Identification Code Specifications for Futures and Options Transactions

(Amended in April and November 2008; March 2010; October 2011; November 2013; March and November 2014; November 2015; March 2016; March and May 2017; February, June and September 2018; August 2019; December 2020; September 2021; February 2022; May and November 2023)

I Composition (excluding Flexible Contracts)

(1)	(2)	(3)	(4)	(5)
Special	Put/call,	Contract month	Exercise price,	Underlying
transaction	spot/futures		etc.	index, etc.
	distinction			
1				

- II Allocation method (excluding Flexible Contracts)
 - (1)(2): Transaction type
 - (1): "1" is set to indicate special transactions.
 - (2): Futures/options classification and, in the case of options, put/call and spot/futures distinction shall be as follows.

	(Code)
Put options transaction (futures)	1 and 5
Call options transaction (futures)	2 and 7
Put options transaction (spot)	3 and 8
Call options transaction (spot)	4 and 9
Futures transaction	6

(Note1) Codes "5", "7", "8", and "9" will be used as reserved codes if an issue (exercise price) is set additionally in index options trading, government bond futures options trading, etc. and the same code for "Exercise price, etc." has already been set within the same contract month.

(Note2) Gold options use code for put/call options transaction (spot)

(3): Contract month

1st digit: A single-digit number representing a 10-year cycle is used to indicate the year of the contract month.

(e.g.)		(Code)		(Code)		(Code)
	2021	6	2025	0	2029	4
	2022	7	2026	1	2030	5
	2023	8	2027	2	2031	6
	2024	9	2028	3	2032	7

2nd and 3rd digits: Indicates the contract month, using the number to represent the month.

(e.g.)		(Code)
	Mar.	03
	Dec.	12

(Note 1) For futures inter-month spread trading, the contract month of a contract with the earlier expiration date is indicated.

(Note 2) For index options trading (excluding Nikkei 225 mini Options trading), government bond futures options trading, etc., the following codes will be used in the 2nd and 3rd digits of the "contract month" with priority given to lower numbers if an issue (exercise price) is set additionally and the same codes for "Put/call, spot/futures distinction" and "Exercise price, etc." have already been set within the same contract month. In such cases, codes "1" and "2" will be used for put/call options trading (futures), and codes "3" and "4" will be used for put/call options trading (spot).

(e.g.)			Month code		
Jan.	13	25	37	49	61
Feb.	14	26	38	50	62
Mar.	15	27	39	51	63
•					
Dec.	24	36	48	60	72

(Note 3) For Nikkei 225 mini Options trading, the contract month whose last trading day is the business day before the first Friday of each year (the first week of January) is set to "01". Henceforth, each contract month whose last trading day is the business day before the Friday of the following week will increase the number by 1. However, when a new issue (exercise price) is set and within the same contract month, the code representing "Put/call, spot/futures distinction" and the code representing "exercise price" are the same, priority will be given to the lowest number from "54" to "99", and it will be used each time. In this case, "3" and "4" will be used for codes representing "Put/call, spot/futures distinction."

(Reference Translation)

(e.g.)		Month code
1 W	Jan.	01
2W	Jan.	02
3W	Jan.	03

(Note 4) For Rolling Spot, "999" is set as the fixed value.

(4): Exercise price, etc.

a. Options trading

The exercise price will be coded as a 2-digit number as shown below.

However, "Long-term JGB standard" will be coded using the lower 2 digits of the quotient obtained by dividing the exercise price by 0.25.

(e.g.) Long-term JGB standard	(exercise price) JPY 120	(Code) 80
Tokyo Stock Price Index (TOPIX)	1,575	57
Nikkei Stock Average (Nikkei 225)	JPY 26,250	62
JPX-Nikkei Index 400	14,000	40
Gold	JPY 4,600	84

b. Futures trading

"00" will be used.

However, for futures inter-month spread trading, the contract with the later expiration date will be shown, using "01" to "04" in sequence. For example, "01" will be allocated to one whose contract month is the closest to that of the contract with the nearest expiration date.

(5): Underlying index, etc. (certificates or rights to be traded) will be indicated as the Appendix.

(e.g.)

• TOPIX Futures inter-month spread trading

Contract with the earlier expiration date: Contract month of Dec. 2010
Other contracts: Contract month of Mar. 2011

1 6 512 01 05

• Long-term JGB standard futures transaction: Contract month of Sep. 2004

1 6 909 00 01

• Tokyo Stock Price Index (spot) Call options transaction:

(TOPIX) 1,225 points

Contract month of Mar. 2005

1 4 003 22 05

III Composition for Flexible Contracts

(1)	(2)	(3)	(4)
Flexible	Put/Call,	Contract months/	Underlying
Contracts	Final Settlement	Exercise prices	Index, etc.
		0000	

IV Allocation Method for Flexible Options

- (1): "7" will be used for "Flexible Contracts". However, in cases the codes derived from the combination of (2), (3), and (4) will be duplicate, "8" and "9" will be used in ascending order.
- (2): The codes for "Put/Call, Final Settlement" will be as follows.
 - a. Options trading

	(Code)
SQ settlement-type put options trading	1
SQ settlement-type call options trading	2
Closing price settlement-type put options trading	3
Closing price settlement-type call options trading	4

b. Futures trading

	(Code)
SQ settlement-type	1 and 2
Closing price settlement-type	3 and 4

Note: "2" and "4" will be given priority to use in "Flexible Contracts" before "8" and "9" in case the codes derived from the combinations of (1), (3), and (4) are duplicates of existing issues.

- (3): For "Contract Months / Exercise Prices", "00001" to "99999" will be allocated in ascending order.
- (4): "Underlying Index, etc." will be set forth in the Appendix.

Additional rules:

- 1 The amended rules with "Note 2" added to (3) "Contract month" (month code) were implemented on April 1, 2008.
- 2 The amended rules with underlying index, etc. added (mini long-term JGB standard) were implemented on November 5, 2008.
- 3 The amended rules with underlying index, etc. added (TOPIX Dividend Index, etc.) were implemented on March 23, 2010.
- 4 The amended rules with underlying index, etc. added (Dow Jones Industrial Average) were implemented on October 3, 2011.
- 5 The amended rules with underlying index, etc. added (Nikkei Stock Average Volatility Index) were implemented on October 25, 2011.

- 6 The amended rules with underlying index, etc. added (CNX Nifty) were implemented on November 25, 2013.
- 7 The amended rules with underlying index, etc. added (JPX-Nikkei Index 400)were implemented on March 25, 2014.
- 8 The amended rules with "Note3" added to (3) "Contract month" (month code) and underlying index, etc. added (Nikkei 225 Options) were implemented on November 10,2014.
- 9 The amended rules with underlying index, etc. added (Tokyo Stock Exchange Mothers Index etc.) and changed Index name (Nifty 50) were implemented on November 27, 2015.
- 10 The amended rules with "Note2" added to II Allocation method (2) and "Note4" added to (3)" Contract month", underlying index, etc. added (Gold Standard etc.) were implemented on March 25, 2016.
- 11 The amended rules with underlying index, etc. added (Platinum Rolling Spot) were implemented on March 17, 2017.
- 12 The amended rules with underlying index, etc. added (Platts Cash-settled Lorry Gas Oil, etc.) were implemented on May 8, 2017.
- 13 The amended provisions related to "Put/Call Distinction", etc. shall be effective from February 13, 2018. The amended provisions related to Flexible Contract Months in III and IV shall be effective from June 25, 2018.
- 14 The amended rules with underlying index, etc. added (Rubber (TSR20)) were implemented on September 3, 2018.
- 15 The amended rules with underlying index, etc. added (West Area Base Load, etc.) were implemented on August 23, 2019.
- 16 The amended rules with underlying index, etc. added (CME Group Petroleum Index) were implemented on December 14, 2020.
- 17 The amended rules related to "Note 2" in (3) Contract month (month code), changes in the indexing method of exercise prices, etc. for options trading (Long-term JGB standard), and addition of futures trading to Flexible Contracts (including addition of underlying index, etc.) will be implemented on September 21, 2021. Moreover, the changes in the indexing method of exercise price, etc. for options trading (Long-term JGB standard) will not be applied retroactively to issues set before September 20, 2021 but applied in order to those issues set on and after September 21, 2021.
- 18 The amended rules with underlying index, etc. added (LNG (Platts JKM)) were implemented on February 8, 2022.
- 19 Changes to Note 2 and 3 in the method of setting "Contract month" and addition of "Underlying index, etc." (Nikkei Stock Average (Nikkei 225 micro), Nikkei Stock Average (Nikkei 225 mini Options), S&P/JPX 500 ESG Score Tilted Index (Slope 0.5), FTSE JPX Net Zero Japan 500 Index, Nikkei 225 Climate Change 1.5°C Target Index, and Uncollateralized Overnight Call Rate (TONA) 3-month Interest Rate) were implemented on May 29, 2023.

20	The amended rules with underlying index, etc. added (Niigata Koshihikari EXW (Osaka Doj
	Exchange), etc.) were implemented on November 2, 2023.
