supervision of the business.

This organization must be detailed in the Business Regulations.

**2.5 Transparency, collaboration and reporting within the Group**

Subject to and in accordance with applicable local laws, rules and regulations, Corporate Bodies are bound to ensure transparency and collaboration within the Group and may have additional responsibilities and reporting lines within the Group or within other legal entities of the Group.

# Board of Directors

## 3 Membership

**3.1 Election proposal**

In consultation with the Chairman, the GNC recommends candidates for election to the Board. The Board proposes such candidates for election by the shareholders.

**3.2 Independence of Board members**

The Board's proposal for election ensures that three-quarters of the Board members will be independent. For this purpose, independence is determined in accordance with:
(i) the FINMA circular 2017/1 "Corporate governance – banks"; and
(ii) the New York Stock Exchange rules.
Furthermore, there must be a sufficient number of Board members who meet the independence criteria for the Committee members set out in the annex "Charter of the Committees of the Board." The Chairman does not need to be independent.

**3.3 Notification duty**

Each Board member must notify the Chairman and the GNC immediately if circumstances change in a manner that may affect their independence.

**3.4 Expectations of the Board members**

The Board, as a group, must have the necessary qualifications, skills and diversity to perform all Board duties. In particular, the Board must together possess financial literacy, experience in banking and risk management, as well as international experience, including experience of international financial matters, and knowledge of the duties of directors.

Candidates for election to the Board shall be considered in light of their personal experience and abilities, including any specialist knowledge or skills required to fulfill specific Board functions as outlined herein, as well as their ability to contribute to building a complementary and effective Board.

## 4 Constitution

**4.1 Number of members**

The Board consists of six to twelve Board members as per article 19 of the AoA.

**4.2 Term of office**

The term of office for each Board member is one year pursuant to article 20 of the AoA. Subject to election by shareholders, Board members are normally expected to serve for a minimum of three years. No Board member may serve for more than 10 consecutive terms of office, in exceptional circumstances the Board can extend this limit.

**4.3 Constitutional meeting**

The Board constitutes itself at its first meeting following the AGM. In this meeting
(i) the Vice Chairmen;
(ii) the SID;
(iii) the Chairpersons of the Committees; and
(iv) the Committee members, with the exception of the Compensation Committee members,
are appointed by the Board.

The Board may remove these Board members from their special functions at any time.

## 5 Responsibilities and authorities

**5.1 In general**

In addition to mandatory provisions of law, rules, regulations and the AoA, the Board has the responsibilities and authorities set out in these ORs.

**5.2 Supervision**

The Board is responsible for the overall direction, supervision and control of the Group and its management, as well as for supervising compliance with applicable laws, rules and regulations. The Board exercises oversight over UBS Group AG and its subsidiaries and is responsible for ensuring the establishment of a clear Group governance framework to ensure effective steering and supervision of the Group taking into account the material risks to which the Group and its subsidiaries are exposed.

**5.3 Ultimate responsibility**

The Board has ultimate responsibility for the success of the Group and for delivering sustainable shareholder value within a framework of prudent and effective controls. It decides on the Group's strategy and the necessary financial and human resources upon recommendation of the Group CEO and sets the Group's values and standards to ensure that its obligations to shareholders and other stakeholders are met.

**5.4 Strategy and financial success**

The Board's ultimate responsibility for strategy and financial success includes in particular:
(i) deciding the strategy of the Group upon recommendation of the Group CEO, taking into account the proposals and alternatives presented;
(ii) approving the risk management and control framework of the Group, including the overall risk appetite of the Group and BDs;
(iii) deciding whether the Group should enter substantial new business areas or exit an existing business area, in cases where the entry or exit is not covered by the current approved strategic framework; and
(iv) approving major acquisitions, mergers, disposals or capital expenditure, including decisions on major changes to the company and Group structure, major changes in Significant Group Entities, and other projects of strategic importance for the Group.

**5.5 Finance**

With respect to the ultimate responsibility for the financial situation, the Board has in particular the following duties:
(i) approving the applicable accounting standards and financial control frameworks, as well as significant changes to them;
(ii) annually reviewing and approving the three-year strategic plan and one-year operating plan of the Group, including the financial objectives and a capital allocation framework, as well as the capital and liquidity plans;
(iii) annually reviewing and approving the Group ICAAP;
(iv) reviewing and approving the annual financial statements of UBS Group AG; and
(v) reviewing and approving the consolidated annual and quarterly financial statements, as well as the consolidated annual report of the Group prior to its submission to the AGM.

**5.6 Organization**

The Board is responsible for establishing an appropriate business organization, including in particular:
(i) approving and regularly reviewing the governance principles and the management structures as set out herein;
(ii) appointing and removing GEB members, the Group Company Secretary and the Head Group IA and reviewing their performance;
(iii) overseeing the effectiveness of the business organization and management information system implemented by the GEB;
(iv) supervising the internal control system;
(v) approving the charter for Group IA and monitoring Group IA; and
(vi) approving the compensation and benefits principles of the Group.

**5.7 Meetings of shareholders**

The Board has a duty to convene AGMs and EGMs, prepare the agenda for such meetings and implement resolutions adopted by the shareholders.

**5.8 Loss of equity**

In case of financial difficulties or insufficient equity, the Board must undertake all steps required under applicable law.

**5.9 Delegation**

Within the limits of applicable law, regulations and the AoA, the Board may delegate part of its responsibilities and authorities to:
(i) the Committees;
(ii) individual Board members;
(iii) the GEB; and
(iv) individual GEB members.

**5.10 Advice from third parties**

The Board and the Committees may, in performing their duties, take advice from third parties.

# 6 Meetings

**6.1 Number of meetings**

The Board meets as often as business requires, and at least six times a year.

**6.2 Convening meetings**

Board meetings are convened by the Chairman. Upon written request, including reasons, of any Board member or the Group CEO addressed to the Chairman, he shall convene a Board meeting in accordance with sections 6.3 and 6.4.

**6.3 Invitation**

The Chairman or, if absent, one of the Vice Chairmen invites the Board members to the Board meetings in writing (including by e-mail or other electronic means).

**6.4 Agenda and notice period**

The invitation contains the agenda and must be sent to Board members and other attendees as a rule at least five business days prior to the date of the Board meeting together with all necessary supporting material. In exceptional cases, supporting material may be sent later to allow the Board to receive the latest available information. This applies in particular to updates on financial data.

In time-critical cases (as determined at the Chairman's discretion), a Board meeting may be held and the supporting material may be sent at shorter notice.

**6.5 Chair**

Board meetings are chaired by the Chairman or, if absent, by one of the Vice Chairmen or, in their absence, by the SID or, in their absence, by another Board member selected by the Board members present.

**6.6 Attendees**

The Board may hold Board meetings as determined by the Chairman:
(i) with or without the participation of the Group CEO and all or some of the other GEB members; and
(ii) with the participation of other persons, who are invited to attend.

**6.7 Meetings of independent Board members**

At least twice a year, the SID holds a meeting of the independent Board members without the participation of the Chairman.

**6.8 Meeting format**

Board meetings may be held in person or by audio or video conference.

**6.9 Minutes of Board meetings**

The minutes (including the annexes as presented to the Board) contain all Board resolutions made and reflect in a general manner the considerations that led to the decisions made. Dissenting opinions of and votes cast by Board members must also be reflected in the minutes.

**6.10 Form of minutes, inspection rights**

The minutes must be signed by the Board member chairing the meeting (in accordance with section 6.5) and the Group Company Secretary and must be made available for review prior to the next Board meeting at which these shall be approved. Board members are entitled to examine the minutes of any Board meeting at any time.

# 7 Resolutions

**7.1 Quorum of attendance**

The presence of either the Chairman, one of the Vice Chairmen or the SID, as well as the majority of the Board members, is required to pass valid Board resolutions. If this quorum is not present, the Chairman can seek a circular resolution of the Board (see section 7.4). No such quorum is required for decisions confirming, implementing and amending resolutions relating to capital increases (article 23(2) of the AoA).

**7.2 Quorum of resolutions, decisive vote**

Board resolutions are passed by an absolute majority of the votes of Board members present; in case of a tie, the Chairman's vote is decisive (article 23(1) of the AoA).

**7.3 Resolutions on items not on agenda**

If time-critical matters arise after a Board meeting has already been convened, such matters may be discussed at the Board meeting and Board resolutions made if a majority of all Board members present agree. If feasible, a revised agenda will be sent to all Board members prior to the meeting. Absent Board members are informed of the resolution made after the Board meeting.

**7.4 Circular resolutions**

Board resolutions may be passed in writing (including by e-mail or other electronic means) if no material discussions are required, the matter is time-critical or has been prediscussed. A proposal for a circular resolution must be communicated to all Board members and is only deemed to have passed if:
(i) more than two-thirds of all Board members cast a vote or give written notice that they abstain; and
(ii) an absolute majority of all Board members participating in this circular resolution approve the proposed resolution; and
(iii) no Board member requests a Board meeting in relation to the subject matter of the proposed Board resolution within three business days of receiving notice of the proposal.

**7.5 Effect of circular resolutions**

A circular resolution is as binding as a Board resolution adopted at a Board meeting and must be recorded under a separate heading in the Board minutes prepared pursuant to sections 6.9 and 6.10 for the next Board meeting.

# 8 Information rights

**8.1 Right of information**

Board members have the right to access all information concerning the business and the affairs of the Group as may be necessary or helpful for them to fulfill their duties as Board members.

**8.2 Request for information during Board meetings**

At Board meetings, any Board member is entitled to request information on any matter relating to the Group regardless of the agenda, and the Board or GEB members present must provide such information to the best of their knowledge.

**8.3 Request for information outside of Board meetings**

Should a Board member require information or wish to review documents outside a Board meeting, such request must be routed through the Group Company Secretary and addressed to the Chairman.

**8.4 Request for information outside of Committee meetings**

Should a Chairperson require information or wish to review documents outside a Committee meeting, they can, within the range of responsibilities of their Committee, address their request to a member of the GEB directly, to Group IA or to external auditors. The Chairman and the Group CEO must be informed as appropriate.

# 9 Self-assessment

**9.1 Board self-assessment**

At least annually, on the basis of an assessment conducted by the GNC (which includes an appraisal by an external expert at least every three years), the Board reviews its own performance, as well as the performance of each of the Committees. Such a review seeks to determine whether the Board and the Committees function effectively and efficiently.

**9.2 Performance evaluation**

The GNC also arranges a performance evaluation for the Chairman. In light of the annual performance evaluation, the Board must consider whether any changes should be made to the membership of the Board or Committees.

# 10 Chairman

**10.1 Election**

The Board proposes the Chairman who in turn is elected by shareholders at the general meeting.

**10.2 In general**

The Chairman promotes the highest standards of corporate governance for the Group as well as the highest standards of integrity and probity within the Group.

**10.3 Management of the Board and the Board meetings**

The Chairman leads the Board, in this regard he has in particular the following responsibilities:

(i) to call Board meetings and set their agenda;

(ii) to coordinate the tasks within the Board and together with the Chairpersons the work of all Committees;

(iii) to ensure that Board members receive accurate, timely, clear and necessary material and information to enable the Board and its Committees to make sound decisions, monitor the management of the Group effectively and promote the success of the Group;

(iv) to manage the Board, its meetings and resources to ensure its effectiveness by balancing the time allocated to its strategic and supervisory functions, as well as ensuring sufficient time is allowed for discussion of complex or contentious matters and arranging, if necessary, informal meetings among Board members;

(v) to encourage active engagement by all Board members in all matters concerning the Board;

(vi) to ensure that Board resolutions are accurate in form and content and that they are implemented properly;

(vii) to build, together with the GNC, an effective and highly complementary Board with an appropriate balance of skills and experience, and to initiate changes in and planning Board succession and appointments;

(viii) to ensure the operation of a clear Committee structure;

(ix) to provide guidance to other Board members about what is expected of them and take into full account their issues and concerns; and

(x) to consider and address, together with the GNC, the development needs of individual Board members and the Board as a whole to ensure the necessary depth and breadth of knowledge and experience and to enhance the effectiveness and efficiency of the Board as a team through the establishment of an induction program for new Board members and a satisfactory ongoing training and education program for existing Board members, and organize, together with the GEB members, an annual seminar on the Group’s strategy.

| | | |
|---|---|---|
| **10.4** | **Shareholders' meetings** | The Chairman ensures that the Board convenes the AGMs and EGMs and that it prepares, and decides on, proposals to be made to the shareholders. In accordance with article 13 of the AoA, the Chairman presides over the AGMs and EGMs and ensures that the Board implements resolutions adopted at the AGMs and EGMs insofar as permitted by law. |
| **10.5** | **External communication** | The Chairman, together with the Group CEO, undertakes responsibility for UBS's reputation, is further closely involved in and responsible for ensuring effective communication with shareholders and stakeholders, including government officials, regulators and public organizations. The Chairman maintains close contact with the Group's principal regulators.<br><br>The Chairman is the primary representative of the Board and, together with the Group CEO, of the Group with the media. Other Board members may only discuss Group matters with the media with the approval of the Chairman. The SID ensures communication with those shareholders who wish to conduct discussions with an independent Board member. |
| **10.6** | **Relationship with Board and GEB** | The Chairman establishes and maintains close and constructive working relationships with and promotes open communication between the Board and the Group CEO and the other GEB members, providing advice and support to them while respecting that executive management responsibility is delegated to the GEB. Where appropriate, the Chairman ensures effective challenge of the Group CEO and the GEB by the Board and the Committees and fosters ongoing and effective monitoring of performance. |
| **10.7** | **Further responsibilities and authorities** | Further details of the responsibilities and authorities delegated to the Chairman are set out in the annexes to these ORs. |

## 11 Vice Chairmen and Senior Independent Director

| | | |
|---|---|---|
| **11.1** | **Appointment** | The Board appoints one or more Vice Chairmen and a SID. Both offices may be held by the same person. If the Board appoints more than one Vice Chairman, one of them must be independent. The Vice Chairmen support the Chairman with the responsibilities and authorities outlined herein. |
| **11.2** | **Responsibilities and authorities of each Vice Chairman** | Each of the Vice Chairmen is required to:<br>(i) lead the Board in the absence of the Chairman;<br>(ii) provide support and advice to the Chairman; and<br>(iii) undertake such specific additional duties or functions as the Board may entrust to him from time to time. |
| **11.3** | **Responsibilities and authorities of the SID** | The SID is required to:<br>(i) create an appropriate information flow and communication system among the independent Board members;<br>(ii) collect and relay any issues or concerns of independent Board members to the Chairman;<br>(iii) handle communication on behalf of the independent Board members and facilitate communication, where appropriate, between shareholders and independent Board members; and<br>(iv) be available to act as a point of contact for shareholders and stakeholders who wish to conduct discussions with an independent Board member, including with concerns that have not been resolved or are not raised through the normal channels.<br>Further responsibilities and authorities of the SID follow from sections 6.7, 10.5 and 15.9. |

## 12 Group Company Secretary

| | | |
|---|---|---|
| **12.1** | **Appointment and function** | At the constitutional meeting of the Board, the Board appoints a Group Company Secretary, who acts as secretary to the Board and its Committees. |
| **12.2** | **Responsibilities and authorities** | The Group Company Secretary prepares the agenda for each Board meeting, keeps the Board minutes and the Committees' minutes, and assists the Board and its members in coordinating and fulfilling their duties. In accordance with section 8.3, the Group Company Secretary coordinates requests for information from the members of the Board outside of Board meetings and informs the Group CEO of such requests as appropriate. |
| **12.3** | **Staff and reporting** | The Group Company Secretary manages the staff supporting the Board and its Committees and reports to the Chairman. |
| **12.4** | **Official documents** | The Group Company Secretary is responsible for keeping UBS Group AG's official |

company documents and records including their certification.

## 13 Board Committees

| | | |
|---|---|---|
| **13.1** | **Permanent and other Committees** | The Board establishes the AC, the Compensation Committee, the CCRC, the GNC and the RC as permanent Committees. The Board may set up other Committees, including ad hoc Committees, if deemed appropriate or necessary. |
| **13.2** | **Appointment and election** | From among its members, the Board appoints the Committee members and the respective Chairpersons. The Compensation Committee members are proposed by the Board and in turn elected by shareholders at the general meeting. |
| **13.3** | **Responsibilities and authorities** | Based on articles 25 and 27 of the AoA, the Board delegates certain responsibilities and authorities to the Committees pursuant to the annexes to these ORs. The overall responsibility for such delegated competences remains with the Board. |

# Group Executive Board

## 14 Delegation

**14.1 Delegation of management**

The Board delegates the executive management of the Group as set out in section 2.1(ii).

**14.2 Further delegation by the GEB**

The Group CEO and the GEB may further delegate certain responsibilities and authorities within the Group and may empower further delegation of such responsibilities and authorities. Such delegations must be in writing, and clear rules on responsibilities, authorities and accountabilities must be established. Specific responsibilities and authorities delegated by the GEB to a committee of the GEB will be set forth in a resolution adopted or a charter approved by the GEB.

**14.3 Time-critical matters**

The GEB will establish arrangements to ensure that decisions are made in a time-critical business matter, should the responsible GEB member be unable to act.

## 15 Group Executive Board

**15.1 Composition and appointment**

Under the leadership of the Group CEO, the GEB is comprised of the members detailed in sections 16 to 23 of these ORs and such further GEB members as appointed by the Board upon proposal of the Group CEO.

**15.2 Responsibilities and authorities**

Under the leadership of the Group CEO, the GEB has executive management responsibility for the steering of the Group and its business. It develops the strategies for the Group, the BDs and GF, and implements the Board-approved strategies. The GEB develops, implements and maintains an appropriate and adequate business organization designed to ensure compliance with applicable laws and regulations and an appropriate management information system.

**15.3 GEB as risk council**

The GEB acts as the risk council of the Group. It has overall responsibility for establishing and implementing risk management and control in the Group. It manages the risk profile of the Group as a whole as determined by the Board and the RC and manages the Group's reputation. The GEB determines its requirements for risk reporting, including improvements and changes to the reports, and receives periodic updates on risk data limitations.

**15.4 Preparation of Board decisions**

Where proposals for decisions must be made to the Board, the GEB prepares such proposals and supports the Board in its decision-making process.

**15.5 Group ALCO as a committee of the GEB**

The GEB is responsible for managing the Group's assets and liabilities in line with the Group strategy, risk appetite, regulatory commitments and interests of shareholders and other stakeholders. For this purpose, the GEB has established the Group ALCO pursuant to section 14.2. Further details, specific responsibilities and authorities delegated by the GEB to the Group ALCO are set forth in its terms of reference.

**15.6 Further duties**

The GEB is furthermore responsible for all management matters not reserved under the AoA or the ORs to any other person or Corporate Body.

**15.7 Meetings, agenda and notice period**

The GEB meets at least once every month or as appropriate. The agenda must be sent to the GEB members at least five calendar days prior to the date of the GEB meeting together with all necessary supporting material. In time-critical cases, a GEB meeting (called by the Group CEO as required or at the request of one GEB member addressed to the Group CEO) may be held and the supporting material may be sent on shorter notice. GEB meetings are chaired by the Group CEO or, if absent, by the nominated deputy CEO. GEB meetings may be held in person or by audio or video conference.

**15.8 Quorum of attendance**

The presence, either in person or by audio or video conference, of a majority of the GEB members is required to pass valid GEB resolutions.

**15.9 Quorum of resolutions**

The resolutions of the GEB are passed by the majority of the votes of the GEB members present. The Group CEO has the power to overrule any GEB resolution. If the Group CEO exercises this power, he must inform the Chairman and the SID as well as the GEB immediately.

**15.10 Minutes of GEB meetings**

Minutes are taken of all GEB meetings. They contain all resolutions made by the GEB. The minutes are sent to all GEB members and to the Chairman. Board members may inspect the GEB minutes in accordance with section 8. Section 6.10 applies mutatis mutandis to the GEB minutes.

**15.11 Circular resolutions**

With respect to circular resolutions of the GEB, sections 7.4 and 7.5 apply mutatis mutandis.

**15.12 Matters requiring immediate attention**

With regard to matters which require immediate attention, and if it is not feasible to convene an audio or video conference or to proceed by circular resolution within the time available, the Group CEO may, together with two other GEB members, make decisions, which have the effect of GEB resolutions. GEB members who could not be reached in time must be informed together with the Chairman as soon as possible. Section 7.5 applies mutatis mutandis to such resolutions.

**15.13 Assessment**

At least annually, the Group CEO assesses the performance of the GEB. Such a review seeks to determine whether the GEB functions effectively and efficiently. In light of the annual assessment, the Group CEO must consider whether any changes should be made to the composition of the GEB.

**15.14 Further duties of GEB members**

In addition to the responsibilities for each GEB member set out below, further details of the responsibilities and key authorities delegated to the GEB members are set out in the annexes to these ORs and the relevant Business Regulations or terms of reference.

## 16 Group Chief Executive Officer

**16.1 Appointment**

The Group CEO is appointed by the Board upon proposal of the Chairman and the GNC.

**16.2 Function, substitution**

The Group CEO is the highest executive officer of the Group and has responsibility and accountability for the management and performance of the Group. The Group CEO nominates a deputy CEO from within the GEB, who is confirmed by the Board. The deputy CEO shall temporarily exercise all responsibilities and authorities if the Group CEO should be incapacitated or unavailable to exercise the function as Group CEO.

**16.3 Main responsibilities and authorities**

The Group CEO sets the business and corporate agenda, ensures sound and timely decision-making and controls the implementation of decisions made. The Group CEO is in particular responsible for the following:

(i) ensuring the GEB fulfills its tasks and assumes its responsibilities;
(ii) ensuring alignment of the individual GEB members to the business and corporate agenda;
(iii) planning succession at GEB level;
(iv) supporting and advising senior management, as well as fostering an integrated entrepreneurial leadership spirit across the Group;
(v) assuming a leading role in preparation of strategy, risk, compensation and governance principles for the Board's consideration; and
(vi) together with the Chairman, undertaking responsibility for UBS's reputation and ensuring effective communications with shareholders and stakeholders (see also section 10.5).

**16.4 Further responsibilities and duties**

In addition to the responsibilities outlined in section 16.3, the Group CEO has responsibility for management and control of the Group CEO Functions.

**16.5 Right to overrule decisions**

The Group CEO has an all-encompassing right to information about and examination of all matters handled in the business. He has the power to overrule any decisions made by any management body, including any resolution by the GEB (see section 15.9).

**16.6 Reporting to the Board**

The Group CEO ensures that the Chairman and the Board are kept informed in a timely and appropriate manner on all matters falling within the scope of their responsibilities, as well as important business developments, issues or decisions taken by the GEB in particular with regard to matters which may have a material financial, operational or reputational impact on the Group.

Further, the Group CEO (either personally or through any other GEB member) regularly informs the Board on:
(i) key performance indicators and other relevant financial data of the Group;
(ii) existing and emerging risks, issues and mitigating measures;
(iii) updates on developments in important markets and on peers; and
(iv) information on all issues which may affect the supervisory or control function of the Board.

**16.7 Reporting by GEB members**

Each member of the GEB detailed in sections 17 to 23 below reports directly to the Group CEO and shall inform the Group CEO or GEB as appropriate of material matters and key developments within the scope of their responsibilities. The Group Functional Heads have an obligation to advise the Chairman and relevant Committees on significant issues arising in the field of their responsibilities.

# 17 Group Chief Financial Officer

**17.1 Responsibilities and authorities**

The Group CFO has in particular the following responsibilities:
(i) managing the Group's financial accounting, controlling, forecasting, planning and reporting processes;
(ii) ensuring transparency in and assessing the financial performance of the Group and the BDs;
(iii) developing the Group's inorganic strategy in collaboration with the GEB and supporting GEB members in mergers and acquisitions, as well as equity investment topics, by monitoring the progress of key inorganic growth initiatives;
(iv) managing and controlling the Group's tax affairs, treasury and capital management, including funding and liquidity risk, and regulatory capital ratios;
(v) ensuring asset and liability management by balancing consumption of the Group's financial resources;
(vi) consulting with the AC to make proposals to the Board regarding the standards for accounting to be adopted by UBS Group AG and the Group and defining the standards for financial reporting and disclosure;
(vii) managing relations with analysts and investors in coordination with the Group CEO;
(viii) under the supervision of the AC, coordinating the working relationships with the external auditors; and
(ix) managing the function "Group Finance".

# 18 Group Chief Digital and Information Officer

**18.1 Responsibilities and authorities**

The Group CDIO has in particular the following responsibilities:
(i) formulating the approach, objectives, financial and execution plans for the Group CDIO area in support of the BDs and GF;
(ii) driving Group-wide digitalization, delivering IT services, tools and infrastructure, including cyber protection and IT security, in line with the needs of the BDs and GF;
(iii) overseeing the prioritization of the technology enabled change initiatives;
(iv) directing and governing all IT development and engineering management activities;
(v) supplying real estate infrastructure and general administrative services to the Group;
(vi) directing and controlling all supply and demand management activities, supporting the Group with its third-party risk and sourcing strategies and managing the Group's near-/offshore, outsourcing and supplier-related processes;
(vii) delivering shared operational services, maintaining and overseeing the Group's crisis management operations and providing Group-wide data governance; and
(viii) managing the function "Group CDIO".

## 19 Group Chief Risk Officer

**19.1 Responsibilities and authorities**

The Group CRO has in particular the following responsibilities:

(i) the development of the Group's risk management and control framework (including risk principles and risk appetite) for the credit, market, country, liquidity, funding, model, and environmental and social risk categories, as well as the implementation of independent control frameworks for these risk categories, on the basis of and in accordance with the framework approved by the Board, including:
   (a) risk measurement, aggregation, portfolio controls and risk reporting; and
   (b) taking decisions on transactions, positions, exposures, portfolio limits and allowances in accordance with the risk control authorities delegated to the Group CRO;

(ii) monitoring and challenging the Group's risk-taking activities for the risk categories under Group CRO responsibility; and

(iii) managing the function "Group Risk Control".

## 20 Group General Counsel

**20.1 Responsibilities and authorities**

The Group GC has in particular the following responsibilities:

(i) managing the Group's legal affairs and ensuring effective and timely assessment of legal matters impacting the Group or its businesses;

(ii) providing the legal advice required by the Group;

(iii) management and reporting of all litigation and other significant contentious matters, including all legal proceedings, that involve UBS; and

(iv) managing the function "Group General Counsel".

## 21 Group Chief Compliance and Governance Officer

**21.1 Responsibilities and authorities**

The Group CCGO has in particular the following responsibilities:

(i) developing the Group's risk management and control framework (including taxonomies and risk appetite) for non-financial risks as well as implementing the independent control frameworks for these risks;

(ii) developing the Group's governmental policy and regulatory approach;

(iii) coordinating external governmental and regulatory relations and overseeing important regulatory matters, including key regulatory change programs across the Group;

(iv) managing the firm's new business governance process;

(v) developing global and local recovery and resolution plans and defining adequate resolvability improvement measures;

(vi) developing the Group's organization and legal entity structure, as well as corporate governance standards;

(vii) governing the Group's internal and external investigations portfolio and performing important investigations; and

(viii) managing the function "Group Compliance, Regulatory & Governance".

## 22 Regional Presidents

**22.1 Responsibilities and authorities**

The Regional Presidents have in particular the following responsibilities:

(i) cross-divisional collaboration;

(ii) representing the Group to the broader public in their region;

(iii) providing input to and facilitating the implementation of the Group's strategy; and

(iv) for Significant Group Entities, Significant Regional Entities and Significant Branches, the Regional Presidents assume responsibility for certain entity governance processes.

**22.2 Reporting obligation**

The Regional Presidents shall inform the relevant GEB member of any activities and issues that may give rise to actual or potential material regulatory or reputational concerns and of other relevant matters within the scope of their responsibilities.

# 23 Divisional Presidents

**23.1 Responsibilities and authorities**

The Divisional Presidents have in particular the following responsibilities:
(i) proposing BD strategies in line with the Group strategy taking into account input from the Regional Presidents;
(ii) the operation and management of their BD;
(iii) controlling and administering the dedicated financial resources, risk appetite, people and infrastructure of the BD;
(iv) collaborating with the Regional Presidents to support them in the exercise of their competences with regard to certain key entity governance processes; and
(v) the success, risks, results and value of their BD.

They are further accountable for the front-to-back control environment of the respective BD and are supported by the Group Functional Heads, who are accountable for confirming end-to-end completeness and effectiveness of the respective Group Function.

# Group Internal Audit

## 24 Scope, responsibilities, authorities and reporting

**24.1 Scope** Group IA is the internal audit function for the Group.

**24.2 Responsibilities** Group IA independently, objectively and systematically assesses the:

(i) soundness of the Group's risk and control culture;

(ii) reliability and integrity of financial and operational information, including whether activities are properly, accurately and completely recorded, and the quality of underlying data and models; and

(iii) design, operating effectiveness and sustainability of:

- (a) processes to define strategy and risk appetite, as well as the overall adherence to the approved strategy;
- (b) governance processes;
- (c) risk management, including whether risks are appropriately identified and managed;
- (d) internal controls, specifically whether they are commensurate with the risks taken;
- (e) remediation activities; and
- (f) processes to comply with legal and regulatory requirements, internal policies, and the Group's constitutional documents and contracts.

Group IA also conducts special audits at the request of the AC or other Board members, Committees or the Group CEO in consultation with the AC.

**24.3 Charter** Details of the role, responsibilities and authorities of Group IA are set out in the charter for Group IA. The charter is approved by the Board on the recommendation of the Chairman and the AC.

**24.4 Access rights** Group IA possesses unrestricted auditing rights within the Group; it has access at all times to all accounts, books, records, systems, property and personnel to fulfill its auditing responsibilities. The Head Group IA has open, direct and unrestricted access to the Chairman, the RC and the AC, as well as to the Group CEO.

**24.5 Independence** Group IA is independent in determining its activities, in particular when defining audit scope and executing audit engagements. Group IA reports are not subject to any instructions or restrictions, and its authority to audit is unrestricted.

## 25 Head Group IA

**25.1 Reporting** The Head Group IA reports directly to the Chairman. In addition, the Head Group IA has a functional reporting line to the AC in line with the responsibilities of the AC as set forth in the AC charter. The Head Group IA must inform the AC of the results of the annual internal audit plan and the status of annual internal audit objectives and must be in regular contact with the AC.

**25.2 Appointment** The Head Group IA is appointed by the Board based on the proposal of the Chairman and the AC.

**25.3 Responsibilities**

The Head Group IA is responsible for:

(i) maintaining and developing a professional audit team with sufficient knowledge, skills and experience to meet the requirements of these ORs, the audit charter, future challenges and emerging risks;

(ii) developing an annual audit plan based on an annual risk assessment;

(iii) continuously considering the firm's risk profile and audit universe;

(iv) reviewing and assessing the audit plan at least quarterly as well as implementing the approved annual audit plan (including any changes and special projects) and covering the audit universe in a risk-based audit cycle, in accordance with the budget and resource plan approved by the AC;

(v) delivering assurance over the effective and sustainable remediation of issues, taking a risk-based approach;

(vi) issuing quarterly governance and annual activity reports which provide an overview of significant audit results and other key developments;

(vii) coordinating the scope of Group IA's work with external auditors to provide optimal audit coverage;

(viii) maintaining effective relationships with UBS's regulators; and

(ix) leveraging Group IA's audit results with the activities of other control functions within UBS, while maintaining independence.

# Special provisions

## 26 Authority to sign

**26.1 In general**

Signing in the name of UBS Group AG requires two authorized signatures to be binding. The Board shall designate those persons authorized to sign on behalf of UBS Group AG.

**26.2 Signing authority rules**

The Board issues signing authority rules, specifying details and principles, including the scope of signature authorities and possible extensions, exceptions to the joint signature authority principle, and the possibility for signatories of UBS Entities to sign on behalf of UBS Group AG. In addition, UBS Entities establish their own rules, according to mandatory provisions of local law, rules and regulations.

## 27 Form of signature

**27.1 Signature form**

All authorized signatories sign by adding their signature to the name of the legal entity on whose behalf they act.

## 28 Conduct of Board and GEB members

**28.1 Duty of care and loyalty**

Each member of the Board and the GEB is under a duty to carry out their responsibilities with due care and to safeguard and further the interests of UBS and of all of its shareholders.

**28.2 Conflicts of interest**

The Board and GEB members must arrange their personal and business affairs, including their affairs with regard to a related person or company, so as to avoid, as much as possible, an actual, perceived or potential conflict with the interests of the Group.

**28.3 Disclosure of conflict of interest**

Each Board member must disclose to the Chairman, and each GEB member must disclose to the Group CEO, any conflict of interest generally arising or relating to any matter to be discussed at a meeting, as soon as the Board or GEB member becomes aware of its existence.

**28.4 Procedural measures**

Unless exceptional circumstances dictate that in the best interests of UBS, a Board or GEB member with a conflict of interest shall not participate in the discussions and decision-making involving the interest at stake, the Board or GEB member with a conflict of interest shall participate in discussions and:
(i) a double vote (a vote with and a vote without the conflicted individual) shall take place;
(ii) a binding decision on the matter requires the same outcome in both votes;
(iii) the Chairman or the Group CEO must advise the respective Corporate Body of the conflict of interest; and
(iv) the existence of the conflict must be recorded in the meeting minutes.

In the event of doubt, the Chairman or the Group CEO shall request the respective Corporate Body to determine whether a conflict of interest or exceptional circumstances exist.

**28.5 Duty of confidentiality**

Except for information already in the public domain, each Board and GEB member shall handle all information relating to the Group learned during the performance of their duties with the utmost discretion at all times. Such information may only be disclosed to third parties with prior written clearance from the Chairman or the Group CEO. This obligation and duty continues even after the term of office of the Board or GEB member has expired for as long as the relevant information remains confidential.

**28.6 Benefits of Board and GEB members**

If a Board or a GEB member becomes aware of the fact that they may receive a financial or non-financial benefit other than any salary, remuneration or other benefit from UBS, as a result of employment within the Group, that person must:
(i) promptly inform the Board, in the case of a Board member or the Group CEO; and
(ii) promptly inform the Group CEO, in the case of a GEB member other than the Group

CEO.

## 29 Entry into force, amendments

| | | |
|---|---|---|
| **29.1** | **Entry into force** | These ORs replace the former regulations of 1 April 2020 governing the internal organization of UBS Group AG and come into effect on 14 February 2022, based on a Board resolution of UBS Group AG dated 9 September 2021. |
| **29.2** | **Amendments** | These ORs may be amended by the Board only with the approval of FINMA. |

# Annex A – *Organizational chart of UBS Group AG*

# Organizational chart of UBS Group AG

# Annex B – *Charter of the Committees of the Board*

# Contents

# Introduction

## 1 Basis and purpose

**1.1 Basis**

This Committees' charter is enacted by the Board pursuant to articles 716–716b CO, articles 25 and 27 of the AoA and sections 5.9 and 13.3 of the ORs.

**1.2 Purpose**

The purpose of this Committees' charter is to set out the objectives, composition and responsibilities of the permanent Board Committees, being:
(i) the Audit Committee;
(ii) the Compensation Committee;
(iii) the Corporate Culture and Responsibility Committee;
(iv) the Governance and Nominating Committee; and
(v) the Risk Committee.

# Membership and constitution

## 2 Number of Committee members, their independence and knowledge

**2.1 Minimum number of Committee members**

Each Committee must have at least three Committee members.

**2.2 Independence**

Each Committee must consist of members of the Board who:

(i) with respect to the Compensation Committee, are all independent as defined by section 3.2 of the ORs;
(ii) with respect to the GNC and CCRC, are independent, in a majority, as defined by section 3.2 of the ORs;
(iii) with respect to the AC, fulfill the independence criteria set out in sections 2.3 and 2.4 of this Committees' charter; and
(iv) with respect to the RC, are all independent as defined by section 3.2 of the ORs and fulfill the independence criteria set out in section 2.4 of this Committees' charter.

At least one member of the RC must also be a member of the Compensation Committee.

**2.3 Special independence rules for AC members**

In addition to the independence criteria set out in section 3.2 of the ORs, each AC member must meet the requirements set forth in rule 10A-3 of the Securities Exchange Act of 1934 and the New York Stock Exchange rules.

**2.4 Special rules for AC and RC members**

Each AC and RC member must:

(i) not be an affiliated person of UBS; for the avoidance of doubt, serving as a member of the Board of a subsidiary of UBS Group AG or an affiliated company of the Group and receiving remuneration for such activity does not, of itself, make an AC or an RC member an affiliated person; and
(ii) not receive any consulting, advisory or other compensatory fees from UBS or any of its affiliated persons other than in their capacity as a Board member or a Committee member.

Each AC member must not serve on the audit committee of more than two other public companies, unless the Board has made a determination that such AC member or prospective AC member has the availability to properly fulfill their duties with UBS.

**2.5 Special rules for GNC members**

At least one of the Vice Chairmen and/or the SID is a member of the GNC.

**2.6 Knowledge**

Committee members must have the necessary knowledge and experience to fulfill their functions.

**2.7 Membership and presence of the Chairman**

Generally, the Chairman or one of the Vice Chairmen chairs the GNC. The Chairman may, in consultation with the relevant Chairperson, attend the meetings of other Committees as a non-voting guest.

## 3 Constitution

**3.1 Appointment and removal by the Board**

The Chairperson and the Committee members, with the exception of the Compensation Committee members, are appointed pursuant to section 4.3 of the ORs, and the Board may remove any Committee member or any Chairperson at any time. Should a vacancy arise on any Committee, even if the minimum number of Committee members pursuant to section 2.1 of this Committees' charter is still met, the Board may appoint the missing member from among its members for the remaining term of office.

# Responsibilities and authorities

## 4 Delegation of responsibilities and authorities

**4.1 In general**

Pursuant to section 13.3 of the ORs, the Committees have the responsibilities and authorities set out in the annexes to the ORs.

## 5 Audit Committee

**5.1 In general**

The function of the AC is to support the Board in fulfilling its oversight duty relating to financial reporting and internal controls over financial reporting, the effectiveness of the external and internal audit functions, and the effectiveness of whistleblowing procedures.

Management is responsible for the preparation, presentation and integrity of the financial statements, while the external auditors are responsible for auditing financial statements. The AC's responsibility is one of oversight and review.

**5.2 Responsibilities and authorities**

The AC's responsibilities and authorities for UBS Group AG and the Group are to:

(i) Financial reporting:
- (a) monitor the integrity of the financial statements and any announcements related to financial performance, and review significant financial reporting judgements contained in them, before recommending their approval to the Board;
- (b) advise the Board on whether the annual report and financial statements, taken as a whole, are fair, balanced and understandable, and provide the information necessary for shareholders to assess the company's position and performance, business model and strategy;
- (c) review the organization and completeness of the financial reporting process, including the Group's internal control system and procedures as they relate to the integrity of the financial statements, taking into account the reports provided by the GEB, the external auditors, Group IA, regulators or other information as determined by the Committee to be appropriate;
- (d) review management's SOX 404 report in relation to internal controls over financial reporting;
- (e) review significant accounting policies and practices and compliance with accounting standards; and
- (f) review arrangements for compliance with the Group's legal, regulatory and other requirements (including tax matters) as they relate to the integrity of the financial statements or financial report;

(ii) External audit:
- (a) oversee the Group's relationship with and assess the qualifications, expertise, effectiveness, independence and performance of the external auditors and their lead audit partner; support the Board in reaching a decision in relation to the appointment, reappointment or dismissal of the external auditors and the rotation of the lead audit partner;
- (b) approve the engagement letter of the external auditors, including the scope of the audit and the fees and terms for the planned audit work;
- (c) oversee all audit and permitted non-audit services provided by the external auditors and establish such policies as the Committee deems appropriate;
- (d) annually review the external auditors' summary of adjusted and unadjusted differences; and
- (e) review the regulatory audit plan and the results of regulatory audits;

(iii) Group IA:
   (a) monitor and assess the effectiveness, independence and performance of the Head Group IA and Group IA;
   (b) approve Group IA's annual audit plan and objectives including subsequent important amendments;
   (c) monitor Group IA's discharge of its annual audit objectives; and
   (d) order special audits to be conducted either by Group IA or by mandating third parties and review and approve such requests from other Board members, Committees or the Group CEO;

(iv) Whistleblowing and investigations:
   (a) review the effectiveness of the firm's whistleblowing policies and procedures and ensure that appropriate whistleblowing mechanisms are in place;
   (b) review on a quarterly basis the levels of new and pending whistleblowing cases and reports on complaints made regarding accounting, auditing or other matters;
   (c) review on a quarterly basis reports on internal investigations; and
   (d) conduct or direct any investigation, including the retention of external advisors and consultants (at UBS's expense), as it considers necessary to discharge its responsibilities; and

(v) Human Resources:
   (a) annually provide input on the performance of the Group CFO, Group GC, Group CRO and Group CCGO to the Group CEO; and
   (b) review and make recommendations to the Board regarding decisions relating to the hiring and dismissal of the Group CFO.

# 6 Compensation Committee

**6.1 In general**

The function of the Compensation Committee is to support the Board in its duties to set guidelines on compensation and benefits, to oversee implementation thereof, to approve certain compensation and to scrutinize executive performance.

**6.2 Responsibilities and authorities**

The Compensation Committee's responsibilities and authorities are to:

(i) Group compensation strategy and principles:
   (a) periodically review the Group compensation strategy and principles and propose any material changes to the Board for approval; and
   (b) evaluate the effectiveness of pay for performance results across the Group;

(ii) GEB performance targets and objectives:
   (a) propose, upon proposal of the Chairman, financial and non-financial performance targets and objectives for the Group CEO for approval by the Board;
   (b) review, upon proposal of the Group CEO, the performance framework for the other GEB members; and
   (c) inform the Board of the Group CEO's financial and non-financial performance targets and objectives, as well as the performance framework for the other GEB members;

(iii) GEB performance assessments:
   (a) propose, upon proposal of the Chairman, the Group CEO's performance assessment for approval by the Board;
   (b) propose, upon proposal of the Group CEO, the performance assessments of the other GEB members for approval by the Board; and
   (c) inform the Board of the performance assessments of all GEB members, including the Group CEO;

(iv) Compensation framework and plans:
   (a) approve key features of the compensation framework and plans for the non-independent Board members and GEB members;
   (b) be informed of key features of the compensation framework and plans for employees other than GEB members;
   (c) approve key terms of any new or amended compensation plans or other compensation arrangements with a material financial, reputational or strategic impact or significant use of UBS Group AG shares;
   (d) be informed of key terms of any new or amended pension and benefit plans with a material financial, reputational or strategic impact;
   (e) approve the share ownership policy for GEB members;
   (f) propose, upon proposal of the Chairman, the remuneration/fee framework for independent Board members for approval by the Board; and
   (g) approve, upon proposal of the Chairman and Group CEO, the remuneration/fee frameworks for external supervisory board members of Significant Group Entities and be informed of remuneration/fee frameworks for external supervisory board members of Significant Regional Entities;

(v) Compensation governance:
   (a) approve key terms for material individual variations to standard employment and termination agreements for non-independent Board members and, upon proposal of the Chairman, for the Group CEO and, upon proposal of the Group CEO, for other GEB members;
   (b) approve the engagement of and fees for any external advisors/consultants retained by the Compensation Committee; considering factors relevant to the advisors' independence from management and any requirements under New York Stock Exchange listing standards prior to selecting, or receiving advice from any such advisor/consultant;
   (c) propose to the Board for approval the annual compensation report and approve other material public disclosures on UBS compensation matters;
   (d) approve the peer group framework used for non-independent Board and GEB members' pay comparison purposes;
   (e) meet with the RC annually to ensure that the compensation framework supports appropriate risk awareness and management, as well as appropriate risk-taking; and
   (f) be informed of major regulatory developments, shareholder initiatives and best practices in executive compensation;

(vi) Other compensation competencies:
   (a) approve the total compensation for the Chairman and the non-independent Board members;
   (b) propose, upon proposal of the Chairman, the total compensation for the Group CEO for approval by the Board;
   (c) propose, upon proposal of the Group CEO, the individual total compensation for the other GEB members for approval by the Board;
   (d) approve, upon proposal of the Chairman, the total compensation for the Head Group IA, the Group Company Secretary and, upon proposal of the Group CEO, the total compensation for former GEB members for the first financial year after leaving the GEB;
   (e) propose, to the Board, for approval by the general meeting of the shareholders and subject to the relevant periods as outlined in the AoA:
      a. the maximum aggregate amount of compensation for the Board;
      b. the maximum aggregate amount of fixed compensation for the GEB; and
      c. the aggregate amount of variable compensation for the GEB;
   (f) For employees within the Group:
      a. approve the total individual compensation for the 50 highest-paid employees (excluding GEB members) at year-end compensation review;
      b. be informed of all employees with an annual total compensation of USD 3 million or more, and approve all employees with an annual total compensation of USD 5 million or more;
      c. be informed of or approve retention awards, severance payments, replacement awards and sign-on payments above internally defined thresholds, including commitments to compensate new hires; and
      d. approve the total individual compensation of certain employees based on additional regulatory requirements;

      these approval authorities can be delegated to the Chairperson of the Compensation Committee;
   (g) be informed of business performance progress and other variables that impact the funding of the performance award pool; and
   (h) propose, upon proposal of the Group CEO, the final annual Group performance award pool to the Board for approval and approve, upon proposal of the Group CEO, the performance award pools for the BDs and GF.

# 7 Corporate Culture and Responsibility Committee

**7.1 In general**

The CCRC supports the Board in its duties to safeguard and advance the Group's reputation for responsible and sustainable conduct. Its function is forward-looking in that it monitors and reviews societal trends and transformational developments and assesses their potential relevance for the Group. In undertaking this assessment, it reviews stakeholder concerns and expectations pertaining to the societal performance of UBS and to the development of its corporate culture. The CCRC's function also encompasses the monitoring of the current state and implementation of the programs and initiatives within the Group pertaining to corporate culture and corporate responsibility including sustainability.

**7.2 Responsibilities and authorities**

The CCRC's responsibilities and authorities are to:

(i) General:
   (a) monitor and advise the Board on current and emerging societal trends and developments of potential relevance for the Group;
   (b) review and assess the current state and implementation of the corporate culture and corporate responsibility programs and initiatives within the Group; and
   (c) monitor the consistent application of the behaviors of accountability with integrity, collaboration and innovation within UBS;

(ii) Frameworks and regulations:
   (a) monitor and advise the Board on evolving external corporate culture and corporate responsibility regulations, standards and practices;
   (b) conduct the annual review process for the Code of Conduct and Ethics of UBS and make proposals for amendments to the Board; and
   (c) reaffirm UBS's frameworks pertaining to the programs and initiatives outlined below on an annual basis;

(iii) Strategy:
   (a) monitor the effectiveness of actions taken by UBS relating to the corporate culture and corporate responsibility regulations and policies, as well as the objectives of UBS;
   (b) support the GEB, if required, in the adjustment of processes pertaining to corporate culture and corporate responsibility;
   (c) approve Group Sustainability and Impact's overall strategy and annual objectives;
   (d) reaffirm the Group's memberships in organizations, as well as commitments with a sustainability and/or impact topic focus, on an annual basis; and
   (e) support a strong and responsible corporate culture firmly founded in a spirit of long-term thinking;

(iv) Programs and initiatives:
   oversee UBS's corporate culture and corporate responsibility programs and initiatives, including:
   (a) Group Sustainability and Impact;
   (b) three keys to success;
   (c) sustainable finance (including sustainable and impact investing);
   (d) client and corporate philanthropy;
   (e) environmental and social risk management;
   (f) climate strategy (including net zero commitment);
   (g) human rights (including modern slavery prevention);
   (h) in-house environmental management;
   (i) responsible supply chain management;
   (j) diversity, equity and inclusion;
   (k) client satisfaction;
   (l) talent management;
   (m) working environment; and
   (n) other evolving initiatives;

(v) Reporting, communications and engagements:
   (a) advise the Board on the reporting of the Group's corporate culture and corporate responsibility strategy and activities;
   (b) review and propose to the Board for approval the annual sustainability report including the relevant sections of the Group's annual reporting;
   (c) provide oversight of the annual sustainability report related disclosures and the sustainability disclosure assurance audit process; and
   (d) monitor and review communications on corporate culture and corporate responsibility with stakeholders (including relevant organizations and sustainability rating and ranking bodies) and their effectiveness with regard to the reputation of the Group.

# 8 Governance and Nominating Committee

**8.1 In general**

The function of the GNC is to support the Board in fulfilling its duty to establish best practices in corporate governance across the Group, including conducting a Board assessment, establishing and maintaining a process for appointing new Board and GEB members, as well as for the annual performance assessment of the Board.

**8.2 Responsibilities and authorities**

The GNC's responsibilities and authorities are to:

(i) Corporate governance:
   (a) address all significant corporate governance issues affecting the Group;
   (b) develop, maintain and review these ORs and make proposals to the Board for approval;
   (c) make recommendations to the Board concerning further corporate governance matters and practices;
   (d) review the corporate governance section of the Group's annual report;
   (e) coordinate as required the work of the other Committees regarding corporate governance in their specific areas of expertise;
   (f) plan and manage proposals for changes in Board membership, taking into account factors including:
      a. the size and composition of the Board, as well as its Committees; and
      b. the skill mix, industry experience, diversity considerations and responsibilities of Board members;
   (g) annually review the Board members' independence and present its assessment to the Board for approval;
   (h) approve mandates of Board and GEB members pursuant to articles 31 and 36 of the AoA and applicable internal policies; and
   (i) approve the appointment of supervisory board members for Significant Group Entities upon proposal by the Group CEO and ensure the Chairperson of the respective Board Committee of UBS Group AG is consulted on the appointment of Chairpersons to equivalent committees for Significant Group Entities;

(ii) annually review the Committees' charter, taking into account best practices;

(iii) Identification and nomination of new Board members:
   (a) develop, maintain and review principles and criteria regarding the recruitment and nomination of new Board members and Committee members, approve their existing mandates, assess their independence pursuant to section 3.2 of the ORs and provide specific proposals to the Board for approval;
   (b) review and propose new candidates for membership of the Board to be recommended for election by the shareholders at an AGM or EGM in accordance with selection criteria approved by the Board; and
   (c) manage a succession plan for Board and Committee membership;

(iv) Board education:
   (a) ensure the establishment of a satisfactory induction program for new Board members and a satisfactory ongoing training and education program for existing Board members and Committee members; and
   (b) maintain a list of trainings attended by individual Board members (maintained by the Group Company Secretary on behalf of the GNC);

(v) Performance evaluation:
   (a) set the criteria for and oversee the annual assessment of the performance and effectiveness of the Chairman, the Board as a whole and each Committee;
   (b) conduct an annual assessment of the performance and effectiveness of the Chairman and of the Board as a whole (which includes an appraisal by an external expert at least every three years), report to the Board the conclusions and recommendations and assess on a timely basis whether or not Board members are to be proposed for re-election by the AGM;
   (c) ensure that each Committee carries out and oversees a self-assessment of its performance and reports the conclusions and any recommendations for change to the Board; and
   (d) ensure that each Committee is subject to an external assessment every three years; and

(vi) Human resources:
supervise and approve, together with the Chairman, the succession planning for all GEB members and propose their appointment for approval by the Board (for this purpose, the GNC receives information from the Compensation Committee on its performance evaluation of the GEB members).

**8.3 Responsibilities and authorities of the Vice Chairman and/or SID**

In accordance with section 2.5 of this Committees' charter, at least one of the Vice Chairmen and/or the SID is a member of the GNC. The respective GNC member is required:

(i) together with the GNC, to lead the Board in the ongoing monitoring and annual evaluation of the Chairman; and

(ii) in conjunction with the Chairman and the GNC, to ensure good corporate governance, balanced leadership and control within the Group, the Board and the Committees.

# 9 Risk Committee

**9.1 In general**

The function of the RC is to oversee and support the Board in fulfilling its duty to set and supervise an appropriate risk management and control framework in the areas of:
(i) financial and non-financial risks; and
(ii) balance sheet, treasury and capital management, including funding, liquidity and equity attribution.
The RC considers the potential effects of the aforementioned risks on the Group's reputation.

**9.2 Responsibilities and authorities**

The RC's responsibilities and authorities are to:
(i) Risk management and control:
   (a) review and propose to the Board the guiding principles and framework for risk management and control (including risk appetite, delegation of risk authorities and major risk limits) relative to UBS's operations, assess management's respective proposals and recommend any required changes to the Board;
   (b) review and approve the risk appetite methodology (including objectives and binding scenarios) relative to the Group's activities and risk profiles, including allocation of responsibilities within the risk management and control framework;
   (c) review and propose to the Board the risk, capital, liquidity and funding, and balance sheet section of the annual report of the Group;
   (d) periodically assess the appropriateness of major policies and procedures adopted by the GEB relating to the risk management and control of significant risks;
   (e) review and make recommendations to the Board based on proposals from the GEB in relation to material risk limits and periodically review allocations and authority levels relating to those limits. Material risk limits include those relating to portfolios, concentrations, products, sectors or other categories relevant to the strategy, risk profile and risk capacity of UBS Group AG and the Group as approved by the Board;
   (f) review and approve the principal characteristics of the Group's risk measurement framework (including changes thereto) used to identify, model, measure, monitor and report risks;
   (g) monitor and oversee the risk profile of UBS Group AG and the Group within the context of the Board-determined risk profile, risk capacity and limit structure;
   (h) systematically review high-risk areas of the Group and assess the effectiveness of the steps taken by the GEB to manage or mitigate such risks;
   (i) review and assess the asset and liability management framework, including allocation of responsibilities, limits, capital allocation to BDs and GF, liquidity and funding;
   (j) review regulatory framework reforms affecting areas within the scope of the RC's mandate and recommend any required changes to the Board;
   (k) consider the Group's strategy to deal with anticipated or existing high-level risks and assist the Board by reviewing and assessing management's proposals in relation to strategy;
   (l) review management's proposals and as appropriate propose to the Board for approval a global recovery plan and global resolution strategy;
   (m) review management's assessments of UBS's non-financial risk exposures and related risk-oriented activity plans;
   (n) periodically review material communications (including formal assessments) between UBS and its principal regulators;
   (o) review projects and remediation activities (as determined by the RC) undertaken by the management to address critical changes to the risk management/control environment; and
   (p) periodically meet with the Compensation Committee to ensure that the compensation framework appropriately reflects risk awareness and management, and ensures appropriate risk-taking;
(ii) Risk reporting:
   (a) determine risk reporting requirements that allow for an effective oversight by the RC and communicate changes to report owners if reporting requirements are not met or change;
   (b) review risk reports, including reports from management that assess the likelihood of risks materializing, the monitoring of emerging trends via forecasts or stress tests, the adequacy and appropriateness of the internal controls to manage those risks and that contain agreed measures to reduce risks or deal with specific risk situations including stress situations; and

(c) receive periodic updates on limitations that prevent full risk data aggregation in the risk reports; and

(iii) Human Resources:

(a) annually provide input on the performance of the Group CRO, Group CFO, Group GC and the Group CCGO to the Group CEO; and

(b) review and make recommendations to the Board regarding decisions relating to the hiring and dismissal of the Group CRO and the Group CCGO.

# 10 Further responsibilities and authorities

**10.1 Further responsibilities and authorities**

The Board may entrust further powers and duties to the Committees by Board resolution.

# 11 Delegation to a member or subcommittee

**11.1 Further delegation by the Committees**

Each Committee may delegate some of its tasks to one of its members or to a subcommittee comprised of two or more of its members. Such delegations shall be recorded in the Committee's minutes and the Chairman must be informed.

# 12 Information rights

**12.1 Committees**

In accordance with the procedure set out in section 8.4 of the ORs, each Committee may request any relevant information or special reports from any GEB member or Group IA on matters relating to its respective responsibilities set out in this Committees' charter.

**12.2 Committee members**

For the information rights of each Board member, see section 8 of the ORs.

# 13 Meeting with third parties

**13.1 Meeting with third parties**

The Committees may, in performing their duties, take advice from and meet as a body with third parties. In consultation with the Group CEO, they may meet with regulators. The Chairperson shall inform the Chairman accordingly.

# Meetings and resolutions of the Committees

## 14 Meetings

**14.1 Number of meetings**

Each Committee meets as often as its business requires, but at least:
(i) four times a year for the AC, the RC and the Compensation Committee; and
(ii) twice a year for the CCRC and the GNC.

The AC and RC hold at least four joint meetings a year.

The Compensation Committee and RC periodically hold joint meetings.

**14.2 Request, invitation, agenda, notice period, chair, and format**

Committee meetings, including joint meetings, are called and held in compliance with the rules set out in the ORs (sections 6.2 to 6.5 and 6.8 of the ORs to be applied mutatis mutandis).

**14.3 Presence of third parties at Committee meetings**

Each Chairperson may, on their own motion or upon request of any Committee member or the Chairman, invite GEB members, as well as other persons, to attend Committee meetings. The Group CEO will be informed accordingly.

**14.4 Special rules for the AC**

The AC holds Committee meetings:
(i) normally with the participation of the Head Group IA, representatives of the external auditors, the Group CEO, the Group CFO, and the Group Controller and Chief Accounting Officer; and
(ii) periodically, only with the participation of the Head Group IA, the external auditors, or with members of management, or a combination of any of the aforementioned.

**14.5 Special rules for the CCRC**

The CCRC normally holds Committee meetings with the participation of the Group CEO, the Head Group Sustainability and Impact, and the Chief Sustainability Officer.

**14.6 Special rules for the Compensation Committee**

The Compensation Committee normally holds Committee meetings with the participation of the Group CEO, the Group Head HR, the Global Head of Reward and external advisors.

**14.7 Special rules for the RC**

Generally, the Group CEO, the Group CFO, the Group CRO, the Group GC, the Group CCGO, the Head Group IA and representatives of the external auditors participate (to the extent necessary) in each meeting of the RC. The invitation of other persons is at the discretion of the RC.

**14.8 Resolutions**

Resolutions are passed by an absolute majority of the votes of Committee members present; in case of a tie, the decision is passed on to the Board and decided in accordance with section 7.2 of the ORs. Sections 7.2 to 7.4 of the ORs apply mutatis mutandis with regard to circular resolutions.

**14.9 Minutes**

The minutes of Committee meetings, including joint meetings, must fulfill the conditions set out in sections 6.9, 6.10 and 7.5 of the ORs and be distributed to the Chairman.

## 15 Resolutions and information rights

**15.1 Resolutions and information rights**

Sections 7, 8.2, 8.3 and 8.4 of the ORs apply mutatis mutandis to the decision-making process and the information rights of the Committees and the Committee members.

# Reporting

## 16 Regular reporting

**16.1 In general**

Each Chairperson ensures that the Chairman and the Board are kept informed in a timely and appropriate manner. Each Chairperson (either personally or through another Committee member) regularly reports to the Board at the Board meetings on the current activities of their Committee and on important Committee issues, including all matters falling within the duties and responsibilities of the Board, namely:

(i) proposals for resolutions to be considered, or other action to be taken by the Board;
(ii) resolutions and decisions made by the Committee and the material considerations that led to such resolutions and decisions; and
(iii) activities and important findings of the Committee.

**16.2 Submitting of proposals and recommendations**

Each Chairperson submits, in writing, the proposals and resolutions mentioned in sections 16.1(i) and (ii) of this Annex to the ORs to the Board unless such proposals are contained in the Committee minutes; the remaining reporting is generally done orally.

**16.3 Annual reporting of the Committees**

Each Committee annually submits a report to the Board, detailing the activities of the Committee during the previous twelve months.

## 17 Special reporting

**17.1 AC**

Following the completion of the audit and the annual financial statements, the AC Chairperson submits annually to the Chairman, for the attention of the Board:

(i) the AC's assessment of the qualification, independence and performance of the external auditors;
(ii) the AC's assessment of the design of the Group's internal control system for financial reporting and the coordination and interaction between Group IA and the external auditors; and
(iii) a recommendation regarding the audited financial statements in UBS's annual report.

# Special provisions

## 18 Confidentiality

**18.1 Special rule**

The deliberations of the Compensation Committee and GNC are handled with the utmost discretion and are to be communicated outside of these Committees only to the extent permitted by the Chairpersons of these Committees. The Chairman is exempted with regard to the confidentiality of deliberations.

## 19 Self-assessment and adequacy review

**19.1 Self-assessment and adequacy review**

Each Committee reviews the adequacy of its charter at regular intervals, but at least annually, and recommends to the GNC any changes considered to be necessary or appropriate. For the self-assessment, section 9 of the ORs is to be applied mutatis mutandis.

| **Vice Chairman** | The Vice Chairman of the Board as set out in section 11 |

# Introduction

## 1 Basis and purpose

**1.1 Basis**

These ORs are enacted by the Board of UBS AG pursuant to article 716b of the CO and articles 24 and 26 of the AoA.

**1.2 Purpose**

The purpose of these ORs is:
(i) to implement and supplement requirements contained in applicable laws, regulations and the AoA having regard to pertinent codes of best practice; and
(ii) to define the functions, responsibilities and authorities of UBS AG's Corporate Bodies and their members.

Mandatory provisions of applicable laws, rules and regulations or rules contained in the AoA take precedence over the ORs.

## 2 Organization of UBS AG

**2.1 Organization in general**

UBS AG and its business are organized as follows:
(i) The Board, under the leadership of the Chairman, has the ultimate responsibility for the direction, supervision and control of UBS AG, and performs the other duties described herein or as prescribed by mandatory provisions of law.
The Board is responsible for deciding all matters and taking business decisions where such decisions exceed the authority delegated by the Board to the Committees, the EB or the President of the EB.
(ii) As provided by mandatory law, rules and regulations, the AoA or these ORs, the executive management of UBS AG is delegated to the EB under the leadership of the President of the EB. Under consideration of applicable regulatory requirements, the President of the Executive Board of UBS Switzerland AG may not be a member of the UBS AG EB.
(iii) The following permanent Committees assist the Board in the performance of its responsibilities:
  (a) the Audit Committee;
  (b) the Compensation Committee; and
  (c) the Risk Committee.
(iv) The following permanent EB Committees assist the EB in the performance of its responsibilities:
  (a) the Asset and Liability Committee; and
  (b) the Finance and Risk Committee.

**2.2 Group steering**

UBS Group AG, as the listed parent company of the Group, controls directly or indirectly all subsidiaries, including UBS AG, and leads the Group by setting a harmonized strategic direction. UBS Group AG further sets principles and organizational structures to enable efficient and coordinated management of the Group and control of its subsidiaries. Notwithstanding this, the legal independence of UBS AG, including formal decision-making by the Corporate Bodies as required under applicable constitutional documents, and the provisions of applicable local laws, rules and regulations relating to UBS AG, must be observed to the extent legally required.

**2.3 UBS AG as a subsidiary of UBS Group AG**

UBS AG is a subsidiary of UBS Group AG. As such it may fulfill strategic, financial and management functions not only for itself, but also with respect to the Group. In view of this function, the Corporate Bodies of UBS AG may have to resolve on matters that pertain both to UBS AG and the Group. To this end, UBS AG:

(i) develops and implements its business strategies and business plans, as well as appropriate risk management and internal control frameworks, in accordance with strategies, targets and policies defined by the Group;

(ii) manages its subsidiaries in accordance with the UBS entity framework. UBS AG issues the necessary regulations, policies and instructions, ensures logistical support, maintains commensurate control functions and allocates the authority necessary for an orderly and efficient conduct of the business of its subsidiaries; and

(iii) works closely with the BDs and the GF of the Group in order to identify and benefit from synergies and to realize earnings potential and cost savings.

**2.4 Banking business of UBS AG**

The banking business and support operations of UBS AG are performed by itself and its direct or indirect subsidiaries. Each subsidiary has its own constitutional documents, which must be in line with applicable local laws, rules and regulations.

**2.5 Transparency, collaboration and reporting within the Group**

Subject to and in accordance with applicable local laws, rules and regulations, Corporate Bodies are bound to ensure transparency and collaboration within the Group and may have additional responsibilities and reporting lines within the Group in addition to their reporting lines within UBS AG.

## 3 Membership

**3.1 Election proposal**

In consultation with the Chairman, the Board proposes candidates for election by the shareholders.

**3.2 Independence of Board members**

The Board's proposal for election ensures that one-third of the Board members will be independent. For this purpose, independence is determined in accordance with FINMA circular 2017/1 "Corporate governance – banks." Furthermore, there must be a sufficient number of Board members who meet the independence criteria for the Committee members set out in the annex "Charter of the Committees of the Board." The Chairman does not need to be independent.

**3.3 Notification duty**

Each Board member must notify the Chairman immediately if circumstances change in a manner that may affect their independence.

**3.4 Expectations of the Board members**

The Board, as a group, must have the necessary qualifications, skills and diversity to perform all Board duties. In particular, the Board must together possess financial literacy, experience in banking and risk management, as well as international experience, including experience of international financial matters, and knowledge of the duties of directors.

Candidates for election to the Board shall be considered in light of their personal experience and abilities, including any specialist knowledge or skills required to fulfill specific Board functions as outlined herein, as well as their ability to contribute to building a complementary and effective Board.

## 4 Constitution

**4.1 Number of members**

The Board consists of five to twelve Board members as per article 18 of the AoA.

**4.2 Term of office**

The term of office for each Board member is one year, pursuant to article 19 of the AoA. Subject to election by shareholders, Board members are normally expected to serve for a minimum of three years. No Board member may serve for more than 10 consecutive terms of office, in exceptional circumstances the Board can extend this limit.

**4.3 Constitutional meeting**

The Board constitutes itself at its first meeting following the AGM. In this meeting
(i) the Vice Chairmen;
(ii) the Chairpersons of the Committees; and
(iii) the Committee members
are appointed by the Board.
The Board may remove these Board members from their special functions at any time.

## 5 Responsibilities and authorities

**5.1 In general**

In addition to mandatory provisions of law, rules, regulations and the AoA, the Board has the responsibilities and authorities set out in these ORs.

**5.2 Supervision**

The Board is responsible for the overall direction, supervision and control of UBS AG and its management, as well as for supervising compliance with applicable laws, rules and regulations.

**5.3 Ultimate responsibility**

The Board has ultimate responsibility for the success of UBS AG and for delivering sustainable shareholder value within a framework of prudent and effective controls and subject to the parameters set by the Group. It decides on UBS AG's strategy and the necessary financial and human resources upon recommendation of the President of the EB and sets UBS AG's values and standards to ensure that its obligations to shareholders and other stakeholders are met.

| | | |
|---|---|---|
| **5.4** | **Strategy and financial success** | Taking into account the Group's overall strategy and interests, the Board's ultimate responsibility for strategy and financial success includes in particular:<br>(i) deciding the strategy of UBS AG upon recommendation of the President of the EB, taking into account the proposals and alternatives presented;<br>(ii) approving the risk management and control framework of UBS AG, including the overall risk appetite;<br>(iii) deciding whether UBS AG should enter substantial new business areas or exit an existing business area, in cases where the entry or exit is not covered by the current approved strategic framework; and<br>(iv) approving major acquisitions, mergers, disposals or capital expenditure, including decisions on major changes to the company structure, major changes in its Significant Group Entities, and other projects of strategic importance for UBS AG. |
| **5.5** | **Finance** | With respect to the ultimate responsibility for the financial situation, the Board has in particular the following duties:<br>(i) approving the applicable accounting standards and financial control frameworks, as well as significant changes to them;<br>(ii) annually reviewing and approving the three-year strategic plan and one-year operating plan of UBS AG, including the financial objectives and a capital allocation framework, as well as the capital and liquidity plans;<br>(iii) annually reviewing and approving of the ICAAP of UBS AG;<br>(iv) reviewing and approving the annual financial statements of UBS AG and, where applicable, the quarterly financial statements; and<br>(v) reviewing and approving the consolidated annual and quarterly financial statements, and the consolidated annual report of UBS AG prior to its submission to the AGM. |
| **5.6** | **Organization** | The Board is responsible for establishing an appropriate business organization, including in particular:<br>(i) approving and regularly reviewing the governance principles and the management structures as set out herein;<br>(ii) appointing and removing EB members, the Company Secretary and the IA Executive UBS AG and reviewing their performance;<br>(iii) overseeing the effectiveness of the business organization and management information system implemented by the EB;<br>(iv) supervising the internal control system;<br>(v) approving the charter for IA and monitoring IA; and<br>(vi) approving the compensation and benefits principles of UBS AG. |
| **5.7** | **Meetings of shareholders** | The Board has a duty to convene AGMs and EGMs, prepare the agenda for such meetings and implement resolutions adopted by the shareholders. |
| **5.8** | **Loss of equity** | In case of financial difficulties or insufficient equity, the Board must undertake all steps required under applicable law. |
| **5.9** | **Delegation** | Within the limits of applicable law, regulations and the AoA, the Board may delegate part of its responsibilities and authorities to:<br>(i) the Committees;<br>(ii) individual Board members;<br>(iii) the EB; and<br>(iv) individual EB members. |
| **5.10** | **Advice from third parties** | The Board and the Committees may, in performing their duties, take advice from third parties. |

# 6 Meetings

| | | |
|---|---|---|
| **6.1** | **Number of meetings** | The Board meets as often as business requires, and at least six times a year. |
| **6.2** | **Convening meetings** | Board meetings are convened by the Chairman. Upon written request, including reasons, of any Board member or the President of the EB addressed to the Chairman, he shall convene a Board meeting in accordance with sections 6.3 and 6.4. |
| **6.3** | **Invitation** | The Chairman or, if absent, one of the Vice Chairmen invites the Board members to the Board meetings in writing (including by e-mail or other electronic means). |

| | | |
|---|---|---|
| **6.4** | **Agenda and notice period** | The invitation contains the agenda and must be sent to Board members and other attendees as a rule at least five business days prior to the date of the Board meeting together with all necessary supporting material. In exceptional cases, supporting material may be sent later to allow the Board to receive the latest available information. This applies in particular to updates on financial data.<br><br>In time-critical cases (as determined at the Chairman's discretion), a Board meeting may be held and the supporting material may be sent at shorter notice. |
| **6.5** | **Chair** | Board meetings are chaired by the Chairman or, if absent, by one of the Vice Chairmen or, in their absence, by another Board member selected by the Board members present. |
| **6.6** | **Attendees** | The Board may hold Board meetings as determined by the Chairman:<br>(i) with or without the participation of the President of the EB and all or some of the other EB members; and<br>(ii) with the participation of other persons, who are invited to attend. |
| **6.7** | **Meeting format** | Board meetings may be held in person or by audio or video conference. |
| **6.8** | **Minutes of Board meetings** | The minutes (including its annexes as presented to the Board) contain all Board resolutions made and reflect in a general manner the considerations which led to the decisions made. Dissenting opinions of and votes cast by Board members must also be reflected in the minutes. |
| **6.9** | **Form of minutes, inspection rights** | The minutes must be signed by the Board member chairing the meeting (in accordance with section 6.5) and the Company Secretary and must be made available for review prior to the next Board meeting at which these shall be approved. Board members are entitled to examine the minutes of any Board meeting at any time. |

# 7 Resolutions

| | | |
|---|---|---|
| **7.1** | **Quorum of attendance** | The presence of either the Chairman or one of the Vice Chairmen as well as of the majority of the Board members is required to pass valid Board resolutions. If this quorum is not present, the Chairman can seek a circular resolution of the Board (see section 7.4). No such quorum is required for decisions confirming, implementing and amending resolutions relating to capital increases (article 22(2) of the AoA). |
| **7.2** | **Quorum of resolutions, decisive vote** | Board resolutions are passed by an absolute majority of the votes of Board members present; in case of a tie, the Chairman's vote is decisive (article 22(1) of the AoA). |
| **7.3** | **Resolutions on items not on agenda** | If time-critical matters arise after a Board meeting has already been convened, such matters may be discussed at the Board meeting and Board resolutions made if a majority of all Board members present agree. If feasible, a revised agenda will be sent to all Board members prior to the meeting. Absent Board members are informed of the resolution made after the Board meeting. |
| **7.4** | **Circular resolutions** | Board resolutions may be passed in writing (including by e-mail or other electronic means) if no material discussions are required, the matter is time-critical or has been pre-discussed. A proposal for a circular resolution must be communicated to all Board members and is only deemed to have passed if:<br>(i) more than two-thirds of all Board members cast a vote or give written notice that they abstain; and<br>(ii) an absolute majority of all Board members participating in this circular resolution approve the proposed resolution; and<br>(iii) no Board member requests a Board meeting in relation to the subject matter of the proposed Board resolution within three business days of receiving notice of the proposal. |
| **7.5** | **Effect of circular resolutions** | A circular resolution is as binding as a Board resolution adopted at a Board meeting and must be recorded under a separate heading in the Board minutes prepared pursuant to sections 6.8 and 6.9 for the next Board meeting. |

## 8 Information rights

**8.1 Right of information**

Board members have the right to access all information concerning the business and the affairs of UBS AG as may be necessary or helpful for them to fulfill their duties as Board members.

**8.2 Request for information during Board meetings**

At Board meetings, any Board member is entitled to request information on any matter relating to UBS AG regardless of the agenda, and the Board or EB members present must provide such information to the best of their knowledge.

**8.3 Request for information outside of Board meetings**

Should a Board member require information or wish to review documents outside a Board meeting, such request must be routed through the Company Secretary and addressed to the Chairman.

**8.4 Request for information outside of Committee meetings**

Should a Chairperson require information or wish to review documents outside a Committee meeting, they can, within the range of responsibilities of their Committee, address their request to a member of the EB directly, to the IA or to external auditors. The Chairman and the President of the EB must be informed as appropriate.

## 9 Self-assessment

**9.1 Board self-assessment**

At least annually, the Board reviews its own performance, as well as the performance of each of the Committees. Such a review seeks to determine whether the Board and the Committees function effectively and efficiently.

**9.2 Performance evaluation**

In light of the annual performance evaluation, the Board must consider whether any changes should be made to the membership of the Board or Committees.

## 10 Chairman

**10.1 Election**

The Board proposes the Chairman who in turn is elected by shareholders at the general meeting.

**10.2 In general**

The Chairman leads the Board. He further coordinates the tasks within the Board and, in particular, calls Board meetings and sets their agenda.

**10.3 Shareholders' meetings**

In accordance with article 13 of the AoA the Chairman presides over the AGMs and EGMs.

**10.4 Coordination of Committee work and Chairman's attendance**

The Chairman coordinates, together with the Chairpersons, the work of all Committees. In consultation with the relevant Chairperson, the Chairman or one of the Vice Chairmen may attend meetings of the Committees.

**10.5 External communication**

The Chairman, together with the President of the EB, undertakes responsibility for UBS AG's reputation, is further closely involved in and responsible for ensuring effective communication with shareholders and stakeholders, including government officials, regulators and public organizations.

The Chairman is the primary representative of the Board and, together with the President of the EB, of UBS AG with the media.

**10.6 Relationship with Board and EB**

The Chairman establishes and maintains close and constructive working relationships with and promotes open communication between the Board and the President of the EB and the other EB members, providing advice and support to them while respecting that executive management responsibility is delegated to the EB. Where appropriate, the Chairman ensures effective challenge of the President of the EB and the EB by the Board and the Committees and fosters ongoing and effective monitoring of performance.

**10.7 Further responsibilities and authorities**

Further details of the responsibilities and authorities delegated to the Chairman are set out in the annexes to these ORs.

# 11 Vice Chairmen

**11.1 Appointment and authorities**

The Board appoints one or more Vice Chairmen. A Vice Chairman is required to lead the Board in the absence of the Chairman, to provide support and advice to the Chairman and to undertake such specific additional duties or functions as the Board may entrust to him from time to time.

**11.2 Further responsibilities and authorities**

Further details of the responsibilities and authorities delegated to the Vice Chairmen are set out in the annexes to these ORs.

# 12 Company Secretary

**12.1 Appointment and function**

At the constitutional meeting of the Board, the Board appoints a Company Secretary, who acts as secretary to the Board and its Committees.

**12.2 Responsibilities and authorities**

The Company Secretary prepares the agenda for each Board meeting, keeps the Board minutes and the Committees' minutes and assists the Board and its members in coordinating and fulfilling their duties. In accordance with section 8.3, the Company Secretary coordinates requests for information from the members of the Board outside of Board meetings and informs the President of the EB of such requests as appropriate.

**12.3 Reporting**

The Company Secretary reports to the Chairman.

**12.4 Official documents**

The Company Secretary is responsible for keeping UBS AG's official company documents and records including their certification.

# 13 Board Committees

**13.1 Permanent and other Committees**

The Board establishes the AC, the Compensation Committee and the RC as permanent Committees. The Board may set up other Committees, including ad hoc Committees, if deemed appropriate or necessary.

**13.2 Appointment**

From among its members the Board appoints the Committee members and the respective Chairpersons.

**13.3 Responsibilities and authorities**

Based on articles 24 and 26 of the AoA, the Board delegates certain responsibilities and authorities to the Committees pursuant to the annexes to these ORs. The overall responsibility for such delegated competences remains with the Board.

# Executive Board

## 14 Delegation

**14.1 Delegation of management**

The Board delegates the executive management of UBS AG as set out in section 2.1(ii).

**14.2 Further delegation by the EB**

The President of the EB and the EB may further delegate certain responsibilities and authorities and may empower further delegation of such responsibilities and authorities. Such delegations must be in writing, and clear rules on responsibilities, authorities and accountabilities must be established. Specific responsibilities and authorities delegated by the EB to an EB Committee will be set forth in a resolution adopted or a charter approved by the EB.

**14.3 Time-critical matters**

The EB will establish arrangements to ensure that decisions are made in a time-critical business matter, should the responsible EB member be unable to act.

## 15 Executive Board

**15.1 Composition and appointment**

Under the leadership of the President of the EB, the EB is comprised of the members detailed in sections 16 to 23 of these ORs and such further EB members as appointed by the Board upon proposal of the President of the EB.

**15.2 Responsibilities and authorities**

Under the leadership of the President of the EB, the EB has executive management responsibility for UBS AG and its business. This includes, but is not limited to, developing and implementing UBS AG strategies approved by the Board and which take into account the Group's strategies, budgeting, planning and resource allocation, and evaluating and monitoring business performance. This also includes ensuring the efficient use of the financial resources of UBS AG in accordance with Group guidelines, policies and governance over intra-divisional treasury allocations.

The EB develops, implements and maintains an appropriate and adequate business organization designed to ensure compliance with applicable laws and regulations and an appropriate management information system.

The EB is also responsible for ensuring effective management and coordination of issues on behalf of UBS AG which arise from interactions and interdependencies between UBS AG and all entities of the Group or UBS AG and the BDs or GF. Notwithstanding this, the legal independence of UBS AG and the provisions of applicable local laws, rules and regulations must be observed to the extent legally required.

**15.3 EB as risk council**

The EB acts as the risk council of UBS AG. It has overall responsibility for establishing and implementing risk management and control within UBS AG. It manages the risk profile of UBS AG as determined by the Board and the RC and is supported by the FRC. The EB determines its requirements for risk reporting, including improvements and changes to the reports, and receives periodic updates on risk data limitations.

**15.4 Preparation of Board decisions**

Where proposals for decisions must be made to the Board, the EB prepares such proposals and supports the Board in its decision-making process.

**15.5 Further duties**

The EB is furthermore responsible for all management matters not reserved under the AoA or the ORs to any other person or Corporate Body.

**15.6 Meetings, agenda and notice period**

The EB meets at least once every month or as appropriate. The agenda must be sent to the EB members at least five calendar days prior to the date of the EB meeting together with all necessary supporting material. In time-critical cases, an EB meeting (called by the President of the EB as required or at the request of one EB member addressed to the President of the EB) may be held and the supporting material may be sent on shorter notice. EB meetings are chaired by the President of the EB or, if absent, by the nominated deputy President of the EB. EB meetings may be held in person or by audio or video conference.

**15.7 Quorum of attendance**

The presence, either in person or by audio or video conference, of a majority of the EB members is required to pass valid EB resolutions.

**15.8 Quorum of resolutions**

The resolutions of the EB are passed by the majority of the votes of the EB members present. The President of the EB has the power to overrule any EB resolution. If the President of the EB exercises this power, he must inform the Chairman as well as the EB immediately.

**15.9 Minutes of EB meetings**

Minutes are taken of all EB meetings. They contain all resolutions made by the EB. The minutes are sent to all EB members and to the Chairman. Board members may inspect the EB minutes in accordance with section 8. Section 6.9 applies mutatis mutandis to the EB minutes.

**15.10 Circular resolutions**

With respect to circular resolutions of the EB, sections 7.4 and 7.5 apply mutatis mutandis.

**15.11 Matters requiring immediate attention**

With regard to matters which require immediate attention, and if it is not feasible to convene an audio or video conference or to proceed by circular resolution within the time available, the President of the EB may, together with two other EB members, make decisions, which have the effect of EB resolutions. EB members who could not be reached in time must be informed together with the Chairman as soon as possible. Section 7.5 applies mutatis mutandis to such resolutions.

**15.12 Assessment**

At least annually the President of the EB assesses the performance of the EB. Such a review seeks to determine whether the EB functions effectively and efficiently. In light of the annual assessment, the President of the EB must consider whether any changes should be made to the composition of the EB.

**15.13 Further duties of EB members**

In addition, to the responsibilities for each GEB member set out below, further details of the responsibilities and key authorities delegated to the EB members are set out in the annexes to these ORs and the relevant Business Regulations or terms of reference.

## 16 President of the Executive Board

**16.1 Appointment**

The President of the EB is appointed by the Board upon proposal of the Chairman.

**16.2 Function, substitution**

The President of the EB is the highest executive officer of UBS AG and has responsibility and accountability for the management and performance of UBS AG. The President of the EB nominates a deputy from within the EB, who is confirmed by the Board. The deputy President of the EB shall temporarily exercise all responsibilities and authorities if the President of the EB should be incapacitated or unavailable to exercise the function as President of the EB.

**16.3 Main responsibilities and authorities**

The President of the EB has the overall day-to-day management responsibility for UBS AG. In particular, he is responsible for:

(i) convening and presiding over the EB meetings;
(ii) leading the business and strategic planning and forecasting;
(iii) the financial results of UBS AG;
(iv) exercising all authorities allocated to UBS AG which are not otherwise delegated;
(v) providing regular updates on the business to the Group CEO, as required;
(vi) effective management of UBS AG's financial resources, people, infrastructure and risks; and
(vii) ensuring effective collaboration with the Group.

The President of the EB assumes a leading role in preparing the Board's consideration of UBS AG's strategy, risk and compensation principles. Together with the Chairman, he has the responsibility for UBS AG's reputation.

**16.4 Right to overrule decisions**

The President of the EB has an all-encompassing right to information about and examination of all matters handled in the business. He has the power to overrule any decisions made by any management body, including any resolution by the EB (see section 15.8).

**16.5 Reporting to the Board**

The President of the EB ensures that the Chairman and the Board are kept informed in a timely and appropriate manner on all matters falling within the scope of their responsibilities as well as important business developments, issues or decisions taken by the EB in particular with regard to matters which may have a material financial, operational or reputational impact on UBS AG.

Further, the President of the EB (either personally or through any other EB member) regularly informs the Board on:
(i) key performance indicators and other relevant financial data of UBS AG;
(ii) existing and emerging risks, issues and mitigating measures;
(iii) updates on developments in important markets and on peers; and
(iv) information on all issues which may affect the supervisory or control function of the Board.

**16.6 Reporting by EB members**

Each member of the EB detailed in sections 17 to 23 below reports directly to the President of the EB and the relevant function within the Group and shall inform the President of the EB or EB as appropriate of material matters and key developments within the scope of their responsibilities. The Functional Heads have an obligation to advise the Chairman and relevant Committees on significant issues arising in the field of their responsibilities.

# 17 Chief Financial Officer

**17.1 Responsibilities and authorities**

The CFO has in particular the following responsibilities:
(i) managing UBS AG's financial accounting, controlling, forecasting, planning and reporting processes;
(ii) ensuring transparency in and assessing the financial performance of UBS AG;
(iii) developing UBS AG's inorganic strategy in collaboration with the EB and supporting the EB members in mergers and acquisitions, as well as equity investment topics, by monitoring the progress of key inorganic growth initiatives;
(iv) managing and controlling UBS AG's tax affairs, treasury and capital management, including funding and liquidity risk, and UBS AG's regulatory capital ratios;
(v) ensuring asset and liability management by balancing consumption of UBS AG's financial resources;
(vi) consulting with the AC to make proposals to the Board regarding the standards for accounting to be adopted by UBS AG and defining the standards for financial reporting and disclosure; and
(vii) under the supervision of the AC, coordinating the working relationships with the external auditors.

# 18 Chief Digital and Information Officer

**18.1 Responsibilities and authorities**

The CDIO has in particular the following responsibilities:
(i) formulating the approach, objectives, financial and execution plans for the CDIO area in support of the BDs and GF operating out of UBS AG;
(ii) driving digitalization, delivering IT services, tools and infrastructure, including cyber protection and IT security, in line with the needs of the BDs and GF operating out of UBS AG;
(iii) overseeing the prioritization of the technology enabled change initiatives;
(iv) directing and governing all IT development and engineering management activities;
(v) supplying real estate infrastructure and general administrative services to UBS AG;
(vi) directing and controlling all supply and demand management activities, supporting UBS AG with its third-party risk and sourcing strategies and managing UBS AG's near-/offshore, outsourcing and supplier-related processes; and
(vii) delivering shared operational services, maintaining and overseeing UBS AG's crisis management operations and providing data governance.

## 19 Chief Risk Officer

**19.1 Responsibilities and authorities**

The CRO has in particular the following responsibilities:
(i) the development of UBS AG's risk management and control framework (including risk principles and risk appetite) for the credit, market, country, liquidity, funding, model and environmental and social risk categories, as well as the implementation of independent control frameworks for these risk categories, on the basis of and in accordance with the framework approved by the Board, including:
  (a) risk measurement, aggregation, portfolio controls and risk reporting; and
  (b) taking decisions on transactions, positions, exposures, portfolio limits and allowances in accordance with the risk control authorities delegated to the CRO; and
(ii) monitoring and challenging UBS AG's risk-taking activities for the risk categories under CRO responsibility.

## 20 General Counsel

**20.1 Responsibilities and authorities**

The GC has in particular the following responsibilities:
(i) managing UBS AG's legal affairs and ensuring effective and timely assessment of legal matters impacting UBS AG or its businesses;
(ii) providing the legal advice required by UBS AG; and
(iii) management and reporting of all litigation and other significant contentious matters, including all legal proceedings which involve UBS AG.

## 21 Chief Compliance and Governance Officer

**21.1 Responsibilities and authorities**

The CCGO has in particular the following responsibilities:
(i) developing UBS AG's risk management and control framework (including taxonomies and risk appetite) for non-financial risks as well as implementing the independent control frameworks for these risks;
(ii) developing UBS AG's governmental policy and regulatory approach;
(iii) coordinating external governmental and regulatory relations and overseeing important regulatory matters, including key regulatory change programs across UBS AG;
(iv) managing the firm's new business governance process;
(v) developing global and local recovery and resolution plans and defining adequate resolvability improvement measures;
(vi) developing UBS AG's organization and legal entity structure, as well as corporate governance standards; and
(vii) governing UBS AG's internal and external investigations portfolio and performing important investigations.

## 22 Regional Presidents

**22.1 Responsibilities and authorities**

The Regional Presidents have in particular the following responsibilities:
(i) cross-divisional collaboration; and
(ii) representing UBS AG to the broader public in their region.

## 23 Divisional Presidents

**23.1 Responsibilities and authorities**

The Divisional Presidents have in particular the following responsibilities:
(i) proposing BD strategies in line with the UBS AG and Group strategy taking into account input from the Regional Presidents;
(ii) the operation and management of their BD; and
(iii) controlling and administering the dedicated financial resources, risk appetite, people and infrastructure of the BD.

# 24 Committees

**24.1 EB Committees**

Pursuant to section 14.2 the EB establishes
(i) the ALCO; and
(ii) the FRC
as permanent EB Committees.

**24.2 Composition**

The composition is specified in dedicated terms of reference for each EB Committee.

**24.3 Appointment**

The appointment is specified in dedicated terms of reference for each EB Committee.

**24.4 Responsibilities and authorities**

The EB Committees have the responsibilities and authorities as set out in the terms of reference of the respective committee:
(i) the ALCO is responsible for managing UBS AG's assets and liabilities in line with the UBS AG and Group strategy and regulatory requirements;
(ii) the FRC is responsible for supervising and controlling UBS AG's business, financial and risk profile of the overall UBS AG standalone as well as the entity's business activities in Switzerland and cross-jurisdictional branch-related matters, in line with the UBS AG and Group strategy and regulatory requirements. The FRC is also responsible for ensuring the financial and risk profile of UBS AG standalone complies with the agreed risk appetite, by ascertaining that appropriate and timely actions are taken.

**24.5 Meetings and resolutions**

The sections 15.6 to 15.12 apply mutatis mutandis.

**24.6 Reporting**

The EB Committees report to the EB.

# Internal Audit

## 25 Scope, responsibilities, authorities and reporting

**25.1 Scope**

IA is the internal audit function for UBS AG.

**25.2 Responsibilities**

IA independently, objectively and systematically assesses in particular the:

(i) soundness of UBS AG's risk and control culture;

(ii) reliability and integrity of financial and operational information, including whether activities are properly, accurately and completely recorded, and the quality of underlying data and models; and

(iii) design, operating effectiveness and sustainability of:

  (a) processes to define strategy and risk appetite as well as the overall adherence to the approved strategy;

  (b) governance processes;

  (c) risk management, including whether risks are appropriately identified and managed;

  (d) internal controls, specifically whether they are commensurate with the risks taken;

  (e) remediation activities; and

  (f) processes to comply with legal and regulatory requirements, internal policies, and UBS AG's constitutional documents and contracts.

IA also conducts special audits at the request of the AC, or other Board members, Committees or the President of the EB in consultation with the AC.

**25.3 Charter**

Details of the role, responsibilities and authorities of IA are set out in the charter for Group IA. The charter is also to be endorsed by the Board for its applicability to UBS AG.

**25.4 Access rights**

IA possesses unrestricted auditing rights within UBS AG; it has access at all times to all accounts, books, records, systems, property and personnel to fulfill its auditing responsibilities. The IA Executive UBS AG has open, direct and unrestricted access to the Chairman, the RC and the AC, as well as to the President of the EB.

**25.5 Independence**

IA is independent in determining its activities, in particular when defining audit scope and executing audit engagements. IA reports are not subject to any instructions or restrictions, and its authority to audit is unrestricted.

## 26 IA Executive UBS AG

**26.1 Reporting**

The IA Executive UBS AG reports directly to the Chairman. In addition, the IA Executive UBS AG has a functional reporting line to the AC, as well as to the Head Group IA, as set forth in the AC charter.

The IA Executive UBS AG must inform the AC of the results of the annual internal audit plan and the status of annual internal audit objectives and must be in regular contact with the AC.

**26.2 Appointment**

The IA Executive UBS AG is appointed by the Board in consultation with the Chairman and the AC, based on a proposal by the Head Group IA.

# Special provisions

## 27 Authority to sign

**27.1 In general**

Signing in the name of UBS AG requires two authorized signatures to be binding. Any employee of UBS AG having one of the following ranks or functions is authorized to sign, jointly with another authorized signatory, on behalf of UBS AG:
(i) the Chairman and each of the Vice Chairmen;
(ii) each of the EB members;
(iii) the IA Executive UBS AG and the Company Secretary;
(iv) each of the Managing Directors, Executive Directors and Directors or senior employees with equivalent ranks;
(v) each of the Associate Directors (including "Prokuristen," as applicable); and
(vi) for specified locations, each of the Authorized Officers (including "Handlungsbevollmächtigte," as applicable).

**27.2 Signing policy**

The GC issues a signing policy for UBS AG, specifying all details, including the scope of signature authorities and possible extensions, exceptions to the joint signature authority principle, and the possibility for signatories of the Group to sign on behalf of UBS AG. In addition, UBS AG Entities establish their own rules, according to mandatory provisions of local laws, rules and regulations.

## 28 Form of signature

**28.1 Signature form**

All authorized signatories sign by adding their signature to the name of the legal entity on whose behalf they act.

## 29 Conduct of Board and EB members

**29.1 Duty of care and loyalty**

Each member of the Board and the EB is under a duty to carry out their responsibilities with due care and to safeguard and further the interests of UBS AG and of all of its shareholders.

**29.2 Conflicts of interest**

The Board and EB members must arrange their personal and business affairs, including their affairs with regard to a related person or company, so as to avoid, as much as possible, an actual, perceived or potential conflict of interest.

**29.3 Disclosure of conflict of interest**

Each Board member must disclose to the Chairman, and each EB member must disclose to the President of the EB, any conflict of interest generally arising or relating to any matter to be discussed at a meeting, as soon as the Board or EB member becomes aware of its existence.

**29.4 Procedural measures**

Unless exceptional circumstances dictate that in the best interests of UBS AG a Board or EB member with a conflict of interest shall not participate in the discussions and decision-making involving the interest at stake, the Board or EB member with a conflict of interest shall participate in discussions and:
(i) a double vote (a vote with and a vote without the conflicted individual) shall take place;
(ii) a binding decision on the matter requires the same outcome in both votes;
(iii) the Chairman or the President of the EB must advise the respective Corporate Body of the conflict of interest; and
(iv) the existence of the conflict must be recorded in the meeting minutes.

In the event of doubt, the Chairman or the President of the EB shall request the respective Corporate Body to determine whether a conflict of interest or exceptional circumstances exist.

**29.5 Duty of confidentiality**

Except for information already in the public domain, each Board and EB member shall handle all information relating to UBS AG learned during the performance of their duties with the utmost discretion at all times. Such information may only be disclosed to third parties with prior written clearance from the Chairman or the President of the EB. This obligation and duty continues even after the term of office of the Board or EB member has expired for as long as the relevant information remains confidential.

**29.6 Benefits of Board and EB members**

If a Board or EB member becomes aware of the fact that they may receive a financial or non-financial benefit other than any salary, remuneration or other benefit from UBS AG, as a result of employment with UBS AG, that person must:

(i) promptly inform the Board, in the case of a Board member or the President of the EB; and

(ii) promptly inform the President of the EB, in the case of an EB member other than the President of the EB.

## 30 Entry into force, amendments

**30.1 Entry into force**

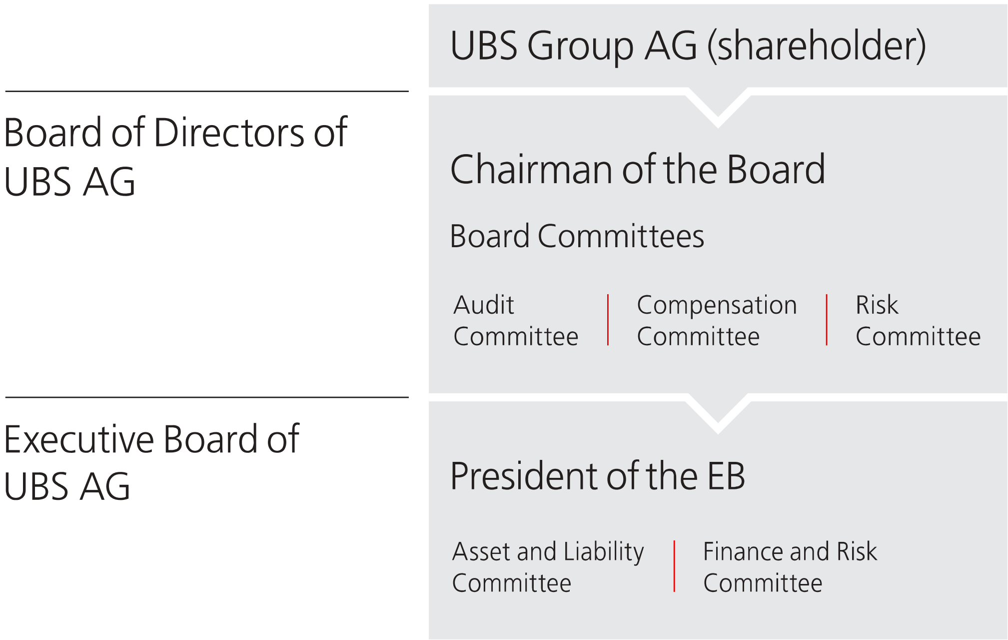
These ORs replace the former regulations of 1 April 2020 governing the internal organization of UBS AG and come into effect on 14 February 2022, based on a Board resolution of UBS AG dated 9 September 2021.

**30.2 Amendments**

These ORs may be amended by the Board only with the approval of FINMA.

# Annex A – *Organizational chart of UBS AG*

# Organizational chart of UBS AG



# Annex B – *Charter of the Committees of the Board*

# Contents

# Introduction

## 1 Basis and purpose

**1.1 Basis**

This Committees' charter is enacted by the Board pursuant to articles 716–716b CO, articles 24 and 26 of the AoA and sections 5.9 and 13.3 of the ORs.

**1.2 Purpose**

The purpose of this Committees' charter is to set out the objectives, composition and responsibilities of the permanent Board Committees, being:
(i) the Audit Committee;
(ii) the Compensation Committee; and
(iii) the Risk Committee.

# Membership and constitution

## 2 Number of Committee members and their independence

| | | |
|---|---|---|
| **2.1** | **Minimum number of Committee members** | Each Committee must have at least three Committee members. |
| **2.2** | **Independence** | Each Committee must consist of members of the Board, and all members of each Committee must be independent as defined by section 3.2 of the ORs.<br><br>At least one member of the RC must also be a member of the Compensation Committee. |
| **2.3** | **Presence of the Chairman** | The Chairman may, in consultation with the relevant Chairperson, attend the meetings of Committees as a non-voting guest. |

## 3 Constitution

| | | |
|---|---|---|
| **3.1** | **Appointment and removal by the Board** | The Chairperson and the Committee members are appointed pursuant to section 4.3 of the ORs, and the Board may remove any Committee member or any Chairperson at any time. Should a vacancy arise on any Committee, even if the minimum number of Committee members pursuant to section 2.1 of this Committees' charter is still met, the Board may appoint the missing member from among its members for the remaining term of office. |

# Responsibilities and authorities

## 4 Delegation of responsibilities and authorities

**4.1 In general**

Pursuant to section 13.3 of the ORs, the Committees have the responsibilities and authorities set out in the annexes to the ORs.

## 5 Audit Committee

**5.1 In general**

The function of the AC is to support the Board in fulfilling its oversight duty relating to financial reporting and internal controls over financial reporting, the effectiveness of the external and internal audit functions as well as of whistleblowing procedures.

Management is responsible for the preparation, presentation and integrity of the financial statements, while the external auditors are responsible for auditing financial statements. The AC's responsibility is one of oversight and review.

**5.2 Responsibilities and authorities**

The AC's responsibilities and authorities are to:

(i) Financial statements:
- (a) monitor the integrity of the financial statements and any announcements related to financial performance, and review significant financial reporting judgements contained in them, before recommending their approval to the Board;
- (b) advise the Board on whether the annual report and financial statements, taken as a whole, are fair, balanced and understandable, and provide the information necessary for shareholders to assess the company's position and performance, business model and strategy;
- (c) review the organization and completeness of the financial-reporting process including UBS AG's internal control system and procedures as they relate to the integrity of the financial statements, taking into account the reports provided by the EB, the external auditors, IA, regulators or other information as determined by the Committee to be appropriate;
- (d) review management's SOX 404 report in relation to internal controls over financial reporting;
- (e) review significant accounting policies and practices, and compliance with accounting standards; and
- (f) review arrangements for compliance with UBS AG's legal, regulatory and other requirements (including tax matters) as they relate to the integrity of the financial statements or financial report;

(ii) External audit:
- (a) oversee the relationship with and assess the qualifications, expertise, effectiveness, independence and performance of the external auditors and their lead audit partner; support the Board in reaching a decision in relation to the appointment, reappointment or dismissal of the external auditors and the rotation of the lead audit partner;
- (b) approve the engagement letter of the external auditors, including the scope of the audit and the fees and terms for the planned audit work;
- (c) oversee all audit and permitted non-audit services provided by the external auditors and establish such policies as the Committee deems appropriate;
- (d) annually review the external auditors' summary of adjusted and unadjusted differences; and
- (e) review the regulatory audit plan and the results of regulatory audits;

(iii) IA:
  (a) monitor and assess the effectiveness, independence and performance of the IA Executive UBS AG and IA;
  (b) approve IA's annual audit plan and objectives including subsequent important amendments;
  (c) monitor IA's discharge of its annual audit objectives; and
  (d) order special audits to be conducted either by IA or by mandating third parties and review and approve such request from other Board members, Committees or the President of the EB;

(iv) Whistleblowing and investigations:
  (a) review the effectiveness of the firm's whistleblowing policies and procedures and ensure that appropriate whistleblowing mechanisms are in place;
  (b) review on a quarterly basis the levels of new and pending whistleblowing cases and reports on complaints made regarding accounting, auditing or other matters;
  (c) review on a quarterly basis reports on internal investigations; and
  (d) conduct or direct any investigation, including the retention of external advisors and consultants (at UBS AG's expense), as it considers necessary to discharge its responsibilities; and

(v) Human Resources:
  (a) annually provide input on the performance of the CFO, GC, CRO and CCGO to the President of the EB; and
  (b) review and make recommendations to the Board regarding decisions relating to the hiring and dismissal of the CFO.

# 6 Compensation Committee

**6.1 In general**

The function of the Compensation Committee is to support the Board in its duties to set guidelines on compensation and benefits, to oversee implementation thereof, to approve certain compensation and to scrutinize executive performance.

**6.2 Responsibilities and authorities**

The Compensation Committee's responsibilities and authorities are to:

(i) Compensation strategy and principles:
  (a) periodically review the compensation strategy and principles and propose any material changes to the Board for approval; and
  (b) evaluate the effectiveness of pay for performance results of UBS AG;

(ii) EB performance targets and objectives:
  (a) propose, upon proposal of the Chairman, financial and non-financial performance targets and objectives for the President of the EB for approval by the Board;
  (b) review, upon proposal of the President of the EB, the performance framework for the other EB members; and
  (c) inform the Board of the President of the EB's financial and non-financial performance targets and objectives, as well as the performance framework for the other EB members;

(iii) EB performance assessments:
  (a) propose upon proposal of the Chairman, the President of the EB's performance assessment for approval by the Board;
  (b) propose upon proposal of the President of the EB the performance assessments of the other EB members for approval by the Board; and
  (c) inform the Board of the performance assessments of all EB members, including the President of the EB;

(iv) Compensation framework and plans:
  (a) approve key features of the compensation framework and plans for the non-independent Board members and EB members;
  (b) be informed of key features of the compensation framework and plans for employees other than EB members;
  (c) approve key terms of any new or amended compensation plans or other compensation arrangements with a material financial, reputational or strategic impact or significant use of UBS Group AG shares;
  (d) be informed of key terms of any new or amended pension and benefit plans with a material financial, reputational or strategic impact;
  (e) approve the share ownership policy for EB members; and
  (f) propose, upon proposal of the Chairman, the remuneration/fee framework for independent Board members for approval by the Board.

(v) Compensation governance:
   (a) approve key terms for material individual variations to standard employment and termination agreements for non-independent Board members and, upon proposal of the Chairman, for the President of the EB and, upon proposal of the President of the EB, for other EB members;
   (b) approve the engagement of and fees for any external advisors/consultants retained by the Compensation Committee; considering factors relevant to the advisors' independence from management;
   (c) approve material public disclosures on UBS AG compensation matters;
   (d) meet with the RC annually to ensure that the compensation framework supports appropriate risk awareness and management as well as appropriate risk-taking; and
   (e) be informed of major regulatory developments, shareholder initiatives and best practices in executive compensation;
(vi) Other compensation competences:
   (a) for employees within UBS AG, approve the aggregated and/or total individual compensation of certain employees (including independent control functions) based on regulatory requirements; and
   (b) review business performance and other variables that impact annual variable compensation; and
(vii) Other competences related to specific regulatory requirements:
   (a) review and approve the Remuneration Policy Statement to be submitted annually to the PRA;
   (b) review and approve as appropriate any information provided to UBS AG shareholders with respect to the approval of the ratio between variable and fixed compensation for employees in the European Union; and
   (c) make recommendations as appropriate where it becomes aware of any event or matter that would justify the operation of malus or clawback for UBS AG London Branch staff in accordance with compensation plan rules.

# 7 Risk Committee

**7.1 In general**

The function of the RC is to oversee and support the Board in fulfilling its duty to supervise and set an appropriate risk management and control framework in the areas of:
(i) financial and non-financial risks; and
(ii) balance sheet, treasury and capital management, including funding, liquidity and equity attribution.

The RC considers the potential effects of the aforementioned risks on UBS AG's reputation.

**7.2 Responsibilities and authorities**

The RC's responsibilities and authorities are to:
(i) Risk management and control:
   (a) review and propose to the Board the guiding principles and framework for risk management and control (including risk appetite, delegation of risk authorities and major risk limits) relative to UBS AG's operations, assess management's respective proposals and recommend any required changes to the Board;
   (b) review and approve the risk appetite (including objectives and binding scenarios) relative to UBS AG's activities and risk profiles, including allocation of responsibilities within the risk management and control framework;
   (c) review and propose to the Board the risk, capital, liquidity and funding, and balance sheet section of the annual report of UBS AG;
   (d) periodically assess the appropriateness of major policies and procedures adopted by the EB relating to the risk management and control of significant risks;
   (e) review and make recommendations to the Board based on proposals from the EB in relation to material risk limits and periodically review allocations and authority levels relating to those limits. Material risk limits include those relating to portfolios, concentrations, products, sectors or other categories relevant to the strategy, risk profile and risk capacity of UBS AG as approved by the Board;
   (f) review and approve the principal characteristics of UBS AG's risk measurement framework (including changes thereto) used to identify, model, measure, monitor and report risks;
   (g) monitor and oversee the risk profile of UBS AG within the context of the Board-determined risk profile, risk capacity and limit structure;
   (h) systematically review high-risk areas of UBS AG and assess the effectiveness of the steps taken by the EB to manage or mitigate such risks;
   (i) review and assess the asset and liability management framework, liquidity and funding;

(j) review regulatory framework reforms affecting areas within the scope of the RC's mandate and recommend any required changes to the Board;
(k) consider UBS AG's strategy to deal with anticipated or existing high-level risks and assist the Board by reviewing and assessing management's proposals in relation to strategy;
(l) review management's assessments of UBS AG's non-financial risk exposures and related risk-oriented activity plans;
(m) periodically review material communications (including formal assessments) between UBS AG and its principal regulators;
(n) review projects and remediation activities (as determined by the RC) undertaken by the management to address critical changes to the risk management/control environment; and
(o) periodically meet with the Compensation Committee to ensure that the compensation framework appropriately reflects risk awareness and management, and ensures appropriate risk-taking;

(ii) Risk reporting:
(a) determine risk reporting requirements that allow for an effective oversight by the RC and communicate changes to report owners if reporting requirements are not met or change;
(b) review risk reports, including reports from management that assess the likelihood of risks materializing, the monitoring of emerging trends via forecasts or stress tests, the adequacy and appropriateness of the internal controls to manage those risks and that contain agreed measures to reduce risks or deal with specific risk situations including stress situations; and

(c) receive periodic updates on limitations that prevent full risk data aggregation in the risk reports; and

(iii) Human Resources:
(a) annually provide input on the performance of the CRO, CFO, GC and CCGO to the President of the EB; and
(b) review and make recommendations to the Board regarding decisions relating to the hiring and dismissal of the CRO and the CCGO.

# 8 Further responsibilities and authorities

**8.1 Further responsibilities and authorities**

The Board may entrust further powers and duties to the Committees by Board resolution.

# 9 Delegation to a member or subcommittee

**9.1 Further delegation by the Committees**

Each Committee may delegate some of its tasks to one of its members or to a subcommittee comprised of two or more of its members. Such delegations shall be recorded in the Committee's minutes and the Chairman must be informed.

# 10 Information rights

**10.1 Committees**

In accordance with the procedure set out in section 8.4 of the ORs, each Committee may request any relevant information or special reports from any EB member or IA on matters relating to its respective responsibilities set out in this Committees' charter.

**10.2 Committee members**

For the information rights of each Board member, see section 8 of the ORs.

# 11 Meeting with third parties

**11.1 Meeting with third parties**

The Committees may, in performing their duties, take advice from and meet as a body with third parties. In consultation with the President of the EB, they may meet with regulators. The Chairperson shall inform the Chairman accordingly.

# Meetings and resolutions of the Committees

## 12 Meetings

**12.1 Number of meetings**

Each Committee meets as often as its business requires, but at least four times a year for the AC, the Compensation Committee and the RC.

The AC and RC hold at least four joint meetings a year.

The Compensation Committee and RC periodically hold joint meetings.

**12.2 Request, invitation, agenda, notice period, chair and format**

Committee meetings, including joint meetings, are called and held in compliance with the rules set out in the ORs (sections 6.2 to 6.5 and 6.7 of the ORs to be applied mutatis mutandis).

**12.3 Presence of third parties at Committee meetings**

Each Chairperson may, on their own motion or upon request of any Committee member or the Chairman, invite EB members, as well as other persons, to attend Committee meetings. The President of the EB will be informed accordingly.

**12.4 Special rules for the AC**

The AC holds Committee meetings:
(i) normally with the participation of the IA Executive UBS AG, representatives of the external auditors, the President of the EB, the CFO and the Controller and Chief Accounting Officer; and
(ii) periodically, only with the participation of the IA Executive UBS AG, the external auditors, or with members of management, or a combination of any of the aforementioned.

**12.5 Special rules for the RC**

Generally, the President of the EB, the CFO, the CRO, the GC, the CCGO, the IA Executive UBS AG and representatives of the external auditors participate (to the extent necessary) in each meeting of the RC. The invitation of other persons is at the discretion of the RC.

**12.6 Resolutions**

Resolutions are passed by an absolute majority of the Committee members present; in case of a tie, the decision is passed on to the Board and decided in accordance with section 7.2 of the ORs. Sections 7.2 to 7.4 of the ORs apply mutatis mutandis with regard to circular resolutions.

**12.7 Minutes**

The minutes of Committee meetings, including joint meetings, must fulfill the conditions set out in sections 6.8, 6.9 and 7.5 of the ORs and be distributed to the Chairman.

## 13 Resolutions and information rights

**13.1 Resolutions and information rights**

Sections 7, 8.2, 8.3 and 8.4 of the ORs apply mutatis mutandis to the decision-making process and the information rights of the Committees and the Committee members.

# Reporting

## 14 Regular reporting

**14.1 In general**

Each Chairperson ensures that the Chairman and the Board are kept informed in a timely and appropriate manner. Each Chairperson (either personally or through another Committee member) regularly reports to the Board at the Board meetings on the current activities of their Committee and on important Committee issues, including all matters falling within the duties and responsibilities of the Board, namely:

(i) proposals for resolutions to be considered, or other action to be taken by the Board;
(ii) resolutions and decisions made by the Committee and the material considerations that led to such resolutions and decisions; and
(iii) activities and important findings of the Committee.

**14.2 Submitting of proposals and recommendations**

Each Chairperson submits, in writing, the proposals and resolutions mentioned in sections 14.1(i) and (ii) of this annex to the Board unless such proposals are contained in the Committee minutes; the remaining reporting is generally done orally.

**14.3 Annual reporting of the Committees**

Each Committee annually submits a report to the Board, detailing the activities of the Committee during the previous twelve months.

## 15 Special reporting

**15.1 AC**

Following the completion of the audit and the annual financial statements, the AC Chairperson submits annually to the Chairman, for the attention of the Board:

(i) the AC's assessment of the qualification, independence and performance of the external auditors;
(ii) the AC's assessment of the design of UBS AG's internal control system for financial reporting and the coordination and interaction between IA and the external auditors; and
(iii) a recommendation regarding the audited financial statements in UBS AG's annual report.

# Special provisions

## 16 Confidentiality

**16.1 Special rule**

The deliberations of the Compensation Committee are handled with the utmost discretion and are to be communicated outside of the Committee only to the extent permitted by the Chairperson. The Chairman is exempted with regard to the confidentiality of deliberations.

## 17 Self-assessment and adequacy review

**17.1 Self-assessment and adequacy review**

Each Committee reviews the adequacy of its charter at regular intervals, but at least annually, and recommends to the Board any changes considered to be necessary or appropriate. For the self-assessment, section 9 of the ORs is to be applied mutatis mutandis.

**Exhibit 2(d)**

# UBS GROUP AG AND UBS AG

# DESCRIPTION OF SECURITIES REGISTERED UNDER SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934

**Table of Contents**

Page

## Description of the Corporation’s Ordinary Shares

*The following summary of UBS Group AG’s (the “Corporation”) ordinary shares is based on and qualified by the Corporations Restated Articles of Association. For a complete description of the terms and provisions of the Company’s equity securities, including its common stock, refer to the Articles of Association of which are filed as exhibits to this Annual Report on Form 20-F. Throughout this exhibit, references to “we,” “our,” “us” and “the Company” refer to the Corporation.*

### General

At year-end 2021, UBS Group AG had 3,702,422,995 issued shares with a par value of CHF 0.10 each, leading to a share capital of CHF 370,242,299.50.

Registered shares of the Corporation are in the form of uncertificated securities (in the sense of the Swiss Code of Obligations) and intermediary-held securities (in the sense of the Swiss Federal Intermediated Securities Act). The shares of the Corporation are listed on the NYSE as global registered shares. As such, the shares can be traded and transferred across applicable borders, without the need for conversion, with identical shares traded on different stock exchanges in different currencies.

Following a shareholder’s registration in the share register, the shareholder may request the Corporation to issue a written statement in respect of his registered shares at any time; however, he has no entitlement to the printing and delivery of share certificates. In contrast, the Corporation may print and deliver share certificates for registered shares (single certificates, certificates representing multiples of shares or global certificates) at any time. It may withdraw registered shares issued as intermediary-held securities from the respective custody system. With the consent of the shareholder, the Corporation may cancel issued certificates which are returned to it without replacement.

### Dividend Rights and Dividends

Shareholders are entitled to the dividends or other distributions approved by UBS Group’s general meeting in proportion to their shareholdings.

Swiss law requires that at least 5% of the annual net profits of a corporation must be retained as general reserves until such time as said reserve amounts to 20% of the share capital. Any net profits remaining are, subject to the provisions of the Swiss Code of Obligations and of the Swiss Federal Banking Act, at the disposal of the shareholders’ meeting, except that, if an annual dividend exceeds 5% of the nominal share capital, then 10% of such excess must be retained as general reserves, unless such corporation qualifies as a holding company.

Under Swiss law, dividends may be paid out only if the corporation has sufficient distributable profits from previous business years or if the reserves of the corporation are sufficient to allow distribution of a dividend. In either event, dividends may be paid out only after approval by the shareholders’ meeting. The Board of Directors (BoD) may propose to the shareholders that a dividend be paid out. The auditors must confirm that the dividend proposal of the BoD conforms with statutory law.

Dividends are usually due and payable after the shareholders’ resolution relating to the allocation of profits has been passed. Under Swiss law, the statute of limitations in respect of dividend payments is five years.

U.S. registered holders of shares will receive dividend payments in U.S. dollars, unless they provide notice to UBS Group’s U.S. transfer agent, Computershare, that they wish to receive dividend payments in Swiss francs. The U.S. transfer agent will be responsible for paying the U.S. dollars or Swiss francs to registered holders, and for withholding any required amounts for taxes or other governmental charges. If the U.S. transfer agent determines, after consultation with UBS Group, that in its judgment any foreign currency received by it cannot be converted into U.S. dollars or transferred to U.S. holders, it may distribute the foreign currency received by it, or an appropriate document evidencing the right to receive such currency, or in its discretion hold such foreign currency for the accounts of U.S. holders.

### Voting Rights

Each share conveys the right to cast one vote. Swiss law distinguishes between registration with and without voting rights. Shareholders must be registered in the share register as shareholders with voting rights in order to vote and participate in general meetings or to assert or exercise other rights related to voting rights.

Resolutions and elections are decided at the General Meeting by an absolute majority of the votes cast, excluding blank and invalid ballots, subject to the Articles of Association and the compulsory provisions of the law. For the approval of certain specific issues, the Swiss Code of Obligations requires a positive vote from a two-thirds majority of the votes represented at the given general meeting, and from an absolute majority of the nominal value of shares represented thereat. Such issues include creating shares with privileged voting rights, introducing restrictions on the transferability of registered shares, conditional and authorized capital increases and restricting or excluding shareholders’ preemptive rights.

A resolution to change Article 19 of the Articles of Association, to remove one fourth or more of the members of the BoD or to delete or modify Article 17 paragraph 2 of the Articles of Association must receive at least two thirds of the votes represented.

### Board of Directors

The term of office for members of the Board of Directors and its Chairman expires after completion of the next Annual General Meeting.

Members whose term of office has expired are immediately eligible for re-election.

**Liquidation Rights**

In the event of liquidation of UBS Group’s assets, shareholders are entitled to a proportional share after all debts have been paid.

**Preemption Rights**

Under Swiss law, any share issue, whether for cash or non-cash consideration or for no consideration, is subject to the prior approval of the shareholders’ meeting. Shareholders of a Swiss corporation have certain preemptive rights to subscribe for new issues of shares in proportion to the nominal amount of shares held. The Articles of Association or a resolution adopted at a shareholders’ meeting with a supermajority of at least two-thirds of the votes represented and an absolute majority of the nominal value of the shares represented at the meeting may, however, limit or suspend preemptive rights in certain limited circumstances.

## Description of Debt Securities We May Offer

*Please note that in this section entitled "Description of Debt Securities We May Offer," references to UBS, we, our and us refer only to UBS AG and not to its consolidated subsidiaries. Also, in this section, references to "holders" and "you" mean those who own debt securities registered in their own names on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled "Legal Ownership and Book-Entry Issuance."*

*References herein to "this prospectus" are deemed to refer to this section "Medium-Term Notes, Series A" and references to "your prospectus supplement" are deemed to refer to the individual description of notes issuances contained below in this exhibit.*

### The Debt Indenture

As required by U.S. federal law for publicly offered bonds and notes, the debt securities are governed by a document called an indenture. The debt indenture is a contract between us and U.S. Bank Trust National Association, which acts as trustee.

The trustee has two main roles:

- First, the trustee can enforce your rights against us if we default. There are limitations on the extent to which the trustee acts on your behalf, which we describe below under "—Default, Remedies and Waiver of Default."
- Second, the trustee performs administrative duties for us, such as sending you interest payments and notices.

See "—Our Relationship with the Trustee" below for more information about the trustee.

### We May Issue Many Series of Debt Securities Under the Debt Indenture

We may issue as many distinct series of debt securities under the debt indenture as we wish. This section summarizes terms of the debt securities that apply generally to all series. The provisions of the debt indenture allow us not only to issue debt securities with terms different from those of debt securities previously issued under the debt indenture, but also to "reopen" a previous issue of a series of debt securities and issue additional debt securities of that series. Most of the financial and other specific terms of your series, will be described in the prospectus supplement accompanying this prospectus. Those terms may vary from the terms described here.

We may issue debt securities separately or together with other debt securities.

As you read this section, please remember that the specific terms of your debt security as described in your prospectus supplement will supplement and, if applicable, may modify or replace the general terms described in this section. If there are any differences between your prospectus supplement and this prospectus, your prospectus supplement will control. Thus, the statements we make in this section may not apply to your debt security.

When we refer to a series of debt securities, we mean a series issued under the debt indenture. When we refer to your prospectus supplement, we mean the prospectus supplement describing the specific terms of the debt security you purchase. The terms used in your prospectus supplement will have the meanings described in this prospectus, unless otherwise specified.

Unless we indicate otherwise in your prospectus supplement, the debt securities we issue to you will be part of the series of debt securities referred to as our "medium-term notes, Series A." The Series A notes are a single distinct series under the debt indenture, and we may issue Series A notes in such amounts, at such times and on such terms as we wish. The Series A notes will differ from one another, and from any other series, in their terms, but all of the Series A notes together will constitute a single series for all purposes under the debt indenture pursuant to which they will be issued.

### Amounts That We May Issue

The debt indenture does not limit the aggregate amount of debt securities that we may issue or the number of series or the aggregate amount of any particular series. We have already issued Series A notes, many of which are currently outstanding. We intend to issue additional Series A notes, and may issue additional Series A notes at any time, without your consent and without notifying you. We may also issue debt securities and other securities at any time without your consent and without notifying you.

The debt indenture and the debt securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the debt securities.

### Principal Amount, Stated Maturity and Maturity

The principal amount of a debt security means the principal amount payable at its stated maturity, unless that amount is not determinable, in which case the principal amount of a debt security is its face amount.

The term "stated maturity" with respect to any debt security means the day on which the principal amount of your debt security is scheduled to become due. The principal may become due sooner, by reason of redemption or acceleration after a default or otherwise in accordance with the terms of the debt security. The day on which the principal actually becomes due, whether at the stated maturity or earlier, is called the "maturity" of the principal.

We also use the terms "stated maturity" and "maturity" to refer to the days when other payments become due. For example, we may refer to a regular interest payment date when an installment of interest is scheduled to become due as the "stated maturity" of that installment.

When we refer to the "stated maturity" or the "maturity" of a debt security without specifying a particular payment, we mean the stated maturity or maturity, as the case may be, of the principal.

**This Section Is Only a Summary**

The debt indenture and its associated documents, including your debt security, contain the full legal text governing the matters described in this section and your prospectus supplement. We have filed a copy of the debt indenture with the SEC as an exhibit to our registration statement. See "Where You Can Find More Information" above for information on how to obtain a copy.

This section and your prospectus supplement summarize all the material terms of the debt indenture and your debt security. They do not, however, describe every aspect of the debt indenture and your debt security. For example, in this section and your prospectus supplement, we use terms that have been given special meaning in the debt indenture, but we describe the meaning of only the more important of those terms.

**Governing Law**

The debt indenture is, and the debt securities will be, governed by New York law.

**Currency of Debt Securities**

Amounts that become due and payable on your debt security in cash will be payable in a currency, composite currency, basket of currencies or currency unit or units specified in your prospectus supplement. We refer to this currency, composite currency, basket of currencies or currency unit or units as a "specified currency." The specified currency for your debt security will be U.S. dollars, unless your prospectus supplement states otherwise. Some debt securities may have different specified currencies for principal and interest. You will have to pay for your debt securities by delivering the requisite amount of the specified currency to UBS Securities LLC, UBS Financial Services Inc. or another firm that we name in your prospectus supplement, unless other arrangements have been made between you and us or you and that firm. We will make payments on your debt securities in the specified currency, except as described below in "—Payment Mechanics for Debt Securities." See "Considerations Relating to Securities Denominated or Payable in or Linked to a Non-U.S. Dollar Currency" below for more information about risks of investing in this kind of debt securities.

**Co-obligation of UBS Switzerland AG**

UBS Switzerland AG is fully, unconditionally and irrevocably liable, jointly and severally, with UBS AG, for UBS AG's obligations under and with respect to the debt securities with respect to the due and punctual payment of the principal of and any premium, interest and other amounts payable on, under or in respect of such securities and the due performance and observance of every covenant of the indenture to be performed or observed by UBS AG with respect to such securities.

The obligations of UBS Switzerland AG as a co-obligor are primary and not merely those of a surety. UBS Switzerland AG waives the right to require holders to proceed first against UBS AG and UBS Switzerland AG shall be subrogated to all rights of the holder of a security of a series against UBS AG in respect of any amounts paid to such holder by it pursuant to the terms of the indenture.

**Types of Debt Securities**

We may issue any of the three types of debt securities described below. A debt security may have elements of each of the three types of debt securities described below. For example, a debt security may bear interest at a fixed rate for some periods and at a floating rate in others. Similarly, a debt security may provide for a payment of principal at maturity linked to an index and also bear interest at a fixed or floating rate.

*Fixed Rate Debt Securities*

A debt security of this type will bear interest at a fixed rate described in the applicable prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are instead issued at a price lower than the principal amount. See "—Original Issue Discount Debt Securities" below for more information about zero coupon and other original issue discount debt securities.

Each fixed rate debt security, except any zero coupon debt security, will bear interest from its original issue date or from the most recent date to which interest on the debt security has been paid or made available for payment. Interest will accrue on the principal of a fixed rate debt security at the fixed yearly rate stated in the applicable prospectus supplement, until the principal is paid or made available for payment or the security has been converted or exchanged. Each payment of interest due on an interest payment date or the date of maturity will include interest accrued from and including the last date to which interest has been paid, or made available for payment, or from the issue date if none has been paid or made available for payment, to but excluding the interest payment date or the date of maturity. We will compute interest on fixed rate debt securities on the basis of a 360-day year of twelve 30-day months. We will pay interest on each interest payment date and at maturity as described below under "—Payment Mechanics for Debt Securities."

*Floating Rate Debt Securities*

**Interest Rate Formulas.** A debt security of this type will bear interest at rates that are determined by reference to an interest rate formula. In some cases, the rates may also be adjusted by adding or subtracting a spread or multiplying by a spread multiplier and may be subject to a minimum rate or a maximum rate. If your debt security is a floating rate debt security, the formula and any adjustments that apply to the interest rate will be specified below.

Each floating rate debt security will bear interest from its original issue date or from the most recent date to which interest on the debt security has been paid or made available for payment. Interest will accrue on the principal of a floating rate debt security at the yearly rate determined according to the interest rate formula stated in the applicable prospectus supplement, until the principal is paid or made available for payment. We will pay interest on each interest payment date and at maturity as described below under "—Payment Mechanics for Debt Securities."

**Calculation of Interest.** Calculations relating to floating rate debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. That institution may include any affiliate of ours, such as UBS Securities LLC. The prospectus supplement for a particular floating rate debt security will name the institution that we have appointed to act as the calculation agent for that debt security as of its original issue date. We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. Absent manifest error, all determinations of the calculation will be final and binding on you and us, without any liability on the part of the calculation agent.

For each floating rate debt security, the calculation agent will determine, on the corresponding interest calculation or determination date, as described in the applicable prospectus supplement, the interest rate that takes effect on each interest reset date. In addition, the calculation agent will calculate the amount of interest that has accrued during each interest period—*i.e.*, the period from and including the original issue date, or the last date to which interest has been paid or made available for payment, to but excluding the payment date. For each interest period, the calculation agent will calculate the amount of accrued interest by multiplying the face or other specified amount of the floating rate debt security by an accrued interest factor for the interest period. This factor will equal the sum of the interest factors calculated for each day during the interest period. The interest factor for each day will be expressed as a decimal and will be calculated by dividing the interest rate, also expressed as a decimal, applicable to that day by 360 or by the actual number of days in the year, as specified in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security—and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point, *e.g.*, 9.876541% (or .09876541) being rounded down to 9.87654% (or .0987654) and 9.876545% (or .09876545) being rounded up to 9.87655% (or .0987655). All amounts used in or resulting from any calculation relating to a floating rate debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the applicable prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates, and they may include UBS AG or its affiliates.

**Indexed Debt Securities**

A debt security of this type provides that the principal amount payable at its maturity, and/or the amount of interest payable on an interest payment date, will be determined by reference to:

- securities of one or more issuers;
- one or more currencies;
- one or more commodities;
- any other financial, economic or other measure or instrument, including the occurrence or non-occurrence of any event or circumstance; and/or
- one or more indices or baskets of the items described above.

If you are a holder of an indexed debt security, you may receive an amount at maturity (including upon acceleration following an event of default) that is greater than or less than the face amount of your debt security depending upon the formula used to determine the amount payable and the value of the applicable index at maturity. The value of the applicable index will fluctuate over time.

An indexed debt security may provide either for cash settlement or for physical settlement by delivery of the underlying property or another property of the type listed above. An indexed debt security may also provide that the form of settlement may be determined at our option or at the holder's option. Some indexed debt securities may be convertible, exercisable or exchangeable, at our option or the holder's option, into or for securities of an issuer other than UBS AG.

If you purchase an indexed debt security, your prospectus supplement will include information about the relevant index, about how amounts that are to become payable will be determined by reference to the price or value of that index and about the terms on which the security may be settled physically or in cash. The prospectus supplement will also identify the calculation agent that will calculate the amounts payable with respect to the indexed debt security and may exercise significant discretion in doing so. The calculation agent may be UBS Securities LLC or another of our affiliates. See "Considerations Relating to Indexed Securities" for more information about risks of investing in debt securities of this type.

**Original Issue Discount Debt Securities**

A fixed rate debt security, a floating rate debt security or an indexed debt security may be an original issue discount debt security. A debt security of this type is issued at a price lower than its principal amount and provides that, upon redemption or acceleration of its maturity, an amount less than its principal amount will be payable. An original issue discount debt security may be a zero coupon debt security. A debt security issued at a discount to its principal may, for U.S. federal income tax purposes, be considered an original issue discount debt security, regardless of the amount payable upon redemption or acceleration of maturity. See "U.S. Tax Considerations—Taxation of Debt Securities— Original Issue Discount" below for a brief description of the U.S. federal income tax consequences of owning an original issue discount debt security.

**Information in Your Prospectus Supplement**

Your prospectus supplement will describe the specific terms of your debt security, which will include some or all of the following:

- any limit on the total principal amount of the debt securities of the same series;
- the stated maturity;
- the specified currency or currencies for principal and interest, if not U.S. dollars;
- the price at which we originally issue your debt security, expressed as a percentage of the principal amount, and the original issue date;
- whether your debt security is a fixed rate debt security, a floating rate debt security or an indexed debt security;
- if your debt security is a fixed rate debt security, the yearly rate at which your debt security will bear interest, if any, and the interest payment dates;
- if your debt security is a floating rate debt security, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial base rate, maximum rate or minimum rate; the interest reset, determination, calculation and payment dates; the day count used to calculate interest payments for any period; the business day convention; and the calculation agent;
- if your debt security is an indexed debt security, the principal amount, if any, we will pay you at maturity, the amount of interest, if any, we will pay you on an interest payment date or the formula we will use to calculate these amounts, if any, and the terms on which your debt security will be exchangeable for or payable in cash, securities or other property;
- if your debt security may be converted into or exercised or exchanged for debt or equity securities of one or more third parties, the terms on which conversion, exercise or exchange may occur, including whether conversion, exercise or exchange is mandatory, at the option of the holder or at our option, the period during which conversion, exercise or exchange may occur, the initial conversion, exercise or exchange price or rate and the circumstances or manner in which the amount of securities issuable upon conversion, exercise or exchange may be adjusted;
- if your debt security is also an original issue discount debt security, the yield to maturity;
- if applicable, the circumstances under which your debt security may be redeemed at our option or repaid at the holder's option before the stated maturity, including any redemption commencement date, repayment date(s), redemption price(s) and redemption period(s);
- the authorized denominations, if other than $1,000 and integral multiples of $1,000;
- the depositary for your debt security, if other than DTC, and any circumstances under which the holder may request securities in non-global form, if we choose not to issue your debt security in book-entry form only;
- if your debt security will be issued in bearer form, any special provisions relating to bearer securities;
- if applicable, the circumstances under which we will pay additional amounts on any debt securities held by a person who is not a United States person for tax purposes and under which we can redeem the debt securities if we have to pay additional amounts;
- the names and duties of any co-trustees, depositaries, authenticating agents, paying agents, transfer agents or registrars for your debt security, as applicable; and
- any other terms of your debt security, which could be different from those described in this prospectus.

If you purchase your debt security—or any of our other securities we describe in this prospectus—in a market-making transaction, you will receive information about the price you pay and your trade and settlement dates in a separate confirmation of sale. A market-making transaction is one in which we, UBS Securities LLC, UBS Financial Services Inc. or another of our affiliates resells a security that it has previously acquired from another holder. A market-making transaction in a particular security occurs after the original issuance and sale of the security.

### Extension of Maturity

If specified in the applicable prospectus supplement, we will have the option to extend the stated maturity of your debt security for one or more periods of whole years up to but not beyond the final maturity date specified in the prospectus supplement. We call a debt security whose maturity we may extend an extendible debt security. We call the period of time as to which we may extend the maturity the extension period. The following procedures will apply to extendible debt securities, unless otherwise indicated in the applicable prospectus supplement.

We may extend the maturity of an extendible debt security by notifying the paying agent between 45 and 60 days before the stated maturity then in effect. The stated maturity may be the original stated maturity, as described in the prospectus supplement, or a maturity that we previously extended by following these procedures. If we notify the paying agent that we will extend the maturity, the paying agent will send a notice to each holder by first class mail, postage prepaid, or by other means agreed upon between us and the paying agent, at least 30 days before the stated maturity then in effect. The notice sent by the paying agent will provide the following information:

- our election to extend the maturity of the extendible debt security;
- the extended maturity date or, if the maturity date had previously been extended, the new extended maturity date;
- the interest rate that will apply during the extension period or, in the case of a floating rate debt security, the spread and/or spread multiplier, if any, applicable during the extension period; and
- the provisions, if any, for redemption and repayment during the extension period.

Once the paying agent has mailed the notice to each holder, the extension of the maturity date will take place automatically. All of the terms of the debt security will be the same as the terms of the debt security as originally issued, except those terms that are described in the notice sent by the paying agent to each holder and except as described in the following paragraph.

Not later than 10:00 a.m., New York City time, on the twentieth calendar day before the maturity date then in effect for an extendible debt security or, if that day is not a business day, on the next succeeding business day, we may revoke the interest rate set forth in the extension notice sent by the paying agent to each holder and establish a higher interest rate for the extension period. If we elect to establish a higher interest rate, the paying agent will send a notice to each holder by first class mail, postage prepaid, or by other means agreed between us and the paying agent, of the higher interest rate in the case of a floating rate debt security, the higher spread and/or spread multiplier, if any. The notice of the higher rate cannot be revoked. All extendible debt securities as to which the maturity date has been extended will bear the higher rate for the extension period, whether or not tendered for repayment.

If we elect to extend the maturity date of an extendible debt security, each holder may elect repayment of all or part of its debt security on the maturity date then in effect at a price equal to the principal amount plus any accrued and unpaid interest to that date. To elect repayment, a holder must give notice to the paying agent between 25 and 35 days before the maturity date in effect. The notice must consist of either:

- the debt security along with the completed form entitled "Option to Elect Repayment," which will be attached to your debt security.
- a telegram, facsimile transmission or letter from a member of a national securities exchange, the Financial Industry Regulatory Authority, Inc. or a commercial bank or trust company in the United States setting forth the name of the holder, the principal amount of the debt security, the principal amount of the debt security to be repaid, the certificate number or a description of the tenor and terms of the debt security, a statement that the option to elect repayment is being elected and a guarantee that the debt security, together with the completed form entitled "Option to Elect Repayment" will be received by the paying agent no later than the fifth business day after the date of the telegram, facsimile transmission or letter. The telegram, facsimile transmission or letter will become effective upon receipt, by that fifth business day, of the debt security and complete form.

The holder may revoke the election of repayment by sending to the paying agent written notice by 3:00 p.m., New York City time, on the twentieth day before the maturity date then in effect or, if that day is not a business day, on the next succeeding business day.

If an extendible debt security is represented by a global debt security, the depositary or its nominee, as the holder, will be the only person that can exercise the right to elect repayment or revoke such an election. Any indirect owners who own beneficial interests in the global debt security and wish to make such an election must give proper and timely instructions to the banks or brokers through which they hold their interests, requesting that they notify the depositary to make a repayment election or revoke such an election on their behalf. Different firms have different deadlines for accepting instructions from their customers, and you should take care to act promptly enough to ensure that your request is given effect by the depositary before the applicable deadline for exercise.

### Redemption and Repayment

Unless otherwise indicated in your prospectus supplement, your debt security will not be entitled to the benefit of any sinking fund—that is, we will not deposit money on a regular basis into any separate custodial account to repay your debt securities. In addition, we will not be entitled to redeem your debt security before its stated maturity (except for certain tax reasons, as described below) unless your prospectus supplement specifies a redemption date or redemption commencement date. You will not be entitled to require us to buy your debt security from you, before its stated maturity, unless your prospectus supplement specifies one or more repayment dates.

If your prospectus supplement specifies one or more redemption dates, a redemption commencement date or a repayment date, it will also specify one or more redemption prices or repayment prices, which may be expressed as a percentage of the principal amount of your debt security. It may also specify one or more redemption periods during which the redemption prices relating to a redemption of debt securities during those periods will apply.

If your prospectus supplement specifies one or more redemption dates, your debt security will be redeemable at our option on any of those dates. If your prospectus supplement specifies a redemption commencement date, your debt security will be redeemable at our option at any time on or after that date. If we redeem your debt security, we will do so at the specified redemption price. If different prices are specified for different redemption periods, the price we pay will be the price that applies to the redemption period during which your debt security is redeemed.

If your prospectus supplement specifies a repayment date, your debt security will be repayable at your option on the specified repayment date at the specified repayment price, together with interest accrued to the repayment date.

If we exercise an option to redeem any debt security, we will give the trustee and the holders written notice of the principal amount of the debt security to be redeemed, not less than 5 business days nor more than 60 days before the applicable redemption date unless otherwise specified in your prospectus supplement. We will give the notice in the manner described below in "—Notices."

If a debt security represented by a global debt security is subject to repayment at the holder's option, the depositary or its nominee, as the holder, will be the only person that can exercise the right to repayment. Any indirect holders who own beneficial interests in the global debt security and wish to exercise a repayment right must give proper and timely instructions to the banks or brokers through which they hold their interests, requesting that they notify the depositary to exercise the repayment right on their behalf. Different firms have different deadlines for accepting instructions from their customers, and you should take care to act promptly enough to ensure that your request is given effect by the depositary before the applicable deadline for exercise.

Street name and other indirect holders should contact their banks or brokers for information about how to exercise a repayment right in a timely manner.

We or our affiliates may purchase debt securities from investors who are willing to sell from time to time, either in the open market at prevailing prices or in private transactions at negotiated prices. Debt securities that we or they purchase may, at our discretion, be held, resold or cancelled.

**Optional Tax Redemption**

In addition to the situations described above under "—Redemption and Repayment," we also have the option to redeem the debt securities in two situations described below, unless otherwise indicated in your prospectus supplement. The redemption price for the debt securities, other than original issue discount debt securities, will be equal to the principal amount of the debt securities being redeemed plus accrued interest and any additional amounts due on the date fixed for redemption. The redemption price for original issue discount debt securities will be specified below. Furthermore, we must give you between 10 and 60 days' notice before redeeming the debt securities unless otherwise specified in your prospectus supplement.

- The first situation is where, as a result of a change in, execution of or amendment to any laws or treaties or the official application or interpretation of any laws or treaties, we would be required to pay additional amounts as described below under "—Payment of Additional Amounts."

  This applies only in the case of changes, executions, amendments, applications or interpretations that occur on or after the date specified in the prospectus supplement for the applicable debt securities and in a relevant jurisdiction, as defined in "—Payment of Additional Amounts" below. If UBS is succeeded by another entity, the applicable jurisdiction will be the jurisdiction in which the successor entity is organized, and the applicable date will be the date the entity became a successor.

  We would not have the option to redeem in this case if we could have avoided the payment of additional amounts or the deduction or withholding by using reasonable measures available to us.

- The second situation is where a person located outside of a relevant jurisdiction into which UBS is merged or to whom it has conveyed, transferred or leased its property is required to pay an additional amount. We would have the option to redeem the debt securities even if we are required to pay additional amounts immediately after the merger, conveyance, transfer or lease. We are not required to use reasonable measures to avoid the obligation to pay additional amounts in this situation.

**Payment of Additional Amounts**

A relevant jurisdiction may require UBS to withhold amounts from payments on the principal or interest on a debt security for taxes or any other governmental charges. If the relevant jurisdiction requires a withholding of this type, UBS may be required to pay you an additional amount so that the net amount you receive will be the amount specified in the debt security to which you are entitled.

By relevant jurisdiction, we mean Switzerland or a jurisdiction in which the UBS branch through which debt securities are issued is located. UBS will not have to pay additional amounts in respect of taxes or other governmental charges that are required to be deducted or withheld by any paying agent from a payment on a debt security, if such payment can be made without such deduction or withholding by any other paying agent, or in respect of taxes or other governmental charges that would not have been imposed but for

- the existence of any present or former connection between you and the relevant jurisdiction, other than the mere holding of the debt security and the receipt of payments on it;
- any estate, inheritance, gift, sales, transfer or personal property tax or any similar tax, duty, assessment or governmental charge;
- a failure to comply with any reasonable certification, documentation, information or other reporting requirement concerning your nationality, residence, identity or connection with the relevant jurisdiction, if such compliance is required as a precondition to relief or exemption from such taxes or other governmental charges (including, without limitation, a certification that you are not resident in the relevant jurisdiction or are not an individual resident of a member state of the European Union);
- any taxes which would not have been imposed but for your presentation, or a presentation on your behalf, of a debt security payment on a date more than 15 days after the date on which such payment on the debt security becomes due and payable or on which the payment is duly provided for, whichever occurs later; or
- any combination of the items listed above.

In addition, no additional amounts will be required to be paid on account of any deduction or withholding imposed or required pursuant to Sections 1471 through 1474 of the Internal Revenue Code (as defined below under "U.S. Tax Considerations"), any current or future regulations or official interpretations thereof, any agreement entered into pursuant to Section 1471(b) of the Internal Revenue Code, or any fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of such Sections of the Internal Revenue Code.

These provisions will also apply to any taxes or governmental charges imposed by any jurisdiction in which a successor to UBS is organized. The prospectus supplement relating to the debt security may describe additional circumstances in which UBS would not be required to pay additional amounts.

**Mergers and Similar Transactions**

We are generally permitted to merge or consolidate with another firm. We are also permitted to sell our assets substantially as an entirety to another firm. With regard to any series of debt securities, we may not take any of these actions, however, unless all the following conditions are met:

- If the successor firm in the transaction is not UBS, the successor firm must be organized as a corporation, partnership or trust and must expressly assume our obligations under the debt securities of that series and the debt indenture. The successor firm must be organized under the laws of Switzerland.
- Immediately after the transaction, no default under the debt securities of that series has occurred and is continuing. For this purpose, "default under the debt securities of that series" means an event of default with respect to that series or any event that would be an event of default with respect to that series if the requirements for giving us default notice and for our default having to continue for a specific period of time were disregarded. We describe these matters below under "—Default, Remedies and Waiver of Default."

If the conditions described above are satisfied with respect to the debt securities of any series, we will not need to obtain the approval of the holders of those debt securities in order to merge or consolidate or to sell our assets. Also, these conditions will apply only if we wish to merge or consolidate with another firm or sell our assets substantially as an entirety to another firm. We will not need to satisfy these conditions if we enter into other types of transactions, including any transaction in which we acquire the stock or assets of another firm, any transaction that involves a change of control of UBS but in which we do not merge or consolidate and any transaction in which we sell less than substantially all our assets.

Also, if we merge, consolidate or sell our assets substantially as an entirety and the successor firm is a non-Swiss entity, neither we nor any successor would have any obligation to compensate you for any resulting adverse tax consequences to the debt securities.

**Defeasance and Covenant Defeasance**

If indicated in the applicable prospectus supplement for a debt security, the provisions for full defeasance and covenant defeasance described below will apply to that debt security. In general, we expect these provisions to apply to each debt security that has a specified currency of U.S. dollars and is not a floating rate or indexed debt security.

*Full Defeasance*

If there is a change in U.S. federal tax law, as described below, we can legally release ourselves from all payment and other obligations on your debt security. This is called full defeasance. To do so, each of the following must occur:

- We must deposit in trust for the benefit of all holders of those debt securities, money, U.S. government or U.S. government agency notes or bonds or a combination of money and U.S. government or U.S. government agency notes or bonds that will, in each case, in the opinion of a nationally recognized firm of independent public accountants, generate enough cash to make interest, principal and any other payments on those debt securities on their various due dates.

- There must be a change in current U.S. federal tax law or an Internal Revenue Service ruling that lets us make the above deposit without causing the holders to be taxed on those debt securities any differently than if we did not make the deposit and just repaid the debt securities ourselves. Under current federal tax law, the deposit and our legal release from your debt securities would be treated as though we took back your debt security and gave you your share of the cash and notes or bonds deposited in trust. In that event, you could recognize gain or loss on your debt security.
- We must deliver to the trustee a legal opinion of our counsel confirming the tax law change described above.

If we ever fully defease your debt security, you would have to rely solely on the trust deposit for payments on your debt security. You would not be able to look to us for payment in the event of any shortfall.

*Covenant Defeasance*

Under current U.S. federal tax law, we can make the same type of deposit described above and be released from any restrictive covenants relating to your debt security that may be described in your prospectus supplement. This is called covenant defeasance. In that event, you would lose the protection of those restrictive covenants. In order to achieve covenant defeasance for any debt securities, we must do both of the following:

- We must deposit in trust for the benefit of all holders of those debt securities, money, U.S. government or U.S. government agency notes or bonds or a combination of money and U.S. government or U.S. government agency notes or bonds that will, in each case, in the opinion of a nationally recognized firm of independent public accountants, generate enough cash to make interest, principal and any other payments on those debt securities on their various due dates.
- We must deliver to the trustee a legal opinion of our counsel confirming that under U.S. federal income tax law as then in effect we may make the above deposit without causing you to be taxed on those debt securities any differently than if we did not make the deposit and just repaid those debt securities ourselves.

If we accomplish covenant defeasance with regard to your debt security, the following provisions of the debt indenture and your debt security would no longer apply:

- Any covenants that your prospectus supplement may state are applicable to your debt security; and
- The events of default resulting from a breach of covenants, described below in the fourth bullet point under "—Default, Remedies and Waiver of Default—Events of Default."

Any right we have to redeem will survive covenant defeasance with regard to those debt securities.

If we accomplish covenant defeasance on your debt security, you can still look to us for repayment of your debt security in the event of any shortfall in the trust deposit. You should note, however, that if one of the remaining events of default occurred, such as our bankruptcy, and your debt security became immediately due and payable, there may be a shortfall. Depending on the event causing the default you may not be able to obtain payment of the shortfall.

**Default, Remedies and Waiver of Default**

You will have special rights if an event of default with respect to your series of debt securities occurs and is not cured, as described in this subsection.

*Events of Default*

Unless your prospectus supplement says otherwise, when we refer to an event of default with respect to any series of debt securities, we mean any of the following:

- We do not pay the principal or any premium (including delivering any security or other property deliverable) on any debt security of that series at its maturity;
- We do not pay interest on any debt securities of that series within 30 days after it becomes due and payable;
- We do not deposit a sinking fund payment with regard to any debt securities of that series on its due date, but only if the payment is required in the applicable prospectus supplement;
- We remain in breach of any other covenant we make in the debt indenture for the benefit of the debt securities of that series, for 60 days after we receive a notice of default stating that we are in breach and requiring us to remedy the breach. The notice must be sent by the trustee or the holders of not less than 10% in principal amount of the relevant series of debt securities then outstanding;
- We file for bankruptcy or certain other bankruptcy, insolvency or reorganization events relating to UBS occur; or
- If the applicable prospectus supplement states that any additional event of default applies to your series, that event of default occurs.

*Remedies If an Event of Default Occurs*

If an event of default has occurred with respect to any series of debt securities and has not been cured or waived, the trustee or the holders of not less than 25% in principal amount of all debt securities of that series then outstanding may declare the entire principal amount of the debt securities of that series to be due immediately. If an event of default occurs because of bankruptcy, insolvency or reorganization events relating to UBS, the entire principal amount of the debt securities of that series will be automatically accelerated, without any action by the trustee or any holder.

Each of the situations described above is called an acceleration of the maturity of the affected series of debt securities. If the maturity of any series is accelerated and a judgment for payment has not yet been obtained, the holders of a majority in principal amount of the debt securities of that series may cancel the acceleration for the entire series.

If an event of default occurs, the trustee will have special duties. The trustee will be obligated to use those of its rights and powers under the debt indenture, and to use the same degree of care and skill in doing so, that a prudent person would use in that situation in conducting his or her own affairs.

Except as described in the prior paragraph, the trustee is not required to take any action under the debt indenture at the request of any holders unless the holders offer the trustee reasonable protection from expenses and liability. This is called an indemnity. If the trustee is provided with an indemnity reasonably satisfactory to it, the holders of a majority in principal amount of all debt securities of the relevant series may direct the time, method and place of conducting any lawsuit or other formal legal action seeking any remedy available to the trustee with respect to that series. These majority holders may also direct the trustee in performing any other action under the debt indenture with respect to the debt securities of that series.

Before you bypass the trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to any debt security, all of the following must occur:

- The holder of your debt security must give the trustee written notice that an event of default has occurred, and the event of default must not have been cured or waived.
- The holders of not less than 25% in principal amount of all debt securities of your series must make a written request that the trustee take action because of the default, and they or other holders must offer to the trustee indemnity reasonably satisfactory to the trustee against the cost and other liabilities of taking that action.
- The trustee must not have taken action for 60 days after the above steps have been taken.
- During those 60 days, the holders of a majority in principal amount of the debt securities of your series must not have given the trustee directions that are inconsistent with the written request of the holders of not less than 25% in principal amount of all debt securities of your series.

You are, however, entitled at any time to bring a lawsuit for the payment of money due on your debt security on or after its due date.

*Waiver of Default*

The holders of not less than a majority in principal amount of the debt securities of any series may waive a default for all debt securities of that series. If this happens, the default will be treated as if it has not occurred. No one can waive a payment default on your debt security, however, without the approval of the particular holder of that debt security.

*We Will Give the Trustee Information About Defaults Annually*

We will furnish to the trustee every year a written statement of two of our officers certifying that to their knowledge we are in compliance with the debt indenture and the debt securities, or else specifying any default under the debt indenture.

Book-entry and other indirect holders should consult their banks or brokers for information on how to give notice or direction to or make a request of the trustee and how to declare or cancel an acceleration of the maturity of the debt securities. Book-entry and other indirect owners are described below under “Legal Ownership and Book-Entry Issuance.”

**Modification and Waiver of Covenants**

There are three types of changes we can make to the debt indenture and the debt securities of any series.

*Changes Requiring Each Holder’s Approval*

First, there are changes that cannot be made without the approval of each holder of a debt security affected by the change. Here is a list of those types of changes:

- change the stated maturity for any principal or interest payment on a debt security;
- reduce the principal amount, the amount payable on acceleration of the maturity after a default, the interest rate or the redemption price for a debt security;
- permit redemption of a debt security if not previously permitted;
- impair any right a holder may have to require repayment of his or her debt security;
- impair any right that a holder of an indexed or any other debt security may have to exchange or convert the debt security for or into securities or other property;
- change the currency of any payment on a debt security other than as permitted by the debt security;
- change the place of payment on a debt security, if it is in non-global form;
- impair a holder’s right to sue for payment of any amount due on his or her debt security;
- reduce the percentage in principal amount of the debt securities of any one or more affected series, taken separately or together, as applicable, the approval of whose holders is needed to change the debt indenture or those debt securities;
- reduce the percentage in principal amount of the debt securities of any one or more affected series, taken separately or together, as applicable, the consent of whose holders is needed to waive our compliance with the debt indenture or to waive defaults; and

- change the provisions of the debt indenture dealing with modification and waiver in any other respect, except to increase any required percentage referred to above or to add to the provisions that cannot be changed or waived without approval of the holder of each affected debt security.

*Changes Not Requiring Approval of Holders*

The second type of change does not require any approval by holders of the debt securities of an affected series. This type of change is limited to clarifications and changes that would not adversely affect the debt securities of that series in any material respect. We also do not need any approval to make changes that affect only debt securities to be issued under the debt indenture after the changes take effect.

We may also make changes or obtain waivers that do not adversely affect a particular debt security, even if they affect other debt securities. In those cases, we do not need to obtain the approval of the holder of the unaffected debt security; we need only obtain any required approvals from the holders of the affected debt securities.

*Changes Requiring Majority Approval*

Any other change to the debt indenture and the debt securities would require the following approval:

- If the change affects only the debt securities of a particular series, it must be approved by the holders of 66⅔% in principal amount of the debt securities of that series.
- If the change affects the debt securities of more than one series of debt securities issued under the debt indenture, it must be approved by the holders of 66⅔% in principal amount of all series affected by the change, with the debt securities of all the affected series voting together as one class for this purpose (and of any affected series that by its terms is entitled to vote separately as a series, as described below).

In each case, the required approval must be given by written consent.

Majority approval would be required for us to obtain a waiver of any of our covenants in the debt indenture. Our covenants include the promises we make about merging, which we describe above under "—Mergers and Similar Transactions." If the holders approve a waiver of a covenant, we will not have to comply with that covenant. The holders, however, cannot approve a waiver of any provision in a particular debt security, or in the debt indenture as it affects that debt security, that we cannot change without the approval of the holder of that debt security as described above under "—Changes Requiring Each Holder's Approval," unless that holder approves the waiver.

Book-entry and other indirect holders should consult their banks or brokers for information on how approval may be granted or denied if we seek to change the debt indenture or the debt securities or request a waiver.

**Special Rules for Action by Holders**

When holders take any action under the debt indenture, such as giving a notice of default, declaring an acceleration, approving any change or waiver or giving the trustee an instruction, we will apply the following rules.

*Only Outstanding Debt Securities Are Eligible*

Only holders of outstanding debt securities of the applicable series will be eligible to participate in any action by holders of debt securities of that series. Also, we will count only outstanding debt securities in determining whether the various percentage requirements for taking action have been met. For these purposes, a debt security will not be "outstanding":

- if it has been surrendered for cancellation;
- if we have deposited or set aside, in trust for its holder, money for its payment or redemption;
- if we have fully defeased it as described above under "—Defeasance and Covenant Defeasance—Full Defeasance"; or
- if we or one of our affiliates, such as UBS Securities LLC or UBS Financial Services Inc., is the beneficial owner.

*Special Series Voting Rights*

We may issue series of debt securities that are entitled, by their terms, to vote separately on matters (for example, modification or waiver of provisions in the debt indenture) that would otherwise require a vote of all affected series, voting together as a single class. Any such series would be entitled to vote together with all other affected series, voting together as one class, and would also be entitled to vote separately, as a series only. These special voting rights will be described in the applicable prospectus supplement. For a series that does not have these special rights, voting will occur as described in the preceding section, but subject to any separate voting rights of any series having special rights. We may issue a series having these or other special voting rights without obtaining the consent of or giving notice to holders of outstanding series.

*Eligible Principal Amount of Some Debt Securities*

In some situations, we may follow special rules in calculating the principal amount of a debt security that is to be treated as outstanding for the purposes described above. This may happen, for example, if the principal amount is payable in a non-U.S. dollar currency, increases over time or is not to be fixed until maturity. For any debt security of the kind described below, we will decide how much principal amount to attribute to the debt security as follows:

- For an original issue discount debt security, we will use the principal amount that would be due and payable on the action date if the maturity of the debt security were accelerated to that date because of a default.

- For a debt security whose principal amount is not known, we will use any amount that we indicate in the prospectus supplement for that debt security. The principal amount of a debt security may not be known, for example, because it is based on an index that changes from time to time and the principal amount is not to be determined until a later date.
- For debt securities with a principal amount denominated in one or more non-U.S. dollar currencies or currency units, we will use the U.S. dollar equivalent, which we will determine.

*Determining Record Dates for Action by Holders*

We will generally be entitled to set any day as a record date for the purpose of determining the holders that are entitled to take action under the debt indenture. In certain limited circumstances, only the trustee will be entitled to set a record date for action by holders. If we or the trustee set a record date for an approval or other action to be taken by holders, that vote or action may be taken only by persons or entities who are holders on the record date and must be taken during the period that we specify for this purpose, or that the trustee specifies if it sets the record date. We or the trustee, as applicable, may shorten or lengthen this period from time to time. This period, however, may not extend beyond the 180th day after the record date for the action. In addition, record dates for any global debt security may be set in accordance with procedures established by the depositary from time to time. Accordingly, record dates for global debt securities may differ from those for other debt securities.

**Form, Exchange and Transfer of Debt Securities**

We will issue each debt security in global—*i.e.*, book-entry—form only, unless we specify otherwise in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security. Those who own beneficial interests in a global debt security will do so through participants in the depositary's securities clearance system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. We describe book-entry securities below under "Legal Ownership and Book-Entry Issuance." Unless we specify otherwise in the applicable prospectus supplement, The Depository Trust Company, New York, New York, known as DTC, will be the depositary for all debt securities in global form.

In addition, we will generally issue each debt security in registered form, without coupons, unless we specify otherwise in the applicable prospectus supplement. If we issue a debt security in bearer form, the applicable prospectus supplement will describe the provisions that would apply to that security.

If a debt security is issued as a global debt security, only the depositary—*e.g.*, DTC, Euroclear and Clearstream—will be entitled to transfer and exchange the debt security or exercise any other rights of a holder as described in this subsection, since the depositary will be the sole holder of the debt security.

If any debt securities cease to be issued in global form, then unless we indicate otherwise in your prospectus supplement, they will be issued:

- only in fully registered form;
- without interest coupons; and
- unless we indicate otherwise in your prospectus supplement, in denominations of $1,000 and integral multiples of $1,000.

Holders may exchange their debt securities for debt securities of smaller denominations (subject to the limit above) or combined into fewer debt securities of larger denominations, as long as the total principal amount is not changed. You may not exchange your debt securities for securities of a different series or having different terms, unless your prospectus supplement says you may.

Holders may exchange or transfer their debt securities at the office of the trustee. They may also replace lost, stolen, destroyed or mutilated debt securities at that office. We have appointed the trustee to act as our agent for registering debt securities in the names of holders and transferring and replacing debt securities. We may appoint another entity to perform these functions or perform them ourselves.

Holders will not be required to pay a service charge to transfer or exchange their debt securities, but they may be required to pay for any tax or other governmental charge associated with the exchange or transfer. The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with the holder's proof of legal ownership. The transfer agent may require an indemnity before replacing any debt securities.

If we have designated additional transfer agents for your debt security, they will be named in your prospectus supplement. We may appoint additional transfer agents or cancel the appointment of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If the debt securities of any series are redeemable and we redeem less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing or during any other period specified in the applicable prospectus supplement, in order to freeze the list of holders who will receive the mailing. We may also refuse to register transfers of or exchange any debt security selected for redemption, except that we will continue to permit transfers and exchanges of the unredeemed portion of any debt security being partially redeemed.

The rules for exchange described above apply to exchanges of debt securities for other debt securities of the same series and kind. If a debt security is convertible, exercisable or exchangeable into or for a different kind of security, such as one that we have not issued, or for other property, the rules governing that type of conversion, exercise or exchange will be described in the applicable prospectus supplement.

**Payment Mechanics for Debt Securities**

**Who Receives Payments?**

If interest is due on a debt security on an interest payment date, we will pay the interest to the person in whose name the debt security is registered at the close of business on the regular record date described below relating to the interest payment date. If interest is due at maturity but on a day that is not an interest payment date, we will pay the interest to the person entitled to receive the principal of the debt security. If principal or another amount besides interest is due on a debt security at maturity, we will pay the amount to the holder of the debt security against surrender of the debt security at a proper place of payment (or, in the case of a global debt security, in accordance with the applicable policies of the depositary).

**Payment Dates and Regular Record Dates for Interest**

Unless we specify otherwise in the applicable prospectus supplement, interest on any fixed rate debt security will be payable semiannually each May 15 and November 15 and at maturity, and the regular record date relating to an interest payment date for any fixed rate debt security will be the May 1 or November 1 next preceding that interest payment date. The regular record date relating to an interest payment date for any floating rate debt security will be the 15th calendar day before that interest payment date. These record dates will apply whether or not a particular record date is a business day. For the purpose of determining the holder at the close of business on a regular record date when business is not being conducted, the close of business will mean 5:00 P.M., New York City time, on that day.

The term “business day” means, for any debt security, a day that meets all the following applicable requirements:

- for all debt securities, is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City generally are authorized or obligated by law, regulation or executive order to close and that satisfies any other criteria specified in your prospectus supplement;
- if the debt security is a floating rate debt security whose interest rate is based on LIBOR, is also a day on which dealings in the relevant index currency specified in the applicable prospectus supplement are transacted in the London interbank market;
- if the debt security has a specified currency other than U.S. dollars or euros, is also a day on which banking institutions are not authorized or obligated by law, regulation or executive order to close in the principal financial center of the country issuing the specified currency;
- if the debt security either is a floating rate debt security whose interest rate is based on EURIBOR or has a specified currency of euros, is also a day on which the Trans-European Automated Real-time Gross settlement Express Transfer (TARGET) System, or any successor system, is open for business;
- if the debt security is held through Euroclear, is also not a day on which banking institutions in Brussels, Belgium are generally authorized or obligated by law, regulation or executive order to close; and
- if the debt security is held through Clearstream, is also not a day on which banking institutions in Luxembourg are generally authorized or obligated by law, regulation or executive order to close.

**How We Will Make Payments Due in U.S. Dollars**

We will follow the practices described in this subsection when paying amounts due in U.S. dollars. Payments of amounts due in other currencies will be made as described in the next subsection.

**Payments on Global Debt Securities.** We will make payments on a global debt security in accordance with the applicable policies of the depositary as in effect from time to time. Under those policies, we will pay directly to the depositary, or its nominee, and not to any indirect owners who own beneficial interests in the global debt security. An indirect owner’s right to receive those payments will be governed by the rules and practices of the depositary and its participants, as described under “Legal Ownership and Book-Entry Issuance—What Is a Global Security?”

**Payments on Non-Global Debt Securities.** We will make payments on a debt security in non-global, registered form as follows. We will pay interest that is due on an interest payment date by check mailed on the interest payment date to the holder at his or her address shown on the trustee’s records as of the close of business on the regular record date. We will make all other payments by check at the paying agent described below, against surrender of the debt security. All payments by check will be made in next-day funds—that is, in funds that become available on the day after the check is cashed.

Alternatively, if a non-global debt security has a face amount of at least $1,000,000 and the holder asks us to do so, we will pay any amount that becomes due on the debt security by wire transfer of immediately available funds to an account at a bank in New York City, on the due date. To request wire payment, the holder must give the paying agent appropriate wire transfer instructions at least five business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person who is the holder on the relevant regular record date. In the case of any other payment, payment will be made only after the debt security is surrendered to the paying agent. Any wire instructions, once properly given, will remain in effect unless and until new instructions are given in the manner described above.

Book-entry and other indirect owners should consult their banks or brokers for information on how they will receive payments on their debt securities.

**How We Will Make Payments Due in Other Currencies**

We will follow the practices described in this subsection when paying amounts that are due in a specified currency other than U.S. dollars.

**Payments on Global Debt Securities.** We will make payments on a global debt security in accordance with the applicable policies of the depositary as in effect from time to time. We understand that these policies, as currently in effect at DTC, are as follows:

Unless otherwise indicated in your prospectus supplement, if you are an indirect owner of global debt securities denominated in a specified currency other than U.S. dollars and if you have the right to elect to receive payments in that other currency and you do make that election, you must notify the participant through which your interest in the global debt security is held of your election:

- on or before the applicable regular record date, in the case of a payment of interest, or
- on or before the 16th day prior to stated maturity, or any redemption or repayment date, in the case of payment of principal or any premium.

You may elect to receive all or only a portion of any interest, principal or premium payment in a specified currency other than U.S. dollars.

Your participant must, in turn, notify DTC of your election on or before the third DTC business day after that regular record date, in the case of a payment of interest, and on or before the 12th DTC business day prior to stated maturity, or on the redemption or repayment date if your debt security is redeemed or repaid earlier, in the case of a payment of principal or any premium.

DTC, in turn, will notify the paying agent of your election in accordance with DTC's procedures.

If complete instructions are received by the participant and forwarded by the participant to DTC, and by DTC to the paying agent, on or before the dates noted above, the paying agent, in accordance with DTC's instructions, will make the payments to you or your participant by wire transfer of immediately available funds to an account maintained by you or your participant with a bank located in the country issuing the specified currency or in another jurisdiction acceptable to us and the paying agent.

If the foregoing steps are not properly completed, we expect DTC to inform the paying agent that payment is to be made in U.S. dollars. In that case, we or our agent will convert the payment to U.S. dollars in the manner described below under "—Conversion to U.S. Dollars." We expect that we or our agent will then make the payment in U.S. dollars to DTC, and that DTC in turn will pass it along to its participants.

Book-entry and other indirect holders of a global debt security denominated in a currency other than U.S. dollars should consult their banks or brokers for information on how to request payment in the specified currency.

**Payments on Non-Global Debt Securities.** Except as described in the second to last paragraph under this heading, we will make payments on debt securities in non-global form in the applicable specified currency. We will make these payments by wire transfer of immediately available funds to any account that is maintained in the applicable specified currency at a bank designated by the holder and is acceptable to us and the trustee. To designate an account for wire payment, the holder must give the paying agent appropriate wire instructions at least five business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person who is the holder on the regular record date. In the case of any other payment, the payment will be made only after the debt security is surrendered to the paying agent. Any instructions, once properly given, will remain in effect unless and until new instructions are properly given in the manner described above.

If a holder fails to give instructions as described above, we will notify the holder at the address in the trustee's records and will make the payment within five business days after the holder provides appropriate instructions. Any late payment made in these circumstances will be treated under the debt indenture as if made on the due date, and no interest will accrue on the late payment from the due date to the date paid.

Although a payment on a debt security in non-global form may be due in a specified currency other than U.S. dollars, we will make the payment in U.S. dollars if the holder asks us to do so. To request U.S. dollar payment, the holder must provide appropriate written notice to the trustee at least five business days before the next due date for which payment in U.S. dollars is requested. In the case of any interest payment due on an interest payment date, the request must be made by the person who is the holder on the regular record date. Any request, once properly made, will remain in effect unless and until revoked by notice properly given in the manner described above.

Indirect owners of a non-global debt security with a specified currency other than U.S. dollars should contact their banks or brokers for information about how to receive payments in the specified currency or in U.S. dollars.

**Conversion to U.S. Dollars.** When we are asked by a holder to make payments in U.S. dollars of an amount due in another currency, either on a global debt security or a non-global debt security as described above, we will determine the U.S. dollar amount the holder receives as follows. The exchange rate agent described below will request currency bid quotations expressed in U.S. dollars from three or, if three are not available, then two, recognized foreign exchange dealers in New York City, any of which may be the exchange rate agent, which may be UBS Securities LLC, an affiliate of UBS, as of 11:00 A.M., New York City time, on the second business day before the payment date. Currency bid quotations will be requested on an aggregate basis, for all holders of debt securities requesting U.S. dollar payments of amounts due on the same date in the same specified currency. The U.S. dollar amount the holder receives will be based on the highest acceptable currency bid quotation received by the exchange rate agent. If the exchange rate agent determines that at least two acceptable currency bid quotations are not available on that second business day, the payment will be made in the specified currency.

To be acceptable, a quotation must be given as of 11:00 A.M., New York City time, on the second business day before the due date and the quoting dealer must commit to execute a contract at the quotation in the total amount due in that currency on all series of debt securities. If some but not all of the relevant debt securities are LIBOR debt securities or EURIBOR debt securities, the second preceding business day will be determined for this purpose as if none of those debt securities were LIBOR debt securities or EURIBOR debt securities.

A holder that requests payment in U.S. dollars will bear all associated currency exchange costs, which will be deducted from the payment.

**When the Specified Currency Is Not Available.** If we are obligated to make any payment in a specified currency other than U.S. dollars, and the specified currency or any successor currency is not available to us or cannot be paid to you due to circumstances beyond our control—such as the imposition of exchange controls or a disruption in the currency markets—we will be entitled to satisfy our obligation to make the payment in that specified currency by making the payment in U.S. dollars, on the basis specified in the applicable prospectus supplement.

For a specified currency other than U.S. dollars, the exchange rate will be the noon buying rate for cable transfers of the specified currency in New York City as quoted by the Federal Reserve Bank of New York on the then-most recent day on which that bank has quoted that rate.

The foregoing will apply to any debt security, whether in global or non-global form, and to any payment, including a payment at maturity. Any payment made under the circumstances and in a manner described above will not result in a default under any debt security or the debt indenture.

**Exchange Rate Agent.** If we issue a debt security in a specified currency other than U.S. dollars, we will appoint a financial institution to act as the exchange rate agent and will name the institution initially appointed when the debt security is originally issued in the applicable prospectus supplement. We may select UBS Securities LLC or another of our affiliates to perform this role. We may change the exchange rate agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change.

All determinations made by the exchange rate agent will be at its sole discretion unless we state in your prospectus supplement that any determination is subject to our approval. In the absence of manifest error, those determinations will be conclusive for all purposes and binding on you and us, without any liability on the part of the exchange rate agent.

### Payment When Offices Are Closed

If any payment is due on a debt security on a day that is not a business day, we will make the payment on the next day that is a business day. Unless specified otherwise in the applicable prospectus supplement, payments postponed to the next business day in this situation will be treated under the debt indenture as if they were made on the original due date. Postponement of this kind will not result in a default under any debt security or the debt indenture, and no interest will accrue on the postponed amount from the original due date to the next day that is a business day. The term business day has a special meaning, which we describe above under "—Payment Dates and Regular Record Dates for Interest."

### Paying Agent

We may appoint one or more financial institutions to act as our paying agents, at whose designated offices debt securities in non-global entry form may be surrendered for payment at their maturity. We call each of those offices a paying agent. We may add, replace or terminate paying agents from time to time. We may also choose to act as our own paying agent. Initially, we have appointed the trustee, at its corporate trust office in New York City, as the paying agent. We must notify the trustee of changes in the paying agents.

### Settlement Mechanics

The settlement mechanics applicable to debt securities calling for physical settlement will be described in the applicable prospectus supplement.

### Unclaimed Payments

Regardless of who acts as paying agent, all money paid by us to a paying agent that remains unclaimed at the end of two years after the amount is due to a holder will be repaid to us. After that two-year period, the holder may look only to us for payment and not to the trustee, any other paying agent or anyone else.

### Notices

Notices to be given to holders of a global debt security will be given only to the depositary, in accordance with its applicable policies as in effect from time to time. Notices to be given to holders of debt securities not in global form will be sent by mail to the respective addresses of the holders as they appear in the trustee's records, and will be deemed given when mailed. Neither the failure to give any notice to a particular holder, nor any defect in a notice given to a particular holder, will affect the sufficiency of any notice given to another holder.

Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive notices.

### Our Relationship with the Trustee

U.S. Bank Trust National Association has provided commercial banking and other services for us and our affiliates in the past and may do so in the future. Among other things, U.S. Bank Trust National Association holds debt securities issued by us and serves as trustee or agent with regard to other obligations of UBS or its subsidiaries.

U.S. Bank Trust National Association is serving as the trustee for the debt securities and the warrants issued under our warrant indenture. Consequently, if an actual or potential event of default occurs with respect to any of these securities, the trustee may be considered to have a conflicting interest for purposes of the Trust Indenture Act of 1939. In that case, the trustee may be required to resign under one or more of the indentures, and we would be required to appoint a successor trustee. For this purpose, a "potential" event of default means an event that would be an event of default if the requirements for giving us default notice or for the default having to exist for a specific period of time were disregarded.

## Legal Ownership and Book-Entry Issuance

In this section, we describe special considerations that will apply to registered securities issued in global—i.e., book-entry—form. First we describe the difference between legal ownership and indirect ownership of registered securities. Then we describe special provisions that apply to global securities.

### Who is The Legal Owner of a Registered Security?

Each debt security or warrant in registered form will be represented either by a certificate issued in definitive form to a particular investor or by one or more global securities representing the entire issuance of securities. We refer to those who have securities registered in their own names, on the books that we or the trustee, warrant agent or other agent maintain for this purpose, as the "holders" of those securities. These persons are the legal holders of the securities. We refer to those who, indirectly through others, own beneficial interests in securities that are not registered in their own names as indirect owners of those securities. As we discuss below, indirect owners are not legal holders, and investors in securities issued in book-entry form or in street name will be indirect owners.

### Book-Entry Owners

We will issue each security in book-entry form only. This means securities will be represented by one or more global securities registered in the name of a financial institution that holds them as depositary on behalf of other financial institutions that participate in the depositary's book-entry system. These participating institutions, in turn, hold beneficial interests in the securities on behalf of themselves or their customers.

Under each indenture or warrant agreement, only the person in whose name a security is registered is recognized as the holder of that security. Consequently, for securities issued in global form, we will recognize only the depositary as the holder of the securities and we will make all payments on the securities, including deliveries of any property other than cash, to the depositary. The depositary passes along the payments it receives to its participants, which in turn pass the payments along to their customers who are the beneficial owners. The depositary and its participants do so under agreements they have made with one another or with their customers; they are not obligated to do so under the terms of the securities.

As a result, investors will not own securities directly. Instead, they will own beneficial interests in a global security, through a bank, broker or other financial institution that participates in the depositary's book-entry system or holds an interest through a participant. As long as the securities are issued in global form, investors will be indirect owners, and not holders, of the securities.

### Street Name Owners

In the future we may terminate a global security or issue securities initially in non-global form. In these cases, investors may choose to hold their securities in their own names or in street name. Securities held by an investor in street name would be registered in the name of a bank, broker or other financial institution that the investor chooses, and the investor would hold only a beneficial interest in those securities through an account he or she maintains at that institution.

For securities held in street name, we will recognize only the intermediary banks, brokers and other financial institutions in whose names the securities are registered as the holders of those securities and we will make all payments on those securities, including deliveries of any property other than cash, to them. These institutions pass along the payments they receive to their customers who are the beneficial owners, but only because they agree to do so in their customer agreements or because they are legally required to do so. Investors who hold securities in street name will be indirect owners, not holders, of those securities.

**Legal Holders**

Our obligations, as well as the obligations of the trustee and the obligations, if any, of any warrant agents and any other third parties employed by us, the trustee or any of those agents, run only to the holders of the securities. We do not have obligations to investors who hold indirect interests in global securities, in street name or by any other indirect means. This will be the case whether an investor chooses to be an indirect owner of a security or has no choice because we are issuing the securities only in global form.

For example, once we make a payment or give a notice to the holder, we have no further responsibility for that payment or notice even if that holder is required, under agreements with depositary participants or customers or by law, to pass it along to the indirect owners but does not do so. Similarly, if we want to obtain the approval of the holders for any purpose—for example, to amend the indenture for a series of debt securities or warrants or the warrant agreement for a series of warrants or to relieve us of the consequences of a default or of our obligation to comply with a particular provision of the indenture—we would seek the approval only from the holders, and not the indirect owners, of the relevant securities. Whether and how the holders contact the indirect owners is up to the holders.

When we refer to "you" in this prospectus, we mean those who invest in the securities being offered by this prospectus, whether they are the holders or only indirect owners of those securities. When we refer to "your securities" in this prospectus, we mean the securities in which you will hold a direct or indirect interest.

**Special Considerations for Indirect Owners**

If you hold securities through a bank, broker or other financial institution, either in book-entry form or in street name, you should check with your own institution to find out:

- how it handles securities payments and notices;
- whether it imposes fees or charges;
- whether and how you can instruct it to exercise any rights to purchase or sell warrant property under a warrant or to exchange or convert a security for or into other property;
- how it would handle a request for the holders' consent, if ever required;
- whether and how you can instruct it to send you securities registered in your own name so you can be a holder, if that is permitted in the future;
- how it would exercise rights under the securities if there were a default or other event triggering the need for holders to act to protect their interests; and
- if the securities are in book-entry form, how the depositary's rules and procedures will affect these matters.

**What Is a Global Security?**

We will issue each security in book-entry form only. Each security issued in book-entry form will be represented by a global security that we deposit with and register in the name of one or more financial institutions or clearing systems, or their nominees, which we select. A financial institution or clearing system that we select for any security for this purpose is called the "depositary" for that security. A security will usually have only one depositary but it may have more.
Each series of securities will have one or more of the following as the depositaries:

- The Depository Trust Company, New York, New York, which is known as "DTC";
- a financial institution holding the securities on behalf of Morgan Guaranty Trust Company of New York, acting out of its Brussels, Belgium, office, as operator of the Euroclear system, which is known as "Euroclear";
- a financial institution holding the securities on behalf of Clearstream Banking, société anonyme, which is known as "Clearstream"; and

- any other clearing system or financial institution named in the applicable prospectus supplement. The depositaries named above may also be participants in one another's systems. Thus, for example, if DTC is the depositary for a global security, investors may hold beneficial interests in that security through Euroclear or Clearstream, as DTC participants.

The depositary or depositaries for your securities will be named in your prospectus supplement; if none is named, the depositary will be DTC.

A global security may represent one or any other number of individual securities. Generally, all securities represented by the same global security will have the same terms. We may, however, issue a global security that represents multiple securities of the same kind, such as debt securities, that have different terms and are issued at different times. We call this kind of global security a master global security. Your prospectus supplement will not indicate whether your securities are represented by a master global security.

A global security may not be transferred to or registered in the name of anyone other than the depositary or its nominee, unless special termination situations arise. We describe those situations below under "—Holder's Option to Obtain a Non-Global Security; Special Situations When a Global Security Will Be Terminated." As a result of these arrangements, the depositary, or its nominee, will be the sole registered owner and holder of all securities represented by a global security, and investors will be permitted to own only indirect interests in a global security. Indirect interests must be held by means of an account with a broker, bank or other financial institution that in turn has an account with the depositary or with another institution that does. Thus, an investor whose security is represented by a global security will not be a holder of the security, but only an indirect owner of an interest in the global security.

If the prospectus supplement for a particular security indicates that the security will be issued in global form only, then the security will be represented by a global security at all times unless and until the global security is terminated. We describe the situations in which this can occur below under "—Holder's Option to Obtain a Non-Global Security; Special Situations When a Global Security Will Be Terminated." If termination occurs, we may issue the securities through another book-entry clearing system or decide that the securities may no longer be held through any book-entry clearing system.

**Special Considerations for Global Securities**

As an indirect owner, an investor's rights relating to a global security will be governed by the account rules of the depositary and those of the investor's financial institution or other intermediary through which it holds its interest (such as Euroclear or Clearstream, if DTC is the depositary), as well as general laws relating to securities transfers. We do not recognize this type of investor or any intermediary as a holder of securities and instead deal only with the depositary that holds the global security. If securities are issued only in the form of a global security, an investor should be aware of the following:

- An investor cannot require the securities to be registered in his or her own name, and cannot obtain non-global certificates for his or her interest in the securities, except in the special situations we describe below.

- An investor will be an indirect holder and must look to his or her own bank or broker for payments on the securities and protection of his or her legal rights relating to the securities, as we describe above under "—Who Is the Legal Owner of a Registered Security?"

- An investor may not be able to sell interests in the securities to some insurance companies and other institutions that are required by law to own their securities in non-book-entry form.

- An investor may not be able to pledge his or her interest in a global security in circumstances where certificates representing the securities must be delivered to the lender or other beneficiary of the pledge in order for the pledge to be effective.

- The depositary's policies will govern payments, deliveries, transfers, exchanges, notices and other matters relating to an investor's interest in a global security, and those policies may change from time to time. We, the trustee and any warrant agents will have no responsibility for any aspect of the depositary's policies, actions or records of ownership interests in a global security. We, the trustee and any warrant agents also do not supervise the depositary in any way.

- The depositary will require that those who purchase and sell interests in a global security within its book-entry system use immediately available funds and your broker or bank may require you to do so as well.

- Financial institutions that participate in the depositary’s book-entry system and through which an investor holds its interest in the global securities, directly or indirectly, may also have their own policies affecting payments, deliveries, transfers, exchanges, notices and other matters relating to the securities, and those policies may change from time to time. For example, if you hold an interest in a global security through Euroclear or Clearstream, when DTC is the depositary, Euroclear or Clearstream, as applicable, will require those who purchase and sell interests in that security through them to use immediately available funds and comply with other policies and procedures, including deadlines for giving instructions as to transactions that are to be effected on a particular day. There may be more than one financial intermediary in the chain of ownership for an investor. We do not monitor and are not responsible for the policies or actions or records of ownership interests of any of those intermediaries.

**Holder’s Option to Obtain a Non-Global Security; Special Situations When a Global Security Will Be Terminated**

If we issue any series of securities in book-entry form but we choose to give the beneficial owners of that series the right to obtain non-global securities, any beneficial owner entitled to obtain non-global securities may do so by following the applicable procedures of the depositary, any transfer agent or registrar for that series and that owner’s bank, broker or other financial institution through which that owner holds its beneficial interest in the securities. If you are entitled to request a non-global certificate and wish to do so, you will need to allow sufficient lead time to enable us or our agent to prepare the requested certificate.

In addition, in a few special situations described below, a global security will be terminated and interests in it will be exchanged for certificates in non-global form representing the securities it represented. After that exchange, the choice of whether to hold the securities directly or in street name will be up to the investor. Investors must consult their own banks or brokers to find out how to have their interests in a global security transferred on termination to their own names, so that they will be holders. We have described the rights of holders and street name investors above under “—Who Is the Legal Owner of a Registered Security?”

The special situations for termination of a global security are as follows:

- if the depositary notifies us that it is unwilling, unable or no longer qualified to continue as depositary for that global security and we do not appoint another institution to act as depositary within 60 days; or

- in the case of a global security representing debt securities or warrants issued under an indenture, if an event of default has occurred with regard to these debt securities or warrants and has not been cured or waived.

If a global security is terminated, only the depositary, and not we, the trustee for any debt securities or warrants or the warrant agent for any warrants, is responsible for deciding the names of the institutions in whose names the securities represented by the global security will be registered and, therefore, who will be the holders of those securities.

**Considerations Relating to Euroclear and Clearstream**

Euroclear and Clearstream are securities clearance systems in Europe. Both systems clear and settle securities transactions between their participants through electronic, book-entry delivery of securities against payment.

Euroclear and Clearstream may be depositaries for a global security. In addition, if DTC is the depositary for a global security, Euroclear and Clearstream may hold interests in the global security as participants in DTC.

As long as any global security is held by Euroclear or Clearstream as depositary, you may hold an interest in the global security only through an organization that participates, directly or indirectly, in Euroclear or Clearstream. If Euroclear or Clearstream is the depositary for a global security and there is no depositary in the United States, you will not be able to hold interests in that global security through any securities clearance system in the United States.

Payments, deliveries, transfers, exchanges, notices and other matters relating to the securities made through Euroclear or Clearstream must comply with the rules and procedures of those systems. Those systems could change their rules and procedures at any time. We have no control over those systems or their participants and we take no responsibility for their activities. Transactions between participants in Euroclear or Clearstream, on one hand, and participants in DTC, on the other hand, when DTC is the depositary, would also be subject to DTC’s rules and procedures.

**Special Timing Considerations for Transactions in Euroclear and Clearstream**

Investors will be able to make and receive through Euroclear and Clearstream payments, deliveries, transfers, exchanges, notices and other transactions involving any securities held through those systems only on days when those systems are open for business. Those systems may not be open for business on days when banks, brokers and other institutions are open for business in the United States.

In addition, because of time-zone differences, U.S. investors who hold their interests in the securities through these systems and wish to transfer their interests, or to receive or make a payment or delivery or exercise any other right with respect to their interests, on a particular day may find that the transaction will not be effected until the next business day in Luxembourg or Brussels, as applicable. Thus, investors who wish to exercise rights that expire on a particular day may need to act before the expiration date. In addition, investors who hold their interests through both DTC and Euroclear or Clearstream may need to make special arrangements to finance any purchases or sales of their interests between the U.S. and European clearing systems, and those transactions may settle later than would be the case for transactions within one clearing system.

## Description of Debt Securities We May Offer

*Please note that in this section entitled "Description of Debt Securities We May Offer," references to UBS, we, our and us refer only to UBS AG and not to its consolidated subsidiaries. In particular, the debt securities are obligations solely of UBS AG, and not of any of its subsidiaries, including, without limitation, UBS Switzerland AG. Also, in this section, references to "holders" and "you" mean those who own debt securities registered in their own names on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in debt securities registered in street name or in debt securities issued in book-entry form through one or more depositaries. Owners of beneficial interests in the debt securities should read the section below entitled "Legal Ownership and Book-Entry Issuance."*

*References herein to "this prospectus" are deemed to refer to this section "Medium-Term Notes, Series B" and references to "your prospectus supplement" are deemed to refer to the individual description of notes issuances contained below in this exhibit.*

### The Debt Indenture

As required by U.S. federal law for publicly offered bonds and notes, the debt securities are governed by a document called an indenture. The debt indenture is a contract between us and U.S. Bank Trust National Association, which acts as trustee.

The trustee has two main roles:

- First, the trustee can enforce your rights against us if we default. There are limitations on the extent to which the trustee acts on your behalf, which we describe below under "—Default, Remedies and Waiver of Default."
- Second, the trustee performs administrative duties for us, such as sending you interest payments and notices.

See "—Our Relationship with the Trustee" below for more information about the trustee.

### We May Issue Many Series of Debt Securities Under the Debt Indenture

We may issue as many distinct series of debt securities under the debt indenture as we wish. This section summarizes terms of the debt securities that apply generally to all series. The provisions of the debt indenture allow us not only to issue debt securities with terms different from those of debt securities previously issued under the debt indenture, but also to "reopen" a previous issue of a series of debt securities and issue additional debt securities of that series. Most of the financial and other specific terms of your series, will be described in the prospectus supplement accompanying this prospectus. Those terms may vary from the terms described here.

We may issue debt securities separately or together with other debt securities.

As you read this section, please remember that the specific terms of your debt security as described in your prospectus supplement will supplement and, if applicable, may modify or replace the general terms described in this section. If there are any differences between your prospectus supplement and this prospectus, your prospectus supplement will control. Thus, the statements we make in this section may not apply to your debt security.

When we refer to a series of debt securities, we mean a series issued under the debt indenture. When we refer to your prospectus supplement, we mean the prospectus supplement describing the specific terms of the debt security you purchase. The terms used in your prospectus supplement will have the meanings described in this prospectus, unless otherwise specified.

Unless we indicate otherwise in your prospectus supplement, the debt securities we issue to you will be part of the series of debt securities referred to as our "medium-term notes, Series B." The Series B notes are a single distinct series under the debt indenture, and we may issue Series B notes in such amounts, at such times and on such terms as we wish. The Series B notes will differ from one another, and from any other series, in their terms, but all of the Series B notes together will constitute a single series for all purposes under the debt indenture pursuant to which they will be issued.

### Amounts That We May Issue

The debt indenture does not limit the aggregate amount of debt securities that we may issue or the number of series or the aggregate amount of any particular series. We have already issued Series B notes, many of which are currently outstanding. We intend to issue additional Series B notes, and may issue additional Series B notes at any time, without your consent and without notifying you. We may also issue debt securities and other securities at any time without your consent and without notifying you.

The debt indenture and the debt securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the debt securities.

### Principal Amount, Stated Maturity and Maturity

The principal amount of a debt security means the principal amount payable at its stated maturity, unless that amount is not determinable, in which case the principal amount of a debt security is its face amount.

The term “stated maturity” with respect to any debt security means the day on which the principal amount of your debt security is scheduled to become due. The principal may become due sooner, by reason of redemption or acceleration after a default or otherwise in accordance with the terms of the debt security. The day on which the principal actually becomes due, whether at the stated maturity or earlier, is called the “maturity” of the principal.

We also use the terms “stated maturity” and “maturity” to refer to the days when other payments become due. For example, we may refer to a regular interest payment date when an installment of interest is scheduled to become due as the “stated maturity” of that installment.

When we refer to the “stated maturity” or the “maturity” of a debt security without specifying a particular payment, we mean the stated maturity or maturity, as the case may be, of the principal.

**This Section Is Only a Summary**

The debt indenture and its associated documents, including your debt security, contain the full legal text governing the matters described in this section and your prospectus supplement. We have filed a copy of the debt indenture with the SEC as an exhibit to our registration statement. See “Where You Can Find More Information” above for information on how to obtain a copy.

This section and your prospectus supplement summarize all the material terms of the debt indenture and your debt security. They do not, however, describe every aspect of the debt indenture and your debt security. For example, in this section and your prospectus supplement, we use terms that have been given special meaning in the debt indenture, but we describe the meaning of only the more important of those terms.

**Governing Law**

The debt indenture is, and the debt securities will be, governed by New York law.

**Currency of Debt Securities**

Amounts that become due and payable on your debt security in cash will be payable in a currency, composite currency, basket of currencies or currency unit or units specified in your prospectus supplement. We refer to this currency, composite currency, basket of currencies or currency unit or units as a “specified currency.” The specified currency for your debt security will be U.S. dollars, unless your prospectus supplement states otherwise. Some debt securities may have different specified currencies for principal and interest. You will have to pay for your debt securities by delivering the requisite amount of the specified currency to UBS Securities LLC, UBS Financial Services Inc. or another firm that we name in your prospectus supplement, unless other arrangements have been made between you and us or you and that firm. We will make payments on your debt securities in the specified currency, except as described below in “—Payment Mechanics for Debt Securities.” See “Considerations Relating to Securities Denominated or Payable in or Linked to a Non-U.S. Dollar Currency” below for more information about risks of investing in this kind of debt securities.

**Types of Debt Securities**

We may issue any of the three types of debt securities described below. A debt security may have elements of each of the three types of debt securities described below. For example, a debt security may bear interest at a fixed rate for some periods and at a floating rate in others. Similarly, a debt security may provide for a payment of principal at maturity linked to an index and also bear interest at a fixed or floating rate.

*Fixed Rate Debt Securities*

A debt security of this type will bear interest at a fixed rate described in the applicable prospectus supplement. This type includes zero coupon debt securities, which bear no interest and are instead issued at a price lower than the principal amount. See “—Original Issue Discount Debt Securities” below for more information about zero coupon and other original issue discount debt securities.

Each fixed rate debt security, except any zero coupon debt security, will bear interest from its original issue date or from the most recent date to which interest on the debt security has been paid or made available for payment. Interest will accrue on the principal of a fixed rate debt security at the fixed yearly rate stated in the applicable prospectus supplement, until the principal is paid or made available for payment or the security has been converted or exchanged. Each payment of interest due on an interest payment date or the date of maturity will include interest accrued from and including the last date to which interest has been paid, or made available for payment, or from the issue date if none has been paid or made available for payment, to but excluding the interest payment date or the date of maturity. We will compute interest on fixed rate debt securities on the basis of a 360-day year of twelve 30-day months. We will pay interest on each interest payment date and at maturity as described below under “—Payment Mechanics for Debt Securities.”

*Floating Rate Debt Securities*

**Interest Rate Formulas.** A debt security of this type will bear interest at rates that are determined by reference to an interest rate formula. In some cases, the rates may also be adjusted by adding or subtracting a spread or multiplying by a spread multiplier and may be subject to a minimum rate or a maximum rate. If your debt security is a floating rate debt security, the formula and any adjustments that apply to the interest rate will be specified below.

Each floating rate debt security will bear interest from its original issue date or from the most recent date to which interest on the debt security has been paid or made available for payment. Interest will accrue on the principal of a floating rate debt security at the yearly rate determined according to the interest rate formula stated in the applicable prospectus supplement, until the principal is paid or made available for payment. We will pay interest on each interest payment date and at maturity as described below under "—Payment Mechanics for Debt Securities."

**Calculation of Interest.** Calculations relating to floating rate debt securities will be made by the calculation agent, an institution that we appoint as our agent for this purpose. That institution may include any affiliate of ours, such as UBS Securities LLC. The prospectus supplement for a particular floating rate debt security will name the institution that we have appointed to act as the calculation agent for that debt security as of its original issue date. We may appoint a different institution to serve as calculation agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change. Absent manifest error, all determinations of the calculation will be final and binding on you and us, without any liability on the part of the calculation agent.

For each floating rate debt security, the calculation agent will determine, on the corresponding interest calculation or determination date, as described in the applicable prospectus supplement, the interest rate that takes effect on each interest reset date. In addition, the calculation agent will calculate the amount of interest that has accrued during each interest period—*i.e.*, the period from and including the original issue date, or the last date to which interest has been paid or made available for payment, to but excluding the payment date. For each interest period, the calculation agent will calculate the amount of accrued interest by multiplying the face or other specified amount of the floating rate debt security by an accrued interest factor for the interest period. This factor will equal the sum of the interest factors calculated for each day during the interest period. The interest factor for each day will be expressed as a decimal and will be calculated by dividing the interest rate, also expressed as a decimal, applicable to that day by 360 or by the actual number of days in the year, as specified in the applicable prospectus supplement.

Upon the request of the holder of any floating rate debt security, the calculation agent will provide the interest rate then in effect for that debt security—and, if determined, the interest rate that will become effective on the next interest reset date. The calculation agent's determination of any interest rate, and its calculation of the amount of interest for any interest period, will be final and binding in the absence of manifest error.

All percentages resulting from any calculation relating to a debt security will be rounded upward or downward, as appropriate, to the next higher or lower one hundred-thousandth of a percentage point, *e.g.*, 9.876541% (or .09876541) being rounded down to 9.87654% (or .0987654) and 9.876545% (or .09876545) being rounded up to 9.87655% (or .0987655). All amounts used in or resulting from any calculation relating to a floating rate debt security will be rounded upward or downward, as appropriate, to the nearest cent, in the case of U.S. dollars, or to the nearest corresponding hundredth of a unit, in the case of a currency other than U.S. dollars, with one-half cent or one-half of a corresponding hundredth of a unit or more being rounded upward.

In determining the base rate that applies to a floating rate debt security during a particular interest period, the calculation agent may obtain rate quotes from various banks or dealers active in the relevant market, as described in the applicable prospectus supplement. Those reference banks and dealers may include the calculation agent itself and its affiliates, as well as any underwriter, dealer or agent participating in the distribution of the relevant floating rate debt securities and its affiliates, and they may include UBS AG or its affiliates.

*Indexed Debt Securities*

A debt security of this type provides that the principal amount payable at its maturity, and/or the amount of interest payable on an interest payment date, will be determined by reference to:

- securities of one or more issuers;
- one or more currencies;
- one or more commodities;
- any other financial, economic or other measure or instrument, including the occurrence or non-occurrence of any event or circumstance; and/or
- one or more indices or baskets of the items described above.

If you are a holder of an indexed debt security, you may receive an amount at maturity (including upon acceleration following an event of default) that is greater than or less than the face amount of your debt security depending upon the formula used to determine the amount payable and the value of the applicable index at maturity. The value of the applicable index will fluctuate over time.

An indexed debt security may provide either for cash settlement or for physical settlement by delivery of the underlying property or another property of the type listed above. An indexed debt security may also provide that the form of settlement may be determined at our option or at the holder's option. Some indexed debt securities may be convertible, exercisable or exchangeable, at our option or the holder's option, into or for securities of an issuer other than UBS AG.

If you purchase an indexed debt security, your prospectus supplement will include information about the relevant index, about how amounts that are to become payable will be determined by reference to the price or value of that index and about the terms on which the security may be settled physically or in cash. The prospectus supplement will also identify the calculation agent that will calclate the amounts payable with respect to the indexed debt security and may exercise significant discretion in doing so. The calculation agent may be UBS Securities LLC or another of our affiliates. See "Considerations Relating to Indexed Securities" for more information about risks of investing in debt securities of this type.

**Original Issue Discount Debt Securities**

A fixed rate debt security, a floating rate debt security or an indexed debt security may be an original issue discount debt security. A debt security of this type is issued at a price lower than its principal amount and provides that, upon redemption or acceleration of its maturity, an amount less than its principal amount will be payable. An original issue discount debt security may be a zero coupon debt security. A debt security issued at a discount to its principal may, for U.S. federal income tax purposes, be considered an original issue discount debt security, regardless of the amount payable upon redemption or acceleration of maturity. See "U.S. Tax Considerations—Taxation of Debt Securities— Original Issue Discount" below for a brief description of the U.S. federal income tax consequences of owning an original issue discount debt security.

**Information in Your Prospectus Supplement**

Your prospectus supplement will describe the specific terms of your debt security, which will include some or all of the following:

- any limit on the total principal amount of the debt securities of the same series;
- the stated maturity;
- the specified currency or currencies for principal and interest, if not U.S. dollars;
- the price at which we originally issue your debt security, expressed as a percentage of the principal amount, and the original issue date;
- whether your debt security is a fixed rate debt security, a floating rate debt security or an indexed debt security;
- if your debt security is a fixed rate debt security, the yearly rate at which your debt security will bear interest, if any, and the interest payment dates;
- if your debt security is a floating rate debt security, the interest rate basis; any applicable index currency or maturity, spread or spread multiplier or initial base rate, maximum rate or minimum rate; the interest reset, determination, calculation and payment dates; the day count used to calculate interest payments for any period; the business day convention; and the calculation agent;
- if your debt security is an indexed debt security, the principal amount, if any, we will pay you at maturity, the amount of interest, if any, we will pay you on an interest payment date or the formula we will use to calculate these amounts, if any, and the terms on which your debt security will be exchangeable for or payable in cash, securities or other property;
- if your debt security may be converted into or exercised or exchanged for debt or equity securities of one or more third parties, the terms on which conversion, exercise or exchange may occur, including whether conversion, exercise or exchange is mandatory, at the option of the holder or at our option, the period during which conversion, exercise or exchange may occur, the initial conversion, exercise or exchange price or rate and the circumstances or manner in which the amount of securities issuable upon conversion, exercise or exchange may be adjusted;
- if your debt security is also an original issue discount debt security, the yield to maturity;
- if applicable, the circumstances under which your debt security may be redeemed at our option or repaid at the holder's option before the stated maturity, including any redemption commencement date, repayment date(s), redemption price(s) and redemption period(s);
- the authorized denominations, if other than $1,000 and integral multiples of $1,000;
- the depositary for your debt security, if other than DTC, and any circumstances under which the holder may request securities in non-global form, if we choose not to issue your debt security in book-entry form only;
- if your debt security will be issued in bearer form, any special provisions relating to bearer securities;
- if applicable, the circumstances under which we will pay additional amounts on any debt securities held by a person who is not a United States person for tax purposes and under which we can redeem the debt securities if we have to pay additional amounts;
- the names and duties of any co-trustees, depositaries, authenticating agents, paying agents, transfer agents or registrars for your debt security, as applicable; and
- any other terms of your debt security, which could be different from those described in this prospectus.

If you purchase your debt security—or any of our other securities we describe in this prospectus—in a market-making transaction, you will receive information about the price you pay and your trade and settlement dates in a separate confirmation of sale. A market-making transaction is one in which we, UBS Securities LLC, UBS Financial Services Inc. or another of our affiliates resells a security that it has previously acquired from another holder. A market-making transaction in a particular security occurs after the original issuance and sale of the security.

**Extension of Maturity**

If specified in the applicable prospectus supplement, we will have the option to extend the stated maturity of your debt security for one or more periods of whole years up to but not beyond the final maturity date specified in the prospectus supplement. We call a debt security whose maturity we may extend an extendible debt security. We call the period of time as to which we may extend the maturity the extension period. The following procedures will apply to extendible debt securities, unless otherwise indicated in the applicable prospectus supplement.

We may extend the maturity of an extendible debt security by notifying the paying agent between 45 and 60 days before the stated maturity then in effect. The stated maturity may be the original stated maturity, as described in the prospectus supplement, or a maturity that we previously extended by following these procedures. If we notify the paying agent that we will extend the maturity, the paying agent will send a notice to each holder by first class mail, postage prepaid, or by other means agreed upon between us and the paying agent, at least 30 days before the stated maturity then in effect. The notice sent by the paying agent will provide the following information:

- our election to extend the maturity of the extendible debt security;
- the extended maturity date or, if the maturity date had previously been extended, the new extended maturity date;
- the interest rate that will apply during the extension period or, in the case of a floating rate debt security, the spread and/or spread multiplier, if any, applicable during the extension period; and
- the provisions, if any, for redemption and repayment during the extension period.

Once the paying agent has mailed the notice to each holder, the extension of the maturity date will take place automatically. All of the terms of the debt security will be the same as the terms of the debt security as originally issued, except those terms that are described in the notice sent by the paying agent to each holder and except as described in the following paragraph.

Not later than 10:00 a.m., New York City time, on the twentieth calendar day before the maturity date then in effect for an extendible debt security or, if that day is not a business day, on the next succeeding business day, we may revoke the interest rate set forth in the extension notice sent by the paying agent to each holder and establish a higher interest rate for the extension period. If we elect to establish a higher interest rate, the paying agent will send a notice to each holder by first class mail, postage prepaid, or by other means agreed between us and the paying agent, of the higher interest rate in the case of a floating rate debt security, the higher spread and/or spread multiplier, if any. The notice of the higher rate cannot be revoked. All extendible debt securities as to which the maturity date has been extended will bear the higher rate for the extension period, whether or not tendered for repayment.

If we elect to extend the maturity date of an extendible debt security, each holder may elect repayment of all or part of its debt security on the maturity date then in effect at a price equal to the principal amount plus any accrued and unpaid interest to that date. To elect repayment, a holder must give notice to the paying agent between 25 and 35 days before the maturity date in effect. The notice must consist of either:

- the debt security along with the completed form entitled “Option to Elect Repayment,” which will be attached to your debt security.
- a telegram, facsimile transmission or letter from a member of a national securities exchange, the Financial Industry Regulatory Authority, Inc. or a commercial bank or trust company in the United States setting forth the name of the holder, the principal amount of the debt security, the principal amount of the debt security to be repaid, the certificate number or a description of the tenor and terms of the debt security, a statement that the option to elect repayment is being elected and a guarantee that the debt security, together with the completed form entitled “Option to Elect Repayment” will be received by the paying agent no later than the fifth business day after the date of the telegram, facsimile transmission or letter. The telegram, facsimile transmission or letter will become effective upon receipt, by that fifth business day, of the debt security and complete form.

The holder may revoke the election of repayment by sending to the paying agent written notice by 3:00 p.m., New York City time, on the twentieth day before the maturity date then in effect or, if that day is not a business day, on the next succeeding business day.

If an extendible debt security is represented by a global debt security, the depositary or its nominee, as the holder, will be the only person that can exercise the right to elect repayment or revoke such an election. Any indirect owners who own beneficial interests in the global debt security and wish to make such an election must give proper and timely instructions to the banks or brokers through which they hold their interests, requesting that they notify the depositary to make a repayment election or revoke such an election on their behalf. Different firms have different deadlines for accepting instructions from their customers, and you should take care to act promptly enough to ensure that your request is given effect by the depositary before the applicable deadline for exercise.

**Redemption and Repayment**

Unless otherwise indicated in your prospectus supplement, your debt security will not be entitled to the benefit of any sinking fund—that is, we will not deposit money on a regular basis into any separate custodial account to repay your debt securities. In addition, we will not be entitled to redeem your debt security before its stated maturity (except for certain tax reasons, as described below) unless your prospectus supplement specifies a redemption date or redemption commencement date. You will not be entitled to require us to buy your debt security from you, before its stated maturity, unless your prospectus supplement specifies one or more repayment dates.

If your prospectus supplement specifies one or more redemption dates, a redemption commencement date or a repayment date, it will also specify one or more redemption prices or repayment prices, which may be expressed as a percentage of the principal amount of your debt security. It may also specify one or more redemption periods during which the redemption prices relating to a redemption of debt securities during those periods will apply.

If your prospectus supplement specifies one or more redemption dates, your debt security will be redeemable at our option on any of those dates. If your prospectus supplement specifies a redemption commencement date, your debt security will be redeemable at our option at any time on or after that date. If we redeem your debt security, we will do so at the specified redemption price. If different prices are specified for different redemption periods, the price we pay will be the price that applies to the redemption period during which your debt security is redeemed.

If your prospectus supplement specifies a repayment date, your debt security will be repayable at your option on the specified repayment date at the specified repayment price, together with interest accrued to the repayment date.

If we exercise an option to redeem any debt security, we will give the trustee and the holders written notice of the principal amount of the debt security to be redeemed, not less than 3 business days nor more than 60 days before the applicable redemption date unless otherwise specified in your prospectus supplement. We will give the notice in the manner described below in "—Notices."

If a debt security represented by a global debt security is subject to repayment at the holder's option, the depositary or its nominee, as the holder, will be the only person that can exercise the right to repayment. Any indirect holders who own beneficial interests in the global debt security and wish to exercise a repayment right must give proper and timely instructions to the banks or brokers through which they hold their interests, requesting that they notify the depositary to exercise the repayment right on their behalf. Different firms have different deadlines for accepting instructions from their customers, and you should take care to act promptly enough to ensure that your request is given effect by the depositary before the applicable deadline for exercise.

Street name and other indirect holders should contact their banks or brokers for information about how to exercise a repayment right in a timely manner.

We or our affiliates may purchase debt securities from investors who are willing to sell from time to time, either in the open market at prevailing prices or in private transactions at negotiated prices. Debt securities that we or they purchase may, at our discretion, be held, resold or cancelled.

**Optional Tax Redemption**

In addition to the situations described above under "—Redemption and Repayment," we also have the option to redeem the debt securities in two situations described below, unless otherwise indicated in your prospectus supplement. The redemption price for the debt securities, other than original issue discount debt securities, will be equal to the principal amount of the debt securities being redeemed plus accrued interest and any additional amounts due on the date fixed for redemption. The redemption price for original issue discount debt securities will be specified in the prospectus supplement for such debt securities. Furthermore, we must give you between 10 and 60 days' notice before redeeming the debt securities unless otherwise specified in your prospectus supplement.

- The first situation is where, as a result of a change in, execution of or amendment to any laws or treaties or the official application or interpretation of any laws or treaties, we would be required to pay additional amounts as described below under "—Payment of Additional Amounts."

  This applies only in the case of changes, executions, amendments, applications or interpretations that occur on or after the date specified in the prospectus supplement for the applicable debt securities and in a relevant jurisdiction, as defined in "—Payment of Additional Amounts" below. If UBS is succeeded by another entity, the applicable jurisdiction will be the jurisdiction in which the successor entity is organized, and the applicable date will be the date the entity became a successor.

  We would not have the option to redeem in this case if we could have avoided the payment of additional amounts or the deduction or withholding by using reasonable measures available to us.

- The second situation is where a person located outside of a relevant jurisdiction into which UBS is merged or to whom it has conveyed, transferred or leased its property is required to pay an additional amount. We would have the option to redeem the debt securities even if we are required to pay additional amounts immediately after the merger, conveyance, transfer or lease. We are not required to use reasonable measures to avoid the obligation to pay additional amounts in this situation.

**Payment of Additional Amounts**

A relevant jurisdiction may require UBS to withhold amounts from payments on the principal or interest on a debt security for taxes or any other governmental charges. If the relevant jurisdiction requires a withholding of this type, UBS may be required to pay you an additional amount so that the net amount you receive will be the amount specified in the debt security to which you are entitled.

By relevant jurisdiction, we mean Switzerland or a jurisdiction in which the UBS branch through which debt securities are issued is located. UBS will not have to pay additional amounts in respect of taxes or other governmental charges that are required to be deducted or withheld by any paying agent from a payment on a debt security, if such payment can be made without such deduction or withholding by any other paying agent. Furthermore, UBS will not pay additional amounts for or on account of:

- the existence of any present or former connection between you and the relevant jurisdiction, other than the mere holding of the debt security and the receipt of payments on it;
- any estate, inheritance, gift, sales, transfer or personal property tax or any similar tax, duty, assessment or governmental charge;
- your failure, or the failure of any intermediary, custodian or broker, to comply with any reasonable certification, documentation, information or other reporting requirement concerning your nationality, residence, identity or connection with the relevant jurisdiction, if such compliance is required as a precondition to relief or exemption from such taxes or other governmental charges (including, without limitation, a certification that you are not resident in the relevant jurisdiction or are not an individual resident of a member state of the European Union);
- your status as a bank purchasing the debt security in the ordinary course of its lending business;
- your actual or constructive ownership of 10% or more of the combined voting power of all classes of stock of UBS entitled to vote;
- any taxes imposed on contingent interest as described in section 871(h)(4) of the Internal Revenue Code (as defined below under "U.S. Tax Considerations");
- any taxes which would not have been imposed but for your presentation, or a presentation on your behalf, of a debt security payment on a date more than 15 days after the date on which such payment on the debt security becomes due and payable or on which the payment is duly provided for, whichever occurs later; or
- any combination of the items listed above.

In addition, no additional amounts will be required to be paid on account of any deduction or withholding imposed or required pursuant to Sections 1471 through 1474 of the Internal Revenue Code (as defined below under "U.S. Tax Considerations"), any current or future regulations or official interpretations thereof, any agreement entered into pursuant to Section 1471(b) of the Internal Revenue Code, or any fiscal or regulatory legislation, rules or practices adopted pursuant to any intergovernmental agreement entered into in connection with the implementation of such Sections of the Internal Revenue Code.

These provisions will also apply to any taxes or governmental charges imposed by any jurisdiction in which a successor to UBS is organized. The prospectus supplement relating to the debt security may describe additional circumstances in which UBS would not be required to pay additional amounts.

**Mergers and Similar Transactions**

We are generally permitted to merge or consolidate with another firm. We are also permitted to sell our assets substantially as an entirety to another firm. With regard to any series of debt securities, we may not take any of these actions, however, unless all the following conditions are met:

- If the successor firm in the transaction is not UBS, the successor firm must be organized as a corporation, partnership or trust and must expressly assume our obligations under the debt securities of that series and the debt indenture. The successor firm must be organized under the laws of Switzerland.
- Immediately after the transaction, no default under the debt securities of that series has occurred and is continuing. For this purpose, "default under the debt securities of that series" means an event of default with respect to that series or any event that would be an event of default with respect to that series if the requirements for giving us default notice and for our default having to continue for a specific period of time were disregarded. We describe these matters below under "—Default, Remedies and Waiver of Default."

If the conditions described above are satisfied with respect to the debt securities of any series, we will not need to obtain the approval of the holders of those debt securities in order to merge or consolidate or to sell our assets. Also, these conditions will apply only if we wish to merge or consolidate with another firm or sell our assets substantially as an entirety to another firm. We will not need to satisfy these conditions if we enter into other types of transactions, including any transaction in which we acquire the stock or assets of another firm, any transaction that involves a change of control of UBS but in which we do not merge or consolidate and any transaction in which we sell less than substantially all our assets.

Also, if we merge, consolidate or sell our assets substantially as an entirety and the successor firm is a non-Swiss entity, neither we nor any successor would have any obligation to compensate you for any resulting adverse tax consequences to the debt securities.

**Defeasance and Covenant Defeasance**

If indicated in the applicable prospectus supplement for a debt security, the provisions for full defeasance and covenant defeasance described below will apply to that debt security. In general, we expect these provisions to apply to each debt security that has a specified currency of U.S. dollars and is not a floating rate or indexed debt security.

*Full Defeasance*

If there is a change in U.S. federal tax law, as described below, we can legally release ourselves from all payment and other obligations on your debt security. This is called full defeasance. To do so, each of the following must occur:

- We must deposit in trust for the benefit of all holders of those debt securities, money, U.S. government or U.S. government agency notes or bonds or a combination of money and U.S. government or U.S. government agency notes or bonds that will, in each case, in the opinion of a nationally recognized firm of independent public accountants,

generate enough cash to make interest, principal and any other payments on those debt securities on their various due dates.
- There must be a change in current U.S. federal tax law or an Internal Revenue Service ruling that lets us make the above deposit without causing the holders to be taxed on those debt securities any differently than if we did not make the deposit and just repaid the debt securities ourselves. Under current federal tax law, the deposit and our legal release from your debt securities would be treated as though we took back your debt security and gave you your share of the cash and notes or bonds deposited in trust. In that event, you could recognize gain or loss on your debt security.
- We must deliver to the trustee a legal opinion of our counsel confirming the tax law change described above.

If we ever fully defease your debt security, you would have to rely solely on the trust deposit for payments on your debt security. You would not be able to look to us for payment in the event of any shortfall.

*Covenant Defeasance*

Under current U.S. federal tax law, we can make the same type of deposit described above and be released from any restrictive covenants relating to your debt security that may be described in your prospectus supplement. This is called covenant defeasance. In that event, you would lose the protection of those restrictive covenants. In order to achieve covenant defeasance for any debt securities, we must do both of the following:

- We must deposit in trust for the benefit of all holders of those debt securities, money, U.S. government or U.S. government agency notes or bonds or a combination of money and U.S. government or U.S. government agency notes or bonds that will, in each case, in the opinion of a nationally recognized firm of independent public accountants, generate enough cash to make interest, principal and any other payments on those debt securities on their various due dates.
- We must deliver to the trustee a legal opinion of our counsel confirming that under U.S. federal income tax law as then in effect we may make the above deposit without causing you to be taxed on those debt securities any differently than if we did not make the deposit and just repaid those debt securities ourselves.

If we accomplish covenant defeasance with regard to your debt security, the following provisions of the debt indenture and your debt security would no longer apply:

- Any covenants that your prospectus supplement may state are applicable to your debt security; and
- The events of default resulting from a breach of covenants, described below in the fourth bullet point under "—Default, Remedies and Waiver of Default—Events of Default."

Any right we have to redeem will survive covenant defeasance with regard to those debt securities.

If we accomplish covenant defeasance on your debt security, you can still look to us for repayment of your debt security in the event of any shortfall in the trust deposit. You should note, however, that if one of the remaining events of default occurred, such as our bankruptcy, and your debt security became immediately due and payable, there may be a shortfall. Depending on the event causing the default you may not be able to obtain payment of the shortfall.

**Default, Remedies and Waiver of Default**

You will have special rights if an event of default with respect to your series of debt securities occurs and is not cured, as described in this subsection.

*Events of Default*

Unless your prospectus supplement says otherwise, when we refer to an event of default with respect to any series of debt securities, we mean any of the following:

- We do not pay the principal or any premium (including delivering any security or other property deliverable) on any debt security of that series at its maturity;
- We do not pay interest on any debt securities of that series within 30 days after it becomes due and payable;
- We do not deposit a sinking fund payment with regard to any debt securities of that series on its due date, but only if the payment is required in the applicable prospectus supplement;
- We remain in breach of any other covenant we make in the debt indenture for the benefit of the debt securities of that series, for 60 days after we receive a notice of default stating that we are in breach and requiring us to remedy the breach. The notice must be sent by the trustee or the holders of not less than 10% in principal amount of the relevant series of debt securities then outstanding;
- We file for bankruptcy or certain other bankruptcy, insolvency or reorganization events relating to UBS occur; or
- If the applicable prospectus supplement states that any additional event of default applies to your series, that event of default occurs.

*Remedies If an Event of Default Occurs*

If an event of default has occurred with respect to any series of debt securities and has not been cured or waived, the trustee or the holders of not less than 25% in principal amount of all debt securities of that series then outstanding may declare the entire principal amount of the debt securities of that series to be due immediately. If an event of default occurs because of bankruptcy, insolvency or reorganization events relating to UBS, the entire principal amount of the debt securities of that series will be automatically accelerated, without any action by the trustee or any holder.

Each of the situations described above is called an acceleration of the maturity of the affected series of debt securities. If the maturity of any series is accelerated and a judgment for payment has not yet been obtained, the holders of a majority in principal amount of the debt securities of that series may cancel the acceleration for the entire series.

If an event of default occurs, the trustee will have special duties. The trustee will be obligated to use those of its rights and powers under the debt indenture, and to use the same degree of care and skill in doing so, that a prudent person would use in that situation in conducting his or her own affairs.

Except as described in the prior paragraph, the trustee is not required to take any action under the debt indenture at the request of any holders unless the holders offer the trustee reasonable protection from expenses and liability. This is called an indemnity. If the trustee is provided with an indemnity reasonably satisfactory to it, the holders of a majority in principal amount of all debt securities of the relevant series may direct the time, method and place of conducting any lawsuit or other formal legal action seeking any remedy available to the trustee with respect to that series. These majority holders may also direct the trustee in performing any other action under the debt indenture with respect to the debt securities of that series.

Before you bypass the trustee and bring your own lawsuit or other formal legal action or take other steps to enforce your rights or protect your interests relating to any debt security, all of the following must occur:

- The holder of your debt security must give the trustee written notice that an event of default has occurred, and the event of default must not have been cured or waived.
- The holders of not less than 25% in principal amount of all debt securities of your series must make a written request that the trustee take action because of the default, and they or other holders must offer to the trustee indemnity reasonably satisfactory to the trustee against the cost and other liabilities of taking that action.
- The trustee must not have taken action for 60 days after the above steps have been taken.
- During those 60 days, the holders of a majority in principal amount of the debt securities of your series must not have given the trustee directions that are inconsistent with the written request of the holders of not less than 25% in principal amount of all debt securities of your series.

You are, however, entitled at any time to bring a lawsuit for the payment of money due on your debt security on or after its due date.

*Waiver of Default*

The holders of not less than a majority in principal amount of the debt securities of any series may waive a default for all debt securities of that series. If this happens, the default will be treated as if it has not occurred. No one can waive a payment default on your debt security, however, without the approval of the particular holder of that debt security.

*We Will Give the Trustee Information About Defaults Annually*

We will furnish to the trustee every year a written statement of two of our officers certifying that to their knowledge we are in compliance with the debt indenture and the debt securities, or else specifying any default under the debt indenture.

Book-entry and other indirect holders should consult their banks or brokers for information on how to give notice or direction to or make a request of the trustee and how to declare or cancel an acceleration of the maturity of the debt securities. Book-entry and other indirect owners are described below under “Legal Ownership and Book-Entry Issuance.”

**Modification and Waiver of Covenants**

There are three types of changes we can make to the debt indenture and the debt securities of any series.

*Changes Requiring Each Holder’s Approval*

First, there are changes that cannot be made without the approval of each holder of a debt security affected by the change. Here is a list of those types of changes:

- change the stated maturity for any principal or interest payment on a debt security;
- reduce the principal amount, the amount payable on acceleration of the maturity after a default, the interest rate or the redemption price for a debt security;
- permit redemption of a debt security if not previously permitted;
- impair any right a holder may have to require repayment of his or her debt security;
- impair any right that a holder of an indexed or any other debt security may have to exchange or convert the debt security for or into securities or other property;
- change the currency of any payment on a debt security other than as permitted by the debt security;
- change the place of payment on a debt security, if it is in non-global form;
- impair a holder’s right to sue for payment of any amount due on his or her debt security;
- reduce the percentage in principal amount of the debt securities of any one or more affected series, taken separately or together, as applicable, the approval of whose holders is needed to change the debt indenture or those debt securities;
- reduce the percentage in principal amount of the debt securities of any one or more affected series, taken separately or together, as applicable, the consent of whose holders is needed to waive our compliance with the debt indenture or to waive defaults; and

- change the provisions of the debt indenture dealing with modification and waiver in any other respect, except to increase any required percentage referred to above or to add to the provisions that cannot be changed or waived without approval of the holder of each affected debt security.

*Changes Not Requiring Approval of Holders*

The second type of change does not require any approval by holders of the debt securities of an affected series. This type of change is limited to clarifications and changes that would not adversely affect the debt securities of that series in any material respect. We also do not need any approval to make changes that affect only debt securities to be issued under the debt indenture after the changes take effect.

We may also make changes or obtain waivers that do not adversely affect a particular debt security, even if they affect other debt securities. In those cases, we do not need to obtain the approval of the holder of the unaffected debt security; we need only obtain any required approvals from the holders of the affected debt securities.

*Changes Requiring Majority Approval*

Any other change to the debt indenture and the debt securities would require the following approval:

- If the change affects only the debt securities of a particular series, it must be approved by the holders of 66⅔% in principal amount of the debt securities of that series.
- If the change affects the debt securities of more than one series of debt securities issued under the debt indenture, it must be approved by the holders of 66⅔% in principal amount of all series affected by the change, with the debt securities of all the affected series voting together as one class for this purpose (and of any affected series that by its terms is entitled to vote separately as a series, as described below).

In each case, the required approval must be given by written consent.

Majority approval would be required for us to obtain a waiver of any of our covenants in the debt indenture. Our covenants include the promises we make about merging, which we describe above under "—Mergers and Similar Transactions." If the holders approve a waiver of a covenant, we will not have to comply with that covenant. The holders, however, cannot approve a waiver of any provision in a particular debt security, or in the debt indenture as it affects that debt security, that we cannot change without the approval of the holder of that debt security as described above under "—Changes Requiring Each Holder's Approval," unless that holder approves the waiver.

Book-entry and other indirect holders should consult their banks or brokers for information on how approval may be granted or denied if we seek to change the debt indenture or the debt securities or request a waiver.

**Special Rules for Action by Holders**

When holders take any action under the debt indenture, such as giving a notice of default, declaring an acceleration, approving any change or waiver or giving the trustee an instruction, we will apply the following rules.

*Only Outstanding Debt Securities Are Eligible*

Only holders of outstanding debt securities of the applicable series will be eligible to participate in any action by holders of debt securities of that series. Also, we will count only outstanding debt securities in determining whether the various percentage requirements for taking action have been met. For these purposes, a debt security will not be "outstanding":

- if it has been surrendered for cancellation;
- if we have deposited or set aside, in trust for its holder, money for its payment or redemption;
- if we have fully defeased it as described above under "—Defeasance and Covenant Defeasance—Full Defeasance"; or
- if we or one of our affiliates, such as UBS Securities LLC or UBS Financial Services Inc., is the beneficial owner.

*Special Series Voting Rights*

We may issue series of debt securities that are entitled, by their terms, to vote separately on matters (for example, modification or waiver of provisions in the debt indenture) that would otherwise require a vote of all affected series, voting together as a single class. Any such series would be entitled to vote together with all other affected series, voting together as one class, and would also be entitled to vote separately, as a series only. These special voting rights will be described in the applicable prospectus supplement. For a series that does not have these special rights, voting will occur as described in the preceding section, but subject to any separate voting rights of any series having special rights. We may issue a series having these or other special voting rights without obtaining the consent of or giving notice to holders of outstanding series.

*Eligible Principal Amount of Some Debt Securities*

In some situations, we may follow special rules in calculating the principal amount of a debt security that is to be treated as outstanding for the purposes described above. This may happen, for example, if the principal amount is payable in a non-U.S. dollar currency, increases over time or is not to be fixed until maturity. For any debt security of the kind described below, we will decide how much principal amount to attribute to the debt security as follows:

- For an original issue discount debt security, we will use the principal amount that would be due and payable on the action date if the maturity of the debt security were accelerated to that date because of a default.

- For a debt security whose principal amount is not known, we will use any amount that we indicate in the prospectus supplement for that debt security. The principal amount of a debt security may not be known, for example, because it is based on an index that changes from time to time and the principal amount is not to be determined until a later date.
- For debt securities with a principal amount denominated in one or more non-U.S. dollar currencies or currency units, we will use the U.S. dollar equivalent, which we will determine.

*Determining Record Dates for Action by Holders*

We will generally be entitled to set any day as a record date for the purpose of determining the holders that are entitled to take action under the debt indenture. In certain limited circumstances, only the trustee will be entitled to set a record date for action by holders. If we or the trustee set a record date for an approval or other action to be taken by holders, that vote or action may be taken only by persons or entities who are holders on the record date and must be taken during the period that we specify for this purpose, or that the trustee specifies if it sets the record date. We or the trustee, as applicable, may shorten or lengthen this period from time to time. This period, however, may not extend beyond the 180th day after the record date for the action. In addition, record dates for any global debt security may be set in accordance with procedures established by the depositary from time to time. Accordingly, record dates for global debt securities may differ from those for other debt securities.

**Form, Exchange and Transfer of Debt Securities**

We will issue each debt security in global—*i.e.*, book-entry—form only, unless we specify otherwise in the applicable prospectus supplement. Debt securities in book-entry form will be represented by a global security registered in the name of a depositary, which will be the holder of all the debt securities represented by the global security. Those who own beneficial interests in a global debt security will do so through participants in the depositary's securities clearance system, and the rights of these indirect owners will be governed solely by the applicable procedures of the depositary and its participants. We describe book-entry securities below under "Legal Ownership and Book-Entry Issuance." Unless we specify otherwise in the applicable prospectus supplement, The Depository Trust Company, New York, New York, known as DTC, will be the depositary for all debt securities in global form.

In addition, we will generally issue each debt security in registered form, without coupons, unless we specify otherwise in the applicable prospectus supplement. If we issue a debt security in bearer form, the applicable prospectus supplement will describe the provisions that would apply to that security.

If a debt security is issued as a global debt security, only the depositary—*e.g.*, DTC, Euroclear and Clearstream—will be entitled to transfer and exchange the debt security or exercise any other rights of a holder as described in this subsection, since the depositary will be the sole holder of the debt security.

If any debt securities cease to be issued in global form, then unless we indicate otherwise in your prospectus supplement, they will be issued:

- only in fully registered form;
- without interest coupons; and
- unless we indicate otherwise in your prospectus supplement, in denominations of $1,000 and integral multiples of $1,000.

Holders may exchange their debt securities for debt securities of smaller denominations (subject to the limit above) or combined into fewer debt securities of larger denominations, as long as the total principal amount is not changed. You may not exchange your debt securities for securities of a different series or having different terms, unless your prospectus supplement says you may.

Holders may exchange or transfer their debt securities at the office of the trustee. They may also replace lost, stolen, destroyed or mutilated debt securities at that office. We have appointed the trustee to act as our agent for registering debt securities in the names of holders and transferring and replacing debt securities. We may appoint another entity to perform these functions or perform them ourselves.

Holders will not be required to pay a service charge to transfer or exchange their debt securities, but they may be required to pay for any tax or other governmental charge associated with the exchange or transfer. The transfer or exchange, and any replacement, will be made only if our transfer agent is satisfied with the holder's proof of legal ownership. The transfer agent may require an indemnity before replacing any debt securities.

If we have designated additional transfer agents for your debt security, they will be named in your prospectus supplement. We may appoint additional transfer agents or cancel the appointment of any particular transfer agent. We may also approve a change in the office through which any transfer agent acts.

If the debt securities of any series are redeemable and we redeem less than all those debt securities, we may block the transfer or exchange of those debt securities during the period beginning 15 days before the day we mail the notice of redemption and ending on the day of that mailing or during any other period specified in the applicable prospectus supplement, in order to freeze the list of holders who will receive the mailing. We may also refuse to register transfers of or exchange any debt security selected for redemption, except that we will continue to permit transfers and exchanges of the unredeemed portion of any debt security being partially redeemed.

The rules for exchange described above apply to exchanges of debt securities for other debt securities of the same series and kind. If a debt security is convertible, exercisable or exchangeable into or for a different kind of security, such as one that we have not issued, or for other property, the rules governing that type of conversion, exercise or exchange will be described in the applicable prospectus supplement.

### Payment Mechanics for Debt Securities

#### Who Receives Payments?

If interest is due on a debt security on an interest payment date, we will pay the interest to the person in whose name the debt security is registered at the close of business on the regular record date described below relating to the interest payment date. If interest is due at maturity but on a day that is not an interest payment date, we will pay the interest to the person entitled to receive the principal of the debt security. If principal or another amount besides interest is due on a debt security at maturity, we will pay the amount to the holder of the debt security against surrender of the debt security at a proper place of payment (or, in the case of a global debt security, in accordance with the applicable policies of the depositary).

#### Payment Dates and Regular Record Dates for Interest

Unless we specify otherwise in the applicable prospectus supplement, interest on any fixed rate debt security will be payable semiannually each May 15 and November 15 and at maturity, and the regular record date relating to an interest payment date for any fixed rate debt security will be the May 1 or November 1 next preceding that interest payment date. The regular record date relating to an interest payment date for any floating rate debt security will be the 15th calendar day before that interest payment date. These record dates will apply whether or not a particular record date is a business day. For the purpose of determining the holder at the close of business on a regular record date when business is not being conducted, the close of business will mean 5:00 P.M., New York City time, on that day.

The term "business day" means, for any debt security, a day that meets all the following applicable requirements:

- for all debt securities, is a Monday, Tuesday, Wednesday, Thursday or Friday that is not a day on which banking institutions in New York City generally are authorized or obligated by law, regulation or executive order to close and that satisfies any other criteria specified in your prospectus supplement;
- if the debt security is a floating rate debt security whose interest rate is based on LIBOR, is also a day on which dealings in the relevant index currency specified in the applicable prospectus supplement are transacted in the London interbank market;
- if the debt security has a specified currency other than U.S. dollars or euros, is also a day on which banking institutions are not authorized or obligated by law, regulation or executive order to close in the principal financial center of the country issuing the specified currency;
- if the debt security either is a floating rate debt security whose interest rate is based on EURIBOR or has a specified currency of euros, is also a day on which the Trans-European Automated Real-time Gross settlement Express Transfer (TARGET) System, or any successor system, is open for business;
- if the debt security is held through Euroclear, is also not a day on which banking institutions in Brussels, Belgium are generally authorized or obligated by law, regulation or executive order to close; and
- if the debt security is held through Clearstream, is also not a day on which banking institutions in Luxembourg are generally authorized or obligated by law, regulation or executive order to close.

#### How We Will Make Payments Due in U.S. Dollars

We will follow the practices described in this subsection when paying amounts due in U.S. dollars. Payments of amounts due in other currencies will be made as described in the next subsection.

**Payments on Global Debt Securities.** We will make payments on a global debt security in accordance with the applicable policies of the depositary as in effect from time to time. Under those policies, we will pay directly to the depositary, or its nominee, and not to any indirect owners who own beneficial interests in the global debt security. An indirect owner's right to receive those payments will be governed by the rules and practices of the depositary and its participants, as described under "Legal Ownership and Book-Entry Issuance—What Is a Global Security?"

**Payments on Non-Global Debt Securities.** We will make payments on a debt security in non-global, registered form as follows. We will pay interest that is due on an interest payment date by check mailed on the interest payment date to the holder at his or her address shown on the trustee's records as of the close of business on the regular record date. We will make all other payments by check at the paying agent described below, against surrender of the debt security. All payments by check will be made in next-day funds—that is, in funds that become available on the day after the check is cashed.

Alternatively, if a non-global debt security has a face amount of at least $1,000,000 and the holder asks us to do so, we will pay any amount that becomes due on the debt security by wire transfer of immediately available funds to an account at a bank in New York City, on the due date. To request wire payment, the holder must give the paying agent appropriate wire transfer instructions at least five business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person who is the holder on the relevant regular record date. In the case of any other payment, payment will be made only after the debt security is surrendered to the paying agent. Any wire instructions, once properly given, will remain in effect unless and until new instructions are given in the manner described above.

Book-entry and other indirect owners should consult their banks or brokers for information on how they will receive payments on their debt securities.

**How We Will Make Payments Due in Other Currencies**

We will follow the practices described in this subsection when paying amounts that are due in a specified currency other than U.S. dollars.

**Payments on Global Debt Securities.** We will make payments on a global debt security in accordance with the applicable policies of the depositary as in effect from time to time. We understand that these policies, as currently in effect at DTC, are as follows:

Unless otherwise indicated in your prospectus supplement, if you are an indirect owner of global debt securities denominated in a specified currency other than U.S. dollars and if you have the right to elect to receive payments in that other currency and you do make that election, you must notify the participant through which your interest in the global debt security is held of your election:

- on or before the applicable regular record date, in the case of a payment of interest, or
- on or before the 16th day prior to stated maturity, or any redemption or repayment date, in the case of payment of principal or any premium.

You may elect to receive all or only a portion of any interest, principal or premium payment in a specified currency other than U.S. dollars.

Your participant must, in turn, notify DTC of your election on or before the third DTC business day after that regular record date, in the case of a payment of interest, and on or before the 12th DTC business day prior to stated maturity, or on the redemption or repayment date if your debt security is redeemed or repaid earlier, in the case of a payment of principal or any premium.

DTC, in turn, will notify the paying agent of your election in accordance with DTC's procedures.

If complete instructions are received by the participant and forwarded by the participant to DTC, and by DTC to the paying agent, on or before the dates noted above, the paying agent, in accordance with DTC's instructions, will make the payments to you or your participant by wire transfer of immediately available funds to an account maintained by you or your participant with a bank located in the country issuing the specified currency or in another jurisdiction acceptable to us and the paying agent.

If the foregoing steps are not properly completed, we expect DTC to inform the paying agent that payment is to be made in U.S. dollars. In that case, we or our agent will convert the payment to U.S. dollars in the manner described below under "—Conversion to U.S. Dollars." We expect that we or our agent will then make the payment in U.S. dollars to DTC, and that DTC in turn will pass it along to its participants.

Book-entry and other indirect holders of a global debt security denominated in a currency other than U.S. dollars should consult their banks or brokers for information on how to request payment in the specified currency.

**Payments on Non-Global Debt Securities.** Except as described in the second to last paragraph under this heading, we will make payments on debt securities in non-global form in the applicable specified currency. We will make these payments by wire transfer of immediately available funds to any account that is maintained in the applicable specified currency at a bank designated by the holder and is acceptable to us and the trustee. To designate an account for wire payment, the holder must give the paying agent appropriate wire instructions at least five business days before the requested wire payment is due. In the case of any interest payment due on an interest payment date, the instructions must be given by the person who is the holder on the regular record date. In the case of any other payment, the payment will be made only after the debt security is surrendered to the paying agent. Any instructions, once properly given, will remain in effect unless and until new instructions are properly given in the manner described above.

If a holder fails to give instructions as described above, we will notify the holder at the address in the trustee's records and will make the payment within five business days after the holder provides appropriate instructions. Any late payment made in these circumstances will be treated under the debt indenture as if made on the due date, and no interest will accrue on the late payment from the due date to the date paid.

Although a payment on a debt security in non-global form may be due in a specified currency other than U.S. dollars, we will make the payment in U.S. dollars if the holder asks us to do so. To request U.S. dollar payment, the holder must provide appropriate written notice to the trustee at least five business days before the next due date for which payment in U.S. dollars is requested. In the case of any interest payment due on an interest payment date, the request must be made by the person who is the holder on the regular record date. Any request, once properly made, will remain in effect unless and until revoked by notice properly given in the manner described above.

Indirect owners of a non-global debt security with a specified currency other than U.S. dollars should contact their banks or brokers for information about how to receive payments in the specified currency or in U.S. dollars.

**Conversion to U.S. Dollars.** When we are asked by a holder to make payments in U.S. dollars of an amount due in another currency, either on a global debt security or a non-global debt security as described above, we will determine the U.S. dollar amount the holder receives as follows. The exchange rate agent described below will request currency bid quotations expressed in U.S. dollars from three or, if three are not available, then two, recognized foreign exchange dealers in New York City, any of which may be the exchange rate agent, which may be UBS Securities LLC, an affiliate of UBS, as of 11:00 A.M., New York City time, on the second business day before the payment date. Currency bid quotations will be requested on an aggregate basis, for all holders of debt securities requesting U.S. dollar payments of amounts due on the same date in the same specified currency. The U.S. dollar amount the holder receives will be based on the highest acceptable currency bid quotation received by the exchange rate agent. If the exchange rate agent determines that at least two acceptable currency bid quotations are not available on that second business day, the payment will be made in the specified currency.

To be acceptable, a quotation must be given as of 11:00 A.M., New York City time, on the second business day before the due date and the quoting dealer must commit to execute a contract at the quotation in the total amount due in that currency on all series of debt securities. If some but not all of the relevant debt securities are LIBOR debt securities or EURIBOR debt securities, the second preceding business day will be determined for this purpose as if none of those debt securities were LIBOR debt securities or EURIBOR debt securities.

A holder that requests payment in U.S. dollars will bear all associated currency exchange costs, which will be deducted from the payment.

**When the Specified Currency Is Not Available.** If we are obligated to make any payment in a specified currency other than U.S. dollars, and the specified currency or any successor currency is not available to us or cannot be paid to you due to circumstances beyond our control—such as the imposition of exchange controls or a disruption in the currency markets—we will be entitled to satisfy our obligation to make the payment in that specified currency by making the payment in U.S. dollars, on the basis specified in the applicable prospectus supplement.

For a specified currency other than U.S. dollars, the exchange rate will be the noon buying rate for cable transfers of the specified currency in New York City as quoted by the Federal Reserve Bank of New York on the then-most recent day on which that bank has quoted that rate.

The foregoing will apply to any debt security, whether in global or non-global form, and to any payment, including a payment at maturity. Any payment made under the circumstances and in a manner described above will not result in a default under any debt security or the debt indenture.

**Exchange Rate Agent.** If we issue a debt security in a specified currency other than U.S. dollars, we will appoint a financial institution to act as the exchange rate agent and will name the institution initially appointed when the debt security is originally issued in the applicable prospectus supplement. We may select UBS Securities LLC or another of our affiliates to perform this role. We may change the exchange rate agent from time to time after the original issue date of the debt security without your consent and without notifying you of the change.

All determinations made by the exchange rate agent will be at its sole discretion unless we state in your prospectus supplement that any determination is subject to our approval. In the absence of manifest error, those determinations will be conclusive for all purposes and binding on you and us, without any liability on the part of the exchange rate agent.

### Payment When Offices Are Closed

If any payment is due on a debt security on a day that is not a business day, we will make the payment on the next day that is a business day. Unless specified otherwise in the applicable prospectus supplement, payments postponed to the next business day in this situation will be treated under the debt indenture as if they were made on the original due date. Postponement of this kind will not result in a default under any debt security or the debt indenture, and no interest will accrue on the postponed amount from the original due date to the next day that is a business day. The term business day has a special meaning, which we describe above under "—Payment Dates and Regular Record Dates for Interest."

### Paying Agent

We may appoint one or more financial institutions to act as our paying agents, at whose designated offices debt securities in non-global entry form may be surrendered for payment at their maturity. We call each of those offices a paying agent. We may add, replace or terminate paying agents from time to time. We may also choose to act as our own paying agent. Initially, we have appointed the trustee, at its corporate trust office in New York City, as the paying agent. We must notify the trustee of changes in the paying agents.

### Settlement Mechanics

The settlement mechanics applicable to debt securities calling for physical settlement will be described in the applicable prospectus supplement.

### Unclaimed Payments

Regardless of who acts as paying agent, all money paid by us to a paying agent that remains unclaimed at the end of two years after the amount is due to a holder will be repaid to us. After that two-year period, the holder may look only to us for payment and not to the trustee, any other paying agent or anyone else.

### Notices

Notices to be given to holders of a global debt security will be given only to the depositary, in accordance with its applicable policies as in effect from time to time. Notices to be given to holders of debt securities not in global form will be sent by mail to the respective addresses of the holders as they appear in the trustee's records, and will be deemed given when mailed. Neither the failure to give any notice to a particular holder, nor any defect in a notice given to a particular holder, will affect the sufficiency of any notice given to another holder.

Book-entry and other indirect holders should consult their banks or brokers for information on how they will receive notices.

### Our Relationship with the Trustee

U.S. Bank Trust National Association has provided commercial banking and other services for us and our affiliates in the past and may do so in the future. Among other things, U.S. Bank Trust National Association holds debt securities issued by us and serves as trustee or agent with regard to other obligations of UBS or its subsidiaries.

U.S. Bank Trust National Association is serving as the trustee for the debt securities and the warrants issued under our warrant indenture. Consequently, if an actual or potential event of default occurs with respect to any of these securities, the trustee may be considered to have a conflicting interest for purposes of the Trust Indenture Act of 1939. In that case, the trustee may be required to resign under one or more of the indentures, and we would be required to appoint a successor trustee. For this purpose, a "potential" event of default means an event that would be an event of default if the requirements for giving us default notice or for the default having to exist for a specific period of time were disregarded.

## Legal Ownership and Book-Entry Issuance

In this section, we describe special considerations that will apply to registered securities issued in global—i.e., book-entry—form. First we describe the difference between legal ownership and indirect ownership of registered securities. Then we describe special provisions that apply to global securities.

### Who is The Legal Owner of a Registered Security?

Each debt security or warrant in registered form will be represented either by a certificate issued in definitive form to a particular investor or by one or more global securities representing the entire issuance of securities. We refer to those who have securities registered in their own names, on the books that we or the trustee, warrant agent or other agent maintain for this purpose, as the "holders" of those securities. These persons are the legal holders of the securities. We refer to those who, indirectly through others, own beneficial interests in securities that are not registered in their own names as indirect owners of those securities. As we discuss below, indirect owners are not legal holders, and investors in securities issued in book-entry form or in street name will be indirect owners.

### Book-Entry Owners

We will issue each security in book-entry form only. This means securities will be represented by one or more global securities registered in the name of a financial institution that holds them as depositary on behalf of other financial institutions that participate in the depositary's book-entry system. These participating institutions, in turn, hold beneficial interests in the securities on behalf of themselves or their customers.

Under each indenture or warrant agreement, only the person in whose name a security is registered is recognized as the holder of that security. Consequently, for securities issued in global form, we will recognize only the depositary as the holder of the securities and we will make all payments on the securities, including deliveries of any property other than cash, to the depositary. The depositary passes along the payments it receives to its participants, which in turn pass the payments along to their customers who are the beneficial owners. The depositary and its participants do so under agreements they have made with one another or with their customers; they are not obligated to do so under the terms of the securities.

As a result, investors will not own securities directly. Instead, they will own beneficial interests in a global security, through a bank, broker or other financial institution that participates in the depositary's book-entry system or holds an interest through a participant. As long as the securities are issued in global form, investors will be indirect owners, and not holders, of the securities.

### Street Name Owners

In the future we may terminate a global security or issue securities initially in non-global form. In these cases, investors may choose to hold their securities in their own names or in street name. Securities held by an investor in street name would be registered in the name of a bank, broker or other financial institution that the investor chooses, and the investor would hold only a beneficial interest in those securities through an account he or she maintains at that institution.

For securities held in street name, we will recognize only the intermediary banks, brokers and other financial institutions in whose names the securities are registered as the holders of those securities and we will make all payments on those securities, including deliveries of any property other than cash, to them. These institutions pass along the payments they receive to their customers who are the beneficial owners, but only because they agree to do so in their customer agreements or because they are legally required to do so. Investors who hold securities in street name will be indirect owners, not holders, of those securities.

**Legal Holders**

Our obligations, as well as the obligations of the trustee and the obligations, if any, of any warrant agents and any other third parties employed by us, the trustee or any of those agents, run only to the holders of the securities. We do not have obligations to investors who hold indirect interests in global securities, in street name or by any other indirect means. This will be the case whether an investor chooses to be an indirect owner of a security or has no choice because we are issuing the securities only in global form.

For example, once we make a payment or give a notice to the holder, we have no further responsibility for that payment or notice even if that holder is required, under agreements with depositary participants or customers or by law, to pass it along to the indirect owners but does not do so. Similarly, if we want to obtain the approval of the holders for any purpose—for example, to amend the indenture for a series of debt securities or warrants or the warrant agreement for a series of warrants or to relieve us of the consequences of a default or of our obligation to comply with a particular provision of the indenture—we would seek the approval only from the holders, and not the indirect owners, of the relevant securities. Whether and how the holders contact the indirect owners is up to the holders.

When we refer to "you" in this prospectus, we mean those who invest in the securities being offered by this prospectus, whether they are the holders or only indirect owners of those securities. When we refer to "your securities" in this prospectus, we mean the securities in which you will hold a direct or indirect interest.

**Special Considerations for Indirect Owners**

If you hold securities through a bank, broker or other financial institution, either in book-entry form or in street name, you should check with your own institution to find out:

- how it handles securities payments and notices;
- whether it imposes fees or charges;
- whether and how you can instruct it to exercise any rights to purchase or sell warrant property under a warrant or to exchange or convert a security for or into other property;
- how it would handle a request for the holders' consent, if ever required;
- whether and how you can instruct it to send you securities registered in your own name so you can be a holder, if that is permitted in the future;
- how it would exercise rights under the securities if there were a default or other event triggering the need for holders to act to protect their interests; and
- if the securities are in book-entry form, how the depositary's rules and procedures will affect these matters.

**What Is a Global Security?**

We will issue each security in book-entry form only. Each security issued in book-entry form will be represented by a global security that we deposit with and register in the name of one or more financial institutions or clearing systems, or their nominees, which we select. A financial institution or clearing system that we select for any security for this purpose is called the "depositary" for that security. A security will usually have only one depositary but it may have more.
Each series of securities will have one or more of the following as the depositaries:

- The Depository Trust Company, New York, New York, which is known as "DTC";
- a financial institution holding the securities on behalf of Morgan Guaranty Trust Company of New York, acting out of its Brussels, Belgium, office, as operator of the Euroclear system, which is known as "Euroclear";
- a financial institution holding the securities on behalf of Clearstream Banking, société anonyme, which is known as "Clearstream"; and

- any other clearing system or financial institution named in the applicable prospectus supplement. The depositaries named above may also be participants in one another's systems. Thus, for example, if DTC is the depositary for a global security, investors may hold beneficial interests in that security through Euroclear or Clearstream, as DTC participants.

The depositary or depositaries for your securities will be named in your prospectus supplement; if none is named, the depositary will be DTC.

A global security may represent one or any other number of individual securities. Generally, all securities represented by the same global security will have the same terms. We may, however, issue a global security that represents multiple securities of the same kind, such as debt securities, that have different terms and are issued at different times. We call this kind of global security a master global security. Your prospectus supplement will not indicate whether your securities are represented by a master global security.

A global security may not be transferred to or registered in the name of anyone other than the depositary or its nominee, unless special termination situations arise. We describe those situations below under "—Holder's Option to Obtain a Non-Global Security; Special Situations When a Global Security Will Be Terminated." As a result of these arrangements, the depositary, or its nominee, will be the sole registered owner and holder of all securities represented by a global security, and investors will be permitted to own only indirect interests in a global security. Indirect interests must be held by means of an account with a broker, bank or other financial institution that in turn has an account with the depositary or with another institution that does. Thus, an investor whose security is represented by a global security will not be a holder of the security, but only an indirect owner of an interest in the global security.

If the prospectus supplement for a particular security indicates that the security will be issued in global form only, then the security will be represented by a global security at all times unless and until the global security is terminated. We describe the situations in which this can occur below under "—Holder's Option to Obtain a Non-Global Security; Special Situations When a Global Security Will Be Terminated." If termination occurs, we may issue the securities through another book-entry clearing system or decide that the securities may no longer be held through any book-entry clearing system.

**Special Considerations for Global Securities**

As an indirect owner, an investor's rights relating to a global security will be governed by the account rules of the depositary and those of the investor's financial institution or other intermediary through which it holds its interest (such as Euroclear or Clearstream, if DTC is the depositary), as well as general laws relating to securities transfers. We do not recognize this type of investor or any intermediary as a holder of securities and instead deal only with the depositary that holds the global security. If securities are issued only in the form of a global security, an investor should be aware of the following:

- An investor cannot require the securities to be registered in his or her own name, and cannot obtain non-global certificates for his or her interest in the securities, except in the special situations we describe below.

- An investor will be an indirect holder and must look to his or her own bank or broker for payments on the securities and protection of his or her legal rights relating to the securities, as we describe above under "—Who Is the Legal Owner of a Registered Security?"

- An investor may not be able to sell interests in the securities to some insurance companies and other institutions that are required by law to own their securities in non-book-entry form.

- An investor may not be able to pledge his or her interest in a global security in circumstances where certificates representing the securities must be delivered to the lender or other beneficiary of the pledge in order for the pledge to be effective.

- The depositary's policies will govern payments, deliveries, transfers, exchanges, notices and other matters relating to an investor's interest in a global security, and those policies may change from time to time. We, the trustee and any warrant agents will have no responsibility for any aspect of the depositary's policies, actions or records of ownership interests in a global security. We, the trustee and any warrant agents also do not supervise the depositary in any way.

- The depositary will require that those who purchase and sell interests in a global security within its book-entry system use immediately available funds and your broker or bank may require you to do so as well.

- Financial institutions that participate in the depositary's book-entry system and through which an investor holds its interest in the global securities, directly or indirectly, may also have their own policies affecting payments, deliveries, transfers, exchanges, notices and other matters relating to the securities, and those policies may change from time to time. For example, if you hold an interest in a global security through Euroclear or Clearstream, when DTC is the depositary, Euroclear or Clearstream, as applicable, will require those who purchase and sell interests in that security through them to use immediately available funds and comply with other policies and procedures, including deadlines for giving instructions as to transactions that are to be effected on a particular day. There may be more than one financial intermediary in the chain of ownership for an investor. We do not monitor and are not responsible for the policies or actions or records of ownership interests of any of those intermediaries.

**Holder's Option to Obtain a Non-Global Security; Special Situations When a Global Security Will Be Terminated**

If we issue any series of securities in book-entry form but we choose to give the beneficial owners of that series the right to obtain non-global securities, any beneficial owner entitled to obtain non-global securities may do so by following the applicable procedures of the depositary, any transfer agent or registrar for that series and that owner's bank, broker or other financial institution through which that owner holds its beneficial interest in the securities. If you are entitled to request a non-global certificate and wish to do so, you will need to allow sufficient lead time to enable us or our agent to prepare the requested certificate.

In addition, in a few special situations described below, a global security will be terminated and interests in it will be exchanged for certificates in non-global form representing the securities it represented. After that exchange, the choice of whether to hold the securities directly or in street name will be up to the investor. Investors must consult their own banks or brokers to find out how to have their interests in a global security transferred on termination to their own names, so that they will be holders. We have described the rights of holders and street name investors above under "—Who Is the Legal Owner of a Registered Security?"

The special situations for termination of a global security are as follows:

- if the depositary notifies us that it is unwilling, unable or no longer qualified to continue as depositary for that global security and we do not appoint another institution to act as depositary within 60 days; or

- in the case of a global security representing debt securities or warrants issued under an indenture, if an event of default has occurred with regard to these debt securities or warrants and has not been cured or waived.

If a global security is terminated, only the depositary, and not we, the trustee for any debt securities or warrants or the warrant agent for any warrants, is responsible for deciding the names of the institutions in whose names the securities represented by the global security will be registered and, therefore, who will be the holders of those securities.

**Considerations Relating to Euroclear and Clearstream**

Euroclear and Clearstream are securities clearance systems in Europe. Both systems clear and settle securities transactions between their participants through electronic, book-entry delivery of securities against payment.

Euroclear and Clearstream may be depositaries for a global security. In addition, if DTC is the depositary for a global security, Euroclear and Clearstream may hold interests in the global security as participants in DTC.

As long as any global security is held by Euroclear or Clearstream as depositary, you may hold an interest in the global security only through an organization that participates, directly or indirectly, in Euroclear or Clearstream. If Euroclear or Clearstream is the depositary for a global security and there is no depositary in the United States, you will not be able to hold interests in that global security through any securities clearance system in the United States.

Payments, deliveries, transfers, exchanges, notices and other matters relating to the securities made through Euroclear or Clearstream must comply with the rules and procedures of those systems. Those systems could change their rules and procedures at any time. We have no control over those systems or their participants and we take no responsibility for their activities. Transactions between participants in Euroclear or Clearstream, on one hand, and participants in DTC, on the other hand, when DTC is the depositary, would also be subject to DTC's rules and procedures.

**Special Timing Considerations for Transactions in Euroclear and Clearstream**

Investors will be able to make and receive through Euroclear and Clearstream payments, deliveries, transfers, exchanges, notices and other transactions involving any securities held through those systems only on days when those systems are open for business. Those systems may not be open for business on days when banks, brokers and other institutions are open for business in the United States.

In addition, because of time-zone differences, U.S. investors who hold their interests in the securities through these systems and wish to transfer their interests, or to receive or make a payment or delivery or exercise any other right with respect to their interests, on a particular day may find that the transaction will not be effected until the next business day in Luxembourg or Brussels, as applicable. Thus, investors who wish to exercise rights that expire on a particular day may need to act before the expiration date. In addition, investors who hold their interests through both DTC and Euroclear or Clearstream may need to make special arrangements to finance any purchases or sales of their interests between the U.S. and European clearing systems, and those transactions may settle later than would be the case for transactions within one clearing system.

## 1. UBS AG FI Enhanced Large Cap Growth ETN due June 19, 2024

**Principal Terms:**

**Principal Amount:** $750,000,000

**Issuer**: UBS AG, London Branch

**Initial Trade Date**: June 10, 2014

**Initial Settlement Date**: June 13, 2014

**Term**: 10 years, subject to your right to receive payment for your Securities upon redemption, acceleration upon minimum indicative value or exercise by UBS of its call right.

**Denomination/Principal Amount**: $100.00 per Security

**Maturity Date**: June 19, 2024, subject to adjustment

**Underlying Index**: The return on the Securities is linked to the Russell 1000 Growth Total Return Index. The level of the Index reflects both the price performance of the Index Constituent Securities and the reinvestment of dividends on the Index Constituent Securities.

**Annual Tracking Rate**: 0.85% per annum

**Financing Spread**: 0.44% per annum

**Loss Rebalancing Fee**: Upon each occurrence of a Loss Rebalancing Event, you will incur a 0.05% reduction in the LR Current Principal Amount of Your Securities and may also have a further reduction due to a breakage computation. See "General Terms of the Securities — Loss Rebalancing Event Upon Large Decreases in the Indicative Value" for the definition of the Loss Rebalancing Fee and all other defined pertaining to the Loss Rebalancing Event.

**First Redemption Date**: June 20, 2014 for Regular Redemptions, June 26, 2014 for Large Redemptions

**Final Redemption Date**: June 14, 2024

**First Call Date**: The first date that UBS may exercise its Call Right is June 15, 2015

**Quarterly Initial Closing Level for the Initial Calendar Quarter**: 826.0448, the Index Closing Level (as defined below) on the Initial Trade Date.

**Quarterly Reset Dates**: For each calendar quarter, the Quarterly Reset Date is the first Trading Day of that quarter beginning on October 1, 2014 and ending on April 1, 2024, subject to adjustment.

**Quarterly Valuation Dates**: For each Quarterly Reset Date, the Quarterly Valuation Date is the last Trading Day of the previous calendar quarter, beginning on September 30, 2014 and ending on March 28, 2024, subject to adjustment.

**Floor Level**: The "Floor Level" is equal to $20.00 (subject to adjustment as described under "Valuation of the Index and the Securities — Split or Reverse Split of the Securities").

**Index Sponsor**: Russell Investments, a subsidiary of Russell Investment Group ("Russell").

**Listing**: The Securities have been approved for listing, subject to official notice of issuance, on NYSE Arca under the symbol "FBGX"

**Calculation Date**: June 10, 2024, unless that day is not a Trading Day, in which case the Calculation Date will be the next Trading Day, subject to adjustment.

**Index Symbol**: RU10GRTR (NYSE and Bloomberg)

**Intraday Indicative Value Symbol**: FBGXIV (Bloomberg)

**CUSIP No.**: 902677780

**ISIN No.**: US9026777808

### Valuation of the Index and the Securities

### Intraday Index Values

On each Trading Day, the Index Sponsor will calculate and publish the intraday indicative value of the relevant Index at least every 15 seconds during normal trading hours on Bloomberg L.P. ("Bloomberg") or any other publicly available information provider specified in " Principal Terms" above under a ticker symbol identified above. The actual relevant Index Closing Level may vary, and on a cumulative basis over the term of any series of the Securities may vary significantly, from the intraday indicative value of the Index.

The intraday indicative calculation of the level of the relevant Index will be provided for reference purposes only. Published calculations of the level of the relevant Index from the Index Sponsor may occasionally be subject to delay or postponement. Any such delays or postponements will affect the current level of the relevant Index and therefore the value of the affected series of Securities in the secondary market. The intraday indicative value of the relevant Index published at least every 15 seconds will be based on the intraday prices of the Index Constituent Securities.

**Intraday Security Values**

An intraday "indicative value" for each series of the Securities, meant to approximate the intrinsic economic value of that series of the Securities, will be calculated by the calculation agent specified in " Principal Terms" above and published to Bloomberg or any other publicly available information provider specified in " Principal Terms" above (or a successor) via the facilities on the Consolidated Tape Association under a symbol to be identified in " Principal Terms" above. In connection with your Securities, we use the term "indicative value" to refer to the value at a given time and date equal to (i) Current Principal Amount multiplied by the Index Factor calculated using the intraday indicative value of the relevant Index as of such time as the Index Valuation Level, minus (ii) the Accrued Fees as of such time and date, assuming such time and date is the Redemption Valuation Date.

The intraday indicative value calculation will be used to determine whether any series of the Securities will be accelerated, as discussed under "General Terms of the Securities — Acceleration Upon Minimum Indicative Value". It is not intended as a price or quotation, or as an offer to solicitation for the purpose, sale, or termination of your Securities, nor will it reflect hedging or other transactional costs, credit considerations, market liquidity or bid-offer spreads. The levels of the relevant Index provided by the Index Sponsor specified in " Principal Terms" above will not necessarily reflect the depth and liquidity of the relevant Index Constituent Securities. For this reason and others, the actual trading price of the Securities of any series may be different from their indicative value.

The calculation of the intraday indicative value shall not constitute a recommendation or solicitation to conclude a transaction at the level stated, and should not be treated as giving investment advice.

The reporting of the intraday indicative value of any series of the Securities by Bloomberg or any other publicly available information provider specified in " Principal Terms" above may occasionally be subject to delay or postponement. The actual trading price of any series of the Securities may be different from their intraday indicative value. The intraday indicative value of any series of the Securities published at least every 15 seconds during the NYSE Arca's Core Trading Session, which is currently from 9:30 a.m. to 4:00 p.m., New York City time, will be based on the intraday indicative values of the relevant Index, and may not be equal to the payment at maturity, early redemption, acceleration, or upon exercise by UBS of its call right.

These intraday indicative value calculations will be prepared as of a particular time and date and will therefore not reflect subsequent changes in market values or prices or in any other factors relevant to their determination.

**Split or Reverse Split of the Securities**

Should the Current Principal Amount of any series of Securities on any Trading Day be above $400.00, we may, but are not obligated to, initiate a 4-for-1 split of your Securities. Should the Current Principal Amount on any Trading Day be below $40.00, we may, but are not obligated to, initiate a 1-for-4 reverse split of your Securities. If the Current Principal Amount of a series of Securities is greater than $400.00 or below $40.00 on any Trading Day, and we decide to initiate a split or reverse split, as applicable, such date shall be deemed to be the "announcement date", and we will issue a notice to holders of the relevant Securities and press release announcing the split or reverse split, specifying the effective date of the split or reverse split.

If the Securities undergo a split, we will adjust the terms of the Securities accordingly. If the Securities undergo a 4:1 split, every investor who holds a Security via The Depository Trust Company ("DTC") on the relevant record date will, after the split, hold four Securities, and adjustments will be made as described below. The record date for the split will be the tenth Business Day after the announcement date. The Current Principal Amount on such record date will be divided by four to reflect the 4:1 split of your Securities. Any adjustment of the Current Principal Amount will be rounded to eight decimal places. A corresponding adjustment will be made to the Floor Level for purposes of determining whether an Acceleration upon Minimum Indicative Value has occurred. For example, if the Securities undergo a 4:1 split, the Floor Level will be divided by 4. The split will become effective at the opening of trading of the Securities on the Business Day immediately following the record date.

In the case of a reverse split, we reserve the right to address odd numbers of Securities (commonly referred to as "partials") in a manner determined by us in our sole discretion. If the Securities undergo a 1:4 reverse split, every investor who holds four Securities via DTC on the relevant record date will, after the reverse split, hold only one Security and adjustments will be made as described below. The record date for the reverse split will be on the tenth Business Day after the announcement date. The Current Principal Amount on such record date will be multiplied by four to reflect the 1:4 reverse split of your Securities. Any adjustment of the Current Principal Amount will be rounded to eight decimal places. A corresponding adjustment will be made to the Floor Level for purposes of determining whether an Acceleration upon Minimum Indicative Value has occurred. For example, if the securities undergo a 1:4 reverse split, the Floor Level will be multiplied by 4. The reverse split will become effective at the opening of trading of the Securities on the Business Day immediately following the record date.

Holders who own a number of Securities on the record date that is not evenly divisible by four will receive the same treatment as all other holders for the maximum number of Securities they hold which is evenly divisible by four, and we will have the right to compensate holders for their remaining or "partial" Securities in a manner determined by us in our sole discretion. Our current intention is to provide holders with a cash payment for their partials on the 17th Business Day following the announcement date in an amount equal to the appropriate percentage of the closing indicative value of the reverse split-adjusted Securities on the 14th Business Day following the announcement date. For example, a holder who held 23 Securities via DTC on the record date would receive five post-reverse split Securities on the immediately following Business Day, and a cash payment on the 17th Business Day following the announcement date that is equal to 3/4ths of the Current Principal Amount of the reverse split-adjusted Securities on the 14th Business Day following the announcement date.

**General Terms of the Securities**

In this section, references to "holders" or "you" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through DTC or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series A" above.

These Securities are part of a series of debt securities entitled "Medium-Term Notes, Series A" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series A" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series A are described under "Medium-Term Notes, Series A" above. The terms described here supplement those described in "Medium-Term Notes, Series A" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

**Interest or Coupons**

We will not pay you any interest or coupons during the term of the Securities.

**Payment at Maturity**

The "Maturity Date" for each series of Securities will be the third Trading Day after the last Trading Day in the applicable Measurement Period, which we refer to in this section "— Payment at Maturity" as the "Final Measurement Period". The scheduled Maturity Date is identified in " Principal Terms" above.

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to:

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the Final Measurement Period, minus

(b) the Accrued Fees as of such last Trading Day.

If the amount calculated above is less than zero, the payment at maturity will be zero.

**You may lose some or all of your initial investment at maturity. Because the Accrued Fees reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities of any series equal to at least the initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose some or all of your investment.**

The Accrued Fees will be calculated as of the last Trading Day in the Final Measurement Period as the sum of (i) the Accrued Tracking Fee as of such last Trading Day and (ii) the Accrued Financing Charge as of such last Trading Day.

The "Financing Level" is, as of any date of determination, an amount that equals the Current Principal Amount.

The "Accrued Financing Charge" as of the last Trading Day of the Final Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day of such Final Measurement Period and the denominator of which is 360, and (c) the Financing Rate.

On the Initial Trade Date, the Accrued Financing Charge for each Security will be $0.

The "Accrued Tracking Fee" as of the last Trading Day in the Final Measurement Period is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day in such Final Measurement Period *times* (ii) the Annual Tracking Rate, *divided by* (b) 365.

The "Annual Tracking Rate" is a per annum rate described in " Principal Terms" above.

The “Current Indicative Value” is, as determined by the Calculation Agent as of any date of determination, an amount per Security of any series equal to the product of (i) the Current Principal Amount and (ii) the Index Factor as of such date, calculated using the Index Closing Level on such date as the Index Valuation Level.

The “Principal Amount” of each Security is \$100.00. Each series of the Securities may be issued and sold over time at then-current market prices, which may be significantly higher or lower than the Principal Amount.

For the Initial Calendar Quarter, the Current Principal Amount will equal \$100.00 per Security of the applicable series. For each subsequent calendar quarter, the Current Principal Amount for each Security of that series will be reset as follows on the Quarterly Reset Date:

> *New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Quarterly Valuation Date — Accrued Fees on the applicable Quarterly Valuation Date

If any series of the Securities undergoes a split or reverse split, the Current Principal Amount of that series will be adjusted accordingly.

For each calendar quarter, the “Quarterly Reset Date” is the first Trading Day of the quarter specified in “ Principal Terms” above, subject to adjustment as described under “— Market Disruption Event”; provided, however, that no Quarterly Reset Date will occur on or after the Call Valuation Date or the Acceleration Date.

For each Quarterly Reset Date, the “Quarterly Valuation Date” is the last Trading Day of the previous calendar quarter subject to adjustment as described under “— Market Disruption Event”. The Quarterly Valuation Date is specified in “ Principal Terms” above .

The Index Factor will be calculated as follows:

$$1 + (2 \times \text{Index Performance Ratio})$$

The Index Performance Ratio on any Quarterly Valuation Date, any Redemption Valuation Date, or as of the last Trading Day in the applicable Measurement Period, as applicable, will be:

$$\frac{\text{Index Valuation Level — Quarterly Initial Closing Level}}{\text{Quarterly Initial Closing Level}}$$

The “Index Valuation Level” will equal the arithmetic mean of the Index Closing Levels measured on each Trading Day during the applicable Measurement Period, or the Index Closing Level on any Quarterly Valuation Date or any Redemption Valuation Date, as determined by the Calculation Agent, provided that:

(1) for Regular Redemptions, if the Redemption Valuation Date falls in a Final Measurement Period, Call Measurement Period, or Acceleration Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Index Valuation Level on the Redemption Valuation Date during such Measurement Period shall equal (a) (i) for each elapsed Trading Day in the Measurement Period from and including the Call Valuation Date, Acceleration Date or Calculation Date, as applicable, to but excluding the Redemption Valuation Date (the “Applicable Date”), the sum of the Index Closing Levels on such Trading Day(s) *plus* (ii) the Index Closing Level on the Applicable Date *times* the number of remaining Trading Days in the Measurement Period from and including the Applicable Date *divided by* (b) the number of Trading Days in the Measurement Period; and

(2) For a Large Redemption, if the Redemption Valuation Date occurs during an Acceleration Measurement Period, Call Measurement Period, or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement or payment at maturity, as applicable.

Unless specified otherwise in “ Principal Terms” above, the applicable “Measurement Period” means the five Trading Days from and including the Call Valuation Date, Acceleration Date, Redemption Valuation Date (for a Large Redemption) or the Calculation Date, as applicable, subject to adjustment as described under “General Terms of the Securities — Market Disruption Event”.

The “Quarterly Initial Closing Level” for the Initial Calendar Quarter is specified in “ Principal Terms” above and will be the Index Closing Level on the applicable Initial Trade Date. For each subsequent calendar quarter, the Quarterly Initial Closing Level on the Quarterly Reset Date will equal the Index Closing Level on the Quarterly Valuation Date for the previous calendar quarter.

The “Index Closing Level” is, for any series of the Securities, the closing level of the relevant Index as published by the Index Sponsor.

The “Index Sponsor” will be the entity that calculates the level of the relevant Index is specified in “ Principal Terms” above.

The “Calculation Date” is specified in “ Principal Terms” above.

The “Current Indicative Value”, as determined by the Calculation Agent as of any date of determination, is an amount per Security equal to the product of (i) the Current Principal Amount and (ii) the Index Factor of such date, using the Index Closing Level of such date as the Index Valuation Level.

Unless specified otherwise in “ Principal Terms” above, “Trading Day” means any day on which (i) trading is generally conducted on NYSE Arca and (ii) trading is generally conducted on the markets on which the Index Constituent Securities in the relevant Index are traded, in each case as determined by the Calculation Agent.

**Early Redemption at the Option of the Holders**

You may elect to require UBS to redeem your Securities, subject to a minimum redemption amount of at least 12,500 Securities of the same series. If you elect to have your Securities redeemed and have done so under the redemption procedures described below under “—Redemption Procedures”, you will receive payment for your Securities on the Redemption Date. The first and final Redemption Dates are specified in “ Principal Terms” above. For any early redemptions, the applicable “Redemption Valuation Date” means the first Trading Day following the date on which you deliver a redemption notice to UBS in compliance with the redemption procedures. For any Large Redemption (as defined below), the Redemption Valuation Date will be the first Trading Day in the applicable Large Redemption Measurement Period. If a Redemption Valuation Date for a Large Redemption occurs during an Acceleration Measurement Period, Call Measurement Period or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement or payment at maturity, as applicable.

To satisfy the minimum redemption amount of 12,500 Securities, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 12,500 Securities of the same series; however, there can be no assurance that they can or will do so. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 12,500 **Securities of any series. Any such reduction will be applied on a consistent basis for all holders of the Securities of the affected series at the time** the reduction becomes effective.

The Securities will be redeemed and the holders will receive payment for their Securities on the third Business Day following the corresponding Redemption Valuation Date (or the last Trading Day in the applicable Large Redemption Measurement Period for a Large Redemption), or if such third day is not a Business Day, the next following Business Day (the “Redemption Date”). In addition, if a call notice has been issued, if acceleration has been triggered, or the Final Measurement Period has commenced, in each case with respect to any series of the Securities, for Regular Redemptions the last permitted Redemption Valuation Date for that series of Securities will be the second Trading Day in the applicable Call Measurement Period, Acceleration Measurement Period, or the Final Measurement Period, as applicable. For a Large Redemption, If the Redemption Valuation Date occurs during an Acceleration Measurement Period, Call Measurement Period, or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement or payment at maturity, as applicable and the Redemption Date will be the third Business Day following the last Trading Day in the applicable Measurement Period. Any applicable Redemption Valuation Date is subject to adjustment as described under “— Market Disruption Event”.

A “Regular Redemption” means an early redemption of Securities of a given series in an amount greater than or equal to the minimum redemption amount of 12,500 Securities but less than the large redemption amount of 2,000,000 Securities.

A “Large Redemption” means an early redemption of Securities of a given series in an amount equal to or greater than 2,000,000 Securities. For purposes of determining whether an early redemption is a Regular Redemption or a Large Redemption, UBS will aggregate all redemption requests received prior to 12:00 noon (New York City time) on a given Trading Day.

*Regular Redemptions*

If you exercise your right to have us redeem your Securities and such redemption qualifies as a Regular Redemption, subject to your compliance with the procedures described under “— Redemption Procedures”, for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

 (i) the Current Principal Amount and (ii) the Index Factor as of the applicable Redemption Valuation Date, minus

(b) the Accrued Fees as of such Redemption Valuation Date, minus

(c) the Redemption Fee.

*Large Redemptions*

If you exercise your right to have us redeem your Securities and such redemption qualifies as a Large Redemption, subject to your compliance with the procedures described under “— Redemption Procedures”, for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the applicable Measurement Period, which we refer to in this section "— Early Redemption at the Option of the Holders" as the "Large Redemption Measurement Period", minus

(b) the Accrued Fees as of such last Trading Day, minus

(c) the Redemption Fee.

We refer to the cash payments described above as the "Redemption Amount".

If the amount calculated above is less than zero, the payment upon early redemption will be zero. We will inform you of such Redemption Amount two Business Days preceding the applicable Redemption Date.

You may lose some or all of your initial investment upon early redemption. Because the Accrued Fees and the Redemption Fee reduce your final payment, the quarterly compounded leveraged return of the Index will need to be sufficient to offset the negative effect of the Accrued Fees and the Redemption Fee, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to your initial investment in the Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset such a negative effect or if the quarterly compounded leveraged return of the Index is negative, you will lose some or all of your investment upon early redemption.

The Accrued Fees will be calculated as of any Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) as the sum of (i) the Accrued Tracking Fee as of such date and (ii) the Accrued Financing Charge as of such date.

The "Accrued Tracking Fee" as of any Redemption Valuation Date is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date (or, if the Redemption Valuation Date falls in the Initial Calendar Quarter, the Initial Trade Date) to, and including such Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) *times* (ii) the Annual Tracking Rate, *divided by* (b) 365.

The "Accrued Financing Charge" as of any Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date (or if the Redemption Valuation Date or last Trading Day of the applicable Large Measurement Period occurs prior to the initial Quarterly Valuation Date, the period from, and excluding, the Initial Trade Date) to, and including, such Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period), and the denominator of which is 360, and (c) the Financing Rate.

The "Redemption Fee" means, as of any date of determination for a series of Securities, an amount per Security equal to the product of (a) 0.125%, (b) the Current Principal Amount and (c) the Index Factor as of the applicable Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period).

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment".

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner. Any series of Securities may trade at, above, or below its indicative value.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption to UBS via email no later than 12:00 noon (New York City time) on the Trading Day immediately preceding the applicable Redemption Valuation Date. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a confirmation of redemption;
- deliver the signed confirmation of redemption to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date (or the applicable last Trading Day in the Large Redemption Measurement Period for Large Redemptions) at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Trading Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities of any series upon not less than eighteen calendar days' prior notice to the holders of the Securities of that series, such redemption to occur on any Trading Day specified in " Principal Terms" above through and including the Calculation Date specified in " Principal Terms" above. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the applicable Measurement Period, which we refer to in this section "— UBS's Call Right" as the "Call Measurement Period", minus

(b) the Accrued Fees as of such last Trading Day.

We refer to this cash payment as the "Call Settlement Amount".

If the amount calculated above is less than zero, the payment upon UBS's exercise of its call right will be zero.

If UBS issues a call notice on any Trading Day, the "Call Valuation Date" will be the fifth Trading Day following the Trading Day on which the call notice is issued.

We will inform you of such Call Settlement Amount on the first Business Day following the last Trading Day in the Call Measurement Period.

The holders will receive payment for their Securities on a date that is at least three, but not greater than six, Trading Days following the last Trading Day in the Call Measurement Period (the "Call Settlement Date"). We will inform you of such Call Settlement Date in the call notice. If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event".

You may lose some or all of your initial investment at call. Because the Accrued Fees and Loss Rebalancing Fees, if applicable, reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to at least initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose some or all of your investment at call.

The Accrued Fees will be calculated as of the last Trading Day in the Call Measurement Period as the sum of (i) the Accrued Tracking Fee as of such last Trading Day and (ii) the Accrued Financing Charge as of such last Trading Day.

The "Accrued Tracking Fee" as of the last Trading Day in the Call Measurement Period is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date to, and including such Call Valuation Date *times* (ii) the Annual Tracking Rate, *divided by* (b) 365.

The "Accrued Financing Charge" as of the last Trading Day of the Call Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day of such Call Measurement Period and the denominator of which is 360, and (c) the Financing Rate.

**Acceleration Upon Minimum Indicative Value**

If, at any time, the indicative value for any series of the Securities on any Trading Day equals the Floor Level or less (such day, an "Acceleration Date"), all issued and outstanding Securities of that series will be automatically accelerated and mandatorily redeemed by UBS (even if the indicative value of that series would later exceed the Floor Level on such Acceleration Date or any subsequent Trading Day during the applicable Measurement Period, which we refer to in this section "— Acceleration Upon Minimum Indicative Value" as the "Acceleration Measurement Period") for a cash payment equal to

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day of the Acceleration Measurement Period, minus

(b) the Accrued Fees as of such last Trading Day.

We refer to this cash payment as the "Acceleration Amount". The "Floor Level" of any series of the Securities will be specified in " Principal Terms" above. If any series of the Securities undergoes a split or reverse split, the Floor Level of that series will be adjusted accordingly. If the minimum indicative value threshold of any series of Securities has been breached, you will receive on the Acceleration Settlement Date only the Acceleration Amount in respect of your investment in that series of Securities.

You may lose some or all of your initial investment upon an acceleration upon minimum indicative value. Because the Accrued Fees and Loss Rebalancing Fees, if applicable, reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to at least the initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose some or all of your investment upon an acceleration upon minimum indicative value.

The Accrued Fees will be calculated as of any date of determination for any series of Securities as the sum of (i) the Accrued Tracking Fee as of the last Trading Day of the Acceleration Measurement Period and (ii) the Accrued Financing Charge as of the last Trading Day of the Acceleration Measurement Period.

The "Accrued Tracking Fee" as of the last Trading Day of the Acceleration Measurement Period will be an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date (or, if the Acceleration Date falls in the Initial Calendar Quarter, the Initial Trade Date) to, and including, such last Trading Day in such Measurement Period, as applicable, *times* (ii) the Annual Tracking Rate, *divided by* (b) 365.

The "Accrued Financing Charge" as of the last Trading Day of the Acceleration Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date (or if the Acceleration Date occurs prior to the initial Quarterly Valuation Date, the period from, and excluding, the Initial Trade Date) to, and including, such last Trading Day of such Measurement Period as applicable, and the denominator of which is 360, and (c) the Financing Rate.

The "Acceleration Settlement Date" will be the third Trading Day following the last Trading Day of the Acceleration Measurement Period.

Subject to the prior verification by the Calculation Agent that the indicative value of equal or less than the Floor Level was accurately calculated by the relevant calculation agent specified in " Principal Terms" above and in each case with respect to a series of Securities, UBS must provide notice to the holders of that series of the Securities that the minimum indicative value threshold has been breached not less than five calendar days prior to the Acceleration Settlement Date. For a detailed description of how the intraday indicative value of the Securities is calculated see "Valuation of the Index and the Securities".

**Loss Rebalancing Event Upon Large Decreases in the Indicative Value**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0 based on the Index Performance Ratio as of the LR Valuation Date. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event. In addition, each time a Loss Rebalancing Event occurs, you will incur a Loss Rebalancing Fee, as defined below.

A "Loss Rebalancing Event" means if, at any time, the closing indicative value for any series of the Securities on any Trading Day decreases 40% in value from the closing indicative value of that series of the Securities on the previous Quarterly Valuation Date. A Loss Rebalancing Event may occur irrespective of whether a Market Disruption Event also occurs on that Trading Day.

With respect to a Loss Rebalancing Event, the "LR Valuation Date" is the first Trading Day following a Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event".

With respect to a LR Valuation Date, the "LR Reset Date" is the first Trading Day following a LR Valuation Date, subject to adjustment as described under "— Market Disruption Event".

On the LR Reset Date, the Current Principal Amount for each Security of that series will be reset as follows:

*New* Current Principal Amount = 99.995% x LR Current Principal Amount.

LR Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable LR Valuation Date — Accrued Fees on the applicable LR Valuation Date.

If the amount calculated above is less than zero, the payment at maturity will be zero.

On the LR Reset Date, the LR Current Principal Amount will be reset exactly like the "*New* Current Principal Amount" on a Quarterly Reset Date, except that:

(1) the LR Reset Date will be the Quarterly Reset Date;

(2) the Index Factor and Index Performance Ratio will be calculated on the LR Valuation Date;

(3) the Index Valuation Level for purposes of calculating the Index Performance Ratio will be computed using the Index Closing Level on the LR Valuation Date;

(4) for the next reset date, the Quarterly Initial Closing Level on the applicable reset date will equal the Index Closing Level on the LR Valuation Date;

(5) Accrued Fees (the Accrued Tracking Fees and Accrued Financing Charge) will be computed as of the LR Valuation Date as if the LR Valuation Date was a Quarterly Valuation Date; and

(6) the Financing Level will be reduced the new Current Principal Amount.

The Financing Rate will remain constant until the next Quarterly Reset Date, *provided however* that if the reset date financing rate (determined in accordance with the definition of "Financing Rate" two London business days preceding LR Valuation Date and referred to as "L2") is less than the actual Financing Rate ("L1"), the Current Principal Amount will be further reduced by an amount equal to:

(L1-L2) x (Current Principal Amount -*New* Current Principal Amount) x (the days remaining in the quarter from and excluding the LR Valuation Date to and including the next Quarterly Valuation Date) *divided by* 360.

Note that each time a Loss Rebalancing Event occurs, you will incur a 0.05% reduction in the LR Current Principal Amount of your Securities and you also may have a further reduction due to the breakage computation in the preceding proviso. We will refer to these reductions as a "Loss Rebalancing Fee".

Loss Rebalancing Events can occur multiple times. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Each Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0 based on the Index Performance Ratio as of the LR Valuation Date. This means that your Securities will entitle you to less of a positive gain in value relative to before the occurrence of the Loss Rebalancing Event. In addition, each time a Loss Rebalancing Event occurs, you will incur a Loss Rebalancing Fee. This fee will reduce the amount of your return (or increase your loss) on the Maturity Date, early redemption, acceleration or exercise by UBS of its call right.

**Calculation Agent**

UBS Securities LLC will act as the Calculation Agent. The Calculation Agent will determine, among other things, the Index Valuation Level, the Index Performance Ratio, the Index Factor, the Current Principal Amount, the Current Indicative Value, the Accrued Fees, the Accrued Financing Charge, the Financing Level, the Financing Rate, the Accrued Tracking Fee, the Redemption Fee, if any, the Loss Rebalancing Fee, if any, the payment at maturity, if any, that we will pay you at maturity, the Redemption Amount, if any, that we will pay you upon redemption, the Call Settlement Amount, if any, that we will pay you on the Call Settlement Date, if applicable, or the Acceleration Amount, if any, that we will pay you on the Acceleration Settlement Date, if applicable, based on the relevant Index levels calculated by the Calculation Agent, as adjusted, and whether any day is a Business Day or Trading Day. The Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the relevant Index has been discontinued or is otherwise unavailable and whether there has been a material change in the relevant Index. All determinations made by the Calculation Agent will be at the sole discretion of the Calculation Agent for any series of the Securities and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different Calculation Agent for any series of the Securities from time to time without your consent and without notifying you.

The Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, early redemption, acceleration, or upon exercise by UBS of its call right on or prior to 12:00 p.m., New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, the Acceleration Settlement Date or the Call Settlement Date, as applicable.

All dollar amounts related to determination amounts payable per Security for any series of Securities will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of such Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the relevant Index has occurred or is continuing on an Averaging Date (as defined below), the Index Closing Level for such Averaging Date will be determined by the Calculation Agent or one of its affiliates on the first succeeding Trading Day on which a Market Disruption Event does not occur or is not continuing (the "Deferred Averaging Date") with respect to the relevant Index irrespective of whether, pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on any Averaging Date, the Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the applicable Measurement Period for purposes of calculating the Call Settlement Amount is based on the arithmetic mean of the Index Closing Levels on October 3, October 4, October 5, October 6 and October 7, and there is a Market Disruption Event with respect to the relevant Index on October 3, but no other Market Disruption Event during such Measurement Period, then the Index Closing Level on October 4 will be used twice to calculate the Call Settlement Amount, and the Call Settlement Amount will be determined based on the arithmetic mean of the Index Closing Levels on October 4, October 4, October, 5, October 6 and October 7. The same approach would be applied if there is a Market Disruption Event during any Measurement Period.

If the Redemption Valuation Date, for purposes of calculating a Redemption Amount for a Regular Redemption, is based on the Index Closing Level on October 3 and there is a Market Disruption Event with respect to the Index on October 3, then the Index Closing Level on October 4 will be used to calculate the Redemption Amount. If a Market Disruption Event occurs on any Quarterly Valuation Date, or LR Valuation Date, the Index Closing Level for such date will be determined by the Calculation Agent or one of its affiliates on the first succeeding Trading Day on which a Market Disruption Event does not occur or is not continuing.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date, Quarterly Valuation Date, the Redemption Valuation Date, or LR Valuation Date, as applicable, occurring more than eight Trading Days following the day originally scheduled to be such final Averaging Date or other applicable date. If the eighth Trading Day following the date originally scheduled to be the final Averaging Date, Quarterly Valuation Date, Redemption Valuation Date, or LR Valuation Date, as applicable, a Market Disruption Event has occurred or is continuing with respect to the relevant Index on such eighth Trading Day, the Calculation Agent or one of its affiliates will determine the Index Closing Level based on its estimate of the Index Closing Level that would have prevailed on such eighth Trading Day but for such Market Disruption Event. If any Quarterly Valuation Date or LR Valuation Date is postponed as described above, the succeeding Quarterly Reset Date or LR Reset Date will occur on the next Trading Day following the postponed Quarterly Valuation Date or LR Valuation Date, as applicable.

An "Averaging Date" means each of the Trading Day(s) during any Measurement Period, subject to adjustment as described herein.

Notwithstanding the occurrence of one or more of the events below, which may, in the Calculation Agent's discretion, constitute a Market Disruption Event with respect to the relevant Index, the Calculation Agent in its discretion may waive its right to postpone the Index Closing Level if it determines that one or more of the below events has not and is not likely to materially impair its ability to determine the Index Closing Level on such date.

Any of the following will be a Market Disruption Event with respect to the relevant Index, in each case as determined by the Calculation Agent:

(a) suspension, absence or material limitation of trading in a material number of the Index Constituent Securities for more than two hours or during the one-half hour before the close of trading in the applicable market or markets;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the relevant Index or to a material number of Index Constituent equity interests in the primary market or markets for those contracts for more than two hours of trading or during the one-half hour before the close of trading in that market;

(c) the relevant Index is not published; or

(d) in any other event, if the Calculation Agent determines that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be Market Disruption Events with respect to the relevant Index:

(a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

(b) a decision to permanently discontinue trading in the options or futures contracts relating to the relevant Index or any Index Constituent equity interests.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the relevant Index or any Index Constituent equity interests are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Discontinuance of or Adjustments to the Relevant Index; Alteration of Method of Calculation**

If the Index Sponsor or another entity that publishes the Index discontinues publication of the relevant Index, or if our right to use the Index is suspended or terminated, and the Index Sponsor or such other entity publishes a successor or substitute index that the Calculation Agent determines to be comparable to the discontinued relevant Index (such index being referred to herein as a "Successor Index"), then the Index Closing Level for such Successor Index will be determined by the Calculation Agent by reference to the Successor Index on the dates and at the times as of which the Index Closing Levels for such Successor Index are to be determined.

Upon any selection by the Calculation Agent of a Successor Index, the Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the relevant Index, or if our right to use the Index is suspended or terminated, prior to, and such discontinuation or unavailability is continuing on, any Quarterly Valuation Date, any Averaging Date, any Redemption Valuation Date or any other relevant date on which the Index Closing Level is to be determined and the Calculation Agent determines that no Successor Index is available at such time, or the Calculation Agent has previously selected a Successor Index and publication of such Successor Index is discontinued prior to, and such discontinuation is continuing on any relevant date on which the Index Closing Level is to be determined, then the Calculation Agent will determine the Index Closing Level using the closing level and published share weighting of each Index Constituent Security included in the relevant Index or Successor Index, as applicable, immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the relevant Index or Successor Index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the relevant Index or a Successor Index, or the value thereof, is changed in a material respect, or if the relevant Index or a Successor Index is in any other way modified so that the level of the relevant Index or such Successor Index does not, in the opinion of the Calculation Agent, fairly represent the level of the relevant Index or such Successor Index had such changes or modifications not been made, then the Calculation Agent will make such calculations and adjustments as, in the judgment of the Calculation Agent, may be necessary in order to arrive at a level of an index comparable to the relevant Index or such Successor Index, as the case may be, as if such changes or modifications had not been made, and the Calculation Agent will calculate the levels for the relevant Index or such Successor Index with reference to the relevant Index or such Successor Index, as adjusted. The Calculation Agent will accordingly calculate the relevant Index levels, Accrued Fees and the Redemption Fee and/or the Loss Rebalancing Fees, if applicable, based on the Index levels calculated by the Calculation Agent, as adjusted. Accordingly, if the method of calculating the relevant Index or a Successor Index is modified so that the level of the relevant Index or such Successor Index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the relevant Index), which, in turn, causes the level of the relevant Index or such Successor Index to be a fraction of what it would have been if there had been no such modification, then the Calculation Agent will make such calculations and adjustments in order to arrive at a level for the relevant Index or such Successor Index as if it had not been modified (*e.g.*, as if such split had not occurred).

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem any series of the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of that series of the Securities will be determined by the Calculation Agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of any series of the Securities is accelerated, we will pay the default amount in respect of the principal of the that series of Securities at maturity. We describe the default amount below under "— Default Amount".

For the purpose of determining whether the holders of our Medium-Term Notes, Series A are entitled to take any action under the indenture, we will treat the outstanding principal amount of each series of Securities as the outstanding principal amount of the Medium-Term Notes, Series A constituted by that series of Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series A, holders of specified percentages in principal amount of all Medium-Term Notes, Series A, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series A, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series A, accelerating the maturity of the Medium-Term Notes, Series A after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium Term Notes, Series A" under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants".

**Default Amount**

The default amount for any series of the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities of the accelerated series. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities of the accelerated series, which we describe below, the holders of that series of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a division of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, early redemption, acceleration or upon exercise by UBS of its call right will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Medium Term Notes, Series A" under "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities".

**Defeasance**

Neither full defeasance nor covenant defeasance, as described in "Medium Term Notes, Series A" under "Description of Debt Securities We May Offer — Defeasance and Covenant Defeasance", will apply to the Securities.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue any series of the Securities. We intend to issue the Securities initially in an amount having the aggregate offering price specified in " Principal Terms" above. However, we may issue additional Securities in amounts that exceed the amount specified in " Principal Terms" above at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other Securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Medium Term Notes, Series A" under "Description of Debt Securities We May Offer — Amounts That We May Issue".

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities of any series and will have the same CUSIP number and will trade interchangeably with that series of the Securities immediately upon settlement. Any additional issuances will increase the aggregate Principal Amount of the outstanding Securities of the class, plus the aggregate Principal Amount of any Securities bearing the same CUSIP number that are issued pursuant to any future issuances of Securities bearing the same CUSIP number. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

**Additional Terms of the Securities**

The general terms of the Securities described above are modified by the specific definitions and terms below.

"Intraday Indicative Value" means the approximate intrinsic economic value of the Securities calculated by NYSE Arca, Inc. and published on Bloomberg (based in part on information provided by the Index Sponsor) or a successor via the facilities on the Consolidated Tape Association under the symbol "FBGXIV".

"Trading Day" means any day on which (i) trading is generally conducted on NYSE Arca and (ii) trading is generally conducted on the Primary Exchanges on which the Index Constituent Securities are traded, in each case as determined by the Calculation Agent.

"Primary Exchange" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading for such Index Constituent Security or such constituent underlying a successor index.

**2. UBS AG FI Enhanced Europe 50 ETN due February 12, 2026**

**Principal Terms:**

**Principal Amount**: $500,000,000

**Issuer**: UBS AG, London Branch

**Initial Trade Date**: February 12, 2016

**Initial Settlement Date**: February 18, 2016

**Term**: 10 years, subject to your right to receive payment for your Securities upon redemption, acceleration upon minimum indicative value or exercise by UBS of its call right, each as described below.

**Denomination/Principal Amount**: $100.00 per Security

**Maturity Date** February 12, 2026, subject to adjustment

**Underlying Index**: The return on the Securities is linked to the STOXX Europe 50® USD (Gross Return) Index. The level of the Index reflects both the price performance of the Index Constituent Securities and the reinvestment of dividends on the Index Constituent Securities. The level of the Underlying Index is published approximately every 15 seconds from 3:00 a.m. to 12:00 p.m., New York City time, and a daily Index Closing Level is published at approximately 12:00 p.m., New York City time, on each Trading Day.

**Annual Tracking Rate**: 0.95% per annum

**Financing Spread**: 1.00% per annum

**Loss Rebalancing Fee**: Upon each occurrence of a Loss Rebalancing Event, you will incur a 0.05% reduction in the LR Current Principal Amount of Your Securities and may also have a further reduction due to a breakage computation. See "—Loss Rebalancing Event Upon Large Decreases in the Indicative Value".

**First Redemption Date**: February 25, 2016 for Regular Redemptions, March 2, 2016 for Large Redemptions

**Final Redemption Date**: February 9, 2026

**First Call Date**: The first date that UBS may exercise its Call Right is February 21, 2017 Quarterly Initial Closing Level for the Initial Calendar Quarter: 1,191.12, the Index Closing Level (as defined below) on the Initial Trade Date.

**Quarterly Reset Dates**: For each calendar quarter, the Quarterly Reset Date is the first Trading Day of that quarter beginning on April 1, 2016 and ending on January 2, 2026, subject to adjustment.

**Quarterly Valuation Dates**: For each Quarterly Reset Date, the Quarterly Valuation Date is the last Trading Day of the previous calendar quarter, beginning on March 31, 2016 and ending on December 31, 2025, subject to adjustment.

**Floor Level**: The "Floor Level" is equal to $20.00 (subject to adjustment as described under "Valuation of the Index and the Securities — Split or Reverse Split of the Securities").

**Index Sponsor**: STOXX Limited ("STOXX"), a company owned by Deutsche Börse AG.

**Listing**: The Securities have been approved for listing, subject to official notice of issuance, on NYSE Arca under the symbol "FIEE."

**Calculation Date**: February 3, 2026, unless that day is not a Trading Day, in which case the Calculation Date will be the next Trading Day, subject to adjustment.

**Index Symbol**: SX5PGV (NYSE and Bloomberg)

**Intraday Indicative Value Symbol**: FIEEIV (Bloomberg)

**CUSIP** No.: 90274D234

**ISIN No.**: US90274D2348

**General Terms of the Securities**

In this section, references to "holders" or "you" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through DTC or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described under "Medium-Term Notes, Series B" above. The terms described here supplement those described in "Medium-Term

Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

We describe the general terms of the Securities in more detail below.

### Interest or Coupons

We will not pay you any interest or coupons during the term of the Securities.

### Payment at Maturity

The "Maturity Date" for each series of Securities will be the third Trading Day after the last Trading Day in the applicable Measurement Period, which we refer to in this section "— Payment at Maturity" as the "Final Measurement Period". The scheduled Maturity Date is identified in " Principal Terms" above.

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to:

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the Final Measurement Period, minus

(b) the Accrued Fees as of such last Trading Day.

If the amount calculated above is less than zero, the payment at maturity will be zero.

**You may lose all or a substantial portion of your investment at maturity. Because the Accrued Fees reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities of any series equal to at least the initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment.**

The Accrued Fees will be calculated as of the last Trading Day in the Final Measurement Period as the sum of (i) the Accrued Tracking Fee as of such last Trading Day and (ii) the Accrued Financing Charge as of such last Trading Day.

The "Financing Level" is, as of any date of determination, an amount that equals the Current Principal Amount.

The "Accrued Financing Charge" as of the last Trading Day of the Final Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day of such Final Measurement Period and the denominator of which is 360, and (c) the Financing Rate.

On the Initial Trade Date, the Accrued Financing Charge for each Security will be $0.

The "Accrued Tracking Fee" as of the last Trading Day in the Final Measurement Period is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day in such Final Measurement Period *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The "Annual Tracking Rate" is a per annum rate described in " Principal Terms" above.

The "Current Indicative Value" is, as determined by the Calculation Agent as of any date of determination, an amount per Security of any series equal to the product of (i) the Current Principal Amount and (ii) the Index Factor as of such date, calculated using the Index Closing Level on such date as the Index Valuation Level.

The "Principal Amount" of each Security is $100.00. Each series of the Securities may be issued and sold over time at then-current market prices, which may be significantly higher or lower than the Principal Amount.

For the Initial Calendar Quarter, the Current Principal Amount will equal $100.00 per Security of the applicable series. For each subsequent calendar quarter, the Current Principal Amount for each Security of that series will be reset as follows on the Quarterly Reset Date:

*New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Quarterly Valuation Date — Accrued Fees on the applicable Quarterly Valuation Date

If any series of the Securities undergoes a split or reverse split, the Current Principal Amount of that series will be adjusted accordingly.

For each calendar quarter, the "Quarterly Reset Date" is the first Trading Day of the quarter specified in " Principal Terms" above, subject to adjustment as described under "— Market Disruption Event"; provided, however, that no Quarterly Reset Date will occur on or after the Call Valuation Date or the Acceleration Date.

For each Quarterly Reset Date, the "Quarterly Valuation Date" is the last Trading Day of the previous calendar quarter subject to adjustment as described under "— Market Disruption Event". The Quarterly Valuation Date is specified in " Principal Terms" above .

The Index Factor will be calculated as follows:

$$1 + (2 \times \text{Index Performance Ratio})$$

The Index Performance Ratio on any Quarterly Valuation Date, any Redemption Valuation Date, or as of the last Trading Day in the applicable Measurement Period, as applicable, will be:

$$\frac{\text{Index Valuation Level — Quarterly Initial Closing Level}}{\text{Quarterly Initial Closing Level}}$$

The "Index Valuation Level" will equal the arithmetic mean of the Index Closing Levels measured on each Trading Day during the applicable Measurement Period, or the Index Closing Level on any Quarterly Valuation Date or any Redemption Valuation Date, as determined by the Calculation Agent, provided that:

(1) for Regular Redemptions, if the Redemption Valuation Date falls in a Final Measurement Period, Call Measurement Period, or Acceleration Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Index Valuation Level on the Redemption Valuation Date during such Measurement Period shall equal (a) (i) for each elapsed Trading Day in the Measurement Period from and including the first Trading Day in such Measurement Period to but excluding the Redemption Valuation Date (the "Applicable Date"), the sum of the Index Closing Levels on such Trading Day(s) plus (ii) the Index Closing Level on the Applicable Date times the number of remaining Trading Days in the Measurement Period from and including the Applicable Date *divided by* (b) the number of Trading Days in the Measurement Period; and

(2) For a Large Redemption, if the Redemption Valuation Date occurs during an Acceleration Measurement Period, Call Measurement Period, or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement Amount or payment at maturity, as applicable.

Unless specified otherwise in " Principal Terms" above, the applicable "Measurement Period" means the five Trading Days from and including the Call Valuation Date, Acceleration Date, Redemption Valuation Date (for a Large Redemption) or the Calculation Date, as applicable, subject to adjustment as described under "— Market Disruption Event".

The "Quarterly Initial Closing Level" for the Initial Calendar Quarter is specified in " Principal Terms" above and will be the Index Closing Level on the applicable Initial Trade Date. For each subsequent calendar quarter, the Quarterly Initial Closing Level on the Quarterly Reset Date will equal the Index Closing Level on the Quarterly Valuation Date for the previous calendar quarter.

The "Index Closing Level" is, for any series of the Securities, the closing level of the relevant Index as published by the Index Sponsor.

The "Index Sponsor" will be the entity that calculates the level of the relevant Index is specified in " Principal Terms" above.

Unless specified otherwise in " Principal Terms" above, "Trading Day" means any day on which (i) trading is generally conducted on NYSE Arca and (ii) trading is generally conducted on the markets on which the Index Constituent Securities in the relevant Index are traded, in each case as determined by the Calculation Agent.

**Early Redemption at the Option of the Holders**

You may elect to require UBS to redeem your Securities, subject to a minimum redemption amount of at least 12,500 Securities of the same series. If you elect to have your Securities redeemed and have done so under the redemption procedures described below under "—Redemption Procedures", you will receive payment for your Securities on the Redemption Date. The first and final Redemption Dates are specified in " Principal Terms" above. For any early redemptions, the applicable "Redemption Valuation Date" means the first Trading Day following the date on which you deliver a redemption notice to UBS in compliance with the redemption procedures. For any Large Redemption (as defined below), the Redemption Valuation Date will be the first Trading Day in the applicable Large Redemption Measurement Period. If a Redemption Valuation Date for a Large Redemption occurs during an Acceleration Measurement Period, Call Measurement Period or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement or payment at maturity, as applicable.

To satisfy the minimum redemption amount of 12,500 Securities, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 12,500 Securities of the same series; however, there can be no assurance that they can or will do so. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 12,500 Securities of any series. Any such reduction will be applied on a consistent basis for all holders of the Securities of the affected series at the time the reduction becomes effective.

The Securities will be redeemed and the holders will receive payment for their Securities on the third Business Day following the corresponding Redemption Valuation Date (or the last Trading Day in the applicable Large Redemption Measurement Period for a Large Redemption), or if such third day is not a Business Day, the next following Business Day (the "Redemption Date"). In addition, if a call notice has been issued, if acceleration has been triggered, or the Final Measurement Period has commenced, in each case with respect to any series of the Securities, for Regular Redemptions the last permitted Redemption Valuation Date for that series of Securities will be the fourth Trading Day in the applicable Call Measurement Period, Acceleration Measurement Period, or the Final Measurement Period, as applicable. For a Large Redemption, if the Redemption Valuation Date occurs during an Acceleration Measurement Period, Call Measurement Period, or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement Amount or payment at maturity, as applicable and the Redemption Date will be the third Business Day following the last Trading Day in the applicable Measurement Period. Any applicable Redemption Valuation Date is subject to adjustment as described under "— Market Disruption Event".

A "Regular Redemption" means an early redemption of Securities of a given series in an amount greater than or equal to the minimum redemption amount of 12,500 Securities but less than the large redemption amount of 2,000,000 Securities.

A "Large Redemption" means an early redemption of Securities of a given series in an amount equal to or greater than 2,000,000 Securities. For purposes of determining whether an early redemption is a Regular Redemption or a Large Redemption, UBS will aggregate all redemption requests received prior to 12:00 noon (New York City time) on a given Trading Day.

*Regular Redemptions*

If you exercise your right to have us redeem your Securities and such redemption qualifies as a Regular Redemption, subject to your compliance with the procedures described under "— Redemption Procedures", for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the applicable Redemption Valuation Date, minus

(b) the Accrued Fees as of such Redemption Valuation Date, minus

(c) the Redemption Fee.

*Large Redemptions*

If you exercise your right to have us redeem your Securities and such redemption qualifies as a Large Redemption, subject to your compliance with the procedures described under "— Redemption Procedures", for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the applicable Measurement Period, which we refer to in this section "—Early Redemption at the Option of the Holders" as the "Large Redemption Measurement Period", minus

(b) the Accrued Fees as of such last Trading Day, minus

(c) the Redemption Fee.

We refer to the cash payments described above as the "Redemption Amount".

If the amount calculated above is less than zero, the payment upon early redemption will be zero. We will inform you of such Redemption Amount two Business Days preceding the applicable Redemption Date.

You may lose all or a substantial portion of your investment upon early redemption. Because the Accrued Fees and the Redemption Fee reduce your final payment, the quarterly compounded leveraged return of the Index will need to be sufficient to offset the negative effect of the Accrued Fees, the Redemption Fee and/or Loss Redemption Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to your initial investment in the Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset such a negative effect or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment upon early redemption.

The Accrued Fees will be calculated as of any Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) as the sum of (i) the Accrued Tracking Fee as of such date and (ii) the Accrued Financing Charge as of such date.

The “Accrued Tracking Fee” as of any Redemption Valuation Date is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date (or, if the Redemption Valuation Date falls in the Initial Calendar Quarter, the Initial Trade Date) to, and including such Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The “Accrued Financing Charge” as of any Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date (or if the Redemption Valuation Date or last Trading Day of the applicable Large Measurement Period occurs prior to the initial Quarterly Valuation Date, the period from, and excluding, the Initial Trade Date) to, and including, such Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period), and the denominator of which is 360, and (c) the Financing Rate.

The “Redemption Fee” means, as of any date of determination for a series of Securities, an amount per Security equal to the product of (a) 0.125%, (b) the Current Principal Amount and (c) the Index Factor as of the applicable Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period).

We discuss these matters in “Medium Term Notes, Series B” under “Description of Debt Securities We May Offer — Redemption and Repayment”.

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner. Any series of Securities may trade at, above, or below its indicative value.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption to UBS via email no later than 12:00 noon (New York City time) on the Trading Day immediately preceding the applicable Redemption Valuation Date. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a confirmation of redemption;
- deliver the signed confirmation of redemption to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date (or the applicable last Trading Day in the Large Redemption Measurement Period for Large Redemptions) at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Trading Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**UBS’s Call Right**

We have the right to redeem all, but not less than all, of the Securities of any series upon not less than eighteen calendar days’ prior notice to the holders of the Securities of that series, such redemption to occur on any Trading Day specified in “ Principal Terms” above through and including the Calculation Date specified in “ Principal Terms” above. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the applicable Measurement Period, which we refer to in this section “— UBS’s Call Right” as the “Call Measurement Period”, minus

(b) the Accrued Fees as of such last Trading Day.

We refer to this cash payment as the “Call Settlement Amount”.

If the amount calculated above is less than zero, the payment upon UBS’s exercise of its call right will be zero.

If UBS issues a call notice on any Trading Day, the “Call Valuation Date” will be the fifth Trading Day following the Trading Day on which the call notice is issued.

We will inform you of such Call Settlement Amount on the first Business Day following the last Trading Day in the Call Measurement Period.

The holders will receive payment for their Securities on a date that is at least three, but not greater than six, Trading Days following the last Trading Day in the Call Measurement Period (the "Call Settlement Date"). We will inform you of such Call Settlement Date in the call notice. If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event".

You may lose all or a substantial portion of your investment at call. Because the Accrued Fees and Loss Rebalancing Fees, if applicable, reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to at least initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment at call.

The Accrued Fees will be calculated as of the last Trading Day in the Call Measurement Period as the sum of (i) the Accrued Tracking Fee as of such last Trading Day and (ii) the Accrued Financing Charge as of such last Trading Day.

The "Accrued Tracking Fee" as of the last Trading Day in the Call Measurement Period is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day in such Call Measurement Period *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The "Accrued Financing Charge" as of the last Trading Day of the Call Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day of such Call Measurement Period and the denominator of which is 360, and (c) the Financing Rate.

**Acceleration Upon Minimum Indicative Value**

If, at any time, the indicative value for any series of the Securities on any Trading Day equals the Floor Level or less (such day, an "Acceleration Date"), all issued and outstanding Securities of that series will be automatically accelerated and mandatorily redeemed by UBS (even if the indicative value of that series would later exceed the Floor Level on such Acceleration Date or any subsequent Trading Day during the applicable Measurement Period, which we refer to in this section "— Acceleration Upon Minimum Indicative Value" as the "Acceleration Measurement Period") for a cash payment equal to

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day of the Acceleration Measurement Period, minus

(b) the Accrued Fees as of such last Trading Day.

We refer to this cash payment as the "Acceleration Amount". The "Floor Level" of any series of the Securities will be specified in " Principal Terms" above. If any series of the Securities undergoes a split or reverse split, the Floor Level of that series will be adjusted accordingly. If the minimum indicative value threshold of any series of Securities has been breached, you will receive on the Acceleration Settlement Date only the Acceleration Amount in respect of your investment in that series of Securities.

You may lose all or a substantial portion of your investment upon an acceleration upon minimum indicative value. Because the Accrued Fees and Loss Rebalancing Fees, if applicable, reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to at least the initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment upon an acceleration upon minimum indicative value.

The Accrued Fees will be calculated as of any date of determination for any series of Securities as the sum of (i) the Accrued Tracking Fee as of the last Trading Day of the Acceleration Measurement Period and (ii) the Accrued Financing Charge as of the last Trading Day of the Acceleration Measurement Period.

The "Accrued Tracking Fee" as of the last Trading Day of the Acceleration Measurement Period will be an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date (or, if the Acceleration Date falls in the Initial Calendar Quarter, the Initial Trade Date) to, and including, such last Trading Day in such Measurement Period, as applicable, *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The "Accrued Financing Charge" as of the last Trading Day of the Acceleration Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date (or if the Acceleration Date occurs prior to the initial Quarterly Valuation Date, the period from, and excluding, the Initial Trade Date) to, and including, such last Trading Day of such Measurement Period as applicable, and the denominator of which is 360, and (c) the Financing Rate.

The "Acceleration Settlement Date" will be the third Trading Day following the last Trading Day of the Acceleration Measurement Period.

Subject to the prior verification by the Calculation Agent that the indicative value of equal or less than the Floor Level was accurately calculated by the relevant calculation agent specified in " Principal Terms" above and in each case with respect to a series of Securities, UBS must provide notice to the holders of that series of the Securities that the minimum indicative value threshold has been breached not less than five calendar days prior to the Acceleration Settlement Date. For a detailed description of how the intraday indicative value of the Securities is calculated see "Valuation of the Index and the Securities".

**Loss Rebalancing Event Upon Large Decreases in the Indicative Value**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0 based on the Index Performance Ratio as of the LR Valuation Date. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event. In addition, each time a Loss Rebalancing Event occurs, you will incur a Loss Rebalancing Fee, as defined below.

A "Loss Rebalancing Event" means if, at any time, the closing indicative value for any series of the Securities on any Trading Day decreases 40% in value from the closing indicative value of that series of the Securities on the previous Quarterly Valuation Date. A Loss Rebalancing Event may occur irrespective of whether a Market Disruption Event also occurs on that Trading Day.

With respect to a Loss Rebalancing Event, the "LR Valuation Date" is the first Trading Day following a Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event".

With respect to a LR Valuation Date, the "LR Reset Date" is the first Trading Day following a LR Valuation Date, subject to adjustment as described under "— Market Disruption Event".

On the LR Reset Date, the Current Principal Amount for each Security of that series will be reset as follows:

> *New* Current Principal Amount = 99.995% × LR Current Principal Amount.
>
> LR Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable LR Valuation Date — Accrued Fees on the applicable LR Valuation Date.

If the amount calculated above is less than zero, the payment at maturity will be zero.

On the LR Reset Date, the LR Current Principal Amount will be reset exactly like the "*New* Current Principal Amount" on a Quarterly Reset Date, except that:

(1) the LR Reset Date will be the Quarterly Reset Date;

(2) the Index Factor and Index Performance Ratio will be calculated on the LR Valuation Date;

(3) the Index Valuation Level for purposes of calculating the Index Performance Ratio will be computed using the Index Closing Level on the LR Valuation Date;

(4) for the next reset date, the Quarterly Initial Closing Level on the applicable reset date will equal the Index Closing Level on the LR Valuation Date;

(5) Accrued Fees (the Accrued Tracking Fees and Accrued Financing Charge) will be computed as of the LR Valuation Date as if the LR Valuation Date was a Quarterly Valuation Date; and

(6) the Financing Level will be reduced to equal the new Current Principal Amount.

The Financing Rate will remain constant until the next Quarterly Reset Date, *provided however* that if the reset date financing rate (determined in accordance with the definition of "Financing Rate" two London business days preceding LR Valuation Date and referred to as "L2") is less than the actual Financing Rate ("L1"), the Current Principal Amount will be further reduced by an amount equal to:

(L1-L2) × (Current Principal Amount - *New* Current Principal Amount) × (the days remaining in the quarter from and excluding the LR Valuation Date to and including the next Quarterly Valuation Date) *divided by* 360.

Note that each time a Loss Rebalancing Event occurs, you will incur a 0.05% reduction in the LR Current Principal Amount of your Securities and you also may have a further reduction due to the breakage computation in the preceding proviso. We will refer to these reductions as a "Loss Rebalancing Fee".

Loss Rebalancing Events can occur multiple times. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Each Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0 based on the Index Performance Ratio as of the LR Valuation Date. This means that your Securities will entitle you to less of a positive gain in value relative to before the occurrence of the Loss Rebalancing Event. In addition, each time a Loss Rebalancing Event occurs, you will incur a Loss Rebalancing Fee. This fee will reduce the amount of your return (or increase your loss) on the Maturity Date, early redemption, acceleration or exercise by UBS of its call right.

**Calculation Agent**

UBS Securities LLC will act as the Calculation Agent. The Calculation Agent will determine, among other things, the Index Valuation Level, the Index Performance Ratio, the Index Factor, the Current Principal Amount, the Current Indicative Value, the Accrued Fees, the Accrued Financing Charge, the Financing Level, the Financing Rate, the Accrued Tracking Fee, the Redemption Fee, if any, the Loss Rebalancing Fee, if any, the payment at maturity, if any, that we will pay you at maturity, the Redemption Amount, if any, that we will pay you upon redemption, the Call Settlement Amount, if any, that we will pay you on the Call Settlement Date, if applicable, or the Acceleration Amount, if any, that we will pay you on the Acceleration Settlement Date, if applicable, based on the relevant Index levels calculated by the Calculation Agent, as adjusted, and whether any day is a Business Day or Trading Day. The Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the relevant Index has been discontinued or is otherwise unavailable and whether there has been a material change in the relevant Index. All determinations made by the Calculation Agent will be at the sole discretion of the Calculation Agent for any series of the Securities and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different Calculation Agent for any series of the Securities from time to time without your consent and without notifying you.

The Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, early redemption, acceleration, or upon exercise by UBS of its call right on or prior to 12:00 p.m., New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, the Acceleration Settlement Date or the Call Settlement Date, as applicable.

All dollar amounts related to determination amounts payable per Security for any series of Securities will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of such Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the relevant Index has occurred or is continuing on an Averaging Date (as defined below), the Index Closing Level for such Averaging Date will be determined by the Calculation Agent or one of its affiliates on the first succeeding Trading Day on which a Market Disruption Event does not occur or is not continuing (the "Deferred Averaging Date") with respect to the relevant Index irrespective of whether, pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on any Averaging Date, the Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the applicable Measurement Period for purposes of calculating the Call Settlement Amount is based on the arithmetic mean of the Index Closing Levels on October 3, October 4, October 5, October 6 and October 7, and there is a Market Disruption Event with respect to the relevant Index on October 3, but no other Market Disruption Event during such Measurement Period, then the Index Closing Level on October 4 will be used twice to calculate the Call Settlement Amount, and the Call Settlement Amount will be determined based on the arithmetic mean of the Index Closing Levels on October 4, October 4, October, 5, October 6 and October 7. The same approach would be applied if there is a Market Disruption Event during any Measurement Period.

If the Redemption Valuation Date, for purposes of calculating a Redemption Amount for a Regular Redemption, is based on the Index Closing Level on October 3 and there is a Market Disruption Event with respect to the Index on October 3, then the Index Closing Level on October 4 will be used to calculate the Redemption Amount. If a Market Disruption Event occurs on any Quarterly Valuation Date or LR Valuation Date, the Index Closing Level for such date will be determined by the Calculation Agent or one of its affiliates on the first succeeding Trading Day on which a Market Disruption Event does not occur or is not continuing.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date, Quarterly Valuation Date, the Redemption Valuation Date, or LR Valuation Date, as applicable, occurring more than eight Trading Days following the day originally scheduled to be such final Averaging Date or other applicable date. If the eighth Trading Day following the date originally scheduled to be the final Averaging Date, Quarterly Valuation Date, Redemption Valuation Date, or LR Valuation Date, as applicable, a Market Disruption Event has occurred or is continuing with respect to the relevant Index on such eighth Trading Day, the Calculation Agent or one of its affiliates will determine the Index Closing Level based on its estimate of the Index Closing Level that would have prevailed on such eighth Trading Day but for such Market Disruption Event. If any Quarterly Valuation Date or LR Valuation Date is postponed as described above, the succeeding Quarterly Reset Date or LR Reset Date will occur on the next Trading Day following the postponed Quarterly Valuation Date or LR Valuation Date, as applicable.

An “Averaging Date” means each of the Trading Day(s) during any Measurement Period, subject to adjustment as described herein.

Notwithstanding the occurrence of one or more of the events below, which may, in the Calculation Agent’s discretion, constitute a Market Disruption Event with respect to the relevant Index, the Calculation Agent in its discretion may waive its right to postpone the Index Closing Level if it determines that one or more of the below events has not and is not likely to materially impair its ability to determine the Index Closing Level on such date.

Any of the following will be a Market Disruption Event with respect to the relevant Index, in each case as determined by the Calculation Agent:

(a) suspension, absence or material limitation of trading in a material number of the Index Constituent Securities for more than two hours or during the one-half hour before the close of trading in the applicable market or markets;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the relevant Index or to a material number of Index Constituent equity interests in the primary market or markets for those contracts for more than two hours of trading or during the one-half hour before the close of trading in that market;

(c) the relevant Index is not published; or

(d) in any other event, including any time when a relevant market is closed for trading under ordinary circumstances, if the Calculation Agent determines that the event interferes with our ability or the ability of any of our affiliates to unwind all or a portion of a hedge with respect to the Securities (or relevant portion of the Securities) that we or our affiliates have effected or may effect as described in the section entitled “Use of Proceeds and Hedging”.

The following event will not be Market Disruption Event with respect to the relevant Index:

(a) a decision to permanently discontinue trading in the options or futures contracts relating to the relevant Index or any Index Constituent equity interests.

For this purpose, an “absence of trading” in the primary securities market on which option or futures contracts related to the relevant Index or any Index Constituent equity interests are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Discontinuance of or Adjustments to the Relevant Index; Alteration of Method of Calculation**

If the Index Sponsor or another entity that publishes the Index discontinues publication of the relevant Index, or if our right to use the Index is suspended or terminated, and the Index Sponsor or such other entity publishes a successor or substitute index that the Calculation Agent determines to be comparable to the discontinued relevant Index (such index being referred to herein as a “Successor Index”), then the Index Closing Level for such Successor Index will be determined by the Calculation Agent by reference to the Successor Index on the dates and at the times as of which the Index Closing Levels for such Successor Index are to be determined.

Upon any selection by the Calculation Agent of a Successor Index, the Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the relevant Index, or if our right to use the Index is suspended or terminated, prior to, and such discontinuation or unavailability is continuing on, any Quarterly Valuation Date, any Averaging Date, any Redemption Valuation Date or any other relevant date on which the Index Closing Level is to be determined and the Calculation Agent determines that no Successor Index is available at such time, or the Calculation Agent has previously selected a Successor Index and publication of such Successor Index is discontinued prior to, and such discontinuation is continuing on any relevant date on which the Index Closing Level is to be determined, then the Calculation Agent will determine the Index Closing Level using the closing level and published share weighting of each Index Constituent Security included in the relevant Index or Successor Index, as applicable, immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the relevant Index or Successor Index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the relevant Index or a Successor Index, or the value thereof, is changed in a material respect, or if the relevant Index or a Successor Index is in any other way modified so that the level of the relevant Index or such Successor Index does not, in the opinion of the Calculation Agent, fairly represent the level of the relevant Index or such Successor Index had such changes or modifications not been made, then the Calculation Agent will make such calculations and adjustments as, in the judgment of the Calculation Agent, may be necessary in order to arrive at a level of an index comparable to the relevant Index or such Successor Index, as the case may be, as if such changes or modifications had not been made, and the Calculation Agent will calculate the levels for the relevant Index or such Successor Index with reference to the relevant Index or such Successor Index, as adjusted. The Calculation Agent will accordingly calculate the relevant Index levels, Accrued Fees and the Redemption Fee and/or the Loss Rebalancing Fees, if applicable, based on the Index levels calculated by the Calculation Agent, as adjusted. Accordingly, if the method of calculating the relevant Index or a Successor Index is modified so that the level of the relevant Index or such Successor Index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the relevant Index), which, in turn, causes the level of the relevant Index or such Successor Index to be a fraction of what it would have been if there had been no such modification, then the Calculation Agent will make such calculations and adjustments in order to arrive at a level for the relevant Index or such Successor Index as if it had not been modified (*e.g.*, as if such split had not occurred).

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem any series of the Securities in the circumstances described in "Medium Term Notes, Series B" under "Description of Debt Securities We May Offer — Optional Tax Redemption". If we exercise this right, the redemption price of that series of the Securities will be determined by the Calculation Agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of any series of the Securities is accelerated, we will pay the default amount in respect of the principal of the that series of Securities at maturity. We describe the default amount below under "— Default Amount".

For the purpose of determining whether the holders of our Medium-Term Notes, Series B are entitled to take any action under the indenture, we will treat the outstanding principal amount of each series of Securities as the outstanding principal amount of the Medium-Term Notes, Series B constituted by that series of Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium Term Notes, Series B" under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants".

**Default Amount**

The default amount for any series of the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities of the accelerated series. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities of the accelerated series, which we describe below, the holders of that series of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a division of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, early redemption, acceleration or upon exercise by UBS of its call right will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Defeasance**

Neither full defeasance nor covenant defeasance, as described in the accompanying prospectus under "Description of Debt Securities We May Offer — Defeasance and Covenant Defeasance", will apply to the Securities.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue any series of the Securities. We intend to issue the Securities initially in an amount having the aggregate offering price specified in " Principal Terms" above. However, we may issue additional Securities in amounts that exceed the amount specified in " Principal Terms" above at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other Securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities of any series and will have the same CUSIP number and will trade interchangeably with that series of the Securities immediately upon settlement. Any additional issuances will increase the aggregate Principal Amount of the outstanding Securities of the class, plus the aggregate Principal Amount of any Securities bearing the same CUSIP number that are issued pursuant to any future issuances of Securities bearing the same CUSIP number. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

**Additional Terms of the Securities**

The general terms of the Securities described above are modified by the specific definitions and terms below.

"Intraday Indicative Value" means the approximate intrinsic economic value of the Securities calculated by NYSE Arca, Inc. and published on Bloomberg (based in part on information provided by the Index Sponsor) or a successor via the facilities on the Consolidated Tape Association under the symbol "FIEEIV".

"Trading Day" means any day on which (i) trading is generally conducted on NYSE Arca and (ii) the level of the Index is published by the Index Sponsor, in each case as determined by the Calculation Agent.

"Primary Exchange" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading for such Index Constituent Security or such constituent underlying a successor index.

**3. UBS AG FI Enhanced Global High Yield ETN due March 3, 2026**

**Principal Terms**

**Principal Amount:** $1,250,000,000

**Issuer**: UBS AG, London Branch

**Initial Trade Date**: February 19, 2016

**Initial Settlement Date**: February 24, 2016

**Term**: 10 years, subject to your right to receive payment for your Securities upon redemption, acceleration upon minimum indicative value or exercise by UBS of its call right, each as described below.

**Denomination/Principal Amount**: $100.00 per Security

**Maturity Date** March 3, 2026, subject to adjustment

**Index**: The return on the Securities is linked to the MSCI World High Dividend Yield USD Gross Total Return Index. The level of the Index reflects both the price performance of the Index Constituent Securities and the reinvestment of dividends on the Index Constituent Securities. The level of the Index is published approximately every 15 seconds from 12:00 a.m. to 4:15 p.m., New York City time, and a daily Index Closing Level is published at approximately 6:00 p.m., New York City time, on each Trading Day.

**Index Closing Level**: The closing level of the Index as published by the Index Sponsor and reported by Bloomberg under the ticker symbol "MHDYWOUG<Index>".

**Annual Tracking Rate**: 0.80% per annum

**Financing Spread**: .85% per annum

**Loss Rebalancing Fee**: Upon each occurrence of a Loss Rebalancing Event, you will incur a 0.05% reduction in the LR Current Principal Amount of your Securities, calculated as 99.95% × LR Current Principal Amount, and may also have a further reduction due to a breakage computation. See "— Loss Rebalancing Event Upon Large Decreases in the Indicative Value" for the definition of the Loss Rebalancing Fee and other terms pertaining to the Loss Rebalancing Event.

**Redemption Procedures**: The redemption procedures for Early Redemption are specified under "— Redemption Procedures", provided that any reference to 12:00 noon (New York City time) as the cutoff time (1) to deliver notice of redemption and (2) for aggregating redemption requests to determine whether an early redemption is a Regular Redemption or a Large Redemption shall be 9:00 a.m. (New York City time).

**First Redemption Date**: March 2, 2016 for Regular Redemptions, March 8, 2016 for Large Redemptions

**Final Redemption Date**: February 24, 2026

**First Call Date**: The first date that UBS may exercise its Call Right is February 24, 2017

**Quarterly Initial Closing Level for the Initial Calendar Quarter:** 1,494.907, the Index Closing Level (as defined BELOW) on the Initial Trade Date.

**Quarterly Reset Dates**: For each calendar quarter, the Quarterly Reset Date is the first Trading Day of that quarter beginning on April 1, 2016 and ending on January 2, 2026, subject to adjustment.

**Quarterly Valuation Dates**: For each Quarterly Reset Date, the Quarterly Valuation Date is the last Trading Day of the previous calendar quarter, beginning on March 31, 2016 and ending on December 31, 2025, subject to adjustment.

**Floor Level**: The "Floor Level" is equal to $20.00 subject to adjustment.

**Index Sponsor**: MSCI, Inc.

**Listing**: The Securities have been approved for listing, subject to official notice of issuance, on NYSE Arca under the symbol "FIHD."

**Calculation Date**: February 20, 2026, unless that day is not a Trading Day, in which case the Calculation Date will be the next Trading Day, subject to adjustment.

**Index Symbols**: The intraday level of the Index is reported by Bloomberg under the ticker symbol "M2WDHDVD <Index>".

The Index Closing Level is reported by Bloomberg under the ticker symbol "MHDYWOUG <Index>".

**Intraday Indicative Value Symbol**: FIHDIV (Bloomberg)

**CUSIP No.**: 90274D218

**ISIN No.**: US90274D218

**General Terms of the Securities**

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through DTC or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described under "Medium-Term Notes, Series B" above. The terms described here supplement those described in "Medium-Term Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

**Interest or Coupons**

We will not pay you any interest or coupons during the term of the Securities.

**Payment at Maturity**

The "Maturity Date" for each series of Securities will be the third Trading Day after the last Trading Day in the applicable Measurement Period, which we refer to in this section "— Payment at Maturity" as the "Final Measurement Period". The scheduled Maturity Date is identified in "Principal Terms" above.

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to:

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the Final Measurement Period, minus

(b) the Accrued Fees as of such last Trading Day.

If the amount calculated above is less than zero, the payment at maturity will be zero.

**You may lose all or a substantial portion of your investment at maturity. Because the Accrued Fees reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities of any series equal to at least the initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment.**

The Accrued Fees will be calculated as of the last Trading Day in the Final Measurement Period as the sum of (i) the Accrued Tracking Fee as of such last Trading Day and (ii) the Accrued Financing Charge as of such last Trading Day.

The "Financing Level" is, as of any date of determination, an amount that equals the Current Principal Amount.

The “Accrued Financing Charge” as of the last Trading Day of the Final Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day of such Final Measurement Period and the denominator of which is 360, and (c) the Financing Rate.

On the Initial Trade Date, the Accrued Financing Charge for each Security will be $0.

The “Accrued Tracking Fee” as of the last Trading Day in the Final Measurement Period is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day in such Final Measurement Period *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The “Annual Tracking Rate” is a per annum rate described in “Principal Terms” above.

The “Current Indicative Value” is, as determined by the Calculation Agent as of any date of determination, an amount per Security of any series equal to the product of (i) the Current Principal Amount and (ii) the Index Factor as of such date, calculated using the Index Closing Level on such date as the Index Valuation Level.

The “Principal Amount” of each Security is $100.00. Each series of the Securities may be issued and sold over time at then-current market prices, which may be significantly higher or lower than the Principal Amount.

For the Initial Calendar Quarter, the Current Principal Amount will equal $100.00 per Security of the applicable series. For each subsequent calendar quarter, the Current Principal Amount for each Security of that series will be reset as follows on the Quarterly Reset Date:

> *New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Quarterly Valuation Date — Accrued Fees on the applicable Quarterly Valuation Date

If any series of the Securities undergoes a split or reverse split, the Current Principal Amount of that series will be adjusted accordingly.

For each calendar quarter, the “Quarterly Reset Date” is the first Trading Day of the quarter specified in “Principal Terms” above, subject to adjustment as described under “— Market Disruption Event”; provided, however, that no Quarterly Reset Date will occur on or after the Call Valuation Date or the Acceleration Date.

For each Quarterly Reset Date, the “Quarterly Valuation Date” is the last Trading Day of the previous calendar quarter subject to adjustment as described under “— Market Disruption Event”. The Quarterly Valuation Date  specified in “Principal Terms” above.

The Index Factor will be calculated as follows:

$$1 + (2 \times \text{Index Performance Ratio})$$

The Index Performance Ratio on any Quarterly Valuation Date, any Redemption Valuation Date, or as of the last Trading Day in the applicable Measurement Period, as applicable, will be:

$$\frac{\text{Index Valuation Level} - \text{Quarterly Initial Closing Level}}{\text{Quarterly Initial Closing Level}}$$

The “Index Valuation Level” will equal the arithmetic mean of the Index Closing Levels measured on each Trading Day during the applicable Measurement Period, or the Index Closing Level on any Quarterly Valuation Date or any Redemption Valuation Date, as determined by the Calculation Agent, provided that:

(1) for Regular Redemptions, if the Redemption Valuation Date falls in a Final Measurement Period, Call Measurement Period, or Acceleration Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Index Valuation Level on the Redemption Valuation Date during such Measurement Period shall equal (a) (i) for each elapsed Trading Day in the Measurement Period from and including the first Trading Day in such Measurement Period to but excluding the Redemption Valuation Date (the “Applicable Date”), the sum of the Index Closing Levels on such Trading Day(s) plus (ii) the Index Closing Level on the Applicable Date times the number of remaining Trading Days in the Measurement Period from and including the Applicable Date *divided by* (b) the number of Trading Days in the Measurement Period; and

(2) For a Large Redemption, if the Redemption Valuation Date occurs during an Acceleration Measurement Period, Call Measurement Period, or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement Amount or payment at maturity, as applicable.

Unless specified otherwise in "Principal Terms" above, the applicable "Measurement Period" means the five Trading Days from and including the Call Valuation Date, Redemption Valuation Date (for a Large Redemption), Calculation Date or the first Trading Day following the Acceleration Date, as applicable, subject to adjustment as described under "— Market Disruption Event".

The "Quarterly Initial Closing Level" for the Initial Calendar Quarter is specified in "Principal Terms" above and will be the Index Closing Level on the applicable Initial Trade Date. For each subsequent calendar quarter, the Quarterly Initial Closing Level on the Quarterly Reset Date will equal the Index Closing Level on the Quarterly Valuation Date for the previous calendar quarter.

The "Index Closing Level" is, for any series of the Securities, the closing level of the relevant Index as published by the Index Sponsor.

The "Index Sponsor" is the entity that calculates the level of the relevant Index and is specified in "Principal Terms" above.

The "Calculation Date" is specified in "Principal Terms" above.

Unless specified otherwise in "Principal Terms" above, "Trading Day" means any day on which (i) trading is generally conducted on NYSE Arca and (ii) trading is generally conducted on the markets on which the Index Constituent Securities in the relevant Index are traded, in each case as determined by the Calculation Agent.

**Early Redemption at the Option of the Holders**

You may elect to require UBS to redeem your Securities, subject to a minimum redemption amount of at least 12,500 Securities of the same series. If you elect to have your Securities redeemed and have done so under the redemption procedures described below under "—Redemption Procedures", you will receive payment for your Securities on the Redemption Date. The first and final Redemption Dates are specified in "Principal Terms" above. For any early redemptions, the applicable "Redemption Valuation Date" means the first Trading Day following the date on which you deliver a redemption notice to UBS in compliance with the redemption procedures. For any Large Redemption (as defined below), the Redemption Valuation Date will be the first Trading Day in the applicable Large Redemption Measurement Period. If a Redemption Valuation Date for a Large Redemption occurs during an Acceleration Measurement Period, Call Measurement Period or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement Amount or payment at maturity, as applicable.

To satisfy the minimum redemption amount of 12,500 Securities, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 12,500 Securities of the same series; however, there can be no assurance that they can or will do so. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 12,500 Securities of any series. Any such reduction will be applied on a consistent basis for all holders of the Securities of the affected series at the time the reduction becomes effective.

The Securities will be redeemed and the holders will receive payment for their Securities on the third Business Day following the corresponding Redemption Valuation Date (or the last Trading Day in the applicable Large Redemption Measurement Period for a Large Redemption), or if such third day is not a Business Day, the next following Business Day (the "Redemption Date"). In addition, if a call notice has been issued, if acceleration has been triggered, or the Final Measurement Period has commenced, in each case with respect to any series of the Securities, for Regular Redemptions the last permitted Redemption Valuation Date for that series of Securities will be the fourth Trading Day in the applicable Call Measurement Period, Acceleration Measurement Period, or the Final Measurement Period, as applicable. For a Large Redemption, if the Redemption Valuation Date occurs during an Acceleration Measurement Period, Call Measurement Period, or Final Measurement Period, the Redemption Amount shall equal the Acceleration Amount, Call Settlement Amount or payment at maturity, as applicable and the Redemption Date will be the third Business Day following the last Trading Day in the applicable Measurement Period. Any applicable Redemption Valuation Date is subject to adjustment as described under "— Market Disruption Event".

A "Regular Redemption" means an early redemption of Securities of a given series in an amount greater than or equal to the minimum redemption amount of 12,500 Securities but less than the large redemption amount of 2,000,000 Securities.

A "Large Redemption" means an early redemption of Securities of a given series in an amount equal to or greater than 2,000,000 Securities. For purposes of determining whether an early redemption is a Regular Redemption or a Large Redemption, UBS will aggregate all redemption requests received prior to 12:00 noon (New York City time) on a given Trading Day.

## General Terms of the Securities

*Regular Redemptions*

If you exercise your right to have us redeem your Securities and such redemption qualifies as a Regular Redemption, subject to your compliance with the procedures described under "— Redemption Procedures", for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the applicable Redemption Valuation Date, minus

(b) the Accrued Fees as of such Redemption Valuation Date, minus

(c) the Redemption Fee.

*Large Redemptions*

If you exercise your right to have us redeem your Securities and such redemption qualifies as a Large Redemption, subject to your compliance with the procedures described under "— Redemption Procedures", for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the applicable Measurement Period, which we refer to in this section "—Early Redemption at the Option of the Holders" as the "Large Redemption Measurement Period", minus

(b) the Accrued Fees as of such last Trading Day, minus

(c) the Redemption Fee.

We refer to the cash payments described above as the "Redemption Amount".

If the amount calculated above is less than zero, the payment upon early redemption will be zero. We will inform you of such Redemption Amount two Business Days preceding the applicable Redemption Date.

You may lose all or a substantial portion of your investment upon early redemption. Because the Accrued Fees and the Redemption Fee reduce your final payment, the quarterly compounded leveraged return of the Index will need to be sufficient to offset the negative effect of the Accrued Fees, the Redemption Fee and/or Loss Redemption Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to your initial investment in the Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset such a negative effect or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment upon early redemption.

The Accrued Fees will be calculated as of any Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) as the sum of (i) the Accrued Tracking Fee as of such date and (ii) the Accrued Financing Charge as of such date.

The "Accrued Tracking Fee" as of any Redemption Valuation Date is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date (or, if the Redemption Valuation Date falls in the Initial Calendar Quarter, the Initial Trade Date) to, and including such Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The "Accrued Financing Charge" as of any Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period) is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date (or if the Redemption Valuation Date or last Trading Day of the applicable Large Measurement Period occurs prior to the initial Quarterly Valuation Date, the period from, and excluding, the Initial Trade Date) to, and including, such

Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period), and the denominator of which is 360, and (c) the Financing Rate.

The "Redemption Fee" means, as of any date of determination for a series of Securities, an amount per Security equal to the product of (a) 0.125%, (b) the Current Principal Amount and (c) the Index Factor as of the applicable Redemption Valuation Date (or for a Large Redemption, the last Trading Day in the Large Measurement Period).

We discuss these matters "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Redemption and Repayment".

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner. Any series of Securities may trade at, above, or below its indicative value.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption to UBS via email no later than 12:00 noon (New York City time) on the Trading Day immediately preceding the applicable Redemption Valuation Date. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a confirmation of redemption;
- deliver the signed confirmation of redemption to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date (or the applicable last Trading Day in the Large Redemption Measurement Period for Large Redemptions) at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Trading Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities of any series upon not less than sixteen calendar days' prior notice to the holders of the Securities of that series, such redemption to occur on any Trading Day specified in "Principal Terms" above through and including the Calculation Date in "Principal Terms" above. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day in the applicable Measurement Period, which we refer to in this section "— UBS's Call Right" as the "Call Measurement Period", minus

(b) the Accrued Fees as of such last Trading Day.

We refer to this cash payment as the "Call Settlement Amount".

If the amount calculated above is less than zero, the payment upon UBS's exercise of its call right will be zero.

If UBS issues a call notice on any Trading Day, the "Call Valuation Date" will be the fifth Trading Day following the Trading Day on which the call notice is issued.

We will inform you of such Call Settlement Amount on the first Business Day following the last Trading Day in the Call Measurement Period.

The holders will receive payment for their Securities on a date that is at least three, but not greater than six, Trading Days following the last Trading Day in the Call Measurement Period (the "Call Settlement Date"). We will inform you of such Call Settlement Date in the call notice. If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event".

You may lose all or a substantial portion of your investment at call. Because the Accrued Fees and Loss Rebalancing Fees, if applicable, reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to at least initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment at call.

The Accrued Fees will be calculated as of the last Trading Day in the Call Measurement Period as the sum of (i) the Accrued Tracking Fee as of such last Trading Day and (ii) the Accrued Financing Charge as of such last Trading Day.

The "Accrued Tracking Fee" as of the last Trading Day in the Call Measurement Period is an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day in such Call Measurement Period *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The "Accrued Financing Charge" as of the last Trading Day of the Call Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date to, and including, such last Trading Day of such Call Measurement Period and the denominator of which is 360, and (c) the Financing Rate.

**Acceleration Upon Minimum Indicative Value**

If, at any time, the indicative value for any series of the Securities on any Trading Day equals the Floor Level or less (such day, an "Acceleration Date"), all issued and outstanding Securities of that series will be automatically accelerated and mandatorily redeemed by UBS (even if the indicative value of that series would later exceed the Floor Level on such Acceleration Date or any subsequent Trading Day during the applicable Measurement Period, which we refer to in this section "— Acceleration Upon Minimum Indicative Value" as the "Acceleration Measurement Period") for a cash payment equal to

(a) the product of (i) the Current Principal Amount and (ii) the Index Factor as of the last Trading Day of the Acceleration Measurement Period, minus

(b) the Accrued Fees as of such last Trading Day.

We refer to this cash payment as the "Acceleration Amount". The "Floor Level" of any series of the Securities is specified in "Principal Terms" above and is subject to adjustment in the case of a split or reverse split as described under "Valuation of the Index and the Securities — Split or Reverse Split of the Securities". If the minimum indicative value threshold of any series of Securities has been breached, you will receive on the Acceleration Settlement Date only the Acceleration Amount in respect of your investment in that series of Securities. An Acceleration Date can occur irrespective of whether a Market Disruption Event also occurs on that Trading Day.

You may lose all or a substantial portion of your investment upon an acceleration upon minimum indicative value. Because the Accrued Fees and Loss Rebalancing Fees, if applicable, reduce your final payment, the quarterly compounded leveraged return of the Index will need to offset the negative effect of the Accrued Fees and Loss Rebalancing Fees, if applicable, in order for you to receive an aggregate amount over the term of the Securities equal to at least the initial investment of your Securities. If the quarterly compounded leveraged return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Loss Rebalancing Fees, if applicable, or if the quarterly compounded leveraged return of the Index is negative, you will lose all or a substantial portion of your investment upon an acceleration upon minimum indicative value.

The Accrued Fees will be calculated as of any date of determination for any series of Securities as the sum of (i) the Accrued Tracking Fee as of the last Trading Day of the Acceleration Measurement Period and (ii) the Accrued Financing Charge as of the last Trading Day of the Acceleration Measurement Period.

The "Accrued Tracking Fee" as of the last Trading Day of the Acceleration Measurement Period will be an amount equal to (a) the aggregate sum of (i) the Current Indicative Value as of the immediately preceding Trading Day for each date starting from, but excluding, the immediately preceding Quarterly Valuation Date (or, if the Acceleration Date falls in the Initial Calendar Quarter, the Initial Trade Date) to, and including, such last Trading Day in such Measurement Period, as applicable, *times* (ii) the Annual Tracking Rate, *divided* by (b) 365.

The "Accrued Financing Charge" as of the last Trading Day of the Acceleration Measurement Period is an amount equal to the product of (a) the Financing Level as of the preceding Quarterly Reset Date, (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Quarterly Valuation Date (or if the Acceleration Date occurs prior to the initial Quarterly Valuation Date, the period from, and excluding, the Initial Trade Date) to, and including, such last Trading Day of such Measurement Period as applicable, and the denominator of which is 360, and (c) the Financing Rate.

The "Acceleration Settlement Date" will be the third Trading Day following the last Trading Day of the Acceleration Measurement Period.

Subject to the prior verification by the Calculation Agent that the indicative value of equal or less than the Floor Level was accurately calculated by the relevant calculation agent specified in "Principal Terms" above and in each case with respect to a series of Securities, UBS must provide notice to the holders of that series of the Securities that the minimum indicative value threshold has been breached not less than five calendar days prior to the Acceleration Settlement Date. For a detailed description of how the intraday indicative value of the Securities is calculated see "Valuation of the Index and the Securities".

**Loss Rebalancing Event Upon Large Decreases in the Indicative Value**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0 based on the Index Performance Ratio as of the LR Valuation Date. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event. In addition, each time a Loss Rebalancing Event occurs, you will incur a Loss Rebalancing Fee, as defined below.

A "Loss Rebalancing Event" means if, at any time, the closing indicative value for any series of the Securities on any Trading Day decreases 40% in value from the closing indicative value of that series of the Securities on the previous Quarterly Valuation Date. A Loss Rebalancing Event may occur irrespective of whether a Market Disruption Event also occurs on that Trading Day.

With respect to a Loss Rebalancing Event, the "LR Valuation Date" is the first Trading Day following a Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event".

With respect to a LR Valuation Date, the "LR Reset Date" is the first Trading Day following a LR Valuation Date, subject to adjustment as described under "— Market Disruption Event".

On the LR Reset Date, the Current Principal Amount for each Security of that series will be reset as follows:

> *New* Current Principal Amount = 99.995% □ LR Current Principal Amount.
>
> LR Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable LR Valuation Date — Accrued Fees on the applicable LR Valuation Date.

If the amount calculated above is less than zero, the payment at maturity will be zero.

On the LR Reset Date, the LR Current Principal Amount will be reset exactly like the "*New* Current Principal Amount" on a Quarterly Reset Date, except that:

(1) the LR Reset Date will be the Quarterly Reset Date;

(2) the Index Factor and Index Performance Ratio will be calculated on the LR Valuation Date;

(3) the Index Valuation Level for purposes of calculating the Index Performance Ratio will be computed using the Index Closing Level on the LR Valuation Date;

(4) for the next reset date, the Quarterly Initial Closing Level on the applicable reset date will equal the Index Closing Level on the LR Valuation Date;

(5) Accrued Fees (the Accrued Tracking Fees and Accrued Financing Charge) will be computed as of the LR Valuation Date as if the LR Valuation Date was a Quarterly Valuation Date; and

(6) the Financing Level will be reduced to equal the new Current Principal Amount.

The Financing Rate will remain constant until the next Quarterly Reset Date, *provided however* that if the reset date financing rate (determined in accordance with the definition of “Financing Rate” two London business days preceding LR Valuation Date and referred to as “L2”) is less than the actual Financing Rate (“L1”), the Current Principal Amount will be further reduced by an amount equal to:

(L1-L2) × (Current Principal Amount - *New* Current Principal Amount) × (the days remaining in the quarter from and excluding the LR Valuation Date to and including the next Quarterly Valuation Date) *divided by* 360.

Note that each time a Loss Rebalancing Event occurs, you will incur a 0.05% reduction in the LR Current Principal Amount of your Securities and you also may have a further reduction due to the breakage computation in the preceding proviso. We will refer to these reductions as a “Loss Rebalancing Fee”.

Loss Rebalancing Events can occur multiple times. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Each Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0 based on the Index Performance Ratio as of the LR Valuation Date. This means that your Securities will entitle you to less of a positive gain in value relative to before the occurrence of the Loss Rebalancing Event. In addition, each time a Loss Rebalancing Event occurs, you will incur a Loss Rebalancing Fee. This fee will reduce the amount of your return (or increase your loss) on the Maturity Date, early redemption, acceleration or exercise by UBS of its call right.

**Calculation Agent**

UBS Securities LLC will act as the Calculation Agent. The Calculation Agent will determine, among other things, the Index Valuation Level, the Index Performance Ratio, the Index Factor, the Current Principal Amount, the Current Indicative Value, the Accrued Fees, the Accrued Financing Charge, the Financing Level, the Financing Rate, the Accrued Tracking Fee, the Redemption Fee, if any, the Loss Rebalancing Fee, if any, the payment at maturity, if any, that we will pay you at maturity, the Redemption Amount, if any, that we will pay you upon redemption, the Call Settlement Amount, if any, that we will pay you on the Call Settlement Date, if applicable, or the Acceleration Amount, if any, that we will pay you on the Acceleration Settlement Date, if applicable, based on the relevant Index levels calculated by the Calculation Agent, as adjusted, and whether any day is a Business Day or Trading Day. The Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the relevant Index has been discontinued or is otherwise unavailable and whether there has been a material change in the relevant Index. All determinations made by the Calculation Agent will be at the sole discretion of the Calculation Agent for any series of the Securities and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different Calculation Agent for any series of the Securities from time to time without your consent and without notifying you.

The Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, early redemption, acceleration, or upon exercise by UBS of its call right on or prior to 12:00 p.m., New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, the Acceleration Settlement Date or the Call Settlement Date, as applicable.

All dollar amounts related to determination amounts payable per Security for any series of Securities will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of such Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the relevant Index has occurred or is continuing on an Averaging Date (as defined below), the Index Closing Level for such Averaging Date will be determined by the Calculation Agent or one of its affiliates on the first succeeding Trading Day on which a Market Disruption Event does not occur or is not continuing (the "Deferred Averaging Date") with respect to the relevant Index irrespective of whether, pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on any Averaging Date, the Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the applicable Measurement Period for purposes of calculating the Call Settlement Amount is based on the arithmetic mean of the Index Closing Levels on October 3, October 4, October 5, October 6 and October 7, and there is a Market Disruption Event with respect to the relevant Index on October 3, but no other Market Disruption Event during such Measurement Period, then the Index Closing Level on October 4 will be used twice to calculate the Call Settlement Amount, and the Call Settlement Amount will be determined based on the arithmetic mean of the Index Closing Levels on October 4, October 4, October, 5, October 6 and October 7. The same approach would be applied if there is a Market Disruption Event during any Measurement Period.

If the Redemption Valuation Date, for purposes of calculating a Redemption Amount for a Regular Redemption, is based on the Index Closing Level on October 3 and there is a Market Disruption Event with respect to the Index on October 3, then the Index Closing Level on October 4 will be used to calculate the Redemption Amount. If a Market Disruption Event occurs on any Quarterly Valuation Date or LR Valuation Date, the Index Closing Level for such date will be determined by the Calculation Agent or one of its affiliates on the first succeeding Trading Day on which a Market Disruption Event does not occur or is not continuing.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date, Quarterly Valuation Date, the Redemption Valuation Date, or LR Valuation Date, as applicable, occurring more than eight Trading Days following the day originally scheduled to be such final Averaging Date or other applicable date. If the eighth Trading Day following the date originally scheduled to be the final Averaging Date, Quarterly Valuation Date, Redemption Valuation Date, or LR Valuation Date, as applicable, a Market Disruption Event has occurred or is continuing with respect to the relevant Index on such eighth Trading Day, the Calculation Agent or one of its affiliates will determine the Index Closing Level based on its estimate of the Index Closing Level that would have prevailed on such eighth Trading Day but for such Market Disruption Event. If any Quarterly Valuation Date or LR Valuation Date is postponed as described above, the succeeding Quarterly Reset Date or LR Reset Date will occur on the next Trading Day following the postponed Quarterly Valuation Date or LR Valuation Date, as applicable.

An "Averaging Date" means each of the Trading Day(s) during any Measurement Period, subject to adjustment as described herein.

Notwithstanding the occurrence of one or more of the events below, which may, in the Calculation Agent's discretion, constitute a Market Disruption Event with respect to the relevant Index, the Calculation Agent in its discretion may waive its right to postpone the Index Closing Level if it determines that one or more of the below events has not and is not likely to materially impair its ability to determine the Index Closing Level on such date.

Any of the following will be a Market Disruption Event with respect to the relevant Index, in each case as determined by the Calculation Agent:

(a) suspension, absence or material limitation of trading in a material number of the Index Constituent Securities for more than two hours or during the one-half hour before the close of trading in the applicable market or markets;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the relevant Index or to a material number of Index Constituent equity interests in the primary market or markets for those contracts for more than two hours of trading or during the one-half hour before the close of trading in that market;

(c) the relevant Index is not published; or

(d) in any other event, including any time when a relevant market is closed for trading under ordinary circumstances, if the Calculation Agent determines that the event interferes with our ability or the ability of any of our affiliates to unwind all or a portion of a hedge with respect to the Securities (or relevant portion of the Securities) that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following event will not be Market Disruption Event with respect to the relevant Index:

(a) a decision to permanently discontinue trading in the options or futures contracts relating to the relevant Index or any Index Constituent equity interests.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the relevant Index or any Index Constituent equity interests are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Discontinuance of or Adjustments to the Relevant Index; Alteration of Method of Calculation**

If the Index Sponsor or another entity that publishes the Index (such other entity to be named in "Principal Terms" above) discontinues publication of the relevant Index, or if our right to use the Index is suspended or terminated, and the Index Sponsor or such other entity publishes a successor or substitute index that the Calculation Agent determines to be comparable to the discontinued relevant Index (such index being referred to herein as a "Successor Index"), then the Index Closing Level for such Successor Index will be determined by the Calculation Agent by reference to the Successor Index on the dates and at the times as of which the Index Closing Levels for such Successor Index are to be determined.

Upon any selection by the Calculation Agent of a Successor Index, the Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the relevant Index, or if our right to use the Index is suspended or terminated, prior to, and such discontinuation or unavailability is continuing on, any Quarterly Valuation Date, any Averaging Date, any Redemption Valuation Date or any other relevant date on which the Index Closing Level is to be determined and the Calculation Agent determines that no Successor Index is available at such time, or the Calculation Agent has previously selected a Successor Index and publication of such Successor Index is discontinued prior to, and such discontinuation is continuing on any relevant date on which the Index Closing Level is to be determined, then the Calculation Agent will determine the Index Closing Level using the closing level and published share weighting of each Index Constituent Security included in the relevant Index or Successor Index, as applicable, immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions as described in the description of the relevant Index included in "Principal Terms" above. In such event, the Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the relevant Index or Successor Index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the relevant Index or a Successor Index, or the value thereof, is changed in a material respect, or if the relevant Index or a Successor Index is in any other way modified so that the level of the relevant Index or such Successor Index does not, in the opinion of the Calculation Agent, fairly represent the level of the relevant Index or such Successor Index had such changes or modifications not been made, then the Calculation Agent will make such calculations and adjustments as, in the judgment of the Calculation Agent, may be necessary in order to arrive at a level of an index comparable to the relevant Index or such Successor Index, as the case may be, as if such changes or modifications had not been made, and the Calculation Agent will calculate the levels for the relevant Index or such Successor Index with reference to the relevant Index or such Successor Index, as adjusted. The Calculation Agent will accordingly calculate the relevant Index levels, Accrued Fees and the Redemption Fee and/or the Loss Rebalancing Fees, if applicable, based on the Index levels calculated by the Calculation Agent, as adjusted. Accordingly, if the method of calculating the relevant Index or a Successor Index is modified so that the level of the relevant Index or such Successor Index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the relevant Index), which, in turn, causes the level of the relevant Index or such Successor Index to be a fraction of what it would have been if there had been no such modification, then the Calculation Agent will make such calculations and adjustments in order to arrive at a level for the relevant Index or such Successor Index as if it had not been modified (*e.g.*, as if such split had not occurred).

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem any series of the Securities in the circumstances described in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Optional Tax Redemption". If we exercise this right, the redemption price of that series of the Securities will be determined by the Calculation Agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of any series of the Securities is accelerated, we will pay the default amount in respect of the principal of the that series of Securities at maturity. We describe the default amount below under "— Default Amount".

For the purpose of determining whether the holders of our Medium-Term Notes, Series B are entitled to take any action under the indenture, we will treat the outstanding principal amount of each series of Securities as the outstanding principal amount of the Medium-Term Notes, Series B constituted by that series of Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants".

**Default Amount**

The default amount for any series of the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities of the accelerated series. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities of the accelerated series, which we describe below, the holders of that series of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a division of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, early redemption, acceleration or upon exercise by UBS of its call right will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in “Medium-Term Notes, Series B” under “Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities”.

**Defeasance**

Neither full defeasance nor covenant defeasance, as described “Medium-Term Notes, Series B” under “Description of Debt Securities We May Offer — Defeasance and Covenant Defeasance”, will apply to the Securities.

**Reissuances or Reopened Issues**

We may, at our sole discretion, “reopen” or reissue any series of the Securities. We intend to issue the Securities initially in an amount having the aggregate offering price specified in “Principal Terms” above. However, we may issue additional Securities in amounts that exceed the amount specified in “Principal Terms” above at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other Securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to “Medium Term Notes, Series B” under “Description of Debt Securities We May Offer — Amounts That We May Issue”.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities of any series and will have the same CUSIP number and will trade interchangeably with that series of the Securities immediately upon settlement. Any additional issuances will increase the aggregate Principal Amount of the outstanding Securities of the class, plus the aggregate Principal Amount of any Securities bearing the same CUSIP number that are issued pursuant to any future issuances of Securities bearing the same CUSIP number. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC’s settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

**Redemption Procedures**

The redemption procedures for Early Redemption are specified under “— Redemption Procedures” in “Principal Terms” above, provided that any reference herein to 12:00 noon (New York City time) as the cutoff time (1) to deliver notice of redemption and (2) for aggregating redemption requests to determine whether an early redemption is a Regular Redemption or a Large Redemption shall be 9:00 a.m. (New York City time).

**Additional Terms of the Securities**

The general terms of the Securities in are modified by the specific definitions and terms below.

“Intraday Indicative Value” means the approximate intrinsic economic value of the Securities calculated by NYSE Arca, Inc. and published on Bloomberg (based in part on information provided by the Index Sponsor) or a successor via the facilities on the Consolidated Tape Association under the symbol “FIHDIV”.

“Trading Day” means any day on which (i) trading is generally conducted on NYSE Arca and (ii) the level of the Index is published by the Index Sponsor, in each case as determined by the Calculation Agent.

“Primary Exchange” means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading for such Index Constituent Security or such constituent underlying a successor index.

**4. ETRACS UBS Bloomberg Constant Maturity Commodity Index (CMCI) Total Return ETN Series B due April 5, 2038**

**Specific Terms of the Securities**

In this section, references to “holders” or “you” mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company (“DTC”) or another depositary. Owners of beneficial interests in the Securities should read the section entitled “Legal Ownership and Book-Entry Issuance” under “Medium-Term Notes, Series B” above.

These Securities are part of a series of debt securities entitled “Medium-Term Notes, Series B” that we may issue, from time to time, under the indenture more particularly described under “Medium-Term Notes, Series B” above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in “Description of Debt Securities We May Offer” under “Medium-Term Notes, Series B” above. The terms described here supplement those described in ”Medium-Term Notes, Series B” above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

These Securities are part of a single series of senior debt securities issued under our indenture dated as of June 12, 20015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

**Principal Amount:** $100,000,000

**Issuer:** UBS AG (London Branch)

**Coupon**

We will not pay you interest during the term of the Securities.

**Denomination**

The Stated Principal Amount of the Securities is $25 per Security.

**Payment at Maturity or Upon Early Redemption**

At maturity or upon early redemption, you will receive a cash payment per $25 Stated Principal Amount of your Securities equal to the Redemption Amount, which is calculated on the Final Valuation Date or the applicable Valuation Date, as the case may be, and based on the percentage change in the level of the Index from the Initial Trade Date relative to such Valuation Date.

The “Redemption Amount” will equal:

$$(\$25.00 \times \text{Index Performance Ratio}) - \text{Fee Amount}$$

For purposes of calculating the Redemption Amount at maturity or upon early redemption, the Index Performance Ratio will be determined as of the corresponding Final Valuation Date or Valuation Date, as the case may be. If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The “Index Performance Ratio” will be calculated as follows:

$$\frac{\text{Index Ending Level}}{\text{Index Starting Level}}$$

The “Index Starting Level” is 1,436.54, the closing level of the Index measured on April 1, 2008.

The “Index Ending Level” will equal the closing level of the Index on the applicable Trading Day.

The “Fee Amount” accrues on a daily basis. The initial Fee Amount will be $0.9565 and beginning on and including the Initial Trade Date will increase each subsequent calendar date by an amount equal to: (0.55%/365) x $25.00 x Index Performance Ratio on that day. For the purpose of calculating the Fee Amount, the Index Performance Ratio on any day that is not a Trading Day is the Index Performance Ratio as of the immediately preceding Trading Day.

Unlike ordinary debt securities, the Securities do not pay interest and do not guarantee any return of principal at maturity or upon an early redemption.

The Securities are fully exposed to any decline in the level of the Index. You may lose some or all of your investment if the Index level on the Final Valuation Date or the applicable Valuation Date, as the case may be, is less than the Index Starting Level or if the Index level does not increase by an amount sufficient to offset the negative effect of the Fee Amount. In addition, the Fee Amount will be calculated and accumulated based on a daily Index level and therefore will depend on the daily fluctuations of the Index level. If the amount calculated above is equal to or less than zero, the payment at maturity, call or upon early redemption will be zero.

To receive at least your Stated Principal Amount at maturity or upon early redemption, the Index must increase by a certain amount to offset the reduction to the Redemption Amount caused by the Fee Amount.

**Maturity Date**

The "Maturity Date" is April 5, 2038, unless that day is not a Business Day, in which case the Maturity Date will be the next following Business Day. If the third Trading Day before April 5, 2038 does not qualify as the Final Valuation Date as determined in accordance with "— Final Valuation Date" below, then the Maturity Date will be the third Trading Day following the Final Valuation Date or, if such day is not a Business Day, the next following Trading Day that is also a Business Day. The Calculation Agent may postpone the Final Valuation Date — and therefore the Maturity Date — if a market disruption event occurs or is continuing on a day that would otherwise be the Final Valuation Date. We describe market disruption events under "— Market Disruption Event" below.

**Final Valuation Date**

We currently expect the "Final Valuation Date" to be March 31, 2038, unless the Calculation Agent determines that a market disruption event occurs or is continuing on that day. In that event, the Final Valuation Date will be the first following Trading Day on which the Calculation Agent determines that a market disruption event does not occur and is not continuing. In no event, however, will the Final Valuation Date for the Securities be postponed by more than five (5) Trading Days.

**Underlying Index**

The return on the Securities is linked to the performance of the UBS Bloomberg Constant Maturity Commodity Index (CMCI) Total Return (the "Index"). The Index is designed to be a diversified benchmark for commodities as an asset class. The Index, which is rebalanced monthly, is comprised of futures contracts on 27 components, representing 24 commodities, with up to five different maturities for each individual commodity. The Index is a "total return" index. The overall return on the Index is generated by two components: (i) uncollateralized returns on the futures contracts comprising the Index and (ii) a daily fixed-income return, which reflects the interest earned on a hypothetical 91-day Treasury Bill portfolio theoretically deposited as margin for hypothetical positions in the futures contracts comprising the Index.

**Early Redemption**

You may elect to require UBS to redeem your Securities, in whole or in part, prior to the Maturity Date on any Trading Day through and including the final Redemption Date, subject to a minimum redemption amount of at least 50,000 Securities. If you elect to have UBS redeem your Securities, you will receive a cash payment equal to the Redemption Amount, which will be determined on the applicable Valuation Date and paid on the applicable Redemption Date. You must comply with the redemption procedures described below in order to redeem your Securities. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 50,000 Securities. Any such reduction will be applied on a consistent basis for all holders of the Securities at the time the reduction becomes effective.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption to UBS via email no later than 12:00 p.m. (New York City time) on any Trading Day. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;

- ➢ instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Valuation Date at a price equal to the Redemption Amount; and
- ➢ cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 p.m. (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Trading Day prior to the applicable Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**Redemption Dates**

The "Redemption Dates" will be the third Trading Day following a Valuation Date (other than the Final Valuation Date) or, if such day is not a Business Day, the next following Trading Day that is a Business Day. The final Redemption Date will be the third Trading Day following the Valuation Date that immediately precedes the Final Valuation Date or, if such day is not a Business Day, the next following Trading Day that is a Business Day. The Calculation Agent may postpone the applicable Valuation Date — and therefore the applicable Redemption Date — if a market disruption event occurs or is continuing on a day that would otherwise be the applicable Valuation Date. We describe market disruption events under "— Market Disruption Event" below.

**Valuation Dates**

For any early redemption, the applicable "Valuation Date" means the first Trading Day immediately following the Trading Day on which you deliver a redemption notice to UBS in compliance with the redemption procedures. In the event UBS exercises its Call Right (as defined below), the Valuation Date means the third Trading Day prior to the Call Settlement Date (as defined below). If the Calculation Agent determines that a market disruption event occurs or is continuing on a Valuation Date, the applicable Valuation Date will be the first following Trading Day on which the Calculation Agent determines that a market disruption event does not occur and is not continuing. In no event, however, will the applicable Valuation Date for the Securities be postponed by more than five (5) Trading Days. The Final Valuation Date is March 31, 2038.

**UBS's Call Right**

On any Trading Day on or after October 17, 2016 through and including the Maturity Date (any such day, the "Call Settlement Date"), UBS may at its option redeem all, but not less than all, issued and outstanding Securities. To exercise its Call Right, UBS must provide notice to the holders of the Securities not less than five (5) Trading Days prior to the Call Settlement Date specified by UBS in such notice. If UBS elects to redeem the Securities on the Call Settlement Date, the Holder will receive a cash payment equal to the Redemption Amount, which will be calculated on the applicable Valuation Date and paid on the Call Settlement Date. The Calculation Agent may postpone the applicable Valuation Date — and therefore the Call Settlement Date — if a market disruption event occurs and is continuing on a day that would otherwise be the applicable Valuation Date.

In the event we exercise our Call Right, references to payment upon early redemption also refer to payment upon our exercise of our call right. See "— Payment at Maturity or Upon Early Redemption." We discuss redemption "Medium-Term Notes, Series B" above under "Description of the Debt Securities We May Offer–Redemption and Payment."

**Market Disruption Event**

The Calculation Agent will determine the Index Ending Level on the applicable Valuation Date or the Final Valuation Date, as the case may be. If the level of the Index has declined, you may lose some or all of your investment. If the level of the Index has increased, it must have increased by an amount sufficient to offset the Fee Amount in order to receive a positive return on your Securities. As described above, the applicable Valuation Date or the Final Valuation Date, as the case may be, may be postponed and thus the determination of the Index Ending Level may be postponed if the Calculation Agent determines that, on the applicable Valuation Date or the Final Valuation Date, as the case may be, a market disruption event has occurred or is continuing. Notwithstanding the occurrence of one or more of the events below, which may, in the Calculation Agent's discretion, constitute a market disruption event, the Calculation Agent in its discretion may waive its right to postpone the determination of the Index Ending Level if it determines that one or more of the below events has not and is not likely to materially impair its ability to determine the Index Ending Level on such date. If such a postponement occurs, the Calculation Agent will use the closing level of the Index on the first Trading Day on which no market disruption event occurs or is continuing. In no event, however, will the determination of the Index Ending Level be postponed by more than five (5) Trading Days.

If the determination of the Index Ending Level is postponed to the last possible day, but a market disruption event occurs or is continuing on that day, that day will nevertheless be the date on which the Index Ending Level will be determined by the Calculation Agent. In such an event, the Calculation Agent will make a good faith estimate in its sole discretion of the Index Ending Level that would have prevailed in the absence of the market disruption event.

Any of the following will be a market disruption event:

- the absence or suspension of, or material limitation or disruption in the trading of any exchange-traded futures contract included in the Index;
- the settlement price of any such contract has increased or decreased by an amount equal to the maximum permitted price change from the previous day’s settlement price;
- the Index is not published;
- the settlement price is not published for any individual exchange-traded futures contract included in the Index;
- the occurrence of any event on any day or any number of consecutive days as determined by the Calculation Agent in its sole and reasonable discretion that affects our currency hedging (if any) with respect to U.S. dollars or the currency of any futures contract included in the Index; or
- in any other event, if the Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect .

The following events will not be market disruption events:

- a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or
- a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Commodity.

For this purpose, an “absence of trading” in the primary securities market on which option or futures contracts related to a basket or any Index Commodities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under “Description of Debt Securities We May Offer — Optional Tax Redemption” in ”Medium-Term Notes, Series B” above. If we exercise this right, the redemption price of the Securities will be determined by the Calculation Agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under “— Default Amount.”

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Series B medium-term notes, holders of specified percentages in principal amount of all Series B medium-term notes, together in some cases with other series of our debt securities, will be able to take action affecting all the Series B medium-term notes, including the Securities. This action may involve changing some of the terms that apply to the Series B medium-term notes, accelerating the maturity of the Series B medium-term notes after a default or waiving some of our obligations under the indenture. We discuss these matters in ”Medium-Term Notes, Series B” above under “Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default” and “Description of Debt Securities We May Offer — Modification and Waiver of Covenants.”

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, *plus*
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two (2) Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two (2) Business Day objection period have not ended before the applicable Valuation Date or the Final Valuation Date, as the case may be, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's, a division of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index; Alteration of Method of Calculation**

If the Index Administrator discontinues publication of the Index and it or any other person or entity publishes a substitute index that the Calculation Agent determines is comparable to the Index and approves as a successor index, then the Calculation Agent will determine the Index Performance Ratio, Index Ending Level and the amount payable at maturity or upon early redemption by reference to such successor index.

If the Calculation Agent determines that the publication of the Index is discontinued and that there is no successor index on any date when the value of the Index is required to be determined, the Calculation Agent will instead make the necessary determination by reference to a group of commodities and options or another index and will apply a computation methodology that the Calculation Agent determines will as closely as reasonably possible replicate the Index.

If the Calculation Agent determines that the exchange-traded futures contracts included in the Index or the method of calculating the Index has been changed at any time in any respect — and whether the change is made by the Index Administrator under its existing policies or following a modification of those policies, is due to the publication of a successor index, is due to events affecting one or more of the Index Commodities or is due to any other reason — that causes the Index not to fairly represent the value of the Index had such changes not been made or that otherwise affects the calculation of the performance of the Index, the Index Ending Level or the amount payable at maturity or upon early redemption, then the Calculation Agent may make adjustments in the method of calculating the Index that it believes are appropriate to ensure that the Index Performance Ratio used to determine the amount payable on the Maturity Date or upon early redemption is equitable. All determinations and adjustments to be made by the Calculation Agent with respect to the performance of the Index, Index Ending Level, the amount payable at maturity or upon early redemption or otherwise relating to the level of the Index may be made by the Calculation Agent in its sole discretion.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity or upon early redemption will be made to accounts designated by you and approved by us, or at the office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Trading Day**

Trading Day means a day on which (i) the value of the Index is published by Bloomberg or Reuters, (ii) trading is generally conducted on NYSE Arca and (iii) trading is generally conducted on the markets on which the futures contracts comprising the Index are traded, in each case as determined by the Calculation Agent in its sole discretion.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B", any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Maturity Date," "— Redemption Date" and "— Valuation Date" above.

**Role of Calculation Agent**

Our affiliate, UBS Securities LLC, will serve as the Calculation Agent for the Securities. We may change the Calculation Agent after the original issue date of the Securities without notice. The Calculation Agent will make all determinations regarding the value of the Securities at maturity or upon early redemption, market disruption events, Trading Days, the default amount, the Index Starting Level, the Index Ending Level and the amount payable in respect of your Securities. Absent manifest error, all determinations of the Calculation Agent will be final and binding on you and us, without any liability on the part of the Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any of the above determinations by the Calculation Agent.

**Reissuances or Reopened Issues**

We may at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate stated principal amount specified on the cover of the prospectus supplement. We may issue additional Securities in amounts that exceed such amount at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in "Medium-Term Notes, Series B" above.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate stated principal amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

**5. ETRACS Bloomberg Commodity Index Total Return$^{SM}$ ETN Series B due October 31, 2039**

**Specific Terms of the Securities**

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("DTC") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (*i.e.*, in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

**Principal Amount:** $336,842,900

**Issuer:** UBS AG (London Branch)

**Coupon**

We will not pay you interest during the term of the Securities.

**Denomination**

The Stated Principal Amount per Security is $25.00.

**Payment at Maturity, Call or Upon Early Redemption**

At maturity, call or upon early redemption, you will receive a cash payment per $25.00 principal amount of your Securities equal to the Redemption Amount, which is calculated on the Final Valuation Date or the applicable Valuation Date, as the case may be, and based on the percentage change in the level of the Index from the Initial Trade Date relative to such Valuation Date.

The "**Redemption Amount**" will equal:

($25.00 × Index Performance Ratio) — Fee Amount

For purposes of calculating the Redemption Amount at maturity or upon early redemption, the Index Performance Ratio will be determined as of the corresponding Final Valuation Date or Valuation Date, as the case may be.

The "**Fee Amount**" is equal to 0.50% per annum, which accrues on a daily basis, with the Fee Amount equal to $1.0823 on the Initial Trade Date, and then increasing, on each subsequent calendar day, by an amount equal to: (0.50%/365) × $25.00 × Index Performance Ratio on that day. If such day is not a Trading Day, the Index Performance Ratio will be calculated as of the immediately preceding Trading Day.

The "**Index Performance Ratio**" will be calculated as follows:

$$\frac{\text{Index Ending Level}}{\text{Index Starting Level}}$$

The "**Index Starting Level**" is 264.194, the closing level of the Index on October 28, 2009.

The "**Index Ending Level**" will equal the closing level of the Index on the applicable Valuation Date.

**Unlike ordinary debt securities, the Securities do not pay interest and do not guarantee any return of principal at maturity, call or upon an early redemption.**

**The Securities are fully exposed to any decline in the level of the Index. You may lose some or all of your investment if the Index level declines from the Initial Trade Date relative to the Final Valuation Date or the applicable Valuation Date, as the case may be, or if the Index does not increase as of such date by an amount sufficient to offset the cumulative effect of the Fee Amount.**

To receive at least your initial investment at maturity or upon early redemption, the Index must increase by a certain amount to offset the reduction to the Redemption Amount caused by the Fee Amount.

**Maturity Date**

The Maturity Date is October 31, 2039, unless that day is not a Business Day, in which case the Maturity Date will be the next following Business Day. If the third Trading Day before October 31, 2039 does not qualify as the Final Valuation Date as determined in accordance with "— Final Valuation Date" below, then the Maturity Date will be the third Trading Day following the Final Valuation Date or, if such day is not a Business Day, the next following Trading Day that is also a Business Day. The calculation agent may postpone the Final Valuation Date — and therefore the Maturity Date — if a market disruption event occurs or is continuing on a day that would otherwise be the Final Valuation Date. We describe market disruption events under "— Market Disruption Event" below.

**Final Valuation Date**

We currently expect the Final Valuation Date to be the Trading Day that falls on October 26, 2039, unless the calculation agent determines that a market disruption event occurs or is continuing on that day. In that event, the Final Valuation Date will be the first following Trading Day on which the calculation agent determines that a market disruption event does not occur and is not continuing. In no event, however, will the Final Valuation Date for the Securities be postponed by more than five Trading Days.

**Underlying Index**

The return on the Securities is linked to the performance of the Bloomberg Commodity Index Total ReturnSM. The Index is composed of the prices of twenty-one exchange-traded futures contracts on physical commodities. An exchange-traded futures contract is a bilateral agreement providing for the purchase and sale of a specified type and quantity of a commodity or financial instrument during a stated delivery month for a fixed price. The twenty-three commodities included in the Index for 2020 are as follows: aluminum, brent crude oil, coffee, copper, corn, cotton, gold, HRW wheat, lean hogs, live cattle, low sulfur gas oil, natural gas, nickel, RBOB gasoline, silver, soybeans, soybean meal, soybean oil, sugar, wheat, WTI crude oil, ULS diesel and zinc. The Index is a "total return" index. The overall return on the Index is generated by two components: (i) unleveraged returns on futures contracts on the physical commodities comprising the Index and (ii) the returns that correspond to the weekly announced interest rate for specified 3-month U.S. Treasury Bills.

**Early Redemption**

You may elect to require UBS to redeem your Securities, in whole or in part, prior to the Maturity Date on any Trading Day, provided that the Trading Day is also a Business Day, through and including the final Redemption Date, subject to a minimum redemption amount of at least 50,000 Securities. If you elect to have UBS redeem your Securities, you will receive a cash payment equal to the Redemption Amount, which will be determined on the applicable Valuation Date and paid on the applicable Redemption Date. You must comply with the redemption procedures described below in order to redeem your Securities. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. UBS reserves the right from time to time to waive this minimum redemption amount in its sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, to UBS via email no later than 12:00 noon (New York City time) on any Trading Day. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Valuation Date at a price equal to the Redemption Amount; and

- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Trading Day prior to the applicable Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**Redemption Dates**

The applicable Redemption Date will be the third Trading Day following a Valuation Date (other than the Final Valuation Date) or, if such day is not a Business Day, the next following Trading Day that is a Business Day. The final Redemption Date will be the third Trading Day following the Valuation Date that immediately precedes the Final Valuation Date or, if such day is not a Business Day, the next following Trading Day that is a Business Day, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Date to the date on which the notice of redemption is received by UBS rather than the first Trading Day following a Valuation Date. You should not assume that you will be entitled to any such acceleration. The calculation agent may postpone the applicable Valuation Date — and therefore the applicable Redemption Date — if a market disruption event occurs or is continuing on a day that would otherwise be the applicable Valuation Date. We describe market disruption events under "— Market Disruption Event" below.

**Valuation Dates**

For any early redemption, the applicable "**Valuation Date**" means the first Trading Day immediately following the Trading Day on which you deliver a redemption notice to UBS in compliance with the redemption procedures. In the event UBS exercises its call right, the Valuation Date means the third Trading Day prior to the Call Settlement Date (as defined below). If the calculation agent determines that a market disruption event occurs or is continuing on a Valuation Date, the applicable Valuation Date will be the first following Trading Day on which the calculation agent determines that a market disruption event does not occur and is not continuing. In no event, however, will the applicable Valuation Date for the Securities be postponed by more than five Trading Days. The Final Valuation Date is October 26, 2039.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than ten calendar days' prior notice to the holders of the Securities, such redemption to occur on any Trading Day (or if such day is not a Business Day, the next Trading Day that is also a Business Day) that we may specify through and including the Maturity Date (the "**Call Settlement Date**"). Upon early redemption in the event we exercise our call right, you will receive a cash payment equal to the Redemption Amount, which will be calculated on the applicable Valuation Date and paid on the Call Settlement Date. The calculation agent may postpone the applicable Valuation Date — and therefore the Call Settlement Date — if a market disruption event occurs and is continuing on a day that would otherwise be the applicable Valuation Date.

In the event we exercise our call right, references to payment upon early redemption also refer to payment upon our exercise of our call right. See "— Payment at Maturity, Call or Upon Early Redemption" above. We discuss these matters in "Medium-Term Notes, Series B" above under "Description of the Debt Securities We May Offer — Redemption and Repayment."

**Market Disruption Event**

The calculation agent will determine the Index Ending Level on the applicable Valuation Date or the Final Valuation Date, as the case may be. If the level of the Index has declined, you will lose some or all of your investment. If the level of the Index has increased, it must have increased by an amount sufficient to offset the Fee Amount in order to receive a positive return on your Securities. As described above, the applicable Valuation Date or the Final Valuation Date, as the case may be, may be postponed and thus the determination of the Index Ending Level may be postponed if the calculation agent determines that, on the applicable Valuation Date or the Final Valuation Date, as the case may be, a market disruption event has occurred or is continuing. Notwithstanding the occurrence of one or more of the events below, which may, in the calculation agent's discretion, constitute a market disruption event, the calculation agent in its discretion may waive its right to postpone the determination of the Index Ending Level if it determines that one or more of the below events has not and is not likely to materially impair its ability to determine the Index Ending Level on such date. If such a postponement occurs, the calculation agent will use the closing level of the Index on the first Trading Day on which no market disruption event occurs or is continuing. In no event, however, will the determination of the Index Ending Level be postponed by more than five Trading Days.

If the determination of the Index Ending Level is postponed to the last possible day, but a market disruption event occurs or is continuing on that day, that day will nevertheless be the date on which the Index Ending Level will be determined by the calculation agent. In such an event, the calculation agent will make a good faith estimate in its sole discretion of the Index Ending Level that would have prevailed in the absence of the market disruption event.

Any of the following will be a market disruption event:

- the absence or suspension of, or material limitation or disruption in the trading of any exchange-traded futures contract included in the Index;
- the settlement price of any such contract has increased or decreased by an amount equal to the maximum permitted price change from the previous day's settlement price;
- the Index is not published;
- the settlement price is not published for any individual exchange-traded futures contract included in the Index;
- the occurrence of any event on any day or any number of consecutive days as determined by the calculation agent in its sole and reasonable discretion that affects our currency hedging (if any) with respect to U.S. dollars or the currency of any futures contract included in the Index; or
- in any other event, if the calculation agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described below under "Use of Proceeds and Hedging".

The following events will not be market disruption events:

- a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or
- a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Commodity.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to a basket or any Index Commodities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

If a market disruption event affecting any Index Commodity occurs during the fifth through the ninth Business Days of each month (the "**Hedge Roll Period**") in any month other than January, then the daily roll of the relevant Designated Contract for such Index Commodity will be postponed until the next available Business Day on which a market disruption event does not occur, and the calculation of the Index will be adjusted to reflect this. The Hedge Roll Period will be extended only if a market disruption event affects an Index Commodity on the scheduled final Business Day comprising the Hedge Roll Period.

If a market disruption event affecting any Index Commodity occurs during the January Hedge Roll Period, then the rolling or rebalancing of the relevant Designated Contract will occur in all cases over five Business Days on which no market disruption event exists at a rate of 20% per day. The January Hedge Roll Period, and the resulting rebalancing that is scheduled to occur, will be extended in all cases until the affected Designated Contract finishes rolling over five Business Days not affected by a market disruption event.

If a market disruption event occurs on a CIM Determination Date in respect of any lead future for an Index Commodity used in the calculation of the CIMs, then the settlement prices used to calculate the CIMs for such year will be from the first prior Business Day on which a market disruption event had not occurred in any such futures.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in "Medium-Term Notes, Series B" above. If we exercise this right, the redemption price of the Securities will be determined by the calculation agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, *plus*
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the applicable Valuation Date or the Final Valuation Date, as the case may be, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's, a division of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index; Alteration of Method of Calculation**

If BISL (the Index administrator) discontinues publication of the Index and it or any other person or entity publish a substitute index that the calculation agent determines is comparable to the Index and approves as a successor index then the calculation agent will determine the Index Performance Ratio, Index Ending Level and the amount payable at maturity, call or upon early redemption by reference to such successor index.

If the calculation agent determines that the publication of the Index is discontinued and that there is no successor index on any date when the value of the Index is required to be determined, the calculation agent will instead make the necessary determination by reference to a group of commodities and options or another index and will apply a computation methodology that the calculation agent determines will as closely as reasonably possible replicate the Index.

If the calculation agent determines that the exchange-traded futures contracts included in the Index or the method of calculating the Index has been changed at any time in any respect — and whether the change is made by the Index administrator under its existing policies or following a modification of those policies, is due to the publication of a successor index, is due to events affecting one or more of the Index Commodities or is due to any other reason — that causes the Index not to fairly represent the value of the Index had such changes not been made or that otherwise affects the calculation of the performance of the Index, the Index Ending Level or the amount payable at maturity, call or upon early redemption, then the calculation agent may make adjustments in the method of calculating the Index that it believes are appropriate to ensure that the Index Performance Ratio used to determine the amount payable on maturity, call or upon early redemption is equitable. All determinations and adjustments to be made by the calculation agent with respect to the performance of the Index, Index Ending Level, the amount payable at maturity, call or upon early redemption or otherwise relating to the level of the Index may be made by the calculation agent in its sole discretion.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or upon early redemption will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Trading Day**

"Trading Day" means a day on which (i) the value of the Index is published by Bloomberg L.P. or Reuters, (ii) trading is generally conducted on NYSE Arca and (iii) trading is generally conducted on the markets on which the futures contracts comprising the Index are traded, in each case as determined by the calculation agent in its sole discretion.

**Business Day**

When we refer to a "Business Day" with respect to the Securities, we mean a day that is a "business day" of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in in "Medium-Term Notes, Series B" above, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Maturity Date," "— Redemption Date" and "— Valuation Date" above.

**Role of Calculation Agent**

Our affiliate, UBS Securities LLC, will serve as the calculation agent for the Securities. We may change the calculation agent after the original issue date of the Securities without notice. The calculation agent will make all determinations regarding the value of the Securities at maturity, call or upon early redemption, market disruption events, Trading Days, the default amount, the Index Starting Level, the Index Ending Level and the amount payable in respect of your Securities. Absent manifest error, all determinations of the calculation agent will be final and binding on you and us, without any liability on the part of the calculation agent. You will not be entitled to any compensation from us for any loss suffered as a result of any of the above determinations by the calculation agent.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We may issue additional Securities in amounts that exceed the Stated Principal amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in "Medium-Term Notes, Series B" above.

These further issuances, if any, will be consolidated to form a single class with the Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class, plus the aggregate Stated Principal Amount of any Securities bearing the same CUSIP number that are issued pursuant to (i) any over-allotment option we may grant to an agent and (ii) any future issuances of Securities bearing the same CUSIP number. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 6. ETRACS Alerian MLP Infrastructure Index ETN Series B due April 2, 2040

### Specific Terms of the Securities

In this section, references to “holders” or “you” mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company (“DTC”) or another depositary. Owners of beneficial interests in the Securities should read the section entitled “Legal Ownership and Book-Entry Issuance” under “Medium-Term Notes, Series B” above.

These Securities are part of a series of debt securities entitled “Medium-Term Notes, Series B” that we may issue, from time to time, under the indenture more particularly described under “Medium-Term Notes, Series B” above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in “Description of Debt Securities We May Offer” under “Medium-Term Notes, Series B” above. The terms described here supplement those described in “Medium-Term Notes, Series B” above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity or call, or upon early redemption. Instead, at maturity, you will receive a cash payment the amount of which will vary depending on the performance of the VWAP Level calculated in accordance with the formula set forth below and will be reduced by the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period. We refer to this cash payment as the “Cash Settlement Amount.” If the amount so calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment on the Redemption Date equal to the Redemption Amount as described below under “— Early Redemption at the Option of the Holders.”

If the amount so calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

The Securities may pay a cash coupon during their term.

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the difference between the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date, and the Accrued Tracking Fee, calculated as of the corresponding Coupon Valuation Date (the “Coupon Amount”).

To the extent the Reference Distribution Amount on any Coupon Valuation Date is equal to or less than the Accrued Tracking Fee on the corresponding Coupon Valuation Date, there will be no Coupon Amount payment made on the corresponding Coupon Payment Date, and an amount equal to the difference between the Accrued Tracking Fee and the Reference Distribution Amount (the “Tracking Fee Shortfall”) will be included in the Accrued Tracking Fee for the next Coupon Valuation Date. This process will be repeated to the extent necessary until the Reference Distribution Amount for a Coupon Valuation Date is greater than the Accrued Tracking Fee for the corresponding Coupon Valuation Date. The final Coupon Amount will be included in the Cash Settlement Amount.

The “Coupon Payment Date” means the 15th Index Business Day following each Coupon Valuation Date, provided that the final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein. The first Coupon Payment Date will be January 22, 2016.

The “Coupon Record Date” means the ninth Index Business Day following each Coupon Valuation Date.

The “Coupon Ex-Date,” with respect to a Coupon Amount, means the first Exchange Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the second Exchange Business Day prior to the applicable Coupon Record Date.

The “Coupon Valuation Date” means the 30th of March, June, September and December of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment as described herein. The first Coupon Valuation Date will be December 30, 2015.

The “Reference Distribution Amount” means (i) as of the first Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the “record date” with respect to any Index constituent, for those cash distributions whose “ex-dividend date” occurs during the period from and excluding September 30, 2015 to and including the first Coupon Valuation Date; and (ii) as of any other Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the “record date” with respect to any Index constituent for those cash distributions whose “ex-dividend date” occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index constituent which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index constituent fails to pay the distribution to holders of such Index constituent by the scheduled payment date for such distribution, such distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The “Reference Holder” is, as of any date of determination, a hypothetical holder of a number of units of each Index constituent equal to (i) the published unit weighting of that Index constituent as of that date, *divided by* (ii) the product of (a) the Index Divisor as of that date, and (b) the Initial VWAP Level divided by 25.

“record date” means, with respect to a distribution on an Index constituent, the date on which a holder of the Index constituent must be registered as a unitholder of such Index constituent in order to be entitled to receive such distribution.

“ex-dividend date” means, with respect to a distribution on an Index constituent, the first Business Day on which transactions in such Index constituent trade on the Primary Exchange without the right to receive such distribution.

The “Quarterly Tracking Fee” means, as of any date of determination, an amount per Security equal to the product of (i) 0.2125% (equivalent to 0.85% per annum) and (ii) the Current Indicative Value as of the immediately preceding Index Business Day.

The “Current Indicative Value,” as determined by the Security Calculation Agent, means, as of any date of determination, an amount per Security equal to the product of (i) the Stated Principal Amount multiplied by (ii) a fraction, the numerator of which is equal to the VWAP Level (as defined under “— Cash Settlement Amount at Maturity”) as of such date and the denominator of which is equal to the Initial VWAP Level. As of October 7, 2015, the Current Indicative Value was 29.8737.

The “Accrued Tracking Fee” is:

(1) with respect to the first Coupon Valuation Date, an amount equal to:

the Quarterly Tracking Fee calculated as of the first Coupon Valuation Date (for the avoidance of doubt, the calculation of the Accrued Tracking Fee with respect to the first Coupon Valuation Date will be for a full quarter beginning from and excluding September 30, 2015);

(2) with respect to any Coupon Valuation Date, other than the first and last Coupon Valuation Dates, an amount equal to the Quarterly Tracking Fee as of such Coupon Valuation Date *plus* the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date, if any; and

(3) with respect to the last Coupon Valuation Date, an amount equal to:

(a) the product of

(i) the Quarterly Tracking Fee as of such Coupon Valuation Date and

(ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date, and the denominator of which is 90, *plus*

(b) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date. If there is a Tracking Fee Shortfall on the last Coupon Valuation Date, it will be taken into account in determining the Cash Settlement Amount, as described below.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the VWAP Level.

**Cash Settlement Amount at Maturity**

The “Maturity Date” is April 2, 2040, subject to adjustment as described below under “— Market Disruption Event.”

For each Security, unless earlier called or redeemed, you will receive at maturity a cash payment equal to:

(a) the product of

    (i) the Stated Principal Amount and

    (ii) the Index Performance Ratio as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount, *minus*

(c) the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the “Cash Settlement Amount.” If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The “Stated Principal Amount” of each Security is $25.00.

**You may lose some or all of your investment at maturity. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the increase in the level of the Index (as measured by the Final VWAP Level, as compared to the Initial VWAP Level) is insufficient to offset the negative effect of the Accrued Tracking Fee (less any Coupon Amounts, any Stub Reference Distribution Amount and/or Adjusted Coupon Amount, as applicable, you may be entitled to receive), or if the Final VWAP Level is less than the Initial VWAP Level, you may lose some or all of your investment at maturity.**

The “Index Performance Ratio” on any Index Business Day is calculated as follows:

$$\frac{\text{Final VWAP Level}}{\text{Initial VWAP Level}}$$

The “VWAP” with respect to each Index constituent, as of any date of determination, is the volume-weighted average price of one unit of such Index constituent as determined by the VWAP Calculation Agent based on the Primary Exchange for each Index constituent. For information about how the VWAP will be calculated to the extent a Disrupted Day exists with respect to an Index constituent, please see “— Market Disruption Event.”

The “Initial VWAP Level” is 487.420, the VWAP Level on March 31, 2010, as determined by the VWAP Calculation Agent. See “— VWAP Calculation Agent” below.

The “Final VWAP Level,” as determined by the VWAP Calculation Agent, will be the arithmetic mean of the VWAP Levels measured on each Index Business Day during the Final Measurement Period or Call Measurement Period or on any applicable Redemption Measurement Date, as applicable.

The “VWAP Level,” as determined by the VWAP Calculation Agent as of any Index Business Day, is equal to (1) the sum of the products of (i) the VWAP of each Index constituent as of such date and (ii) the published share weighting of that Index constituent as of such date divided by (2) the Index Divisor as of such date, or expressed as a formula, as follows:

where:

$$\text{VWAP Level} = \frac{\sum_{i=1}^{n}(VWAP_{i,t} * W_{i,t})}{IndexDivisor_t}$$

$n$ is the number of Index constituents;

$VWAP_{i,t}$ is the VWAP of Index constituent i as of Index Business Day t;

$W_{i,t}$ is the published share weighting of Index constituent i as of Index Business Day t; and

$Index\ Divisor_t$ is the Index Divisor as of Index Business Day t.

As of October 7, 2015, the VWAP Level was 582.442.

The “Index Divisor,” as of any date of determination, is the divisor used by the Index Calculation Agent to calculate the level of the Index.

The “Accrued Tracking Fee” as of the last Index Business Day in the Final Measurement Period is an amount equal to:

(a) the product of

  (i) the Quarterly Tracking Fee calculated as of the last Index Business Day in the Final Measurement Period and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the Calculation Date to and including the last Index Business Day in the Final Measurement Period, and the denominator of which is 90, *plus*

(b) the Tracking Fee Shortfall as of the last Coupon Valuation Date, if any.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the VWAP Level.

The “Final Measurement Period” means the five (5) Index Business Days from and including the Calculation Date, subject to adjustment as described under “— Market Disruption Event.”

The “Stub Reference Distribution Amount” means, as of the last Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the “record date” with respect to any Index constituent, for those cash distributions whose “ex-dividend date” occurs during the period from and excluding the first Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, to and including the last Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold 4/5 ths, 3/5 ths, 2/5 ths and 1/5 th of the shares of each Index constituent it would otherwise hold on the second, third, fourth and fifth Index Business Day, respectively, in such Final Measurement Period or Call Measurement Period.

The “Index Calculation Agent” means the entity that calculates and publishes the level of the Index, which is currently S&P.

The “Calculation Date” means March 23, 2040, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

“Index Business Day” means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

“Exchange Business Day” means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

“Business Day” means any day that is not a Saturday, a Sunday or a day on which banking institutions in The City of New York, generally, are authorized or obligated by law, regulation or executive order to close.

“Primary Exchange” means, with respect to each Index constituent or each constituent underlying a successor index, the primary exchange or market of trading such Index constituent or such constituent underlying a successor index.

“Related Exchange” means, with respect to each Index constituent or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index constituent or such constituent underlying a successor index.

**Underlying Index**

The Alerian MLP Infrastructure Index measures the performance of energy infrastructure master limited partnerships (“MLPs”), and is calculated by S&P Dow Jones Indices using a float-adjusted, capitalization-weighted methodology. We refer to the MLPs included in the Index as the “Index constituents.” The Index constituents earn the majority of their cash flow from gathering and processing, liquefaction, midstream services, pipeline transportation, rail terminating and storage of energy commodities.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under “— Market Disruption Event,” you may submit a request to have us redeem your Securities on any Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the Business Day immediately preceding the applicable Redemption Valuation Date, provided that you request that we redeem a minimum of 50,000 Securities. For any applicable redemption request, the “Redemption Valuation Date” will be the first Index Business Day following the date that the applicable Redemption Notice and Redemption Confirmation are delivered. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 50,000 Securities. Any such reduction will be applied on a consistent basis for all holders of the Securities at the time the reduction becomes effective.

The Securities will be redeemed and the holders will receive payment for their Securities on the third Business Day following the applicable Redemption Measurement Date (the "Redemption Date"). The first Redemption Date will be October 15, 2015. If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index constituents, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

The applicable "Redemption Measurement Date" means the Index Business Day following the applicable Redemption Valuation Date, subject to adjustments as described under "— Market Disruption Event."

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

(a) the product of

  (i) the Stated Principal Amount and

  (ii) the Index Performance Ratio as of the Redemption Measurement Date, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Redemption Valuation Date if on the Redemption Measurement Date the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *plus*

(c) the Adjusted Coupon Amount, if any, *minus*

(d) the Accrued Tracking Fee as of the Redemption Measurement Date, *minus*

(e) the Redemption Fee Amount.

We refer to this cash payment as the "Redemption Amount." We have determined to offer all holders of the Securities the option, upon early redemption and solely for purposes of determining the Redemption Amount, but not for any other purpose, to elect that the Index Performance Ratio (which is used to calculate the Redemption Amount) be calculated using the Index Closing Level on the Redemption Measurement Date instead of the Final VWAP Level. If the redeeming holder so elects, the Index Performance Ratio will be calculated, for purposes of determining the Redemption Amount, as:

$$\frac{\text{Index Closing Level on the Redemption Measurement Date}}{\text{Initial VWAP Level}}$$

The "Index Closing Level" is the closing level of the Index as reported on the NYSE and Bloomberg; provided, however, that if the closing level of the Index as reported on the NYSE (or any successor) differs from the closing level of the Index as reported on Bloomberg (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent.

If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Measurement Date.

**You may lose some or all of your investment upon early redemption. The combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount will reduce your final Redemption Amount. If the level of the Index (as measured by the Final VWAP Level as compared to the Initial VWAP Level) does not increase by an amount sufficient to offset the combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount (less any Coupon Amounts, any Stub Reference Distribution Amount, as applicable, and/or any Adjusted Coupon Amount, you may be entitled to receive), you may lose some or all of your investment upon early redemption.**

The Accrued Tracking Fee as of the Redemption Measurement Date is an amount equal to:

(a) the product of

  (i) the Quarterly Tracking Fee calculated as of the Redemption Measurement Date, and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the Redemption Valuation Date to and including the Redemption Measurement Date, and the denominator of which is 90,

*plus*

(b) the Adjusted Tracking Fee Shortfall, if any.

The "Adjusted Coupon Amount," with respect to any Redemption Valuation Date, is an amount in cash equal to the difference between the Adjusted Reference Distribution Amount, calculated as of such Redemption Valuation Date, and the Adjusted Tracking Fee, calculated as of such Redemption Valuation Date. To the extent the Adjusted Reference Distribution Amount is less than the Adjusted Tracking Fee, the Redemption Amount will not include an Adjusted Coupon Amount, and the Adjusted Tracking Fee Shortfall will be included in the calculation of the Accrued Tracking Fee as of the applicable Redemption Measurement Date.

The "Adjusted Reference Distribution Amount," as of any Redemption Valuation Date, is an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to an Index constituent, for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date (or if the Redemption Valuation Date occurs prior to the first Coupon Valuation Date, the period from and excluding September 30, 2015) to and including such Redemption Valuation Date.

The "Adjusted Tracking Fee" is:

(1) as of any Redemption Valuation Date occurring prior to the first Coupon Valuation Date, an amount equal to:

the product of

(i) the Quarterly Tracking Fee as of such Redemption Valuation Date and

(ii) a fraction, the numerator of which is the total number of calendar days from and excluding September 30, 2015 to and including such Redemption Valuation Date, and the denominator of which is 90; and

(2) as of any Redemption Valuation Date occurring on or after the first Coupon Valuation Date, an amount equal to:

(a) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date *plus*

(b) the product of

(i) the Quarterly Tracking Fee as of such Redemption Valuation Date and

(iii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Redemption Valuation Date, and the denominator of which is 90.

The "Adjusted Tracking Fee Shortfall," as of any Redemption Valuation Date, is the difference between the Adjusted Tracking Fee and the Adjusted Reference Distribution Amount, to the extent that the Adjusted Reference Distribution Amount, calculated as of such Redemption Valuation Date, is less than the Adjusted Tracking Fee, calculated as of such Redemption Valuation Date.

The "Redemption Fee Amount" means an amount equal to 0.125% of the Stated Principal Amount of the Securities.

*Some of the defined terms used in this section have different applications when used in determining the Call Settlement Amount. For the definitions of the terms relevant to a call, please refer to "— UBS's Call Right" below.*

We discuss redemption in "Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Redemption and Payment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the repurchase feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- ➢ deliver a notice of redemption, which we refer to as a "Redemption Notice" to UBS via email no later than 12:00 noon (New York City time) on the Business Day immediately preceding the applicable Redemption Valuation Date. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- ➢ deliver the signed confirmation of redemption, which we refer to as the "Redemption Confirmation," to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- ➢ instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- ➢ cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m. (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities, such redemption to occur on any Business Day that we may specify on or after October 17, 2016 through and including the Maturity Date (the "Call Settlement Date"). Upon early redemption in the event we exercise this right, you will receive a cash payment equal to:

(a) the product of

(i) the Stated Principal Amount and

(ii) the Index Performance Ratio as of the last Index Business Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *plus*

(c) the Adjusted Coupon Amount, if any, *minus*

(d) the Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period, *plus*

(e) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "Call Settlement Amount."

If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "Call Settlement Date"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index constituents, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "Call Measurement Period" means the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

**You may lose some or all of your investment upon a call. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the increase in the Final VWAP Level, as compared to the Initial VWAP Level, is insufficient to offset the negative effect of the Accrued Tracking Fee (less any Coupon Amounts, any Stub Reference Distribution Amount and/or any Adjusted Coupon Amount, you may be entitled to receive), or if the Final VWAP Level is less than the Initial VWAP Level, you may lose some or all of your investment upon a call.**

The Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period is an amount equal to:

(a) the product of

(i) the Quarterly Tracking Fee calculated as of the last Index Business Day in such Call Measurement Period, and

(ii) a fraction, the numerator of which is the total number of calendar days from and excluding the Call Valuation Date to and including the last Index Business Day in such Call Measurement Period, and the denominator of which is 90, *plus*

(b) the Adjusted Tracking Fee Shortfall (as defined below), if any.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the VWAP Level.

The “Adjusted Coupon Amount,” with respect to the Call Valuation Date, is an amount in cash equal to the difference between the Adjusted Reference Distribution Amount (as defined below), calculated as of the Call Valuation Date, and the Adjusted Tracking Fee (as defined in the preceding paragraph), calculated as of such Call Valuation Date. To the extent the Adjusted Reference Distribution Amount is less than the Adjusted Tracking Fee, the Call Settlement Amount will not include an Adjusted Coupon Amount, and the Adjusted Tracking Fee Shortfall (as defined below) will be included in the calculation of the Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period.

The “Adjusted Reference Distribution Amount,” as of the Call Valuation Date, is an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the “record date” with respect to an Index constituent, for those cash distributions whose “ex-dividend date” occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including the Call Valuation Date.

The “Adjusted Tracking Fee” is, as of the Call Valuation Date, an amount equal to:

(a) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date *plus*

(b) the product of

  (i) the Quarterly Tracking Fee as of such Call Valuation Date and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Call Valuation Date, and the denominator of which is 90.

The “Adjusted Tracking Fee Shortfall,” as of the Call Valuation Date, is the difference between the Adjusted Tracking Fee and the Adjusted Reference Distribution Amount, to the extent that the Adjusted Reference Distribution Amount, calculated as of such Call Valuation Date, is less than the Adjusted Tracking Fee, calculated as of such Call Valuation Date.

*Some of the defined terms used in this section have different applications when used in determining the Redemption Amount. For the definition of the terms relevant to early redemption, please refer to “— Early Redemption at the Option of the Holders” above.*

**Security Calculation Agent**

UBS Securities LLC will act as the “Security Calculation Agent.” The Security Calculation Agent will determine, among other things, the Current Indicative Value, the Index Performance Ratio, the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Quarterly Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Final Measurement Period, the Coupon Payment Dates, the Coupon Valuation Dates, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Call Settlement Date, the Call Valuation Date, the Call Measurement Period and the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, and whether any day is a Business Day, Exchange Business Day or Index Business Day. The Security Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the Index has been discontinued and whether there has been a material change in the Index. All determinations made by the Security Calculation Agent will be at the sole discretion of the Security Calculation Agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different Security Calculation Agent from time to time without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity or call, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 p.m., New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Quarterly Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Amount and Redemption Fee Amount, if any, per security, the Call Settlement Amount, if any, per security, and the Cash Settlement Amount, if any, per security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**VWAP Calculation Agent**

The NYSE will on each day that is not a Disrupted Day (as defined below) act as the "VWAP Calculation Agent." The VWAP Calculation Agent will determine the VWAP of any Index constituent, the VWAP Level and the Final VWAP Level on any Index Business Day on which such VWAP, VWAP Level and Final VWAP Level are to be determined during the term of the Securities. The VWAP Calculation Agent determined the Initial VWAP Level of 487.420 as of March 31, 2010. All determinations made by the VWAP Calculation Agent will be at the sole discretion of the VWAP Calculation Agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different VWAP Calculation Agent from time to time without your consent and without notifying you.

All calculations with respect to the VWAP of any Index constituent, any VWAP Level, and the Final VWAP Level will be rounded to the nearest thousandth, with five ten-thousandths rounded upward (e.g., .8765 would be rounded to .877).

**Market Disruption Event**

To the extent a Disrupted Day (as defined below) exists with respect to an Index constituent on an Averaging Date (as defined below) or on a Redemption Measurement Date, the VWAP and published share weighting with respect to such Index constituent (and only with respect to such Index constituent) for such Averaging Date or Redemption Measurement Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day that is not a Disrupted Day (the "Deferred Averaging Date") with respect to such Index constituent irrespective of whether pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the VWAP of a particular Index constituent being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the VWAP Levels on the Index Business Days during the Final Measurement Period or Call Measurement Period, or on the Redemption Measurement Date, as applicable, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the VWAP and the published share weighting with respect to such Index constituent for such Deferred Averaging Date to the calculation of the VWAP Level (i) on the date(s) of the original disruption with respect to such Index constituent and (ii) such Averaging Date. For example, if the Final Measurement Period or Call Measurement Period, as applicable, for purposes of calculating the Cash Settlement Amount or Call Settlement Amount, respectively, is based on the arithmetic mean of the VWAP Levels on June 6, 2016, June 7, 2016, June 8, 2016, June 9, 2016 and June 10, 2016 and there is a Market Disruption Event for an Index constituent on June 6, 2016, but no other Market Disruption Event during the Final Measurement Period or Call Measurement Period, as applicable, then the VWAP for such disrupted Index constituent on June 7, 2016 will be used more than once to calculate the Cash Settlement Amount or Call Settlement Amount, respectively, and such Cash Settlement Amount or Call Settlement Amount, as applicable, will be determined based on the arithmetic mean of the VWAP for such disrupted Index constituent on June 7, 2016, June 7, 2016, June 8, 2016, June 9, 2016 and June 10, 2016.

If the Redemption Measurement Date for purposes of calculating a Redemption Amount is based on the VWAP Level on June 6, 2016 and there is a Market Disruption Event for an Index constituent on June 6, 2016, then the VWAP for such disrupted Index constituent on June 7, 2016 will be used to calculate the Redemption Amount.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or the Redemption Measurement Date, as applicable, with respect to any Index constituent occurring more than three (3) Index Business Days following the day originally scheduled to be such final Averaging Date or Redemption Measurement Date. If the third Index Business Day following the date originally scheduled to be the final Averaging Date, or the Redemption Measurement Date, as applicable, is not an Index Business Day or is a Disrupted Day with respect to such Index constituent, the Security Calculation Agent or one of its affiliates will determine the VWAP and share weighting with respect to any Index constituent required to be determined for the purpose of calculating the applicable VWAP Level based on its good faith estimate of the VWAP and share weighting of each such Index constituent that would have prevailed on the Primary Exchange on such third Index Business Day but for such suspension or limitation.

An "Averaging Date" means each of the Index Business Days during the Final Measurement Period or Call Measurement Period, as applicable, subject to adjustment as described herein.

A "Disrupted Day" with respect to any Index constituent is any Index Business Day on which the Primary Exchange or any Related Exchange fails to open for trading during its regular trading session or on which a Market Disruption Event has occurred and is continuing, and, in both cases, the occurrence of which is determined by the Security Calculation Agent to have a material effect on the VWAP Level.

With respect to an Index constituent, a "Market Disruption Event" means:

(a) the occurrence or existence of a condition specified below:

(i) any suspension, absence or limitation of trading on the Primary Exchange for trading in the Index constituent, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise,

(ii) any suspension, absence or limitation of trading on the Related Exchange for trading in futures or options contracts related to the Index constituent, whether by reason of movements in price exceeding limits permitted by such Related Exchange or otherwise, or

(iii) any event (other than an event described in (b) below) that disrupts or impairs (as determined by the Security Calculation Agent) the ability of market participants in general (A) to effect transactions in, or obtain market values for, the relevant Index constituent or (B) to effect transactions in, or obtain market values for, futures or options contracts relating to the relevant Index constituent; or

(b) the closure on any Index Business Day of the Primary Exchange or any Related Exchange prior to its Scheduled Closing Time unless such earlier closing time is announced by the Primary Exchange or such Related Exchange at least one hour prior to the earlier of (i) the actual closing time for the regular trading session on the Primary Exchange or such Related Exchange on such Index Business Day and (ii) the submission deadline for orders to be entered into the Primary Exchange or such Related Exchange system for execution at the close of trading on such Index Business Day;

in each case determined by the Security Calculation Agent in its sole discretion; and

(c) a determination by the Security Calculation Agent in its sole discretion that the event described above materially interfered with our ability or the ability of any of our affiliates to adjust or unwind all or a material portion of any hedge with respect to the Securities.

For purposes of the above definition:

(a) a limitation on the hours or number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the Primary Exchange or Related Exchange, and

(b) for purposes of clause (a) above, limitations pursuant to the rules of any Primary Exchange or Related Exchange similar to NYSE Rule 80B or Nasdaq Rule 4120 (or any applicable rule or regulation enacted or promulgated by any other self-regulatory organization or any government agency of scope similar to NYSE Rule 80B or Nasdaq Rule 4120 as determined by the Security Calculation Agent) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading.

"Scheduled Closing Time" means, with respect to the Primary Exchange or the Related Exchange, on any Index Business Day, the scheduled weekday closing time of the Primary Exchange or such Related Exchange on such Index Business Day, without regard to after hours or any other trading outside of the regular trading session hours.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in "Medium-Term Notes, Series B" above. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount." In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the

Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two (2) Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two (2) Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by S&P or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index; Alteration of Method of Calculation**

If S&P discontinues publication of or otherwise fails to publish the Index, or S&P does not make the Index constituents, their share weighting and/or the Index Divisor available to the VWAP Calculation Agent, and the Index Sponsor, S&P or another entity publishes a successor or substitute index that the Security Calculation Agent determines to be comparable to the discontinued Index and for which the Index constituents, their share weighting, and/or the Index Divisor are available to the VWAP Calculation Agent (such index being referred to herein as a "successor index"), then the VWAP Level for such successor index will be determined by the VWAP Calculation Agent by reference to the sum of the products of the VWAPs of the components underlying such successor index on the Primary Exchanges and each such component's respective weighting within the successor index (which sum will be adjusted by any index divisor used by such successor index) on the dates and at the times as of which the VWAP Levels for such successor index are to be determined.

Upon any selection by the Security Calculation Agent of a successor Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If S&P discontinues publication of the Index or does not make the Index constituents, their share weightings and/or Index Divisor available to the VWAP Calculation Agent prior to, and such discontinuation or unavailability is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or Call Measurement Period, or on the Redemption Measurement Date, as applicable, or any other relevant date on which the VWAP Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or Call Measurement Period, or on the Redemption Measurement Date, as applicable, or any other relevant date on which the VWAP Level is to be determined, then the Security Calculation Agent will determine the relevant VWAP Levels using the VWAP and published share weighting of each Index constituent included in the Index or successor index, as applicable, immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the VWAP Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the VWAP Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at a VWAP level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the VWAP Levels for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Final VWAP Level, the Current Indicative Value, the Index Performance Ratio, the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Quarterly Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, and the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, based on the relevant VWAP Levels calculated by the VWAP Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (e.g., due to a split in the Index), which, in turn, causes the VWAP Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at a VWAP Level for the Index or such successor index as if it had not been modified (e.g., as if such split had not occurred).

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity or call, or upon early redemption will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B".

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate stated principal amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed such amount any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in "Medium-Term Notes, Series B" above.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate stated principal amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 7. ETRACS MVIS Business Development Companies Index ETN due April 26, 2041

### Specific Terms of the Securities

In this section, references to “holders” or “you” mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company (“**DTC**”) or another depositary. Owners of beneficial interests in the Securities should read the section entitled “Legal Ownership and Book-Entry Issuance” under “Medium-Term Notes, Series B” above.

These Securities are part of a series of UBS AG debt securities entitled “Medium-Term Notes, Series B” that we may issue, from time to time, under the indenture more particularly described under “Medium-Term Notes, Series B” above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described under “Medium-Term Notes, Series B” above. The terms described here supplement those described in “Medium-Term Notes, Series B” above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

These Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity or call, or upon early redemption. At maturity, you will receive a cash payment the amount of which will vary depending on the performance of the Index and will be reduced by the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period, as described under “— Cash Settlement Amount at Maturity.” We refer to this cash payment as the “Cash Settlement Amount.” If the amount so calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment on the Redemption Date equal to the Redemption Amount as described under “— Early Redemption at the Option of the Holders.”

If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

The Securities may pay a cash coupon during their term.

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each quarterly Coupon Payment Date you will receive an amount in cash equal to the difference between the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date, and the Accrued Tracking Fee, calculated as of the corresponding Coupon Valuation Date (the “Coupon Amount”).

To the extent the Reference Distribution Amount on any Coupon Valuation Date is equal to or less than the Accrued Tracking Fee on the corresponding Coupon Valuation Date, there will be no Coupon Amount payment made on that Coupon Payment Date, and an amount equal to the difference between the Accrued Tracking Fee and the Reference Distribution Amount (the “Tracking Fee Shortfall”) will be included in the Accrued Tracking Fee and will reduce the Coupon Amount for the next Coupon Valuation Date. This process will be repeated to the extent necessary until the Reference Distribution Amount for a Coupon Valuation Date is greater than the Accrued Tracking Fee for the corresponding Coupon Valuation Date. The final Coupon Amount will be included in the Cash Settlement Amount.

The “**Coupon Payment Date**” means the 15th Index Business Day following each Coupon Valuation Date. The final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein.

The “**Coupon Record Date**” means the ninth Index Business Day following each Coupon Valuation Date.

The “**Coupon Ex-Date**,” with respect to a Coupon Amount, means the first Exchange Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the second Exchange Business Day prior to the applicable Coupon Record Date.

The "**Coupon Valuation Date**" means the 30th of March, June, September and December of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment as described herein..

The "**Reference Distribution Amount**" means as of any Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index constituent which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index constituent fails to pay the distribution to holders of such Index constituent by the scheduled payment date for such distribution, such distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The "**Reference Holder**" is, as of any date of determination, a hypothetical holder of a number of units of each Index constituent equal to (i) the published unit weighting of that Index constituent as of that date, as described under "MVIS US Business Development Companies Index — Float Adjustment," *divided by* (ii) the product of (a) the Divisor as of that date and (b) the Initial Index Level *divided by* 25.

"**record date**" means, with respect to a distribution on an Index constituent, the date on which a holder of the Index constituent must be registered as a unitholder of such Index constituent in order to be entitled to receive such distribution.

"**ex-dividend date**" means, with respect to a distribution on an Index constituent, the first Business Day on which transactions in such Index constituent trade on the Primary Exchange without the right to receive such distribution.

"**Business Day**" means any day that is not a Saturday, a Sunday or a day on which banking institutions in The City of New York, generally, are authorized or obligated by law, regulation or executive order to close.

The "**Annual Tracking Fee**" means, as of any date of determination, an amount per Security equal to the product of (i) 0.85% per annum and (ii) the Current Indicative Value as of the immediately preceding Index Business Day.

The "**Current Indicative Value**," as determined by the Security Calculation Agent, means, as of any date of determination, an amount per Security equal to the product of (i) the Stated Principal Amount *times* (ii) the Index Performance Ratio (as defined under "— Cash Settlement Amount at Maturity") as of such date, using the Index Closing Level on such date as the Final Index Level. As of July 30, 2021, the Current Indicative Value was $19.3744.

The "**Accrued Tracking Fee**" is:

(1) with respect to the first Coupon Valuation Date, an amount equal to the product of

   (a) the Annual Tracking Fee calculated as of the first Coupon Valuation Date, and

   (b) a fraction, the numerator of which is the total number of calendar days from and excluding September 30, 2015 to and including such Coupon Valuation Date, and the denominator of which is 365;

   and

(2) with respect to any Coupon Valuation Date other than the first Coupon Valuation Date, an amount equal to

   (a) the product of

      (i) the Annual Tracking Fee as of such Coupon Valuation Date, and

      (i) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date, and the denominator of which is 365, *plus*

   (b) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date. If there is a Tracking Fee Shortfall on the last Coupon Valuation Date, it will be taken into account in determining the Cash Settlement Amount, as described below.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the Index Closing Level.

**Cash Settlement Amount at Maturity**

For each Security, unless earlier called or redeemed, you will receive at maturity a cash payment equal to

(a) the product of

(i) the Stated Principal Amount and

(ii) the Index Performance Ratio as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount, *minus*

(c) the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the "Cash Settlement Amount." If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

**You may lose some or all of your investment at maturity. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the increase in the level of the Index (as measured by the Final Index Level, as compared to the Initial Index Level) is insufficient to offset the negative effect of the Accrued Tracking Fee (*less* any Coupon Amounts, any Stub Reference Distribution Amount and/or Adjusted Coupon Amount, as applicable, you may be entitled to receive) or if the Final Index Level is less than the Initial Index Level, you may lose some or all of your investment at maturity.**

The "Stated Principal Amount" of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices, which may be significantly higher or lower than the Stated Principal Amount.

The Index Performance Ratio on any Index Business Day is calculated as follows:

$$\frac{\text{Final Index Level}}{\text{Initial Index Level}}$$

The "**Initial Index Level**" is adjusted on the Effective Date to be equal to (a) the Index Closing Level of the Index on the Effective Date *multiplied by* (b) (i) 904.113 (the original Initial Index Level) *divided by* (ii) the Index Closing Level of the Original Index on the Effective Date. The adjusted Initial index Level is 692.808593.

As determined by the Security Calculation Agent, the "Final Index Level" is the arithmetic mean of the Index Closing Levels measured on each Index Business Day during the Final Measurement Period or the Call Measurement Period, or the Index Closing Level on any Redemption Valuation Date; provided that if the Redemption Valuation Date falls in the Call Measurement Period or the Final Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Final Index Level on any date of determination during the Call Measurement Period or the Final Measurement Period shall equal (a) 1/10 *times* (b) (i) the sum of the Index Closing Levels on each Index Business Day from and including the Call Valuation Date or the Calculation Date, as applicable, to but excluding the date of determination *plus* (ii) the number of Index Business Days from and including the date of determination to and including the last Index Business Day in the Call Measurement Period or the Final Measurement Period, as applicable, *times* the Index Closing Level on the date of determination.

The "**Index Closing Level**" is the closing level of the Index as reported on Bloomberg.

The "**Accrued Tracking Fee**" as of the last Index Business Day in the Final Measurement Period is an amount equal to

(a) the product of

(i) the Annual Tracking Fee calculated as of the last Index Business Day in the Final Measurement

(ii) Period and

(iii) a fraction, the numerator of which is the total number of calendar days from and excluding the Calculation Date to and including the last Index Business Day in the Final Measurement Period, and the denominator of which is 365, *plus*

(b) the Tracking Fee Shortfall as of the last Coupon Valuation Date, if any.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the Index Closing Level.

The "**Final Measurement Period**" means the ten Index Business Days from and including the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

The "**Stub Reference Distribution Amount**" means, as of the last Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent, for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the first Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, to and including the last Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold nine-tenths, eight-tenths, seven-tenths, six-tenths, five-tenths, four-tenths, three-tenths, two-tenths and one-tenth of the shares of each Index constituent it would otherwise hold on the second, third, fourth, fifth, sixth, seventh, eighth, ninth and tenth Index Business Day, respectively, in such Final Measurement Period or Call Measurement Period.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is Solactive AG as of market close on July 30, 2021.

The "**Calculation Date**" means April 9, 2041, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

"**Index Business Day**" means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

"**Exchange Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading and is also a valid settlement date.

"**Business Day**" means any day that is not a Saturday, a Sunday or a day on which banking institutions in The City of New York, generally, are authorized or obligated by law, regulation or executive order to close.

"**Primary Exchange**" means, with respect to each Index constituent or each constituent underlying a successor index, the primary exchange or market of trading such Index constituent or such constituent underlying a successor index.

**"Related Exchange"** means, with respect to each Index constituent or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index constituent or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is linked to the performance of the MVIS US Business Development Companies Index, the successor index to the Wells Fargo® Business Development Company Index (the "**Original Index**") effective after market close on the July 30, 2021 (the "**Effective Date**"). On April 26, 2021, the Security Calculation Agent announced that, pursuant to the terms of the Securities, it has determined that the Index is comparable to the Original Index and approved the Index as the successor index for the Securities following the discontinuation of publication of the Original Index. The Index is intended to measure the performance of the largest and most liquid companies which are treated as business development companies and are incorporated in the United States. The "**Index Sponsor**" is MV Index Solutions GmbH.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request on any Business Day during the term of the Securities to have us redeem your Securities ("**Redemption Notice**") on any Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption ("**Redemption Confirmation**") by no later than 5:00 p.m., New York City time, on any Business Day, provided that you request that we redeem a minimum of 50,000 Securities. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities; however, there can be no assurance that they can or will do so. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 50,000 Securities. Any such reduction will be applied on a consistent basis for all holders of the Securities at the time the reduction becomes effective.

The Securities will be redeemed and the holders will receive payment for their Securities on the third Business Day following the applicable Redemption Valuation Date (the "Redemption Date"). The final Redemption Date will be April 18, 2041; provided that if a call notice has been issued, the last Redemption Valuation Date is the fifth Index Business Day prior to the Call Settlement Date in connection with the call notice. (See "Specific Terms of the Securities — UBS's Call Right"). If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index constituents, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

For any applicable redemption request, the "Redemption Valuation Date" will be the first Index Business Day following the date that the applicable Redemption Notice and Redemption Confirmation are delivered. You may request that UBS AG accelerate the Redemption Valuation Date to the date on which you deliver the applicable Redemption Notice and Redemption Confirmation instead of the Index Business Day following such date. If UBS AG approves such request, in its sole discretion on a case-by-case basis, the Redemption Valuation Date for such redemption shall be the date on which you deliver the applicable Redemption Notice and Redemption Confirmation instead of the Index Business Day following such date. You should not assume that you will be entitled to any such acceleration. UBS AG will be under no obligation to approve any such request, or to make any announcement regarding any decision by it to approve any such request.

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

(a) the product of

  (i) the Stated Principal Amount and

  (ii) the Index Performance Ratio as of the Redemption Valuation Date, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Redemption Valuation Date if on the Redemption Valuation Date the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *plus*

(c) the Adjusted Coupon Amount, if any, *minus*

(d) the Adjusted Tracking Fee Shortfall, if any, as of the Redemption Valuation Date, *minus*

(e) the Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**."

For purposes of calculating the Redemption Amount, either the Adjusted Coupon Amount will be included or the Adjusted Tracking Fee Shortfall will be subtracted, but not both.

If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

**You may lose some or all of your investment upon early redemption. The combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount will reduce your final Redemption Amount. If the level of the Index (as measured by the Final Index Level, as compared to the Initial Index Level) does not increase by an amount sufficient to offset the combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount (*less* any Coupon Amounts, any Stub Reference Distribution Amount, as applicable, and/or any Adjusted Coupon Amount you may be entitled to receive) or if the Final Index Level is less than the Initial Index Level, you may lose some or all of your investment upon early redemption.**

The "Adjusted Coupon Amount," with respect to any Redemption Valuation Date, is an amount in cash equal to the difference between the Adjusted Reference Distribution Amount, calculated as of the applicable Redemption Valuation Date, and the Adjusted Tracking Fee, calculated as of such Redemption Valuation Date, to the extent that the Adjusted Reference Distribution Amount, calculated as of such Redemption Valuation Date, is greater than or equal to the Adjusted Tracking Fee, calculated as of such Redemption Valuation Date.

The “Adjusted Reference Distribution Amount,” as of any Redemption Valuation Date, is an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the “record date” with respect to an Index constituent, for those cash distributions whose “ex-dividend date” occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including such Redemption Valuation Date.

The “**Adjusted Tracking Fee**” is, as of the Call Valuation Date or any Redemption Valuation Date, as applicable, an amount equal to:

(a) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date, *plus*

(b) the product of

(i) the Annual Tracking Fee as of such Redemption Valuation Date or Call Valuation Date and

(ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Redemption Valuation Date or Call Valuation Date, and the denominator of which is 365.

The “**Adjusted Tracking Fee Shortfall,**” as of any Redemption Valuation Date, is the difference between the Adjusted Tracking Fee and the Adjusted Reference Distribution Amount, to the extent that the Adjusted Reference Distribution Amount, calculated as of such Redemption Valuation Date, is less than the Adjusted Tracking Fee, calculated as of such Redemption Valuation Date.

The “**Redemption Fee Amount**” means, as of any date of determination, an amount per Security equal to the product of (i) 0.125% and (ii) the Current Indicative Value as of the immediately preceding Index Business Day.

*Some of the defined terms used in this section have different applications when used in determining the Call Settlement Amount. For the definitions of the terms relevant to a call, please refer to “— UBS’s Call Right”.*

We discuss redemption in “Medium-Term Notes, Series B” above under “Description of Debt Securities We May Offer — Redemption and Repayment.”

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption to UBS via email no later than 12:00 noon, New York City time, on the Business Day immediately preceding the applicable Redemption Valuation Date. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption to us via facsimile in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m., New York City time, on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon, New York City time, or your confirmation of redemption after 5:00 p.m., New York City time, on the Business Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than 18 calendar days' prior notice to the holders of the Securities, such redemption to occur on any Exchange Business Day (or if such day is not an Exchange Business Day, the next Exchange Business Day) that we may specify through and including the Maturity Date (the "Call Settlement Date"). Upon early redemption in the event we exercise this right, you will receive a cash payment equal to:

(a) the product of

(i) the Stated Principal Amount and (ii) the Index Performance Ratio as of the last Index Business

Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *plus*

(c) the Adjusted Coupon Amount, if any, *minus*

(d) the Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period, *plus*

(e) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "Call Settlement Amount."

If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero.

If UBS issues a call notice on any calendar day, the "Call Valuation Date" will be the fifth Business Day following the calendar day on which the call notice is issued.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "Call Settlement Date"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index constituents, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "Call Measurement Period" means the ten Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

**You may lose some or all of your investment upon a call. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the level of the Index (as measured by the Final Index Level, as compared to the Initial Index Level) is insufficient to offset the negative effect of the Accrued Tracking Fee (*less* any Coupon Amounts, any Stub Reference Distribution Amount and/or any Adjusted Coupon Amount, you may be entitled to receive) or if the Final Index Level is less than the Initial Index Level, you may lose some or all of your investment upon a call.**

The "**Accrued Tracking Fee**" as of the last Index Business Day in the Call Measurement Period is an amount equal to:

(a) the product of

(i) the Annual Tracking Fee calculated as of the last Index Business Day in the Call Measurement Period, and

(ii) a fraction, the numerator of which is the total number of calendar days from and excluding the Call Valuation Date to and including the last Index Business Day in the Call Measurement Period, and the denominator of which is 365, *plus*

(b) the Adjusted Tracking Fee Shortfall (as defined below), if any.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the Index Closing Level.

The "Adjusted Coupon Amount," with respect to the Call Valuation Date, is an amount in cash equal to the difference between the Adjusted Reference Distribution Amount (as defined below), calculated as of the Call Valuation Date, and the Adjusted Tracking Fee (as defined below), calculated as of the Call Valuation Date, to the extent that the Adjusted Reference Distribution Amount, calculated as of the Call Valuation Date, is greater than or equal to the Adjusted Tracking Fee, calculated as of the Call Valuation Date.

The "Adjusted Reference Distribution Amount," as of the Call Valuation Date, is an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to an Index constituent, for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including the Call Valuation Date.

The "**Adjusted Tracking Fee**", as of the Call Valuation Date, is an amount equal to

(a) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date *plus*

(b) the product of

  (i) the Annual Tracking Fee as of such Call Valuation Date and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Call Valuation Date, and the denominator of which is 365.

The "**Adjusted Tracking Fee Shortfall**," as of the Call Valuation Date, is the difference between the Adjusted Tracking Fee and the Adjusted Reference Distribution Amount, to the extent that the Adjusted Reference Distribution Amount, calculated as of the Call Valuation Date, is less than the Adjusted Tracking Fee, calculated as of the Call Valuation Date.

*Some of the defined terms used in this section have different applications when used in determining the Redemption Amount. For the definition of the terms relevant to early redemption, please refer to "— Early Redemption at the Option of the Holders".*

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will determine, among other things, the Current Indicative Value, the Final Index Level, the Index Performance Ratio, the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Annual Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Final Measurement Period, the Coupon Payment Dates, the Coupon Valuation Dates, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Call Settlement Date, the Call Valuation Date, the Call Measurement Period and the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, and whether any day is a Business Day, Index Business Day or Exchange Business Day. The Security Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the Index has been discontinued and whether there has been a material change in the Index. All determinations made by the Security Calculation Agent will be at the sole discretion of the Security Calculation Agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different Security Calculation Agent from time to time without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity or call, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Annual Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate stated principal amount of Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on an Averaging Date (as defined below) or on a Redemption Valuation Date, the Index Closing Level for such Averaging Date or Redemption Valuation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing (the "Deferred Averaging Date") with respect to the Index irrespective of whether pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on the Index Business Days during the Final Measurement Period or the Call Measurement Period, or on the Redemption Valuation Date, as applicable, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the Final Measurement Period or Call Measurement Period, as applicable, for purposes of calculating the Cash Settlement Amount or Call Settlement Amount, respectively, is based on the arithmetic mean of the Index Closing Levels on October 3, October 4, October 5, October 6, October 7, October 10, October 11, October 12, October 13 and October 14, and there is a Market Disruption Event with respect to the Index on October 3, but no other Market Disruption Event during the Final Measurement Period or the Call Measurement Period, as applicable, then the Index Closing Level on October 4 will be used twice to calculate the Cash Settlement Amount or Call Settlement Amount, respectively, and such Cash Settlement Amount or Call Settlement Amount, as applicable, will be determined based on the arithmetic mean of the Index Closing Levels on October 4, October 4, October, 5, October 6, October 7, October 10, October 11, October 12, October 13 and October 14.

If the Redemption Valuation Date for purposes of calculating a Redemption Amount is based on the Index Closing Level on October 3, 2016 and there is a Market Disruption Event with respect to the Index on October 3, 2016, then the Index Closing Level on October 4, 2016 will be used to calculate the Redemption Amount.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or the Redemption Valuation Date, as applicable, occurring more than three Index Business Days following the day originally scheduled to be such final Averaging Date or Redemption Valuation Date. If the third Index Business Day following the date originally scheduled to be the final Averaging Date, or the Redemption Valuation Date, as applicable, is not an Index Business Day or a Market Disruption Event has occurred or is continuing with respect to the Index on such third Index Business Day, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such third Index Business Day but for such Market Disruption Event.

An "Averaging Date" means each of the Index Business Days during the Final Measurement Period or the Call Measurement Period, as applicable, subject to adjustment as described herein.

Notwithstanding the occurrence of one or more of the events below, which may, in the Security Calculation Agent's discretion, constitute a Market Disruption Event with respect to the Index, the Security Calculation Agent in its discretion may waive its right to postpone the Index Closing Level if it determines that one or more of the below events has not and is not likely to materially impair its ability to determine the Index Closing Level on such date.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

(a) suspension, absence or material limitation of trading in a material number of Index constituents for more than two hours or during the one-half hour before the close of trading in the applicable market or markets;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index constituent equity interests in the primary market or markets for those contracts for more than two hours of trading or during the one-half hour before the close of trading in that market;

(c) the Index is not published; or

(d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging."

The following events will not be Market Disruption Events with respect to the Index:

(a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

(b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index constituent equity interests.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index constituent equity interests are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in "Medium-Term Notes, Series B" above. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium- Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars for the principal of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, *plus*
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuation of the Index; Alteration of Method of Calculation**

If the Index Sponsor or the Index Calculation Agent discontinues publication of or otherwise fails to publish the Index, and the Index Sponsor, the Index Calculation Agent or another entity publishes a successor or substitute index that the Security Calculation Agent determines to be comparable to the discontinued Index (such index being referred to herein as a "**successor index**"), then the Index Closing Level for such successor index will be determined by the Security Calculation Agent by reference to the successor index on the dates and at the times as of which the Index Closing Levels for such successor index are to be determined.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor or the Index Calculation Agent discontinues publication of the Index prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or Call Measurement Period, or on the Redemption Valuation Date, as applicable, or any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on, the Calculation Date or any Index Business Day during the Final Measurement Period or Call Measurement Period, or on the Redemption Valuation Date, as applicable, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the closing level and published share weighting of each Index constituent included in the Index or successor index, as applicable, immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions as described under "MVIS US Business Development Companies Index — Corporate Events."

In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at a level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the levels for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Current Indicative Value, the Final Index Level, the Index Performance Ratio, the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Annual Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon redemption, if applicable, or the Call Settlement Amount that we will pay you on the Call Settlement Date, if applicable, based on the relevant index levels calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (e.g., due to a split in the Index), which, in turn, causes the level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at a level for the Index or such successor index as if it had not been modified (e.g., as if such split had not occurred).

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity or call, or upon early redemption will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B".

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B", any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Defeasance**

Neither full defeasance nor covenant defeasance, as described in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Defeasance and Covenant Defeasance," will apply to the Securities.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate stated principal amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed such amount at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in "Medium-Term Notes, Series B".

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate stated principal amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 8. ETRACS Alerian MLP Index ETN Series B due July 18, 2042

### Specific Terms of the Securities

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("DTC") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" under "Medium-Term Notes, Series B" above. The terms described here supplement those described in "Medium-Term Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015, between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity or call, or upon early redemption. Instead, at maturity, you will receive a cash payment the amount of which will vary depending on the performance of the VWAP Level calculated in accordance with the formula set forth below and will be reduced by the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period. We refer to this cash payment as the "Cash Settlement Amount." If the amount so calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment on the Redemption Date equal to the Redemption Amount as described below under "— Early Redemption at the Option of the Holders."

The Securities may pay a cash coupon during their term.

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the excess, if any, of the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date, over the Accrued Tracking Fee, calculated as of the corresponding Coupon Valuation Date (the "Coupon Amount").

To the extent the Reference Distribution Amount on any Coupon Valuation Date is equal to or less than the Accrued Tracking Fee on the corresponding Coupon Valuation Date, there will be no Coupon Amount payment made on the corresponding Coupon Payment Date, and an amount equal to the difference between the Accrued Tracking Fee and the Reference Distribution Amount (the "Tracking Fee Shortfall") will be included in the Accrued Tracking Fee for the next Coupon Valuation Date. This process will be repeated to the extent necessary until the Reference Distribution Amount for a Coupon Valuation Date is greater than the Accrued Tracking Fee for the corresponding Coupon Valuation Date. The final Coupon Amount will be included in the Cash Settlement Amount.

The "Coupon Payment Date" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date, provided that the final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein. The first Coupon Payment Date will be December 8, 2015.

The "Coupon Record Date" means the ninth (9th) Index Business Day following each Coupon Valuation Date.

The "Coupon Ex-Date," with respect to a Coupon Amount, means the first (1st) Exchange Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the second (2nd) Exchange Business Day prior to the applicable Coupon Record Date.

The "Coupon Valuation Date" means the fifteenth (15th) of February, May, August and November of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment as described herein. The first Coupon Valuation Date will be November 16, 2015.

The "Reference Distribution Amount" means (i) as of the first Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent, for those cash distributions whose "ex-dividend date" occurs during the period from and excluding August 17, 2015 to and including the first Coupon Valuation Date; and (ii) as of any other Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index constituent which are scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index constituent fails to pay the distribution to holders of such Index constituent by the scheduled payment date for such distribution, such distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The "Reference Holder" is, as of any date of determination, a hypothetical holder of a number of units of each Index constituent equal to (i) the published unit weighting of that Index constituent as of that date, *divided by* (ii) the product of (a) the Index Divisor as of that date, and (b) the Initial VWAP Level *divided by* 25.

"record date" means, with respect to a distribution on an Index constituent, the date on which a holder of the Index constituent must be registered as a unitholder of such Index constituent in order to be entitled to receive such distribution.

"ex-dividend date" means, with respect to a distribution on an Index constituent, the first Business Day on which transactions in such Index constituent trade on the Primary Exchange without the right to receive such distribution.

The "Quarterly Tracking Fee" means, as of any date of determination, an amount per Security equal to the product of (i) 0.20% (equivalent to 0.80% per annum) and (ii) the Current Indicative Value as of the immediately preceding Index Business Day.

The "Current Indicative Value," as determined by the Security Calculation Agent, means, as of any date of determination, an amount per Security equal to the product of (i) the Stated Principal Amount *multiplied by* (ii) a fraction, the numerator of which is equal to the VWAP Level (as defined under "— Cash Settlement Amount at Maturity") as of such date and the denominator of which is equal to the Initial VWAP Level. As of October 7, 2015, the Current Indicative Value was 21.4587.

The "Accrued Tracking Fee" is:

(1) with respect to the first Coupon Valuation Date, an amount equal to

the Quarterly Tracking Fee calculated as of the first Coupon Valuation Date (for the avoidance of doubt, the calculation of the Accrued Tracking Fee with respect to the first Coupon Valuation Date will be for a full quarter beginning from and excluding August 17, 2015);

(2) with respect to any Coupon Valuation Date, other than the first and last Coupon Valuation Dates, an amount equal to the Quarterly Tracking Fee as of such Coupon Valuation Date, *plus* the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date, if any; and

(3) with respect to the last Coupon Valuation Date, an amount equal to

    (a) the product of

        (i) the Quarterly Tracking Fee as of such Coupon Valuation Date and

        (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date, and the denominator of which is 90, *plus*

    (b) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date. If there is a Tracking Fee Shortfall on the last Coupon Valuation Date, it will be taken into account in determining the Cash Settlement Amount, as described below.

The calculation of the Accrued Tracking Fee also takes into account the performance of the Index, as measured by the VWAP Level.

**Cash Settlement Amount at Maturity**

The “Maturity Date” is July 18, 2042, which will be the third Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under “— Market Disruption Event.”

For each Security, unless earlier called or redeemed, you will receive at maturity a cash payment equal to

(a) the product of

(i) the Stated Principal Amount and

(ii) the Index Performance Ratio as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount, *minus*

(c) the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the “Cash Settlement Amount.” If the amount calculated above is equal to or less than zero, the payment at maturity will be zero.

**You may lose some or all of your investment at maturity. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the level of the Index increases (as measured by the Final VWAP Level, as compared to the Initial VWAP Level), such increase may be insufficient to offset the negative effect of the Accrued Tracking Fee (less any Coupon Amounts, Stub Reference Distribution Amount and/ or Adjusted Coupon Amount, as applicable, you may be entitled to receive), or if the Final VWAP Level is less than the Initial VWAP Level, you may lose some or all of your investment at maturity.**

The “Stated Principal Amount” of each Security is $25.00.

The “Index Performance Ratio” on any Index Business Day is calculated as follows:

$$\frac{\text{Final VWAP Level}}{\text{Initial VWAP Level}}$$

The “VWAP” with respect to each Index constituent, as of any date of determination, is the volume-weighted average price of one unit of such Index constituent as determined by the VWAP Calculation Agent based on the Primary Exchange for each Index constituent. For information about how the VWAP will be calculated to the extent a Disrupted Day exists with respect to an Index constituent, please see “— Market Disruption Event.”

The “Initial VWAP Level” is 396.997, the VWAP Level on July 17, 2012, as determined by the VWAP Calculation Agent. See “— VWAP Calculation Agent” below.

The “Final VWAP Level,” as determined by the VWAP Calculation Agent, will be the arithmetic mean of the VWAP Levels measured on each Index Business Day during the Final Measurement Period or the Call Measurement Period or on any applicable Redemption Measurement Date, as applicable.

The “VWAP Level,” as determined by the VWAP Calculation Agent as of any Index Business Day, is equal to (1) the sum of the products of (i) the VWAP of each Index constituent as of such date and (ii) the published unit weighting of that Index constituent as of such date *divided by* (2) the Index Divisor as of such date, or expressed as a formula, as follows:

$$\textbf{VWAP Level} = \frac{\sum_{i=1}^{n}(VWAP_{i,t} * W_{i,t})}{\textit{Index Divisor}_t}$$

where:

*n* is the number of Index constituents;

*VWAPi,t* is the VWAP of Index constituent *i* as of Index Business Day *t*;

*Wi*, *t* is the published unit weighting of Index constituent *i* as of Index Business Day *t*; and

*Index Divisor t* is the Index Divisor as of Index Business Day t.

As of October 7, 2015, the VWAP Level was 340.761.

The "Index Divisor," as of any date of determination, is the divisor used by the Index Calculation Agent to calculate the level of the Index, as further described under "Alerian MLP Index — Index Equations".

The "Accrued Tracking Fee" as of the last Index Business Day in the Final Measurement Period is an amount equal to

(a) the product of

  (i) the Quarterly Tracking Fee calculated as of the last Index Business Day in the Final Measurement Period and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the Calculation Date to and including the last Index Business Day in the Final Measurement Period, and the denominator of which is 90, *plus*

(b) the Tracking Fee Shortfall as of the last Coupon Valuation Date, if any.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the VWAP Level.

The "Final Measurement Period" means the five (5) Index Business Days from and including the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

The "Stub Reference Distribution Amount" means, as of the last Index Business Day in the Final Measurement Period or the Call Measurement Period, as applicable, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent, for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the first Index Business Day in the Final Measurement Period or the Call Measurement Period, as applicable, to and including the last Index Business Day in the Final Measurement Period or the Call Measurement Period, as applicable, provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold 4/5 ths, 3/5 ths, 2/5 ths and 1/5 th of the shares of each Index constituent it would otherwise hold on the second, third, fourth and fifth Index Business Day, respectively, in such Final Measurement Period or the Call Measurement Period.

The "Index Calculation Agent" means the entity that calculates and publishes the level of the Index, which is currently S&P.

The "Calculation Date" means July 9, 2042, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

"Index Business Day" means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

"Exchange Business Day" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"Primary Exchange" means, with respect to each Index constituent or each constituent underlying a successor index, the primary exchange or market of trading such Index constituent or such constituent underlying a successor index.

"Related Exchange" means, with respect to each Index constituent or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index constituent or such constituent underlying a successor index.

**Underlying Index**

The Alerian MLP Index measures the composite performance of energy master limited partnerships ("MLPs"), and is calculated by S&P Dow Jones Indices using a float-adjusted, capitalization-weighted methodology. We refer to the MLPs included in the Index as the "Index constituents." The Index constituents earn the majority of their cash flow from qualifying activities involving energy commodities, which include pipeline transportation, gathering and processing, storage, production and mining, marketing, marine transportation, services, catalytic conversion, mineral interest, refining, regasification and other related activities.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the applicable Redemption Notice Date, provided that you request that we redeem a minimum of 50,000 Securities. For any applicable redemption request, the "Redemption Notice Date" will be the date that the applicable Redemption Notice and Redemption Confirmation are delivered. If such Redemption Notice or Redemption Confirmation is delivered on a day that is not an Index Business Day, then the Redemption Notice Date shall be the next Index Business Day. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. We may from time to time in our sole discretion reduce, in part or in whole, the minimum redemption amount of 50,000 Securities. Any such reduction will be applied on a consistent basis for all holders of the Securities at the time the reduction becomes effective.

The Securities will be redeemed and the holders will receive payment for their Securities on the third Business Day following the applicable Redemption Measurement Date (the "Redemption Date"). The first Redemption Date will be October 15, 2015. If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Measurement Date with respect to any of the Index constituents, such Redemption Measurement Date may be postponed as described under "— Market Disruption Event."

The applicable "Redemption Measurement Date" means the Index Business Day following the applicable Redemption Notice Date, subject to adjustments as described under "— Market Disruption Event."

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to

(a) the product of

  (i) the Stated Principal Amount and

  (ii) the Index Performance Ratio as of the Redemption Measurement Date, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Redemption Measurement Date if on the Redemption Measurement Date the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *plus*

(c) the Adjusted Coupon Amount, if any, *minus*

(d) the Adjusted Tracking Fee Shortfall, if any, *minus*

(e) the Redemption Fee Amount.

We refer to this cash payment as the "Redemption Amount." We have determined to offer all holders of the Securities the option, upon early redemption and solely for purposes of determining the Redemption Amount, but not for any other purpose, to elect that the Index Performance Ratio (which is used to calculate the Redemption Amount) be calculated using the Index Closing Level on the Redemption Measurement Date instead of the Final VWAP Level. If the redeeming holder so elects, the Index Performance Ratio will be calculated, for purposes of determining the Redemption Amount, as:

$$\frac{\text{Index Closing Level on the Redemption Measurement Date}}{\text{Initial VWAP Level}}$$

The “Index Closing Level” is the closing level of the Index as reported on the NYSE and Bloomberg; provided, however, that if the closing level of the Index as reported on the NYSE (or any successor) differs from the closing level of the Index as reported on Bloomberg (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent.

If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Measurement Date.

**You may lose some or all of your investment upon early redemption. The combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount will reduce your final Redemption Amount. If the level of the Index (as measured by the Final VWAP Level) does not increase as compared to the Initial VWAP Level by an amount sufficient to offset the combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount (less any Coupon Amounts, any Stub Reference Distribution Amount, as applicable, and/or any Adjusted Coupon Amount you may be entitled to receive), you may lose some or all of your investment upon early redemption.**

The “Adjusted Coupon Amount,” with respect to any Redemption Measurement Date, is an amount in cash equal to the difference between the Adjusted Reference Distribution Amount, calculated as of such Redemption Measurement Date, and the Adjusted Tracking Fee, calculated as of such Redemption Measurement Date. To the extent the Adjusted Reference Distribution Amount is less than the Adjusted Tracking Fee, the Redemption Amount will not include an Adjusted Coupon Amount, and the Adjusted Tracking Fee Shortfall will be included in the calculation of Redemption Amount.

The “Adjusted Reference Distribution Amount,” as of any Redemption Measurement Date, is an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the “record date” with respect to an Index constituent, for those cash distributions whose “ex-dividend date” occurs during the period from and excluding the immediately preceding Coupon Valuation Date (or if the Redemption Measurement Date occurs prior to the first Coupon Valuation Date, the period from and excluding August 17, 2015) to and including such Redemption Measurement Date.

The “Adjusted Tracking Fee” is:

(1) as of any Redemption Measurement Date occurring prior to the first Coupon Valuation Date, an amount equal to the product of

    (i) the Quarterly Tracking Fee as of such Redemption Measurement Date and

    (ii) a fraction, the numerator of which is the total number of calendar days from and excluding August 17, 2015 to and including such Redemption Measurement Date, and the denominator of which is 90; and

(2) as of any Redemption Measurement Date occurring on or after the first Coupon Valuation Date, an amount equal to

    (a) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date *plus*

    (b) the product of

        (i) the Quarterly Tracking Fee as of such Redemption Measurement Date and

        (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Redemption Measurement Date, and the denominator of which is 90.

The “Adjusted Tracking Fee Shortfall,” as of any Redemption Measurement Date, is the difference between the Adjusted Tracking Fee and the Adjusted Reference Distribution Amount, to the extent that the Adjusted Reference Distribution Amount, calculated as of such Redemption Measurement Date, is less than the Adjusted Tracking Fee, calculated as of such Redemption Measurement Date.

The “Redemption Fee Amount” means an amount equal to 0.125% of the Current Indicative Value.

*Some of the defined terms used in this section have different applications when used in determining the Call Settlement Amount. For the definitions of the terms relevant to a call, please refer to “— UBS Call Right.”*

We discuss redemption in " Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Redemption and Repayment".

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the repurchase feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption to UBS via e-mail no later than 12:00 noon, New York City time, on the applicable Redemption Notice Date. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "Redemption Confirmation," to us via facsimile in the specified form by 5:00 p.m., New York City time on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Measurement Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 10:00 a.m., New York City time, on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon, New York City time, or your confirmation of redemption after 5:00 p.m., New York City time, on the applicable Redemption Notice Date, your notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

**UBS Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen calendar days' prior notice to the holders of the Securities, such redemption to occur on any Business Day that we may specify on or after October 17, 2016 through and including the Maturity Date (the "Call Settlement Date"). Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of

(i) the Stated Principal Amount and

(ii) the Index Performance Ratio as of the last Index Business Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *plus*

(c) the Adjusted Coupon Amount, if any, *minus*

(d) the Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period, *plus*

(e) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "Call Settlement Amount."

If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero.

If UBS issues a call notice on any calendar day, the "Call Valuation Date" will be the last Business Day of the week in which the call notice is issued, generally Friday, subject to a minimum five (5) calendar day period commencing on the date of the issuance of the call notice and ending on the related Call Valuation Date. If UBS issues a call notice on a Friday, the related

Call Valuation Date will fall on the following Friday. The Call Settlement Date will be the third Business Day following the last Index Business Day in the Call Measurement Period.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "Call Settlement Date"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index constituents, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "Call Measurement Period" means the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

**You may lose some or all of your investment upon a call. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the increase in the Final VWAP Level, as compared to the Initial VWAP Level, is insufficient to offset the negative effect of the Accrued Tracking Fee (less any Coupon Amounts, any Stub Reference Distribution Amount and/or any Adjusted Coupon Amount), or if the Final VWAP Level is less than the Initial VWAP Level, you may lose some or all of your investment upon a call.**

The Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period is an amount equal to

(a) the product of

  (i) the Quarterly Tracking Fee calculated as of the last Index Business Day in such Call Measurement Period, and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the Call Valuation Date to and including the last Index Business Day in such Call Measurement Period, and the denominator of which is 90, *plus*

(b) the Adjusted Tracking Fee Shortfall (as defined below), if any.

The Accrued Tracking Fee also takes into account the performance of the Index, as measured by the VWAP Level.

The "Adjusted Coupon Amount," with respect to the Call Valuation Date, is an amount in cash equal to the difference between the Adjusted Reference Distribution Amount (as defined below), calculated as of the Call Valuation Date, and the Adjusted Tracking Fee (as defined in the preceding paragraph), calculated as of such Call Valuation Date. To the extent the Adjusted Reference Distribution Amount is less than the Adjusted Tracking Fee, the Call Settlement Amount will not include an Adjusted Coupon Amount, and the Adjusted Tracking Fee Shortfall (as defined below) will be included in the calculation of the Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period.

The "Adjusted Reference Distribution Amount," as of the Call Valuation Date, is an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to an Index constituent, for those cash distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including the Call Valuation Date.

The "Adjusted Tracking Fee" is:

as of the Call Valuation Date, an amount equal to

(a) the Tracking Fee Shortfall as of the immediately preceding Coupon Valuation Date, *plus*

(b) the product of

  (i) the Quarterly Tracking Fee as of such Call Valuation Date and

  (ii) a fraction, the numerator of which is the total number of calendar days from and excluding the immediately preceding Coupon Valuation Date to and including such Call Valuation Date, and the denominator of which is 90.

The “Adjusted Tracking Fee Shortfall,” as of the Call Valuation Date, is the difference between the Adjusted Tracking Fee and the Adjusted Reference Distribution Amount, to the extent that the Adjusted Reference Distribution Amount, calculated as of such Call Valuation Date, is less than the Adjusted Tracking Fee, calculated as of such Call Valuation Date.

*Some of the defined terms used in this section have different applications when used in determining the Redemption Amount. For the definition of the terms relevant to early redemption, please refer to “— Early Redemption at the Option of the Holders”.*

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will determine, among other things, the Current Indicative Value, Index Performance Ratio, the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Quarterly Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Final Measurement Period, the Coupon Payment Dates, the Coupon Valuation Dates, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Call Settlement Date, the Call Valuation Date, the Call Measurement Period and the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, and whether any day is a Business Day, Exchange Business Day or Index Business Day. The Security Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the Index has been discontinued and whether there has been a material change in the Index. All determinations made by the Security Calculation Agent will be at the sole discretion of the Security Calculation Agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. The holder of the Securities shall not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity or call, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 p.m., New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Quarterly Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Amount and Redemption Fee Amount, if any, per security, the Call Settlement Amount, if any, per security, and the Cash Settlement Amount, if any, per security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**VWAP Calculation Agent**

The NYSE will on each day that is not a Disrupted Day (as defined below) act as the VWAP Calculation Agent. The VWAP Calculation Agent will determine the VWAP of any Index constituent, the VWAP Level and the Final VWAP Level on any Index Business Day on which such VWAP, VWAP Level and Final VWAP Level are to be determined during the term of the Securities. The VWAP Calculation Agent determined the Initial VWAP Level of 396.997 as of July 17, 2012. All determinations made by the VWAP Calculation Agent will be at the sole discretion of the VWAP Calculation Agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different VWAP Calculation Agent from time to time without your consent and without notifying you.

All calculations with respect to the VWAP of any Index constituent, any VWAP Level and the Final VWAP Level will be rounded to the nearest thousandth, with five ten-thousandths rounded upward (*e.g.*, .8765 would be rounded to .877).

**Market Disruption Event**

To the extent a Disrupted Day (as defined below) exists with respect to an Index constituent on an Averaging Date (as defined below) or on a Redemption Measurement Date, the VWAP and published unit weighting with respect to such Index constituent (and only with respect to such Index constituent) for such Averaging Date or Redemption Measurement Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day that is not a Disrupted Day (the "Deferred Averaging Date") with respect to such Index constituent irrespective of whether pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the VWAP of a particular Index constituent being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the VWAP Levels on the Index Business Days during the Final Measurement Period or the Call Measurement Period, or on the Redemption Measurement Date, as applicable, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the VWAP and the published unit weighting with respect to such Index constituent for such Deferred Averaging Date to the calculation of the VWAP Level (i) on the date(s) of the original disruption with respect to such Index constituent and (ii) such Averaging Date. For example, if the Final Measurement Period or the Call Measurement Period, as applicable, for purposes of calculating the Cash Settlement Amount or Call Settlement Amount, respectively, is based on the arithmetic mean of the VWAP Levels on June 6, 2016, June 7, 2016, June 8, 2016, June 9, 2016 and June 10, 2016 and there is a Market Disruption Event for an Index constituent on June 6, 2016, but no other Market Disruption Event during the Final Measurement Period or the Call Measurement Period, as applicable, then the VWAP for such disrupted Index constituent on June 7, 2016 will be used more than once to calculate the Cash Settlement Amount or Call Settlement Amount, respectively, and such Cash Settlement Amount or Call Settlement Amount, as applicable, will be determined based on the arithmetic mean of the VWAP for such disrupted Index constituent on June 7, 2016, June 7, 2016, June 8, 2016, June 9, 2016 and June 10, 2016.

If the Redemption Measurement Date for purposes of calculating a Redemption Amount is based on the VWAP Level on June 6, 2016 and there is a Market Disruption Event for an Index constituent on June 6, 2016, then the VWAP for such disrupted Index constituent on June 7, 2016 will be used to calculate the Redemption Amount.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or the Redemption Measurement Date, as applicable, with respect to any Index constituent occurring more than three (3) Index Business Days following the day originally scheduled to be such final Averaging Date or Redemption Measurement Date. If the third Index Business Day following the date originally scheduled to be the final Averaging Date, or the Redemption Measurement Date, as applicable, is not an Index Business Day or is a Disrupted Day with respect to such Index constituent, the Security Calculation Agent or one of its affiliates will determine the VWAP and unit weighting with respect to any Index constituent required to be determined for the purpose of calculating the applicable VWAP Level based on its good faith estimate of the VWAP and unit weighting of each such Index constituent that would have prevailed on the Primary Exchange on such third Index Business Day but for such suspension or limitation.

An "Averaging Date" means each of the Index Business Days during the Final Measurement Period or the Call Measurement Period, as applicable, subject to adjustment as described herein.

A "Disrupted Day" with respect to any Index constituent is any Index Business Day on which the Primary Exchange or any Related Exchange fails to open for trading during its regular trading session or on which a Market Disruption Event has occurred and is continuing, and, in both cases, the occurrence of which is determined by the Security Calculation Agent to have a material effect on the VWAP Level.

With respect to an Index constituent, a "Market Disruption Event" means:

(a) the occurrence or existence of a condition specified below:

  (i) any suspension, absence or limitation of trading on the Primary Exchange for trading in the Index constituent, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

  (ii) any suspension, absence or limitation of trading on the Related Exchange for trading in futures or options contracts related to the Index constituent, whether by reason of movements in price exceeding limits permitted by such Related Exchange or otherwise, or

  (iii) any event (other than an event described in (b) below) that disrupts or impairs (as determined by the Security Calculation Agent) the ability of market participants in general (A) to effect transactions in, or obtain market values for, the relevant Index constituent or (B) to effect transactions in, or obtain market values for, futures or options contracts relating to the relevant Index constituent; or

(b) the closure on any Index Business Day of the Primary Exchange or any Related Exchange prior to its Scheduled Closing Time unless such earlier closing time is announced by the Primary Exchange or such Related Exchange at least one hour prior to the earlier of (i) the actual closing time for the regular trading session on the Primary Exchange or such Related Exchange on such Index Business Day and (ii) the submission deadline for orders to be entered into the Primary Exchange or such Related Exchange system for execution at the close of trading on such Index Business Day;

in each case determined by the Security Calculation Agent in its sole discretion; and

(c) a determination by the Security Calculation Agent in its sole discretion that the event described above materially interfered with our ability or the ability of any of our affiliates to adjust or unwind all or a material portion of any hedge with respect to the Securities.

For purposes of the above definition:

(a) a limitation on the hours or number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the Primary Exchange or Related Exchange, and

(b) for purposes of clause (a) above, limitations pursuant to the rules of any Primary Exchange or Related Exchange similar to NYSE Rule 80B or Nasdaq Rule 4120 (or any applicable rule or regulation enacted or promulgated by any other self-regulatory organization or any government agency of scope similar to NYSE Rule 80B or Nasdaq Rule 4120 as determined by the Security Calculation Agent) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading.

"Scheduled Closing Time" means, with respect to the Primary Exchange or the Related Exchange, on any Index Business Day, the scheduled weekday closing time of the Primary Exchange or such Related Exchange on such Index Business Day, without regard to after hours or any other trading outside of the regular trading session hours.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described in " Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Optional Tax Redemption". If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic position.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount." In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four (4) Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in Stated Principal Amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the "Medium-Term Notes, Series B" after a default or waiving some of our obligations under the indenture. We discuss these matters in " Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount in U.S. dollars for the principal of the Securities, as determined by the Security Calculation Agent in its sole discretion, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, *plus*
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two (2) Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third (3rd) Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third (3rd) Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two (2) Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and is rated either:

- A-1 or higher by S&P or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index; Alteration of Method of Calculation**

If S&P discontinues publication of or otherwise fails to publish the Index, or S&P does not make the Index constituents, their unit weighting and/or the Index Divisor available to the VWAP Calculation Agent, and the Index Sponsor, S&P or another entity publishes a successor or substitute index that the Security Calculation Agent determines to be comparable to the discontinued Index and for which the Index constituents, their unit weighting, and/or the Index Divisor are available to the VWAP Calculation Agent (such index being referred to herein as a "successor index"), then the VWAP Level for such successor index will be determined by the VWAP Calculation Agent by reference to the sum of the products of the VWAPs of the components underlying such successor index on the Primary Exchanges and each such component's respective weighting within the successor index (which sum will be adjusted by any index divisor used by such successor index) on the dates and at the times as of which the VWAP Levels for such successor index are to be determined.

Upon any selection by the Security Calculation Agent of a successor Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If S&P discontinues publication of the Index or does not make the Index constituents, their unit weightings and/or Index Divisor available to the VWAP Calculation Agent prior to, and such discontinuation or unavailability is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or the Call Measurement Period, or on the Redemption Measurement Date, as applicable, or any other relevant date on which the VWAP Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or the Call Measurement Period, or on the Redemption Measurement Date, as applicable, or any other relevant date on which the VWAP Level is to be determined, then the Security Calculation Agent will determine the relevant VWAP Levels using the VWAP and published unit weighting of each Index constituent included in the Index or successor index, as applicable, immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions as described under "Alerian MLP Index — Index Rebalancings." In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the VWAP Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the VWAP Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at a VWAP level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the VWAP Levels for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Final VWAP Level, the Current Indicative Value, the Index Performance Ratio, the Coupon Amount, the Adjusted Coupon Amount, if any, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Adjusted Reference Distribution Amount, the Accrued Tracking Fee (including the Quarterly Tracking Fee, any Tracking Fee Shortfall and any Adjusted Tracking Fee Shortfall), the Adjusted Tracking Fee, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, and the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, based on the relevant VWAP Levels calculated by the VWAP Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the VWAP Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at a VWAP Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity or call, or upon early redemption will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in " Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities".

**Modified Business Day**

As described in " Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities", any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate principal amount specified on the cover of the prospectus supplement. We may issue additional Securities in amounts that exceed such amount at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to " Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Amounts That We May Issue".

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate stated principal amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

### 9. ETRACS Monthly Pay 2xLeveraged US Small Cap High Dividend ETN Series B, due November 10, 2048

**Specific Terms of the Securities**

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("**DTC**") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" under "Medium-Term Notes, Series B" above. The terms described here supplement those described in "Medium-Term Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below. The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

**Coupon Payment**

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date (the "**Coupon Amount**").

If the Reference Distribution Amount on such Coupon Valuation Date is zero, you will not receive any Coupon Amount on the related Coupon Payment Date. The final Coupon Amount will be included in the

Cash Settlement Amount if on the last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred.

The "**Coupon Payment Date**" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. The final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein. The first Coupon Payment Date will be December 21, 2018, subject to adjustment as provided herein.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Exchange Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Exchange Business Day prior to the applicable Coupon Record Date.

The "**Coupon Valuation Date**" means the 30th day of each month, and the 28th day of February of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein. The first Coupon Valuation Date will be November 30, 2018.

The "**Reference Distribution Amount**" means (i) as of the first Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security, for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the Initial Trade Date to, and including, the first Coupon Valuation Date; (ii) as of any other Coupon Valuation Date (other than the Calculation Date), an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date to, and including, such Coupon Valuation Date; and (iii) as of the Calculation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date to, but excluding, the Calculation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the distribution to holders of such Index Constituent Security by the scheduled payment date for such distribution, such distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The "**Reference Holder**" is, as of any date of determination, a hypothetical holder of a number of units of each Index Constituent Security equal to two *times* (a) the product of (i) the published unit weighting of that Index Constituent Security as of that date and (ii) the Current Principal Amount, *divided* by (b) the Monthly Initial Closing Level or Loss Rebalancing Closing Level, whichever is more recent.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is November 10, 2048, which will be the second Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under "— Market Disruption Event."

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to:

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount, if on the last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the "**Cash Settlement Amount**."

If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount** × **Index Factor** | + | **Final Coupon Amount** | — | **Accrued Fees** | + | **Stub Reference Distribution Amount** |

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment at maturity.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value".

The Stated Principal Amount of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount.

The Current Principal Amount for the period from the Initial Settlement Date to November 30, 2018 (such period, the "**initial calendar month**") will equal $25.00 per Security (unless a Loss Rebalancing Event occurs during the initial calendar month). For each subsequent calendar month, the Current Principal Amount for each Security will be reset as follows on the Monthly Reset Date:

*New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Monthly Valuation Date – Accrued Fees on the applicable Monthly Valuation Date

In the event of a Loss Rebalancing Event, the Current Principal Amount will be reset on the applicable Loss Rebalancing Reset Date as described below under "— Loss Rebalancing Events".

If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates will occur during the term of the Securities.

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

For each calendar month, the "**Monthly Reset Date**" is the first Exchange Business Day of that month beginning on December 1, 2018 and ending on November 1, 2048, subject to adjustment as described under "— Market Disruption Event." If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, as applicable, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates will occur during the term of the Securities.

For each Monthly Reset Date, the "**Monthly Valuation Date**" is the last Exchange Business Day of the previous calendar month beginning on November 30, 2018 and ending on October 31, 2048, subject to adjustment as described under "— Market Disruption Event." If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates or Monthly Valuation Dates will occur during the term of the Securities.

The "**Index Factor**" is: 1 + (2 × Index Performance Ratio).

The "**Index Performance Ratio**" may be calculated on multiple dates of determination during any applicable calendar month. The formula used to calculate the Index Performance Ratio on any date of determination depends on the number of Loss Rebalancing Events that have occurred in the applicable calendar month.

If no Loss Rebalancing Events have occurred in the applicable calendar month, then on any Index Business Day during a Measurement Period, or on the Monthly Valuation Date, any Redemption Valuation Date, the first Loss Rebalancing Valuation Date of the applicable calendar month or any other date of determination, as applicable, the Index Performance Ratio will be equal to:

$$\frac{\text{Index Valuation Level} - \text{Monthly Initial Closing Level}}{\text{Monthly Initial Closing Level}}$$

where the "Monthly Initial Closing Level" for the initial calendar month is 122.3841, the Index Closing Level on November 8, 2018. For each subsequent calendar month, the Monthly Initial Closing Level will equal the Index Closing Level on the Monthly Valuation Date for the previous calendar month. For example, the Monthly Initial Closing Level for December 2018 will equal the Index Closing Level on November 30, 2018, subject to adjustment. If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and the Monthly Initial Closing Level for the then-current calendar month will remain the same as it was for the immediately preceding calendar month.

If one or more Loss Rebalancing Events have occurred during the applicable calendar month, then on any Index Business Day during a Measurement Period, or on the Monthly Valuation Date, any Redemption Valuation Date, on each Loss Rebalancing Valuation Date after the first Loss Rebalancing Valuation Date in the applicable calendar month or on any other date of determination, as applicable, the Index Performance Ratio will be equal to:

$$\frac{\text{Index Valuation Level} - \text{the most recent Loss Rebalancing Closing Level}}{\text{the most recent Loss Rebalancing Closing Level}}$$

The "**Index Closing Level**" will equal the closing level of the Index on any date of determination, as reported on the NYSE and Bloomberg L.P.

The "**Index Valuation Level**", as determined by the Security Calculation Agent will equal the arithmetic mean of the Index Closing Levels measured on each Index Business Day during the applicable Measurement Period, or the Index Closing Level on any Monthly Valuation Date, Loss Rebalancing Valuation Date or Redemption Valuation Date, provided that if the Redemption Valuation Date falls in any Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Index Valuation Level on any date of determination during such Measurement Period shall equal (a) 1/5 *times* (b) (i) the sum of the Index Closing Levels on each Index Business Day from, and including, the first Index Business Day of the applicable Measurement Period, to, and including, the date of determination, *plus* (ii) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such Measurement Period, *times* the Index Closing Level on such date of determination.

"**Measurement Period**" means the Final Measurement Period, Call Measurement Period or Acceleration Valuation Period, as applicable.

The "**intraday indicative value**", or "**Indicative Value**" is an amount per Security, as determined by the Security Calculation Agent as of any date of determination equal to (Current Principal Amount on the previous calendar day × Index Factor, calculated using the intraday indicative value of the Index) — Accrued Fees + Coupon Amount with respect to the Coupon Valuation Date immediately preceding the date of determination if on the date of determination the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred + Reference Distribution Amount, calculated as if such time and date of determination is a Coupon Valuation Date.

The "**Current Indicative Principal Amount**", is an amount per Security, as determined by the Security Calculation Agent as of any date of determination, equal to the product of (i) the Current Principal Amount and (ii) the Index Factor as of such date, using the Index Closing Level as of such date as the Index Valuation Level.

The "**Accrued Fees**" as of any date of determination means the sum of (1) the Accrued Tracking Fee as of such date and (2) the Accrued Financing Charges as of such date.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

(a) On the Initial Trade Date, the Accrued Tracking Fee is equal to 0.

(b) On the initial Monthly Valuation Date (or if applicable, on a Loss Rebalancing Date that occurs prior to the initial Monthly Valuation Date), the Accrued Tracking Fee is an amount equal to the product of: (a) the Annual Tracking Fee as of the initial Monthly Valuation Date and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the Initial Trade Date to, and including, the initial Monthly Valuation Date (or Loss Rebalancing Date, as applicable), and the denominator of which is 365.

(c) On any subsequent Monthly Valuation Date other than the Initial Monthly Valuation Date or on any Loss Rebalancing Date, the Accrued Tracking Fee is an amount equal to the product of (a) the Annual Tracking Fee as of such Monthly Valuation Date or Loss Rebalancing Date, as the case may be, and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent), to, and including, such Monthly Valuation Date or Loss Rebalancing Date, as the case may be, and the denominator of which is 365.

(d) On the last Exchange Business Day of an applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, the Accrued Tracking Fee is an amount equal to the product of (a) the Annual Tracking Fee calculated as of the last Exchange Business Day of the applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent), to, and including, (i) such last Exchange Business Day of such Measurement Period, or (ii) such Redemption Valuation Date (or, if the Optional Acceleration Date or Redemption Valuation Date occurs prior to the initial Monthly Valuation Date, the period from, and excluding, the Initial Trade Date), as applicable, and the denominator of which is 365.

The "**Annual Tracking Fee**" is, as of any date of determination, an amount per Security equal to the product of (i) the Annual Tracking Rate and (ii) the Current Indicative Principal Amount as of the immediately preceding Index Business Day.

The "**Annual Tracking Rate**" is 0.85%.

The Securities are subject to "**Accrued Financing Charges**" per Security calculated as follows:

(a) On the Initial Trade Date, the Accrued Financing Charge for each Security is equal to $0.

(b) On the initial Monthly Valuation Date (or if applicable, on a Loss Rebalancing Date that occurs prior to the initial Monthly Valuation Date), the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the Initial Trade Date, to and including the initial Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent) *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

(c) On any subsequent Monthly Valuation Date, the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Valuation Date, whichever is more recent), to and including, the then current Monthly Valuation Date *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

(d) On the last Index Business Day of an applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Valuation Date, or, if the Redemption Valuation Date falls in the Initial Calendar Month, the Initial Trade Date, whichever is more recent), to, and including such last Index Business Day in such Measurement Period, or such Redemption Valuation Date, as applicable, *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

The "**Financing Level**" is, as of any date of determination, an amount that equals the Current Principal Amount.

The "**Financing Rate**" will equal the sum of (a) the "**Financing Spread**" of 0.80% and (b) the London interbank offered rate (British Banker's Association) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Calculation Agent) ("**LIBOR**"), as of 11:00 a.m., London time, on the day that is two London business days prior to the immediately preceding Monthly Valuation Date.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry- accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London business day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The Accrued Financing Charges seek to compensate UBS for providing investors with the potential to receive a leveraged participation in movements in the Index Closing Level and are intended to approximate the monthly financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities.

The "**Final Measurement Period**" means the five Index Business Days from, and including, the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

The "**Stub Reference Distribution Amount**" means, as of the last Index Business Day in a Measurement Period, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the "record date" with respect to any Index Constituent Security, for those cash distributions whose "ex-dividend date" occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date (or if such Redemption Valuation Date or the Optional Acceleration Date occurs prior to the first Coupon Valuation Date, the period from but excluding the Initial Trade Date) to, and including, such last Index Business Day of such Measurement Period, or such Redemption Valuation Date, as applicable; provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold four-fifths, three-fifths, two-fifths and one-fifth of the shares of each Index Constituent Security it would otherwise hold on the second, third, fourth and fifth Index Business Day, respectively, in such Measurement Period.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently Solactive.

The "**Calculation Date**" means November 2, 2048, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

"**Index Business Day**" means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

"**Exchange Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

"**Related Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is linked to the performance of the price return version of the Solactive US Small Cap High Dividend Index ("SOLSMHD"). The Index is designed to measure the performance of 100 relatively small capitalization, dividend yielding Index Constituent Securities selected from a universe of qualifying U.S. listed equity securities. The Index Sponsor and Index Calculation Agent is Solactive AG ("**Solactive**" or the "**Index Sponsor**").

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 4:00 p.m., New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on any applicable Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be November 15, 2018, and the final Redemption Date will be November 3, 2048. In addition, if a call notice has been issued or if acceleration has been triggered, the last Redemption Valuation Date will be the fifth Index Business day prior to the Call Settlement Date or Acceleration Settlement Date, as applicable. If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation.

| | | |
|---|---|---|
| **Closing Indicative Value** | **—** | **Redemption Fee Amount** |

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts and/or any Stub Reference Distribution Amount you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon early redemption.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value".

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 4:00 p.m. (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 4:00 p.m. (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify on or after November 15, 2019 through and including the Maturity Date. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Call Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the second Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

(a) if the Market Value of Securities outstanding as at the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than \$75,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

(b) if the Market Value of Securities outstanding as at the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than \$75,000,000, the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

The "**Market Value**" of the Securities outstanding as of the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

Intraday indicative value as of such Exchange Business Day × number of Securities outstanding as reported by SMHBIV <Index> on Bloomberg.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount** × **Index Factor** | + | **Coupon Amount** | — | **Accrued Fees** | + | **Stub Reference Distribution Amount** |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon a call.**

**In addition, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option.** See "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value".

**Optional Acceleration Upon Minimum Indicative Value**

If, at any time, the intraday indicative value of the Securities on any Index Business Day equals \$2.00 or less (the "**Indicative Value Optional Acceleration Trigger**") (each such day, an "**Optional Acceleration Date**"), all issued and outstanding Securities may be accelerated and redeemed by UBS, at its option (even if the intraday indicative value would later exceed \$2.00 on such Optional Acceleration Date or any subsequent Index Business Day) for a cash payment equal to the Acceleration Amount (the "**Acceleration Option**").

In the event that the Indicative Value Optional Acceleration Trigger threshold has been breached, UBS will issue a press release before 9:00 a.m. on the Index Business Day following the Optional Acceleration Date announcing whether or not it has elected to exercise its Acceleration Option. UBS is under no obligation to exercise its Acceleration Option and the Securities may remain outstanding following an Indicative Value Optional Acceleration Trigger Event occurring, if UBS does not elect to exercise such Acceleration Option.

The "**Acceleration Amount**" will equal

(a) the product of

  (i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Acceleration Valuation Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Optional Acceleration Date if on the last Index Business Day in the Acceleration Valuation Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Acceleration Valuation Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Acceleration Valuation Period, if any.

If the Acceleration Amount is equal to or less than zero, the payment upon acceleration will be zero.

If the Indicative Value Optional Acceleration Trigger threshold has been breached and UBS elects to exercise its Acceleration Option, you will receive on the Acceleration Settlement Date only the Acceleration Amount in respect of your investment in the Securities. The "**Acceleration Settlement Date**" will be the second Business Day following the last Index Business Day of the Acceleration Valuation Period. The "**Acceleration Valuation Period**" will be the five Index Business Days from, but excluding, the Optional Acceleration Date, subject to adjustment as described under "— Market Disruption Event." Subject to the prior verification by the Security Calculation Agent that the intraday indicative value of the Securities of $2.00 or less was accurately calculated by the NYSE, UBS must provide notice (which may be provided via press release) to the holders of the Securities that the minimum indicative value threshold has been breached not less than five calendar days prior to the Acceleration Settlement Date.

For a detailed description of how the minimum indicative value of the Securities is calculated see "Valuation of the Index and the Securities".

If the Securities undergo a split or reverse split, the Indicative Value Optional Acceleration Trigger will be adjusted accordingly.

The following graphic illustrates the formula to determine the Acceleration Amount, which has been simplified for ease of presentation.

$$\begin{array}{c}\textbf{Current Principal}\\ \textbf{Amount}\\ \times\\ \textbf{Index Factor}\end{array} + \begin{array}{c}\textbf{Coupon}\\ \textbf{Amount}\end{array} - \begin{array}{c}\textbf{Accrued}\\ \textbf{Fees}\end{array} + \begin{array}{c}\textbf{Stub Reference}\\ \textbf{Distribution}\\ \textbf{Amount}\end{array}$$

**You may lose all or a substantial portion of your investment upon acceleration. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon acceleration.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right.** See "Specific Terms of the Securities — UBS's Call Right".

### Loss Rebalancing Events

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A "**Loss Rebalancing Event**" occurs if, at any time, the Intraday Index Value on any Index Business Day (other than an Excluded Day, as defined herein) decreases 20% in value from the previous Monthly Initial Closing Level or Loss Rebalancing Closing Level, whichever is more recent. If a Loss Rebalancing Event occurs, the Current Principal Amount of the Securities will be reset as described below, which will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0. A Loss Rebalancing Event may occur irrespective of whether a Market Disruption Event also occurs on such Index Business Day.

Upon the occurrence of a Loss Rebalancing Event, the Current Principal Amount will be reset on the applicable Loss Rebalancing Reset Date as follows:

*New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Loss Rebalancing Valuation Date — Accrued Fees on the applicable Loss Rebalancing Valuation Date

In the event of a Loss Rebalancing Event, the Financing Rate will not be adjusted.

On the next Monthly Valuation Date following one or more Loss Rebalancing Events, the Monthly Initial Closing Level will be replaced with the most recent Loss Rebalancing Closing Level in the calculation of the Index Performance Ratio.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar month. This means both that (i) the Current Principal Amount may be reset more frequently than monthly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

On any Loss Rebalancing Valuation Date, the Accrued Financing Charges for each Security will equal the product of (i) the Financing Level on the immediately preceding Monthly Valuation Date or Loss Rebalancing Valuation Date, whichever is more recent, *times* (ii) the Financing Rate times (iii) the number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date or Loss Rebalancing Valuation Date, whichever is more recent, to, and including, the then current Loss Rebalancing Valuation Date *divided by* (iv) 360.

An “**Excluded Day**” means (i) the Index Business Day immediately preceding any Monthly Valuation Date, (ii) any Monthly Valuation Date, (iii) any Loss Rebalancing Valuation Date (iv) the Index Business Day immediately preceding the first day of the Final Measurement Period or any day after such Index Business Day, (v) the Index Business Day immediately preceding the first day of the Call Measurement Period or any day after such Index Business Day, or (vi) the Optional Acceleration Date or any day after the Optional Acceleration Date.

“**Loss Rebalancing Closing Level**” means the Index Closing Level on the Loss Rebalancing Valuation Date.

“**Loss Rebalancing Reset Date**” means the first Index Business Day immediately following a Loss Rebalancing Valuation Date, subject to adjustment as described under “— Market Disruption Event.”

“**Loss Rebalancing Valuation Date**” means:

(a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under “— Market Disruption Event”;

(b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under “— Market Disruption Event.”

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Principal Amount, intraday indicative value, Market Disruption Events, Business Days, Index Business Days, Exchange Business Days, the Index Factor, the Index Performance Ratio, the Index Valuation Level, the Financing Level, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Acceleration Amount that we will pay you upon acceleration, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred and whether any day is a Business Day, Index Business Day or an Exchange Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of the prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Acceleration Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Acceleration Amount, the Financing Level, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on an Averaging Date (as defined below), the Index Closing Level for such Averaging Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing (the "**Deferred Averaging Date**") with respect to the Index irrespective of whether, pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on any Averaging Date, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the applicable Measurement Period for purposes of calculating the Call Settlement Amount is based on the arithmetic mean of the Index Closing Levels on October 3, October 4, October 5, October 6 and October 7, and there is a Market Disruption Event with respect to the Index on October 3, but no other Market Disruption Event during such Measurement Period, then the Index Closing Level on October 4 will be used twice to calculate the Call Settlement Amount, and the Call Settlement Amount will be determined based on the arithmetic mean of the Index Closing Levels on October 4, October 4, October 5, October 6 and October 7. The same approach would be applied if there is a Market Disruption Event during any Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date or any Monthly Valuation Date or Loss Rebalancing Valuation Date, the Index Closing Level for such Redemption Valuation Date, Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on October 3 and there is a Market Disruption Event with respect to the Index on October 3, then the Index Closing Level on October 4 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on October 4.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or any Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date, as applicable, occurring more than three Index Business Days following the day originally scheduled to be such final Averaging Date or such Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the third Index Business Day following the date originally scheduled to be the final Averaging Date or any Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date, as applicable, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such third Index Business Day but for such Market Disruption Event. If any Monthly Valuation Date or Loss Rebalancing Valuation Date is postponed as described above, the succeeding Monthly Reset Date or Loss Rebalancing Reset Date will occur on the next Index Business Day following the postponed Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable.

An "**Averaging Date**" means each of the Index Business Days during a Measurement Period, subject to adjustment as described herein.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

(a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities for trading in the Index Constituent Security, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

(c) the Index is not published; or

(d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be Market Disruption Events with respect to the Index:

(a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

(b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor discontinues publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"),and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described in the prospectus supplement as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts

hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Principal Amount, Index Factor, intraday indicative value, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, or upon early redemption by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An "**Index Replacement Event**" means:

(a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the

Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after November 8, 2018 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(c) any event that occurs on or after November 8, 2018 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

(e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Valuation Level, the Index Performance Ratio, the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Acceleration Amount that we will pay you in the event of an optional acceleration upon minimum indicative value, if applicable, the Loss Rebalancing Closing Level, if any, the Monthly Initial Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in the prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the attached prospectus, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of the prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 10. ETRACS 2xMonthly Pay Leveraged Preferred Stock Index ETN due September 25, 2048

### Specific Terms of the Securities

In this section, references to "holders" or "you" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("**DTC**") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of UBS AG debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described under "Medium-Term Notes, Series B" above. The terms described here supplement those described under "Medium-Term Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date (the "Coupon Amount").

If the Reference Distribution Amount on such Coupon Valuation Date is zero, you will not receive any Coupon Amount on the related Coupon Payment Date. The final Coupon Amount will be included in the Cash Settlement Amount if on the last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred.

The "**Coupon Payment Date**" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. The final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein. The first Coupon Payment Date will be October 22, 2018, subject to adjustment as provided herein.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Exchange Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Exchange Business Day prior to the applicable Coupon Record Date.

The "**Coupon Valuation Date**" means the 30th day of each month, and the 28th day of February, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein. The first Coupon Valuation Date was October 1, 2018.

The “**Reference Distribution Amount**” means (i) as of the first Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security, for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the Initial Trade Date to, and including, the first Coupon Valuation Date; (ii) as of any other Coupon Valuation Date (other than the Calculation Date), an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date to, and including, such Coupon Valuation Date; and (iii) as of the Calculation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date to, but excluding, the Calculation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the distribution to holders of such Index Constituent Security by the scheduled payment date for such distribution, such distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The “**Reference Holder**” is, as of any date of determination, a hypothetical holder of a number of units of each Index Constituent Security equal to two *times* (a) the product of (i) the published unit weighting of that Index Constituent Security as of that date and (ii) the Current Principal Amount, *divided* by (b) the Monthly Initial Closing Level or Loss Rebalancing Closing Level, whichever is more recent.

“**record date**” means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

“**ex-dividend date**” means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The “**Maturity Date**” is September 25, 2048, which will be the second Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under “— Market Disruption Event.”

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to:

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount, if on the last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the “**Cash Settlement Amount**.”

If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount × Index Factor** | + | **Final Coupon Amount** | – | **Accrued Fees** | + | **Stub Reference Distributio n Amount** |

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment at maturity.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option**. See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value" below.

The Stated Principal Amount of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount.

The Current Principal Amount for the period from the Initial Settlement Date to September 30, 2018 (such period, the "**initial calendar month**") is equal to $25.00 per Security (unless a Loss Rebalancing Event occurs during the initial calendar month). For each subsequent calendar month, the Current Principal Amount for each Security will be reset as follows on the Monthly Reset Date:

> *New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Monthly Valuation Date — Accrued Fees on the applicable Monthly Valuation Date

In the event of a Loss Rebalancing Event, the Current Principal Amount will be reset on the applicable Loss Rebalancing Reset Date as described below under "— Loss Rebalancing Events".

If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates will occur during the term of the Securities.

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

For each calendar month, the "**Monthly Reset Date**" is the first Exchange Business Day of that month beginning on October 1, 2018 and ending on September 1, 2048, subject to adjustment as described under "— Market Disruption Event." If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, as applicable, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates will occur during the term of the Securities.

For each Monthly Reset Date, the "**Monthly Valuation Date**" is the last Exchange Business Day of the previous calendar month beginning on September 30, 2018 and ending on August 31, 2048, subject to adjustment as described under "— Market Disruption Event." If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates or Monthly Valuation Dates will occur during the term of the Securities.

The "**Index Factor**" is: 1 + (2 × Index Performance Ratio).

The "**Index Performance Ratio**" may be calculated on multiple dates of determination during any applicable calendar month. The formula used to calculate the Index Performance Ratio on any date of determination depends on the number of Loss Rebalancing Events that have occurred in the applicable calendar month.

If no Loss Rebalancing Events have occurred in the applicable calendar month, then on any Index Business Day during a Measurement Period, or on the Monthly Valuation Date, any Redemption Valuation Date, the first Loss Rebalancing Valuation Date of the applicable calendar month or any other date of determination, as applicable, the Index Performance Ratio will be equal to:

$$\frac{\text{Index Valuation Level} - \text{Monthly Initial Closing Level}}{\text{Monthly Initial Closing Level}}$$

where the "Monthly Initial Closing Level" for the initial calendar month is 97.6983, the Index Closing Level on September 25, 2018. For each subsequent calendar month, the Monthly Initial Closing Level will equal the Index Closing Level on the Monthly Valuation Date for the previous calendar month. For example, the Monthly Initial Closing Level for October 2018 is equal to the Index Closing Level on September 30, 2018, subject to adjustment. If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and the Monthly Initial Closing Level for the then-current calendar month will remain the same as it was for the immediately preceding calendar month.

If one or more Loss Rebalancing Events have occurred during the applicable calendar month, then on any Index Business Day during a Measurement Period, or on the Monthly Valuation Date, any Redemption Valuation Date, on each Loss Rebalancing Valuation Date after the first Loss Rebalancing Valuation Date in the applicable calendar month or on any other date of determination, as applicable, the Index Performance Ratio will be equal to:

$$\frac{\text{Index Valuation Level} - \text{the most recent Loss Rebalancing Closing Level}}{\text{the most recent Loss Rebalancing Closing Level}}$$

The "**Index Closing Level**" will equal the closing level of the Index on any date of determination, as reported on the NYSE and Bloomberg L.P.

The "**Index Valuation Level**", as determined by the Security Calculation Agent will equal the arithmetic mean of the Index Closing Levels measured on each Index Business Day during the applicable Measurement Period, or the Index Closing Level on any Monthly Valuation Date, Loss Rebalancing Valuation Date or Redemption Valuation Date, provided that if the Redemption Valuation Date falls in any Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Index Valuation Level on any date of determination during such Measurement Period shall equal (a) 1/5 *times* (b) (i) the sum of the Index Closing Levels on each Index Business Day from, and including, the first Index Business Day of the applicable Measurement Period, to, and including, the date of determination, *plus* (ii) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such Measurement Period, *times* the Index Closing Level on such date of determination.

"**Measurement Period**" means the Final Measurement Period, Call Measurement Period or Acceleration Valuation Period, as applicable.

The "**intraday indicative value"**, or "**Indicative Value**" is an amount per Security, as determined by the Security Calculation Agent as of any date of determination equal to (Current Principal Amount on the previous calendar day × Index Factor, calculated using the intraday indicative value of the Index) — Accrued Fees + Coupon Amount with respect to the Coupon Valuation Date immediately preceding the date of determination if on the date of determination the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred + Reference Distribution Amount, calculated as if such time and date of determination is a Coupon Valuation Date.

The "**Current Indicative Principal Amount**", is an amount per Security, as determined by the Security Calculation Agent as of any date of determination, equal to the product of (i) the Current Principal Amount and (ii) the Index Factor as of such date, using the Index Closing Level as of such date as the Index Valuation Level.

The "**Accrued Fees**" as of any date of determination means the sum of (1) the Accrued Tracking Fee as of such date and (2) the Accrued Financing Charges as of such date.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

(a) On the Initial Trade Date, the Accrued Tracking Fee is equal to 0.

(b) On the initial Monthly Valuation Date (or if applicable, on a Loss Rebalancing Date that occurs prior to the initial Monthly Valuation Date), the Accrued Tracking Fee is an amount equal to the product of: (a) the Annual Tracking Fee as of the initial Monthly Valuation Date and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the Initial Trade Date to, and including, the initial Monthly Valuation Date (or Loss Rebalancing Date, as applicable), and the denominator of which is 365.

(c) On any subsequent Monthly Valuation Date other than the Initial Monthly Valuation Date or on any Loss Rebalancing Date, the Accrued Tracking Fee is an amount equal to the product of (a) the Annual Tracking Fee as of such Monthly Valuation Date or Loss Rebalancing Date, as the case may be, and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent), to, and including, such Monthly Valuation Date or Loss Rebalancing Date, as the case may be, and the denominator of which is 365.

(d) On the last Exchange Business Day of an applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, the Accrued Tracking Fee is an amount equal to the product of (a) the Annual Tracking Fee calculated as of the last Exchange Business Day of the applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent), to, and including, (i) such last Exchange Business Day of such Measurement Period, or (ii) such Redemption Valuation Date (or, if the Optional Acceleration Date or Redemption Valuation Date occurs prior to the initial Monthly Valuation Date, the period from, and excluding, the Initial Trade Date), as applicable, and the denominator of which is 365.

The "**Annual Tracking Fee**" is, as of any date of determination, an amount per Security equal to the product of (i) the Annual Tracking Rate and (ii) the Current Indicative Principal Amount as of the immediately preceding Index Business Day.

The "**Annual Tracking Rate**" is 0.85%.The Securities are subject to "**Accrued Financing Charges**" per Security calculated as follows:

(a) On the Initial Trade Date, the Accrued Financing Charge for each Security is equal to $0.

(b) On the initial Monthly Valuation Date (or if applicable, on a Loss Rebalancing Date that occurs prior to the initial Monthly Valuation Date), the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the Initial Trade Date, to and including the initial Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent) *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

(c) On any subsequent Monthly Valuation Date, the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Valuation Date, whichever is more recent), to and including, the then current Monthly Valuation Date *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

(d) On the last Index Business Day of an applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Valuation Date, or, if the Redemption Valuation Date falls in the Initial Calendar Month, the Initial Trade Date, whichever is more recent), to, and including such last Index Business Day in such Measurement Period, or such Redemption Valuation Date, as applicable, *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

The "**Financing Level**" is, as of any date of determination, an amount that equals the Current Principal Amount.

The "**Financing Rate**" will equal the sum of (a) the "**Financing Spread**" of 0.80% and (b) the London interbank offered rate (British Banker's Association) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Calculation Agent) ("**LIBOR**"), as of 11:00 a.m., London time, on the day that is two London business days prior to the immediately preceding Monthly Valuation Date.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry-accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London business day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The Accrued Financing Charges seek to compensate UBS for providing investors with the potential to receive a leveraged participation in movements in the Index Closing Level and are intended to approximate the monthly financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities.

The "**Final Measurement Period**" means the five Index Business Days from, and including, the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

The "**Stub Reference Distribution Amount**" means, as of the last Index Business Day in a Measurement Period, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the "record date" with respect to any Index Constituent Security, for those cash distributions whose "ex-dividend date" occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date (or if such Redemption Valuation Date or the Optional Acceleration Date occurs prior to the first Coupon Valuation Date, the period from but excluding the Initial Trade Date) to, and including, such last Index Business Day of such Measurement Period, or such Redemption Valuation Date, as applicable; provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold four-fifths, three-fifths, two-fifths and one-fifth of the shares of each Index Constituent Security it would otherwise hold on the second, third, fourth and fifth Index Business Day, respectively, in such Measurement Period.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently Solactive.

The "**Calculation Date**" means September, 17, 2048, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

"**Index Business Day**" means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

"**Exchange Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

"**Related Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is linked to the performance of the Solactive Preferred Stock ETF Index ("**SOLPRF**"). The Index is intended to track the price movements of an equally weighted portfolio of two ETFs that hold preferred securities of various issuers. We refer to the ETFs included in the Index as the "**Index Constituent Securities**." The Index Sponsor is Solactive AG ("**Solactive**" or the "**Index Sponsor**").

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 4:00 p.m., New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on any applicable Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date was October 2, 2018, and the final Redemption Date will be September 18, 2048.

In addition, if a call notice has been issued or if acceleration has been triggered, the last Redemption Valuation Date will be the fifth Index Business day prior to the Call Settlement Date or Acceleration Settlement Date, as applicable. If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date — Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation.

| **Closing Indicative Value** | **—** | **Redemption Fee Amount** |
|---|---|---|

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts and/or any Stub Reference Distribution Amount you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon early redemption.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option**. See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value" below.

We discuss these matters in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Redemption and Payment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice,**" to UBS via email no later than 4:00 p.m. (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 4:00 p.m. (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify on or after September 30, 2019 through and including the Maturity Date. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of

  (i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Call Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the second Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

(a) if the Market Value of Securities outstanding as at the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $50,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

(b) if the Market Value of Securities outstanding as at the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $50,000,000, the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

The "**Market Value**" of the Securities outstanding as of the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

Intraday indicative value as of such Exchange Business Day × number of Securities outstanding as reported by PFFLSO <Index> on Bloomberg.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount ×** | + | **Coupon Amount** | — | **Accrued Fees** | + | **Stub Reference Distribution Amount** |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon a call.**

**In addition, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option.** See "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value" below.

**Optional Acceleration Upon Minimum Indicative Value**

If, at any time, the intraday indicative value of the Securities on any Index Business Day equals $2.00 or less (the "**Indicative Value Optional Acceleration Trigger**") (each such day, an "**Optional Acceleration Date**"), all issued and outstanding Securities may be accelerated and redeemed by UBS, at its option (even if the intraday indicative value would later exceed $2.00 on such Optional Acceleration Date or any subsequent Index Business Day) for a cash payment equal to the Acceleration Amount (the "**Acceleration Option**").

In the event that the Indicative Value Optional Acceleration Trigger threshold has been breached, UBS will issue a press release before 9:00 a.m. on the Index Business Day following the Optional Acceleration Date announcing whether or not it has elected to exercise its Acceleration Option. UBS is under no obligation to exercise its Acceleration Option and the Securities may remain outstanding following an Indicative Value Optional Acceleration Trigger Event occurring, if UBS does not elect to exercise such Acceleration Option.

The “**Acceleration Amount**” will equal

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Acceleration Valuation Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Optional Acceleration Date if on the last Index Business Day in the Acceleration Valuation Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Acceleration Valuation Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Acceleration Valuation Period, if any.

If the Acceleration Amount is equal to or less than zero, the payment upon acceleration will be zero.

If the Indicative Value Optional Acceleration Trigger threshold has been breached and UBS elects to exercise its Acceleration Option, you will receive on the Acceleration Settlement Date only the Acceleration Amount in respect of your investment in the Securities. The “**Acceleration Settlement Date**” will be the second Business Day following the last Index Business Day of the Acceleration Valuation Period. The “**Acceleration Valuation Period**” will be the five Index Business Days from, but excluding, the Optional Acceleration Date, subject to adjustment as described under “— Market Disruption Event.” Subject to the prior verification by the Security Calculation Agent that the intraday indicative value of the Securities of $2.00 or less was accurately calculated by the NYSE, UBS must provide notice (which may be provided via press release) to the holders of the Securities that the minimum indicative value threshold has been breached not less than five calendar days prior to the Acceleration Settlement Date. For a detailed description of how the minimum indicative value of the Securities is calculated see “Valuation of the Index and the Securities” below.

If the Securities undergo a split or reverse split, the Indicative Value Optional Acceleration Trigger will be adjusted accordingly.

The following graphic illustrates the formula to determine the Acceleration Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount × Index Factor** | + | **Coupon Amount** | — | **Accrued Fees** | + | **Stub Reference Distribution Amount** |

**You may lose all or a substantial portion of your investment upon acceleration. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon acceleration.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to UBS’s Call Right**. See “Specific Terms of the Securities — UBS’s Call Right”.

**Loss Rebalancing Events**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A “**Loss Rebalancing Event**” occurs if, at any time, the Intraday Index Value on any Index Business Day (other than an Excluded Day, as defined herein) decreases 20% in value from the previous Monthly Initial Closing Level or Loss Rebalancing Closing Level, whichever is more recent. If a Loss Rebalancing Event occurs, the Current Principal Amount of the Securities will be reset as described below, which will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0. A Loss Rebalancing Event may occur irrespective of whether a Market Disruption Event also occurs on such Index Business Day.

Upon the occurrence of a Loss Rebalancing Event, the Current Principal Amount will be reset on the applicable Loss Rebalancing Reset Date as follows:

*New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Loss Rebalancing Valuation Date — Accrued Fees on the applicable Loss Rebalancing Valuation Date

In the event of a Loss Rebalancing Event, the Financing Rate will not be adjusted.

On the next Monthly Valuation Date following one or more Loss Rebalancing Events, the Monthly Initial Closing Level will be replaced with the most recent Loss Rebalancing Closing Level in the calculation of the Index Performance Ratio.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar month. This means both that (i) the Current Principal Amount may be reset more frequently than monthly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

On any Loss Rebalancing Valuation Date, the Accrued Financing Charges for each Security will equal the product of (i) the Financing Level on the immediately preceding Monthly Valuation Date or Loss Rebalancing Valuation Date, whichever is more recent, *times* (ii) the Financing Rate times (iii) the number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date or Loss Rebalancing Valuation Date, whichever is more recent, to, and including, the then current Loss Rebalancing Valuation Date *divided by* (iv) 360.

An "**Excluded Day**" means (i) the Index Business Day immediately preceding any Monthly Valuation Date, (ii) any Monthly Valuation Date, (iii) any Loss Rebalancing Valuation Date (iv) the Index Business Day immediately preceding the first day of the Final Measurement Period or any day after such Index Business Day, (v) the Index Business Day immediately preceding the first day of the Call Measurement Period or any day after such Index Business Day, or (vi) the Optional Acceleration Date or any day after the Optional Acceleration Date.

"**Loss Rebalancing Closing Level**" means the Index Closing Level on the Loss Rebalancing Valuation Date.

"**Loss Rebalancing Reset Date**" means the first Index Business Day immediately following a Loss Rebalancing Valuation Date, subject to adjustment as described under "— Market Disruption Event."

"**Loss Rebalancing Valuation Date**" means:

(a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under "— Market Disruption Event";

(b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event."

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Principal Amount, intraday indicative value, Market Disruption Events, Business Days, Index Business Days, Exchange Business Days, the Index Factor, the Index Performance Ratio, the Index Valuation Level, the Financing Level, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Acceleration Amount that we will pay you upon acceleration, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred and whether any day is a Business Day, Index Business Day or an Exchange Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Acceleration Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Acceleration Amount, the Financing Level, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on an Averaging Date (as defined below), the Index Closing Level for such Averaging Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing (the "**Deferred Averaging Date**") with respect to the Index irrespective of whether, pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on any Averaging Date, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the applicable Measurement Period for purposes of calculating the Call Settlement Amount is based on the arithmetic mean of the Index Closing Levels on October 3, October 4, October 5, October 6 and October 7, and there is a Market Disruption Event with respect to the Index on October 3, but no other Market Disruption Event during such Measurement Period, then the Index Closing Level on October 4 will be used twice to calculate the Call Settlement Amount, and the Call Settlement Amount will be determined based on the arithmetic mean of the Index Closing Levels on October 4, October 4, October 5, October 6 and October 7. The same approach would be applied if there is a Market Disruption Event during any Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date or any Monthly Valuation Date or Loss Rebalancing Valuation Date, the Index Closing Level for such Redemption Valuation Date, Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on October 3 and there is a Market Disruption Event with respect to the Index on October 3, then the Index Closing Level on October 4 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on October 4.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or any Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date, as applicable, occurring more than three Index Business Days following the day originally scheduled to be such final Averaging Date or such Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the third Index Business Day following the date originally scheduled to be the final Averaging Date or any Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date, as applicable, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such third Index Business Day but for such Market Disruption Event. If any Monthly Valuation Date or Loss Rebalancing Valuation Date is postponed as described above, the succeeding Monthly Reset Date or Loss Rebalancing Reset Date will occur on the next Index Business Day following the postponed Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable.

An "**Averaging Date**" means each of the Index Business Days during a Measurement Period, subject to adjustment as described herein.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

(a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities for trading in the Index Constituent Security, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

(c) the Index is not published; or

(d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging" of the applicable prospectus supplement.

The following events will not be Market Disruption Events with respect to the Index:

(a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

(b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in "Medium-Term Notes, Series B" above. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" above, under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, *plus*
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor discontinues publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"), and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described herein as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Principal Amount, Index Factor, intraday indicative value, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, or upon early redemption by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

An "**Index Replacement Event**" means:

(a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after September 25, 2018 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(c) any event that occurs on or after September 25, 2018 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

(e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Valuation Level, the Index Performance Ratio, the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees , the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Acceleration Amount that we will pay you in the event of an optional acceleration upon minimum indicative value, if applicable, the Loss Rebalancing Closing Level, if any, the Monthly Initial Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation

Agent" in the prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above.

**Modified Business Day**

As described in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities", any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of the prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover of the prospectus supplement at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in "Medium-Term Notes, Series B" above.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participant.

## 11. ETRACS NYSE® Pickens CoreMidstream™ Index ETN due August 20, 2048

### Specific Terms of the Securities

In this section, references to "holders" or "you" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("DTC") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described under "Medium-Term Notes, Series B" above. The terms described here supplement those described under "Medium-Term Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below. The Securities do not guarantee any return of principal at, or prior to, maturity or call, or upon early redemption. Instead, at maturity, you will receive a cash payment the amount of which will vary depending on the performance of the Index calculated in accordance with the formula set forth below and will be reduced by the Accrued Tracking Fee . We refer to this cash payment as the "**Cash Settlement Amount**." If the amount so calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment on the Redemption Date equal to the Redemption Amount as described below under "— Early Redemption at the Option of the Holders." If the amount so calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If we elect to exercise our call right to redeem all of the Securities, subject to compliance with the procedures set forth below, for each Security you will receive a cash payment on the Call Settlement Date equal to the Call Settlement Amount, as described below under "— UBS's Call Right." If the amount so calculated is equal to or less than zero, the Call Settlement Amount will be zero and you will not receive a cash payment.

The Securities may pay a cash coupon during their term.

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date (the "**Coupon Amount**").

If the Reference Distribution Amount on such Coupon Valuation Date is zero, you will not receive any Coupon Amount on the related Coupon Payment Date.

The final Coupon Amount will be included in the Cash Settlement Amount.

The "**Coupon Payment Date**" means the 15th Index Business Day following each Coupon Valuation Date, provided that the final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein. The first Coupon Payment Date will be October 22, 2018.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Trading Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Trading Day prior to the applicable Coupon Record Date.

The "**Coupon Valuation Date**" means the 30th of March, June, September and December of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment as described herein. The first Coupon Valuation Date will be October 1, 2018.

The "**Reference Distribution Amount**" means:

(a) as of the first Coupon Valuation Date, an amount equal to the gross cash dividends or distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent, for those cash dividends or distributions whose "ex-dividend date" occurs during the period from and excluding the Initial Trade Date to and including the first Coupon Valuation Date; and

(b) as of any other Coupon Valuation Date, an amount equal to the gross cash dividends or distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent for those cash dividends or distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date to and including such Coupon Valuation Date.

Notwithstanding the foregoing, with respect to cash dividends or distributions for an Index constituent which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index constituent fails to pay the dividend or distribution to holders of such Index constituent by the scheduled payment date for such dividend or distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The "**Reference Holder**" is, as of any date of determination, a hypothetical holder of a number of units or shares, as applicable, of each Index constituent equal to (i) the published unit weighting of that Index constituent as of that date, divided by (ii) the product of (a) the Index Divisor as of that date, and (b) the Index Closing Level on the prior calendar day *divided by* the Current Principal Amount on the prior calendar day.

"**record date**" means, with respect to a distribution on an Index constituent, the date on which a holder of the Index constituent must be registered as a unitholder or shareholder of such Index constituent in order to be entitled to receive such distribution.

"**ex-dividend date**" means, with respect to a distribution on an Index constituent, the first Business Day on which transactions in such Index constituent trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "Maturity Date" is August 20, 2048, subject to adjustment as described below under "— Market Disruption Event."

For each Security, unless earlier called or redeemed, you will receive at maturity a cash payment equal to:

(a) the product of

(i) the Current Principal Amount as of the calendar day immediately preceding the Calculation Date and

(ii) the Index Factor as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount if on such last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred, *minus*

(c) the Accrued Tracking Fee as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the "**Cash Settlement Amount**." If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

**You may lose some or all of your investment at maturity. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the increase in the level of the Index is insufficient to offset the negative effect of the Accrued Tracking Fee (less any Coupon Amounts and any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the final Index level is less than the Initial Index Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment at maturity.**

The "**Current Principal Amount**" for each Security will equal:

(a) on the Initial Trade Date, $25.00.

(b) on each subsequent calendar day, to but excluding the first day of an applicable Measurement Period:

(Current Principal Amount on the previous calendar day × Index Factor) — Accrued Tracking Fee

(c) on the last day of an applicable Measurement Period:

(Current Principal Amount on the calendar day immediately preceding the first day of the applicable Measurement Period × Index Factor) — Accrued Tracking Fee

To the extent the Current Principal Amount must be calculated during a Measurement Period, the Current Principal Amount on any day during the Measurement Period shall be calculated as if such day is the last day of the applicable Measurement Period and in such circumstances, clause (2) of the "Index Factor" definition (below) shall be determined by calculating (i) (A) (the Index Closing Level on each prior Trading Day, if any, of the applicable Measurement Period) + (the Index Closing Level on such determination date within the applicable Measurement Period × the number of Trading Days from and including such date of determination to, and including, the last Trading Day within the applicable Measurement Period), *divided by* (B) the number of scheduled Trading Days in the applicable Measurement Period; and (ii) dividing the result obtained under (i) above by the Index Closing Level on the Index Business Day immediately preceding the first day of the applicable Measurement Period

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

The "**Index Factor**" will equal:

(1) on any Index Business Day prior to an applicable Measurement Period:

Index Closing Level on such Index Business Day divided by the Index Closing Level on the immediately preceding Index Business Day.

(2) on the last Index Business Day in a Measurement Period:

(i) the arithmetic mean of the Index Closing Levels measured on each Index Business Day during the applicable Measurement Period divided by (ii) the Index Closing Level on the Index Business Day immediately preceding the first day of the applicable Measurement Period.

The Index Factor will equal one (1) on any calendar day that is not an Index Business Day.

The "**Current Indicative Value**" as determined by the Security Calculation Agent, means, as of any time and date of determination, an amount per Security equal to:

(Current Principal Amount on the previous calendar day × Index Factor, calculated using the intraday indicative value of the Index) — Accrued Tracking Fee + Coupon Amount with respect to the Coupon Valuation Date immediately preceding the date of determination if on the date of determination the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred + Reference Distribution Amount, calculated as if such time and date of determination is a Coupon Valuation Date.

The actual trading price of the Securities in the secondary market may vary significantly from the indicative value.

On any day within a Measurement Period, the Current Indicative Value of the Securities shall be calculated as if such day is the last day of the applicable Measurement Period and in such circumstances, clause (2) of the "Index Factor" definition shall be determined by calculating (i) (A) (the Index Closing Level on each prior Trading Day, if any, of the applicable Measurement Period) + (the Index Closing Level on such determination date within the applicable Measurement Period × the number of Trading Days from and including such date of determination, to and including, the last Trading Day within the applicable Measurement Period), (B) the number of scheduled Trading Days in the applicable Measurement Period, and (ii) dividing the results obtained under (i) above by the Index Closing level on the Index Business Day immediately preceding the first day of the applicable Measurement Period.

The "**Index Closing Level**" is the closing level of the Index as reported on the NYSE and Bloomberg; provided, however, that if the closing level of the Index as reported on the NYSE (or any successor) differs from the closing level of the Index as reported on Bloomberg (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent. The "Index Closing Level" on the Initial Trade Date (i.e. the Initial Index Level) was 1313.27.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently ICE Data Indices, LLC, which is also the Index Sponsor.

The "**Index Divisor**," as of any date of determination, is the divisor used by the Index Calculation Agent to calculate the level of the Index.

The Securities are subject to an "**Accrued Tracking Fee**" per Security equal to 0.85% per annum, calculated as follows:

(a) On the Initial Trade Date, the Accrued Tracking Fee is equal to zero.

(b) On any subsequent calendar day prior to the beginning of a Measurement Period, the Accrued Tracking Fee is equal to (0.85% / 365) × Closing Indicative Value on the previous calendar day.

(c) On the last day of an applicable Measurement Period, the Accrued Tracking Fee is equal to (0.85% × a fraction, the numerator of which equals the number of calendar days from and including the first day of the applicable Measurement Period to but excluding the last day of the applicable Measurement Period and the denominator of which equals 365) × Closing Indicative Value as of the calendar day immediately preceding the first day of the applicable Measurement Period.

The Accrued Tracking Fee takes into account the performance of the Index, as reflected in the Closing Indicative Value.

The "**Final Measurement Period**" means the five (5) Index Business Days from and including the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

"**Measurement Period**" means the Final Measurement Period or the Call Measurement Period, as applicable.

The "**Stub Reference Distribution Amount**" means, as of the last Index Business Day in the Final Measurement Period or Call Measurement Period, as applicable, an amount equal to the gross cash dividends or distributions that a Reference Holder would have been entitled to receive in respect of the Index constituents held by such Reference Holder on the "record date" with respect to any Index constituent, for those cash dividends or distributions whose "ex-dividend date" occurs during the period from and excluding the immediately preceding Coupon Valuation Date, to and including the last Index Business Day in the Final Measurement Period or Call Measurement Period as applicable, provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold 4/5ths, 3/5ths, 2/5ths and 1/5th of the shares/units of each Index constituent it would otherwise hold on the second, third, fourth and fifth Index Business Day, respectively, in such Final Measurement Period or Call Measurement Period.

The "**Calculation Date**" means August 12, 2048, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

"**Index Business Day**" means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

"**Business Day**" means any day that is not a Saturday, a Sunday or a day on which banking institutions in The City of New York, generally, are authorized or obligated by law, regulation or executive order to close.

"**Trading Day**" means any day on which the primary exchange for trading in the Securities is open for trading in the Securities.

"**Primary Exchange**" means, with respect to each Index constituent or each constituent underlying a successor index, the primary exchange or market of trading such Index constituent or such constituent underlying a successor index.

"**Related Exchange**" means, with respect to each Index constituent or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index constituent or such constituent underlying a successor index.

### Underlying Index

The NYSE® Pickens Core Midstream™ Index measures the performance of the common stock of corporations and units of master limited partnerships ("**MLPs**") which represent U.S. midstream energy fundamentals, agnostic of entity structure. The Index is calculated by ICE Data Indices, LLC (the "**Index Sponsor**") using a modified free-float market capitalization weighted methodology. We refer to the corporations, MLPs and any other entities included in the Index as the "**Index constituents**." The Index constituents earn the majority of their operating income from midstream energy activities (gathering and processing, liquefaction, pipeline transportation, rail terminating and storage of energy commodities).

### Early Redemption at the Option of the Holders

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 4:00 p.m., New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on any applicable Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. We reserve the right from time to time to reduce or waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be August 27, 2018 and the final Redemption Date will be August 13, 2048. If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index constituents, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

If the amount calculated above is less than or equal to zero, the payment upon early redemption will be zero. We reserve the right from time to time to reduce or waive the Redemption Fee Amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver.

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value for the applicable Security as of such Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date — Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**."

If the amount calculated above is less than or equal to zero, the payment upon early redemption will be zero. We reserve the right from time to time to reduce or waive the Redemption Fee Amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

**You may lose some or all of your investment upon early redemption. The combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount will reduce your final Redemption Amount. If the level of the Index does not increase by an amount sufficient to offset the combined negative effect of the Accrued Tracking Fee and the Redemption Fee Amount (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the Initial Index Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment upon early redemption.**

### Redemption Procedures

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**," to UBS via email no later than 4:00 p.m. (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**," to us via e-mail in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 4:00 p.m. (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until another date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

We reserve the right from time to time to reduce or waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such waiver or election to accelerate the Redemption Valuation Date.

### UBS's Call Right

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which notice may be provided via press release), such redemption to occur on any Business Day that we may specify on or after August 25, 2019 through and including the Maturity Date (the "**Call Settlement Date**"). Upon early redemption in the event we exercise this right, you will receive a cash payment equal to:

(a) the product of

(i) the Current Principal Amount as of the calendar day immediately preceding the Call Measurement Period and

(ii) the Index Factor as of the last Index Business Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Tracking Fee as of the last Index Business Day in the Call Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon exercise of the UBS Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the second Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index constituents, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

(a) if the Market Value of Securities outstanding as at the close of business on the Trading Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $100,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."; or

(b) if the Market Value of Securities outstanding as at the close of business on the Trading Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $100,000,000, the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

The "**Market Value**" of the Securities outstanding as of the close of business on the Trading Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

Current Indicative Value as of such Trading Day × number of Securities outstanding as reported by PYPESO <Index> on Bloomberg.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

**You may lose some or all of your investment upon a call. The negative effect of the Accrued Tracking Fee will reduce your final payment. If the level of the Index does not increase by an amount sufficient to offset the negative effect of the Accrued Tracking Fee (less any Coupon Amounts and any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the final Index level is less than the Initial Index Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment upon UBS's exercise of its call right.**

*Some of the defined terms used in this section have different applications when used in determining the Redemption Amount. For the definition of the terms relevant to early redemption, please refer to "— Early Redemption at the Option of the Holders" above.*

### Security Calculation Agent

UBS Securities LLC will act as the "Security Calculation Agent." The Security Calculation Agent will determine, among other things, the Current Principal Amount, Current Indicative Value, the Index Factor, the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Tracking Fee, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Final Measurement Period, the Coupon Payment Dates, the Coupon Valuation Dates, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Valuation Date, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Redemption Date, the Call Settlement Date, the Call Valuation Date, the Call Measurement Period and the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, and whether any day is a Business Day or Index Business Day. The Security Calculation Agent will also be responsible for determining whether a Market Disruption Event has occurred, whether the Index has been discontinued and whether there has been a material change in the Index. All determinations made by the Security Calculation Agent will be at the sole discretion of the Security Calculation Agent and will, in the absence of manifest error, be conclusive for all purposes and binding on you and on us. We may appoint a different Security Calculation Agent from time to time without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity or call, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 p.m. (New York City time) on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Tracking Fee, the Redemption Amount and Redemption Fee Amount, if any, per security, the Call Settlement Amount, if any, per security, and the Cash Settlement Amount, if any, per security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the aggregate principal amount of Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Disrupted Day (as defined below) exists with respect to an Index constituent on an Averaging Date (as defined below) or on a Redemption Valuation Date, the share/unit price and published share/unit weighting with respect to such Index constituent (and only with respect to such Index constituent) for such Averaging Date or Redemption Valuation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day that is not a Disrupted Day (the "**Deferred Averaging Date**") with respect to such Index constituent irrespective of whether pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the share/unit price of a particular Index constituent being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on the Index Business Days during the Final Measurement Period or Call Measurement Period, or on the Redemption Valuation Date, as applicable, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the share/ unit price and the published share/unit weighting with respect to such Index constituent for such Deferred Averaging Date to the calculation of the Index Closing Level (i) on the date(s) of the original disruption with respect to such Index constituent and (ii) such Averaging Date. For example, if the Final Measurement Period or Call Measurement Period, as applicable, for purposes of calculating the Cash Settlement Amount or Call Settlement Amount, respectively, is based on the arithmetic mean of the Index Closing Levels on June 6, 2019, June 7, 2019, June 8, 2019, June 9, 2019 and June 10, 2019 and there is a Market Disruption Event for an Index constituent on June 6, 2019, but no other Market Disruption Event during the Final Measurement Period or Call Measurement Period, as applicable, then the share/ unit price for such disrupted Index constituent on June 7, 2019 will be used more than once to calculate the Cash Settlement Amount or Call Settlement Amount, respectively, and such Cash Settlement Amount or Call Settlement Amount, as applicable, will be determined based on the arithmetic mean of the share/ unit price for such disrupted Index constituent on June 7, 2019, June 7, 2019, June 8, 2019, June 9, 2019 and June 10, 2019.

If the Redemption Valuation Date for purposes of calculating a Redemption Amount is based on the Index Closing Level on June 6, 2019 and there is a Market Disruption Event for an Index constituent on June 6, 2019, then the share/unit price for such disrupted Index constituent on June 7, 2019 will be used to calculate the Redemption Amount.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or the Redemption Valuation Date, as applicable, with respect to any Index constituent occurring more than three (3) Index Business Days following the day originally scheduled to be such final Averaging Date or Redemption Valuation Date. If the third Index Business Day following the date originally scheduled to be the final Averaging Date, or the Redemption Valuation Date, as applicable, is not an Index Business Day or is a Disrupted Day with respect to such Index constituent, the Security Calculation Agent or one of its affiliates will determine the share/unit price and share weighting with respect to any Index constituent required to be determined for the purpose of calculating the applicable Index Closing Level based on its good faith estimate of the share/unit price and share/unit weighting of each such Index constituent that would have prevailed on the Primary Exchange on such third Index Business Day but for such suspension or limitation.

An "**Averaging Date**" means each of the Index Business Days during the Final Measurement Period or Call Measurement Period, as applicable, subject to adjustment as described herein.

A "**Disrupted Day**" with respect to any Index constituent is any Index Business Day on which the Primary Exchange or any Related Exchange fails to open for trading during its regular trading session or on which a Market Disruption Event has occurred and is continuing, and, in both cases, the occurrence of which is determined by the Security Calculation Agent to have a material effect on the share/unit price of such Index constituent.

With respect to an Index constituent, a "**Market Disruption Event**" means:

(a) the occurrence or existence of a condition specified below:

    (i) any suspension, absence or limitation of trading on the Primary Exchange for trading in the Index constituent, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise,

(ii) any suspension, absence or limitation of trading on the Related Exchange for trading in futures or options contracts related to the Index constituent, whether by reason of movements in price exceeding limits permitted by such Related Exchange or otherwise, or

(iii) any event (other than an event described in (b) below) that disrupts or impairs (as determined by the Security Calculation Agent) the ability of market participants in general (A) to effect transactions in, or obtain market values for, the relevant Index constituent or (B) to effect transactions in, or obtain market values for, futures or options contracts relating to the relevant Index constituent; or

(b) the closure on any Index Business Day of the Primary Exchange or any Related Exchange prior to its Scheduled Closing Time unless such earlier closing time is announced by the Primary Exchange or such Related Exchange at least one hour prior to the earlier of (i) the actual closing time for the regular trading session on the Primary Exchange or such Related Exchange on such Index Business Day and (ii) the submission deadline for orders to be entered into the Primary Exchange or such Related Exchange system for execution at the close of trading on such Index Business Day;

in each case determined by the Security Calculation Agent in its sole discretion; and

(c) a determination by the Security Calculation Agent in its sole discretion that the event described above materially interfered with our ability or the ability of any of our affiliates to adjust or unwind all or a material portion of any hedge with respect to the Securities.

For purposes of the above definition:

(i) a limitation on the hours or number of days of trading will not constitute a Market Disruption Event if it results from an announced change in the regular business hours of the Primary Exchange or Related Exchange, and

(ii) for purposes of clause (i) above, limitations pursuant to the rules of any Primary Exchange or Related Exchange similar to NYSE Rule 80B or Nasdaq Rule 4120 (or any applicable rule or regulation enacted or promulgated by any other self-regulatory organization or any government agency of scope similar to NYSE Rule 80B or Nasdaq Rule 4120 as determined by the Security Calculation Agent) on trading during significant market fluctuations will constitute a suspension, absence or material limitation of trading.

"**Scheduled Closing Time**" means, with respect to the Primary Exchange or the Related Exchange, on any Index Business Day, the scheduled weekday closing time of the Primary Exchange or such Related Exchange on such Index Business Day, without regard to after hours or any other trading outside of the regular trading session hours.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Optional Tax Redemption. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount." In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" above, under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, as determined by the Security Calculation Agent, in U.S. dollars for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two (2) Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two (2) Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. ,or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index; Alteration of Method of Calculation**

If (i) the Index Sponsor discontinues publication of or otherwise fails to publish the Index, (ii) our license agreement with the Index Sponsor terminates, or (iii) the Index Sponsor does not make the Index constituents, their share/unit weighting and/or the Index Divisor available to the Security Calculation Agent, and, in each case, the Index Sponsor or another entity publishes a successor or substitute index licensed to UBS that the Security Calculation Agent determines to be comparable to the discontinued Index and for which the Index constituents, their share/unit weighting, and/or the Index Divisor are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"), then the Security Calculation Agent will determine the Coupon Amounts, Current Principal Amounts, Index Factor, Current Indicative Value, Accrued Tracking Fee, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, or upon early redemption by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the Index, if our license agreement with the Index Sponsor terminates or the Index Sponsor does not make the Index constituents, their share/unit weightings and/or Index Divisor available to the Security Calculation Agent prior to, and such discontinuation or unavailability is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or Call Measurement Period, or on the Redemption Valuation Date, as applicable, or any other relevant date on which the Index level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during the Final Measurement Period or Call Measurement Period, or on the Redemption Valuation Date, as applicable, or any other relevant date on which the Index level is to be determined, then the Security Calculation Agent will determine the relevant Index level using the Index level and published share/unit weighting of each Index constituent included in the Index or successor index, as applicable, on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the “**Substitute Index**”), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described herein as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amounts, Index Factor, Current Indicative Value, Accrued Tracking Fee, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, or upon early redemption by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An “**Index Replacement Event**” means:

(a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of shares/units in the Index constituents included in the Index or options, futures, swaps or other derivatives on the Index or the shares/units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties’ ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after August 20, 2018 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of shares/units in the Index constituents included in the Index or options, futures, swaps or other derivatives on the Index or the shares/units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(c) any event that occurs on or after August 20, 2018 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of shares/units in the Index constituents included in the Index or options, futures, swaps or other derivatives on the Index or the shares/units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

(e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index levels for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Current Principal Amount, the Current Indicative Value, the Index Factor, the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Tracking Fee, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, that we will pay you upon early redemption, if applicable, and the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, based on the relevant Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (e.g., due to a split in the Index), which, in turn, causes the Index level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index level for the Index or such successor index as if it had not been modified (e.g., as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in the prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity or call, or upon early redemption will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above s.

**Modified Business Day**

As described in "Medium-Term Notes, Series B" under "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities", any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, “reopen” or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of the prospectus supplement. We may issue additional Securities in amounts that exceed such amount any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to “Description of Debt Securities We May Offer — Amounts That We May Issue” in “Medium-Term Notes, Series B” above.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC’s settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

**12. ETRACS Monthly Pay 2xLeveraged US High Dividend Low Volatility ETN Series B due October 21, 2049**

**Specific Terms of the Securities**

In this section, references to "holders" or "you" mean those who own the Securities registered in their own names, on the books that we or the trustee maintain for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("**DTC**") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

These Securities are part of a series of UBS AG debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described under "Medium-Term Notes, Series B" above. This section summarizes general financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" under "Medium-Term Notes, Series B" above. The terms described here supplement those described in "Medium-Term Notes, Series B" above and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

**Coupon Payment**

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Reference Distribution Amount, calculated as of the corresponding Coupon Valuation Date (the "**Coupon Amount**").

If the Reference Distribution Amount on such Coupon Valuation Date is zero, you will not receive any Coupon Amount on the related Coupon Payment Date. The final Coupon Amount will be included in the Cash Settlement Amount if on the last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred.

The "**Coupon Payment Date**" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. The final Coupon Payment Date will be the Maturity Date, subject to adjustment as described herein. The first Coupon Payment Date will be November 20, 2019, subject to adjustment as provided herein.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Exchange Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Exchange Business Day prior to the applicable Coupon Record Date.

The "**Coupon Valuation Date**" means the 30th day of each month, and the 28th day of February of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein. The first Coupon Valuation Date will be October 30, 2019.

The "**Reference Distribution Amount**" means (i) as of the first Coupon Valuation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security, for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the Initial Trade Date to, and including, the first Coupon Valuation Date; (ii) as of any other Coupon Valuation Date (other than the Calculation Date), an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date to, and including, such Coupon Valuation Date; and (iii) as of the Calculation Date, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the record date with respect to any Index Constituent Security for those cash distributions whose ex-dividend date occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date to, but excluding, the Calculation Date.

Notwithstanding the foregoing, with respect to cash distributions for an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the distribution to holders of such Index Constituent Security by the scheduled payment date for such distribution, such distribution will be assumed to be zero for the purposes of calculating the applicable Reference Distribution Amount.

The "**Reference Holder**" is, as of any date of determination, a hypothetical holder of a number of units of each Index Constituent Security equal to two *times* (a) the product of (i) the published unit weighting of that Index Constituent Security as of that date and (ii) the Current Principal Amount, *divided* by (b) the Monthly Initial Closing Level or Loss Rebalancing Closing Level, whichever is more recent.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is October 21, 2049, which will be the second Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under "— Market Disruption Event."

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to:

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Final Measurement Period, *plus*

(b) the final Coupon Amount, if on the last Index Business Day in the Final Measurement Period the Coupon Ex-Date with respect to the final Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Final Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Final Measurement Period, if any.

We refer to this cash payment as the "**Cash Settlement Amount**."

If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation.

$$\textbf{Current Principal Amount} \times \textbf{Index Factor} + \textbf{Final Coupon Amount} - \textbf{Accrued Fees} + \textbf{Stub Reference Distribution Amount}$$

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as**

**applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment at maturity.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option**. See "— UBS's Call Right" and "— Optional Acceleration Upon Minimum Indicative Value" below.

The Stated Principal Amount of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount.

The Current Principal Amount for the period from the Initial Settlement Date to October 31, 2019 (such period, the "**initial calendar month**") will equal $25.00 per Security (unless a Loss Rebalancing Event occurs during the initial calendar month). For each subsequent calendar month, the Current Principal Amount for each Security will be reset as follows on the Monthly Reset Date:

> *New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Monthly Valuation Date – Accrued Fees on the applicable Monthly Valuation Date

In the event of a Loss Rebalancing Event, the Current Principal Amount will be reset on the applicable Loss Rebalancing Reset Date as described below under "— Loss Rebalancing Events".

If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates will occur during the term of the Securities.

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

For each calendar month, the "**Monthly Reset Date**" is the first Exchange Business Day of that month beginning on November 1, 2019 and ending on October 1, 2049, subject to adjustment as described under "— Market Disruption Event." If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, as applicable, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates will occur during the term of the Securities.

For each Monthly Reset Date, the "**Monthly Valuation Date**" is the last Exchange Business Day of the previous calendar month beginning on October 31, 2019 and ending on September 30, 2049, subject to adjustment as described under "— Market Disruption Event." If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and no further Monthly Reset Dates or Monthly Valuation Dates will occur during the term of the Securities.

The "**Index Factor**" is: 1 + (2 × Index Performance Ratio).

The "**Index Performance Ratio**" may be calculated on multiple dates of determination during any applicable calendar month. The formula used to calculate the Index Performance Ratio on any date of determination depends on the number of Loss Rebalancing Events that have occurred in the applicable calendar month.

If no Loss Rebalancing Events have occurred in the applicable calendar month, then on any Index Business Day during a Measurement Period, or on the Monthly Valuation Date, any Redemption Valuation Date, the first Loss Rebalancing Valuation Date of the applicable calendar month or any other date of determination, as applicable, the Index Performance Ratio will be equal to:

$$\frac{\text{Index Valuation Level} - \text{Monthly Initial Closing Level}}{\text{Monthly Initial Closing Level}}$$

where the "**Monthly Initial Closing Level**" for the initial calendar month is 230.9117, the Index Closing Level on October 24, 2019. For each subsequent calendar month, the Monthly Initial Closing Level will equal the Index Closing Level on the Monthly Valuation Date for the previous calendar month. For example, the Monthly Initial Closing Level for November 2019 will equal the Index Closing Level on October 31, 2019, subject to adjustment. If a day that would otherwise be a Monthly Reset Date falls within a Measurement Period, then the Current Principal Amount will not be reset on such date and the Monthly Initial Closing Level for the then-current calendar month will remain the same as it was for the immediately preceding calendar month.

If one or more Loss Rebalancing Events have occurred during the applicable calendar month, then on any Index Business Day during a Measurement Period, or on the Monthly Valuation Date, any Redemption Valuation Date, on each Loss Rebalancing Valuation Date after the first Loss Rebalancing Valuation Date in the applicable calendar month or on any other date of determination, as applicable, the Index Performance Ratio will be equal to:

$$\frac{\text{Index Valuation Level} - \text{the most recent Loss Rebalancing Closing Level}}{\text{the most recent Loss Rebalancing Closing Level}}$$

The "**Index Closing Level**" will equal the closing level of the Index on any date of determination, as reported on the NYSE and Bloomberg L.P.

The "**Index Valuation Level**", as determined by the Security Calculation Agent will equal the arithmetic mean of the Index Closing Levels measured on each Index Business Day during the applicable Measurement Period, or the Index Closing Level on any Monthly Valuation Date, Loss Rebalancing Valuation Date or Redemption Valuation Date, provided that if the Redemption Valuation Date falls in any Measurement Period, for the purposes of calculating the Index Performance Ratio as of the Redemption Valuation Date, the Index Valuation Level on any date of determination during such Measurement Period shall equal (a) 1/5 *times* (b) (i) the sum of the Index Closing Levels on each Index Business Day from, and including, the first Index Business Day of the applicable Measurement Period, to, and including, the date of determination, *plus* (ii) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such Measurement Period, *times* the Index Closing Level on such date of determination.

"**Measurement Period**" means the Final Measurement Period, Call Measurement Period or Acceleration Valuation Period, as applicable.

The "**intraday indicative value**", or "**Indicative Value**" is an amount per Security, as determined by the Security Calculation Agent as of any date of determination equal to (Current Principal Amount on the previous calendar day × Index Factor, calculated using the intraday indicative value of the Index) — Accrued Fees + Coupon Amount with respect to the Coupon Valuation Date immediately preceding the date of determination if on the date of determination the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred + Reference Distribution Amount, calculated as if such time and date of determination is a Coupon Valuation Date.

The "**Current Indicative Principal Amount**", is an amount per Security, as determined by the Security Calculation Agent as of any date of determination, equal to the product of (i) the Current Principal Amount and (ii) the Index Factor as of such date, using the Index Closing Level as of such date as the Index Valuation Level.

The "**Accrued Fees**" as of any date of determination means the sum of (1) the Accrued Tracking Fee as of such date and (2) the Accrued Financing Charges as of such date.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

(a) On the Initial Trade Date, the Accrued Tracking Fee is equal to 0.

(b) On the initial Monthly Valuation Date (or if applicable, on a Loss Rebalancing Date that occurs prior to the initial Monthly Valuation Date), the Accrued Tracking Fee is an amount equal to the product of: (a) the Annual Tracking Fee as of the initial Monthly Valuation Date and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the Initial Trade Date to, and including, the initial Monthly Valuation Date (or Loss Rebalancing Date, as applicable), and the denominator of which is 365.

(c) On any subsequent Monthly Valuation Date other than the Initial Monthly Valuation Date or on any Loss Rebalancing Date, the Accrued Tracking Fee is an amount equal to the product of (a) the Annual Tracking Fee as of such Monthly Valuation Date or Loss Rebalancing Date, as the case may be, and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent), to, and including, such Monthly Valuation Date or Loss Rebalancing Date, as the case may be, and the denominator of which is 365.

(d) On the last Exchange Business Day of an applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, the Accrued Tracking Fee is an amount equal to the product of (a) the Annual Tracking Fee calculated as of the last Exchange Business Day of the applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, and (b) a fraction, the numerator of which is the total number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent), to, and including, (i) such last Exchange Business Day of such Measurement Period, or (ii) such Redemption Valuation Date (or, if the Optional Acceleration Date or Redemption Valuation Date occurs prior to the initial Monthly Valuation Date, the period from, and excluding, the Initial Trade Date), as applicable, and the denominator of which is 365.

The "**Annual Tracking Fee**" is, as of any date of determination, an amount per Security equal to the product of (i) the Annual Tracking Rate and (ii) the Current Indicative Principal Amount as of the immediately preceding Index Business Day.

The "**Annual Tracking Rate**" is 0.85%. The Securities are subject to "**Accrued Financing Charges**" per Security calculated as follows:

(a) On the Initial Trade Date, the Accrued Financing Charge for each Security is equal to $0.

(b) On the initial Monthly Valuation Date (or if applicable, on a Loss Rebalancing Date that occurs prior to the initial Monthly Valuation Date), the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the Initial Trade Date, to and including the initial Monthly Valuation Date (or Loss Rebalancing Date, whichever is more recent) *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

(c) On any subsequent Monthly Valuation Date, the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Valuation Date, whichever is more recent), to and including, the then current Monthly Valuation Date *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

(d) On the last Index Business Day of an applicable Measurement Period, or as of the Redemption Valuation Date, as applicable, the Accrued Financing Charge for each Security will equal (a) the aggregate sum of (i) the Financing Level as of each date starting from, but excluding, the immediately preceding Monthly Valuation Date (or Loss Rebalancing Valuation Date, or, if the Redemption Valuation Date falls in the Initial Calendar Month, the Initial Trade Date, whichever is more recent), to, and including such last Index Business Day in such Measurement Period, or such Redemption Valuation Date, as applicable, *times* (ii) the Financing Rate as of such date, *divided by* (b) 360.

The "**Financing Level**" is, as of any date of determination, an amount that equals the Current Principal Amount.

The "**Financing Rate**" will equal the sum of (a) the "**Financing Spread**" of 0.80% and (b) the London interbank offered rate (British Banker's Association) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Calculation Agent) ("**LIBOR**"), as of 11:00 a.m., London time, on the day that is two London business days prior to the immediately preceding Monthly Valuation Date.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry-accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London business day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The Accrued Financing Charges seek to compensate UBS for providing investors with the potential to receive a leveraged participation in movements in the Index Closing Level and are intended to approximate the monthly financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities.

The "**Final Measurement Period**" means the five Index Business Days from, and including, the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

The "**Stub Reference Distribution Amount**" means, as of the last Index Business Day in a Measurement Period, an amount equal to the gross cash distributions that a Reference Holder would have been entitled to receive in respect of the Index Constituent Securities held by such Reference Holder on the "record date" with respect to any Index Constituent Security, for those cash distributions whose "ex-dividend date" occurs during the period from, but excluding, the immediately preceding Coupon Valuation Date (or if such Redemption Valuation Date or the Optional Acceleration Date occurs prior to the first Coupon Valuation Date, the period from but excluding the Initial Trade Date) to, and including, such last Index Business Day of such Measurement Period, or such Redemption Valuation Date, as applicable; provided, that for the purpose of calculating the Stub Reference Distribution Amount, the Reference Holder will be deemed to hold four-fifths, three-fifths, two-fifths and one-fifth of the shares of each Index Constituent Security it would otherwise hold on the second, third, fourth and fifth Index Business Day, respectively, in such Measurement Period.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently Solactive.

The "**Calculation Date**" means October 13, 2049, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

"**Index Business Day**" means any day on which the Primary Exchange and each Related Exchange are scheduled to be open for trading.

"**Exchange Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

"**Related Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, each exchange or quotation system where trading has a material effect (as determined by the Security Calculation Agent) on the overall market for futures or options contracts relating to such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is linked to the performance of the price return version of the Solactive US High Dividend Low Volatility Index ("SOLHDLV"). The Index is designed to measure the performance of 40 dividend yielding, relatively lower volatility Index Constituent Securities from the universe of the largest 1,000 U.S. listed stocks by market capitalization.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on any applicable Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be October 30, 2019, and the final Redemption Date will be October 14, 2049. In addition, if a call notice has been issued or if acceleration has been triggered, the last Redemption Valuation Date will be the fifth Index Business day prior to the Call Settlement Date or Acceleration Settlement Date, as applicable. If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "Redemption Fee Amount" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation.

| **Closing Indicative Value** | **—** | **Redemption Fee Amount** |
|---|---|---|

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts and/or any Stub Reference Distribution Amount you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon early redemption.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option**. See "— UBS's Call Right" and "— Optional Acceleration Upon Minimum Indicative Value" below.

We discuss these matters in "Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Redemption and Repayment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 12:00 noon (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to the benefit of any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify on or after November 12, 2019 through and including the Maturity Date. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Call Measurement Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Call Valuation Date if on the last Index Business Day in the Call Measurement Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Call Measurement Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Call Measurement Period, if any.

We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the second Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

(a) if the Market Value of Securities outstanding as at the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $250,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

(b) if the Market Value of Securities outstanding as at the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $250,000,000, the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

The "**Market Value**" of the Securities outstanding as of the close of business on the Exchange Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

Intraday indicative value as of such Exchange Business Day × number of Securities outstanding as reported by HDLBIV <Index> on Bloomberg.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount** × **Index Factor** | + | **Coupon Amount** | — | **Accrued Fees** | + | **Stub Reference Distribution Amount** |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon a call.**

**In addition, upon the occurrence of an acceleration event, the Securities may be accelerated and redeemed by UBS, at its option.** See "Specific Terms of the Securities — Optional Acceleration Upon Minimum Indicative Value" below.

**Optional Acceleration Upon Minimum Indicative Value**

If, at any time, the intraday indicative value of the Securities on any Index Business Day equals $2.00 or less (the "**Indicative Value Optional Acceleration Trigger**") (each such day, an "**Optional Acceleration Date**"), all issued and outstanding Securities may be accelerated and redeemed by UBS, at its option (even if the intraday indicative value would later exceed $2.00 on such Optional Acceleration Date or any subsequent Index Business Day) for a cash payment equal to the Acceleration Amount (the "**Acceleration Option**").

In the event that the Indicative Value Optional Acceleration Trigger threshold has been breached, UBS will issue a press release before 9:00 a.m. on the Index Business Day following the Optional Acceleration Date announcing whether or not it has elected to exercise its Acceleration Option. UBS is under no obligation to exercise its Acceleration Option and the Securities may remain outstanding following an Indicative Value Optional Acceleration Trigger Event occurring, if UBS does not elect to exercise such Acceleration Option.

The “**Acceleration Amount**” will equal

(a) the product of

(i) the Current Principal Amount and (ii) the Index Factor as of the last Index Business Day in the Acceleration Valuation Period, *plus*

(b) the Coupon Amount with respect to the Coupon Valuation Date immediately preceding the Optional Acceleration Date if on the last Index Business Day in the Acceleration Valuation Period the Coupon Ex-Date with respect to such Coupon Amount has not yet occurred, *minus*

(c) the Accrued Fees as of the last Index Business Day in the Acceleration Valuation Period, *plus*

(d) the Stub Reference Distribution Amount as of the last Index Business Day in the Acceleration Valuation Period, if any.

If the Acceleration Amount is equal to or less than zero, the payment upon acceleration will be zero.

If the Indicative Value Optional Acceleration Trigger threshold has been breached and UBS elects to exercise its Acceleration Option, you will receive on the Acceleration Settlement Date only the Acceleration Amount in respect of your investment in the Securities. The “**Acceleration Settlement Date**” will be the second Business Day following the last Index Business Day of the Acceleration Valuation Period. The “**Acceleration Valuation Period**” will be the five Index Business Days from, but excluding, the Optional Acceleration Date, subject to adjustment as described under “— Market Disruption Event.” Subject to the prior verification by the Security Calculation Agent that the intraday indicative value of the Securities of $2.00 or less was accurately calculated by the NYSE, UBS must provide notice (which may be provided via press release) to the holders of the Securities that the minimum indicative value threshold has been breached not less than five calendar days prior to the Acceleration Settlement Date.

If the Securities undergo a split or reverse split, the Indicative Value Optional Acceleration Trigger will be adjusted accordingly.

The following graphic illustrates the formula to determine the Acceleration Amount, which has been simplified for ease of presentation.

| | | | | | | |
|---|---|---|---|---|---|---|
| **Current Principal Amount × Index Factor** | + | **Coupon Amount** | — | **Accrued Fees** | + | **Stub Reference Distribution Amount** |

**You may lose all or a substantial portion of your investment upon acceleration. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged monthly return of the Index is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts and/or any Stub Reference Distribution Amount, as applicable, you may be entitled to receive), or if the compounded leveraged monthly return of the Index is negative, you may lose all or a substantial portion of your investment upon acceleration.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to UBS’s Call Right**. See “— UBS’s Call Right” above.

**Loss Rebalancing Events**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A “**Loss Rebalancing Event**” occurs if, at any time, the Intraday Index Value on any Index Business Day (other than an Excluded Day, as defined herein) decreases 20% in value from the previous Monthly Initial Closing Level or Loss Rebalancing Closing Level, whichever is more recent. If a Loss Rebalancing Event occurs, the Current Principal Amount of the Securities will be reset as described below, which will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 2.0. A Loss Rebalancing Event may occur irrespective of whether a Market Disruption Event also occurs on such Index Business Day.

Upon the occurrence of a Loss Rebalancing Event, the Current Principal Amount will be reset on the applicable Loss Rebalancing Reset Date as follows:

*New* Current Principal Amount = *previous* Current Principal Amount × Index Factor on the applicable Loss Rebalancing Valuation Date — Accrued Fees on the applicable Loss Rebalancing Valuation Date

In the event of a Loss Rebalancing Event, the Financing Rate will not be adjusted.

On the next Monthly Valuation Date following one or more Loss Rebalancing Events, the Monthly Initial Closing Level will be replaced with the most recent Loss Rebalancing Closing Level in the calculation of the Index Performance Ratio.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar month. This means both that (i) the Current Principal Amount may be reset more frequently than monthly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

On any Loss Rebalancing Valuation Date, the Accrued Financing Charges for each Security will equal the product of (i) the Financing Level on the immediately preceding Monthly Valuation Date or Loss Rebalancing Valuation Date, whichever is more recent, *times* (ii) the Financing Rate times (iii) the number of calendar days from, but excluding, the immediately preceding Monthly Valuation Date or Loss Rebalancing Valuation Date, whichever is more recent, to, and including, the then current Loss Rebalancing Valuation Date *divided by* (iv) 360.

An "**Excluded Day**" means (i) the Index Business Day immediately preceding any Monthly Valuation Date, (ii) any Monthly Valuation Date, (iii) any Loss Rebalancing Valuation Date (iv) the Index Business Day immediately preceding the first day of the Final Measurement Period or any day after such Index Business Day, (v) the Index Business Day immediately preceding the first day of the Call Measurement Period or any day after such Index Business Day, or (vi) the Optional Acceleration Date or any day after the Optional Acceleration Date.

"**Loss Rebalancing Closing Level**" means the Index Closing Level on the Loss Rebalancing Valuation Date.

"**Loss Rebalancing Reset Date**" means the first Index Business Day immediately following a Loss Rebalancing Valuation Date, subject to adjustment as described under "— Market Disruption Event."

"**Loss Rebalancing Valuation Date**" means:

(a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under "— Market Disruption Event";

(b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event."

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Principal Amount, intraday indicative value, Market Disruption Events, Business Days, Index Business Days, Exchange Business Days, the Index Factor, the Index Performance Ratio, the Index Valuation Level, the Financing Level, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Acceleration Amount that we will pay you upon acceleration, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred and whether any day is a Business Day, Index Business Day or an Exchange Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Acceleration Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Acceleration Amount, the Financing Level, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on an Averaging Date (as defined below), the Index Closing Level for such Averaging Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing (the "**Deferred Averaging Date**") with respect to the Index irrespective of whether, pursuant to such determination, the Deferred Averaging Date would fall on a date originally scheduled to be an Averaging Date. If the postponement described in the preceding sentence results in the Index Closing Level being calculated on a day originally scheduled to be an Averaging Date, for purposes of determining the Index Closing Level on any Averaging Date, the Security Calculation Agent or one of its affiliates, as the case may be, will apply the Index Closing Level for such Deferred Averaging Date (i) on the date(s) of the original Market Disruption Event and (ii) such Averaging Date. For example, if the applicable Measurement Period for purposes of calculating the Call Settlement Amount is based on the arithmetic mean of the Index Closing Levels on November 3, November 4, November 5, November 6 and November 7, and there is a Market Disruption Event with respect to the Index on November 3, but no other Market Disruption Event during such Measurement Period, then the Index Closing Level on November 4 will be used twice to calculate the Call Settlement Amount, and the Call Settlement Amount will be determined based on the arithmetic mean of the Index Closing Levels on November 4, November 4, November 5, November 6 and November 7. The same approach would be applied if there is a Market Disruption Event during any Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date or any Monthly Valuation Date or Loss Rebalancing Valuation Date, the Index Closing Level for such Redemption Valuation Date, Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on November 3 and there is a Market Disruption Event with respect to the Index on November 3, then the Index Closing Level on October 4 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on November 4.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the final Averaging Date or any Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date, as applicable, occurring more than three Index Business Days following the day originally scheduled to be such final Averaging Date or such Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the third Index Business Day following the date originally scheduled to be the final Averaging Date or any Monthly Valuation Date, Redemption Valuation Date or Loss Rebalancing Valuation Date, as applicable, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such third Index Business Day but for such Market Disruption Event. If any Monthly Valuation Date or Loss Rebalancing Valuation Date is postponed as described above, the succeeding Monthly Reset Date or Loss Rebalancing Reset Date will occur on the next Index Business Day following the postponed Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable.

An "**Averaging Date**" means each of the Index Business Days during a Measurement Period, subject to adjustment as described herein.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

(a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities for trading in the Index Constituent Security, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

(b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

(c) the Index is not published; or

(d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be Market Disruption Events with respect to the Index:

(a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

(b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in "Medium-Term Notes, Series B" above. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the four Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the fourth Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in "Medium-Term Notes, Series B" above under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, *plus*
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor discontinues publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"),and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor discontinues publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Monthly Valuation Date or Loss Rebalancing Valuation Date, as applicable, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described herein as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Principal Amount, Index Factor, intraday indicative value, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, or upon early redemption by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An “**Index Replacement Event**” means:

(a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after October 24, 2019 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(c) any event that occurs on or after October 24, 2019 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange or Related Exchange (each as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of units in the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or the units in the Index constituents included in the Index (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

(d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

(e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index or a successor index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Valuation Level, the Index Performance Ratio, the Coupon Amount, the Reference Distribution Amount, the Stub Reference Distribution Amount, if any, the Accrued Fees, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Acceleration Amount that we will pay you in the event of an optional acceleration upon minimum indicative value, if applicable, the Loss Rebalancing Closing Level, if any, the Monthly Initial Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in the prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in "Medium-Term Notes, Series B" above, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of the prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in "Medium-Term Notes, Series B" above.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

**13. ETRACS Quarterly Pay 1.5x Leveraged Alerian MLP Index ETN due June 10, 2050**

## Specific Terms of the Securities

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("DTC") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of UBS AG debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (i.e., in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If a Zero Value Event occurs, for each Security you will receive a cash payment per Security on the Zero Value Settlement Date equal to the (i) the Measurement Period Cash Amount, on the immediately preceding calendar day, plus (ii) the Accrued Dividend, on the date on which the Zero Value Event occurred, minus (iii) the Accrued Fees, on the date on which the Zero Value Event occurred, as described under "— Automatic Acceleration Upon Zero Value Event."

## Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Coupon Amount. The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index constituents would have been entitled to receivein respect of the Index constituents during the relevant period. The Coupon Amount may be equal to zero.

The "**Coupon Amount**" means (i) on any calendar day that is not a Coupon Ex-Date, zero; and (ii) onany calendar day that is a Coupon Ex-Date, an amount per Security equal to the Accrued Dividend onthe Coupon Valuation Date immediately preceding such Coupon Ex-Date. The minimum value of the Coupon Amount will be zero.

The following graphic illustrates the formula to determine the Coupon Amount on a Coupon Ex-Date,which has been simplified for ease of presentation:

$$\text{Coupon Amount} = \text{Accrued Dividend, on the immediately preceding Coupon Valuation Date}$$

If the Securities undergo a split or reverse split, the Coupon Amount will be adjusted accordingly.

The "**Accrued Dividend**" means (i) on the Initial Trade Date, zero; and (ii) on any subsequent calendar day, an amount per Security equal to (a) the Accrued Dividend as of the immediately preceding calendar day, *plus* (b) the Daily Dividend on such calendar day, *minus* the Coupon Amount on such calendar day.

If the Securities undergo a split or reverse split, the Accrued Dividend will be adjusted accordingly.

The "**Daily Dividend**" means, on any calendar day, an amount per Security equal to (a)(i) the IndexDividend Point, *times* (ii) the Leverage Factor, *times* (iii) the Current Principal Amount on the immediately preceding calendar day, *times* (iv) the Residual Factor on the immediately preceding calendar day, *divided by* (b) the Last Reset Index Closing Level.

The "**Index Dividend Point**" means, on any calendar day, an amount per Security equal to the *sum of theproducts* of (i) the cash value of distributions that a hypothetical holder of one share of each Index Constituent Security on such calendar day would have been entitled to receive in respect of that Index Constituent Security for those cash distributions whose "ex-dividend date" occurs on such calendar day and (ii) the number of units of that Index Constituent Security included in the Index as of such date.

The Index Dividend Point may not be publicly disseminated by the Index Calculation Agent. The dataused to calculate the Index Dividend Point is the property of the Index Sponsor and investors may be required to pay a fee and meet any other requirements of the Index Sponsor, in order to access such information. See "Risk Factors — The value of the Index Dividend Point may not be publicly disseminated or otherwise freely accessible to investors".

The Index Dividend Point, on any calendar day, represents the total cash value of distributions that a hypothetical holder of the Index Constituent Securities, in proportion to the weights of the Index Constituent Securities, would have been entitled to receive with respect to any Index Constituent Securities for those cash distributions whose "ex-dividend date" occurs on such calendar day.

The "**Coupon Payment Date**" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. The first Coupon Payment Date will be July 22, 2020, subject to adjustment as providedherein. If such day is not a Coupon Business Day, the Coupon Payment Date shall be the following Coupon Business Day.

If the Final Coupon Ex-Date occurs prior to the Maturity Date, but the Final Coupon Payment Date otherwise occurs after the Maturity Date, in such case, the Final Coupon Payment Date will be the Maturity Date, subject to adjustment as provided herein.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business Day, the Coupon Record Date shall be the immediately preceding Coupon Business Day.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Coupon Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Coupon Business Day immediately preceding the applicable Coupon Record Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-Date will be included in the Zero Value Settlement Amount payable on the Zero Value Settlement Date.

In addition, if a day that would otherwise by a Coupon Ex-Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-date will be included in the Cash Settlement Amount or Call Settlement Amount payable at maturity or call, respectively.

The "**Coupon Valuation Date**" means the 30th day of each March, June, September and December, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein. The first Coupon Valuation Date will be
June 30, 2020.

Notwithstanding the foregoing, with respect to cash distributions or dividends on an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the dividend or distribution to holders of such Index Constituent Security by the scheduled payment date for such dividend or distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Coupon Amount. Any such delayed dividend or distribution payment from the issuer of an Index Constituent Security will be attributed back to the Accrued Dividend and included in the next Coupon Amount.

"**Coupon Business Day**" means any Index Business Day other than an Index Business Day on which banking institutions in New York are generally not authorized or obligated by law, regulation or executive order to open.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is June 10, 2050, which will be the third Business Day following the last IndexBusiness Day in the Final Measurement Period, subject to adjustment as described below under "— Market Disruption Event."

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to the Closing Indicative Value on the last Index Business Day in the applicable Measurement Period. We refer to this cash payment as the "**Cash Settlement Amount**." If the amount socalculated is equal to or less than zero, the payment will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has beensimplified for ease of presentation:

| | | |
|---|---|---|
| Cash Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Final Measurement Period |

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment at maturity. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS. If the Securities are called by UBS or accelerated upon the occurrence of a Zero Value Event, the Call Settlement Amount or Zero Value Settlement Amount, as applicable, may be zero and you may lose all or a substantial portion of your investment.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Stated Principal Amount**" of each Security is \$25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated PrincipalAmount. If the Securities undergo a split or reverse split, the Stated Principal Amount will be adjusted accordingly.

The "**Closing Indicative Value**" per Security, will be calculated as follows:

a) On the Initial Trade Date, \$25.00 per Security;

b) On any other calendar day, prior to the first day of an applicable Measurement Period, an amountper Security equal to:

   (Current Principal Amount on the immediately preceding calendar day × Index Factor) - Accrued Fees + Accrued Dividend

c) From and including the first day of an applicable Measurement Period, an amount per Securityequal to:

   (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor × Residual Factor) - Accrued Fees + Accrued Dividend +Measurement Period Cash Amount

d) The minimum value of the Closing Indicative Value on any calendar day will be zero.

**If a Zero Value Event occurs on any Index Business Day then the Closing Indicative Value will be equal to the Zero Value Settlement Amount on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event. See "— Automatic Acceleration Upon Zero Value Event".**

The actual trading price of the Securities in the secondary market may vary significantly from theirClosing Indicative Value.

If the Securities undergo a split or reverse split, the Closing Indicative Value will be adjusted accordingly.

The "**Current Principal Amount**" represents the unleveraged investment in the Index Constituent Securities per Security at the close of trading on any Reset Valuation Date. The notional financing amount per Security in order to generate the leveraged returns would be approximately half of the Current Principal Amount at the close of trading on any Reset Valuation Date. If a Permanent Deleveraging Event occurs, the leverage of your Securities will be permanently reset to 1.0 and the notional financing amount will be equal to zero. If a Zero Value Event occurs prior to your Securities permanently resetting to 1.0 at the end of the Second Permanent Deleveraging Valuation Date, then yourSecurities will be fully redeemed and you will receive the Zero Value Settlement Amount (which amount may be zero).

The Current Principal Amount per Security, will be calculated as follows:

(1) From and including the Initial Trade Date to and excluding the subsequent Reset Valuation Date, $25.00 per Security;

(2) At the close of trading on each Reset Valuation Date after the Initial Trade Date, the CurrentPrincipal Amount of the Securities will be reset as follows:

*New* Current Principal Amount = (Current Principal Amount on immediately preceding calendar day × Index Factor) – Accrued Fees

The Current Principal Amount will not change until the subsequent Reset Valuation Date.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date.

**If a Zero Value Event occurs on any Index Business Day then the Current Principal Amount will be equal to zero on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

At the close of trading on each Reset Valuation Date, the Current Principal Amount is reset.

The "**Reset Valuation Date**" means:

(1) Any calendar day up to and including the Second Permanent Deleveraging Valuation Date, that is either: (i) the Initial Trade Date, (ii) a Quarterly Reset Valuation Date, (iii) a Loss Rebalancing Valuation Date (iv) the First Permanent Deleveraging Valuation Date, or (v) the Second Permanent Deleveraging Valuation Date; and

(2) Any calendar day following the Second Permanent Deleveraging Valuation Date.

The definition of each valuation date is set forth below.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date and the Last Reset Index Closing Level will remain the same.

The "**Quarterly Reset Valuation Date**" is the last Index Business Day of January, April, July and October of each calendar year beginning on July 31, 2020 and ending on April 29, 2050 (other than an Excluded Day), subject to adjustment as described under "— Market Disruption Event."

For purposes of the "Quarterly Reset Valuation Date" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding the first day of an applicable Measurement Period, and any calendar day thereafter, and (ii) any calendar day after the Second Permanent Deleveraging Valuation Date.

The "**Index Factor**" is: 1 + (Leverage Factor × Index Performance Ratio).

The Index Factor represents the leveraged percentage change in the Index level since the Last Reset Index Closing Level. The Index Factor *times* the applicable Current Principal Amount on the preceding calendar day represents the current value of the unleveraged notional amount per Security that is deemed invested in the Index on any calendar day. This does not reflect the Redemption Amount that an investor would receive upon early redemption on such calendar day.

**If a Zero Value Event occurs at any time during any Index Business Day then the Index Factor will be equal to zero subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Residual Factor**" will be calculated as follows:

a) on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) From and including the first day of an applicable four-day Measurement Period, (a) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such four-day Measurement Period, *divided by* (b) four. For example, on the first Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (3/4), on the second Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (2/4), on the third Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (1/4) and on the last Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal zero.

c) On any calendar day from and including the last Index Business Day of an applicable Measurement Period, the Residual Factor will be equal to zero.

The Residual Factor is intended to approximate the percentage of the Current Principal Amount that is tracking the Index on any given day. The Residual Factor is relevant only during an applicable Measurement Period but otherwise is not a component of the Closing Indicative Value or Current Indicative Value formulas. At the close of trading on each Index Business Day during a four-day Measurement Period, approximately 25% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash.

The "**Leverage Factor**" on any calendar day until the occurrence of a Permanent Deleveraging Event and the close of trading on the Second Permanent Deleveraging Valuation Date, will equal 1.5. If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Leverage Factor will equal 1.0.

The "**Index Performance Ratio**" on any Index Business Day will be equal to:

$$\frac{\text{Index Closing Level} - \text{Last Reset Index Closing Level}}{\text{Last Reset Index Closing Level}}$$

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

The "**Last Reset Index Closing Level**" is the Index Closing Level on the most recent Reset Valuation Date prior to such day. The initial Last Reset Index Closing Level is 147.1048, the Index Closing Level on the Initial Trade Date, as reported by Bloomberg L.P. and Reuters.

The "**Index Closing Level**" on any date of determination is the closing level of the Index, as reported on Bloomberg L.P. and Reuters; provided, however, that if the closing level of the Index as reported on Bloomberg L.P. (or any successor) differs from the closing level of the Index as reported on Reuters (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent. The initial Index Closing Level (which is also the first Last Reset Index Closing Level) is 147.1048, the Index Closing Level measured on the Initial Trade Date, as determined by the Security Calculation Agent.

On any calendar day that is not an Index Business Day, the Index Closing level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

"**Measurement Period**" means the Final Measurement Period or Call Measurement Period, as applicable.

The "**Current Indicative Value**" or "**intraday indicative value"**, as determined by the Security Calculation Agent, is an amount per Security, on an intraday basis on any Index Business Day, equal to:

a) On the Initial Trade Date, $25.00.

b) On any other calendar day prior to the first day of an applicable Measurement Period: (Current Principal Amount on the immediately preceding calendar day × Index Factor, calculated using the Intraday Index Value) **-** Accrued Fees + Accrued Dividend.

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to: (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor, calculated using the Intraday Index Value × Residual Factor, from the immediately preceding calendar day) **-** Accrued Fees + Accrued Dividend + Measurement Period Cash Amount, from the immediately preceding calendar day

d) The minimum value of the Current Indicative Value on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Current Indicative Value (or intraday indicative value). **If a Zero Value Event occurs during any Index Business Day then the Current Indicative Value (or "intraday indicative value") will be equal to the Zero Value Settlement Amount, subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Indicative Value (or intraday indicative value) will be adjusted accordingly.

The "**Accrued Fees**" as of any date of determination means the Accrued Tracking Fee + the Accrued Financing Fee.

If the Securities undergo a split or reverse split, the Accrued Fees will be adjusted accordingly.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

a) On the Initial Trade Date, the Accrued Tracking Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Tracking Fee is equal to: (a) the Accrued Tracking Fee as of the immediately preceding calendar day, *plus* the Daily Tracking Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Tracking Fee is reset to be equal to the Daily Tracking Fee on such calendar day.

The "**Daily Tracking Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Tracking Fee is zero.

b) On any subsequent calendar day, the Daily Tracking Fee is equal to: (a) (i) 0.95%, *times* (ii) the Current Principal Amount on the immediately preceding calendar day, *times* (iii) the Index Factor, on such calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 365.

c) The minimum value of the Daily Tracking Fee on any calendar day will be zero.

The Daily Tracking Fee represents the investor fees calculated each day on the current value of the unleveraged notional amount invested in the Index per Security. These charges accrue and compound during the applicable period, and will reduce any amount you are entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Tracking Fee will be adjusted accordingly.

The Securities are subject to an "**Accrued Financing Fee**" per Security calculated as follows:

a) On the Initial Trade Date, the Accrued Financing Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Financing Fee is equal to: (a) the Accrued Financing Fee as of the immediately preceding calendar day, *plus* (b) the Daily Financing Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Financing Fee is reset to be equalto the Daily Financing Fee on such calendar day.

d) If a Permanent Deleveraging Event occurs, then on any calendar day following the SecondPermanent Deleveraging Valuation Date, the Accrued Financing Fee will be equal to zero.

The "**Daily Financing Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Financing Fee is equal to zero.

b) On any subsequent calendar day, the Daily Financing Fee is equal to: (a) (i) 0.5, *times* (ii) the Financing Rate, on such calendar day, *times* (iii) the Current Principal Amount, on the immediately preceding calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 360.

c) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Daily Financing Fee will be equal to zero.

d) The minimum value of the Daily Financing Fee on any calendar day will be zero.

The Daily Financing Fee seeks to compensate UBS for providing investors with a leveraged participation in movements of the Index and is intended to approximate the financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities. These charges accrue and compound during the applicable period, and will reduce any amount that you will be entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Financing Fee will be adjusted accordingly.

The "**Financing Rate**" will equal the sum of (a) 0.95% and (b) the London interbank offered rate (ICE LIBOR) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Security Calculation Agent) ("**LIBOR**") (or any successor base rate, as described below), as of 11:00 a.m., London time, on the immediately preceding London Business Day. The minimum value of the three-month U.S. Dollar LIBOR rate (or any successor base rate, as described below) used on any calendar day will be zero. The minimum Financing Rate at any time will be 0.95%

For example, 1.68275% was the three-month U.S. Dollar LIBOR rate on February 20, 2020, which was a London Business Day. The Financing Rate on February 21, 2020 would have been equal to 0.95% + 1.68275%, or 2.63275%.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued or is no longer representative of the underlying market or economic reality, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment

factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry- accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR (or such successor base rate, as applicable) for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London Business Day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The "**Measurement Period Cash Amount**" is an amount per Security equal to:

a) $0.00 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) On the first day of an applicable one-day Measurement Period:

c) At the close of trading on such Index Business Day, (the Current Principal Amount on the immediately preceding calendar day × Index Factor on such Index Business Day)

d) From and including the first day of an applicable four-day Measurement Period:

   i. At the close of trading on each Index Business Day during the applicable four-day Measurement Period, the Measurement Period Cash Amount on the immediately preceding calendar day + (Current Principal Amount, on the calendar day immediately preceding the first day of such Measurement Period × 0.25 × Index Factor, on such Index Business Day).

   ii. On any calendar day during an applicable four-day Measurement Period that is not an Index Business Day, the Measurement Period Cash Amount on the immediately preceding Index Business Day.

e) On any calendar day after the last Index Business Day of an applicable Measurement Period, the Measurement Period Cash Amount on the last Index Business Day of such Measurement Period.

The Measurement Period Cash Amount represents the portion of the Current Principal Amount that has been converted to cash on any given day of an applicable Measurement Period and is no longer tracking the Index.

At the close of trading of each Index Business day during a four-day Measurement Period, approximately 25% of the Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period, will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash as well. After the close of trading on the final Index Business Day of an applicable four-day Measurement Period, the Measurement Period Cash Amount will represent the averaged value of the Current Principal Amount that was deemed converted to cash across the four-days of such Measurement Period. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash, at the close of trading of the first day of such Measurement Period.

If the Securities undergo a split or reverse split, the Measurement Period Cash Amount will be adjusted accordingly.

The "**Final Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is less than $100,000,000, the Calculation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is equal to or greater than $100,000,000, the four (4) Index Business Days from and including the Calculation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the Calculation Date, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by MLPRSO <Index> on Bloomberg L.P.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently S&P Dow Jones Indices.

The "**Calculation Date**" means June 2, 2050, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

The Calculation Date represents the first Index Business Day of the Final Measurement Period.

"**Index Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return of the Securities is based upon the performance of the Alerian MLP Index (Bloomberg: "AMZ"). The Index measures the composite performance of energy master limited partnerships ("MLPs"), and is calculated by S&P Dow Jones Indices using a capped, float-adjusted, capitalization weighted methodology. We refer to the MLPs included in the Index as the "Index Constituent Securities." The Index Constituent Securities earn the majority of their cash flow from qualifying activities involving energy commodities, which include pipeline transportation, gathering and processing, storage, production and mining, marketing, marine transportation, services, catalytic conversion, mineral interest, refining, regasification and other related activities.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the same Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be the fourth Index Business Day immediately following the Initial Trade Date and the Final Redemption Date will be the fourth Index Business Day immediately preceding the Maturity date, subject to adjustments. In addition, if a call notice has been issued, the last Redemption Valuation Date will be the fourth Index Business Day prior to the Call Settlement Date, as applicable. If a Zero Value Event occurs, the last Redemption Date will be the date on which the Zero Value Event occurred.

If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation:

| Redemption Amount | = | Closing Indicative Value | - | Redemption Fee Amount |
|---|---|---|---|---|

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon early redemption. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 12:00 noon (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable. If your DTC custodian or your brokerage firm is not a current UBS customer, UBS will be required to on-board such DTC custodian or brokerage firm, in compliance with its internal policies and procedures, before it can accept your Redemption Notice, your Redemption Confirmation or otherwise process your redemption request. This on-boarding process may delay your Redemption Valuation Date and Redemption Date. Furthermore, in certain circumstances, UBS may be unable to on-board your DTC custodian or your brokerage firm.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify through and including the Maturity Date. Upon early redemption in the event we exercise this call right, you will receive a cash payment equal to the Closing Indicative Value on the last Index Business Day in the Call Measurement Period. We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $100,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $100,000,000, the four (4) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

(i) The Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by MLPRSO <Index> on Bloomberg L.P.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Call Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Call Measurement Period |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon a call. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**In addition, upon the occurrence of a Zero Value Event, the Securities may be automatically accelerated and mandatorily redeemed by UBS.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event" below.

**Automatic Acceleration Upon Zero Value Event**

A "**Zero Value Event**" occurs if, on any Index Business Day (other than an Excluded Day), the Intraday Index Value decreases by 66.66667% or more in value from the Last Reset Index Closing Level. From immediately after the Zero Value Event and on all future calendar days, the Index Factor and the Current Principal Amount will be set equal to zero. The Accrued Dividend and Accrued Fees will be fixed at their respective values on the Zero Value Event date and will stay unchanged on all future calendar days.

When the Intraday Index Value decreases 66.66667% in value from the Last Reset Index Closing Level, the Index Factor will equal zero. A Zero Value Event represents the first instance when the effective unleveraged notional amount that is deemed invested in the Index per Security equals zero. It will have the effect of permanently resetting the value of your Securities to a fixed value (which may be zero) and accelerating the Securities. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event. A Zero Value Event is expected to occur only in the narrow window of time between the occurrence of a Permanent Deleveraging Event and completion of the leverage reset to 1.0 at the end of the Second Permanent Deleveraging Valuation Date.

For the purposes of the "Zero Value Event" definition, an "**Excluded Day**" means (i) any calendar day after the Second Permanent Deleveraging Valuation Date (ii) any calendar day on which a Zero Value Event has already occurred, (iii) any calendar day after the occurrence of a Zero Value Event, and (iv) any calendar day after the last day of an applicable Measurement Period.

If a Zero Value Event occurs, all issued and outstanding Securities will be automatically terminated and mandatorily redeemed by UBS and you will receive the Zero Value Settlement Amount on the Zero Value Settlement Date. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.

In the event that a Zero Value Event has occurred, UBS will issue a press release shortly after the event and specify the relevant Zero Value Settlement Date and Zero Value Settlement Amount in respect of your investment in the Securities. The Securities will be suspended from trading intra-day shortly after the event occurs and will likely not be open for trading again on NYSE Arca before the Zero Value Settlement Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended.

The "**Zero Value Settlement Amount**" per Security will be calculated as follows:

a) On any calendar day, to but excluding the first day of an applicable Measurement Period:
(i) the Accrued Dividend, minus (ii) the Accrued Fees, on the date on which the Zero Value Event occurred.

b) From and including the first day of an applicable Measurement Period:
(i) the Measurement Period Cash Amount on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred.

c) The minimum value of the Zero Value Settlement Amount will be zero.

For example:

a) If the Accrued Dividend was $0.04, the Accrued Fees was $0.01, and the Measurement Period Cash Amount was $0, then the Zero Value Settlement Amount would be $0.03.

b) If the Accrued Dividend was $0.01, the Accrued Fees was $0.05, and the Measurement Period Cash Amount was $0, then the Zero Value Settlement Amount would be $0.

c) If the Zero Value Event occurred during a four-day Measurement Period, and the Accrued Dividend was $0.01, the Accrued Fees was $0.03, and the Measurement Period Cash Amount on the immediately preceding calendar day was $6.59, then the Zero Value Settlement Amount would be $6.57.

The following graphics illustrate the formula to determine the Zero Value Settlement Amount, which has been simplified for ease of presentation:

On any calendar day, to but excluding the first day of an applicable four-day Measurement Period:

| | | | | |
|---|---|---|---|---|
| Zero Value Settlement Amount | = | Accrued Dividend | - | Accrued Fees on date Zero Value Event occurred |

From and including the first day of an applicable Measurement Period:

$$\text{Zero Value Settlement Amount} = \text{Measurement Period Cash Amount on immediately preceding calendar day} + \text{Accrued Dividend} - \text{Accrued Fees on date Zero Value Event occurred}$$

The "**Zero Value Settlement Date**" will be the third Index Business Day following the date on which the Zero Value Event occurred. For a detailed description of how the Current Indicative Value (or intraday indicative value) of the Securities is calculated see "Valuation of the Index and the Securities".

**You may lose all or a substantial portion of your investment upon the occurrence of a Zero Value Event. Upon the occurrence of a Zero Value Event you will receive on the Zero Value Settlement Date only the Zero Value Settlement Amount per Security.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right.** See "Specific Terms of the Securities — UBS's Call Right".

**Loss Rebalancing Events**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 1.5. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A "**Loss Rebalancing Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 15% or more in value from the previously Last Reset Index Closing Level.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar quarter. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

For purposes of the "Loss Rebalancing Event" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding any Quarterly Reset Valuation Date, if a Loss Rebalancing Event occurs after 3:15pm on such day, (ii) any Quarterly Reset Valuation Date, (iii) any Loss Rebalancing Valuation Date, (iv) the Index Business Day immediately preceding the first day of an applicable Measurement Period, if a Loss Rebalancing Event occurs after 3:15pm on such day (v) any calendar day from and including the first day of an applicable Measurement Period, (vi) the First or Second Permanent Deleveraging Valuation Dates, (vii) any calendar day after the Second Permanent Deleveraging Valuation Date, (viii) a Zero Value Event date, and (ix) any calendar day after the Zero Value Event date.

"**Loss Rebalancing Valuation Date**" means:

a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under "— Market Disruption Event";

b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event."

**Permanent Deleveraging Event**

A Permanent Deleveraging Event will have the effect of deleveraging your Securities, with the aim of permanently resetting the then-current leverage to 1.0, over two Index Business Days. The leverage at the end of the First Permanent Deleveraging Valuation Date is reset to approximately 1.5 and the leverage at the end of the Second Permanent Deleveraging Valuation Date is reset to 1.0. This means that after a Permanent Deleveraging Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Permanent Deleveraging Event. A Permanent Deleveraging Event is expected to occur only in the narrow window of time between the occurrence of a Loss Rebalancing Event and completion of the leverage reset to 1.5 at the end of the Loss Rebalancing Valuation Date.

A "**Permanent Deleveraging Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 50% or more in value from the Last Reset Index Closing Level.

For purposes of the "Permanent Deleveraging Event" definition, an "**Excluded Day**" means (i) the First or Second Permanent Deleveraging Valuation Dates, (ii) any calendar day after the Second Permanent Deleveraging Valuation Date, (iii) a day upon which a Zero Value Event occurs, (iv) any calendar day after the occurrence of a Zero Value Event, (v) the day which is two Index Business Days prior to the first day of an applicable Measurement Period, if a Permanent Deleveraging Event occurs after 3:15pm on such day and (vi) any calendar day from and including the Index Business Day immediately preceding the first day of an applicable Measurement Period.

In the event that a Permanent Deleveraging Event has occurred, UBS will issue a press release before 9:00 a.m. on the Index Business Day immediately following the date on which the Permanent Deleveraging Event occurred, announcing the Permanent Deleveraging Event and notifying you of the Permanent Deleveraging Valuation Dates.

"**Permanent Deleveraging Valuation Dates**" means the First Permanent Deleveraging Valuation Date and the Second Permanent Deleveraging Valuation Date, each as defined below:

a) The "**First Permanent Deleveraging Valuation Date**" means:

   i. Any Index Business Day, which otherwise would have been a Loss Rebalancing Valuation Date, but on which a Permanent Deleveraging Event has occurred, subject to adjustment as described under "**-** Market Disruption Event";

   ii. If a Permanent Deleveraging Event occurs after 3:15pm on any Index Business Day which would not otherwise have been a Loss Rebalancing Valuation Date, then the first Index Business Day following the occurrence of such Permanent Deleveraging Event, subject to adjustment as described under "— Market Disruption Event".

   The leverage of your Securities will be reset to approximately 1.5 at the close of trading on the First Permanent Deleveraging Valuation Date.

b) The "**Second Permanent Deleveraging Valuation Date**" means the Index Business Day immediately following the First Permanent Deleveraging Valuation Date, subject to adjustment as described under "— Market Disruption Event".

The leverage of your Securities will be reset to approximately 1.0 at the close of trading on the Second Permanent Deleveraging Valuation Date.

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Value (or the "intraday indicative value"), Closing Indicative Value, Market Disruption Events, Business Days, Index Business Days, the Leverage Factor, the Index Factor, the Index Performance Ratio, the Residual Factor, the Index Closing Level, the Financing Rate, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Zero Value Settlement Amount, if any, that we will pay you upon acceleration following the occurrence of a Zero Value Event, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred, whether a Permanent Deleveraging Event has occurred and whether any day is a Business Day or an Index Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of this prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Zero Value Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Zero Value Settlement Amount, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing during a four-day Measurement Period, the Index Closing Level for such day will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. The remaining Index Business Days in the Measurement Period will be postponed accordingly, and the remaining Index Business Days in the Measurement Period will resume again following the suspension of the Market Disruption Event. For example, if the four-day Measurement Period for purposes of calculating the Call Settlement Amount, is scheduled for June 2, June 3, June 4 and June 5, and there is a Market Disruption Event with respect to the Index on June 2, but no other Market Disruption Event during such Call Measurement Period, then June 3 will become the first Index Business Day of the Measurement Period, June 4th the second Index Business Day, June 5th the third Index Business Day and the next Index Business Day after June 5th would be the final day of the Measurement Period. The same approach would be applied if there is a Market Disruption Event during a four-day Final Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or any Reset Valuation Date, the Index Closing Level for such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on June 2 and there is a Market Disruption Event with respect to the Index on June 2, then the Index Closing Level on June 3 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on June 3.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the affected Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or Reset Valuation Date occurring more than five Index Business Days following the day originally scheduled to be such Index Business Day of the Measurement Period or such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the fifth Index Business Day following the date originally scheduled to be such Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date, Calculation Date or any Reset Valuation Date, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such fifth Index Business Day but for such Market Disruption Event.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

c) the Index is not published; or

d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled “Use of Proceeds and Hedging”.

The following events will not be Market Disruption Events with respect to the Index:

a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the three Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the third Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking,

*plus*

the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor’s Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody’s Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor or Index Calculation Agent discontinue publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor or Index Calculation Agent does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a “**successor index**”), and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration upon the occurrence of a Zero Value Event or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor or Index Calculation Agent discontinue publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor or Index Calculation Agent do not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described in this prospectus supplement as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Value or intraday indicative value, Closing Indicative Value, Index Factor, Index Performance Ratio, Residual Factor, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, upon early redemption or upon acceleration upon the occurrence of a Zero Value Event by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An "**Index Replacement Event**" means:

a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after June 2, 2020 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

c) any event that occurs on or after June 2, 2020 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index, a successor index or a substitute index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Performance Ratio, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Zero Value Settlement Amount, if any, that we will pay you in the event of acceleration upon the occurrence of a Zero Value Event, if applicable, the Last Reset Index Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in this prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the attached prospectus, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 14. ETRACS Quarterly Pay 1.5X Leveraged MVIS BDC Index ETN due June 10, 2050

### Specific Terms of the Securities

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("**DTC**") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of UBS AG debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (*i.e.*, in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If a Zero Value Event occurs, for each Security you will receive a cash payment per Security on the Zero Value Settlement Date equal to the (i) the Measurement Period Cash Amount, on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, on the date on which the Zero Value Event occurred, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred, as described under "— Automatic Acceleration Upon Zero Value Event."

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Coupon Amount. The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index constituents would have been entitled to receive in respect of the Index constituents during the relevant period. The Coupon Amount may be equal to zero.

The "**Coupon Amount**" means (i) on any calendar day that is not a Coupon Ex-Date, zero; and (ii) on any calendar day that is a Coupon Ex-Date, an amount per Security equal to the Accrued Dividend on the Coupon Valuation Date immediately preceding such Coupon Ex-Date. The minimum value of the Coupon Amount will be zero.

The following graphic illustrates the formula to determine the Coupon Amount on a Coupon Ex-Date, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| **Coupon Amount** | = | **Accrued Dividend, on the immediately preceding Coupon Valuation Date** |

If the Securities undergo a split or reverse split, the Coupon Amount will be adjusted accordingly.

The "**Accrued Dividend**" means (i) on the Initial Trade Date, zero; and (ii) on any subsequent calendar day, an amount per Security equal to (a) the Accrued Dividend as of the immediately preceding calendar day, *plus* (b) the Daily Dividend on such calendar day, *minus* the Coupon Amount on such calendar day.

If the Securities undergo a split or reverse split, the Accrued Dividend will be adjusted accordingly.

The "**Daily Dividend**" means, on any calendar day, an amount per Security equal to (a)(i) the Index Dividend Point, *times* (ii) the Leverage Factor, *times* (iii) the Current Principal Amount on the immediately preceding calendar day, *times* (iv) the Residual Factor on the immediately preceding calendar day, *divided by* (b) the Last Reset Index Closing Level.

The "**Index Dividend Point**" means, on any calendar day, an amount per Security equal to the *sum of the products* of (i) the cash value of distributions that a hypothetical holder of one share of each Index Constituent Security on such calendar day would have been entitled to receive in respect of that Index Constituent Security for those cash distributions whose "ex-dividend date" occurs on such calendar day and (ii) the number of units of that Index Constituent Security included in the Index as of such date.

The Index Dividend Point may not be publicly disseminated by the Index Calculation Agent. The data used to calculate the Index Dividend Point is the property of the Index Calculation Agent and investors may be required to pay a fee and meet any other requirements of the Index Calculation Agent, in order to access such information. See "Risk Factors — The value of the Index Dividend Point may not be publicly disseminated or otherwise freely accessible to investors".

The Index Dividend Point, on any calendar day, represents the total cash value of distributions that a hypothetical holder of the Index Constituent Securities, in proportion to the weights of the Index Constituent Securities, would have been entitled to receive with respect to any Index Constituent Securities for those cash distributions whose "ex-dividend date" occurs on such calendar day.

The "**Coupon Payment Date**" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business Day, the Coupon Payment Date shall be the following Coupon Business Day

If the final Coupon Ex-Date occurs prior to the Maturity Date, but the final Coupon Payment Date otherwise occurs after the Maturity Date, in such case, the final Coupon Payment Date will be the Maturity Date, subject to adjustment as provided herein.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business Day, the Coupon Record Date shall be the immediately preceding Coupon Business Day.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Coupon Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Coupon Business Day immediately preceding the applicable Coupon Record Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-Date will be included in the Zero Value Settlement Amount payable on the Zero Value Settlement Date.

In addition, if a day that would otherwise by a Coupon Ex-Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-date will be included in the Cash Settlement Amount or Call Settlement Amount payable at maturity or call, respectively.

The "**Coupon Valuation Date**" means the 30th day of each March, June, September and December, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein.

Notwithstanding the foregoing, with respect to cash distributions or dividends on an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the dividend or distribution to holders of such Index Constituent Security by the scheduled payment date for such dividend or distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Coupon Amount. Any such delayed dividend or distribution payment from the issuer of an Index Constituent Security will be attributed back to the Accrued Dividend and included in the next Coupon Amount.

"**Coupon Business Day**" means any Index Business day other than an Index Business Day on which banking institutions in New York are generally not authorized or obligated by law, regulation or executive order to open.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is June 10, 2050, which will be the third Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under
"— Market Disruption Event."

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to the Closing Indicative Value on the last Index Business Day in the applicable Measurement Period. We refer to this cash payment as the "**Cash Settlement Amount**." If the amount so calculated is equal to or less than zero, the payment will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| **Cash Settlement Amount** | = | **Closing Indicative Value, on last Index Business Day in Final Measurement Period** |

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment at maturity. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to the UBS Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS. If the Securities are called by UBS or accelerated upon the occurrence of a Zero Value Event, the Call Settlement Amount or Zero Value Settlement Amount, as applicable, may be zero and you may lose all or a substantial portion of your investment.** See "Specific Terms of the Securities — UBS Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Stated Principal Amount**" of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount. If the Securities undergo a split or reverse split, the Stated Principal Amount will be adjusted accordingly.

The "**Closing Indicative Value**" per Security, will be calculated as follows:

a) On the Initial Trade Date, $25.00 per Security;

b) On any other calendar day, prior to the first day of an applicable Measurement Period, an amount per Security equal to:

   (Current Principal Amount on the immediately preceding calendar day × Index Factor) — Accrued Fees + Accrued Dividend

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

   (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor × Residual Factor) — Accrued Fees + Accrued Dividend + Measurement Period Cash Amount

d) The minimum value of the Closing Indicative Value on any calendar day will be zero.

**If a Zero Value Event occurs on any Index Business Day then the Closing Indicative Value will be equal to the Zero Value Settlement Amount on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "– Automatic Acceleration Upon Zero Value Event".

The actual trading price of the Securities in the secondary market may vary significantly from their Closing Indicative Value.

If the Securities undergo a split or reverse split, the Closing Indicative Value will be adjusted accordingly.

The "**Current Principal Amount**" represents the unleveraged investment in the Index Constituent Securities per Security at the close of trading on any Reset Valuation Date. The notional financing amount per Security in order to generate the leveraged returns would be approximately half of the Current Principal Amount at the close of trading on any Reset Valuation Date. If a Permanent Deleveraging Event occurs, the leverage of your Securities will be permanently reset to 1.0 and the notional financing amount will be equal to zero. If a Zero Value Event occurs prior to your Securities permanently resetting to 1.0 at the end of the Second Permanent Deleveraging Valuation Date, then your Securities will be fully redeemed and you will receive the Zero Value Settlement Amount (which amount may be zero).

The Current Principal Amount per Security, will be calculated as follows:

e) From and including the Initial Trade Date to and excluding the subsequent Reset Valuation Date, $25.00 per Security;

f) At the close of trading on each Reset Valuation Date after the Initial Trade Date, the Current Principal Amount of the Securities will be reset as follows:

   *New* Current Principal Amount = (Current Principal Amount on immediately preceding calendar day × Index Factor) – Accrued Fees

The Current Principal Amount will not change until the subsequent Reset Valuation Date.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date.

**If a Zero Value Event occurs on any Index Business Day then the Current Principal Amount will be equal to zero on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

At the close of trading on each Reset Valuation Date, the Current Principal Amount is reset.

The "**Reset Valuation Date**" means:

1. Any calendar day up to and including the Second Permanent Deleveraging Valuation Date, that is either: (i) the Initial Trade Date, (ii) a Quarterly Reset Valuation Date, (iii) a Loss Rebalancing Valuation Date (iv) the First Permanent Deleveraging Valuation Date, or (v) the Second Permanent Deleveraging Valuation Date; and
2. Any calendar day following the Second Permanent Deleveraging Valuation Date.

The definition of each valuation date is set forth below.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date and the Last Reset Index Closing Level will remain the same.

The "**Quarterly Reset Valuation Date**" is the last Index Business Day of January, April, July and October of each calendar year beginning on July 31, 2020 and ending on April 29, 2050 (other than an Excluded Day), subject to adjustment as described under "— Market Disruption Event."

For purposes of the "Quarterly Reset Valuation Date" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding the first day of an applicable Measurement Period, and any calendar day thereafter, and (ii) any calendar day after the Second Permanent Deleveraging Valuation Date.

The "**Index Factor**" is: 1 + (Leverage Factor × Index Performance Ratio).

The Index Factor represents the leveraged percentage change in the Index level since the Last Reset Index Closing Level. The Index Factor *times* the applicable Current Principal Amount on the preceding calendar day represents the current value of the unleveraged notional amount per Security that is deemed invested in the Index on any calendar day. This does not reflect the Redemption Amount that an investor would receive upon early redemption on such calendar day.

**If a Zero Value Event occurs at any time during any Index Business Day then the Index Factor will be equal to zero subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Residual Factor**" will be calculated as follows:

a) 1.0 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) From and including the first day of an applicable four-day Measurement Period, (a) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such four-day Measurement Period, *divided by* (b) four.

   For example, on the first Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (3/4), on the second Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (2/4), on the third Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (1/4) and on the last Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal zero

c) On any calendar day from and including the last Index Business Day of an applicable Measurement Period, the Residual Factor will be equal to zero.

The Residual Factor is intended to approximate the percentage of the Current Principal Amount that is tracking the Index on any given day. The Residual Factor is relevant only during an applicable Measurement Period but otherwise is not a component of the Closing Indicative Value or Current Indicative Value formulas. At the close of trading on each Index Business Day during a four-day Measurement Period, approximately 25% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash.

The "**Leverage Factor**" on any calendar day until the occurrence of a Permanent Deleveraging Event and the close of trading on the Second Permanent Deleveraging Valuation Date, will equal 1.5. If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Leverage Factor will equal 1.0.

The "**Index Performance Ratio**" on any Index Business Day will be equal to:

$$\frac{\text{Index Closing Level} - \text{Last Reset Index Closing Level}}{\text{Last Reset Index Closing Level}}$$

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

The "**Last Reset Index Closing Level**" is the Index Closing Level on the most recent Reset Valuation Date prior to such day. Immediately after market close on the Effective Date, the Last Reset Index Closing Level is adjusted to be 536.663, the Index Closing Level of the successor index on the Effective Date, as reported by Bloomberg L.P.

The "**Index Closing Level**" on any date of determination is the closing level of the Index, as reported on Bloomberg L.P. 536.663 is the Index Closing Level of the successor index on the Effective Date, as determined by the Security Calculation Agent.

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

"**Measurement Period**" means the Final Measurement Period or Call Measurement Period, as applicable.

The "**Current Indicative Value**" or "**intraday indicative value"**, as determined by the Security Calculation Agent, is an amount per Security, on an intraday basis on any Index Business Day, equal to:

a) On the Initial Trade Date, $25.00.

b) On any other calendar day prior to the first day of an applicable Measurement Period:

(Current Principal Amount on the immediately preceding calendar day × Index Factor, calculated using the Intraday Index Value) — Accrued Fees + Accrued Dividend.

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

(Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor, calculated using the Intraday Index Value× Residual Factor, from the immediately preceding calendar day) — Accrued Fees + Accrued Dividend + Measurement Period Cash Amount, from the immediately preceding calendar day

d) The minimum value of the Current Indicative Value on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Current Indicative Value (or intraday indicative value). **If a Zero Value Event occurs during any Index Business Day then the Current Indicative Value (or "intraday indicative value") will be equal to the Zero Value Settlement Amount, subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Indicative Value (or intraday indicative value) will be adjusted accordingly.

The "**Accrued Fees**" as of any date of determination means the Accrued Tracking Fee + the Accrued Financing Fee.

If the Securities undergo a split or reverse split, the Accrued Fees will be adjusted accordingly.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

a) On the Initial Trade Date, the Accrued Tracking Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Tracking Fee is equal to: (a) the Accrued Tracking Fee as of the immediately preceding calendar day, *plus* the Daily Tracking Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Tracking Fee is reset to be equal to the Daily Tracking Fee on such calendar day.

The "**Daily Tracking Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Tracking Fee is zero.

b) On any subsequent calendar day, the Daily Tracking Fee is equal to: (a) (i) 0.95%, *times* (ii) the Current Principal Amount on the immediately preceding calendar day, *times* (iii) the Index Factor, on such calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 365.

c) The minimum value of the Daily Tracking Fee on any calendar day will be zero.

The Daily Tracking Fee represents the investor fees calculated each day on the current value of the unleveraged notional amount invested in the Index per Security. These charges accrue and compound during the applicable period, and will reduce any amount you are entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Tracking Fee will be adjusted accordingly.

The Securities are subject to an "**Accrued Financing Fee**" per Security calculated as follows:

a) On the Initial Trade Date, the Accrued Financing Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Financing Fee is equal to: (a) the Accrued Financing Fee as of the immediately preceding calendar day, *plus* (b) the Daily Financing Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Financing Fee is reset to be equal to the Daily Financing Fee on such calendar day.

d) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Accrued Financing Fee will be equal to zero.

The "**Daily Financing Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Financing Fee is equal to zero.

b) On any subsequent calendar day, the Daily Financing Fee is equal to: (a) (i) 0.5, *times* (ii) the Financing Rate, on such calendar day, *times* (iii) the Current Principal Amount, on the immediately preceding calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 360.

c) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Daily Financing Fee will be equal to zero.

d) The minimum value of the Daily Financing Fee on any calendar day will be zero.

The Daily Financing Fee seeks to compensate UBS for providing investors with a leveraged participation in movements of the Index and is intended to approximate the financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities. These charges accrue and compound during the applicable period, and will reduce any amount that you will be entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Financing Fee will be adjusted accordingly.

The "**Financing Rate**" will equal the sum of (a) 0.95% and (b) the London interbank offered rate (ICE LIBOR) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Security Calculation Agent) ("**LIBOR**") (or any successor base rate, as described below), as of 11:00 a.m., London time, on the immediately preceding London Business Day. The minimum value of the three-month U.S. Dollar LIBOR rate (or any successor base rate, as described below) used on any calendar day will be zero. The minimum Financing Rate at any time will be 0.95%

For example, 1.68275% was the three-month U.S. Dollar LIBOR rate on February 20, 2020, which was a London Business Day. The Financing Rate on February 21, 2020 would have been equal to 0.95% + 1.68275%, or 2.63275%.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued or is no longer representative of the underlying market or economic reality, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry- accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR (or such successor base rate, as applicable) for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London Business Day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The "**Measurement Period Cash Amount**" is an amount per Security equal to:

a) $0.00 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) On the first day of an applicable one-day Measurement Period:

At the close of trading on such Index Business Day, (the Current Principal Amount on the immediately preceding calendar day × Index Factor on such Index Business Day)

c) From and including the first day of an applicable four-day Measurement Period:

i. At the close of trading on each Index Business Day during the applicable four-day Measurement Period, the Measurement Period Cash Amount on the immediately preceding calendar day + (Current Principal Amount, on the calendar day immediately preceding the first day of such Measurement Period × 0.25 × Index Factor, on such Index Business Day).

ii. On any calendar day during an applicable four-day Measurement Period that is not an Index Business Day, the Measurement Period Cash Amount on the immediately preceding Index Business Day.

d) On any calendar day after the last Index Business Day of an applicable Measurement Period, the Measurement Period Cash Amount on the last Index Business Day of such Measurement Period.

The Measurement Period Cash Amount represents the portion of the Current Principal Amount that has been converted to cash on any given day of an applicable Measurement Period and is no longer tracking the Index.

At the close of trading of each Index Business Day during a four-day Measurement Period, approximately 25% of the Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period, will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash as well. After the close of trading on the final Index Business Day of an applicable four-day Measurement Period, the Measurement Period Cash Amount will represent the averaged value of the Current Principal Amount that was deemed converted to cash across the four-days of such Measurement Period. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash, at the close of trading of the first day of such Measurement Period.

If the Securities undergo a split or reverse split, the Measurement Period Cash Amount will be adjusted accordingly.

The "**Final Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is less than $25,000,000, the Calculation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is equal to or greater than $25,000,000, the four (4) Index Business Days from and including the Calculation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the Calculation Date, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by BDCXSO <Index> on Bloomberg L.P.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is Solactive AG as of market close on July 30, 2021.

The "**Calculation Date**" means June 2, 2050, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

The Calculation Date represents the first Index Business Day of the Final Measurement Period.

"**Index Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is linked to the performance of the MVIS US Business Development Companies Index, the successor index to the Wells Fargo Business Development Company Index (the "**Original Index**") effective after market close on the July 30, 2021 (the "**Effective Date**") (Bloomberg: "MVBIZD"). On April 26, 2021, the Security Calculation Agent announced that, pursuant to the terms of the Securities, it has determined that the Index is comparable to the Original Index and approved the Index as the successor index for the Securities following the discontinuation of publication of the Original Index. The Index is intended to measure the performance of the largest and most liquid companies which are treated as business development companies and are incorporated in the United States. The "Index Sponsor" is MV Index Solutions GmbH.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the same Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be the fourth Index Business Day immediately following the Initial Trade Date and the Final Redemption Date will be the fourth Index Business Day immediately preceding the Maturity Date, subject to adjustments. In addition, if a call notice has been issued, the last Redemption Valuation Date will be the fourth Index Business Day prior to the Call Settlement Date, as applicable. If a Zero Value Event occurs, the last Redemption Date will be the date on which the Zero Value Event occurred.

If a market disruption event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation:

$$\text{Redemption Amount} = \text{Closing Indicative Value} - \text{Redemption Fee Amount}$$

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon early redemption. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to the UBS Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS.** See "Specific Terms of the Securities — UBS Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 12:00 noon (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable. If your DTC custodian or your brokerage firm is not a current UBS customer, UBS will be required to on-board such DTC custodian or brokerage firm, in compliance with its internal policies and procedures, before it can accept your Redemption Notice, your Redemption Confirmation or otherwise process your redemption request. This on-boarding process may delay your Redemption Valuation Date and Redemption Date. Furthermore, in certain circumstances, UBS may be unable to on-board your DTC custodian or your brokerage firm.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such waiver or election to accelerate the Redemption Valuation Date.

**UBS Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen

(18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify through and including the Maturity Date. Upon early redemption in the event we exercise this call right, you will receive a cash payment equal to the Closing Indicative Value on the last Index Business Day in the Call Measurement Period. We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its call right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a market disruption event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $25,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $25,000,000, the four (4) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

> (i) The Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by BDCXSO <Index> on Bloomberg L.P.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Call Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Call Measurement Period |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon a call. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**In addition, upon the occurrence of a Zero Value Event, the Securities may be automatically accelerated and mandatorily redeemed by UBS.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event" below.

**Automatic Acceleration Upon Zero Value Event**

A "**Zero Value Event**" occurs if, on any Index Business Day (other than an Excluded Day), the Intraday Index Value decreases by 66.66667% or more in value from the Last Reset Index Closing Level. From immediately after the Zero Value

Event and on all future calendar days, the Index Factor and the Current Principal Amount will be set equal to zero. The Accrued Dividend and Accrued Fees will be fixed at their respective values on the Zero Value Event date and will stay unchanged on all future calendar days.

When the Intraday Index Value decreases 66.66667% in value from the Last Reset Index Closing Level, the Index Factor will equal zero. A Zero Value Event represents the first instance when the effective unleveraged notional amount that is deemed invested in the Index per Security equals zero. It will have the effect of permanently resetting the value of your Securities to a fixed value (which may be zero) and accelerating the Securities. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event. A Zero Value Event is expected to occur only in the narrow window of time between the occurrence of a Permanent Deleveraging Event and completion of the leverage reset to 1.0 at the end of the Second Permanent Deleveraging Valuation Date.

For the purposes of the "Zero Value Event" definition, an "**Excluded Day**" means (i) any calendar day after the Second Permanent Deleveraging Valuation Date (ii) any calendar day on which a Zero Value Event has already occurred, (iii) any calendar day after the occurrence of a Zero Value Event, and (iv) any calendar day after the last day of an applicable Measurement Period.

If a Zero Value Event occurs, all issued and outstanding Securities will be automatically terminated and mandatorily redeemed by UBS and you will receive the Zero Value Settlement Amount on the Zero Value Settlement Date. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.

In the event that a Zero Value Event has occurred, UBS will issue a press release shortly after the event and specify the relevant Zero Value Settlement Date and Zero Value Settlement Amount in respect of your investment in the Securities. The Securities will be suspended from trading intra-day shortly after the event occurs and will likely not be open for trading again on NYSE Arca before the Zero Value Settlement Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended.

The "**Zero Value Settlement Amount**" per Security will be calculated as follows:

a) On any calendar day, to but excluding the first day of an applicable Measurement Period:

   (i) the Accrued Dividend, *minus* (ii) the Accrued Fees, on the date on which the Zero Value Event occurred.

b) From and including the first day of an applicable Measurement Period:

   (i) the Measurement Period Cash Amount on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred.

c) The minimum value of the Zero Value Settlement Amount will be zero.

For example:

a) If the Accrued Dividend was $0.04, the Accrued Fees was $0.01, and the Measurement Period Cash Amount was $0, then the Zero Value Settlement Amount would be $0.03.

b) If the Accrued Dividend was $0.01, the Accrued Fees was $0.05, and the Measurement Period Cash Amount was $0, then the Zero Value Settlement Amount would be $0.

c) If the Zero Value Event occurred during a four-day Measurement Period, and the Accrued Dividend was $0.01, the Accrued Fees was $0.03, and the Measurement Period Cash Amount on the immediately preceding calendar day was $6.59, then the Zero Value Settlement Amount would be $6.57.

The following graphics illustrate the formula to determine the Zero Value Settlement Amount, which has been simplified for ease of presentation:

On any calendar day, to but excluding the first day of an applicable four-day Measurement Period:

| | | | | |
|---|---|---|---|---|
| Zero Value Settlement Amount | = | Accrued Dividend | - | Accrued Fees on date Zero Value Event occurred |

From and including the first day of an applicable Measurement Period:

$$\text{Zero Value Settlement Amount} = \text{Measurement Period Cash Amount on immediately preceding calendar day} + \text{Accrued Dividend} - \text{Accrued Fees on date Zero Value Event occurred}$$

The "**Zero Value Settlement Date**" will be the third Index Business Day following the date on which the Zero Value Event occurred. For a detailed description of how the Current Indicative Value (or intraday indicative value) of the Securities is calculated see "Valuation of the Index and the Securities".

**You may lose all or a substantial portion of your investment upon the occurrence of a Zero Value Event. Upon the occurrence of a Zero Value Event you will receive on the Zero Value Settlement Date only the Zero Value Settlement Amount per Security.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to the UBS Call Right.** See "Specific Terms of the Securities — UBS Call Right".

**Loss Rebalancing Events**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 1.5. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A "**Loss Rebalancing Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 15% or more in value from the previously Last Reset Index Closing Level.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar quarter. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

For purposes of the "Loss Rebalancing Event" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding any Quarterly Reset Valuation Date, if a Loss Rebalancing Event occurs after 3:15pm on such day, (ii) any Quarterly Reset Valuation Date, (iii) any Loss Rebalancing Valuation Date, (iv) the Index Business Day immediately preceding the first day of an applicable Measurement Period, if a Loss Rebalancing Event occurs after 3:15pm on such day (v) any calendar day from and including the first day of an applicable Measurement Period, (vi) the First or Second Permanent Deleveraging Valuation Dates, (vii) any calendar day after the Second Permanent Deleveraging Valuation Date, (viii) a Zero Value Event date, and (ix) any calendar day after the Zero Value Event date.

"**Loss Rebalancing Valuation Date**" means:

a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under "— Market Disruption Event";

b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event."

**Permanent Deleveraging Event**

A Permanent Deleveraging Event will have the effect of deleveraging your Securities, with the aim of permanently resetting the then-current leverage to 1.0, over two Index Business Days. The leverage at the end of the First Permanent Deleveraging Valuation Date is reset to approximately 1.5 and the leverage at the end of the Second Permanent Deleveraging Valuation Date is reset to 1.0. This means that after a Permanent Deleveraging Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Permanent Deleveraging Event. A Permanent Deleveraging Event is expected to occur only in the narrow window of time between the occurrence of a Loss Rebalancing Event and completion of the leverage reset to 1.5 at the end of the Loss Rebalancing Valuation Date.

A "**Permanent Deleveraging Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 50% or more in value from the Last Reset Index Closing Level.

For purposes of the “Permanent Deleveraging Event” definition, an “**Excluded Day**” means (i) the First or Second Permanent Deleveraging Valuation Dates, (ii) any calendar day after the Second Permanent Deleveraging Valuation Date, (iii) a day upon which a Zero Value Event occurs, (iv) any calendar day after the occurrence of a Zero Value Event, (v) the day which is two Index Business Days prior to the first day of an applicable Measurement Period, if a Permanent Deleveraging Event occurs after 3:15pm on such day and (vi) any calendar day from and including the Index Business Day immediately preceding the first day of an applicable Measurement Period.

In the event that a Permanent Deleveraging Event has occurred, UBS will issue a press release before 9:00 a.m. on the Index Business Day immediately following the date on which the Permanent Deleveraging Event occurred, announcing the Permanent Deleveraging Event and notifying you of the Permanent Deleveraging Valuation Dates.

“**Permanent Deleveraging Valuation Dates**” means the First Permanent Deleveraging Valuation Date and the Second Permanent Deleveraging Valuation Date, each as defined below:

a) The “**First Permanent Deleveraging Valuation Date**” means:

   i. Any Index Business Day, which otherwise would have been a Loss Rebalancing Valuation Date, but on which a Permanent Deleveraging Event has occurred, subject to adjustment as described under “- Market Disruption Event”;

   ii. If a Permanent Deleveraging Event occurs after 3:15pm on any Index Business Day which would not otherwise have been a Loss Rebalancing Valuation Date, then the first Index Business Day following the occurrence of such Permanent Deleveraging Event, subject to adjustment as described under “— Market Disruption Event”.

   The leverage of your Securities will be reset to approximately 1.5 at the close of trading on the First Permanent Deleveraging Valuation Date.

b) The “**Second Permanent Deleveraging Valuation Date**” means the Index Business Day immediately following the First Permanent Deleveraging Valuation Date, subject to adjustment as described under “— Market Disruption Event”.

   The leverage of your Securities will be reset to approximately 1.0 at the close of trading on the Second Permanent Deleveraging Valuation Date.

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Value (or the “intraday indicative value”), Closing Indicative Value, market disruption events, Business Days, Index Business Days, the Leverage Factor, the Index Factor, the Index Performance Ratio, the Residual Factor, the Index Closing Level, the Financing Rate, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Zero Value Settlement Amount, if any, that we will pay you upon acceleration following the occurrence of a Zero Value Event, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred, whether a Permanent Deleveraging Event has occurred and whether any day is a Business Day or an Index Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of this prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Zero Value Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Zero Value Settlement Amount, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a market disruption event with respect to the Index has occurred or is continuing during a four-day Measurement Period, the Index Closing Level for such day will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a market disruption event does not occur or is not continuing with respect to the Index. The remaining Index Business Days in the Measurement Period will be postponed accordingly, and the remaining Index Business Days in the Measurement Period will resume again following the suspension of the market disruption event. For example, if the four-day Measurement Period for purposes of calculating the Call Settlement Amount, is scheduled for June 2, June 3, June 4 and June 5, and there is a market disruption event with respect to the Index on June 2, but no other market disruption event during such Call Measurement Period, then June 3 will become the first Index Business Day of the Measurement Period, June 4th the second Index Business Day, June 5th the third Index Business Day and the next Index Business Day after June 5th would be the final day of the Measurement Period. The same approach would be applied if there is a market disruption event during a four-day Final Measurement Period.

To the extent a market disruption event with respect to the Index has occurred or is continuing on the Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or any Reset Valuation Date, the Index Closing Level for such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a market disruption event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on June 2 and there is a market disruption event with respect to the Index on June 2, then the Index Closing Level on June 3 will be used to calculate the Redemption Amount, assuming that no such market disruption event has occurred or is continuing on June 3.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the affected Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or Reset Valuation Date occurring more than five Index Business Days following the day originally scheduled to be such Index Business Day of the Measurement Period or such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date. If a market disruption event has occurred or is continuing with respect to the Index on the fifth Index Business Day following the date originally scheduled to be such Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date, Calculation Date or any Reset Valuation Date, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such fifth Index Business Day but for such market disruption event.

Any of the following will be a market disruption event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

c) the Index is not published; or

d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be market disruption events with respect to the Index:

a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the three Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the third Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:
the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking,

*plus*

the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor or Index Calculation Agent discontinues publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor or Index Calculation Agent does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"), and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration upon the occurrence of a Zero Value Event or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor or Index Calculation Agent discontinues publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor or Index Calculation Agent do not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described in this prospectus supplement as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Value or intraday indicative value, Closing Indicative Value, Index Factor, Index Performance Ratio, Residual Factor, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, upon early redemption or upon acceleration upon the occurrence of a Zero Value Event by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An "**Index Replacement Event**" means:

a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after June 2, 2020 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

c) any event that occurs on or after June 2, 2020 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index, a successor index or a substitute index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Performance Ratio, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Zero Value Settlement Amount, if any, that we will pay you in the event of acceleration upon the occurrence of a Zero Value Event, if applicable, the Last Reset Index Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in this prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the attached prospectus, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC’s settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 15. ETRACS Monthly Pay 1.5x Leveraged Mortgage REIT ETN due June 10, 2050

### Specific Terms of the Securities

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("**DTC**") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of UBS AG debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (*i.e.*, in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If a Zero Value Event occurs, for each Security you will receive a cash payment per Security on the Zero Value Settlement Date equal to the (i) the Measurement Period Cash Amount, on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, on the date on which the Zero Value Event occurred, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred, as described under "— Automatic Acceleration Upon Zero Value Event."

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Coupon Amount. The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index constituents would have been entitled to receive in respect of the Index constituents during the relevant period. The Coupon Amount may be equal to zero.

The "**Coupon Amount**" means (i) on any calendar day that is not a Coupon Ex-Date, zero; and (ii) on any calendar day that is a Coupon Ex-Date, an amount per Security equal to the Accrued Dividend on the Coupon Valuation Date immediately preceding such Coupon Ex-Date. The minimum value of the Coupon Amount will be zero.

The following graphic illustrates the formula to determine the Coupon Amount on a Coupon Ex-Date, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Coupon Amount | = | Accrued Dividend, on the immediately preceding Coupon Valuation Date |

If the Securities undergo a split or reverse split, the Coupon Amount will be adjusted accordingly.

The "**Accrued Dividend**" means (i) on the Initial Trade Date, zero; and (ii) on any subsequent calendar day, an amount per Security equal to (a) the Accrued Dividend as of the immediately preceding calendar day, *plus* (b) the Daily Dividend on such calendar day, *minus* the Coupon Amount on such calendar day.

If the Securities undergo a split or reverse split, the Accrued Dividend will be adjusted accordingly.

The "**Daily Dividend**" means, on any calendar day, an amount per Security equal to (a)(i) the Index Dividend Point, *times* (ii) the Leverage Factor, *times* (iii) the Current Principal Amount on the immediately preceding calendar day, *times* (iv) the Residual Factor on the immediately preceding calendar day, *divided by* (b) the Last Reset Index Closing Level.

The "**Index Dividend Point**" means, on any calendar day, an amount per Security equal to the *sum of the products* of (i) the cash value of distributions that a hypothetical holder of one share of each Index Constituent Security on such calendar day would have been entitled to receive in respect of that Index Constituent Security for those cash distributions whose "ex-dividend date" occurs on such calendar day and (ii) the number of units of that Index Constituent Security included in the Index as of such date.

The Index Dividend Point may not be publicly disseminated by the Index Calculation Agent. The data used to calculate the Index Dividend Point is the property of the Index Calculation Agent and investors may be required to pay a fee and meet any other requirements of the Index Calculation Agent, in order to access such information. See "Risk Factors — The value of the Index Dividend Point may not be publicly disseminated or otherwise freely accessible to investors".

The Index Dividend Point, on any calendar day, represents the total cash value of distributions that a hypothetical holder of the Index Constituent Securities, in proportion to the weights of the Index Constituent Securities, would have been entitled to receive with respect to any Index Constituent Securities for those cash distributions whose "ex-dividend date" occurs on such calendar day.

The "**Coupon Payment Date**" means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. The first Coupon Payment Date will be July 22, 2020, subject to adjustment as provided herein. If such day is not a Coupon Business Day, the Coupon Payment Date shall be the following Coupon Business Day.

If the Final Coupon Ex-Date occurs prior to the Maturity Date, but the Final Coupon Payment Date otherwise occurs after the Maturity Date, in such case, the Final Coupon Payment Date will be the Maturity Date, subject to adjustment as provided herein.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business Day, the Coupon Record Date shall be the immediately preceding Coupon Business Day.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Coupon Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Coupon Business Day immediately preceding the applicable Coupon Record Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-Date will be included in the Zero Value Settlement Amount payable on the Zero Value Settlement Date.

In addition, if a day that would otherwise by a Coupon Ex-Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-date will be included in the Cash Settlement Amount or Call Settlement Amount payable at maturity or call, respectively.

The "**Coupon Valuation Date**" means the 30th day of each month and the 28th day of February, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein. The first Coupon Valuation Date will be June 30, 2020.

Notwithstanding the foregoing, with respect to cash distributions or dividends on an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the dividend or distribution to holders of such Index Constituent Security by the scheduled payment date for such dividend or distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Coupon Amount. Any such delayed dividend or distribution payment from the issuer of an Index Constituent Security will be attributed back to the Accrued Dividend and included in the next Coupon Amount.

"**Coupon Business Day**" means any Index Business Day other than an Index Business Day on which banking institutions in New York are generally not authorized or obligated by law, regulation or executive order to open.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the

Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is June 10, 2050, which will be the third Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under
"— Market Disruption Event."

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to the Closing Indicative Value on the last Index Business Day in the applicable Measurement Period. We refer to this cash payment as the "**Cash Settlement Amount**." If the amount so calculated is equal to or less than zero, the payment will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Cash Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Final Measurement Period |

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment at maturity. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS. If the Securities are called by UBS or accelerated upon the occurrence of a Zero Value Event, the Call Settlement Amount or Zero Value Settlement Amount, as applicable, may be zero and you may lose all or a substantial portion of your investment.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Stated Principal Amount**" of each Security is \$25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount. If the Securities undergo a split or reverse split, the Stated Principal Amount will be adjusted accordingly.

The "**Closing Indicative Value**" per Security, will be calculated as follows:

a) On the Initial Trade Date, \$25.00 per Security;

b) On any other calendar day, prior to the first day of an applicable Measurement Period, an amount per Security equal to:

   (Current Principal Amount on the immediately preceding calendar day × Index Factor) **-** Accrued Fees + Accrued Dividend

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

   (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor × Residual Factor) **-** Accrued Fees + Accrued Dividend + Measurement Period Cash Amount

d) The minimum value of the Closing Indicative Value on any calendar day will be zero.

**If a Zero Value Event occurs on any Index Business Day then the Closing Indicative Value will be equal to the Zero Value Settlement Amount on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "— Automatic Acceleration Upon Zero Value Event".

The actual trading price of the Securities in the secondary market may vary significantly from their Closing Indicative Value.

If the Securities undergo a split or reverse split, the Closing Indicative Value will be adjusted accordingly.

The "**Current Principal Amount**" represents the unleveraged investment in the Index Constituent Securities per Security at the close of trading on any Reset Valuation Date. The notional financing amount per Security in order to generate the leveraged returns would be approximately half of the Current Principal Amount at the close of trading on any Reset Valuation Date. If a Permanent Deleveraging Event occurs, the leverage of your Securities will be permanently reset to 1.0 and the notional financing amount will be equal to zero. If a Zero Value Event occurs prior to your Securities permanently resetting to 1.0 at the end of the Second Permanent Deleveraging Valuation Date, then your Securities will be fully redeemed and you will receive the Zero Value Settlement Amount (which amount may be zero).

The Current Principal Amount per Security, will be calculated as follows:

1) From and including the Initial Trade Date to and excluding the subsequent Reset Valuation Date, $25.00 per Security;

2) At the close of trading on each Reset Valuation Date after the Initial Trade Date, the Current Principal Amount of the Securities will be reset as follows:

   *New* Current Principal Amount = (Current Principal Amount on immediately preceding calendar day × Index Factor) – Accrued Fees

The Current Principal Amount will not change until the subsequent Reset Valuation Date.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date.

**If a Zero Value Event occurs on any Index Business Day then the Current Principal Amount will be equal to zero on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment.**
**You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

At the close of trading on each Reset Valuation Date, the Current Principal Amount is reset.

The "**Reset Valuation Date**" means:

1) Any calendar day up to and including the Second Permanent Deleveraging Valuation Date, that is either: (i) the Initial Trade Date, (ii) a Quarterly Reset Valuation Date, (iii) a Loss Rebalancing Valuation Date (iv) the First Permanent Deleveraging Valuation Date, or (v) the Second Permanent Deleveraging Valuation Date; and.

2) Any calendar day following the Second Permanent Deleveraging Valuation Date.

The definition of each valuation date is set forth below.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date and the Last Reset Index Closing Level will remain the same.

The "**Quarterly Reset Valuation Date**" is the last Index Business Day of January, April, July and October of each calendar year beginning on July 31, 2020 and ending on April 29, 2050 (other than an Excluded Day), subject to adjustment as described under "— Market Disruption Event."

For purposes of the "Quarterly Reset Valuation Date" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding the first day of an applicable Measurement Period, and any calendar day thereafter, and (ii) any calendar day after the Second Permanent Deleveraging Valuation Date.

The "**Index Factor**" is: 1 + (Leverage Factor × Index Performance Ratio).

The Index Factor represents the leveraged percentage change in the Index level since the Last Reset Index Closing Level. The Index Factor *times* the applicable Current Principal Amount on the preceding calendar day represents the current value of the unleveraged notional amount per Security that is deemed invested in the Index on any calendar day. This does not reflect the Redemption Amount that an investor would receive upon early redemption on such calendar day.

**If a Zero Value Event occurs at any time during any Index Business Day then the Index Factor will be equal to zero subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Residual Factor**" will be calculated as follows:

a) 1.0 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) From and including the first day of an applicable four-day Measurement Period, (a) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such four-day Measurement Period, *divided by* (b) four.

   For example, on the first Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (3/4), on the second Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (2/4), on the third Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (1/4) and on the last Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal zero.

c) On any calendar day from and including the last Index Business Day of an applicable Measurement Period, the Residual Factor will be equal to zero.

The Residual Factor is intended to approximate the percentage of the Current Principal Amount that is tracking the Index on any given day. The Residual Factor is relevant only during an applicable Measurement Period but otherwise is not a component of the Closing Indicative Value or Current Indicative Value formulas. At the close of trading on each Index Business Day during a four-day Measurement Period, approximately 25% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash.

The "**Leverage Factor**" on any calendar day until the occurrence of a Permanent Deleveraging Event and the close of trading on the Second Permanent Deleveraging Valuation Date, will equal 1.5. If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Leverage Factor will equal 1.0.

The "**Index Performance Ratio**" on any Index Business Day will be equal to:

$$\frac{\text{Index Closing Level} - \text{Last Reset Index Closing Level}}{\text{Last Reset Index Closing Level}}$$

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

The "**Last Reset Index Closing Level**" is the Index Closing Level on the most recent Reset Valuation Date prior to such day. The initial Last Reset Index Closing Level is 156.926, the Index Closing Level on the Initial Trade Date, as reported by Bloomberg L.P. and Reuters.

The "**Index Closing Level**" on any date of determination is the closing level of the Index, as reported on Bloomberg L.P. and Reuters; provided, however, that if the closing level of the Index as reported on Bloomberg L.P. (or any successor) differs from the closing level of the Index as reported on Reuters (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent. The initial Index Closing Level (which is also the first Last Reset Index Closing Level) is 156.926, the Index Closing Level measured on the Initial Trade Date, as determined by the Security Calculation Agent.

On any calendar day that is not an Index Business Day, the Index Closing level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

"**Measurement Period**" means the Final Measurement Period or Call Measurement Period, as applicable.

The "**Current Indicative Value**" or "**intraday indicative value"**, as determined by the Security Calculation Agent, is an amount per Security, on an intraday basis on any Index Business Day, equal to:

a) On the Initial Trade Date, $25.00.

b) On any other calendar day prior to the first day of an applicable Measurement Period:

(Current Principal Amount on the immediately preceding calendar day × Index Factor, calculated using the Intraday Index Value) - Accrued Fees + Accrued Dividend.

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

(Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor, calculated using the Intraday Index Value × Residual Factor, from the immediately preceding calendar day) - Accrued Fees + Accrued Dividend + Measurement Period Cash Amount, from the immediately preceding calendar day

d) The minimum value of the Current Indicative Value on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Current Indicative Value (or intraday indicative value). **If a Zero Value Event occurs during any Index Business Day then the Current Indicative Value (or "intraday indicative value") will be equal to the Zero Value Settlement Amount, subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Indicative Value (or intraday indicative value) will be adjusted accordingly.

The "**Accrued Fees**" as of any date of determination means the Accrued Tracking Fee + the Accrued Financing Fee. If the Securities undergo a split or reverse split, the Accrued Fees will be adjusted accordingly.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

a) On the Initial Trade Date, the Accrued Tracking Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Tracking Fee is equal to: (a) the Accrued Tracking Fee as of the immediately preceding calendar day, *plus* the Daily Tracking Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Tracking Fee is reset to be equal to the Daily Tracking Fee on such calendar day.

The "**Daily Tracking Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Tracking Fee is zero.

b) On any subsequent calendar day, the Daily Tracking Fee is equal to: (a) (i) 0.95%, *times* (ii) the Current Principal Amount on the immediately preceding calendar day, *times* (iii) the Index Factor, on such calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 365.

c) The minimum value of the Daily Tracking Fee on any calendar day will be zero.

The Daily Tracking Fee represents the investor fees calculated each day on the current value of the unleveraged notional amount invested in the Index per Security. These charges accrue and compound during the applicable period, and will reduce any amount you are entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Tracking Fee will be adjusted accordingly.

The Securities are subject to an "**Accrued Financing Fee**" per Security calculated as follows:

a) On the Initial Trade Date, the Accrued Financing Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Financing Fee is equal to: (a) the Accrued Financing Fee as of the immediately preceding calendar day, *plus* (b) the Daily Financing Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Financing Fee is reset to be equal to the Daily

Financing Fee on such calendar day.

d) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Accrued Financing Fee will be equal to zero.

The "**Daily Financing Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Financing Fee is equal to zero.

b) On any subsequent calendar day, the Daily Financing Fee is equal to: (a) (i) 0.5, *times* (ii) the Financing Rate, on such calendar day, *times* (iii) the Current Principal Amount, on the immediately preceding calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 360.

c) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Daily Financing Fee will be equal to zero.

d) The minimum value of the Daily Financing Fee on any calendar day will be zero.

The Daily Financing Fee seeks to compensate UBS for providing investors with a leveraged participation in movements of the Index and is intended to approximate the financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities. These charges accrue and compound during the applicable period, and will reduce any amount that you will be entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Financing Fee will be adjusted accordingly.

The "**Financing Rate**" will equal the sum of (a) 0.95% and (b) the London interbank offered rate (ICE LIBOR) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Security Calculation Agent) ("**LIBOR**") (or any successor base rate, as described below), as of 11:00 a.m., London time, on the immediately preceding London Business Day. The minimum value of the three-month U.S. Dollar LIBOR rate (or any successor base rate, as described below) used on any calendar day will be zero. The minimum Financing Rate at any time will be 0.95%

For example, 1.68275% was the three-month U.S. Dollar LIBOR rate on February 20, 2020, which was a London Business Day. The Financing Rate on February 21, 2020 would have been equal to 0.95% + 1.68275%, or 2.63275%.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued or is no longer representative of the underlying market or economic reality, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry- accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR (or such successor base rate, as applicable) for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London Business Day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The "**Measurement Period Cash Amount**" is an amount per Security equal to:

a) $0.00 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) On the first day of an applicable one-day Measurement Period:

At the close of trading on such Index Business Day, (the Current Principal Amount on the immediately preceding calendar day × Index Factor on such Index Business Day)

c) From and including the first day of an applicable four-day Measurement Period:

   i. At the close of trading on each Index Business Day during the applicable four-day Measurement Period, the Measurement Period Cash Amount on the immediately preceding calendar day + (Current Principal Amount, on the calendar day immediately preceding the first day of such Measurement Period × 0.25 × Index Factor, on such Index Business Day).

   ii. On any calendar day during an applicable four-day Measurement Period that is not an Index Business Day, the Measurement Period Cash Amount on the immediately preceding Index Business Day.

d) On any calendar day after the last Index Business Day of an applicable Measurement Period, the Measurement Period Cash Amount on the last Index Business Day of such Measurement Period.

The Measurement Period Cash Amount represents the portion of the Current Principal Amount that has been converted to cash on any given day of an applicable Measurement Period and is no longer tracking the Index.

At the close of trading of each Index Business day during a four-day Measurement Period, approximately 25% of the Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period, will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash as well. After the close of trading on the final Index Business Day of an applicable four-day Measurement Period, the Measurement Period Cash Amount will represent the averaged value of the Current Principal Amount that was deemed converted to cash across the four-days of such Measurement Period. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash, at the close of trading of the first day of such Measurement Period.

If the Securities undergo a split or reverse split, the Measurement Period Cash Amount will be adjusted accordingly.

The "**Final Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is less than $100,000,000, the Calculation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is equal to or greater than $100,000,000, the four (4) Index Business Days from and including the Calculation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the Calculation Date, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by MVRLSO <Index> on Bloomberg L.P.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently Solactive AG.

The "**Calculation Date**" means June 2, 2050, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

The Calculation Date represents the first Index Business Day of the Final Measurement Period.

"**Index Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is based upon the performance of the MVIS US Mortgage REITs Index (Bloomberg: "MVMORT"; Reuters: ".MVMORT"). The Index tracks the overall performance of publicly-traded mortgage REITs that are listed and incorporated in the United States and derive at least 50% of their revenues from mortgage-related activity.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the same Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be the fourth Index Business Day immediately following the Initial Trade Date and the Final Redemption Date will be the fourth Index Business Day immediately preceding the Maturity date, subject to adjustments. In addition, if a call notice has been issued, the last Redemption Valuation Date will be the fourth Index Business Day prior to the Call Settlement Date, as applicable. If a Zero Value Event occurs, the last Redemption Date will be the date on which the Zero Value Event occurred.

If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation:

| | | | | |
|---|---|---|---|---|
| Redemption Amount | = | Closing Indicative Value | - | Redemption Fee Amount |

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon early redemption. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS. See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".**

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 12:00 noon (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable. If your DTC custodian or your brokerage firm is not a current UBS customer, UBS will be required to on-board such DTC custodian or brokerage firm, in compliance with its internal policies and procedures, before it can accept your Redemption Notice, your Redemption Confirmation or otherwise process your redemption request. This on-boarding process may delay your Redemption Valuation Date and Redemption Date. Furthermore, in certain circumstances, UBS may be unable to on-board your DTC custodian or your brokerage firm.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify through and including the Maturity Date. Upon early redemption in the event we exercise this call right, you will receive a cash payment equal to the Closing Indicative Value on the last Index Business Day in the Call Measurement Period. We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "Call Measurement Period" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $100,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $100,000,000, the four (4) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

(i) The Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by MVRLSO <Index> on Bloomberg L.P.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Call Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Call Measurement Period |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon a call. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

In addition, upon the occurrence of a Zero Value Event, the Securities may be automatically accelerated and mandatorily redeemed by UBS. See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event" below.

**Automatic Acceleration Upon Zero Value Event**

A "**Zero Value Event**" occurs if, on any Index Business Day (other than an Excluded Day), the Intraday Index Value decreases by 66.66667% or more in value from the Last Reset Index Closing Level. From immediately after the Zero Value Event and on all future calendar days, the Index Factor and the Current Principal Amount will be set equal to zero. The Accrued Dividend and Accrued Fees will be fixed at their respective values on the Zero Value Event date and will stay unchanged on all future calendar days.

When the Intraday Index Value decreases 66.66667% in value from the Last Reset Index Closing Level, the Index Factor will equal zero. A Zero Value Event represents the first instance when the effective unleveraged notional amount that is deemed invested in the Index per Security equals zero. It will have the effect of permanently resetting the value of your Securities to a fixed value (which may be zero) and accelerating the Securities. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event. A Zero Value Event is expected to occur only in the narrow window of time between the occurrence of a Permanent Deleveraging Event and completion of the leverage reset to 1.0 at the end of the Second Permanent Deleveraging Valuation Date.

For the purposes of the "Zero Value Event" definition, an "**Excluded Day**" means (i) any calendar day after the Second Permanent Deleveraging Valuation Date (ii) any calendar day on which a Zero Value Event has already occurred, (iii) any calendar day after the occurrence of a Zero Value Event, and (iv) any calendar day after the last day of an applicable Measurement Period.

If a Zero Value Event occurs, all issued and outstanding Securities will be automatically terminated and mandatorily redeemed by UBS and you will receive the Zero Value Settlement Amount on the Zero Value Settlement Date. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.

In the event that a Zero Value Event has occurred, UBS will issue a press release shortly after the event and specify the relevant Zero Value Settlement Date and Zero Value Settlement Amount in respect of your investment in the Securities. The Securities will be suspended from trading intra-day shortly after the event occurs and will likely not be open for trading again on NYSE Arca before the Zero Value Settlement Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended.

The "**Zero Value Settlement Amount**" per Security will be calculated as follows:

a) On any calendar day, to but excluding the first day of an applicable Measurement Period:

   (i) the Accrued Dividend, *minus* (ii) the Accrued Fees, on the date on which the Zero Value Event occurred.

b) From and including the first day of an applicable Measurement Period:

   (i) the Measurement Period Cash Amount on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred.

c) The minimum value of the Zero Value Settlement Amount will be zero.

For example:

a) If the Accrued Dividend was $0.04, the Accrued Fees was $0.01, and the Measurement Period Cash Amount was $0, then the Zero Value Settlement Amount would be $0.03.

b) If the Accrued Dividend was $0.01, the Accrued Fees was $0.05, and the Measurement Period Cash Amount was $0, then the Zero Value Settlement Amount would be $0.

c) If the Zero Value Event occurred during a four-day Measurement Period, and the Accrued Dividend was $0.01, the Accrued Fees was $0.03, and the Measurement Period Cash Amount on the immediately preceding calendar day was $6.59, then the Zero Value Settlement Amount would be $6.57.

The following graphics illustrate the formula to determine the Zero Value Settlement Amount, which has been simplified for ease of presentation:

On any calendar day, to but excluding the first day of an applicable four-day Measurement Period:

| | | | | |
|---|---|---|---|---|
| Zero Value Settlement Amount | = | Accrued Dividend | - | Accrued Fees on date Zero Value Event occurred |

From and including the first day of an applicable Measurement Period:

| | | | | | | |
|---|---|---|---|---|---|---|
| Zero Value Settlement Amount | = | Measurement Period Cash Amount on immediately preceding calendar day | + | Accrued Dividend | - | Accrued Fees on date Zero Value Event occurred |

The "**Zero Value Settlement Date**" will be the third Index Business Day following the date on which the Zero Value Event occurred. For a detailed description of how the Current Indicative Value (or intraday indicative value) of the Securities is calculated see "Valuation of the Index and the Securities".

**You may lose all or a substantial portion of your investment upon the occurrence of a Zero Value Event. Upon the occurrence of a Zero Value Event you will receive on the Zero Value Settlement Date only the Zero Value Settlement Amount per Security.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right.** See "Specific Terms of the Securities — UBS's Call Right".

**Loss Rebalancing Events**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 1.5. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A "**Loss Rebalancing Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 15% or more in value from the previously Last Reset Index Closing Level.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar quarter. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

For purposes of the "Loss Rebalancing Event" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding any Quarterly Reset Valuation Date, if a Loss Rebalancing Event occurs after 3:15pm on such day, (ii) any Quarterly Reset Valuation Date, (iii) any Loss Rebalancing Valuation Date, (iv) the Index Business Day immediately preceding the first day of an applicable Measurement Period, if a Loss Rebalancing Event occurs after 3:15pm on such day (v) any calendar day from and including the first day of an applicable Measurement Period, (vi) the First or Second Permanent Deleveraging Valuation Dates, (vii) any calendar day after the Second Permanent Deleveraging Valuation Date, (viii) a Zero Value Event date, and (ix) any calendar day after the Zero Value Event date.

"**Loss Rebalancing Valuation Date**" means:

a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under "— Market Disruption Event";

b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event."

**Permanent Deleveraging Event**

A Permanent Deleveraging Event will have the effect of deleveraging your Securities, with the aim of permanently resetting the then-current leverage to 1.0, over two Index Business Days. The leverage at the end of the First Permanent Deleveraging Valuation Date is reset to approximately 1.5 and the leverage at the end of the Second Permanent Deleveraging Valuation Date is reset to 1.0. This means that after a Permanent Deleveraging Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Permanent Deleveraging Event. A Permanent Deleveraging Event is expected to occur only in the narrow window of time between the occurrence of a Loss Rebalancing Event and completion of the leverage reset to 1.5 at the end of the Loss Rebalancing Valuation Date.

A "**Permanent Deleveraging Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 50% or more in value from the Last Reset Index Closing Level.

For purposes of the "Permanent Deleveraging Event" definition, an "**Excluded Day**" means (i) the First or Second Permanent Deleveraging Valuation Dates, (ii) any calendar day after the Second Permanent Deleveraging Valuation Date, (iii) a day upon which a Zero Value Event occurs, (iv) any calendar day after the occurrence of a Zero Value Event, (v) the day which is two Index Business Days prior to the first day of an applicable Measurement Period, if a Permanent Deleveraging Event occurs after 3:15pm on such day and (vi) any calendar day from and including the Index Business Day immediately preceding the first day of an applicable Measurement Period.

In the event that a Permanent Deleveraging Event has occurred, UBS will issue a press release before 9:00 a.m. on the Index Business Day immediately following the date on which the Permanent Deleveraging Event occurred, announcing the Permanent Deleveraging Event and notifying you of the Permanent Deleveraging Valuation Dates.

"**Permanent Deleveraging Valuation Dates**" means the First Permanent Deleveraging Valuation Date and the Second Permanent Deleveraging Valuation Date, each as defined below:

a) The "**First Permanent Deleveraging Valuation Date**" means:

   i. Any Index Business Day, which otherwise would have been a Loss Rebalancing Valuation Date, but on which a Permanent Deleveraging Event has occurred, subject to adjustment as described under "- Market Disruption Event";

   ii. If a Permanent Deleveraging Event occurs after 3:15pm on any Index Business Day which would not otherwise have been a Loss Rebalancing Valuation Date, then the first Index Business Day following the occurrence of such Permanent Deleveraging Event, subject to adjustment as described under "— Market Disruption Event".

   The leverage of your Securities will be reset to approximately 1.5 at the close of trading on the First Permanent Deleveraging Valuation Date.

b) The “**Second Permanent Deleveraging Valuation Date**” means the Index Business Day immediately following the First Permanent Deleveraging Valuation Date, subject to adjustment as described under “— Market Disruption Event”.

The leverage of your Securities will be reset to approximately 1.0 at the close of trading on the Second Permanent Deleveraging Valuation Date.

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Value (or the “intraday indicative value”), Closing Indicative Value, Market Disruption Events, Business Days, Index Business Days, the Leverage Factor, the Index Factor, the Index Performance Ratio, the Residual Factor, the Index Closing Level, the Financing Rate, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Zero Value Settlement Amount, if any, that we will pay you upon acceleration following the occurrence of a Zero Value Event, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred, whether a Permanent Deleveraging Event has occurred and whether any day is a Business Day or an Index Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of this prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Zero Value Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Zero Value Settlement Amount, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing during a four-day Measurement Period, the Index Closing Level for such day will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. The remaining Index Business Days in the Measurement Period will be postponed accordingly, and the remaining Index Business Days in the Measurement Period will resume again following the suspension of the Market Disruption Event. For example, if the four-day Measurement Period for purposes of calculating the Call Settlement Amount, is scheduled for June 2, June 3, June 4 and June 5, and there is a Market Disruption Event with respect to the Index on June 2, but no other Market Disruption Event during such Call Measurement Period, then June 3 will become the first Index Business Day of the Measurement Period, June 4th the second Index Business Day, June 5th the third Index Business Day and the next Index Business Day after June 5th would be the final day of the Measurement Period. The same approach would be applied if there is a Market Disruption Event during a four-day Final Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or any Reset Valuation Date, the Index Closing Level for such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on June 2 and there is a Market Disruption Event with respect to the Index on June 2, then the Index Closing Level on June 3 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on June 3.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the affected Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or Reset Valuation Date occurring more than five Index Business Days following the day originally scheduled to be such Index Business Day of the Measurement Period or such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the fifth Index Business Day following the date originally scheduled to be such Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date, Calculation Date or any Reset Valuation Date, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such fifth Index Business Day but for such Market Disruption Event.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

c) the Index is not published; or

d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be Market Disruption Events with respect to the Index:

a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "absence of trading" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount."

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the three Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the third Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under "Description of Debt

Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking,

*plus*

the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor or Index Calculation Agent discontinue publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor or Index Calculation Agent does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"), and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration upon the occurrence of a Zero Value Event or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor or Index Calculation Agent discontinue publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor or Index Calculation Agent do not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described in this prospectus supplement as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Value or intraday indicative value, Closing Indicative Value, Index Factor, Index Performance Ratio, Residual Factor, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, upon early redemption or upon acceleration upon the occurrence of a Zero Value Event by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An "**Index Replacement Event**" means:

a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after June 2, 2020 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

c) any event that occurs on or after June 2, 2020 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index, a successor index or a substitute index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Performance Ratio, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Zero Value Settlement Amount, if any, that we will pay you in the event of acceleration upon the occurrence of a Zero Value Event, if applicable, the Last Reset Index Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in this prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the attached prospectus, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 16. ETRACS Monthly Pay 1.5x Leveraged Closed-End Fund Index ETN due June 10, 2050

### Specific Terms of the Securities

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("DTC") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of UBS AG debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (*i.e.*, in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

**Principal Amount:** $100,000,000

**Issuer:** UBS AG (London Branch)

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption. Instead, at maturity, you will receive a cash payment per Security the amount of which will vary depending on the performance and path of the Index and will be reduced by the Accrued Fees as of the last Index Business Day in the Final Measurement Period as described under "— Cash Settlement Amount at Maturity." If the amount as calculated is equal to or less than zero, the Cash Settlement Amount will be zero and you will not receive a cash payment.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment per Security on the relevant Redemption Date equal to the Redemption Amount as described under "— Early Redemption at the Option of the Holders." If the amount as calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If a Zero Value Event occurs, for each Security you will receive a cash payment per Security on the Zero Value Settlement Date equal to the (i) the Measurement Period Cash Amount, on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, on the date on which the Zero Value Event occurred, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred, as described under "— Automatic Acceleration Upon Zero Value Event."

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Coupon Amount. The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index constituents would have been entitled to receive in respect of the Index constituents during the relevant period. The Coupon Amount may be equal to zero.

The "**Coupon Amount**" means (i) on any calendar day that is not a Coupon Ex-Date, zero; and (ii) on any calendar day that is a Coupon Ex-Date, an amount per Security equal to the Accrued Dividend on the Coupon Valuation Date immediately preceding such Coupon Ex-Date. The minimum value of the Coupon Amount will be zero.

The following graphic illustrates the formula to determine the Coupon Amount on a Coupon Ex-Date, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Coupon Amount | = | Accrued Dividend, on the immediately preceding Coupon Valuation Date |

If the Securities undergo a split or reverse split, the Coupon Amount will be adjusted accordingly.

The “**Accrued Dividend**” means (i) on the Initial Trade Date, zero; and (ii) on any subsequent calendar day, an amount per Security equal to (a) the Accrued Dividend as of the immediately preceding calendar day, *plus* (b) the Daily Dividend on such calendar day, *minus* the Coupon Amount on such calendar day.
If the Securities undergo a split or reverse split, the Accrued Dividend will be adjusted accordingly.

The “**Daily Dividend**” means, on any calendar day, an amount per Security equal to (a)(i) the Index Dividend Point, *times* (ii) the Leverage Factor, *times* (iii) the Current Principal Amount on the immediately preceding calendar day, *times* (iv) the Residual Factor on the immediately preceding calendar day, *divided by* (b) the Last Reset Index Closing Level.

The “**Index Dividend Point**” means, on any calendar day, an amount per Security equal to the *sum of the products* of (i) the cash value of distributions that a hypothetical holder of one share of each Index Constituent Security on such calendar day would have been entitled to receive in respect of that Index Constituent Security for those cash distributions whose “ex-dividend date” occurs on such calendar day and (ii) the number of units of that Index Constituent Security included in the Index as of such date.

The Index Dividend Point may not be publicly disseminated by the Index Calculation Agent. The data used to calculate the Index Dividend Point is the property of the Index Calculation Agent and investors may be required to pay a fee and meet any other requirements of the Index Calculation Agent, in order to access such information. See “Risk Factors — The value of the Index Dividend Point may not be publicly disseminated or otherwise freely accessible to investors”.

The Index Dividend Point, on any calendar day, represents the total cash value of distributions that a hypothetical holder of the Index Constituent Securities, in proportion to the weights of the Index Constituent Securities, would have been entitled to receive with respect to any Index Constituent Securities for those cash distributions whose “ex-dividend date” occurs on such calendar day.

The “**Coupon Payment Date**” means the fifteenth (15th) Index Business Day following each Coupon Valuation Date. The first Coupon Payment Date will be July 22, 2020, subject to adjustment as provided herein. If such day is not a Coupon Business Day, the Coupon Payment Date shall be the following Coupon Business Day.

If the Final Coupon Ex-Date occurs prior to the Maturity Date, but the Final Coupon Payment Date otherwise occurs after the Maturity Date, in such case, the Final Coupon Payment Date will be the Maturity Date, subject to adjustment as provided herein.

The “**Coupon Record Date**” means the ninth Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business Day, the Coupon Record Date shall be the immediately preceding Coupon Business Day.

The “**Coupon Ex-Date**,” with respect to a Coupon Amount, means the first Coupon Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Coupon Business Day immediately preceding the applicable Coupon Record Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-Date will be included in the Zero Value Settlement Amount payable on the Zero Value Settlement Date.

In addition, if a day that would otherwise by a Coupon Ex-Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-date will be included in the Cash Settlement Amount or Call Settlement Amount payable at maturity or call, respectively.

The “**Coupon Valuation Date**” means the 30th day of each month and the 28th day of February, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date, subject to adjustment described herein. The first Coupon Valuation Date will be June 30, 2020.

Notwithstanding the foregoing, with respect to cash distributions or dividends on an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the dividend or distribution to holders of such Index Constituent Security by the scheduled payment date for such dividend or distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Coupon Amount. Any such delayed dividend or distribution payment from the issuer of an Index Constituent Security will be attributed back to the Accrued Dividend and included in the next Coupon Amount.

"**Coupon Business Day**" means any Index Business Day other than an Index Business Day other than an Index Business Day on which banking institutions in New York are generally not authorized or obligated by law, regulation or executive order to open.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is June 10, 2050, which will be the third Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under "— Market Disruption Event."

For each Security, unless earlier called, redeemed or accelerated, you will receive at maturity a cash payment equal to the Closing Indicative Value on the last Index Business Day in the applicable Measurement Period. We refer to this cash payment as the "**Cash Settlement Amount**." If the amount so calculated is equal to or less than zero, the payment will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Cash Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Final Measurement Period |

**You may lose all or a substantial portion of your investment at maturity. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment at maturity. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS. If the Securities are called by UBS or accelerated upon the occurrence of a Zero Value Event, the Call Settlement Amount or Zero Value Settlement Amount, as applicable, may be zero and you may lose all or a substantial portion of your investment.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

The "**Stated Principal Amount**" of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount. If the Securities undergo a split or reverse split, the Stated Principal Amount will be adjusted accordingly.

The "**Closing Indicative Value**" per Security, will be calculated as follows:

a) On the Initial Trade Date, $25.00 per Security;

b) On any other calendar day, prior to the first day of an applicable Measurement Period, an amount per Security equal to:

   (Current Principal Amount on the immediately preceding calendar day × Index Factor)—Accrued Fees + Accrued Dividend

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

   (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor × Residual Factor) — Accrued Fees + Accrued Dividend + Measurement Period Cash Amount

d) The minimum value of the Closing Indicative Value on any calendar day will be zero.

**If a Zero Value Event occurs on any Index Business Day then the Closing Indicative Value will be equal to the Zero Value Settlement Amount on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "— Automatic Acceleration Upon Zero Value Event".

The actual trading price of the Securities in the secondary market may vary significantly from their Closing Indicative Value.

If the Securities undergo a split or reverse split, the Closing Indicative Value will be adjusted accordingly.

The "**Current Principal Amount**" represents the unleveraged investment in the Index Constituent Securities per Security at the close of trading on any Reset Valuation Date. The notional financing amount per Security in order to generate the leveraged returns would be approximately half of the Current Principal Amount at the close of trading on any Reset Valuation Date. If a Permanent Deleveraging Event occurs, the leverage of your Securities will be permanently reset to 1.0 and the notional financing amount will be equal to zero. If a Zero Value Event occurs prior to your Securities permanently resetting to 1.0 at the end of the Second Permanent Deleveraging Valuation Date, then your Securities will be fully redeemed and you will receive the Zero Value Settlement Amount (which amount may be zero).

The Current Principal Amount per Security, will be calculated as follows:

1) From and including the Initial Trade Date to and excluding the subsequent Reset Valuation Date, $25.00 per Security;

2) At the close of trading on each Reset Valuation Date after the Initial Trade Date, the Current Principal Amount of the Securities will be reset as follows:

   *New* Current Principal Amount = (Current Principal Amount on immediately preceding calendar day × Index Factor) – Accrued Fees

The Current Principal Amount will not change until the subsequent Reset Valuation Date.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date.

**If a Zero Value Event occurs on any Index Business Day then the Current Principal Amount will be equal to zero on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment.**
**You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

At the close of trading on each Reset Valuation Date, the Current Principal Amount is reset.

The "**Reset Valuation Date**" means:

1) Any calendar day up to and including the Second Permanent Deleveraging Valuation Date, that is either: (i) the Initial Trade Date, (ii) a Quarterly Reset Valuation Date, (iii) a Loss Rebalancing Valuation Date (iv) the First Permanent Deleveraging Valuation Date, or (v) the Second Permanent Deleveraging Valuation Date; and.

2) Any calendar day following the Second Permanent Deleveraging Valuation Date.

The definition of each valuation date is set forth below.

If a day that would otherwise be a Reset Valuation Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Reset Valuation Date and the Last Reset Index Closing Level will remain the same.

The "**Quarterly Reset Valuation Date**" is the last Index Business Day of January, April, July and October of each calendar year beginning on July 31, 2020 and ending on April 29, 2050 (other than an Excluded Day), subject to adjustment as described under "— Market Disruption Event."

For purposes of the "Quarterly Reset Valuation Date" definition, an "**Excluded Day**" means (i) the Index Business Day immediately preceding the first day of an applicable Measurement Period, and any calendar day thereafter, and (ii) any calendar day after the Second Permanent Deleveraging Valuation Date.

The “**Index Factor**” is: 1 + (Leverage Factor × Index Performance Ratio).

The Index Factor represents the leveraged percentage change in the Index level since the Last Reset Index Closing Level. The Index Factor *times* the applicable Current Principal Amount on the preceding calendar day represents the current value of the unleveraged notional amount per Security that is deemed invested in the Index on any calendar day. This does not reflect the Redemption Amount that an investor would receive upon early redemption on such calendar day.

**If a Zero Value Event occurs at any time during any Index Business Day then the Index Factor will be equal to zero subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See “Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event”.

The “**Residual Factor**” will be calculated as follows:

a) 1.0 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) From and including the first day of an applicable four-day Measurement Period, (a) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such four-day Measurement Period, *divided by* (b) four. For example, on the first Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (3/4), on the second Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (2/4), on the third Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal (1/4) and on the last Index Business Day in an applicable four-day Measurement Period, the Residual Factor will equal zero.

c) On any calendar day from and including the last Index Business Day of an applicable Measurement Period, the Residual Factor will be equal to zero.

The Residual Factor is intended to approximate the percentage of the Current Principal Amount that is tracking the Index on any given day. The Residual Factor is relevant only during an applicable Measurement Period but otherwise is not a component of the Closing Indicative Value or Current Indicative Value formulas. At the close of trading on each Index Business Day during a four-day Measurement Period, approximately 25% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount and the corresponding amount of financing will be deemed converted to cash.

The “**Leverage Factor**” on any calendar day until the occurrence of a Permanent Deleveraging Event and the close of trading on the Second Permanent Deleveraging Valuation Date, will equal 1.5. If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Leverage Factor will equal 1.0.

The “**Index Performance Ratio**” on any Index Business Day will be equal to:

$$\frac{\text{Index Closing Level} - \text{Last Reset Index Closing Level}}{\text{Last Reset Index Closing Level}}$$

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

The “**Last Reset Index Closing Level**” is the Index Closing Level on the most recent Reset Valuation Date prior to such day. The initial Last Reset Index Closing Level is 622.5081, the Index Closing Level on the Initial Trade Date, as reported by Bloomberg L.P. and Reuters.

The “**Index Closing Level**” on any date of determination is the closing level of the Index, as reported on Bloomberg L.P. and Reuters; provided, however, that if the closing level of the Index as reported on Bloomberg L.P. (or any successor) differs from the closing level of the Index as reported on Reuters (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent. The initial Index Closing Level (which is also the first Last Reset Index Closing Level) is 622.5081, the Index Closing Level measured on the Initial Trade Date, as determined by the Security Calculation Agent.

On any calendar day that is not an Index Business Day, the Index Closing level will be equal to the Index Closing Level on the Index Business Day immediately preceding such calendar day.

“**Measurement Period**” means the Final Measurement Period or Call Measurement Period, as applicable.

The “**Current Indicative Value**” or “**intraday indicative value”**, as determined by the Security Calculation Agent, is an amount per Security, on an intraday basis on any Index Business Day, equal to:

a) On the Initial Trade Date, $25.00.

b) On any other calendar day prior to the first day of an applicable Measurement Period: (Current Principal Amount on the immediately preceding calendar day × Index Factor, calculated using the Intraday Index Value) — Accrued Fees + Accrued Dividend.

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to: (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor, calculated using the Intraday Index Value × Residual Factor, from the immediately preceding calendar day) — Accrued Fees + Accrued Dividend + Measurement Period Cash Amount, from the immediately preceding calendar day

d) The minimum value of the Current Indicative Value on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Current Indicative Value (or intraday indicative value). **If a Zero Value Event occurs during any Index Business Day then the Current Indicative Value (or "intraday indicative value") will be equal to the Zero Value Settlement Amount, subsequent to the event on the date on which the Zero Value Event occurred, and on all future calendar days. Upon the occurrence of a Zero Value Event, investors will likely lose all or substantially all of their investment. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

If the Securities undergo a split or reverse split, the Current Indicative Value (or intraday indicative value) will be adjusted accordingly.

The "**Accrued Fees**" as of any date of determination means the Accrued Tracking Fee + the Accrued Financing Fee.

If the Securities undergo a split or reverse split, the Accrued Fees will be adjusted accordingly.

The Securities are subject to an "**Accrued Tracking Fee**" per Security, calculated as follows:

a) On the Initial Trade Date, the Accrued Tracking Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Tracking Fee is equal to: (a) the Accrued Tracking Fee as of the immediately preceding calendar day, *plus* the Daily Tracking Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Tracking Fee is reset to be equal to the Daily Tracking Fee on such calendar day.

The "**Daily Tracking Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Tracking Fee is zero.

b) On any subsequent calendar day, the Daily Tracking Fee is equal to: (a) (i) 0.95%, *times* (ii) the Current Principal Amount on the immediately preceding calendar day, *times* (iii) the Index Factor, on such calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 365.

c) The minimum value of the Daily Tracking Fee on any calendar day will be zero.

The Daily Tracking Fee represents the investor fees calculated each day on the current value of the unleveraged notional amount invested in the Index per Security. These charges accrue and compound during the applicable period, and will reduce any amount you are entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Tracking Fee will be adjusted accordingly.

The Securities are subject to an "**Accrued Financing Fee**" per Security calculated as follows:

a) On the Initial Trade Date, the Accrued Financing Fee is equal to zero.

b) On any subsequent calendar day, the Accrued Financing Fee is equal to: (a) the Accrued Financing Fee as of the immediately preceding calendar day, *plus* (b) the Daily Financing Fee on such calendar day.

c) On the calendar day after each Reset Valuation Date, the Accrued Financing Fee is reset to be equal to the Daily Financing Fee on such calendar day.

d) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Accrued Financing Fee will be equal to zero.

The "**Daily Financing Fee**" is an amount per Security calculated as follows:

a) On the Initial Trade Date, the Daily Financing Fee is equal to zero.

b) On any subsequent calendar day, the Daily Financing Fee is equal to: (a) (i) 0.5, *times* (ii) the Financing Rate, on such calendar day, *times* (iii) the Current Principal Amount, on the immediately preceding calendar day, *times* (iv) the Residual Factor, on the immediately preceding calendar day, *divided by* (b) 360.

c) If a Permanent Deleveraging Event occurs, then on any calendar day following the Second Permanent Deleveraging Valuation Date, the Daily Financing Fee will be equal to zero.

d) The minimum value of the Daily Financing Fee on any calendar day will be zero.

The Daily Financing Fee seeks to compensate UBS for providing investors with a leveraged participation in movements of the Index and is intended to approximate the financing costs that investors may have otherwise incurred had they sought to borrow funds at a similar rate from a third party to invest in the Securities. These charges accrue and compound during the applicable period, and will reduce any amount that you will be entitled to receive at maturity, early redemption, call or acceleration upon the occurrence of a Zero Value Event.

If the Securities undergo a split or reverse split, the Daily Financing Fee will be adjusted accordingly.

The "**Financing Rate**" will equal the sum of (a) 0.95% and (b) the London interbank offered rate (ICE LIBOR) for three-month deposits in U.S. Dollars, which is displayed on Reuters page "LIBOR01" (or any successor service or page for the purpose of displaying the London interbank offered rates of major banks, as determined by the Security Calculation Agent) ("**LIBOR**") (or any successor base rate, as described below), as of 11:00 a.m., London time, on the immediately preceding London Business Day. The minimum value of the three-month U.S. Dollar LIBOR rate (or any successor base rate, as described below) used on any calendar day will be zero. The minimum Financing Rate at any time will be 0.95%

For example, 1.68275% was the three-month U.S. Dollar LIBOR rate on February 20, 2020, which was a London Business Day. The Financing Rate on February 21, 2020 would have been equal to 0.95% + 1.68275%, or 2.63275%.

Notwithstanding the foregoing:

- If the Security Calculation Agent determines on the relevant determination date that the London interbank offered rate for deposits in U.S. dollars having an index maturity of three months in amounts of at least $1,000,000 has been discontinued or is no longer representative of the underlying market or economic reality, then the Security Calculation Agent will use a substitute or successor base rate that it has determined in its sole discretion is most comparable to such London interbank offered rate, provided that if the Security Calculation Agent determines there is an industry-accepted successor base rate, then the Security Calculation Agent shall use such successor base rate; and
- If the Security Calculation Agent has determined a substitute or successor base rate in accordance with the foregoing, the Security Calculation Agent in its sole discretion may determine the business day convention, definition of business day and any other relevant methodology for calculating such substitute or successor base rate, including any adjustment factor needed to make such substitute or successor base rate comparable to the LIBOR base rate, in a manner that is consistent with industry- accepted practices for such substitute or successor base rate.

The establishment of three-month U.S. Dollar LIBOR (or such successor base rate, as applicable) for each period by the Security Calculation Agent shall (in the absence of manifest error) be final and binding.

"**London Business Day**" means each Monday, Tuesday, Wednesday, Thursday and Friday that is not a day on which banking institutions in London generally are authorized or obligated by law, regulation or executive order to close and is also a day on which dealings in U.S. dollars are transacted in the London interbank market.

The "**Measurement Period Cash Amount**" is an amount per Security equal to:

a) $0.00 on any calendar day, to but excluding the first day of an applicable Measurement Period.

b) On the first day of an applicable one-day Measurement Period:

At the close of trading on such Index Business Day, (the Current Principal Amount on the immediately preceding calendar day × Index Factor on such Index Business Day)

c) From and including the first day of an applicable four-day Measurement Period:

    i. At the close of trading on each Index Business Day during the applicable four-day Measurement Period, the Measurement Period Cash Amount on the immediately preceding calendar day + (Current Principal Amount, on the calendar day immediately preceding the first day of such Measurement Period × 0.25 × Index Factor, on such Index Business Day).

    ii. On any calendar day during an applicable four-day Measurement Period that is not an Index Business Day, the Measurement Period Cash Amount on the immediately preceding Index Business Day.

d) On any calendar day after the last Index Business Day of an applicable Measurement Period, the Measurement Period Cash Amount on the last Index Business Day of such Measurement Period.

The Measurement Period Cash Amount represents the portion of the Current Principal Amount that has been converted to cash on any given day of an applicable Measurement Period and is no longer tracking the Index.

At the close of trading of each Index Business day during a four-day Measurement Period, approximately 25% of the Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period, will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash as well. After the close of trading on the final Index Business Day of an applicable four-day Measurement Period, the Measurement Period Cash Amount will represent the averaged value of the Current Principal Amount that was deemed converted to cash across the four-days of such Measurement Period. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount will be deemed converted to cash and an applicable amount of financing will separately be deemed converted to cash, at the close of trading of the first day of such Measurement Period.

If the Securities undergo a split or reverse split, the Measurement Period Cash Amount will be adjusted accordingly.

The "**Final Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is less than $50,000,000, the Calculation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the Calculation Date is equal to or greater than $50,000,000, the four (4) Index Business Days from and including the Calculation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the Calculation Date, will equal:

> (i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by CEFDSO <Index> on Bloomberg L.P.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently ICE Data Services.

The "**Calculation Date**" means June 2, 2050, unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

The Calculation Date represents the first Index Business Day of the Final Measurement Period.

"**Index Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The return on the Securities is based upon the performance of the S-Network Composite Closed-End Fund Index (Bloomberg: "CEFX"). The Index is a mutual fund index designed to serve as a benchmark for closed-end funds listed in the U.S. that are principally engaged in asset management processes designed to produce taxable annual yield.

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the same Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. We reserve the right from time to time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such acceleration. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The first Redemption Date will be the fourth Index Business Day immediately following the Initial Trade Date and the Final Redemption Date will be the fourth Index Business Day immediately preceding the Maturity date, subject to adjustments. In addition, if a call notice has been issued, the last Redemption Valuation Date will be the fourth Index Business Day prior to the Call Settlement Date, as applicable. If a Zero Value Event occurs, the last Redemption Date will be the date on which the Zero Value Event occurred.

If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of the Redemption Valuation Date).

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**." If the amount calculated above is equal to or less than zero, the payment upon early redemption will be zero. We reserve the right from time to time to waive the Redemption Fee Amount in our sole discretion and on a case-by-case basis. There can be no assurance that we will elect to waive this fee and you should not assume you will be entitled to such fee waiver.

We will inform you of such Redemption Amount on the first Business Day following the applicable Redemption Valuation Date.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation:

| Redemption Amount | = | Closing Indicative Value | - | Redemption Fee Amount |
|---|---|---|---|---|

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Accrued Fees and the Redemption Fee Amount will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees and the Redemption Fee Amount, if applicable (less any Coupon Amounts you may be entitled to receive as of the Redemption Valuation Date), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon early redemption. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right and, upon the occurrence of a Zero Value Event, the Securities will be automatically accelerated and mandatorily redeemed by UBS.** See "Specific Terms of the Securities — UBS's Call Right" and "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event".

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

The Redemption Amount is meant to induce arbitrageurs to counteract any trading of the Securities at a premium or discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner.

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**", to us via email in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your Redemption Confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your Redemption Notice after 12:00 noon (New York City time), or your Redemption Confirmation after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your Redemption Notice will not be effective, you will not be able to redeem your Securities until the following Redemption Date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent Redemption Date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable. If your DTC custodian or your brokerage firm is not a current UBS customer, UBS will be required to on-board such DTC custodian or brokerage firm, in compliance with its internal policies and procedures, before it can accept your Redemption Notice, your Redemption Confirmation or otherwise process your redemption request. This on-boarding process may delay your Redemption Valuation Date and Redemption Date. Furthermore, in certain circumstances, UBS may be unable to on-board your DTC custodian or your brokerage firm.

We reserve the right from time to time to waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the Redemption Notice is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which may be provided via press release), such redemption to occur on any Business Day that we may specify through and including the Maturity Date. Upon early redemption in the event we exercise this call right, you will receive a cash payment equal to the Closing Indicative Value on the last Index Business Day in the Call Measurement Period. We refer to this cash payment as the "**Call Settlement Amount**."

If the amount calculated above is equal to or less than zero, the payment upon UBS's exercise of its Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

a) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is less than $50,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding as at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right is equal to or greater than $50,000,000, the four (4) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities outstanding as of the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right will equal:

(i) The Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by CEFDSO <Index> on Bloomberg L.P.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Call Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Call Measurement Period |

**You may lose all or a substantial portion of your investment upon a call. The combined negative effect of the Accrued Fees will reduce your final payment. If the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is insufficient to offset the negative effect of the Accrued Fees (less any Coupon Amounts you may be entitled to receive), or if the compounded leveraged quarterly return of the Index (or the unleveraged return of the Index, following a Permanent Deleveraging Event) is negative, you may lose all or a substantial portion of your investment upon a call. The occurrence of Loss Rebalancing Events will result in more frequent than quarterly compounding.**

**In addition, upon the occurrence of a Zero Value Event, the Securities may be automatically accelerated and mandatorily redeemed by UBS.** See "Specific Terms of the Securities — Automatic Acceleration Upon Zero Value Event" below.

**Automatic Acceleration Upon Zero Value Event**

A "**Zero Value Event**" occurs if, on any Index Business Day (other than an Excluded Day), the Intraday Index Value decreases by 66.66667% or more in value from the Last Reset Index Closing Level. From immediately after the Zero Value Event and on all future calendar days, the Index Factor and the Current Principal Amount will be set equal to zero. The Accrued Dividend and Accrued Fees will be fixed at their respective values on the Zero Value Event date and will stay unchanged on all future calendar days.

When the Intraday Index Value decreases 66.66667% in value from the Last Reset Index Closing Level, the Index Factor will equal zero. A Zero Value Event represents the first instance when the effective unleveraged notional amount that is deemed invested in the Index per Security equals zero. It will have the effect of permanently resetting the value of your Securities to a fixed value (which may be zero) and accelerating the Securities. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event. A Zero Value Event is expected to occur only in the narrow window of time between the occurrence of a Permanent Deleveraging Event and completion of the leverage reset to 1.0 at the end of the Second Permanent Deleveraging Valuation Date.

For the purposes of the "Zero Value Event" definition, an "**Excluded Day**" means (i) any calendar day after the Second Permanent Deleveraging Valuation Date (ii) any calendar day on which a Zero Value Event has already occurred, (iii) any calendar day after the occurrence of a Zero Value Event, and (iv) any calendar day after the last day of an applicable Measurement Period.

If a Zero Value Event occurs, all issued and outstanding Securities will be automatically terminated and mandatorily redeemed by UBS and you will receive the Zero Value Settlement Amount on the Zero Value Settlement Date. You will not benefit from any future exposure to the Index after the occurrence of a Zero Value Event.

In the event that a Zero Value Event has occurred, UBS will issue a press release shortly after the event and specify the relevant Zero Value Settlement Date and Zero Value Settlement Amount in respect of your investment in the Securities. The Securities will be suspended from trading intra-day shortly after the event occurs and will likely not be open for trading again on NYSE Arca before the Zero Value Settlement Date.

If a Zero Value Event occurs on an Index Business Day that would otherwise be a Coupon Ex-Date, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended.

The "**Zero Value Settlement Amount**" per Security will be calculated as follows:

a) On any calendar day, to but excluding the first day of an applicable Measurement Period:

   (i) the Accrued Dividend, *minus* (ii) the Accrued Fees, on the date on which the Zero Value Event occurred.

b) From and including the first day of an applicable Measurement Period:

(i) the Measurement Period Cash Amount on the immediately preceding calendar day, *plus* (ii) the Accrued Dividend, *minus* (iii) the Accrued Fees, on the date on which the Zero Value Event occurred.

c) The minimum value of the Zero Value Settlement Amount will be zero.

For example:

a) If the Accrued Dividend was \$0.04, the Accrued Fees was \$0.01, and the Measurement Period Cash Amount was \$0, then the Zero Value Settlement Amount would be \$0.03.

b) If the Accrued Dividend was \$0.01, the Accrued Fees was \$0.05, and the Measurement Period Cash Amount was \$0, then the Zero Value Settlement Amount would be \$0.

c) If the Zero Value Event occurred during a four-day Measurement Period, and the Accrued Dividend was \$0.01, the Accrued Fees was \$0.03, and the Measurement Period Cash Amount on the immediately preceding calendar day was \$6.59, then the Zero Value Settlement Amount would be \$6.57.

The following graphics illustrate the formula to determine the Zero Value Settlement Amount, which has been simplified for ease of presentation:

On any calendar day, to but excluding the first day of an applicable four-day Measurement Period:

| | | | | |
|---|---|---|---|---|
| Zero Value Settlement Amount | = | Accrued Dividend | - | Accrued Fees on date Zero Value Event occurred |

From and including the first day of an applicable Measurement Period:

| | | | | | | |
|---|---|---|---|---|---|---|
| Zero Value Settlement Amount | = | Measurement Period Cash Amount on immediately preceding calendar day | + | Accrued Dividend | - | Accrued Fees on date Zero Value Event occurred |

The “**Zero Value Settlement Date**” will be the third Index Business Day following the date on which the Zero Value Event occurred. For a detailed description of how the Current Indicative Value (or intraday indicative value) of the Securities is calculated see “Valuation of the Index and the Securities”.

**You may lose all or a substantial portion of your investment upon the occurrence of a Zero Value Event. Upon the occurrence of a Zero Value Event you will receive on the Zero Value Settlement Date only the Zero Value Settlement Amount per Security.**

**In addition, the Securities may be called by UBS prior to the Maturity Date pursuant to UBS’s Call Right.** See “Specific Terms of the Securities — UBS’s Call Right”.

**Loss Rebalancing Events**

A Loss Rebalancing Event will have the effect of deleveraging your Securities with the aim of resetting the then-current leverage to approximately 1.5. This means that after a Loss Rebalancing Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Loss Rebalancing Event.

A “**Loss Rebalancing Event**” occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 15% or more in value from the previously Last Reset Index Closing Level.

Loss Rebalancing Events may occur multiple times over the term of the Securities and may occur multiple times during a single calendar quarter. This means both that (i) the Current Principal Amount may be reset more frequently than quarterly and (ii) the cumulative effect of compounding and fees will have increased as a result of the Loss Rebalancing Event(s). Because each Loss Rebalancing Event will have the effect of deleveraging your Securities, following a Loss Rebalancing Event your Securities will have less exposure to a potential positive gain in value relative to the exposure before the occurrence of such Loss Rebalancing Event.

For purposes of the “Loss Rebalancing Event” definition, an “**Excluded Day**” means (i) the Index Business Day immediately preceding any Quarterly Reset Valuation Date, if a Loss Rebalancing Event occurs after 3:15pm on such day, (ii) any Quarterly Reset Valuation Date, (iii) any Loss Rebalancing Valuation Date, (iv) the Index Business Day immediately preceding the first day of an applicable Measurement Period, if a Loss Rebalancing Event occurs after 3:15pm on such day (v) any calendar day from and including the first day of an applicable Measurement Period, (vi) the First or Second Permanent Deleveraging Valuation Dates, (vii) any calendar day after the Second Permanent Deleveraging Valuation Date, (viii) a Zero Value Event date, and (ix) any calendar day after the Zero Value Event date.

"**Loss Rebalancing Valuation Date**" means:

a) if a Loss Rebalancing Event occurs at or prior to 3:15 p.m. on an Index Business Day, the day that such Loss Rebalancing Event occurs, subject to adjustment as described under "— Market Disruption Event";

b) if a Loss Rebalancing Event occurs after 3:15 p.m. on an Index Business Day, the first Index Business Day following the occurrence of such Loss Rebalancing Event, subject to adjustment as described under "— Market Disruption Event."

**Permanent Deleveraging Event**

A Permanent Deleveraging Event will have the effect of deleveraging your Securities, with the aim of permanently resetting the then-current leverage to 1.0, over two Index Business Days. The leverage at the end of the First Permanent Deleveraging Valuation Date is reset to approximately 1.5 and the leverage at the end of the Second Permanent Deleveraging Valuation Date is reset to 1.0. This means that after a Permanent Deleveraging Event, a constant percentage increase in the Index Closing Level will have less of a positive effect on the value of your Securities relative to before the occurrence of the Permanent Deleveraging Event. A Permanent Deleveraging Event is expected to occur only in the narrow window of time between the occurrence of a Loss Rebalancing Event and completion of the leverage reset to 1.5 at the end of the Loss Rebalancing Valuation Date.

A "**Permanent Deleveraging Event**" occurs if, at any time, the Intraday Index Value on such Index Business Day (other than an Excluded Day) decreases by 50% or more in value from the Last Reset Index Closing Level.

For purposes of the "Permanent Deleveraging Event" definition, an "**Excluded Day**" means (i) the First or Second Permanent Deleveraging Valuation Dates, (ii) any calendar day after the Second Permanent Deleveraging Valuation Date, (iii) a day upon which a Zero Value Event occurs, (iv) any calendar day after the occurrence of a Zero Value Event, (v) the day which is two Index Business Days prior to the first day of an applicable Measurement Period, if a Permanent Deleveraging Event occurs after 3:15pm on such day and (vi) any calendar day from and including the Index Business Day immediately preceding the first day of an applicable Measurement Period.

In the event that a Permanent Deleveraging Event has occurred, UBS will issue a press release before 9:00 a.m. on the Index Business Day immediately following the date on which the Permanent Deleveraging Event occurred, announcing the Permanent Deleveraging Event and notifying you of the Permanent Deleveraging Valuation Dates.

"**Permanent Deleveraging Valuation Dates**" means the First Permanent Deleveraging Valuation Date and the Second Permanent Deleveraging Valuation Date, each as defined below:

a) The "**First Permanent Deleveraging Valuation Date**" means:

   i. Any Index Business Day, which otherwise would have been a Loss Rebalancing Valuation Date, but on which a Permanent Deleveraging Event has occurred, subject to adjustment as described under "- Market Disruption Event";

   ii. If a Permanent Deleveraging Event occurs after 3:15pm on any Index Business Day which would not otherwise have been a Loss Rebalancing Valuation Date, then the first Index Business Day following the occurrence of such Permanent Deleveraging Event, subject to adjustment as described under "— Market Disruption Event".

   The leverage of your Securities will be reset to approximately 1.5 at the close of trading on the First Permanent Deleveraging Valuation Date.

b) The "**Second Permanent Deleveraging Valuation Date**" means the Index Business Day immediately following the First Permanent Deleveraging Valuation Date, subject to adjustment as described under "— Market Disruption Event".

   The leverage of your Securities will be reset to approximately 1.0 at the close of trading on the Second Permanent Deleveraging Valuation Date.

**Security Calculation Agent**

UBS Securities LLC will act as the Security Calculation Agent. The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Value (or the "intraday indicative value"), Closing Indicative Value, Market Disruption Events, Business Days, Index Business Days, the Leverage Factor, the Index Factor, the Index Performance Ratio, the Residual Factor, the Index Closing Level, the Financing Rate, the Accrued Fees (including determining any successor to the LIBOR base rate), the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable, the Zero Value Settlement Amount, if any, that we will pay you upon acceleration following the occurrence of a Zero Value Event, the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, whether a Loss Rebalancing Event has occurred, whether a Permanent Deleveraging Event has occurred and whether any day is a Business Day or an Index Business Day and all such other matters as may be specified elsewhere herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you, and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by the Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of this prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon, New York City time, on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date, Zero Value Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Amount and Redemption Fee Amount, if any, per Security, the Call Settlement Amount, if any, per Security, the Current Principal Amount, the Zero Value Settlement Amount, and the Cash Settlement Amount, if any, per Security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (*e.g.*, .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of the Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing during a four-day Measurement Period, the Index Closing Level for such day will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. The remaining Index Business Days in the Measurement Period will be postponed accordingly, and the remaining Index Business Days in the Measurement Period will resume again following the suspension of the Market Disruption Event. For example, if the four-day Measurement Period for purposes of calculating the Call Settlement Amount, is scheduled for June 2, June 3, June 4 and June 5, and there is a Market Disruption Event with respect to the Index on June 2, but no other Market Disruption Event during such Call Measurement Period, then June 3 will become the first Index Business Day of the Measurement Period, June 4th the second Index Business Day, June 5th the third Index Business Day and the next Index Business Day after June 5th would be the final day of the Measurement Period. The same approach would be applied if there is a Market Disruption Event during a four-day Final Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or any Reset Valuation Date, the Index Closing Level for such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on June 2 and there is a Market Disruption Event with respect to the Index on June 2, then the Index Closing Level on June 3 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on June 3.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the affected Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date), Calculation Date (in the event that the Final Measurement Period is the Calculation Date) or Reset Valuation Date occurring more than five Index Business Days following the day originally scheduled to be such Index Business Day of the Measurement Period or such Redemption Valuation Date, Call Valuation Date, Calculation Date or Reset Valuation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the fifth Index Business Day following the date originally scheduled to be such Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date, Calculation Date or any Reset Valuation Date, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such fifth Index Business Day but for such Market Disruption Event.

Any of the following will be a Market Disruption Event with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

c) the Index is not published; or

d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled “Use of Proceeds and Hedging”.

The following events will not be Market Disruption Events with respect to the Index:

a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an “absence of trading” in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under “Description of Debt Securities We May Offer — Optional Tax Redemption” in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under “— Default Amount.”

In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under “— Coupon Payment,” calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the three Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the third Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under “Description of Debt

Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking,

*plus*

the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify

the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc., or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor or Index Calculation Agent discontinue publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor or Index Calculation Agent does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"), and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call, acceleration upon the occurrence of a Zero Value Event or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor or Index Calculation Agent discontinue publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor or Index Calculation Agent do not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or on any Reset Valuation Date, or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described in this prospectus supplement as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Value or intraday indicative value, Closing Indicative Value, Index Factor, Index Performance Ratio, Residual Factor, Accrued Fees, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, upon early redemption or upon acceleration upon the occurrence of a Zero Value Event by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An "**Index Replacement Event**" means:

a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after June 2, 2020 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

c) any event that occurs on or after June 2, 2020 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index, a successor index or a substitute index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Index Performance Ratio, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Accrued Fees, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, the Zero Value Settlement Amount, if any, that we will pay you in the event of acceleration upon the occurrence of a Zero Value Event, if applicable, the Last Reset Index Closing Level and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in this prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity, call or acceleration upon the occurrence of a Zero Value Event, or upon early redemption, will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day or a New York Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the attached prospectus, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover at any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

### 17. ETRACS Alerian Midstream Energy Index due June 21, 2050

**Specific Terms of the Securities**

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("**DTC**") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (i.e., in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

**Principal Amount:** $400,000,000

**Issuer:** UBS AG (London Branch)

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity or call, or upon early redemption. Instead, at maturity, you will receive a cash payment the amount of which will vary depending on the performance and path of the Index calculated in accordance with the formula set forth below and will be reduced by the Daily Tracking Fee as of the last Index Business Day in the applicable Measurement Period or Redemption Valuation Date.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment on the Redemption Date equal to the Redemption Amount as described below under "— Early Redemption at the Option of the Holders." If the amount so calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If we elect to exercise our call right to redeem all of the Securities, subject to compliance with the procedures set forth below, for each Security you will receive a cash payment on the Call Settlement Date equal to the Call Settlement Amount, as described below under "— UBS's Call Right." If the amount so calculated is equal to or less than zero, the Call Settlement Amount will be zero and you will not receive a cash payment.

The Securities may pay a cash coupon during their term.

**Coupon Payment**

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Coupon Amount, if any. The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index Constituent Securities would have been entitled to receive in respect of the Index Constituent Securities during the relevant period. The Coupon Amount may be equal to zero.

The "**Coupon Amount**" means (i) on any calendar day that is not a Coupon Ex-Date, an amount per Security equal to zero; and (ii) on any calendar day that is a Coupon Ex-Date, an amount per Security equal to the Accrued Dividend on the Coupon Valuation Date immediately preceding such Coupon Ex-Date. The minimum value of the Coupon Amount will be zero.

The following graphic illustrates the formula to determine the Coupon Amount on a Coupon Ex-Date, which has been simplified for ease of presentation:

$$\text{Coupon Amount} = \text{Accrued Dividend, on the immediately preceding Coupon Valuation Date}$$

If the Securities undergo a split or reverse split, the Coupon Amount will be adjusted accordingly.

Notwithstanding the foregoing, with respect to cash distributions or dividends on an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the dividend or cash distribution to holders of such Index Constituent Security by the scheduled payment date for such dividend or cash distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Coupon Amount. Any such delayed dividend or cash distribution payments from the issuer of an Index Constituent Security will be attributed back to the Accrued Dividend and included in the next Coupon Amount.

The "**Accrued Dividend**" means, as of any date of determination, an amount per Security equal to: (i) on the Initial Trade Date, $0.00 per Security; and (ii) on any subsequent calendar day (a) the Accrued Dividend as of the immediately preceding calendar day, *plus* (b) the Daily Dividend on such calendar day, *minus* (c) the Coupon Amount on such calendar day.

If the Securities undergo a split or reverse split, the Accrued Dividend will be adjusted accordingly.

The "**Daily Dividend**" means on any calendar day, an amount per Security equal to:

(a)(i) the Index Dividend Point, *times* (ii) the Current Principal Amount on the immediately preceding calendar day, *divided by* (b) the Index Closing Level on the immediately preceding calendar day.

The Daily Dividend will be rounded to four decimal places.

The Daily Dividend is intended to approximate the amount of distributions in US Dollars that a holder of the Securities would receive if such holder held an unleveraged investment in the Index Constituent Securities directly.

The "**Index Dividend Point**" on any calendar day, means an amount per Security equal to (a) (the *sum of the products of* (i) the cash value of distributions, that a hypothetical holder of one share of an Index Constituent Security, whose "ex-dividend date" occurs on such calendar day, would have been entitled to receive (adjustments relating to foreign exchange rate fixings or dividend withholding taxes, described below), and (ii) the number of index shares of that Index Constituent Security included in the Index as of such date), *divided by* (b) the Divisor as of such date.

In respect of distributions on any Canadian Index Constituent Securities, on their respective "ex-dividend date", the cash value of distributions will be deemed to be converted from Canadian Dollars to U.S. Dollars at the WM / Reuters USD/CAD foreign exchange rate as of 4:00 p.m. Eastern Time on such ex-dividend date (the "**WM / Reuters FX Rate**"). These mid-market fixings are calculated by the WM Company based on Reuters data and appear on the Reuters pages WMRA.

Notwithstanding the foregoing, if the Security Calculation Agent determines on the relevant determination date that:

(a) the WM/ Reuters FX Rate has been discontinued (or otherwise ceases to be published), materially disrupted or is no longer representative of the underlying market or economic reality; or

(b) 4:00 p.m. Eastern Time is no longer the appropriate time for fixing the WM/Reuters FX Rate for any of the reasons set forth in (a) above,

then the Security Calculation Agent will, in the case of (a) use a substitute or successor provider of foreign exchange rates that it has determined in its sole discretion is most comparable to the WM / Reuters FX Rate, provided that if the Security Calculation Agent determines that there is an industry- accepted successor provider of foreign exchange rates, then the Security Calculation Agent shall use such successor provider of foreign exchange rates; or in the case of (b) use such other time for fixing of the foreign exchange rate as it has determined in its sole discretion is appropriate based on the WM / Reuters FX Rate, or such substitute or successor provider of foreign exchange rates, as it has determined in its sole discretion is most comparable to the WM / Reuters FX Rate, as set forth above.

As of the date of this prospectus supplement, the applicable dividend withholding tax would reduce the cash value of distributions in respect of any Canadian Index Constituent Security by 15% for purposes of calculating the Index Dividend Point. The 15% rate is subject to adjustment if there is a change under Canadian law or the tax treaty between the United States and Canada or to the Canadian dividend withholding tax rate applicable to a U.S. holder of a Canadian Index Constituent Security that is eligible for the benefits of the tax treaty between the United States and Canada.

In the event that an adjustment relating to foreign exchange rate fixings or dividend withholding taxes is made, we will issue a press release announcing such adjustment and the effective date for such adjustment.

The Index Dividend Point, on any calendar day, represents the total cash value of distributions that a hypothetical holder of the Index Constituent Securities, in proportion to the weights of the Index Constituent Securities, would have been entitled to receive with respect to any Index Constituent Security for those cash distributions whose "ex-dividend date" occurs on such calendar day.

The Index Dividend Point may not be publicly disseminated by the Index Calculation Agent. The data used to calculate the Index Dividend Point is the property of the Index Calculation Agent and investors may be required to pay a fee and meet any other requirements of the Index Calculation Agent in order to access such information. See "Risk Factors — The value of the Index Dividend Point may not be publicly disseminated or otherwise freely accessible to investors".

The "**Divisor**" means, as of any date of determination, the divisor used by the Index Calculation Agent to calculate the Index Closing Level.

The "**Coupon Payment Date**" means the 15th Index Business Day following each Coupon Valuation Date. The first Coupon Payment Date will be October 21, 2020, subject to adjustment. If such day is not a Coupon Business Day, the Coupon Payment Date shall be the following Coupon Business Day.

If the final Coupon Ex-Date occurs prior to the Maturity Date, but the final Coupon Payment Date otherwise occurs after the Maturity Date, in such case, the final Coupon Payment Date will be the Maturity Date, subject to adjustment.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business day, the Coupon Record Date shall be the immediately preceding Coupon Business Day.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Coupon Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Coupon Business Day immediately preceding the applicable Coupon Record Date.

If a day that would otherwise be a Coupon Ex-Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-Date will be included in the Cash Settlement Amount or Call Settlement Amount payable at maturity or call, respectively.

The "**Coupon Valuation Date**" means the 30th day of each March, June, September and December, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date. The first Coupon Valuation Date will be September 30, 2020.

"**Coupon Business Day**" means any Index Business Day other than an Index Business Day on which banking institutions in New York are not authorized or obligated by law, regulation or executive order to be open.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution, and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is June 21, 2050, which will be the third Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under

"— Market Disruption Event."

For each Security, unless earlier called or redeemed, you will receive at maturity a cash payment equal to the Closing Indicative Value on the last day of the Final Measurement Period. We refer to this payment as the "**Cash Settlement Amount**". If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Cash Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Final Measurement Period |

**You may lose all or a substantial portion of your investment at maturity. The Securities are fully exposed to any decline in the level of the Index. The negative effect of the Daily Tracking Fee will reduce your final payment. If the level of the Index (as measured by the Index Closing Level at the end of the Final Measurement Period, as compared to the initial Index Closing Level or the Index level at the time you purchase the Securities, as applicable) does not increase by an amount sufficient to offset the negative effect of the Daily Tracking Fee (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the initial Index Closing Level (or the Index level at the time you purchase the Securities, as applicable), you may lose all or a substantial portion of your investment at maturity. The Daily Tracking Fee also takes into account the performance of the Index, as measured by the Current Principal Amount.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right. If the Securities are called by UBS, the Call Settlement Amount may be zero and you may lose all or a substantial portion of your investment.** See "— UBS's Call Right".

The "**Stated Principal Amount**" of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount. If the Securities undergo a split or reverse split, the Stated Principal Amount will be adjusted accordingly.

The "**Closing Indicative Value**" represents the dollar value per Security that an investor would receive on any day if it redeemed the Security on such day (excluding any Redemption Fee Amount). The Closing Indicative Value per Security will be calculated as follows:

a) On the Initial Trade Date, $25.00 per Security

b) On any subsequent calendar day, prior to but excluding the first day of an applicable Measurement Period, an amount per Security equal to:

Current Principal Amount + Accrued Dividend

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

Current Principal Amount + Accrued Dividend + Measurement Period Cash Amount

The minimum value of the Closing Indicative Value on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Closing Indicative Value.

If the Securities undergo a split or reverse split, the Closing Indicative Value will be adjusted accordingly.

The Current Principal Amount represents the notional investment in the Index Constituent Securities per Security at the close of trading on any calendar day.

The "**Current Principal Amount**" per Security, will be calculated as follows:

a) On the Initial Trade Date, $25.00 per Security;

b) On any subsequent calendar day, prior to but excluding the first day of an applicable Measurement Period

(Current Principal Amount on the previous calendar day × Index Factor)—Daily Tracking Fee

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

(Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor × Residual Factor)

On any calendar day during the Measurement Period that is not an Index Business Day, the Current Principal Amount will be equal to the Current Principal Amount on the previous calendar day.

The minimum value of the Current Principal Amount on any calendar day will be zero.

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

The "**Index Factor**" on any Index Business Day prior to but excluding the first day of an applicable Measurement Period, will equal:

(i) the Index Closing Level, on such Index Business Day, *divided by,* (ii) the Index Closing Level, on the immediately preceding Index Business Day.

From and including the first day of an applicable Measurement Period, the Index Factor will equal:

(i) the Index Closing Level, on such calendar day, *divided by,* (ii) the Index Closing Level on the calendar day immediately preceding the first day of such Measurement Period.

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the immediately preceding Index Business Day. The Index Factor will therefore equal one (1) on any calendar day that is not an Index Business Day and is prior to the first Index Business Day of a five-day Measurement Period.

The "**Residual Factor**" will be calculated as follows:

a) 1.0 on any calendar day, prior to but excluding the first day of an applicable Measurement Period

b) From and including the first day of an applicable five-day Measurement Period, (a) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such five-day Measurement Period, *divided by* (b) five.

The Residual Factor is intended to approximate the percentage of the Current Principal Amount that is tracking the Index on any given day. The Residual Factor is relevant only during an applicable Measurement Period but otherwise is not a component of the Closing Indicative Value or Current Indicative Value formulas.

For example, on the first Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (4/5), on the second Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (3/5), on the third Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (2/5), on the fourth Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (1/5) and on the last Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal zero.

On any calendar day from and including the last Index Business Day of an applicable Measurement Period, the Residual Factor will be equal to zero.

The "**Index Closing Level**" on any date of determination is the closing level of the Index as reported on the NYSE and Bloomberg; provided, however, that if the closing level of the Index as reported on the NYSE (or any successor) differs from the closing level of the Index as reported on Bloomberg (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent. 335.0383 is the initial Index Closing Level measured on June 19, 2020 (the Initial Trade Date), as determined by the Security Calculation Agent.

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level from the last Index Business Day prior to such calendar day.

"**Measurement Period**" means the Final Measurement Period or Call Measurement Period, as applicable.

The **"Current Indicative Value"** or "**intraday indicative value**", as determined by the Security Calculation Agent, means the Closing Indicative Value per Security calculated on an intraday basis on any Index Business Day.

For the purposes of calculating the Current Indicative Value, the Index Factor (which is a component of the Current Principal Amount definition) will be determined using the Intraday Index Value.

Additionally, from and including the first day of an applicable Measurement Period, the Current Indicative Value will be calculated using (i) the Measurement Period Cash Amount from the immediately preceding calendar day, and (ii) the Residual Factor from the immediately preceding calendar day.

The minimum value of the Current Indicative Value (or intraday indicative value) on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Current Indicative Value (or intraday indicative value).

If the Securities undergo a split or reverse split, the Current Indicative Value (or intraday indicative value) will be adjusted accordingly.

The "**Daily Tracking Fee**" means, as of any date of determination, an amount per Security equal to 0.75% per annum, calculated as follows:

a) On the Initial Trade Date, $0.00 per Security;

b) On any subsequent calendar day:

   (0.75% / 365) × Current Principal Amount on the immediately preceding calendar day × Index Factor

The minimum value of the Daily Tracking Fee on any calendar day will be zero.

If the Securities undergo a split or reverse split, the Daily Tracking Fee will be adjusted accordingly.

The "**Measurement Period Cash Amount**" is an amount per Security equal to:

a) $0.00, on any calendar day prior to but excluding the first day of an applicable Measurement Period.

b) On the first day of an applicable one-day Measurement Period:

   a. At the close of trading on such Index Business Day, the (Current Principal Amount, on the immediately preceding calendar day, *times* Index Factor, on such Index Business Day), *minus* Daily Tracking Fee.

c) From and including the first day of an applicable five-day Measurement Period:

   a. At the close of trading on each Index Business Day, will equal:

      (a) Measurement Period Cash Amount on the immediately preceding calendar day, *plus* (b) ( (i) Current Principal Amount, on the calendar day immediately preceding the first day of such Measurement Period, *times* (ii) Index Factor, *divided by* (iii) five), *minus* (c) Daily Tracking Fee

   b. On any calendar day that is not an Index Business Day, will equal the Measurement Period Cash Amount on the immediately preceding Index Business Day, *minus* Daily Tracking Fee

d) On any calendar day after the last Index Business Day of an applicable Measurement Period, the Measurement Period Cash Amount on the last Index Business Day of such Measurement Period.

The minimum value of the Measurement Period Cash Amount on any calendar day will be zero.

The Measurement Period Cash Amount represents the portion of the Current Principal Amount that has been converted to cash on any given day of an applicable Measurement Period and is no longer tracking the Index.

At the close of trading of each Index Business day during a five-day Measurement Period, approximately 20% of the Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period, will be deemed converted to cash. After the close of trading on the final Index Business Day of an applicable five-day Measurement Period, the Measurement Period Cash Amount will represent the averaged value of the Current Principal Amount that was deemed converted to cash across the five-days of such Measurement Period. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount will be deemed converted to cash, at the close of trading of the first day of such Measurement Period.

If the Securities undergo a split or reverse split, the Measurement Period Cash Amount will be adjusted accordingly.

The "**Final Measurement Period**" means:

a) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the Calculation Date is less than $250,000,000, the Calculation Date, subject to adjustments as described under "Specific Terms of the Securities — Market Disruption Event";

b) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the Calculation Date is equal to or greater than $250,000,000, the five (5) Index Business Days from, and including, the Calculation Date, subject to adjustment as described under "Specific Terms of the Securities — Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities as of the close of trading on the Index Business Day immediately preceding the Calculation Date, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by AMNASO <Index> on Bloomberg L.P.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently S&P Dow Jones Indices.

The "**Calculation Date**" means June 10, 2050 unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

The Calculation Date represents the first Index Business Day of the Final Measurement Period.

"**Index Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Business Day**" means any day that is not a Saturday, a Sunday or a day on which banking institutions in The City of New York, generally, are authorized or obligated by law, regulation or executive order to close.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The Alerian Midstream Energy Index (Bloomberg: "AMNA Index") is a broad-based composite of North American energy infrastructure companies who earn the majority of their cash flow from midstream activities involving energy commodities, such as gathering & processing, liquefaction, pipeline transportation, rail terminating, and storage of energy commodities. The Index is calculated by S&P Dow Jones Indices using a capped, float-adjusted, capitalization weighted methodology. We refer to the companies included in the Index as the "**Index Constituent Securities**").

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the same Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. We reserve the right from time-to-time to waive this minimum redemption amount in our sole discretion on a case-by-case basis. You should not assume that you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume that you will be entitled to any such acceleration.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The First Redemption Date will be the fourth Index Business Day immediately following the Initial Trade Date and the Final Redemption Date will be the fourth Index Business Day immediately preceding the Maturity Date, subject to adjustments. In addition, if a call notice has been issued, the last Redemption Valuation Date will be the fourth Index Business Day prior to the Call Settlement Date, as applicable.

If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date —Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**."

If the amount calculated above is less than or equal to zero, the payment upon early redemption will be zero.

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of such Redemption Valuation Date).

We reserve the right from time to time to reduce or waive the Redemption Fee Amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation:

Redemption Amount = Closing Indicative Value — Redemption Fee Amount

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Daily Tracking Fee and the Redemption Fee Amount will reduce your Redemption Amount. If the level of the Index does not increase by an amount sufficient to offset the combined negative effect of the Daily Tracking Fee and the Redemption Fee Amount (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the initial Index Closing Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment upon early redemption.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right.** See — UBS's Call Right".

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation**," to us via e-mail in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until another date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable. If your DTC custodian or your brokerage firm is not a current UBS customer, UBS will be required to on-board such DTC custodian or brokerage firm, in compliance with its internal policies and procedures, before it can accept your Redemption Notice, your Redemption Confirmation or otherwise process your redemption request.. This on-boarding process may delay your Redemption Valuation Date and Redemption Date. Furthermore, in certain circumstances, UBS may be unable to on-board your DTC custodian or your brokerage firm.

We reserve the right from time to time to reduce or waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which notice may be provided via press release), such redemption to occur on any Business Day that we may specify through and including the Maturity Date. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to the Closing Indicative Value on the last Index Business Day in the Call Measurement Period. We refer to this cash payment as the "**Call Settlement Amount**."

If the amount so calculated is equal to or less than zero, the payment upon exercise of the UBS Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

a) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders of its exercise of the UBS Call Right is less than $250,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."; or

b) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders of its exercise of the UBS Call Right is equal to or greater than $250,000,000, the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under " Specific Terms of the Securities — Market Disruption Event."

For the purpose of determining the Call Measurement Period, the "**Market Value**" of the Securities as of the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by AMNASO <Index> on Bloomberg L.P.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Call Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Call Measurement Period |

**You may lose all or a substantial portion of your investment upon a call. The negative effect of the Daily Tracking Fee will reduce your final payment. If the level of the Index does not increase by an amount sufficient to offset the negative effect of the Daily Tracking Fee (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the initial Index Closing Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment upon UBS's exercise of its call right.**

**Security Calculation Agent**

UBS Securities LLC will act as the "Security Calculation Agent." The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Value (or "intraday indicative value"), Closing Indicative Value, Market Disruption Events, Business Days, Index Business Days, the Index Factor, the Residual Factor, the Index Closing Level, the Daily Tracking Fee, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable and the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, and whether any day is a Business Day or Index Business Day and all such other matters as may be specified herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of this prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity or call, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon (New York City time) on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Daily Tracking Fee, the Redemption Amount and Redemption Fee Amount, if any, per security, the Call Settlement Amount, if any, per security, the Current Principal Amount and the Cash Settlement Amount, if any, per security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

**Market Disruption Event**

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing during a five-day Measurement Period, the Index Closing Level for such day will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. The remaining Index Business Days in the Measurement Period will be postponed accordingly, and the remaining Index Business Days in the Measurement Period will resume again following the suspension of the Market Disruption Event. For example, if the five-day Measurement Period for purposes of calculating the Call Settlement Amount, is scheduled for June 2, June 3, June 4, June 5 and June 6, and there is a Market Disruption Event with respect to the Index on June 2, but no other Market Disruption Event during such Call Measurement Period, then June 3 will become the first Index Business Day of the Measurement Period, June 4th the second Index Business Day, June 5th the third Index Business Day, June 6th the fourth Index Business Day and the next Index Business Day after June 6th would be the final day of the Measurement Period. The same approach would be applied if there is a Market Disruption Event during a five-day Final Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date) or the Calculation Date (in the event that the Final Measurement Period is the Calculation Date), the Index Closing Level for such Redemption Valuation Date, Call Valuation Date or Calculation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on June 2 and there is a Market Disruption Event with respect to the Index on June 2, then the Index Closing Level on June 3 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on June 3.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the affected Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date) or Calculation Date (in the event that the Final Measurement Period is the Calculation Date) occurring more than five Index Business Days following the day originally scheduled to be such Index Business Day of the Measurement Period or such Redemption Valuation Date, Call Valuation Date or Calculation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the fifth Index Business Day following the date originally scheduled to be such Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date or Calculation Date, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such fifth Index Business Day but for such Market Disruption Event.

Any of the following will be a "**Market Disruption Event**" with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

c) the Index is not published; or

d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be Market Disruption Events with respect to the Index:

a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "**absence of trading**" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount." In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the three Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the third Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under "Description of Debt Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent, in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus

- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. ,or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.

**Discontinuance of or Adjustments to the Index or Termination of Our License Agreement with the Index Sponsor; Alteration of Method of Calculation**

If (i) the Index Sponsor or Index Calculation Agent discontinue publication of, or otherwise fails to publish, the Index, (ii) our license agreement with the Index Sponsor terminates or (iii) the Index Sponsor or Index Calculation Agent does not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, and, in each case, any other person or entity publishes an index licensed to UBS that the Security Calculation Agent determines is comparable to the Index and for which the Index Constituent Securities and/or their unit weighting are available to the Security Calculation Agent (such index being referred to herein as a "**successor index**"), and the Security Calculation Agent approves such index as a successor index, then the Security Calculation Agent will determine the Index Closing Level on the applicable dates of determination, Coupon Amounts and the amount payable at maturity, call or upon early redemption and all other related payments terms by reference to such successor index.

Upon any selection by the Security Calculation Agent of a successor index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

If the Index Sponsor or Index Calculation Agent discontinue publication of the Index, our license agreement with the Index Sponsor terminates or the Index Sponsor or Index Calculation Agent do not make the Index Constituent Securities and/or their unit weighting available to the Security Calculation Agent, prior to, and such discontinuation, termination or unavailability is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date, as applicable, or on any other relevant date on which the Index Closing Level is to be determined and the Security Calculation Agent determines that no successor index is available at such time, or the Security Calculation Agent has previously selected a successor index and publication of such successor index is discontinued prior to, and such discontinuation is continuing on the Calculation Date or any Index Business Day during a Measurement Period, or on the Redemption Valuation Date or any other relevant date on which the Index Closing Level is to be determined, then the Security Calculation Agent will determine the Index Closing Level using the Index Closing Level on the last Index Business Day immediately prior to such discontinuation or unavailability, as adjusted for certain corporate actions. In such event, the Security Calculation Agent will cause notice thereof to be furnished to the trustee, to us and to the holders of the Securities.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

In addition, if an Index Replacement Event (as defined below) occurs at any time and the Index Sponsor or anyone else publishes an index that the Security Calculation Agent determines is comparable to the Index (the "**Substitute Index**"), then the Security Calculation Agent may elect, in its sole discretion, to permanently replace the original Index with the Substitute Index for all purposes under the Securities, and all provisions described in this prospectus supplement as applying to the Index will thereafter apply to the Substitute Index instead. In such event, the Security Calculation Agent will make such adjustments, if any, to any level of the Index or Substitute Index that is used for purposes of the Securities as it determines are appropriate in the circumstances. If the Security Calculation Agent elects to replace the original Index with a Substitute Index, then the Security Calculation Agent will determine all amounts hereunder, including the Coupon Amounts, Current Principal Amount, Current Indicative Value (or "intraday indicative value"), Closing Indicative Value, Index Factor, Residual Factor, Daily Tracking Fee, Accrued Dividend, Daily Dividend, Index Closing Levels on the applicable dates of determination, all other related payment terms and the amount payable at maturity, call, upon early redemption by reference to such Substitute Index. If the Security Calculation Agent so elects to replace the original Index with a Substitute Index, the Security Calculation Agent will cause written notice thereof to be furnished to the trustee, to us and to the holders of the Securities of the Securities.

An "**Index Replacement Event**" means:

a) an amendment to or change (including any officially announced proposed change) in the laws, regulations or rules of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities included in the Index (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on any of these parties' ability to perform their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

b) any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules that is announced on or after June 19, 2020 that (i) makes it illegal for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities included in the Index or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) materially increases the cost to us, our affiliates, third parties with whom we transact or similarly situated third parties in performing our or their obligations in connection with the Securities, (iii) has a material adverse effect on the ability of us, our affiliates, third parties with whom we transact or a similarly situated third party to perform our or their obligations in connection with the Securities or (iv) materially affects our ability to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

c) any event that occurs on or after June 19, 2020 that makes it a violation of any law, regulation or rule of the United States (or any political subdivision thereof), or any jurisdiction in which a Primary Exchange (as defined herein) is located, or of any official administrative decision, judicial decision, administrative action, regulatory interpretation or other official pronouncement interpreting or applying those laws, regulations or rules, (i) for UBS AG or its affiliates to hold, acquire or dispose of the Index Constituent Securities or options, futures, swaps or other derivatives on the Index or on the Index Constituent Securities (including but not limited to exchange-imposed position limits), (ii) for us, our affiliates, third parties with whom we transact or similarly situated third parties to perform our or their obligations in connection with the Securities or (iii) for us to issue or transact in exchange traded notes similar to the Securities, each as determined by the Security Calculation Agent;

d) any event, as determined by the Security Calculation Agent, as a result of which we or any of our affiliates or a similarly situated party would, after using commercially reasonable efforts, be unable to, or would incur a materially increased amount of tax, duty, expense or fee (other than brokerage commissions) to, acquire, establish, re-establish, substitute, maintain, unwind or dispose of any transaction or asset it deems necessary to hedge the risk of the Securities, or realize, recover or remit the proceeds of any such transaction or asset; or

e) as determined by the Security Calculation Agent, the primary exchange or market for trading for the Securities, if any, announces that pursuant to the rules of such exchange or market, as applicable, the Securities cease (or will cease) to be listed, traded or publicly quoted on such exchange or market, as applicable, for any reason and are not immediately re-listed, re-traded or re-quoted on an exchange or quotation system located in the same country as such exchange or market, as applicable.

Notwithstanding these alternative arrangements, discontinuation of the publication of the Index or successor index, as applicable, may adversely affect the value of the Securities.

If at any time the method of calculating the Index, a successor index or a substitute index, or the value thereof, is changed in a material respect, or if the Index or a successor index is in any other way modified so that the Index Closing Level of the Index or such successor index does not, in the opinion of the Security Calculation Agent, fairly represent the Index Closing Level of the Index or such successor index had such changes or modifications not been made, then the Security Calculation Agent will make such calculations and adjustments as, in the good faith judgment of the Security Calculation Agent, may be necessary in order to arrive at an Index Closing Level of an index comparable to the Index or such successor index, as the case may be, as if such changes or modifications had not been made, and the Security Calculation Agent will calculate the Index Closing Level for the Index or such successor index with reference to the Index or such successor index, as adjusted. The Security Calculation Agent will accordingly calculate the Index Closing Level, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Daily Tracking Fee, the Redemption Fee Amount, if any, the Cash Settlement Amount, if any, that we will pay you at maturity, the Redemption Amount, if any, upon early redemption, if applicable, the Call Settlement Amount, if any, that we will pay you in the event UBS calls the Securities, and all related payment terms based on the Index Closing Level calculated by the Security Calculation Agent, as adjusted. Accordingly, if the method of calculating the Index or a successor index is modified so that the level of the Index or such successor index is a fraction of what it would have been if there had been no such modification (*e.g.*, due to a split in the Index), which, in turn, causes the Index Closing Level of the Index or such successor index to be a fraction of what it would have been if there had been no such modification, then the Security Calculation Agent will make such calculations and adjustments in order to arrive at an Index Closing Level for the Index or such successor index as if it had not been modified (*e.g.*, as if such split had not occurred).

In the event that the Security Calculation Agent elects to replace the Index with a successor index or a Substitute Index, UBS may, in its sole discretion, amend the title of the Securities in order to remove reference the former Index and to make such other changes to the title of the Securities as it considers necessary or desirable to reflect the name and/or characteristics of the relevant successor index or Substitute Index, as applicable.

All determinations and adjustments to be made by the Security Calculation Agent may be made in the Security Calculation Agent's sole discretion. See "Risk Factors — There are potential conflicts of interest between you and the Security Calculation Agent" in this prospectus supplement for a discussion of certain conflicts of interest which may arise with respect to the Security Calculation Agent.

**Manner of Payment and Delivery**

Any payment on or delivery of the Securities at maturity or call, or upon early redemption will be made to accounts designated by you and approved by us, or at the corporate trust office of the trustee in New York City, but only when the Securities are surrendered to the trustee at that office. We also may make any payment or delivery in accordance with the applicable procedures of the depositary.

**Business Day**

When we refer to a Business Day with respect to the Securities, we mean a day that is a Business Day of the kind described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the accompanying prospectus.

**Modified Business Day**

As described in "Description of Debt Securities We May Offer — Payment Mechanics for Debt Securities" in the attached prospectus, any payment on the Securities that would otherwise be due on a day that is not a Business Day may instead be paid on the next day that is a Business Day, with the same effect as if paid on the original due date, except as described under "— Cash Settlement Amount at Maturity," "— UBS's Call Right" and "— Early Redemption at the Option of the Holders" above.

**Reissuances or Reopened Issues**

We may, at our sole discretion, "reopen" or reissue the Securities. We issued the Securities initially in an amount having the aggregate Stated Principal Amount specified on the cover of this prospectus supplement. We may issue additional Securities in amounts that exceed the amount on the cover any time, without your consent and without notifying you. The Securities do not limit our ability to incur other indebtedness or to issue other securities. Also, we are not subject to financial or similar restrictions by the terms of the Securities. For more information, please refer to "Description of Debt Securities We May Offer — Amounts That We May Issue" in the accompanying prospectus.

These further issuances, if any, will be consolidated to form a single class with the originally issued Securities and will have the same CUSIP number and will trade interchangeably with the Securities immediately upon settlement. Any additional issuances will increase the aggregate Stated Principal Amount of the outstanding Securities of the class. The price of any additional offering will be determined at the time of pricing of that offering.

**Booking Branch**

The Securities will be booked through UBS AG, London Branch.

**Clearance and Settlement**

The DTC participants that hold the Securities through DTC on behalf of investors will follow the settlement practices applicable to equity securities in DTC's settlement system with respect to the primary distribution of the Securities and secondary market trading between DTC participants.

## 18. ETRACS Alerian Midstream Energy High Dividend Index ETN due July 19, 2050

### Specific Terms of the Securities

In this section, references to "holders" mean those who own the Securities registered in their own names, on the books that we or the trustee maintains for this purpose, and not those who own beneficial interests in the Securities registered in street name or in the Securities issued in book-entry form through The Depository Trust Company ("DTC") or another depositary. Owners of beneficial interests in the Securities should read the section entitled "Legal Ownership and Book-Entry Issuance" under "Medium-Term Notes, Series B" above.

The Securities are part of a series of debt securities entitled "Medium-Term Notes, Series B" that we may issue, from time to time, under the indenture more particularly described in the accompanying prospectus. This prospectus supplement summarizes specific financial and other terms that apply to the Securities. Terms that apply generally to all Medium-Term Notes, Series B are described in "Description of Debt Securities We May Offer" in the accompanying prospectus. The terms described here (i.e., in this prospectus supplement) supplement those described in the accompanying prospectus and, if the terms described here are inconsistent with those described there, the terms described here are controlling.

The Securities are part of a single series of senior debt securities issued under our indenture, dated as of June 12, 2015 between us and U.S. Bank Trust National Association, as trustee.

We describe the terms of the Securities in more detail below.

**Principal Amount:** $250,000,000

**Issuer:** UBS AG (London Branch)

The Stated Principal Amount of each Security is $25.00.

The Securities do not guarantee any return of principal at, or prior to, maturity or call, or upon early redemption. Instead, at maturity, you will receive a cash payment the amount of which will vary depending on the performance and path of the Index calculated in accordance with the formula set forth below and will be reduced by the Daily Tracking Fee as of the last Index Business Day in the applicable Measurement Period or Redemption Valuation Date.

If you exercise your right to have us redeem your Securities, subject to compliance with the redemption procedures, for each Security you will receive a cash payment on the Redemption Date equal to the Redemption Amount as described below under "— Early Redemption at the Option of the Holders." If the amount so calculated is equal to or less than zero, the Redemption Amount will be zero and you will not receive a cash payment.

If we elect to exercise our call right to redeem all of the Securities, subject to compliance with the procedures set forth below, for each Security you will receive a cash payment on the Call Settlement Date equal to the Call Settlement Amount, as described below under "— UBS's Call Right." If the amount so calculated is equal to or less than zero, the Call Settlement Amount will be zero and you will not receive a cash payment.

The Securities may pay a cash coupon during their term.

### Coupon Payment

For each Security you hold on the applicable Coupon Record Date, on each Coupon Payment Date you will receive an amount in cash equal to the Coupon Amount, if any. The Coupon Amount will equal the sum of the cash distributions that a hypothetical holder of Index Constituent Securities would have been entitled to receive in respect of the Index Constituent Securities during the relevant period. The Coupon Amount may be equal to zero.

The "**Coupon Amount**" means (i) on any calendar day that is not a Coupon Ex-Date, an amount per Security equal to zero; and (ii) on any calendar day that is a Coupon Ex-Date, an amount per Security equal to the Accrued Dividend on the Coupon Valuation Date immediately preceding such Coupon Ex-Date. The minimum value of the Coupon Amount will be zero.

The following graphic illustrates the formula to determine the Coupon Amount on a Coupon Ex-Date, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Coupon Amount | = | Accrued Dividend, on the immediately preceding Coupon Valuation Date |

If the Securities undergo a split or reverse split, the Coupon Amount will be adjusted accordingly.

Notwithstanding the foregoing, with respect to cash distributions or dividends on an Index Constituent Security which is scheduled to be paid prior to the applicable Coupon Ex-Date, if, and only if, the issuer of such Index Constituent Security fails to pay the dividend or cash distribution to holders of such Index Constituent Security by the scheduled payment date for such dividend or cash distribution, such dividend or distribution will be assumed to be zero for the purposes of calculating the applicable Coupon Amount. Any such delayed dividend or cash distribution payments from the issuer of an Index Constituent Security will be attributed back to the Accrued Dividend and included in the next Coupon Amount.

The “**Accrued Dividend**” means, as of any date of determination, an amount per Security equal to: (i) on the Initial Trade Date, \$0.00 per Security; and (ii) on any subsequent calendar day (a) the Accrued Dividend as of the immediately preceding calendar day, *plus* (b) the Daily Dividend on such calendar day, *minus* (c) the Coupon Amount on such calendar day.

If the Securities undergo a split or reverse split, the Accrued Dividend will be adjusted accordingly.

The “**Daily Dividend**” means on any calendar day, an amount per Security equal to:

(a)(i) the Index Dividend Point, *times* (ii) the Current Principal Amount on the immediately preceding calendar day, *divided by* (b) the Index Closing Level on the immediately preceding calendar day.

The Daily Dividend will be rounded to four decimal places.

The Daily Dividend is intended to approximate the amount of distributions in US Dollars that a holder of the Securities would receive if such holder held an unleveraged investment in the Index Constituent Securities directly.

The “**Index Dividend Point**” on any calendar day, means an amount per Security equal to (a) (the *sum of the products of* (i) the cash value of distributions, that a hypothetical holder of one share of an Index Constituent Security, whose “ex-dividend date” occurs on such calendar day, would have been entitled to receive (adjustments relating to foreign exchange rate fixings or dividend withholding taxes, described below), and (ii) the number of index shares of that Index Constituent Security included in the Index as of such date), *divided by* (b) the Divisor as of such date.

In respect of distributions on any Canadian Index Constituent Securities, on their respective “ex-dividend date”, the cash value of distributions will be deemed to be converted from Canadian Dollars to U.S. Dollars (i) prior to August 3, 2020, at the WM / Reuters USD/CAD foreign exchange rate as of 4:00 p.m. London Time on such ex-dividend date, and (ii) on and after August 3, 2020, at the WM / Reuters USD/CAD foreign exchange rate as of 4:00 p.m. Eastern Time on such ex-dividend date (the “**WM / Reuters FX Rate**”), provided, however, that if, for purpose of determining the Index Closing Level, the Index Sponsor converts the values of the Canadian Index Constituent Securities from Canadian Dollars to U.S. Dollars using a different USD/CAD foreign exchange rate or using the WM/Reuters USD/CAD exchange rate as of a different time, then such foreign exchange rate selected by the Index Sponsor for purposes of determining the Index Closing Level (and the time selected by the Index Sponsor for such exchange) shall also apply for purposes of determining the cash value of distributions on the Canadian Index Constituent Securities.

The WM/Reuters FX Rate mid-market fixings are calculated by the WM Company based on Reuters data and appear on the Reuters pages WMRA.

Notwithstanding the foregoing, if the Security Calculation Agent determines on the relevant determination date that:

(a) the WM/ Reuters FX Rate, or the applicable replacement foreign exchange rate determined by the Index Sponsor, has been discontinued (or otherwise ceases to be published), materially disrupted or is no longer representative of the underlying market or economic reality; or

(b) 4:00 p.m. London Time (or, on and after August 3, 2020, 4:00 p.m. Eastern Time) (or such other time selected by the Index Sponsor for purposes of converting the values of the Canadian Index Constituent Securities to determine the Index Closing Level) is no longer the appropriate time for fixing the applicable exchange rate for any of the reasons set forth in (a) above,

then the Security Calculation Agent will, in the case of (a) use a substitute or successor provider of foreign exchange rates that it has determined in its sole discretion is most comparable to the prior exchange rate, provided that if the Security Calculation Agent determines that there is an industry- accepted successor provider of foreign exchange rates, then the Security Calculation Agent shall use such successor provider of foreign exchange rates; or in the case of (b) use such other time for fixing of the foreign exchange rate as it has determined in its sole discretion is appropriate based on the WM / Reuters FX Rate, or such substitute or successor provider of foreign exchange rates, as it has determined in its sole discretion is most comparable to the prior exchange rate, as set forth above.

As of the date of this prospectus supplement, the applicable dividend withholding tax would reduce the cash value of distributions in respect of any Canadian Index Constituent Security by 15% for purposes of calculating the Index Dividend Point. The 15% rate is subject to adjustment if there is a change under Canadian law or the tax treaty between the United States and Canada or to the Canadian dividend withholding tax rate applicable to a U.S. holder of a Canadian Index Constituent Security that is eligible for the benefits of the tax treaty between the United States and Canada.

In the event that an adjustment relating to foreign exchange rate fixings (other than the change specified above, effective as of August 3, 2020) or dividend withholding taxes is made, we will issue a press release announcing such adjustment and the effective date for such adjustment.

The Index Dividend Point, on any calendar day, represents the total cash value of distributions that a hypothetical holder of the Index Constituent Securities, in proportion to the weights of the Index Constituent Securities, would have been entitled to receive with respect to any Index Constituent Security for those cash distributions whose “ex-dividend date” occurs on such calendar day.

The Index Dividend Point may not be publicly disseminated by the Index Calculation Agent. The data used to calculate the Index Dividend Point is the property of the Index Calculation Agent and investors may be required to pay a fee and meet any other requirements of the Index Calculation Agent in order to access such information. See "Risk Factors – The value of the Index Dividend Point may not be publicly disseminated or otherwise freely accessible to investors".

The "**Divisor**" means, as of any date of determination, the divisor used by the Index Calculation Agent to calculate the Index Closing Level.

The "**Coupon Payment Date**" means the 15th Index Business Day following each Coupon Valuation Date. The first Coupon Payment Date will be October 21, 2020, subject to adjustment. If such day is not a Coupon Business Day, the Coupon Payment Date shall be the following Coupon Business Day.

If the final Coupon Ex-Date occurs prior to the Maturity Date, but the final Coupon Payment Date otherwise occurs after the Maturity Date, in such case, the final Coupon Payment Date will be the Maturity Date, subject to adjustment.

The "**Coupon Record Date**" means the ninth Index Business Day following each Coupon Valuation Date. If such day is not a Coupon Business day, the Coupon Record Date shall be the immediately preceding Coupon Business Day.

The "**Coupon Ex-Date**," with respect to a Coupon Amount, means the first Coupon Business Day on which the Securities trade without the right to receive such Coupon Amount. Under current NYSE Arca practice, the Coupon Ex-Date will generally be the Coupon Business Day immediately preceding the applicable Coupon Record Date.

If a day that would otherwise be a Coupon Ex-Date occurs on or after the first day of an applicable Measurement Period, such day will not be a valid Coupon Ex-Date and all further Coupon Ex-Dates will be suspended. In this case, the Coupon Amount corresponding to such Coupon Ex-Date will be included in the Cash Settlement Amount or Call Settlement Amount payable at maturity or call, respectively.

The "**Coupon Valuation Date**" means the 30th day of each March, June, September and December, of each calendar year during the term of the Securities or if such date is not an Index Business Day, then the first Index Business Day following such date, provided that the final Coupon Valuation Date will be the Calculation Date. The first Coupon Valuation Date will be September 30, 2020.

"**Coupon Business Day**" means any Index Business Day other than an Index Business Day on which banking institutions in New York are not authorized or obligated by law, regulation or executive order to be open.

"**record date**" means, (i) with respect to a distribution on an Index Constituent Security, the date on which a holder of the Index Constituent Security must be registered as a stockholder/unitholder of such Index Constituent Security in order to be entitled to receive such distribution, and (ii) with respect to any split or reverse split, the tenth Business Day after the announcement date.

"**ex-dividend date**" means, with respect to a distribution on an Index Constituent Security, the first Business Day on which transactions in such Index Constituent Security trade on the Primary Exchange without the right to receive such distribution.

**Cash Settlement Amount at Maturity**

The "**Maturity Date**" is July 19, 2050, which will be the third Business Day following the last Index Business Day in the Final Measurement Period, subject to adjustment as described below under "— Market Disruption Event."

For each Security, unless earlier called or redeemed, you will receive at maturity a cash payment equal to the Closing Indicative Value on the last day of the Final Measurement Period. We refer to this payment as the "**Cash Settlement Amount**". If the amount so calculated is equal to or less than zero, the payment at maturity will be zero.

The following graphic illustrates the formula to determine the Cash Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Cash Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Final Measurement Period |

**You may lose all or a substantial portion of your investment at maturity. The Securities are fully exposed to any decline in the level of the Index. The negative effect of the Daily Tracking Fee will reduce your final payment. If the level of the Index (as measured by the Index Closing Level at the end of the Final Measurement Period, as compared to the initial Index Closing Level or the Index level at the time you purchase the Securities, as applicable) does not increase by an amount sufficient to offset the negative effect of the Daily Tracking Fee (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the initial Index Closing Level (or the Index level at the time you purchase the Securities, as applicable), you may lose all or a substantial portion of your investment at maturity. The Daily Tracking Fee also takes into account the performance of the Index, as measured by the Current Principal Amount.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right. If the Securities are called by UBS, the Call Settlement Amount may be zero and you may lose all or a substantial portion of your investment.** See "—UBS's Call Right".

The "**Stated Principal Amount**" of each Security is $25.00. The Securities may be issued and sold over time at then-current market prices which may be significantly higher or lower than the Stated Principal Amount. If the Securities undergo a split or reverse split, the Stated Principal Amount will be adjusted accordingly.

The "**Closing Indicative Value**" represents the dollar value per Security that an investor would receive on any day if it redeemed the Security on such day (excluding any Redemption Fee Amount). The Closing Indicative Value per Security will be calculated as follows:

a) On the Initial Trade Date, $25.00 per Security

b) On any subsequent calendar day, prior to but excluding the first day of an applicable Measurement Period, an amount per Security equal to:

Current Principal Amount + Accrued Dividend

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to:

Current Principal Amount + Accrued Dividend + Measurement Period Cash Amount

The minimum value of the Closing Indicative Value on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Closing Indicative Value.

If the Securities undergo a split or reverse split, the Closing Indicative Value will be adjusted accordingly.

The Current Principal Amount represents the notional investment in the Index Constituent Securities per Security at the close of trading on any calendar day.

The "**Current Principal Amount**" per Security, will be calculated as follows:

a) On the Initial Trade Date, $25.00 per Security;

b) On any subsequent calendar day, prior to but excluding the first day of an applicable Measurement Period

(Current Principal Amount on the previous calendar day × Index Factor)—Daily Tracking Fee

c) From and including the first day of an applicable Measurement Period, an amount per Security equal to: (Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period × Index Factor × Residual Factor)

On any calendar day during the Measurement Period that is not an Index Business Day, the Current Principal Amount will be equal to the Current Principal Amount on the previous calendar day.

The minimum value of the Current Principal Amount on any calendar day will be zero.

If the Securities undergo a split or reverse split, the Current Principal Amount will be adjusted accordingly.

The "**Index Factor**" on any Index Business Day prior to but excluding the first day of an applicable Measurement Period, will equal:

(i) the Index Closing Level, on such Index Business Day, *divided by,* (ii) the Index Closing Level, on the immediately preceding Index Business Day.

From and including the first day of an applicable Measurement Period, the Index Factor will equal:

(i) the Index Closing Level, on such calendar day, *divided by,* (ii) the Index Closing Level on the calendar day immediately preceding the first day of such Measurement Period.

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level on the immediately preceding Index Business Day. The Index Factor will therefore equal one (1) on any calendar day that is not an Index Business Day and is prior to the first Index Business Day of a five-day Measurement Period.

The "**Residual Factor**" will be calculated as follows:

a) 1.0 on any calendar day, prior to but excluding the first day of an applicable Measurement Period

b) From and including the first day of an applicable five-day Measurement Period, (a) the number of Index Business Days from, but excluding, the date of determination to, and including, the last Index Business Day in such five-day Measurement Period, *divided by* (b) five.

The Residual Factor is intended to approximate the percentage of the Current Principal Amount that is tracking the Index on any given day. The Residual Factor is relevant only during an applicable Measurement Period but otherwise is not a component of the Closing Indicative Value or Current Indicative Value formulas.

For example, on the first Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (4/5), on the second Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (3/5), on the third Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (2/5), on the fourth Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal (1/5) and on the last Index Business Day in an applicable five-day Measurement Period, the Residual Factor will equal zero.

On any calendar day from and including the last Index Business Day of an applicable Measurement Period, the Residual Factor will be equal to zero.

The "**Index Closing Level**" on any date of determination is the closing level of the Index as reported on the NYSE and Bloomberg; provided, however, that if the closing level of the Index as reported on the NYSE (or any successor) differs from the closing level of the Index as reported on Bloomberg (or any successor), then the Index Closing Level will be the closing level of the Index as calculated by the Index Calculation Agent. 41.8766 is the initial Index Closing Level measured on July 15, 2020 (the Initial Trade Date), as determined by the Security Calculation Agent.

On any calendar day that is not an Index Business Day, the Index Closing Level will be equal to the Index Closing Level from the last Index Business Day prior to such calendar day.

"**Measurement Period**" means the Final Measurement Period or Call Measurement Period, as applicable.

The **"Current Indicative Value"** or "**intraday indicative value**", as determined by the Security Calculation Agent, means the Closing Indicative Value per Security calculated on an intraday basis on any Index Business Day.

For the purposes of calculating the Current Indicative Value, the Index Factor (which is a component of the Current Principal Amount definition) will be determined using the Intraday Index Value.

Additionally, from and including the first day of an applicable Measurement Period, the Current Indicative Value will be calculated using (i) the Measurement Period Cash Amount from the immediately preceding calendar day, and (ii) the Residual Factor from the immediately preceding calendar day.

The minimum value of the Current Indicative Value (or intraday indicative value) on any calendar day will be zero.

The actual trading price of the Securities in the secondary market may vary significantly from their Current Indicative Value (or intraday indicative value).

If the Securities undergo a split or reverse split, the Current Indicative Value (or intraday indicative value) will be adjusted accordingly.

The "**Daily Tracking Fee**" means, as of any date of determination, an amount per Security equal to 0.75% per annum, calculated as follows:

a) On the Initial Trade Date, $0.00 per Security;

b) On any subsequent calendar day:

   (0.75% / 365) × Current Principal Amount on the immediately preceding calendar day × Index Factor

The minimum value of the Daily Tracking Fee on any calendar day will be zero.

If the Securities undergo a split or reverse split, the Daily Tracking Fee will be adjusted accordingly. The "**Measurement Period Cash Amount**" is an amount per Security equal to:

a) $0.00, on any calendar day prior to but excluding the first day of an applicable Measurement Period

b) On the first day of an applicable one-day Measurement Period:

   a. At the close of trading on such Index Business Day, the (Current Principal Amount, on the immediately preceding calendar day, *times* Index Factor, on such Index Business Day), *minus* Daily Tracking Fee.

c) From and including the first day of an applicable five-day Measurement Period:

   a. At the close of trading on each Index Business Day, will equal:

      i. Measurement Period Cash Amount on the immediately preceding calendar day, *plus* (b) ((i) Current Principal Amount, on the calendar day immediately preceding the first day of such Measurement Period, *times* (ii) Index Factor, *divided by* (iii) five), *minus* (c) Daily Tracking Fee

      ii. On any calendar day that is not an Index Business Day, will equal the Measurement Period Cash Amount on the immediately preceding Index Business Day, *minus* Daily Tracking Fee

d) On any calendar day after the last Index Business Day of an applicable Measurement Period, the Measurement Period Cash Amount on the last Index Business Day of such Measurement Period.

The minimum value of the Measurement Period Cash Amount on any calendar day will be zero.

The Measurement Period Cash Amount represents the portion of the Current Principal Amount that has been converted to cash on any given day of an applicable Measurement Period and is no longer tracking the Index.

At the close of trading of each Index Business day during a five-day Measurement Period, approximately 20% of the Current Principal Amount, on the calendar day immediately preceding the first day of the Measurement Period, will be deemed converted to cash. After the close of trading on the final Index Business Day of an applicable five-day Measurement Period, the Measurement Period Cash Amount will represent the averaged value of the Current Principal Amount that was deemed converted to cash across the five-days of such Measurement Period. In case of a one-day Measurement Period, approximately 100% of the Current Principal Amount will be deemed converted to cash, at the close of trading of the first day of such Measurement Period.

If the Securities undergo a split or reverse split, the Measurement Period Cash Amount will be adjusted accordingly.

The "**Final Measurement Period**" means:

a) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the Calculation Date is less than $150,000,000, the Calculation Date, subject to adjustments as described under "— Market Disruption Event";

b) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the Calculation Date is equal to or greater than $150,000,000, the five (5) Index Business Days from, and including, the Calculation Date, subject to adjustment as described under "— Market Disruption Event."

For the purpose of determining the Final Measurement Period, the "**Market Value**" of the Securities as of the close of trading on the Index Business Day immediately preceding the Calculation Date, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by AMNDSO <Index> on Bloomberg L.P.

The "**Index Calculation Agent**" means the entity that calculates and publishes the level of the Index, which is currently S&P DJI Netherlands B.V.

The "**Calculation Date**" means July 8, 2050 unless such day is not an Index Business Day, in which case the Calculation Date will be the next Index Business Day, subject to adjustments.

The Calculation Date represents the first Index Business Day of the Final Measurement Period.

"**Index Business Day**" means any day on which the Primary Exchange or market for trading of the Securities is scheduled to be open for trading.

"**Business Day**" means any day that is not a Saturday, a Sunday or a day on which banking institutions in The City of New York, generally, are authorized or obligated by law, regulation or executive order to close.

"**Primary Exchange**" means, with respect to each Index Constituent Security or each constituent underlying a successor index, the primary exchange or market of trading such Index Constituent Security or such constituent underlying a successor index.

**Underlying Index**

The Alerian Midstream Energy Dividend Index (Bloomberg: "AEDW") is a fundamentally-weighted index based on the liquid, dividend-paying portion of the North American energy infrastructure market. The Index measures the performance of companies domiciled in the U.S. or Canada, listed on major U.S. or Canadian stock exchanges, that pay regular cash dividends and meet specific liquidity requirements, as described elsewhere in the prospectus supplement. The Index is calculated by S&P DJI Netherlands B.V. using a modified market capitalization weighted methodology. We refer to the companies included in the Index as the "**Index Constituent Securities**").

**Early Redemption at the Option of the Holders**

Subject to your compliance with the procedures described below and the potential postponements and adjustments as described under "— Market Disruption Event," you may submit a request to have us redeem your Securities on any Index Business Day no later than 12:00 noon, New York City time, and a confirmation of redemption by no later than 5:00 p.m., New York City time, on the same Index Business Day, provided that you request that we redeem a minimum of 50,000 Securities. To satisfy the minimum redemption amount, your broker or other financial intermediary may bundle your Securities for redemption with those of other investors to reach this minimum amount of 50,000 Securities. We reserve the right from time-to-time to waive this minimum redemption amount in our sole discretion on a case- by-case basis. You should not assume that you will be entitled to the benefit of any such waiver. For any applicable redemption request, the "**Redemption Valuation Date**" will be the first Index Business Day following the date that the applicable redemption notice and redemption confirmation are delivered, except that we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume that you will be entitled to any such acceleration.

The Securities will be redeemed and the holders will receive payment for their Securities on the second Index Business Day following the applicable Redemption Valuation Date (the "**Redemption Date**"). The First Redemption Date will be the fourth Index Business Day immediately following the Initial Trade Date and the Final Redemption Date will be the fourth Index Business Day immediately preceding the Maturity Date, subject to adjustments. In addition, if a call notice has been issued, the last Redemption Valuation Date will be the fourth Index Business Day prior to the Call Settlement Date, as applicable.

If a Market Disruption Event is continuing or occurs on the applicable scheduled Redemption Valuation Date with respect to any of the Index Constituent Securities, such Redemption Valuation Date may be postponed as described under "— Market Disruption Event."

If you exercise your right to have us redeem your Securities, subject to your compliance with the procedures described under "— Redemption Procedures," for each applicable Security you will receive a cash payment on the relevant Redemption Date equal to:

Closing Indicative Value as of the Redemption Valuation Date – Redemption Fee Amount.

We refer to this cash payment as the "**Redemption Amount**."

If the amount calculated above is less than or equal to zero, the payment upon early redemption will be zero.

As of any Redemption Valuation Date, the "**Redemption Fee Amount**" means an amount per Security equal to:

(0.125% × Closing Indicative Value of the Security as of such Redemption Valuation Date).

We reserve the right from time to time to reduce or waive the Redemption Fee Amount in our sole discretion on a case-by-case basis. You should not assume you will be entitled to the benefit of any such waiver.

The redemption feature is intended to induce arbitrageurs to counteract any trading of the Securities at a discount to their indicative value, though there can be no assurance that arbitrageurs will employ the redemption feature in this manner or that they will be successful in counteracting any divergence in the market price of the Securities and their indicative value.

The following graphic illustrates the formula to determine the Redemption Amount, which has been simplified for ease of presentation:

Redemption Amount = Closing Indicative Value — Redemption Fee Amount

**You may lose all or a substantial portion of your investment upon early redemption. The combined negative effect of the Daily Tracking Fee and the Redemption Fee Amount will reduce your Redemption Amount. If the level of the Index does not increase by an amount sufficient to offset the combined negative effect of the Daily Tracking Fee and the Redemption Fee Amount (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the initial Index Closing Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment upon early redemption.**

**The Securities may be called by UBS prior to the Maturity Date pursuant to UBS's Call Right.** See "— UBS's Call Right".

We discuss these matters in the accompanying prospectus under "Description of Debt Securities We May Offer — Redemption and Repayment."

**Redemption Procedures**

To redeem your Securities, you must instruct your broker or other person through whom you hold your Securities to take the following steps through normal clearing system channels:

- deliver a notice of redemption, which we refer to as a "**Redemption Notice**" to UBS via email no later than 12:00 noon (New York City time) on the Index Business Day on which you elect to exercise your redemption right. If we receive your Redemption Notice by the time specified in the preceding sentence, we will respond by sending you a form of confirmation of redemption;
- deliver the signed confirmation of redemption, which we refer to as the "**Redemption Confirmation,**" to us via e-mail in the specified form by 5:00 p.m. (New York City time) on the same day. We or our affiliate must acknowledge receipt in order for your confirmation to be effective;
- instruct your DTC custodian to book a delivery vs. payment trade with respect to your Securities on the applicable Redemption Valuation Date at a price equal to the Redemption Amount; and
- cause your DTC custodian to deliver the trade as booked for settlement via DTC at or prior to 12:00 noon (New York City time) on the applicable Redemption Date.

Different brokerage firms may have different deadlines for accepting instructions from their customers. Accordingly, as a beneficial owner of the Securities, you should consult the brokerage firm through which you own your interest for the relevant deadline. If your broker delivers your notice of redemption after 12:00 noon (New York City time), or your confirmation of redemption after 5:00 p.m. (New York City time), on the Business Day prior to the applicable Redemption Valuation Date, your notice will not be effective, you will not be able to redeem your Securities until another date and your broker will need to complete all the required steps if you should wish to redeem your Securities on any subsequent date. In addition, UBS may request a medallion signature guarantee or such assurances of delivery as it may deem necessary in its sole discretion. All instructions given to participants from beneficial owners of Securities relating to the right to redeem their Securities will be irrevocable. If your DTC custodian or your brokerage firm is not a current UBS customer, UBS will be required to on-board such DTC custodian or brokerage firm, in compliance with its internal policies and procedures, before it can accept your Redemption Notice, your Redemption Confirmation or otherwise process your redemption request. This on-boarding process may delay your Redemption Valuation Date and Redemption Date. Furthermore, in certain circumstances, UBS may be unable to on-board your DTC custodian or your brokerage firm.

We reserve the right from time to time to reduce or waive the minimum redemption amount or the Redemption Fee Amount in our sole discretion on a case-by-case basis. In addition, we reserve the right from time to time to accelerate, in our sole discretion on a case-by-case basis, the Redemption Valuation Date to the date on which the notice of redemption is received by UBS rather than the following Index Business Day. You should not assume you will be entitled to any such waiver or election to accelerate the Redemption Valuation Date.

**UBS's Call Right**

We have the right to redeem all, but not less than all, of the Securities upon not less than eighteen (18) calendar days' prior notice to the holders of the Securities (which notice may be provided via press release), such redemption to occur on any Business Day that we may specify through and including the Maturity Date. Upon early redemption in the event we exercise this right, you will receive a cash payment equal to the Closing Indicative Value on the last Index Business Day in the Call Measurement Period. We refer to this cash payment as the "**Call Settlement Amount**."

If the amount so calculated is equal to or less than zero, the payment upon exercise of the UBS Call Right will be zero.

We will inform you of such Call Settlement Amount on the first Business Day following the last Index Business Day in the Call Measurement Period.

The holders will receive payment for their Securities on the third Business Day following the last Index Business Day in the Call Measurement Period (the "**Call Settlement Date**"). If a Market Disruption Event is continuing or occurs on the scheduled Call Valuation Date with respect to any of the Index Constituent Securities, such Call Valuation Date may be postponed as described under "— Market Disruption Event."

The "**Call Measurement Period**" means:

a) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders of its exercise of the UBS Call Right is less than $150,000,000, the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."; or

b) if the Market Value of Securities outstanding at the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders of its exercise of the UBS Call Right is equal to or greater than $150,000,000, the five (5) Index Business Days from and including the Call Valuation Date, subject to adjustments as described under "— Market Disruption Event."

For the purpose of determining the Call Measurement Period, the "**Market Value**" of the Securities as of the close of trading on the Index Business Day immediately preceding the date of delivery by UBS of its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right, will equal:

(i) the Closing Indicative Value as of such Index Business Day, *times* (ii) the number of Securities outstanding as reported by AMNDSO <Index> on Bloomberg L.P.

The "**Call Valuation Date**" means the date disclosed as such by UBS in its notice to holders (which may be provided via press release) of its exercise of the UBS Call Right.

In any notice to holders exercising the UBS Call Right, we will specify how many days are included in the Call Measurement Period.

The following graphic illustrates the formula to determine the Call Settlement Amount, which has been simplified for ease of presentation:

| | | |
|---|---|---|
| Call Settlement Amount | = | Closing Indicative Value, on last Index Business Day in Call Measurement Period |

**You may lose all or a substantial portion of your investment upon a call. The negative effect of the Daily Tracking Fee will reduce your final payment. If the level of the Index does not increase by an amount sufficient to offset the negative effect of the Daily Tracking Fee (less any Coupon Amounts you may be entitled to receive), or if the final Index level is less than the initial Index Closing Level (or the Index level at the time you purchase the Securities, as applicable), you may lose some or all of your investment upon UBS's exercise of its call right.**

### Security Calculation Agent

UBS Securities LLC will act as the "Security Calculation Agent." The Security Calculation Agent will be solely responsible for all determinations and calculations regarding the value of the Securities, including, among other things, at maturity or upon early redemption or call, or at other times, the Current Principal Amount, Current Indicative Value (or "intraday indicative value"), Closing Indicative Value, Market Disruption Events, Business Days, Index Business Days, the Index Factor, the Residual Factor, the Index Closing Level, the Daily Tracking Fee, the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Redemption Fee Amount, the Cash Settlement Amount, if any, that we will pay you at maturity, the Coupon Ex-Dates, the Coupon Record Dates, the Redemption Amount, if any, that we will pay you upon redemption, if applicable and the Call Settlement Amount, if any, that we will pay you in the event that UBS calls the Securities, and whether any day is a Business Day or Index Business Day and all such other matters as may be specified herein as matters to be determined by the Security Calculation Agent. The Security Calculation Agent will also be responsible for determining whether the Index has been discontinued and whether there has been a material change in the Index. The Security Calculation Agent will make all such determinations and calculations in its sole discretion, and absent manifest error, all determinations of the Security Calculation Agent will be conclusive for all purposes and binding on us, you and all other persons having an interest in the Security, without liability on the part of the Security Calculation Agent. You will not be entitled to any compensation from us for any loss suffered as a result of any determinations or calculations made by Security Calculation Agent. We may appoint a different Security Calculation Agent from time to time after the date of this prospectus supplement without your consent and without notifying you.

The Security Calculation Agent will provide written notice to the trustee at its New York office, on which notice the trustee may conclusively rely, of the amount to be paid at maturity or call, or upon early redemption, or on a Coupon Payment Date on or prior to 12:00 noon (New York City time) on the Business Day immediately preceding the Maturity Date, any Redemption Date, any Call Settlement Date or any Coupon Payment Date, as applicable.

All dollar amounts related to determination of the Coupon Amount, the Accrued Dividend, the Daily Dividend, if any, the Daily Tracking Fee, the Redemption Amount and Redemption Fee Amount, if any, per security, the Call Settlement Amount, if any, per security, the Current Principal Amount and the Cash Settlement Amount, if any, per security, will be rounded to the nearest ten-thousandth, with five one hundred-thousandths rounded upward (e.g., .76545 would be rounded up to .7655); and all dollar amounts paid on the Stated Principal Amount of Securities per holder will be rounded to the nearest cent, with one-half cent rounded upward.

### Market Disruption Event

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing during a five-day Measurement Period, the Index Closing Level for such day will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. The remaining Index Business Days in the Measurement Period will be postponed accordingly, and the remaining Index Business Days in the Measurement Period will resume again following the suspension of the Market Disruption Event. For example, if the five-day Measurement Period for purposes of calculating the Call Settlement Amount, is scheduled for June 2, June 3, June 4, June 5 and June 6, and there is a Market Disruption Event with respect to the Index on June 2, but no other Market Disruption Event during such Call Measurement Period, then June 3 will become the first Index Business Day of the Measurement Period, June 4th the second Index Business Day, June 5th the third Index Business Day, June 6th the fourth Index Business Day and the next Index Business Day after June 6th would be the final day of the Measurement Period. The same approach would be applied if there is a Market Disruption Event during a five-day Final Measurement Period.

To the extent a Market Disruption Event with respect to the Index has occurred or is continuing on the Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date) or the Calculation Date (in the event that the Final Measurement Period is the Calculation Date), the Index Closing Level for such Redemption Valuation Date, Call Valuation Date or Calculation Date will be determined by the Security Calculation Agent or one of its affiliates on the first succeeding Index Business Day on which a Market Disruption Event does not occur or is not continuing with respect to the Index. For example, if the Redemption Valuation Date, for purposes of calculating a Redemption Amount, is based on the Index Closing Level on June 2 and there is a Market Disruption Event with respect to the Index on June 2, then the Index Closing Level on June 3 will be used to calculate the Redemption Amount, assuming that no such Market Disruption Event has occurred or is continuing on June 3.

In no event, however, will any postponement pursuant to the two immediately preceding paragraphs result in the affected Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date (in the event that the Call Measurement Period is the Call Valuation Date) or Calculation Date (in the event that the Final Measurement Period is the Calculation Date) occurring more than five Index Business Days following the day originally scheduled to be such Index Business Day of the Measurement Period or such Redemption Valuation Date, Call Valuation Date or Calculation Date. If a Market Disruption Event has occurred or is continuing with respect to the Index on the fifth Index Business Day following the date originally scheduled to be such Index Business Day of the Measurement Period or any Redemption Valuation Date, Call Valuation Date or Calculation Date, the Security Calculation Agent or one of its affiliates will determine the Index Closing Level based on its good faith estimate of the Index Closing Level that would have prevailed on such fifth Index Business Day but for such Market Disruption Event.

Any of the following will be a "**Market Disruption Event**" with respect to the Index, in each case as determined by the Security Calculation Agent in its sole discretion:

a) suspension, absence or material limitation of trading in a material number of Index Constituent Securities, whether by reason of movements in price exceeding limits permitted by the Primary Exchange or otherwise;

b) suspension, absence or material limitation of trading in option or futures contracts relating to the Index or to a material number of Index Constituent Securities in the primary market or markets for those contracts;

c) the Index is not published; or

d) in any other event, if the Security Calculation Agent determines in its sole discretion that the event materially interferes with our ability or the ability of any of our affiliates to unwind all or a material portion of a hedge with respect to the Securities that we or our affiliates have effected or may effect as described in the section entitled "Use of Proceeds and Hedging".

The following events will not be Market Disruption Events with respect to the Index:

a) a limitation on the hours or numbers of days of trading, but only if the limitation results from an announced change in the regular business hours of the relevant market; or

b) a decision to permanently discontinue trading in the option or futures contracts relating to the Index or any Index Constituent Securities.

For this purpose, an "**absence of trading**" in the primary securities market on which option or futures contracts related to the Index or any Index Constituent Securities are traded will not include any time when that market is itself closed for trading under ordinary circumstances.

**Redemption Price Upon Optional Tax Redemption**

We have the right to redeem the Securities in the circumstances described under "Description of Debt Securities We May Offer — Optional Tax Redemption" in the accompanying prospectus. If we exercise this right, the redemption price of the Securities will be determined by the Security Calculation Agent in a manner reasonably calculated to preserve your and our relative economic positions.

**Default Amount on Acceleration**

If an event of default occurs and the maturity of the Securities is accelerated, we will pay the default amount in respect of the principal of the Securities at maturity. We describe the default amount below under "— Default Amount." In addition to the default amount described below, we will also pay the Coupon Amount per Security, if any, with respect to the final Coupon Payment Date, as described above under "— Coupon Payment," calculated as if the date of acceleration was the last Index Business Day in the Final Measurement Period and the three Index Business Days immediately preceding the date of acceleration were the corresponding Index Business Days in the accelerated Final Measurement Period, with the third Index Business Day immediately preceding the date of acceleration being the accelerated Calculation Date and the accelerated final Coupon Valuation Date, and the Index Business Day immediately preceding the date of acceleration being the relevant final Coupon Valuation Date.

For the purpose of determining whether the holders of our Medium-Term Notes, Series B, of which the Securities are a part, are entitled to take any action under the indenture, we will treat the outstanding principal amount of the Medium-Term Notes, Series B, as constituting the outstanding principal amount of the Securities. Although the terms of the Securities may differ from those of the other Medium-Term Notes, Series B, holders of specified percentages in principal amount of all Medium-Term Notes, Series B, together in some cases with other series of our debt securities, will be able to take action affecting all the Medium-Term Notes, Series B, including the Securities. This action may involve changing some of the terms that apply to the Medium-Term Notes, Series B, accelerating the maturity of the Medium-Term Notes, Series B after a default or waiving some of our obligations under the indenture. We discuss these matters in the attached prospectus under "Description of Debt

Securities We May Offer — Default, Remedies and Waiver of Default" and "Description of Debt Securities We May Offer — Modification and Waiver of Covenants."

**Default Amount**

The default amount for the Securities on any day will be an amount, in U.S. dollars as determined by the Security Calculation Agent, in its sole discretion, for the aggregate Stated Principal Amount of the Securities, equal to the cost of having a qualified financial institution, of the kind and selected as described below, expressly assume all our payment and other obligations with respect to the Securities as of that day and as if no default or acceleration had occurred, or to undertake other obligations providing substantially equivalent economic value to you with respect to the Securities. That cost will equal:

- the lowest amount that a qualified financial institution would charge to effect this assumption or undertaking, plus
- the reasonable expenses, including reasonable attorneys' fees, incurred by the holders of the Securities in preparing any documentation necessary for this assumption or undertaking.

During the default quotation period for the Securities, which we describe below, the holders of the Securities and/or we may request a qualified financial institution to provide a quotation of the amount it would charge to effect this assumption or undertaking. If either party obtains a quotation, it must notify the other party in writing of the quotation. The amount referred to in the first bullet point above will equal the lowest — or, if there is only one, the only — quotation obtained, and as to which notice is so given, during the default quotation period. With respect to any quotation, however, the party not obtaining the quotation may object, on reasonable and significant grounds, to the assumption or undertaking by the qualified financial institution providing the quotation and notify the other party in writing of those grounds within two Business Days after the last day of the default quotation period, in which case that quotation will be disregarded in determining the default amount.

**Default Quotation Period**

The default quotation period is the period beginning on the day the default amount first becomes due and ending on the third Business Day after that day, unless:

- no quotation of the kind referred to above is obtained, or
- every quotation of that kind obtained is objected to within five (5) Business Days after the due date as described above.

If either of these two events occurs, the default quotation period will continue until the third Business Day after the first Business Day on which prompt notice of a quotation is given as described above. If that quotation is objected to as described above within five (5) Business Days after that first Business Day, however, the default quotation period will continue as described in the prior sentence and this sentence.

In any event, if the default quotation period and the subsequent two Business Day objection period have not ended before the Calculation Date, then the default amount will equal the Stated Principal Amount of the Securities.

**Qualified Financial Institutions**

For the purpose of determining the default amount at any time, a qualified financial institution must be a financial institution organized under the laws of any jurisdiction in the United States of America, Europe or Japan, which at that time has outstanding debt obligations with a stated maturity of one year or less from the date of issue and rated either:

- A-1 or higher by Standard & Poor's Financial Services LLC, a subsidiary of The McGraw-Hill Companies, Inc. ,or any successor, or any other comparable rating then used by that rating agency, or
- P-1 or higher by Moody's Investors Service or any successor, or any other comparable rating then used by that rating agency.
