Ver.2.7

Applicable on September 28, 2026

JPX Market Innovation & Research, Inc.

～ **Table of Contents** ～

1. Introduction

This document explains the specifications for the output files provided by the TMI Web service. This document contains the file output screens along with the specifications for the output files.

2. Outline of Files Provided

2. 1 Outline of files provided

The files provided are summarized as follows.

File Number	Information Provided	Outline	Period
1	Master File	Covers domestic listed companies listed on all domestic stock exchanges. Does not provide information on securities listed on foreign exchanges or foreign products (ETFs, DRs, REITs, JDRs, etc.). In addition to basic information such as company Name, trading unit, Registrar, dividend record date stated in the articles of incorporation, listed market, and Margin Transaction category, detailed information including Fiscal Term, Interim Term and ex-dividend flags are provided.	Past 10 business days, plus today, plus next business day (12 days)
2	O/H/L/C Price (Cash Equities)	Provides opening, high, low and closing prices for the data provision date, for cash equities (stocks and bonds) traded on the TSE.	Past 10 business days plus data provision day (11 days)
3	Outstanding Margin Trading by Issue	Provides information about outstanding margin trading as of the application date, for cash equities traded on TSE.	Past 10 business day

Notes1

The information set in file 1 above is the master data for each security as of the business day following the information provision date (that date is also set as the “effective date” inside the files). Please note the following items regarding the information contents.

- For newly listed securities, recording begins from files transmitted the business day before the listing date. For delisted securities, recording ends with files transmitted the business day before the delisting date.
- When changes occur to submitted information contents on the information provision date itself, those changes may not be reflected regardless of the preparation timing of the transmitted file. In such cases, the changes will be reflected in information provided from the following business day.

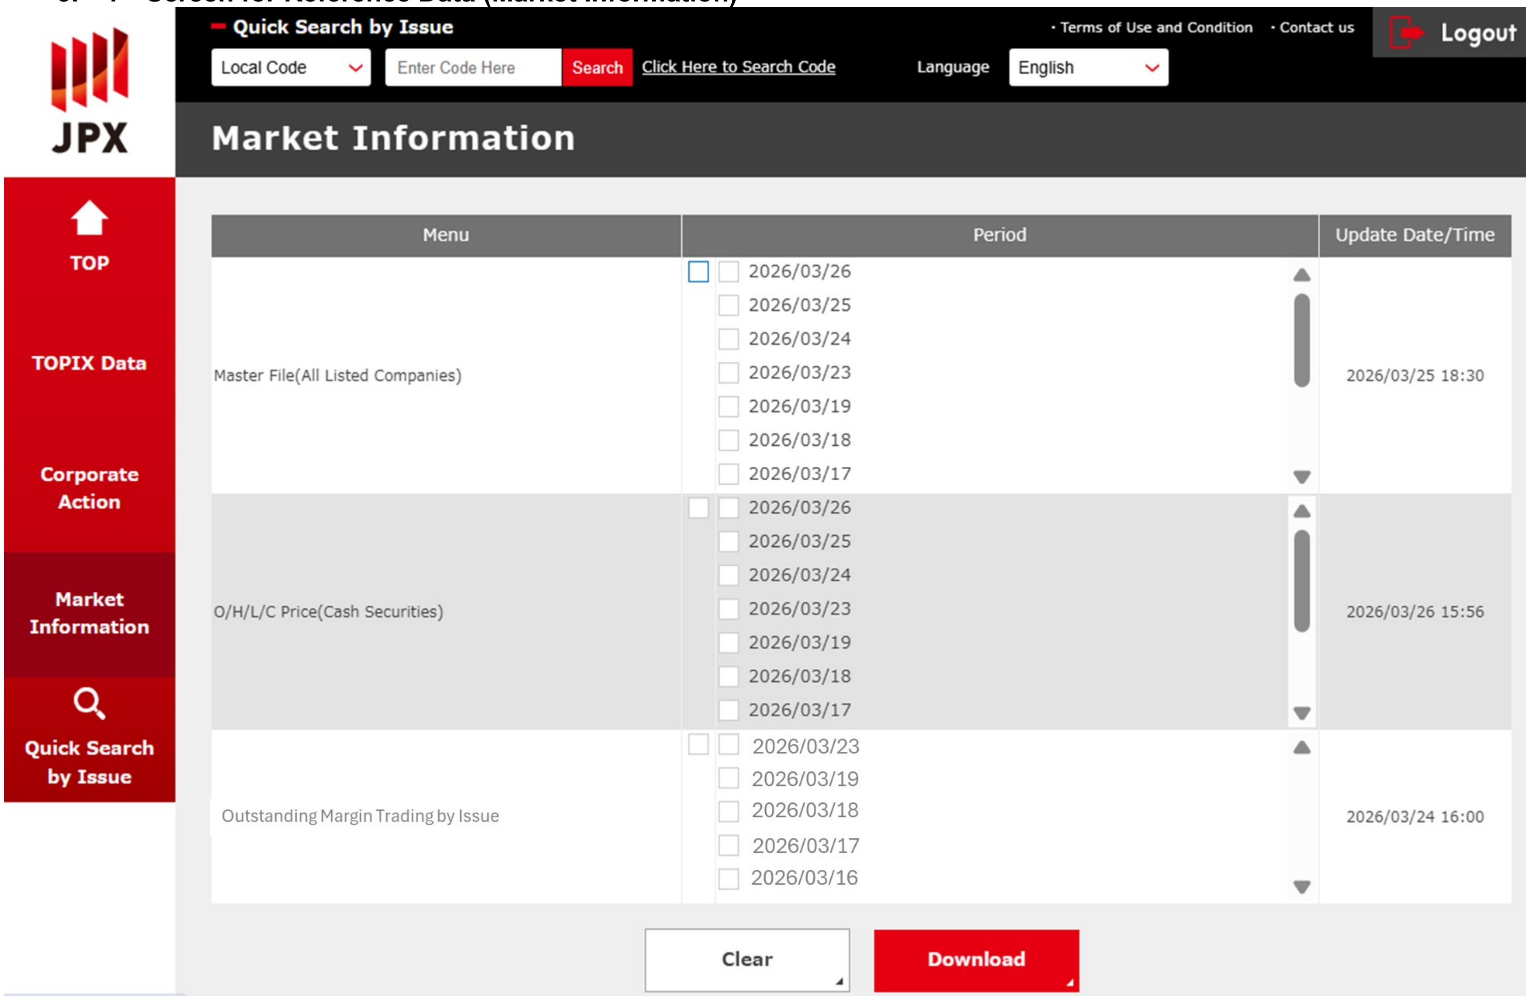
2. 2 Timing of File Updates

The data in the files provided is updated in accordance with the following schedule.

File Number	Information Provided	Update Timing
1	Master File	19:30
2	O/H/L/C Price (Cash Equities)	16:30
3	Outstanding Margin Trading by Issue	16:00

3. Screens and Output File Specifications

3. 1 Screen for Reference Data (Market Information)



3. 2 Data Format

- "Item Name" is set in the first line of the file.
- A one-byte comma (,) is set between each field.
- In all files, each data item is surrounded by single-byte double quotation marks ("). The quotation marks are also used for "Null" data items, which are denoted by two double quotation marks in a row (""). (These double quotation marks do not appear when Microsoft®* Excel is used for CSV files).

  *Microsoft® is a registered trademark of Microsoft® Corporation in the United States and other countries.
- Data items for which "Null" can be set are denoted by the symbol "○".
- Len (Length) specifies the maximum length of the data (not including the double quotation marks).

3. 2. 1 Master File

No.	Item Name	Data Contents	Len	Null	Remarks
1	Effective Date	Data effective date YYYYMMDD format	8		
2	Local Code	Unique securities code assigned by the Securities Identification Code Committee For stocks, this is a 9-digit code comprising 4 single-byte spaces, a 4-digit securities code assigned by the Securities Identification Code Committee, and a 1-digit reserve code which is set at "0" for common stock.	9		
3	ISIN	ISIN (International Securities Identification Number) code for the relevant security, arranged by the Securities Identification Code Committee. This comprises a country code (2 digits), an issuance body code (6 digits), a securities type code (3 digits), and a check digit (1 digit)	12	○	
4	Name	"Null" is set.	240	○	
5	Reserved Field	"Null" is set.	240	○	
6	Name (English)	English language name of the relevant security	240	○	
7	Sector (Code)	Sector code	4	○	See Attachment 1 for more details.
8	Trading Unit	Trading unit of the relevant security	13	○	
9	Board Lot Size	Indicates the board lot size of the relevant security; set at "Null" for securities that do not adopt the board lot size system.	8	○	
10	Registrar	Name of registrar	140	○	
11	Reserved Field	"Null" is set.	400	○	
12	Reserved Field	"Null" is set.	400	○	
13	Reserved Field	"Null" is set.	400	○	
14	Fiscal Term	Last date of the fiscal term in MMDD format, showing ordinary term, irregular term 1 or	4	○	

No.	Item Name	Data Contents	Len	Null	Remarks
		irregular term 2 Set at “0299” (MMDD) for fiscal terms ending at the end of February.			
15	Interim Term	Last date of the interim term in MMDD format, showing ordinary term, irregular term 1, or irregular term 2 Set at “0299” (MMDD) for interim terms ending at the end of February; set at “0000” when there is no interim settlement or when there is an irregular settlement.	4	○	
16	Irregular Term Start	First date of the irregular term in YYYYMMDD format	8	○	When a company plans to have an irregular term, the information may be set before the date when the changes to the fiscal term come into effect.
17	Irregular Term End	Last date of the irregular term in YYYYMMDD format	8	○	
18	Dividend Record Date 1	Dividend record date set in the Articles of Incorporation for ordinary fiscal terms The contents of the separate data items “fiscal term” and “interim term” are set when ordinary term is set. MMDD format Set at “0299” (MMDD) for record dates at the end of February; set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	4	○	
19	Dividend Record Date 2	Dividend record date set in the Articles of Incorporation for ordinary fiscal terms The contents of the separate data items “fiscal term” and “interim term” are set when ordinary term is set. MMDD format Set at “0299” (MMDD) for record dates at the end of February; set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	4	○	
20	Dividend Record Date 3	Dividend record date set in the Articles of Incorporation for ordinary fiscal terms The contents of the separate data items “fiscal term” and “interim term” are set when ordinary term is set. MMDD format Set at “0299” (MMDD) for record dates at the end of February; set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	4	○	
21	Dividend Record Date 4	Dividend record date set in the Articles of Incorporation for ordinary fiscal terms The contents of the separate data items “fiscal term” and “interim term” are set when ordinary term is set. MMDD format Set at “0299” (MMDD) for record dates at the end of February; set at “Null” for REITs,	4	○	

No.	Item Name	Data Contents	Len	Null	Remarks
		ETFs, etc. (securities with securities type codes 0A, B1 or B2).			
22	Dividend Record Date 5	Dividend record date set in the Articles of Incorporation for ordinary fiscal terms The contents of the separate data items “fiscal term” and “interim term” are set when ordinary term is set. MMDD format Set at “0299” (MMDD) for record dates at the end of February; set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	4	○	
23	Dividend Record Date 6	Dividend record date set in the Articles of Incorporation for ordinary fiscal terms The contents of the separate data items “fiscal term” and “interim term” are set when ordinary term is set. MMDD format Set at “0299” (MMDD) for record dates at the end of February; set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	4	○	
24	Dividend Record Date 1 (Irregular term 1)	Dividend record date for irregular term 1 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 1 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
25	Dividend Record Date 2 (Irregular term 1)	Dividend record date for irregularl term 1 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 1 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
26	Dividend Record Date 3 (Irregular term 1)	Dividend record date for irregular term 1 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 1 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
27	Dividend Record Date 4 (Irregular term 1)	Dividend record date for irregular term 1 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 1 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
28	Dividend Record Date 5 (Irregular	Dividend record date for irregular term 1 The contents of the separate data items “fiscal term” and “interim term” are set when	8	○	

No.	Item Name	Data Contents	Len	Null	Remarks
	term 1)	irregular term 1 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).			
29	Dividend Record Date 6 (Irregular term 1)	Dividend record date for irregular term 1 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 1 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
30	Dividend Record Date 1 (Irregular term 2)	Dividend record date for irregular term 2 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 2 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
31	Dividend Record Date 2 (Irregular term 2)	Dividend record date for irregular term 2 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 2 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
32	Dividend Record Date 3 (Irregular term 2)	Dividend record date for irregular term 2 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 2 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
33	Dividend Record Date 4 (Irregular term 2)	Dividend record date for irregular term 2 The contents of the separate data items “fiscal term” and “interim term” are set when irregular term 2 is set. YYYYMMDD format Set at “Null” for REITs, ETFs, etc. (securities with securities type codes 0A, B1 or B2).	8	○	
34	TSE New Listing Identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the Tokyo Stock Exchange (TSE).	1	○	
35	Reserved Field	“Null” is set.	8	○	
36	TSE Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the TSE.	1	○	See Attachment 2 for more details.

No.	Item Name	Data Contents	Len	Null	Remarks
37	TSE Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or single-byte space for securities not traded on the TSE.	1	○	See Attachment 4 for details on setting “0” or single-byte space.
38	TSE Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the TSE.	140	○	
39	OSE New Listing Identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the Osaka Securities Exchange (OSE).	1	○	
40	Reserved Field	“Null” is set.	8	○	
41	OSE Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the Osaka Securities Exchange (OSE).	1	○	See Attachment 2 for more details.
42	OSE Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or single-byte space for securities not traded on the OSE.	1	○	See Attachment 4 for details on setting “0” or single-byte space.
43	OSE Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the OSE.	140	○	
44	NSE New Listing Identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the Nagoya Stock Exchange (NSE).	1	○	
45	Reserved Field	“Null” is set.	8	○	
46	NSE Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the Nagoya Stock Exchange (NSE).	1	○	See Attachment 2 for more details.
47	NSE Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or a single-byte space for securities not traded on the NSE.	1	○	See Attachment 4 for details on setting “0” or single-byte space.
48	NSE Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the NSE.	140	○	
49	FSE New Listing Identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the Fukuoka Stock Exchange (FSE).	1	○	
50	Reserved Field	“Null” is set.	8	○	
51	FSE Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the Fukuoka Stock Exchange (FSE).	1	○	See Attachment 2 for more details.

No.	Item Name	Data Contents	Len	Null	Remarks
52	FSE Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or single-byte space for securities not traded on the FSE.	1	○	See Attachment 4 for details on setting “0” or single-byte space.
53	FSE Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the FSE	140	○	
54	SSE New Listing identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the Sapporo Securities Exchange (SSE).	1	○	
55	Reserved Field	“Null” is set.	8	○	
56	SSE Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the Sapporo Securities Exchange (SSE).	1	○	See Attachment 2 for more details.
57	SSE Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or single-byte space for securities not traded on the SSE.	1	○	See Attachment 4 for details on setting “0” or single-byte space.
58	SSE Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the SSE.	140	○	
59	JQ New Listing Identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the JQ market.	1	○	
60	Reserved Field	“Null” is set.	8	○	
61	JQ Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the JQ market.	1	○	See Attachment 2 for more details.
62	JQ Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or a single-byte space for securities not traded on the JQ market	1	○	See Attachment 4 for details on setting “0” or single-byte space.
63	JQ Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the JQ market.	140	○	
64	JSDA New Listing Identifier	Set at “1” when the relevant securities will be listed the following business day and at “0” in other cases. Set at “Null” for securities not traded on the JSDA market.	1	○	
65	Reserved Field	“Null” is set.	8	○	
66	JSDA Market Section(Code)	Market section (code) for the relevant security Set at “Null” for securities not traded on the JSDA market.	1	○	See Attachment 2 for more details.
67	JSDA Margin Transaction (Code)	Set at “1” for margin issues, “2” for loan issues, and “0” for others. Set at “0” or a single-byte space for securities not traded on the JSDA market	1	○	See Attachment 4 for details on setting “0”

No.	Item Name	Data Contents	Len	Null	Remarks
					or single-byte space.
68	JSDA Margin Transaction (Text)	Set at “Margin” for “1”, “Loan” for “2”, single-byte space for “0” and “Null” for single-byte spaces. Set at a single-byte space or “Null” for securities not traded on the JSDA market.	140	○	
69	Ex Dividend	Flag indicating whether the relevant security goes ex-dividend on the “effective date”, set at “1” if it is and at “Null” otherwise.	1	○	Set at “1” only if the date is the first date ex-dividend.
70	Ex New Share (Stock Split)	Set to “1” if the relevant security goes ex-rights on the “effective date”, and “Null” otherwise.	1	○	Set at “1” only if the date is the first date ex-dividend.
71	Ex New Share (Rights Issue)	Set to “1” if the relevant security goes ex-rights on the “effective date”, and “Null” otherwise.	1	○	Set at “1” only if the date is the first date ex-dividend.
72	Ex Date (Extraordinary General Shareholders Meeting)	Set to “1” if the relevant security goes ex-rights on the “effective date”, and “Null” otherwise.	1	○	Set at “1” only if the date is the first date ex-dividend.
73	Other Ex Date (Other Event)	Set to “1” if the relevant security goes ex-rights for other events on the “effective date” and “Null” otherwise.	1	○	Set at “1” only if the date is the first date ex-dividend.
74	Type of Other Event (Code)	Code for other event type. Set to “1” for allotment of stock, “2” for allotment of subscription rights, “3” for offering of subscription rights to shareholders, “4” for non-cash dividend, “5” (Issuer's Request for General Shareholders Notification), “9” for other events.	1	○	Set at the lowest number code when events overlap (for example, set at “1” when events coded “1” and “2” overlap)
75	Type of Other Event (Text)	“Allotment of Stock” (1), “Allotment of Subscription Rights” (2), “Offering of Subscription Rights to Shareholders” (3), “Non Cash Dividend” (4), “Issuer's Request for General Shareholders Notification” (5) , “Other Events” (9)	140	○

18	Long Standardized Margin Outstanding (value)	Set long margin outstanding (value) of standardized margin trading.	20	

Method for Reproducing Total Records in the Previous Specification

Total records that existed before September 28, 2026 can be reproduced by aggregating the values with using "Market Segment Code" and "Margin Code" as shown in the table below.

Classification	Data Contents	Market Segment Code	Margin Code
1	Loan margin trading issues total	All selected	2
2	Loan margin trading issues Prime Market total	0111	2
3	Loan margin trading issues Standard Market total	0112	2
4	Loan margin trading issues Growth Market total	0113	2
5	Loan margin trading issues investment trusts, etc. total	0109	2
6	Standardized margin trading issues other than loan margin trading issues total	All selected	1
7	Standardized margin trading issues other than loan margin trading issues Prime Market total	0111	1
8	Standardized margin trading issues other than loan margin trading issues Standard Market total	0112	1
9	Standardized margin trading issues other than loan margin trading issues Growth Market total	0113	1
A	Standardized margin trading issues other than loan margin trading issues investment trusts, etc. total	0109	1
B	Others (non-loan/standardized margin trading issues) total	All selected	3
C	Others (non-loan/standardized margin trading issues) Prime Market total	0111	3
D	Others (non-loan/standardized margin trading issues) Standard Market total	0112	3
E	Others (non-loan/standardized margin trading issues) Growth Market total	0113	3
F	Others (non-loan/standardized margin trading issues) investment trusts, etc. total	0109	3
G	Grand total	All selected	All selected
H	Prime Market total	0111	All selected
I	Standard Market total	0112	All selected
J	Growth Market total	0113	All selected
K	Investment trusts, etc. total	0109	All selected

Classification	Data Contents	Market Segment Code	Margin Code
M	Loan margin trading issues TOKYO PRO Market total	0105	2
O	Standardized margin trading issues other than loan margin trading issues TOKYO PRO Market total	0105	1
Q	Others (non-loan/standardized margin trading issues) TOKYO PRO Market total	0105	3
S	TOKYO PRO Market total	0105	All selected

*No. 13-18 indicates the Osaka Securities Exchange data before the merger with TSE effective in July 2013.
No. 37-40 indicates the JASDAQ data before the merger with OSE effected on 2010/10/12.

Attachment 3　Notes Regarding Numerical Data

Numerical data values (other than codes, dates and times) include signs (plus or minus) and decimal points.
The display formats for each type of data are as follows.

No.	LEN	Display Format	Content	Remarks
1	5	sN.NN	Sign (1) + Integers (1) + decimal point (1) + fractions (2)	
2	8	sN.NNNNN	Sign (1) + Integers (1) + decimal point (1) + fractions (5)	
3	17	sNNNNNNNNNNNNN.NN	Sign (1) + Integers (13) + decimal point (1) + fractions (2)	
4	20	sNNNNNNNNNNNNNN.NNNN	Sign (1) + Integers (14) + decimal point (1) + fractions (4)	
5	21	sNNNNNNNNNNNNNNNNNNNN	Sign (1) + Integers (20)	
6	26	sNNNNNNNNNNNNNNNNNNNN.NNNN	Sign (1) + Integers (20) + decimal point (1) + fractions (4)	
7	27	sNNNNNNNNNNNNNNNNNNNN.NNNNN	Sign (1) + Integers (20) + decimal point (1) + fractions (5)	
8	28	sNNNNNNNNNNNNNNNNNNNN.NNNNNN	Sign (1) + Integers (20) + decimal point (1) + fractions (6)	

s: Indicates the sign; only displayed when the sign is minus (-)
N: Indicates numerical data

Attachment 4 Regarding the Display Contents for Each Stock Exchange Margin Transaction in the Master File

If the separate file “Change in Securities Master Information” provides change in market section or margin transaction information for any markets after the renewal of the TMI in August 2008,, and the effective date for the information arrives, the margin transaction is set at “0” when the market section is “Null” for non listing exchanges.

In other cases, for example, for records with no changes in market section and margin transaction following the renewal of the TMI, the margin transaction is set at single-byte space when the market section is “Null” for non listing exchanges.

There have actually been no changes in stock market information (market category or margin category) for any market since the renewal of the TMI

Local Code	TSE		OSE		NSE	
	Market Section	Margin Transaction	Market Section	Margin Transaction	Market Section	Margin Transaction
1301	1	1	NULL	△	NULL	△

↓

The TSE margin transaction has changed since the renewal. In addition to the changes in the TSE margin transaction, for other markets when the market section is “Null” the margin transaction has been changed to “0”.

Local Code	TSE		OSE		NSE	
	Market Section	Margin Transaction	Market Section	Margin Transaction	Market Section	Margin Transaction
1301	1	2	NULL	0	NULL	0

Record of Changes

No	version	Date	Pages	Changes
1	1.0	2009/5/26		Initial Publication
2	1.1		33	Added “other than new stock” to the Data Contents field for number 4, “Issue Code”.
3	1.1		34、35, 36	Added “Initial price set at 0.0000” to 3.2.5 numbers 11 and 15, and 3.2.6 numbers 11 and 12.
4	1.1		36	Changed the setting contents to “NULL is set” in numbers 14 and 15, “Trading Value” and “VWAP”. Changed the contents of the “Trading Value” and “VWAP” fields to “-“ in the subsequent unit details chart.
